B.A., B.S. Degrees

Minimum Requirements for Degrees: 120 credits

Geography provides a holistic view of the earth, its distinct and varied regions, as well as the types of and interaction between human activities and the physical world. Geography is the two-way bridge between the physical and social sciences as it explores the interrelationships between the earth's physical and biological systems and how these environmental systems provide a natural resource base for human societies. Geography also provides the framework for the integration of new and emerging technologies such as GIS and remote sensing with studies in a broad range of academic disciplines.

Geographers are interested in patterns and processes of physical and social change, including climate change, geographic information science and technologies, human settlement patterns, natural resources distribution and management, environmental studies, and in the inherent "sense of place" among peoples throughout the world. Geographic methodologies include observation, measurement, description and analysis of places including likenesses, differences, interdependence and importance.

The geography B.A. degree provides broad cultural training and background in the liberal arts with an emphasis on the circumpolar North and Pacific Rim. The B.A. also provides a geographic perspective based on these regions and prepares students for careers in management, policy, teaching, field-based research, regional planning and private sector careers. The B.A. also provides an excellent foundation for advanced studies in a wide range of academic disciplines.

Three emphasis options are available to students pursuing the B.S. degree: environmental studies, landscape analysis and climate change studies, and geographic information science and technology.

Environmental studies provides the foundation necessary for understanding the natural and social environment, analysis of environmental issues from an interdisciplinary geographic perspective, a diverse technical and scientific approach to environmental issues, and the ability to find balanced solutions to environmental problems.

Landscape analysis and climate change studies integrate and synthesize courses in geography, climate change, physical and biological sciences, and geographic information sciences and technology. Students will gain a sound and interdisciplinary understanding of how environmental change influences landscape patterns and humans on both spatial (e.g., latitude, altitude) and temporal (e.g., past, future) scales. Senior practicum courses serve as integrating "capstone experiences" enabling students to apply what they have learned in real-world settings.

Geographic information science and technology emphasizes skills and practices in geographic information science, systems, technology and analytical aspects of geography. Courses in statistics, computer programming, GIS, GPS and remote sensing are integrated with the geography core curriculum and courses in natural sciences.

A minor in geography is also available.

Major — B.A. Degree

1. Complete the general university requirements (page 131).
2. Complete the B.A. degree requirements (page 136).
3. Complete the following required foundation courses:
   GEOG F101 — Expedition Earth: Introduction to Geography .. 3
   GEOG F111X — Earth and Environment: Elements of Physical Geography .......................................................... 4
   GEOG F312 — People, Places, and Environment: Principles of Human Geography ........................................ 3
   GEOG F338 — An Introduction to GIS ........................................ 3
   GEOG F490W,O — Geography Seminar .................................. 3
4. Complete the following program (major) requirements. Students will tailor their program through course selection from the categories below in consultation with their advisor to focus on a subspecialty in the Circumpolar North and/or the Pacific Rim.
   a. Regional Geography: Complete two of the following:
      GEOG F302 — Geography of Alaska ........................................ 3
      GEOG F303 — Geography of United States and Canada .......... 3
      GEOG F305W — Geography of Europe .................................. 3
      GEOG F306 — Geography of Russia ...................................... 3
      GEOG F311W — Geography of Asia ..................................... 3
      GEOG F410 — Geography of the Pacific Rim ....................... 3
      GEOG F427 — Polar Geography ........................................... 3
   b. Physical Geography: Complete one of the following:
      GEOG F339 — Maps and Landscape Analysis ......................... 3
      GEOG F307 — Weather and Climate ................................... 3
      GEOG F412 — Geography of Climate Change ....................... 3
      GEOG F418 — Biogeography ............................................... 3
   c. Human Geography: Complete one of the following:
      GEOG F203 — World Economic Geography ......................... 3
      GEOG F402 — Resources and Environment ......................... 3
      GEOG F404 — Urban Geography ......................................... 3
      GEOG F405 — Political Geography ..................................... 3
   d. Technique: Complete one of the following:
      GEOG F301 — Geographic Field Studies ............................... 3
      GEOG F309 — Digital Cartography and Geo-Visualization ...... 4
      GEOS F458 — Geoscience Applications of GPS and GIS ........ 3
   e. Electives: Complete two courses (six credits) from any of the above categories, or other courses appropriate to the student's chosen program of study. Both courses must be at F300-level or higher and approved by the student's advisor.
5. Complete approved electives .............................................. open
6. Minimum credits required .................................................. 120

Note: Geography majors are encouraged to reinforce their program focus with a minor in one of the following areas:
   Alaska Native Studies, Anthropology, Asian Studies, Economics, Environmental Politics, Foreign Languages, Geology, Geophysics, Global Studies, History, Journalism, Natural Resource Management, Northern Studies, Political Science, Rural Development, Russian Studies

Note: Students and faculty advisors should carefully review prerequisites for courses outlined in each required and/or optional area. In some instances courses, either in geography or other fields, require successful completion of from 1 – 3 prerequisite courses. Therefore, students and faculty should note minimum degree credit hours are 120, but the actual number of required course credits may exceed that number.

Major — B.S. Degree

1. Complete the general university requirements (page 131).
2. Complete the B.S. degree requirements (page 136).
3. Complete the following required foundation courses:
   GEOG F101 — Expedition Earth: Introduction to Geography .. 3
   GEOG F111X — Earth and Environment: Elements of Physical Geography .......................................................... 4
   GEOG F312 — People, Places, and Environment: Principles of Human Geography ........................................ 3
   GEOG F338 — An Introduction to GIS ........................................ 3
   GEOG F490W,O — Geography Seminar .................................. 3
4. Complete one of the following options:

Geography Option I — Environmental Studies

a. Complete the following:
   GEOG F207—Research Methods and Statistics in Geography..................3
   GEOG F307—Weather and Climate ..............................................3
   GEOG F339—Maps and Landscape Analysis ..................................3
   GEOG F402—Resources and Environment .....................................3

b. Complete 6 credits from the following environmental studies electives:
   GEOG F463—Wilderness Concepts ..............................................3
   NRM F303X—Environmental Ethics and Actions** ..........................3
   NRM F407—Environmental Law .................................................3

c. Complete 9 credits from the following environmental system electives:
   ANTH F428—Ecological Anthropology and Regional Sustainability*** .3
   BIOL F271—Principles of Ecology*** ............................................4
   BIOL/NRM F277—Introduction to Conservation Biology*** .................3
   GEOS F304—Geomorphology ......................................................3
   NRM F375—Forested Wildlife Law and Policy*** .........................3
   NRM F380W—Soils and the Environment*** ....................................3

d. Complete 3 credits from the following environmental management electives:
   FISI F487W0—Fisheries Management*** ........................................3
   NRM F365—Principles of Outdoor Recreation Management ................3
   NRM F430—Resource Management Planning ................................3
   NRM/WLF F431—Wildlife Law and Policy** .................................3
   NRM F450—Forest Management** ..............................................3
   NRM F480—Soil Management for Quality and Conservation** ..........3

e. Complete one of the following techniques courses:
   GEOG F301—Geographic Field Studies .........................................3
   GEOG F309—Digital Cartography and Geo-Visualization .................4
   GEOG F435—GIS Analysis ........................................................4
   GEOS F458—Geoscience Applications of GPS and GIS*** .................3

Geography Option II — Landscape Analysis and Climate Change Studies:

a. Complete B.S. degree options, including prerequisite course, PHYS F103X.

b. Complete the following GIS&T breadth:
   BIOL F103—Introduction to Computer Programming** ..................3
   STAT F200X—Elementary Probability and Statistics** ..................3
   GEOG F339—Maps and Landscape Analysis ..................................3
   GEOG F435—GIS Analysis ..........................................................3
   GEOG F469—Geographic Assessment and Prediction of Natural Hazards ...
   GEOG F489W—Senior Practicum: Field Studies in Landscape Analysis and Climate Change .......................4

c. Complete at least two courses of remote sensing electives:
   GE F471—Remote Sensing for Engineering** ...............................3
   GEOS F422—Geoscience Applications of Remote Sensing** .............3
   GEOS F434—Remote Sensing of the Cryosphere** .........................3
   NRM F641—Remote Sensing Applications in Natural Resources*** ...4

d. Complete at least two courses of GIS electives:
   GE F376—GIS in Geological and Environmental Engineering** ......3
   GEOS F309—Digital Cartography and Geo-Visualization ................4
   GEOG F458—Geoscience Applications of GIS and GIS*** .................3
   NRM F368—GIS Programming ..................................................3

5. Minimum credits required .........................................................120
   * Students must earn a C grade (2.0) or better in each course.
   ** If used to fulfill core requirements, NRM F303X may not also count towards geography major.
   *** Prerequisites required.
   ◊ Graduate level credit used to complete this undergraduate degree program may NOT be applied towards future graduate degree programs.

Note: Students and faculty advisors should carefully review prerequisites for courses outlined in each required and/or optional area. In some instances, courses, either in geography or other fields, require successful completion of from 1 – 3 prerequisite courses. Therefore, students and faculty should note minimum degree credit hours are 120, but the actual number of required course credits may exceed that number.

Minor

1. Complete the following:
   GEOG F101—Expedition Earth: Introduction to Geography (3)
   or GEOG F203—World Economic Geography (3) .........................3
   GEOG F111X—Earth and Environment: Elements of Physical Geography .........................................................4
   GEOG electives........................................................................8 – 9

2. Minimum credits required .........................................................15
All degrees (e.g. B.A., B.S., etc.) require additional courses. Refer to specific degree and program requirements.

Baccalaureate Core Requirements
(Note: all courses for Core must be completed with C- or higher.)

COMMUNICATION (9)
Complete the following:
ENGL F111X .................................................(3) ___

Complete one of the following:
ENGL F211X OR ENGL F213X ......................(3) ___

Complete one of the following:
COMM F131X OR COMM F141X ....................(3) ___

PERSPECTIVES ON THE HUMAN CONDITION (18)
Complete all of the following four courses:
ANTH F100X/SOC F100X .............................................(3) ___

ECON F100X OR PS F100X ...............................(3) ___

HIST F100X .....................................................(3) ___

ENGL/FL F200X .................................................(3) ___

Complete one of the following three courses:
ART/MUS/THR F200X, HUM F201X OR ANS F202X .... (3) ___

Complete one of the following six courses:
BA F323X, COMM F300X, JUST F300X, NRM F303X, PS F300X OR PHIL F322X .........................(3) ___

OR complete 12 credits from the above courses PLUS
• two semester-length courses in a single Alaska Native language or other non-English language OR
• three semester-length courses (9 credits) in American Sign Language taken at the university level.

MATHEMATICS (3)
Complete one of the following:
MATH F103X, MATH F107X, MATH F161X OR
STAT F200X ...................................................(3 – 4) ___

* No credit may be earned for more than one of MATH F107X or F161X.

OR complete one of the following:*
MATH F200X, MATH F201X, MATH F202X,
MATH F262X OR MATH F272X .........................(4) ___

*Or any math course having one of these as a prerequisite.

NATURAL SCIENCES (8)
Complete any two (4-credit) courses:
ATM F101X ....................................................(4) ___

BIOL F100X ....................................................(4) ___

BIOL F103X ....................................................(4) ___

BIOL F104X ....................................................(4) ___

BIOL F111X ....................................................(4) ___

BIOL F112X ....................................................(4) ___

BIOL F115X ....................................................(4) ___

BIOL F116X ....................................................(4) ___

CHEM F100X ...................................................(4) ___

CHEM F103X ...................................................(4) ___

CHEM F104X ...................................................(4) ___

CHEM F105X ...................................................(4) ___

CHEM F106X ...................................................(4) ___

CHEM F108X ...................................................(4) ___

CHEM F109X ...................................................(4) ___

GEOG F111X ...................................................(4) ___

GEOS F100X ...................................................(4) ___

GEOS F101X ...................................................(4) ___

GEOS F112X ...................................................(4) ___

GEOS F120X ...................................................(4) ___

GEOS F125X ...................................................(4) ___

MSL F111X .....................................................(4) ___

PHYS F102X ....................................................(4) ___

PHYS F103X ....................................................(4) ___

PHYS F104X ....................................................(4) ___

PHYS F115X ....................................................(4) ___

PHYS F116X ....................................................(4) ___

PHYS F117X ....................................................(4) ___

PHYS F211X ....................................................(4) ___

PHYS F212X ....................................................(4) ___

PHYS F213X ....................................................(4) ___

LIBRARY AND INFORMATION RESEARCH (0 – 1)
Successful completion of library skills competency test OR
LS F100X or F101X prior to junior standing.................(0 – 1) ___

UPPER-DIVISION WRITING AND ORAL COMMUNICATION (0)
Complete the following:
Two writing intensive courses designated (W) ..........(0) ___
and one oral communication intensive course designated (O) .........(0) ___

OR two oral communication intensive courses designated (O/2), at the upper-division level (see degree and/or major requirements) .........(0) ___

CORE CREDITS REQUIRED ................................ 38 – 39

Minimum credits required for degree ..................... 120
