B.A. Degree

Minimum Requirements for Degree: 120 credits

Rural development degree programs are designed to educate a new generation of community leaders for rural Alaska. The B.A. degree can be earned either on the Fairbanks campus or through distance delivery.

Students in the rural development program gain a broad understanding of Alaska's relationship to the global economy and an appreciation for sustainable development strategies. Students also learn specific tools essential for community leadership, including business plan and grant proposal writing, community visioning and planning processes, computer business applications, and project management and evaluation techniques. Graduates typically take positions with tribal and municipal governments, fisheries, tourism and other private businesses, Native corporations, regional health corporations or non-profits, and state/federal agencies.

Undergraduate degree students develop a concentration in one of five areas: community business and economic development; community research and indigenous knowledge; land, resources and environmental management; rural health and human services management; or tribal and local government administration.

Special application requirements and deadlines apply for distance B.A. degree programs. For more information contact the department toll-free at 1-800-770-9531 or visit our website.
