BA Degree

Minimum Requirements for Degree: 120 – 130 credits

This program provides broad training in various aspects of Earth systems science. Three concentrations are available: Earth systems science, geological hazards and mitigation, and secondary education. The concentrations allow students to focus on different interests and career paths during their junior and senior years but offer considerable flexibility during the freshman and sophomore years.

The Earth systems science concentration offers students a sound background in a broad spectrum of Earth science disciplines, with an emphasis on the interaction between Earth systems. The geological hazards and mitigation concentration is designed for students who wish to pursue careers in communicating and mitigating natural hazards, analysis or emergency management-related natural disasters. The secondary education concentration is designed for students who wish to teach Earth science in secondary school in Alaska. Requirements for certified teachers have been built into this concentration in consultation with the School of Education. Students choosing this concentration should consult with both the Department of Geology and Geophysics and the School of Education for advising.

Major — BA Degree

1. Complete the general university requirements. (See page 131. As part of the core curriculum requirements, complete: NRM F303X*, CHEM F103X and CHEM F104X or CHEM F105X and CHEM F106X or PHYS F103X and PHYS F104X).

2. Complete the BA degree requirements. (See page 135. Note that social science courses are included in each of the concentrations. These courses may also be applied to the BA degree requirements).

3. Complete the following foundation courses:*
   - GEOS F101X — The Dynamic Earth .................................................. 4
   - or GEOS F120X — Glaciers, Earthquakes and Volcanoes .................. 4
   - GEOS F112X — The History of Earth and Life .................................. 4
   - or GEOS F106X — Life in the Age of Dinosaurs ................................ 4

4. Complete one of the following concentrations:

Earth Systems Science

a. Complete the following:*  
   - GEOS F304 — Geomorphology ......................................................... 3  
   - GEOS F315W — Paleobiology and Paleontology .............................. 4

b. Complete one course from each of the following areas:*  
   - Earth Systems  
     GEOS F101 — Expedition Earth: Introduction to Geography .............. 3  
     MSL F111X — The Oceans .......................................................... 4  
     NRM F101 — Natural Resource Conservation Policy ...................... 3  
     PHYS F175X — Introduction to Astronomy ...................................... 4

   - Earth Materials  
     GEOS F213 — Mineralogy ............................................................ 4  
     GEOS F262 — Rocks and Minerals .................................................. 4

   - Geospatial Sciences  
     GEOS F338 — Introduction to Geographic Information Systems ....... 3  
     GEOS F222 — Fundamentals of Geospatial Sciences ...................... 3  
     GEOS F225 — Field and Computer Methods in Geology (2) and GEOS F408 — Photogeology (2) ......................... 4

c. Complete one course from any two of the following areas:*  
   - Weather and Climate  
     ATM F101X — Weather and Climate of Alaska .............................. 4  
     GEOG F307 — Weather and Climate ............................................. 3

   - Natural Resources  
     GEOG F302 — Geology of Alaska ............................................... 3  
     GEOG F402 — Resources and Environment .................................. 3

   - Geoscience  
     GEOG F309 — Tectonics ............................................................. 3  
     GEOG F322 — Stratigraphy and Sedimentation .............................. 4

   - Geobiology  
     GEOG F485 — Mass Extinctions, Neocatastrophism, and the History of Life ................................................................. 3  

   - PHYS F175X — Introduction to Astronomy ...................................... 4  
   - STAT F200X — Elementary Probability and Statistics ................... 3

d. Complete 9 additional credits at the F300-level or above with an emphasis in geology, geography, biology, natural resources management or other Earth science-related field as approved by the undergraduate advisor, including one W (writing-intensive) course and one O (oral-intensive) course. ......................................................... 9

e. Complete any UAF minor. Courses used to satisfy the upper-division emphasis may also be applied towards the requirements for a minor.

f. Minimum credits required .................................................................. 120

Geological Hazards and Mitigation

a. As part of the core curriculum requirements, complete SOC F100X and COMM F300X.

b. Complete the following:*  
   - ED F486O/2 — Media Literacy ....................................................... 3  
   - ENGL F314W, O/2 — Technical Writing ........................................ 3  
   - GEOS F304 — Geomorphology ...................................................... 3  
   - GEOS F380 — Geological Hazards ................................................ 3  
   - GEOS F406 — Volcanology ............................................................ 3  
   - PHYS F175X — Introduction to Astronomy ...................................... 4  
   - STAT F200X — Elementary Probability and Statistics ................... 3

c. Complete one course from each of the following areas:*  
   - Earth Materials  
     GEOS F213 — Mineralogy ............................................................ 4  
     GEOS F315W — Paleobiology and Paleontology .............................. 4

   - Geospatial Sciences  
     GEOG F222 — Fundamentals of Geospatial Sciences ...................... 3  
     GEOG F225 — Field and Computer Methods in Geology (2) and GEOS F408 — Photogeology (2) ......................... 4

   - Weather and Climate  
     ATM F101X — Weather and Climate of Alaska .............................. 4  
     GEOG F307 — Weather and Climate ............................................. 3

d. Complete a minimum of two courses from one of the following specialized areas:*  
   - Mitigation  
     HSEM F412 — Emergency Planning and Preparedness .................... 3  
     HSEM F423 — Disaster Response Operations and Management ....... 3  
     HSEM F434 — All Hazards Risk Analysis ...................................... 3

   - Communications  
     COMM F335O — Organizational Communications .......................... 3  
     COMM F355 — Conflict, Mediation, and Communication ................. 3  
     COMM F441 — Persuasion ............................................................ 3

e. Complete any the requirements for a minor in geology, paleontology, geospatial sciences, geography, communications, journalism, sociology or other field related to communicating and mitigating natural hazards, as approved by the undergraduate advisor.

f. Minimum credits required .................................................................. 120
Secondary Education

a. Complete the following:
   - GEOG F101—Expedition Earth: Elements of Physical Geography ......................................................... 4
   - GEOS F262—Rocks and Minerals .............................................................. 3
   - GEOS F315W—Paleobiology and Paleontology ......................................................... 4
   - GEOS F475—Presentation Techniques in the Geosciences ........................................ 2
   - MSL F111X—The Oceans ........................................................................... 4
   - PHYS F175X—Introduction to Astronomy ................................................................. 4
   - PSY F101—Introduction to Psychology ................................................................. 3

b. Complete one course from each of the following areas:
   - Landform Analysis
     - GEOG F111X—Earth and Environment: Elements of Physical Geography ......................................................... 4
     - GEOS F304—Geomorphology ............................................................................. 3
   - Geospatial Sciences
     - GEOS F222—Fundamentals of Geospatial Sciences ........................................ 3
     - GEOS F225—Field and Computer Methods in Geology ........................................ 2
     - GEOS F338—Introduction to Geographic Information Systems ............................ 3
   - Weather and Climate
     - ATM F101X—Weather and Climate of Alaska ......................................................... 4
     - GEOG F307—Weather and Climate ................................................................. 3
   - Natural Resources
     - GEOG F302—Geography of Alaska ................................................................. 3
     - GEOG F402—Resources and Environment ................................................................. 3
   - Evolutionary Processes
     - GEOS F309—Tectonics ............................................................................. 3
     - GEOG F485—Mass Extinctions, Neocatastrophism, and the History of Life ................................. 3
     - GEOS F486—Vertebrate Paleontology ................................................................. 3

c. Complete the requirements for a minor in secondary education (see page 48) ................................................................. 16

d. Complete the additional requirements of the secondary education licensure program (see page 48)** ................................................................. 19

e. Minimum credits required ................................................................................. 130

* Students must earn a C- grade or better in each course.
** Note: We strongly recommend that prospective secondary science teachers seek advising from the UAF School of Education early in your undergraduate degree program, so that you can be appropriately advised of the State of Alaska requirements for teacher licensure.
Baccalaureate Core Requirements

Communication .............................................. 9 Credits
• ENGL F111X—Introduction to Academic Writing.................................(3)
  ENGL F190H may be substituted.

Complete one of the following:
• ENGL F211X—Academic Writing about Literature.................................(3)
• ENGL F213X—Academic Writing about the Social and Natural Sciences.....(3)

Complete one of the following:
• COMM F131X—Fundamentals of Oral Communication: Group Context .......(3)
• COMM F141X—Fundamentals of Oral Communication: Public Context......(3)

Perspectives on the Human Condition .......... 18 Credits

Complete all of the following four courses:
• ANTH F100X/SOC F100X—Individual, Society and Culture....................(3)
• ECON F100X or PS F100X—Political Economy .......................................(3)
• HIST F100X—Modern World History ..................................................(3)
• ENGL/FL F200X—World Literature ......................................................(3)

Complete one of the following three courses:
• ART/MUS/THR F200X—Aesthetic Appreciation: Intere...
