M.S., Ph.D. Degrees
Minimum Requirements for Degrees: M.S.: 30 credits; Ph.D.: 18 thesis credits

Biochemistry and molecular biology is an interdepartmental program administered by the Department of Chemistry and Biochemistry with research support through the Institute of Arctic Biology. A broad range of biomedical research experiences are available including molecular and cellular neuroscience, proteomics, protein structure-function and molecular toxicology. The arctic environment provides additional research opportunities in environmental biochemistry, adaptations and molecular genetics.

UAF faculty and affiliate faculty at collaborating institutions provide a rich academic environment encompassing both research and comprehensive course offerings. Students with career interests in biotechnology, pharmaceutical sciences, environmental health, genetics and biomedicine are encouraged to apply. Students are normally accepted with financial support (fellowships, research assistantships and/or teaching assistantships) along with tuition waivers.

Graduate Program — M.S. Degree
1. Complete the general university requirements (page 202).
2. Complete the master’s degree requirements (page 206).
3. Complete the following:
   CHEM F654—Protein Structure and Function..........................3
   CHEM F657—Molecular Foundations of Gene Expression ..........3
   CHEM F674—Membrane Biochemistry and Biophysics.............3
5. Minimum credits required ............................................30

Graduate Program — M.S. Degree with Neuroscience Option
1. Complete the general university requirements (page 202).
2. Complete the master’s degree requirements (page 206).
3. Complete the following:
   CHEM F654—Protein Structure and Function..........................3
   CHEM F657—Molecular Foundations of Gene Expression ..........3
   CHEM F674—Membrane Biochemistry and Biophysics.............3
4. Complete three electives.
5. Complete a neuroscience research thesis
6. Minimum credits required ............................................30

Graduate Program — Ph.D. Degree
1. Complete the general university requirements (page 202).
2. Complete the Ph.D. degree requirements (page 207).
3. Complete the following:
   CHEM F654—Protein Structure and Function..........................3
   CHEM F657—Molecular Foundations of Gene Expression ..........3
   CHEM F674—Membrane Biochemistry and Biophysics.............3
4. Complete three electives.
5. Complete three electives with two of the electives in neuroscience.
7. Minimum credits required (including core courses) ..........38

Graduate Program — Ph.D. Degree with Neuroscience Option
1. Complete the general university requirements (page 202).
2. Complete the Ph.D. degree requirements (page 207).
3. Complete the following:
   CHEM F654—Protein Structure and Function..........................3
   CHEM F657—Molecular Foundations of Gene Expression ..........3
   CHEM F674—Membrane Biochemistry and Biophysics.............3
4. Complete three electives with two of the electives in neuroscience.
7. Minimum credits required (including core courses) ..........38
