A Sample Course Description 249
Course Descriptions 250

Students converse in Spanish during the MAYmester class, Si Si! Summer Intensive Spanish Immersion at the Language Lab.
How to Read the Course Descriptions

This section contains complete information for all UAF courses. Unless otherwise indicated, course frequency refers to the offering of courses at the Fairbanks campus. The courses listed in this catalog are not offered at all UAF sites but may be offered if demand warrants and qualified faculty are available.

Courses are regularly offered at Bristol Bay Campus at Dillingham, Chukchi Campus at Kotzebue, Kuskokwim Campus at Bethel and Northwest Campus at Nome. Through the Interior-Aleutians Campus, courses are available at Fort Yukon, Galena, McGrath, Nenana, Tok and Unalaska. Information about the frequency of courses at these community sites can be obtained from the local UAF representative.

Course Numbers

The first numeral of a course numbered in the hundreds indicates the year in which a student typically takes the course. For example, ENGL F111X is usually for first-year students and ENGL F318 is for third-year students. Freshman and sophomore students are cautioned to register for upper-division (300- and 400-) level courses only if they have adequate preparation and background to undertake advanced study in the field in which those courses are offered.

000–049—Non-credit courses
050–099—Developmental courses
  Developmental courses are preparatory courses that do not apply to associate, baccalaureate or graduate degree requirements.
100–299—Lower-division courses
300–499—Upper-division courses
  Freshman and sophomore students may be required to obtain special permission to take 300- and 400-level courses unless the courses are required in the first two years of their curriculum as printed in this catalog.
500–599—Post-baccalaureate professional courses
  500-level courses are intended as post-baccalaureate experiences for professionals to continue their education at a level distinct from graduate level education. 500-level special topics and independent study courses (593, 595, 597) do not apply toward any degree, certification or credential program. 500-level courses are not interchangeable with 600-level courses for graduate degree programs.
600–699—Graduate Courses
  A few well-qualified undergraduates may be admitted to graduate courses with approval of the instructor. Students may not apply such a course to requirements for both a baccalaureate and a graduate degree.

STACKED AND CROSS-LISTED COURSES

Some courses are offered by an interdisciplinary program (such as Women’s Studies) with a specific disciplinary content (e.g., History). Some courses containing interdisciplinary content are sponsored by several departments (e.g., Theatre/Art/Music F200X). These courses are “cross-listed” and are designated in the class listings by “cross-listed with____.”

Courses are also sometimes offered simultaneously at different levels (for example: 100/200 or 400/600) with the higher level credit requiring additional effort and possibly a higher order of prerequisites from students. Such courses are referred to as “stacked” and are designated in the class listings by “stacked with ____.” In the case of 400/600-level stacked courses, graduate student enrollment and a higher level of effort and performance is required on the part of students earning graduate credit.

Courses simultaneously stacked and cross-listed are designated in the class listing as “Stacked with____ and cross-listed with____.”

For all stacked courses, the course syllabus (not the catalog) must stipulate course content and requirements for each level. The catalog should indicate the difference in prerequisites for each level.

Graduate students may not take any 600-level courses for credit if they have already received 400-level credit for that course in their undergraduate work. Individual exceptions to this rule include those courses where there has been a major shift in focus, and should be judged by the instructor and the department.

SPECIAL OR RESERVED NUMBERS

Courses with the suffix X (ENGL F111X, MATH F103X), meet specific baccalaureate core requirements. Courses with suffixes W or O meet upper-division writing intensive or oral communication intensive course requirements for the baccalaureate core.

Courses identified with numbers ending in -92 are seminars, covering various topics which may include group discussions and guest speakers; ending in -93 are special topics courses, normally offered one time only; -94, trial courses, offered in anticipation of becoming a permanent course; -95, special topics summer session courses, offered only during the summer; -97, individual study in subject areas not normally available; -98, non-thesis research/project, preparing for professional practice; and -99, thesis/dissertation, preparing for scholarly or research activity.

Courses identified with these special or reserved numbers may be available at all levels (e.g., 193, 293, 393, etc.) at the discretion of any department, although offerings above the level of approved programs must be approved in advance by the Provost (e.g., 600-level offerings in areas without approved graduate programs or 300- and 400-level courses in areas without approved baccalaureate programs). These courses may be repeated for credit.
Course Credits

One credit represents satisfactory completion of 800 minutes (one hour per week) of lecture, or 1,600 or 2,400 minutes of laboratory (or studio or other similar activity), whichever is appropriate. (It is understood that an average student will be expected to spend 1,600 [two hours per week] minutes of study and preparation outside of class in order to meet the learning objectives for the unit of credit in lecture.)

Laboratory classes require a minimum of 2,400 lab minutes per credit (three hours per week per credit), or a minimum of 1,600 lab minutes (two hours per week per credit) plus 800 minutes (one hour per week) of study and/or preparation outside of class. A course submission with a lab component must include a justification (in terms of required student work minutes outside of lab) if the laboratory does not require at least 2,400 lab minutes per credit.

The following standards establish the minimum requirements for an academic unit of credit:

1. 800 minutes of lecture (plus 1,600 minutes of study)
2. 1,600 or 2,400 minutes of laboratory (or studio or other similar activity) + 800 or 0 minutes of outside student work.
3. 2,400–4,800 minutes of supervised practicum
4. 2,400–8,000 minutes of internship (or externship, clinical)
5. 2,400–4,800 minutes of supervised scholarly activity

Credit hours may not be divided, except half-credit hours may be granted at the appropriate rate. For short courses and classes of less than one semester in duration, course hours may not be compressed into fewer than three days per credit. Any existing semester-long course that is to be offered in a format that is compressed to less than six weeks must be approved by the college or school’s curriculum council and the appropriate Faculty Senate committee. Any new course proposal must indicate those course compression format(s) in which the course will be taught. Only approved course formats will be allowed for scheduling.

A frequency of offering designator such as “Offered Fall” or “Offered Alternate Spring” follows many course descriptions. Every effort is made to ensure this designator is correct. However, students should review the current class schedule or check with individual departments for the most accurate and up-to-date information on future course offerings.

Specific Degree Requirements

Courses that may be used to satisfy specific degree requirements (e.g., humanities elective for the BA degree, or natural science elective for the BS degree) are identified in the course description section by the following degree requirement designators:

h—humanities
s—social science
m—mathematics
n—natural science
x—content is relevant to northern, arctic or circum-polar studies

For example, you may use ANTH F309—Arctic Prehistory (s), to satisfy the “social science elective” requirement for a bachelor of arts degree. Some courses, including all special topics and individual study courses, are not given course classifications.

A Sample Course Description

ENGL F310 W
Literary Criticism (h)
3 Credits
Offered Spring

History and principles of literary criticism, from earliest days to present. Prerequisite: ENGL F111X or permission of instructor. (3+0)
Student enrolling in School of Management courses are expected to have completed the necessary prerequisites for each course.

A per-semester student computing facility user fee will be assessed for student enrolling in one or more School of Management courses (AIS, ACCT, BA, ECON, HSEM, LEAD and MBA) except ECON F100X. This fee is in addition to any materials fees.

**ACCT F261**  
Principles of Financial Accounting  
3 Credits

An understanding of basic financial statements from a user perspective (investors, managers and creditors) is strongly emphasized. Material is presented in a fashion that promotes development of communication skills. The conceptual approach used in this course will sensitize the student to the implications of accounting decisions related to business transactions, while avoiding the detailed procedures that only accountants need to know. Emphasizes the recognition and recording of financial information, the creation and understanding of financial statements, and the role accounting information takes in business and society.  
**Prerequisites:** Sophomore standing or higher; placement, concurrent enrollment, or completion of MATH at the F100-level or above. (.3+0)

**ACCT F262**  
Principles of Managerial Accounting  
3 Credits

Study of the generation and analysis of accounting information and its uses by managers as they engage in planning, control and decision-making activities in business and non-business organizations. Topics include product costing, cost-volume-profit analysis, relevant costs for decision-making and capital budget decisions.  
**Prerequisites:** ACCT F261. (.3+0)

**ACCT F263**  
Accounting Processes  
1 Credit

Laboratory covering processes and procedures of accounting. Includes journals, ledgers and recording techniques, and understanding of contemporary accounting issues.  
**Prerequisites:** AIS F101; ACCT F261; ACCT F262 or concurrent enrollment in ACCT F262. (1+0)

**ACCT F330**  
Income Tax  
3 Credits

Offered Fall or Spring

Survey of basic concepts of federal taxation with emphasis on taxation of individuals and the impact of taxes on business and investment planning.  
**Prerequisites:** ACCT F361. (.3+0)

**ACCT F342**  
Managerial Cost Accounting  
3 Credits

Offered Fall or Spring

Cost accounting with managerial emphasis on planning, control and decision-making. Topics include cost-volume-profit analysis, costing systems, profit planning, flexible budgets, standard costs, responsibility accounting, inventory costing alternatives and relevant costs for decision-making. For accounting majors. Note: No credit may be earned for more than one of ACCT F342 or ACCT F352.  
**Prerequisites:** ACCT F262. (.3+0)

**ACCT F352**  
Management Accounting  
3 Credits

Offered Fall or Spring

Business policy profit planning, resource planning, control concepts, reporting for management control and impact of public reporting on management decisions. Note: For non-accounting majors only. No credit may be earned for more than one of ACCT F342 or ACCT F352.  
**Prerequisites:** ACCT F261; ACCT F262. (.3+0)

**ACCT F356**  
Internship in Accounting  
1–3 Credits

Offered As Demand Warrants

Supervised accounting work experience in an approved position related to the student’s career interests. Number of credits earned depends upon the type of position and time worked. No student may count more than 9 internship credits towards an undergraduate degree, with these credits being electives. Internship credits may not be taken as one of the two required senior-level accounting electives.  
**Prerequisites:** Permission of the SOM advisor. (0+6-14)

**ACCT F361**  
Intermediate Accounting  
3 Credits

Offered Fall

Discussions of financial accounting topics from the perspective of both accounting practice and theory. Working capital and fixed asset accounts are emphasized. Ethical and international accounting issues are emphasized throughout the sequence.  
**Prerequisites:** ACCT F262. (.3+0)

**ACCT F362**  
Intermediate Accounting  
3 Credits

Offered Spring

Discussion of financial accounting topics from the perspective of both accounting practice and theory. Long-term liabilities and stockholders equity are emphasized. Ethical and international accounting issues are emphasized throughout.  
**Prerequisites:** ACCT F361. (.3+0)

**ACCT F401**  
Advanced Accounting  
3 Credits

Offered Fall or Spring

Accounting for business combinations; parent-subsidiary and home office/branch relationships, partnerships and multinational enterprises.  
**Prerequisites:** ACCT F362. (.3+0)

**ACCT F404**  
Advanced Cost Accounting and Controllership  
3 Credits

Offered Fall or Spring

Study of the controllership function with emphasis on advanced cost and managerial accounting topics related to contemporary organizations.  
**Prerequisites:** ACCT F342. (.3+0)

**ACCT F414 O/2**  
Governmental and Nonprofit Accounting  
3 Credits

Offered Fall or Spring

Accounting for governmental units, public schools, colleges and universities, health care providers, voluntary health and welfare organizations and other nonprofit organizations.  
**Prerequisites:** ENGL F111X; ENGL F211X or F213X; COMM F131X or F141X; ACCT F362; ACCT F452 or ACCT F472. (.3+0)

**ACCT F430**  
Advanced Taxes  
3 Credits

Offered Fall or Spring

Advanced study of income taxation, emphasizing federal taxation of corporations and partnerships.  
**Prerequisites:** ACCT F330. (.3+0)

**ACCT F452 W**  
Auditing  
3 Credits

Offered Fall or Spring

Introduction to the professional standards and procedures applicable to an auditor’s examination of financial statements. Compliance and Operational auditing, ethical and legal responsibilities, and international auditing issues emphasized.  
**Prerequisites:** ACCT F362; AIS F316; ENGL F111X; ENGL F211X or ENGL F213X. (.3+0)

**ACCT F472 W**  
Internal and Government Auditing  
3 Credits

Offered Fall or Spring

Internal auditing including financial, compliance and performance audits. An overview of auditing concepts and practice is discussed with specific application to internal auditing and governmental auditing, including federal and state single audits. For auditor practitioners and students without field experience in auditing.  
**Prerequisites:** ENGL F111X; ENGL F211X or F213X; ACCT F362 or instructor permission. (.3+0)

**ACCT F656**  
Internship in Accounting  
1–3 Credits

Offered As Demand Warrants

Supervised accounting experience in an approved position related to the student’s career interests. (Note: Number of credits earned depend on the type of position and time worked. No graduate student may count more than six internship credits towards a graduate degree with these credits being electives.)  
**Prerequisites:** MBA standing or approval of MBA director. (0+6-14)
ACCOUNTING AND INFORMATION SYSTEMS

Students enrolling in School of Management courses are expected to have completed the necessary prerequisites for each course.

A per-semester student computing facility user fee will be assessed for student enrolling in one or more School or Management courses (AIS, ACCT, BA, ECON, HSEM, LEAD, and MBA) except ECON F100X. This fee is in addition to any materials fees.

AIS F101 Effective Personal Computer Use
3 Credits
Using and understanding advanced computing software applications. Course develops conceptual and practical knowledge of advanced presentation/communications software, database programs and operating systems. *(3+0)*

AIS F224 Advanced MS Excel
1 Credit
Offered As Demand Warrants
Advanced features of the Microsoft Excel spreadsheet program. Includes spreadsheet design and layout, customized graphics, customized reports using database features, optimization/statistical techniques and programming with the Excel macro language. Prerequisites: AIS F101 or permission of instructor. Student is assumed to have basic proficiency with Microsoft Excel. *(1+0)*

AIS F225 Windows Networking and Administration
1 Credit
Offered As Demand Warrants
Network engineering skills required to implement and support the Microsoft Windows OS. Includes installation, configuration, peer-to-peer networking, interoperability with Novell Netware, tuning and troubleshooting. Prerequisites: AIS F101; Experience using the Microsoft Windows OS; or permission of instructor. *(1+0)*

AIS F310 Management of Information Systems
3 Credits
The role information technology plays in organizations including its impact on information systems, management and business strategy. A conceptual model of system design is introduced and basic business internal controls are surveyed. Prerequisites: AIS F101. *(3+0)*

AIS F312 W Information Systems Technology
3 Credits
Offered As Demand Warrants
Introduction to the hardware and systems software underlying information systems; provides background to understand computer marketing literature and to select among technology alternatives. Prerequisites: ENGL F111X; ENGL F211X or ENGL F213X. *(3+0)*

AIS F316 Accounting Information Systems
3 Credits
Offered Fall or Spring
Accounting systems for business and public entities. Emphasis on internal control functions and design concepts. Prerequisites: AIS F101; ACCT F262. *(3+0)*

AIS F410 Systems Analysis and Program Design
3 Credits
Offered As Demand Warrants
The system development life cycle for database-oriented information systems in both mainframe and microcomputer environments. Includes programming in one or more fourth-generation languages and a term project. Prerequisites: AIS F310 or AIS F312. *(3+0)*

AIS F414 Database Design for Management Information
3 Credits
Offered As Demand Warrants
Combines advanced systems analysis using modern techniques of data modeling with study of management and administrative problems in coordination and management of organization data resources; focusing on needs of medium-sized and large organizations. Prerequisites: AIS F310 or CS F401. *(3+0)*

AIRFRAME AND POWERPLANT

AFPM F111 General Airframe and Powerplant
3 Credits
Offered As Demand Warrants
Shop practices, basic math, applied physics, FAA regulations, basic electricity, aircraft weight and balance, ground operations and servicing, cleaning and corrosion control, and materials and process. Preparation for the FAA Airframe Structures Written, Oral and Practical Exam. Special fees apply. Prerequisites: Experience requirements of FAR 65.77 or permission of instructor. *(3+0)*

AFPM F145 Basic Mathematics
1 Credit
Offered As Demand Warrants
Review of applied and technical mathematics related to the construction and engines of aircrafts. Common, decimal, fractions and mixed numbers; extracting square roots and raising numbers to a given power; solving ratios, proportions and percentage problems; fundamental algebraic operations. Special fees apply. Prerequisites: Admission to Airframe & Powerplant program or permission of instructor. *(1+0)*

AFPM F146 Basic Electricity
2 Credits
Offered As Demand Warrants
Electrical theory and concepts for the aviation mechanic. Ohm’s law, electrical circuits, diagrams, batteries and a variety of electrical components. Special fees apply. Prerequisites: Admission to A & P Program or permission of instructor. *(2+0)*

AFPM F147 Physics for Mechanics
0.5 Credit
Offered As Demand Warrants
Applications of mechanics; levers, sound, fluid and heat dynamics. Basic aircraft structures and aerodynamics. (Course does not fulfill natural science requirements for any degree.) Special fees apply. Prerequisites: Admission to A & P Program or permission of instructor. *(0.5+0)*

AFPM F148 Aircraft Drawing
1 Credit
Offered As Demand Warrants
Basic drafting. Drawings, symbols and schematic diagrams, sketches of repairs and alterations, blueprint information, graphs and charts. Special fees apply. Prerequisites: Admission to A & P Program or permission of instructor. *(1+0)*

AFPM F149 Fluid Lines and Fittings
0.5 Credit
Offered As Demand Warrants
Rigid and flexible fluid lines and fittings, fabrication and installation. Special fees apply. Prerequisites: Admission to A & P Program or permission of instructor. *(0.5+0)*

AFPM F150 Materials and Processes
2 Credits
Offered As Demand Warrants
Basic shop practices, including selection, identification and installation of aircraft hardware and materials, precision measuring tools and operations, basic heat treating processes, forms of nondestructive inspections. Special fees apply. Prerequisites: Admission to A & P Program or permission of instructor. *(2+0)*

AFPM F151 Cleaning and Corrosion Control
1 Credit
Offered As Demand Warrants
Basic aircraft cleaning materials, methods and corrosion control. Special fees apply. Prerequisites: Admission to A & P Program or permission of instructor. *(1+0)*

AFPM F152 Federal Aviation Regulations
1 Credit
Offered As Demand Warrants
Federal Aviation Regulations for maintenance of aircraft. Maintenance forms and records, publications, privileges and limitations of aircraft mechanics. Special fees apply. Prerequisites: Admission to A & P Program or permission of instructor. *(1+0)*

### ALASKA NATIVE LANGUAGES

Note: Two semester-length courses in a single Alaska Native Language or other non-English language taken at the university level may replace 6 credits in the Perspectives on the Human Condition section of the Core. ANL F141–F142 may be used to meet this requirement but then may not be used to meet humanities degree requirement.

</table>
ANL F142  Beginning Athabascan (h)  5 Credits  Offered Spring
Introduction to an Alaska Athabascan language. Class will deal with one of the eleven Athabascan languages spoken in Alaska. Literacy and grammatical analysis for speakers. For non-speakers, a framework for learning to speak, read and write the language. Prerequisites: ANL F141 in the same language or permission of instructor. (3+0)

ANL F150  Interpreting Communication (s)  1 Credit  Offered As Demand Warrants
Communication processes in Yup’ik and English speaking cultures. Solutions to identify problem areas in cross-cultural communication. Situations such as conversations, meetings, translating and interpreting. Interpreting meaning in what is communicated between people of different sociocultural backgrounds. Kuskokwim Campus only. (1+0)

ANL F151  Interethic Communications (s)  3 Credits  Offered As Demand Warrants
Understanding differences in cross-cultural interaction. Application of cross-cultural interactions to various communication settings. Concentrates on Yup’ik ways of communication. Kuskokwim Campus only. (3+0)

ANL F199  Practicum in Native Language Education  3 Credits  Offered As Demand Warrants
Individualized work experience. Variable credit (depending on the quantity and quality of the work experience). Offered on campus and via distance delivery. When offered via distance delivery, a local mentor (usually principal or teacher) must be willing to work with the student on the local level. (1-3+0)

ANL F208  Advanced Athabascan Literacy (h)  1–3 Credits  Offered As Demand Warrants
Expository and creative writing for native speakers; reading Athabascan literature; elicitation, transcription and editing of cultural materials from elders. (1-3+0)

ANL F221  Intermediate Conversational Alaska Native Language (h)  1–3 Credits  Offered As Demand Warrants
Continuation of ANL F212, ANL F212. Focus on conversational skills in a particular Alaska Native language. On completion of this course the student should not only be able to function at a low level of fluency but should also have the skills necessary to increase fluency through continued use of the language. Prerequisites: ANL F212; ANL F212; or permission of instructor. (1-3+0)

ANL F241  Intermediate Athabaskan-Koyukon or Gwich’in (h)  3 Credits  Offered Fall
Continuation of beginning Athabaskan-Koyukon or Gwich’in. One of these two languages will be taught. Development of conversational ability, additional grammar and vocabulary. Prerequisites: ANL F141 and ANL F142 in the same language or permission of instructor. (3+0)

ANL F242  Intermediate Athabaskan-Koyukon or Gwich’in (h)  3 Credits  Offered Spring
Continuation of beginning Athabaskan-Koyukon or Gwich’in. One of these two languages will be taught. Development of conversational ability, additional grammar and vocabulary. Prerequisites: ANL F141 and ANL F142 in the same language or permission of instructor. (3+0)

ANL F251  Introduction to Athabaskan Linguistics (h)  3 Credits  Offered Summer, As Demand Warrants
An introduction to the linguistic structure of the Athabaskan family of languages, drawing on examples from the Athabaskan languages of Alaska. Writing systems, word structure, texts, and language relationships. Techniques for accessing linguistic reference materials and the role of linguistic documentation in language revitalization and language learning. (3+0)

ANL F255  Introduction to Alaska Native Languages: Eskimo-Aleut  3 Credits  Offered As Demand Warrants
Overview of languages native to Alaska with special attention to the Eskimo-Aleut languages. Focus on a specific language or language area (optional as most relevant to a regional student body). Includes history, present and future of basic language structure, oral, linguistic and educational literature. (3+0)

ANL F256  Introduction to Alaska Native Languages: History, Status and Maintenance  3 Credits  Offered Spring Even-numbered Years
Overview of languages native to Alaska. Focus on a specific language or language area (optional as most relevant to a regional student body). History, current status and factors affecting the future maintenance of Alaska’s languages. Topics include educational policies, lexical development (including corpus planning and standardization), language status (including language maintenance and revival issues). (3+0)

ANL F287  Teaching Methods for Alaska Native Languages (h)  3 Credits  Offered As Demand Warrants
Methodological approaches and practice in teaching Native language and literacy to both speakers and non-speakers. Prerequisites: Knowledge of a Native language. (3-0)

ANL F288  Curriculum and Materials Development for Alaska Native Languages (h)  3 Credits  Offered As Demand Warrants
Preparation and evaluation of curriculum and classroom materials for teaching Native languages. Prerequisites: ANL F287; Knowledge of a Native language; or permission of instructor. (3-0)

ANL F289  Practicum in Native Language Education II  3 or 4 Credits  Offered As Demand Warrants
Individualized work experience. Supervised teaching with an experienced teacher overseeing student instructional activities and assisting with the class as needed. Note: Course may be repeated once for credit. Graded Pass/Fail. Prerequisites: ANL F199; ANL F287; ANL F288. (3 or 4+0+10)

ANL F315  Alaska Native Languages: Eskimo-Aleut (h)  3 Credits  Offered As Demand Warrants
A survey of the Native languages of Alaska, particularly Eskimo-Aleut: history, present and future, with examples of language structure, present situation and prospects as a cultural force. Open to all students. (3+0)

ANL F316  Alaska Native Languages: Indian Languages (h)  3 Credits  Offered As Demand Warrants
A survey of all Native languages of Alaska; particularly of the Indian languages: Athabaskan-Eyak-Tlingit, Haida and Tsimshian. History, present and future; examples of language structure, present situation and prospects as a cultural force. Open to all students. (3+0)

ANL F401  Alaska Native Language Apprenticeship (h)  5 Credits  Offered As Demand Warrants
Structured study of an Alaska Native Language. Select and work intensively with a mentor (a native speaker of the language selected). Choice of mentor requires faculty approval. Meet regularly with mentor (minimum 10 hours per week) and participate in regular training sessions to work toward fluency. Graded Pass/Fail. Prerequisites: One year university-level study in language of internship or permission of instructor. (0.5+10+10)

ANL F402  Alaska Native Language Apprenticeship (h)  5 Credits  Offered As Demand Warrants
Structured study of an Alaska Native language. Select and work intensively with a mentor (a native speaker of the language selected). Choice of mentor requires faculty approval. Meet regularly with mentor (minimum 10 hours per week) and participate in regular training sessions to work toward fluency. Graded Pass/Fail. Prerequisites: ANL F401. (0.5+10+10)
ANL F452 Principles of Linguistic Analysis for Alaska Native Languages 3 Credits Offered As Demand Warrants Systematic principles of phonology, morphology, syntax and semantics for the Athabascan-Eyak-Tlingit, Haida, Tsimshian and Eskimo-Aleut language family. This language family is central to this course; the specific Alaska Native language emphasized will be dependent on student interest. Includes exposure to a variety of references and tools available for research in Alaska Native languages and linguistics. Prerequisites: LING F101 or ANL F251. (3+0)

ANL F601 Seminar in Language Revitalization 3 Credits Offered As Demand Warrants Language teaching and acquisition strategies appropriate to under-documented and less commonly taught languages. Students write an applied research proposal related to local language endangerment issues and strategies for improving teaching either at the school or community level. Emphasis on students’ class presentation and research ideas. Prerequisites: LING F450; ANTH F451 or LING F601. (3+0)

ANL F608 Indigenous Knowledge Systems 3 Credits Offered Fall A comparative survey and analysis of the epistemological properties, world views and modes of transmission associated with various indigenous knowledge systems. Emphasis on knowledge systems practiced in Alaska. Prerequisites: Graduate standing or approval of instructor. Cross-listed with CCS F608; ED F608; RD F608. (3+0)

ANL F651 Topics in Athabaskan Linguistics 3 Credits Offered Fall Odd-numbered Years Graduate-level introduction to important topics in Athabaskan linguistics, including both foundational literature and current research. Topics may include laryngeal features; tonogenesis; the syntax-morphology interface; argument structure; lexical semantics; and discourse. Course may be repeated once for credit with permission of instructor. Prerequisites: LING F601 or equivalent; graduate standing. Recommended: LING F603; LING F604. Cross-listed with LING F651. (3+0)

ANL F690 Seminar in Cross-Cultural Studies 3 Credits Offered As Demand Warrants Investigation of current issues in cross-cultural contexts. Opportunity for students to synthesize their prior graduate studies and research. Seminar is taken near the terminus of a graduate program. Prerequisites: Advancement to candidacy and permission of student’s graduate committee. Cross-listed with CCS F690; ED F690; RD F690. (3+0)

ALASKA NATIVE STUDIES

ANS F100 Preparing for College and Student Success 1 Credit Presentations on time and financial management, test-taking strategies, study techniques, UAF and community resources, GPA calculation, UAF catalog information, core requirements, goal-setting and personal choices. Provides students with the information and skills necessary for a successful UAF experience. Instruction by the staff of Rural Student Services. Native leaders will be invited as regular guest speakers. (1+0)

ANS F101 Introduction to Alaska Native Studies 3 Credits Offered Fall Introductory information on the Alaska Native community. Overview of significant Native issues. Review of pertinent literature and resources. (3+0)

ANS F102 Orientation to Alaska Native Education 2 Credits A seminar in issues related to Alaska Native and rural education. Through weekly meetings held both on campus and in Fairbanks schools, students examine and discuss issues with Alaska Native educators on topics related specifically to rural and urban Alaska Native education. Issues include: Native ways of knowing, local control, curriculum development for small/multi-graded/rural schools, cultural differences in teaching and learning, and bilingual programs. Graded Pass/Fail. Prerequisites: Permission of instructor. Cross-listed with ED F102. (2+0)

ANS F111 History of Alaska Natives 3 Credits Offered Fall The history of Alaska Natives from contact to the signing of the Land Claims Settlement Act. Cross-listed with HIST F110. (3+0)

ANS F150 Topics in Alaska Regional Cultural History 3 Credits Offered As Demand Warrants Cultural history of the peoples of a selected region of Alaska, which will vary depending on demand and instructor expertise. Methods including physical anthropology, ethnohistory, linguistics, archaeology, social anthropology, ethnography, ecology and climatology will be used. Includes the issues of culture-change due to Alaska Native and Euro-American contacts. Recommended: ANS F242. (3+0)

ANS F160 Alaska Native Dance 1 Credit Traditional Native Alaskan dancing, singing and drumming of songs from Alaska’s major indigenous groups taught by guest Native elders and dancers. If there is sufficient interest, a dance group will be assembled using class members for spring presentations primarily in the Fairbanks area, including the Festival of Native Arts. Graded Pass/Fail. (0+2)

ANS F161 Introduction to Alaska Native Performance 3 Credits Offered Fall For Native and non-Native students with no prior acting or theatre experience. Includes both academic and practical components to examine traditional Alaska Native theatre mythology, ritual, ceremony and performance methods. Application of exercises and developmental scenes drawn from Alaska Native heritage. Cross-listed with THTR F161. (3+0)

ANS F202X Aesthetic Appreciation of Alaska Native Performance 3 Credits Offered Fall Understanding and application of the cultural principles of Alaska Native oral narrative performances. Topics are arranged by the five broad Alaska Native regions and include lectures on culture, principles of visual arts analysis of oral narratives, musical expression and hands-on involvement in Alaska Native theatrical arts. Prerequisites: Placement in ENGL F111X or higher or permission of instructor. (3+0)

ANS F223 Alaska Native Music 3 Credits Offered As Demand Warrants Eskimo and Indian dance and song styles in Alaska. Emphasis on the sound, effect and purpose unique to each and the collection methods, analysis and the development of a broad musical perspective. Cross-listed with MUS F223. (3+0)

ANS F242 Native Cultures of Alaska 3 Credits The traditional Aleut, Eskimo and Indian (Athabascan and Tlingit) cultures of Alaska. Eskimo and Indian cultures in Canada. Linguistic and cultural groupings, population changes, subsistence patterns, social organization and religion in terms of local ecology. Pre-contact interaction between groups. Cross-listed with ANTH F242. (3+0)

ANS F250 Current Alaska Native Leadership Perspectives 3 Credits Offered As Demand Warrants Prominent leaders in the Native community are brought into direct classroom contact with students to discuss important issues in rural Alaska and the larger Native community. (3+0)

ANS F251 Practicum in Native Cultural Expression 1–3 Credits Provides individual supervised activities in the formal organization, promotion and expression of Alaskan Native cultural heritage. May be repeated to a maximum of three credits. Graded Pass/Fail. Prerequisites: Permission of the department head. (1–3+0)
ALASKA NATIVE STUDIES (ANS)

ANS F268 Beginning Native Art Studio (h)\(\star\)
3 Credits
Understanding and applying traditional designs and technologies of Native art. Special fees apply. Prerequisites: ART F105 or permission of instructor. Cross-listed with ART F268. (1+4)

ANS F275 Yup'ik Practices in Spirituality and Philosophy (h)\(\star\)
3 Credits
Offered As Demand Warrants
Exploration of the processes in Yup'ik natural religion and the underlying philosophy that is the basis for Yup'ik existence in the spiritual realm. Wholeness of Yup'ik existence as it integrates into Western religion and philosophy. (3+0)

ANS F300 W Alaska Native Writers Workshop (h)\(\star\)
3 Credits
Offered As Demand Warrants
Rhetorical methods of creative expression of the Alaska Native experience. Emphasis on the student's development of expressive abilities in a variety of Native and Western forms. Publication of student work a possibility. Prerequisites: ENGL F111X; ENGL F211X or ENGL F213X; and permission of instructor. (3+0)

ANS F310 Indigenous Land Settlements (s)\(\star\)
3 Credits
Offered Spring
Native corporation goals and methods as they implement the Alaska Native Claims Settlement Act and establish themselves within the larger political economy. An examination of other indigenous land claims agreements in the circumpolar north and beyond. Prerequisites: ANTH F242 or PS F263 or HIST F110; or permission of instructor. (3+0)

ANS F315 Tribal People and Development (s)\(\star\)
3 Credits
Offered Spring-Even-numbered Years
Impact of socioeconomic development processes on tribal peoples in less developed world societies. Implications of these processes for Alaska Native people. Prerequisites: Junior standing or permission of instructor. Cross-listed with RD F315. (3+0)

ANS F320 W Language and Culture in Alaska (s)\(\star\)
3 Credits
Offered Alternate Spring
Course surveys relationships between language, culture and society with a special focus on the languages and cultures of Alaska. We review the study of linguistic anthropology, consider cultural variation in the socialization to language, multilingualism, language change, language shift, cultural variation in conversational practices, and relationships between language and identity (gender, ethnicity, nationalism). Prerequisites: LING F101; ENGL F111X; ENGL F211X or ENGL F213X or permission of instructor; Cross-listed with ANTH F320. (3+0)

ANS F325 Native Self Government (s)\(\star\)
3 Credits
Offered Spring Odd-numbered Years
Indigenous political systems, customary law and justice in Alaska emphasizing the organization of Native governance under federal Indian law and Alaska state-chartered local government. Comparisons between Alaska Native political development and those of tribes in the contiguous 48 states and northern hemisphere tribal people. Prerequisites: Any one or more of the following: HIST F110, PS F263, TM F201 or permission of instructor. Cross-listed with PS F325. (3+0)

ANS F330 Yup'ik Parenting and Child Development (h)\(\star\)
1–3 Credits
Offered As Demand Warrants
Processes, methods and evaluation of Yup'ik child rearing including how it is affected by other cultures and how these can be integrated into the process. Only offered at Kuskokwim Campus. Prerequisites: PSY F240 or permission of instructor. (1-3+0)

ANS F335 Native North Americans (s)\(\star\)
3 Credits
Offered As Demand Warrants
Interdisciplinary examination of the ecological, cultural, historical and political experiences of Native Americans. Includes archaeological evidence, ethnographic data and indigenous accounts. Readings selected from all of North America with an emphasis on Alaska Natives. Prerequisites: ANS F101; ANS F242; or permission of instructor. (3+0)

ANS F340 Contemporary Native American Literature (h)\(\star\)
3 Credits
Offered Fall
Contemporary Native American writing in English, including novels, short stories, poetry and plays. Examples of Native American film when related to a written work. Works discussed in relation to cultural contexts and interpretations. Prerequisites: ENGL F111X or permission of instructor. Cross-listed with ENGL F346. (3+0)

ANS F347 Voices of Native American Peoples (h)\(\star\)
3 Credits
Offered Spring-Even-numbered Years
Exploration of the forms by which Native American peoples have narrated their life experiences. Includes oral narratives, written autobiographies, memoirs and speeches, and an introduction to the social, historical and cultural content surrounding these texts. Readings selected from all of North America with an emphasis on Alaska Natives. Prerequisites: ENGL F111X. Cross-listed with ENGL F347. (3+0)

ANS F348 W Native North American Women (s)\(\star\)
3 Credits
Offered As Demand Warrants
Interdisciplinary examination of the relationship between Native American women and their social settings and cross-cultural experiences. Includes issues of political, economic and social solutions as employed by women in a large multi-ethnic nation-state. Prerequisites: ANS F101; ANTH F100X; ENGL F111X; ENGL F211X or ENGL F213X; SOC F100X; or permission of instructor. Cross-listed with WGS F348. (3+0)

ANS F349 Narrative Art of Alaska Native Peoples (in English Translation) (h)\(\star\)
3 Credits
Offered Fall-Even-numbered Years
Traditional and historical tales by Aleut, Eskimo, Athabaskan, Eyak, Tlingit, Haida and Tsimshian storytellers. Bibliography, Alaska Native genres and viewpoints, and structural and thematic features of tales. Prerequisites: ENGL F111X or permission of instructor. Cross-listed with ENGL F349. (3+0)

ANS F350 W,O Cross Cultural Communication: Alaskan Perspectives (s)\(\star\)
3 Credits
Offered Fall
Culture influences on communication patterns. Examines how misunderstandings may develop from differently organized ways of speaking and thinking when cultures come in contact. Focus on Alaska, with its diversity of cultures and languages, as a microcosm for examining these issues, particularly as they affect Native and non-Native communication in institutional settings. Prerequisites: COMM F313X or COMM F414X; ENGL F111X; ENGL F211X or ENGL F213X or permission of instructor. (3+0)

ANS F351 Practicum in Native Cultural Expression
1–3 Credits
Individual supervised activities in advanced organization, promotion and expression of Alaskan Native cultural heritage projects (Festival of Native Arts leadership, Tuma Theatre, Theata magazine, etc.). Continuation of ANS F251. Graded Pass/Fail. Prerequisites: Permission of instructor. (1-3+0)

ANS F360 Advanced Native Dance (h)\(\star\)
1 Credit
Offered Spring
Advanced dance techniques with emphasis on the cultural meanings of the performance. Graded Pass/Fail. Prerequisites: ANS F160 or permission of instructor. (1+0+1)

ANS F361 Advanced Alaska Native Performance (h)\(\star\)
3 Credits
Offered As Demand Warrants
In-depth study of Alaska Native theatre techniques and tradition, including traditional dance, song and drumming techniques, mask characterizations and performance application and presentation of a workshop production developed by the students during the semester. Prerequisites: ANS/THR F161. Cross-listed with THR F361. (2+3)

ANS F365 W Native Art of Alaska (h)\(\star\)
3 Credits
Offered Fall
Art forms of the Eskimo, Indian and Aleut from prehistory to the present. Changes in forms through the centuries. Prerequisites: Advanced standing or permission of instructor. Cross-listed with ANTH F365; ART F365. (3+0)

COURSES

AMERICAN SIGN LANGUAGE (ASLG) — ANTHROPOLOGY (ANTH)

ASLG F204  American Sign Language IV (h) 3 Credits  Offered As Demand Warrants
Spontaneous and interactive use of American Sign Language. Grammar, structure and lexical components. Cultural aspects supporting communication in American Sign Language at an advanced level. A continuation of ASLG F203. Prerequisites: ASLG F203 or permission of instructor. (3+0)

ASLG F205  American Sign Language V (h) 3 Credits  Offered As Demand Warrants
Highly advanced analysis of American Sign Language, including classifiers, grammar and lexicon. Expanded receptive and expressive skill development based on extensive cultural knowledge of the Deaf community in America. Prerequisites: ASLG F204 or permission of instructor. (3+0)

ANTH F100X  Individual, Society and Culture (s) 3 Credits
An examination of the complex social arrangements guiding individual behavior and common human concerns in contrasting cultural contexts. Prerequisites: Placement in ENGL F111X or higher or permission of instructor. (3+0)

ANTH F101  Introduction to Anthropology (s) 3 Credits  Offered As Demand Warrants
Human societies and cultures based on the findings of the four subfields of the discipline: archaeological, biological, cultural and linguistic. Also available via eLearning and Distance Education. (3+0)

ANTH F111  Ancient Civilizations (s) 3 Credits  Offered Fall
Major civilizations of the Old and New World from a comparative, anthropological perspective. Antecedents and influences of these civilizations on their neighbors. Economics, science, religion and social organization of these civilizations. (3+0)

ANTH F211  Fundamentals of Archaeology (s) 3 Credits  Offered Fall
Methods and techniques of archaeological field and laboratory research. (2+3)

ANTH F214  World Prehistory (s) 3 Credits  Offered Spring Even-numbered Years
Explores the archaeological evidence from the Old and New Worlds for the development of human culture, from the very beginning of humankind to the rise of ancient urban societies. Prerequisites: ANTH F100X or ANTH F111 or ANTH F211 or permission of instructor. (3+0)

ANTH F215  Fundamentals of Social/Cultural Anthropology (s) 3 Credits  Offered Spring
Introduction to the basic concepts, subfields and techniques of social/cultural anthropology. Includes non-Western and Western ethnographic topics, and discussion of career options. Recommended: ANTH F211. (3+0)

ANTH F221  Fundamentals of Biological Anthropology (s) 3 Credits  Offered Fall
Survey of genetics, evolutionary mechanisms, adaptation, primate studies, the human fossil record and human variation. Provides a basic understanding of humans from a biological, evolutionary and temporal perspective. (3+0)

ANTH F223  Sociolinguistics: Language and Social Inequality (s) 3 Credits  Offered Spring
An introduction to the concepts and methods of linguistic anthropology and sociolinguistics. It draws from these disciplines to investigate the role of language variation in social inequality. It covers concepts including language varieties, speech styles, language ideologies, the creation of standard languages and portrayals of ethnolinguistic groups in the media. Prerequisites: ANTH F100X or LING F101. Cross-listed with LING F223. (3+0)

ANTH F225  Anthrology and Race (s) 3 Credits  Offered Spring Even-numbered Years
This course introduces students to important scholarly and practical concepts in the study of “race” and racism historically across cultures. It builds upon the important contributions of four-field anthropological practice to our understanding of the ways societies have constructed racial categories and meanings and deployed racialized hierarchies. Students will read a variety of basic materials in linguistics, biological anthropology, ethnology, and archaeology. This course is part of the anthropology BS and BA degree and provides foundational concepts for further study in the field of anthropology. Prerequisites: ANTH F100X. (3+0)

ANTH F230  The Oral Tradition: Folklore and Oral History (h) 3 Credits  Offered As Demand Warrants
Study and collection of folklore and oral history. Importance of oral tradition in human communication and the advantages and disadvantages of recording and studying it. Sociocultural anthropology and anthropological linguistics in relation to oral traditions. Methods of folklorists, historians and academicians. Field project required. (3+0)

ANTH F242  Native Cultures of Alaska (s) 3 Credits
The traditional Aleut, Eskimo and Indian (Athabascan and Tlingit) cultures of Alaska. Eskimo and Indian cultures in Canada. Linguistic and cultural groupings, population changes, subsistence patterns, social organization and religion in terms of local ecology. Pre-contact interaction between groups. Cross-listed with ANS F242. (3+0)

ANTH F245  Culture and Global Issues (s) 3 Credits  Offered As Demand Warrants
Introduces students to the anthropological study of globalization and global issues including the determinitization of culture, global social movements, culture and capital, immigration and culture, and modern and postmodern approaches to the study of culture and society. Begins with the history of global ethnography, but focuses primarily on contemporary issues. Prerequisites: ANTH F100X. (3+0)

ANTH F301  World Ethnography (s) 3 Credits  Offered Spring Even-numbered Years
Survey of ethnographic research on peoples and cultures of selected geographic regions of the world, in both historical and contemporary perspective. Content of the course varies and is contingent on available faculty expertise. Course may be repeated once for credit when content varies. Prerequisites: ANTH F100X or permission of instructor. (3+0)

ANTH F302  Siberia: Past, Present, Future (s) 3 Credits  Offered Spring Even-numbered Years
Survey of anthropological research on peoples and cultures of Siberia, including the Russian Far East. This includes sections on prehistory and colonial history of the region, as well as a major focus on contemporary lives and future prospects. While the emphasis is on the indigenous peoples of Siberia, settler populations will be discussed as well. Prerequisites: ANTH F100X or permission of instructor. (3+0)

ANTH F308 W,O  Language and Gender (s) 3 Credits  Offered Fall Odd-numbered Years
Examination of relationships between language and gender, drawing on both ethnographic and linguistic sources. Topics include power, socialization and sexism. Prerequisites: COMM F131X or COMM F141X; ENGL F141X; ENGL F211X or ENGL F213X or permission of instructor. Cross-listed with LING F308; WGS F308. (3+0)

ANTH F309  Circumpolar Archaeology (s) 3 Credits  Offered Fall Odd-numbered Years
Archaeology of the circumpolar world from initial occupations through the historic period. Cultural and chronological variability in human adaptation to high latitudes. Causes and consequences of population movement, environmental change and cultural interaction in the Old and New World, as understood through archaeology. Prerequisites: Permission of instructor. (3+0)
ANTH F314 W  The Archaeology of the Cavemen  (s)  3 Credits  Offered Spring Odd-numbered Years  
Explores the archaeology of the “classic” cavemen—the Neanderthals—and their contemporaries in Africa. Begins with an exploration of how cavemen have been portrayed in popular culture/the arts, but focuses primarily on what the archaeological record can tell us about the behavior and culture of these important human ancestors. Prerequisites: ANTH F100X or ANTH F101; ENGL F111X; ENGL F211X or ENGL F213X. (3+0)

ANTH F315  Human Variation  (n)  3 Credits  Offered Spring Even-numbered Years  
Biology of recent and modern human populations, including systematics, behavior, ecology and inter- and intrapopulation genetic and morphological variations. Human adaptations to heat, cold, high altitudes and changing nutritional and disease patterns. Human skeletal biology, including metrical and non-metrical variation, aging and sexing skeletal remains, and paleoanthropology. Prerequisites: ANTH F221 or BIOL F103X. (2+3)

ANTH F317  Human Growth and Development  3 Credits  Offered As Demand Warrants  
Life-span approach to physiological (and cognitive) growth and development in fossil through modern humans. Begins with a summary of human biology and genetics. Proceeds through major phases in life: prenatal, infancy, childhood, adolescence, adult and old age. Includes detailed soft and hard tissue developments in these phases of life. Prerequisites: ANTH F221. (3+0)

ANTH F320 W  Language and Culture in Alaska  (s)  3 Credits  Offered Alternate Spring  
Course surveys relationships between language, culture, and society with a special focus on the languages and cultures of Alaska. We review the study of linguistic anthropology, consider cultural variation in the socialization to language, multilingualism, language change, language shift, cultural variation in conversational practices and relationships between language and identity (gender, ethnicity, nationalism). Prerequisites: ENGL F111X; ENGL F211X or ENGL F213X; LING F101; permission of instructor. Cross-listed with ANS F320. (3+0)

ANTH F365 W  Native Art of Alaska  (h)  3 Credits  Offered Fall  
Art forms of the Eskimo, Indian and Aleut from prehistory to the present. Changes in forms through the centuries. Prerequisites: Advanced standing or permission of instructor. Cross-listed with ANS F365; ART F365. (3+0)

ANTH F383  Athabascan Peoples of Alaska and Adjacent Canada  (s)  3 Credits  Offered Fall Even-numbered Years  
Contemporary conditions and traditional heritage of the Athabascan populations of Alaska and Canada. Impact of Euroamericans on these populations and cultures. Prerequisites: ANTH F242 or permission of instructor. (3+0)

ANTH F384  History of Anthropology  3 Credits  Offered Fall  
Major theoretical approaches in anthropology chronologically from formulation of the discipline of anthropology to current theory. Nature of the discipline, its goals and methods, and the relevance of theoretical perspectives to interpretations in anthropology. Prerequisites: ANTH F215 or permission of instructor. (3+0)

ANTH F405 W  Archaeological Method and Theory  (s)  3 Credits  Offered Spring Even-numbered Years  
Archaeological methods and analysis as the framework for different perspectives in archaeology. Application to specific research problems. Prerequisites: ANTH F211; ENGL F111X; ENGL F211X; ENGL F213X. Stacked with ANTH F605. (3+0)

ANTH F407  Kinship and Social Organization  (s)  3 Credits  Offered Spring Even-numbered Years  
Forms of relatedness in diverse sociocultural systems. Principles of organizing individuals into social groups and roles. Forms and functions of family, marriage, incest taboo around the world. Classical and new approaches to the study of kinship; alliance theory, symbolic kinship, kinship and gender, the substance of kinship, kinship and biotechnology. Prerequisites: ANTH F215 or permission of instructor. Stacked with ANTH F607. (3+0)

ANTH F409  Anthropology of Religion  (s)  3 Credits  Offered Fall Odd-numbered Years  
Religion or supernatural belief from the perspective of anthropology. Religion in the context of circumpolar societies as well as a global phenomenon. Religious practitioners, ritual, belief systems and the relationship of religious phenomena to other aspects of social life. New relational and cognitive approaches to the study of religion. Prerequisites: ANTH F100X; ANTH F215; or permission of instructor. Stacked with ANTH F609. (3+0)

ANTH F411 O  Senior Seminar in Anthropology  (s)  3 Credits  Offered Spring  
The integrated nature of anthropological inquiry. Includes a four-field approach to anthropology in a discussion-intensive setting. Student may focus on an interdisciplinary theme or a topic other than their own specialization. Prerequisites: COMM F313X or COMM F413X. Anthropology major with senior standing, or permission of instructor. (3+0)

ANTH F412  Human-Environment Research Methods  3 Credits  Offered Fall  
Basic overview of qualitative and quantitative social science methods for studying human-environment relationships. Introduction to research ethics, research design, data collection, data analysis and data reporting. Methods and data analysis techniques include interviews, text analysis, surveys, scales, cognitive anthropology and ethnoecology, social networks, behavioral observation, and visual methods. Provides hands-on training in data collection and data analysis software. Prerequisites: COMM F313X or COMM F413X; ENGL F211X or ENGL F213X; upper level standing; or permission of instructor. Cross-listed with FISH F412. (3+0)

ANTH F415  Zooarchaeology and Taphonomy  3 Credits  Offered Fall Even-numbered Years  
Identification of bones, how vertebrate bone remains may be used to study archaeological site formation processes, site organization, subsistence practices and animal procurement strategies. Preservation in modern depositional environments, paleoecology, vertebrate mortality profiles and demographic structure, site seasonality, bone breakage, taphonomy and faunal remains, and human land use practices. ANTH F211 or permission of instructor. (2+3)

ANTH F422  Human Osteology  3 Credits  
Human skeletal analysis: bone biology, skeletal anatomy, aging and sexing, metric and non-metric traits of skeleton and dentition, paleopathology and paleodemography. Inferences on genetic relationships between and patterned behavior within prehistoric groups derived from skeletal material. Prerequisites: ANTH F221 or permission of instructor. Stacked with ANTH F625. (3+0)

ANTH F423  Human Origins  3 Credits  Offered Spring Odd-numbered Years  
Analysis of the Plio-Pleistocene hominid fossil record, including comparative primate and hominid skeletal and dental anatomy, systematics, taphonomy and long-term biobehavioral adaptations. Prerequisites: ANTH F212 or ANTH F221 or permission of instructor. Stacked with ANTH F623. (2+3)
ANTH F424 Analytical Techniques
3 Credits Offered Fall Even-numbered Years
Classification, sampling, collection and analysis of anthropological data: parametric and nonparametric significance tests and measures of association, analysis of frequency data, estimating resemblance using multiple variables, computer simulations and analysis. Prerequisites: ANTH F211 or ANTH F221; any college level mathematics course; or permission of instructor. Stacked with ANTH F624. (3+0)

ANTH F426 Bioarchaeology
3 Credits Offered Spring Even-numbered Years
Innovative methods for studying past interactions between biological and cultural factors, as revealed through human and faunal skeletal and plant remains. From these data sources, health, diet, social organization and interactions and life histories of past populations, as well as the environments in which they lived, are reconstructed and examined. Prerequisites: ANTH F211 or equivalent; ANTH F221. Stacked with ANTH F626. (3+0)

ANTH F428 Ecological Anthropology and Regional Sustainability
3 Credits Offered Spring Even-numbered Years
Biological, environmental and cultural factors and their interplay in defining the human condition, with examples from the Arctic and other populations. Prerequisites: ENGL F111X; ENGL F211X or ENGL F213X; junior standing; or permission of instructor. (3+0)

ANTH F432 Field Methods in Descriptive Linguistics (h)
3 Credits Offered Fall Odd-numbered Years
Introduction to general issues in language field work and to issues specific to working with little studied and/or endangered languages in particular. Focus on introduction to writing systems, making recordings, computers and transcriptions, planning consultant sessions, working with consultants, interviewing and ethics in the field. Projects include making transcriptions of familiar language, and later, working on unfamiliar language with a language consultant, selecting and carrying out a well-defined project, resulting in a term paper. Prerequisites: LING F318; LING F320; or permission of instructor. Cross-listed with LING F431. (3+0)

ANTH F434 Field Methods in Descriptive Linguistics II
3 Credits Offered Spring Even-numbered Years
Second semester of Field Methods sequence. Plan a linguistic field project, including field trip, caring for equipment, data handling, community contacts, intellectual property and repatriation. Course work includes lectures and group elicitation with a speaker of a non-Indo-European language. Projects may involve either the traditional field work involving finding and working with a consultant, or work involving research in archival materials on languages no longer spoken. Prerequisites: LING F431 or ANTH F432. Cross-listed with LING F434. (3+0)

ANTH F445 Gender in Cross-Cultural Perspective (s)
3 Credits Offered Spring Even-numbered Years
Gender as both cultural construction and social relationship is examined through readings in comparative ethnographies portraying gender roles in a broad variety of societies, from hunter-gatherer to industrial. New theoretical and methodological approaches in anthropology for exploring and understanding the experiences of women and men in their cultural variety are presented Prerequisites: ANTH F215 or WGS F201 or permission of instructor. Cross-listed with WGS F445. (3+0)

ANTH F446 Economic Anthropology (s)
3 Credits Offered Fall Even-numbered Years
Relationships between economic and other social relations. Pre-industrial societies. Relevance of formal economics to small-scale societies and developing nations. Exchange, formal and substantive economics, market economics, rationality, political economy and the economics of development. Prerequisites: A cultural anthropology class or permission of instructor. Stacked with ANTH F646. (3+0)

ANTH F451 Quaternary Seminar
3 Credits Offered As Demand Warrants
Discussion of the Quaternary Period (relatively recent past — spanning the past two million years) in order to gain a better understanding of the landscape, biota and climate of the present day. Quaternary studies are concerned with the historical dimension of the natural sciences. This seminar will range widely over diverse interdisciplinary subjects of Quaternary interest, such as paleoclimatology, paleobiogeography, vertebrate paleontology, and sedimentology. Prerequisites: GEOS F315; GEOS F304; GEOS F322. Cross-listed with GEOS F452. (3+0)

ANTH F460 Cross-Cultural Filmmaking (h)
3 Credits Offered Fall Odd-numbered Years
The use of film as a documentary tool for describing and understanding scientific and cultural phenomenon has led to the education of generations. Understanding the implications of our film work with a theoretical base for cultural understanding, scientific need and educational potentials will strengthen the film's integrity and production methods in creating video documents useful as a scientific/cultural record. Pre-production will include research of archival visual media, oral histories and print materials; analysis of educational and scientific funding and distribution options and preliminary interviews, location scouting and film treatment. Production will include time on location with small film crews, media logging and record keeping. Post-production will include basic editing of sequences for distribution. Special fees apply. Prerequisites: Junior, senior or graduate standing or permission of instructor. Cross-listed with ART F460 and FLM F460. (3+0)

ANTH F465 Geoarchaeology
3 Credits Offered As Demand Warrants
Geological context of archaeological sites and the geologic factors that affect their preservation, with emphasis on Alaska. Includes a one or two-day weekend field trip in late April or early May. Special fees apply. Prerequisites: GEOS F301X, an introductory course in archaeology, or permission of instructor. Cross-listed with GEOS F465. (3+0)

ANTH F470 Oral Sources: Issues in Documentation (h)
3 Credits Offered Alternate Fall
Preparation for recording and use of oral resources. Examines how meaning is conveyed through oral traditions and personal narratives and the issues involved with recording and reproducing narratives. Includes management of oral recordings, ethical and legal considerations, issues of interpretation and censorship, and the use of new technologies to access and deliver recordings. Prerequisites: At least one undergraduate ANTH course and one undergraduate HIST course, or permission of instructor. Cross-listed with NOR S470. (3+0)

ANTH F472 Culture and History in the North Atlantic (s)
3 Credits Offered Spring Odd-numbered Years
Ancient Norse culture and society. Includes readings of Old Norse poetry and Icelandic sagas in translation, with secondary analyses and archaeological background. Includes Greenlandic myths and contemporary ethnographic accounts of Iceland, Greenland and the Faroe Islands. Prerequisites: ANTH F100X. Recommended: ANTH F215. (3+0)

ANTH F603 Political Anthropology
3 Credits Offered Spring Odd-numbered Years
Political systems and the law. Case studies from nonindustrial societies, developing nations and parapolitical systems or encapsulated societies, such as Native peoples in the U.S. Political structures and institutions; social conflict, dispute settlement, social control and the law, political competition over critical resources; and ethnicity. Prerequisites: Graduate standing. Stacked with ANTH F603. (3+0)

ANTH F605 Archaeological Method and Theory
3 Credits Offered Spring Even-numbered Years
Archaeological methods and analysis as the framework for different perspectives in archaeology. Application to specific research problems. Prerequisites: ANTH F211 or permission of instructor. Stacked with ANTH F405. (3+0)

<tbody>
<tr>
<td>ANTH F606</td>
<td>Folklore and Mythology: Anthropological Perspective</td>
<td>3</td>
<td>As Demand Warrants</td>
<td></td>
<td>Intensive introduction to anthropological theory concerning oral traditions and the verbal arts. Attention is paid to classic historical approaches, but discussion of contemporary focus on context and performance is highlighted. Students will research topics of individual interest. Prerequisites: Upper-division undergraduate anthropology course or permission of instructor. (3+0)</td>
</tr>
<tr>
<td>ANTH F607</td>
<td>Kinship and Social Organization</td>
<td>3</td>
<td>Even-numbered</td>
<td></td>
<td>Forms of relatedness in diverse sociocultural systems. Principles of organizing individuals into social groups and roles. Forms and functions of family, marriage, incest taboo around the world. Classical and new approaches to the study of kinship; alliance theory, symbolic kinship, kinship and gender, the substance of kinship, kinship and biotechnology. <tr>
<td>ANTH F610</td>
<td>Northern Indigenous Peoples and Contemporary Issues</td>
<td>3</td>
<td>Odd-numbered</td>
<td></td>
<td>This course examines a number of issues affecting northern indigenous peoples from a comparative perspective, including perspectives from Alaska, Canada, Greenland and the Soviet Union. Issues include the impact of the alienation of land on which these peoples depend; the relationship between their small, rural microeconomies and the larger agroindustrial market economies of which they are a part; education, language loss and cultural transmission; alternative governmental policies towards indigenous peoples; and contrasting world views. Prerequisites: Graduate standing or upper-division standing with permission of instructor. Cross-listed with NORS F610. (3+0)</td>
</tr>
<tr>
<td>ANTH F612</td>
<td>Paleocology</td>
<td>3</td>
<td>As Demand Warrants</td>
<td></td>
<td>Advanced study of Quaternary environments. The influences of climatic change and the interrelationships of physical and biological factors on the distribution and evolution of biota, including humans, will be discussed. Prerequisites: Graduate standing or permission of instructor. (3+0)</td>
</tr>
<tr>
<td>ANTH F616</td>
<td>Anthropologic Background for Resilience and Adaptation</td>
<td>1</td>
<td>Fall</td>
<td></td>
<td>Provides the anthropological background that is necessary for understanding the role of anthropology in complex systems involving interactions among biological, economic, and social processes. Designed for incoming students of the Resilience and Adaptation Program (RAP), who have not received training in anthropology. Prerequisites: Graduate student enrollment or permission of instructor. (1+0)</td>
</tr>
<tr>
<td>ANTH F617</td>
<td>Resilience Internship</td>
<td>2</td>
<td>Fall</td>
<td></td>
<td>Students of the Resilience and Adaptation Program participate in internships to broaden their interdisciplinary training, develop new research tools and build expertise outside their home disciplines. Internships are for eight to ten weeks of full time commitment and take place during the student’s first summer in the program. In autumn students meet to discuss their internship experiences and make public presentations. Prerequisites: ANTH/BIOL/ECON/NRM F667; ANTH/BIOL/ECON/NRM F668; or permission of instructor. Cross-listed with BIOL F613; ECON F613; NRM F613. (2+0)</td>
</tr>

<td>Zooarchaeology and Taphonomy</td>
<td>3</td>
<td>Even-numbered</td>
<td></td>
<td>Identification of bones, how vertebrate bone remains may be used to study archaeological site formation processes, site organization, subsistence practices and animal procurement strategies. Preservation in modern depositional environments, paleoecology, vertebrate mortality profiles and demographic structure, site seasonality, bone breakage, taphonomy and faunal remains, and human land use practices. Graduate standing or permission of instructor. (2+3)</td>
</tr>
<tr>
<td>ANTH F629</td>
<td>Structures of Anthropological Argument</td>
<td>3</td>
<td>Fall</td>
<td></td>
<td>Reading and analysis of examples from various paradigms in anthropology, past and present. Presents a thorough grounding in forms of anthropological argument and preparation for the research and writing process. Includes evolutionary, Boasian, structural-functional, structural as well as subdisciplinary linguistic, archaeological and biological forms of argument. Prerequisites: Graduate standing or permission of instructor. (3+0)</td>
</tr>
<tr>
<td>ANTH F630</td>
<td>Anthropological Field Methods</td>
<td>3</td>
<td>Odd-numbered</td>
<td></td>
<td>Concentration on the practical concerns and aspects of conducting anthropological field research. Includes the relevant literature and significant discussions on the different aspects of fieldwork. In addition, students will gain practical experience in the problems, techniques and methods of fieldwork involving people from similar or distinct cultural backgrounds. The preparation of research proposals is also given attention. Prerequisites: Graduate standing in Anthropology or permission of instructor. (3+0)</td>

| ANTH F631  | Linguistic Anthropology: Language, Thought, and Action                       | 3       | As Demand Warrants |                                                                                                 | Language and social life. Course surveys the history of linguistic anthropology and the methods and questions that have driven and distinguished the field. Topics include descriptive and structural linguistics, the relationship

**Course Descriptions 261**
between grammatical categories and linguistic meaning, ethnographic approaches to the study of language and culture, language and social action, linguistic relativity, semiotics, language socialization and language ideologies. Prerequisites: Graduate standing (3+0)

**ANTH F632** Field Methods in Descriptive Linguistics
3 Credits
Offered Fall Odd-numbered Years
Introduction to general issues in language field work and to issues specific to working with little studied and/or endangered languages in particular. Focus on introduction to writing systems, making recordings, computers and transcriptions, planning consultant sessions, working with consultants, interviewing, and ethics in the field. Projects include making transcriptions of familiar language, and later, working on unfamiliar language with a language consultant, selecting and carrying out a well-defined project, resulting in a term paper. Prerequisites: LING F318; LING F320; or permission of instructor. Cross-listed with LING F631. (3+0)

**ANTH F634** Field Methods in Descriptive Linguistics II
3 Credits
Offered Spring Even-numbered Years
Second semester of Field Methods sequence. Plan linguistic field project, including field trip, caring for equipment, data handling, community contacts, intellectual property and repatriation. Course work includes lectures and group elicitation with a speaker of non-Indo-European language. Projects may involve either the traditional field work involving finding and working with a consultant, or work involving research of archival materials on languages no longer spoken. Prerequisites: ANTH F632 or LING F631. Cross-listed with LING F634. (3+0)

**ANTH F637** Methods in Ethnohistorical Research
3 Credits
Offered Spring Even-numbered Years
Students of anthropology are introduced to the methods of historical research, particularly the critical evaluation of written documents, problems of archaic language and palaeography, and methods for assessing art and folklorist tradition as sources of history. Oral history and the data of language and archaeology are considered. Prerequisites: Graduate standing in anthropology or permission of instructor. (3+0)

**ANTH F645** Gender in Cross-Cultural Perspective
3 Credits
Offered Spring Even-numbered Years
Gender as both cultural construction and social ethnographies relationship is examined through readings in comparative ethnographies portraying gender roles in a broad variety of societies, from hunter-gatherer to industrial. New theoretical and methodological approaches in anthropology for exploring and understanding women’s and men’s experiences in their cultural variety are presented. Prerequisites: Graduate standing or permission of instructor. Stacked with ANTH F445; WGS F445. (3+0)

**ANTH F646** Economic Anthropology
3 Credits
Offered Fall Even-numbered Years
Relationships between economic and other social relations. Pre-industrial societies. Relevance of formal economics to small-scale societies and developing nations. Exchange, formal and substantive economics, market economies, rationality, political economy and the economics of development. Prerequisites: Graduate standing or permission of instructor. Stacked with ANTH F446. (3+0)

**ANTH F647** Global to Local Sustainability
3 Credits
Offered Fall
Explores the basic principles that govern resilience and change of ecological and social systems. Principles are applied across a range of scales from local communities to the globe. Working within and across each of these scales, students address the processes that influence ecological, cultural and economic sustainability, with an emphasis on northern examples. Prerequisites: Graduate standing and permission of instructor. Cross-listed with BIOL F647; ECON F647; NRM F647. (3+0)

**ANTH F649** Integrated Assessment and Adaptive Management
3 Credits
Offered Spring
An interdisciplinary exploration of the theoretical and practical considerations of integrated assessment and adaptive management. Students survey concepts important in understanding societal and professional-level decision-making. Students work as individuals and as a team to undertake case studies with relevance to integrated assessment and adaptive management. Collectively, the class builds a portfolio of cases and conducts an integrated assessment. Note: In case of enrollment limit, priority will be given to graduate students in the Resilience and Adaptation Program in order for them to be able to meet their core requirements. Prerequisites: Graduate student standing in a natural science, social science, or interdisciplinary program at UAF or another university or permission of instructor. The course is designed to fit into the sequence of Resilience and Adaptation Program's core courses. It is open to other graduate students interested in and prepared to conduct interdisciplinary studies relating to sustainability. Recommended: ANTH/BIOL/ECON/NRM F647; ANTH/BIOL/ECON/NRM F648; ANTH/BIOL/ECON/NRM F667. Cross-listed with BIOL F649; ECON F649; NRM F649. (3+0)

**ANTH F652** Research Design and Professional Development Seminar
3 Credits
Offered Spring
How to develop problem-based research in anthropology and prepare research proposals, grant proposals and publications along with critical evaluations of similar material. Topics include preparation of oral presentations for professional meetings, lectures and seminars; curriculum vitae preparation; and project budgeting. Prerequisites: Upper-division anthropology course or permission of instructor. (3+0)

**ANTH F653** Current Perspectives in Cultural Resource Management
3 Credits
Offered Fall Odd-numbered Years
Cultural resource management. Includes historic preservation and environmental law. Reviews pertinent legislation pertaining to the protection of historic properties and presents a series of real world problems confronted by archaeologists. Cultural resource management will be treated historically within a context of the development of American archaeology. Emphasis on practical aspects of career development. Prerequisites: Graduate standing or permission of instructor. (3+0)

**ANTH F667** Resilience Seminar I
1 Credit
Offered Fall
Provides a forum for new students of the Resilience and Adaptation graduate program to explore issues of interdisciplinary research that are relevant to sustainability. A considerable portion of the seminar is student-directed, with students assuming leadership in planning seminar activities with the instructor. Graded Pass/Fail. Prerequisites: Enrolled in Resilience and Adaptation Graduate Program or permission of instructor. Recommended: ANTH/BIOL/ECON/NRM F647. Cross-listed with BIOL F667; ECON F667; NRM F667. (2+0)

**ANTH F668** Resilience Seminar II
1 Credit
Offered Spring
Provides a forum for new students of the Resilience and Adaptation graduate program to explore issues of interdisciplinary research relevant to sustainability. The seminar provides support to each student planning his/her summer internship and preparing and presenting a thesis research prospectus. Graded Pass/Fail. Prerequisites: ANTH/BIOL/ECON/NRM F647; ANTH/BIOL/ECON/NRM F667; or permission of instructor. Cross-listed with BIOL F668; ECON F668; NRM F668. (2+0)

**ANTH F670** Oral Sources: Issues in Documentation
3 Credits
Offered Alternate Fall
Preparation for recording and use of oral resources. Examines how meaning is conveyed through oral traditions and personal narratives and the issues involved with recording and reproducing narratives. Includes management of oral recordings, ethical and legal considerations, issues of interpretation and censorship and the use of new technologies to access and deliver recordings. Prerequisites: At least one undergraduate ANTH course and one undergraduate HIST course, or permission of instructor. Cross-listed with NORS F670. (3+0)
ANTH F672  Culture and History in the North Atlantic
3 Credits  Offered Spring Odd-numbered Years
Study of ancient Norse culture and society. Includes readings of Old Norse poetry and Icelandic sagas in translation, with secondary analyses and archaeological background. Includes Greenlandic myths and contemporary ethnographic accounts of Iceland, Greenland and the Faroe Islands. Prerequisites: Graduate standing or permission of instructor. Cross-listed with NORS F672. (3+0)

ANTH F675  Political Ecology
3 Credits  Offered Fall Odd-Numbered Years
Introduction to the field of political ecology. Topics include the sociology of scientific knowledge, traditional and local ecological knowledge, politics of resource management, processes of enclosure and privatization, environmental values, conservation, environmental justice, and colonialism and economic development. Prerequisites: Graduate standing or permission of instructor. Cross-listed with FISH F675. (3+0)

ANTH F680  Marine Sustainability Internship
2 Credits  Offered Fall
Internship program in marine ecosystem sustainability to broaden students’ interdisciplinary training, develop new research tools, build expertise outside their home discipline, gain exposure to careers, and gain a unique perspective on research problems. Internships are for a minimum of 8 weeks and take place during the summer. In the autumn students report on and meet to discuss their internship experiences. Prerequisites: MSL F652 and meet to discuss their internship experiences. Internships are for a minimum of 8 weeks and take place during the summer. In the autumn students report on and meet to discuss their internship experiences. Prerequisites: MSL F652 and MSL F680 and FISH F680. (0+0-5-16)

APPLIED ART

APAR F107  Beading
1 Credit  Offered As Demand Warrants
Application of beads to various materials, three kinds of stitches and use of a bead loom. (1+1)

APAR F140  Clothing Construction
1 Credit  Offered As Demand Warrants
Techniques of clothing construction for the home sewer. Development of sewing skills necessary to create garments for the beginner as well as the more experienced sewer. (1+0)

APAR F150  Introduction to Traditional Crafts
1–3 Credits  Offered As Demand Warrants
Introduction to traditional crafts such as basket weaving, birch bark basket-making, beading, carving, canoe or kayak making, etc. Topics vary based on community need and interest and will be identified each semester. Course may be repeated for credit with each new topic. (1-3+0)

APAR F157  Skin Sewing
1–2 Credits  Offered As Demand Warrants
Fundamentals of skin sewing. Projects (e.g. slippers, muklus, mittens, fur hats, vests and ruffs) dependent upon student ability and experience. (1-2+0)

APPLIED BUSINESS

ABUS F051  Bookkeeping For Business
3 Credits  Offered As Demand Warrants
Basic concepts and procedures of practical bookkeeping. Recording and reporting financial data for service and merchandising business. Covers businesses owned by one individual only (sole proprietorships.) Special fees apply. (3+0)

ABUS F070  Job Readiness Skills
1 Credit
Pre-employment and human relation skills necessary for job success, including how to identify career choices and employment opportunities; how to prepare a resume, job applications, cover and follow-up letters; and how to develop human relation skills. The student will select, prepare and be interviewed for jobs which match his/her skills identified through a self-assessment inventory. Offered at Northwest Campus. Also offered pass/fail as ABUS F070P. (1+0)

ABUS F101  Principles of Accounting I
3 Credits
Accounting concepts and procedures for service businesses and for merchandising businesses owned by a single proprietor. A preparer’s approach emphasizes the use of debits and credits to account for the details of business transactions. (3+0)

ABUS F102A  Keyboarding: Touch Typing
1–3 Credits
Instruction in the mastery of alphabetic keyboard touch typing, skill building and document formatting. Skills mastered can be applied to typewriters, CRTs, computer terminals, or other equipment with a keyboard. May be repeated twice for credit. Graded Pass/Fail. (1-3+0)

ABUS F102B  Keyboarding: Skill Building
1–3 Credits
Instruction in the mastery of alphabetic keyboard touch typing, skill building and document formatting. Skills mastered can be applied to typewriters, CRTs, computer terminals, or other equipment with a keyboard. May be repeated twice for credit. Graded Pass/Fail. (1-3+0)

ABUS F102C  Keyboarding: Document Formatting
1–3 Credits
Instruction in the mastery of alphabetic keyboard touch typing, skill building and document formatting. Skills mastered can be applied to typewriters, CRTs, computer terminals, or other equipment with a keyboard. May be repeated twice for credit. Graded Pass/Fail. (1-3+0)

ABUS F116  Using 10-Key Calculators
1 Credit  Offered As Demand Warrants
Using the efficient 10-key touch method to solve business problems on a calculator. Emphasis is placed on developing occupational proficiency in the use of calculating machines for initial job placement. (1+0)

ABUS F134  Alphabetic Filing
1 Credit
Mastery and use of ARMA filing rules as they apply to alphabetic, subject, numeric and geographic filing. (0+3)

ABUS F141  Payroll Accounting
1–3 Credits  Offered Fall
Payroll records and laws. Methods to compile and calculate payroll information, earnings, deductions and net wages. City, state and federal tax report forms. For payroll personnel. (1-3+0)

ABUS F143  Office Accounting II
2 Credits  Offered As Demand Warrants
Financial activities of partnerships and corporations with emphasis on accrual basis of accounting. Notes payable, notes receivable, interest transactions, bad debts, partnership equity accounting, corporate stock transactions, corporate earnings, capital transactions, bonds, long term liabilities and investments. (2+0)

Offered As Demand Warrants
Practical information necessary to help students choose meaningful employment as well as build their own employment portfolio. Materials used will allow students to learn more about themselves, engage in personal assessment and learn how this information relates to different careers. Students will complete target resumes, cover letters, follow-up letters, applications, job search strategies, mock job interviews and a professional portfolio. Recommended: Job readiness. This class is designed for students embarking into the job market. (1-3+0)

ABUS F188 Personal Income Tax
1 Credit
Offered Fall
Taxable income, deductions, credit, exemptions, and computation. Computer use, record keeping methods, tax forms and new tax laws. (1+0)

ABUS F199 Practicum in Applied Business
1–3 Credits
Offered As Demand Warrants
Supervised training and work experience. Analysis of work experience and relationship of the job to career and academic goals. Managerial concepts, problems of working with groups and individuals, organizational structures, communications and planning. Prerequisites: Permission of instructor. (0+0)

ABUS F201 Principles of Accounting II
3 Credits
Offered Spring
Introduction to accounting concepts and procedures for a business. Emphasis is on the accounting cycle and the recording, summarizing and interpretation of accounting data. Recommended: Math placement at F100-level or above. (3+0)

ABUS F202 Principles of Accounting III
3 Credits
Offered Fall
Continuation of elementary accounting concepts and procedures with the introduction of cost accounting principles for manufacturing and service operations. Job order costing, process costing, cost-volume profit, budgeting and variances are introduced. Prerequisites: ABUS F201 or permission of instructor. Recommended: Math placement at F100-level or above. (3+0)

ABUS F203 Accounting Capstone
3 Credits
Offered Fall
Accounting procedures in retail, service and trade businesses. The complete accounting cycle, including record keeping, posting and preparation of financial statements, bank reconciliation, payroll computations and closing books. Accounts receivable, accounts payable, purchasing, credit and other accounting requirements. Recommended: ABUS F101; ABUS F141; concurrent enrollment or completion of ABUS F201; ABUS F220. (3+0)

ABUS F207 Machine Transcription
2 Credits
Offered As Demand Warrants
Training in machine transcription with emphasis on mailable copies. Review of language skills and vocabulary included. Prerequisites: CIOS F108 or permission of instructor. (2+0)

ABUS F208 Medical Machine Transcription
2 Credits
Offered As Demand Warrants
Instruction and practice in formatting medical papers including Medicare and admission forms, a dental report, preparing patient histories, medical reports, file cards and other medical documents. Practice in transcribing from machine dictation and in using medical terminology correctly. Prerequisites: ABUS F108; ABUS F207. (2+0)

<td>This course will teach the student who has basic or advanced exposure and printing skills to further their understanding of the principles and techniques of portrait photography. Students will work with SLR or DSLR cameras and editing through a digital photo suite such as Adobe Photoshop. Students will learn to perfect their exposures and portrait skills, work with models, and handle studio strobes and equipment using traditional and digital media. Assignments will focus on both technical and aesthetic</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>
ART F413 O  Advanced Painting (h)
3 Credits
Individual experimentation and technical/conceptual development in painting. Can be repeated for credit with permission of instructor. Prerequisites: ART F313; COMM F131X or COMM F141X. (1+4)

ART F417  Lithography (h)
3 Credits  Offered Every Third Spring
An exploration of stone and metal plate lithography. May be repeated for credit with permission of instructor. Special fees apply. Prerequisites: ART F105; ART F207; or permission of instructor. (1+4)

ART F419  Life Drawing (h)
3 Credits
Drawing from life; study of artistic anatomy. May be repeated for credit with permission of instructor. Special fees apply. Prerequisites: ART F305 or permission of instructor. (1+4)

ART F424 O  Field Artists of the North (h)
3 Credits  Offered As Demand Warrants
Study of field artists and their work, from the explorer artists of yesteryear to today’s field artists using a variety of traditional and contemporary media in their creations. Students will conceive and conduct their own study projects, producing a body of work that will demonstrate the principles and practice of a field artist. Prerequisites: ART F105; a studio art course (ART F161, ART F162, ART F163, ART F205, ART F211, ART F213 or JRN F203); COMM F131X or COMM F141X. Stacked with ART F624; NORS F624. (3+0)

ART F425 W  Visual Images of the North
3 Credits
Examination of the imagery of the people and landscapes of the polar regions, centering on such issues as depiction of arctic peoples and customs by Europeans, documentary versus artistic goals, translations from original sketches to published images, relationship of polar imagery to prevailing historical styles and the influence of changing world views on modes of polar representation between the 16th and 20th centuries. Prerequisites: ENGL F111X; ENGL F211X or F213X; or permission of instructor. Cross-listed with NORS F425. (3+0)

ART F427  Relief (h)
3 Credits  Offered Every Third Fall
Woodcut and monotype with emphasis on color. May be repeated for credit with permission of instructor. Special fees apply. Prerequisites: ART F105; ART F207; ART F213; or permission of instructor. (1+4)

ART F433  Advanced Field Painting (h)
1 Credit  Offered As Demand Warrants
Advanced course consists of three or four days painting at outdoor locations, usually in the summer. Lectures and directed study are used to broaden and develop student understanding of landscape painting from drawings and/or small painted studies to finished oil and acrylic paintings. Concepts of space, light, color, composition, scale and specific elements of landscape paintings such as water, reflections, skies, aerial and linear perspective will be addressed. Emphasis will be on individual experimentation and technical/conceptual development. Sessions will be in the field with some supporting sessions in the studio. Courses in the past have been held at Denali, McCarthy, Brooks Range, Valdez and Cordova. Prerequisites: ART F313 or ART F333. (0.5+1.5)

ART F437  Intaglio (h)
3 Credits
Intaglio printmaking with emphasis on experimentation and color photo intaglio printing. May be repeated for credit with permission of instructor. Special fees apply. Prerequisites: ART F105; ART F162; ART F207; or permission of instructor. (1+4)
ART (ART)

ART F471 O Advanced Digital Design (h) 3 Credits Offered Spring
Project-oriented class in graphic design with applications from journalism to fine and commercial art. Students will be expected to have a background in programs likely to include web design, digital photography and graphic design. May be repeated for credit with permission of instructor. Special fees apply. Prerequisites: COMM F131X or COMM F141X; JRN F203; JRN F350 or ART F371 or JRN F371; one college level studio art course. Cross-listed with JRN F471. (1+4)

ART F472 O 3D Animation (h) 3 Credits Offered Fall
Concept and technique of 3D computer-generated animation with applications in fine and commercial art and science. Students will produce a series of three dimensional animation projects which will introduce them to the tools and concepts used by animation and visualization professionals. Note: May be repeated for credit. Special fees apply. Prerequisites: ART/FLM/THR F172; ART/FLM F371; or equivalent; Comm F131X or COMM F141X. Cross-listed with JFLM F472; JRN F472. (1+4)

ART F474 W History of the Role of the Artist (h) 3 Credits Offered Spring Even-numbered Years
Survey of theory and practices of professional training and education of the artist in relationship to political, social and philosophical conditions. Prerequisites: ENGL F111X; ENGL F211X or ENGL F213X or permission of instructor. Recommended: ART F261; ART F262. (3+0)

ART F475 Digital Video Compositing (h) 3 Credits Offered As Demand Warrants
Digital compositing techniques for creating moving imagery. The course covers video manipulation, layering images, synthesizing realistic video imagery, integration of live action and computer generated animation. Course can be repeated for a total of nine credits with permission of instructor. Prerequisites: ART F472 or JRN F472 or FLM F472 or equivalent. Cross-listed with FLM F475. (1+4)

ART F483 Advanced Photography (h) 3 Credits Offered Spring
Continuation of JRN F283/ART F28. Emphasis on continuing development of photographic skills by application of basic technical skills to a variety of areas of photography. Special fees apply. Prerequisites: JRN F203 or ART F283 or instructor permission. Cross-listed with JRN F402. (2+3)

ART F484 Multimedia Theory and Practice (h) 3 Credits Offered Spring
Study of techniques needed to produce multimedia with a special project for a university or community agency as the required final project. For the purpose of this course multimedia is defined as computer-based, user-driven products with audio, visual and text components and also video or film where appropriate. Primary program is Flash. Special fees apply. Prerequisites: Understanding of computer graphics programs like Illustrator, Freehand, etc. plus some mastery of a specialty in writing, art, or television production. Cross-listed with JRN F484. (3+3)

ART F487 Digital Darkroom 3 Credits Offered Fall
Learn to make ink jet prints from various photographic sources, including digital capture and scanned film. Emphasis on applying Photoshop methods for making fine prints in black and white and color. Special fees apply. Prerequisites: JRN F203 or ART F283 or permission of instructor. Cross-listed with JRN F407. (2.5+2)

ART F490 Current Problems 3 Credits Offered Fall Even-numbered Years
A forum for discussion of those aesthetic and professional problems confronted by artists. Topics are agreed upon by instructor and students, and students research and lead discussion on these topics. Topics may include: approaches to figuration of contemporary painting and sculpture, health hazards for the professional artist, portfolio development and access to galleries, making art far from major cultural centers, etc. Stacked with ART F690. (3+0)

ART F499 Thesis Project 1–3 Credits
Directed work toward individual exhibition; completed outside regularly scheduled classes. Required for B.F.A. candidates. Prerequisites: Senior standing. (0+0)

ART F601 Ceramics 1–6 Credits Offered As Demand Warrants
Exploration of selected topics in ceramics with lectures, demonstrations, independent research and production of ceramics at a level commensurate with graduate standing. May be repeated for credit. Special fees apply. Prerequisites: Graduate standing or permission of instructor. (0+0)

ART F603 Graduate Photography 2–6 Credits Offered As Demand Warrants
Exploration of selected topics in photography, with lectures, demonstrations, independent research and production of photography at a level commensurate with graduate standing. May be repeated for credit. Special fees apply. Prerequisites: Graduate standing or permission of instructor. (1+2–8)

ART F605 Drawing 1–6 Credits Offered As Demand Warrants
Exploration of topic in general drawing with lectures, demonstrations and independent research and production of drawing at a level commensurate with graduate standing. May be repeated for credit. Prerequisites: ART F305 or equivalent; and graduate standing. (0+0)

ART F607 Printmaking 1–6 Credits Offered As Demand Warrants
Exploration of selected topics in printmaking with lectures, demonstrations, independent research and production of printmaking at a level commensurate with graduate standing. May be repeated for credit. Special fees apply. Prerequisites: Graduate standing or permission of instructor. (0+0)

ART F611 Sculpture 1–6 Credits Offered As Demand Warrants
Exploration of selected topics in sculpture with lectures, demonstrations, independent research and production of sculpture at a level commensurate with graduate standing. May be repeated for credit. Special fees apply. Prerequisites: Graduate standing or permission of instructor. (0+0)

ART F613 Painting 1–6 Credits Offered As Demand Warrants
Exploration of selected topics in painting with lectures, demonstrations, independent research and production of painting at a level commensurate with graduate standing. May be repeated for credit. Prerequisites: Graduate standing or permission of instructor. (0+0)

ART F619 Life Drawing 1–6 Credits
Exploration of selected topics in drawing with lectures, demonstrations, independent research and production of drawing at a level commensurate with graduate standing. May be repeated for credit. Prerequisites: Graduate standing or permission of instructor. (0+0)

ART F624 Field Artists of the North 3 Credits Offered As Demand Warrants
Study of field artists and their work, from the explorer artists of yesteryear to today’s field artists using a variety of traditional and contemporary media in their creations. Students will conceive and conduct their own study projects, producing a body of work that will demonstrate the principles and practice of a field artist. Prerequisites: ART F605 and a studio art course (ART F611, ART F612, ART F613, ART F205, ART F211, ART F213 or JRN F203.) Cross-listed with NORS F624. (3+0)

ART F625 Visual Images of the North 3 Credits Offered Spring Odd-numbered Years
Examination of the two-dimensional imagery of the people and landscapes of the polar regions, centering on such issues as depiction of arctic peoples and customs by Europeans, documentary vs. artistic goals, translations from
original sketches to published images, relationship of polar imagery to prevailing historical styles, and the influence of changing world views on modes of polar representation between the 16th and 20th centuries. Cross-listed with NORS F625. (3+0)

ART F633 Graduate Field Painting (h) 1 Credit
Consists of three or four days painting at outdoor locations, usually in the summer. Lectures and directed study are used to further develop understanding of landscape painting from drawings and/or small painted studies to finished oil and acrylic paintings. Concepts of space, light, color, composition, scale and specific elements of landscape paintings such as water, reflections, skies, aerial and linear perspective will be addressed. Emphasis will be on individual experimentation and technical/conceptual development consistent with graduate level art courses. Sessions will be in the field with some supporting sessions in the studio. Courses have been held at Denali, McCarthy, Brooks Range, Valdez and Cordova. Prerequisites: ART F413; ART F433; or permission of instructor. (6+21)

ART F648 Native Arts 1–6 Credits
Advanced traditional designs and technologies of Native art. Use of contemporary materials to interpret traditional forms. May be repeated for credit with permission of instructor. Special fees apply. Prerequisites: ART F468; graduate standing or permission of instructor. (0+0)

ART F661 Mentored Teaching in Art 1 Credit
Offered As Demand Warrants
Mentored teaching provides consistent contact of course-related issues between teaching assistants and mentoring faculty. Graduates are required to be enrolled in a mentored teaching section while teaching. Note: May be repeated for credit. Graded Pass/Fail. Prerequisites: Graduate standing; or permission of instructor. (0+0)

ART F663 Seminar in Art History 3 Credits
Offered Fall Odd-numbered Years
A forum for discussion of a particular historical period or art historical idea. Topics vary each semester and will not be repeated during a two-year period. Topics include art since 1945, women in twentieth-century art, the American landscape tradition, etc. Prerequisites: Graduate standing or permission of instructor. Stacked with ART F463. (3+0)

ART F665 Advanced Photography Seminar 3 Credits
Offered Spring Odd-numbered Years
Advanced discussion of photojournalism and photographic topics with field, studio, and darkroom sessions. Topics will range from the photographic essay to the history of photography and working in series. Weekly classroom meeting will be supplemented by field, studio, and darkroom sessions. Prerequisites: JRN F405; JRN F404; or permission of instructor. Stacked with JRN F405 and ART F465. Cross-listed with JRN F605. (2+3)

ART F671 Two- and Three-Dimensional Computer Design 1–6 Credits
Visualization and animation with applications to two- and three-dimensional computer design and typography. Emphasis on visual design for electronic and print publication. Includes animation of the components of 3-D models. May be repeated for credit. Special fees apply. Prerequisites: ART F471; graduate standing or permission of instructor. (0+0)

ART F672 Advanced Computer Visualization in Art 1–6 Credits
Offered As Demand Warrants
Computer visualization in art with production and reproduction of projects chosen from a wide range of topics. Includes lectures, demonstrations and laboratory experience. May be repeated for credit. Special fees apply. Prerequisites: Graduate standing or permission of instructor. (0+0)

ART F673 History of the Role of the Artist 3 Credits
Offered Spring Even-numbered Years
Survey of theory and practices of professional training and education of the artist in relationship to political, social and philosophical conditions.

---

**ATMOSPHERIC SCIENCES**

**ATM F011X** Weather and Climate of Alaska (n) 4 Credits
Offered Spring
Focus on the atmosphere as an important part of our environment. Study of weather and climate that covers weather observation, composition and properties of the atmosphere, weather and circulation systems, forecasting weather based on fundamental laws of physics and chemistry. Students are required to make weather observations in Alaska. The students will use their local observations as a foundation and a vantage point to understand the regional and global behavior of the atmosphere (i.e., “Observe locally and connect globally”). Prerequisites: Placement in ENGL F111X or higher; placement in DEVM F105 or higher; or permission of instructor. (3+3)

**ATM F401** Introduction to Atmospheric Sciences 3 Credits
Offered Fall
Fundamentals of atmospheric science. Includes energy and mass conservation, internal energy and entropy, atmospheric water vapor, cloud microphysics, equations of motion, hydrostatics, phase oxidation, heterogeneous chemistry, the ozone layer, fundamentals of biogeochemical cycles, solar and terrestrial radiation and radiative-convective equilibrium. Also includes molecular, cloud and aerosol absorption and scattering. Prerequisites: CHEM F105X; CHEM F106X; MATH F302; PHYS F212X. Stacked with ATM F601; CHEM F601. (3+0)

**ATM F413** Atmospheric Radiation 3 Credits
Offered Fall Odd-numbered Years
Atmospheric radiation including the fundamentals of blackbody radiation theory and radiative properties of atmospheric constituents. Discussion of gaseous absorption including line absorption, broadening effects and radiative transfer. Includes scattering, radiative properties of clouds and radiation climatology. Prerequisites: Co-requisites: ATM F401. Cross-listed with PHYS F413. Stacked with ATM F613 and PHYS F613. (3+0)

**ATM F444** Synoptic Analysis and Forecasting 3 Credits
Offered Spring Even-numbered Years
Weather systems and the techniques used to understand and predict their behavior. Topics include atmospheric observations, synoptic analysis techniques, satellite image interpretation, kinematics, fronts and frontogenesis, life cycles of extratropical cyclones, mesoscale phenomena, numerical weather prediction and interpretation of forecast products. Prerequisites: ATM F401; ATM F445. Stacked with ATM F644. (3+0)
ATM F445   Atmospheric Dynamics
3 Credits     Offered Fall Even-numbered Years
Fundamentals of equations of motion, conservation laws, balance relationships and coordinate systems. Vorticity dynamics includes vortex filament and tube, vorticity equations, Rossby-Haurwitz waves, Ertel’s PV principle for the potential vorticity, EPV in isotropic coordinates. Includes balance and quasi-geostrophy, QG theory, scaling of the QG system, the v equation, QG and numerical modeling. Prerequisites/co-requisites: ATM F401. Stacked with ATM F645. (3+0)

ATM F456   Climate and Climate Change
3 Credits     Offered Fall Odd-numbered Years
The climate of planet Earth and its changes with time. Radiative fluxes, greenhouse effects, energy budget, hydrological cycle, the atmospheric composition and climatic zones. Physical and chemical reasons for climatic change. Prerequisites: Any 400 level Physics or Chemistry course or ATM F401 or permission of instructor; basic computer skills. (3+0)

ATM F488   Undergraduate Research
1–3 Credits
Advanced research topics from outside the usual undergraduate requirements. Prerequisites: Permission of instructor. Recommended: A substantial level of technical/scientific background. (0+0)

ATM F601   Introduction to Atmospheric Sciences
3 Credits     Offered Fall
Fundamentals of atmospheric science. Includes energy and mass conservation, internal energy and entropy, atmospheric water vapor, cloud microphysics, equations of motion, hydrostatics, phase oxidation, heterogeneous chemistry, the ozone layer, fundamentals of biogeochemical cycles, solar and terrestrial radiation and radiative-convective equilibrium. Also includes molecular, cloud and aerosol absorption and scattering. Prerequisites: Graduation standing. Cross-listed with CHEM F601. (3+0)

ATM F606   Atmospheric Chemistry
3 Credits     Offered Spring Odd-numbered Years
Chemistry of the lower atmosphere (troposphere and stratosphere) including photo chemistry, kinetics, thermodynamics, box modeling, biogeochemical cycles and measurements techniques for atmospheric pollutants. Study of important impacts to the atmosphere which result from anthropogenic emissions of pollutants, including acid rain, the “greenhouse” effect, urban smog and stratospheric ozone depletion. Prerequisites/co-requisites: ATM F601 or permission of instructor. Cross-listed with CHEM F606. (3+0)

ATM F610   Analysis Methods in Meteorology and Climate
3 Credits     Offered Spring Odd-numbered Years
Introduction to standard analysis topics in Atmospheric Sciences, including basic aggregate stats, time series work, eigenmode analysis, mixed models, and extreme value analysis. Focus on manipulation of very large data sets, especially weather/climate model output. Hands-on instruction in supporting computer topics. Student presentations will be emphasized. Prerequisites: ATM F601; graduate standing; or permission of the instructor. Recommended: Basic computer and mathematical knowledge to analyze and plot data. (3+0)

ATM F613   Atmospheric Radiation
3 Credits     Offered Fall Odd-numbered Years
Fundamentals of blackbody radiation theory and radiative properties of atmospheric constituents. Discussion of gaseous absorption including line absorption, broadening effects and radiative transfer. Includes scattering, radiative properties of clouds, and radiation climatology. Prerequisites/co-requisites: ATM F601; graduate standing. Cross-listed with PHYS F613. Stacked with ATM F413 and PHYS F413. (3+0)

ATM F615   Cloud Physics
3 Credits     Offered Spring Even-numbered Years
Basic properties of condensed water vapor in the atmosphere. Formation and behavior of clouds including the nature of atmospheric aerosols, nucleation and growth of water droplets and ice crystals, the development of precipitation, nature of mixed-phase (water and ice) clouds, how transfer of radiation depends on the character of clouds, and how humans are modifying clouds and precipitation both intentionally and unintentionally. Field trips will collect data at the Arctic Facility for Atmospheric Remote Sensing (AFARS). Microscopic examination and have available for use of a sophisticated cloud model. Prerequisites: ATM F601; graduate standing; or permission of instructor. (3+0)

ATM F620   Climate Journal Club Seminar
1 Credit     Offered Spring
The “Climate Group” is in informal meeting for researchers and graduate students. The seminars alternate between progress reports on ongoing research and journal club contributions. The main interests articles, formal and informal presentation by locals and visitors will be on the agenda. Participating students will be exposed to a free format discussion of modern ideas in climate related disciplines. All students are encouraged to contribute and students taking the course for credit are required to lead the discussion for one session. This may include the presentation of a research plan/results, or a discussion of a journal article. Students will be graded on at least one presentation and participation in the class. Graded Pass/Fail. Prerequisites: Graduate standing or permission of instructor. (1+0)

ATM F621   Introduction to Computational Meteorology
1 Credit     Offered Fall
Introduce the basic knowledge on how to apply software related to atmospheric sciences problems. This includes knowledge of UNIX/LINUX, FORTRAN90, IDL, NCL, MATLAB and how to read NetCDF files, grib-files, etc., which are special data formats in which climate data are available. Students will learn how to run given software products on UNIX/LINUX and other platforms and basic tools to modify these programs for their purposes. Prerequisites: Graduate standing. (1+0)

ATM F624   Oceanic-Atmospheric Gravity Waves
3 Credits     Offered Spring; As Demand Warrants
An introduction to the dynamics of surface and internal gravity waves in non-rotating and rotating fluids including, derivation/solutions of the wave equation, approximations to the governing equations, particle motions and wave energetics, dispersion relationships, phase and group velocities, normal mode and WKB theory, refraction, reflection, critical layer absorption, wave instabilities. Prerequisites: MSL F620; MATH F302; or permission of instructor. Cross-listed with MSL F624. (3+0)

ATM F631   Environmental Fate and Transport
3 Credits     Offered Spring Even-numbered Years
Examination of the physical properties that govern the behavior, fate and transport of contaminants released into the environment. Topics include air-water partitioning and exchange, organic solvent-water partitioning, diffusion, sorption, chemical and biological transformation reactions, and modeling concepts. Cross-listed with CHEM F631. (3+0)

ATM F644   Synoptic Analysis and Forecasting
3 Credits     Offered Spring Even-numbered Years
Weather systems and the techniques used to understand and predict their behavior. Topics include atmospheric observations, synoptic analysis techniques, satellite image interpretation, kinematics, fronts and frontogenesis, life cycles of extratropical cyclones, mesoscale phenomena, numerical weather prediction and interpretation of forecast products. Prerequisites: ATM F601; ATM F645. Stacked with ATM F444. (3+0)

ATM F645   Atmospheric Dynamics
3 Credits     Offered Fall Even-numbered Years
Examination of the fundamental forces and basic conservation laws that govern the motion of the atmosphere. Topics include momentum, continuity equations, circulation, vorticity, thermodynamics, the planetary boundary layer and synoptic scale motions in mid-latitudes. Prerequisites/co-requisites: ATM F601; graduate standing. Stacked with ATM F445. (3+0)

ATM F647   Fundamentals of Geophysical Fluid Dynamics
3 Credits     Offered Fall Odd-numbered Years
Introduction to the mechanics of fluid systems, the fundamental processes, Navier-Stokes’ equations in rotating and stratified fluids, kinematics,
conservation laws, vortex motion, irrotational flow, laminar flow, boundary-layer phenomena, waves, instabilities, turbulent flows and mixing. Prerequisites: Graduate standing or permission of instructor. Cross-listed with PHYS F467. (3+0)

ATM F656 Climate and Climate Change ★
3 Credits Offered Fall Odd-numbered Years
The climate of planet Earth and its changes with time. Radiative fluxes, greenhouse effects, energy budget, hydrological cycle, the atmospheric composition and climatic zones. Physical and chemical reasons for climatic change. Prerequisites: Graduate standing; calculus, physics or related courses at F400-level, basic computer skills. Recommended: ATM F601 or ATM F401; basic computer knowledge to plot and analyze climate data. (3+0)

ATM F662 Numerical Modeling and Parameterization Methods
3 Credits Offered Spring Even-numbered Years
Construction of models from fundamental equations and the necessity of parameterizations. Simplification and discretization of equations, numerical methods, model-grids, analytical modeling, boundary and initial conditions, parameterizations and evaluation of model results. Scale-dependency, limitations of parameterizations and coupled modeling are elucidated. Students apply and code aspects of models themselves. Prerequisites: Graduate standing; calculus, physics or related F400-level basic computer skills. Recommended: ATM F601 or ATM F601; graduate standing in Fortran and UNIX/Linux. (3+0)

ATM F666 Atmospheric Remote Sensing
3 Credits Offered Spring Odd-numbered Years
Modern atmospheric research is becoming increasingly reliant on measurements made from afar using instruments sensing various portions of the electromagnetic spectrum. Using principally microwave radars and visible-wavelength laser lidars, often combined with passive measurements from radiometers, many properties of the atmosphere can be routinely profiled by remote sensors located at the ground, from aircraft, or satellite. This course will concentrate on the fundamentals of these families of active remote sensors including their designs and operating principles, applicable backscattering and extinction theories, and derive their basic radar equation.

ATM F673 Introduction to Micrometeorology
3 Credits
A comprehensive explanation of micrometeorology, its basic theories of physics, mechanisms, measurement procedures, methods and how micrometeorological processes interact with the meso- and large-scale atmospheric motion. This class will deal with weather conditions on a small scale, both in terms of space and time. For example, weather conditions lasting less than a day in the area immediately surrounding a smokestack, a building, air flow in street channels, or a small air shed. Prerequisites: ATM F401 or ATM F601; graduate standing or permission of instructor. (3+0)

ATM F678 Mesoscale Dynamics
3 Credits Offered As Demand Warrants
A comprehensive explanation of mesoscale air motions — their phenomenology, basic physics and mechanisms, why they build and how mesoscale motions interact with the micro and large scale. Classical and non-classical mesoscale circulations, super cell, single and multiple cell thunderstorm dynamics and tornado formation. Prerequisites: ATM F401 or ATM F601 or permission of instructor. Recommended: 400-level physics, calculus I to III. (3+0)

ATM F688 Atmospheric Science Informal Seminar
1 Credit
Review of ongoing research in atmospheric science to learn about research results, ideas and direction long before they are published in journals. Presentations cover the broad range of atmospheric sciences and links to other disciplines as required to answer questions on global variability, climate change and assessment studies. Graded Pass/Fail. Prerequisites: Graduate standing in physical sciences or permission of instructor. (1+0)

Study of aircraft and engine operation and limitations, aircraft flight instruments, navigation, navigation computers, national weather information and dissemination services. Federal aviation regulations, flight information publications, radio communications and navigation. Preparation for FAA private pilot-airplane written exam. (4+0)

Flight instruction is arranged by student through approved pilot school or independent flight instructor. Training will meet federal aviation regulations. Course completion requires awarding of private pilot certificate. **Prerequisites:** Department approval required. (2+0)

Flight instruction is arranged by student through approved pilot school or independent flight instructor. Training will meet federal aviation regulations. Course completion requires awarding of commercial pilot certificate. **Prerequisites:** Private pilot certificate, AVTY F102 or concurrent enrollment, or passing score on FAA Commercial Pilot written exam, department approval required. (2+0)

Flight instruction is arranged by student through approved pilot school or independent flight instructor. Training will meet federal aviation regulations. Course completion requires awarding of single-engine sea rating. **Prerequisites:** Private pilot certificate or higher, department approval required. (1+0)

Flight instruction is arranged by student through approved pilot school or independent flight instructor. Training will meet federal aviation regulations. Course completion requires awarding of multi-engine rating. **Prerequisites:** Private pilot certificate or higher, department approval required. (1+0)

Pilot instruction with a certified flight instructor or flight school in techniques of ski-plane operation and cold weather maintenance. The student is responsible for making arrangements for an appropriate aircraft, instructor and financing. **Prerequisites:** Private pilot certificate. (1+0)

Flight instruction is arranged by student through approved pilot school or independent flight instructor. Training will meet federal aviation regulations. Course completion requires awarding of glider and private or commercial pilot certificate with a glider category rating. **Prerequisites:** Department approval. (1+0)

Basic concepts associated with the aircraft and its environment. Aircraft and its components, including basic systems, Federal Aviation Administration regulations, airports and airspace utilization, aeronautical charts, navigation, weather theory, medical and emergency factors. (3+0)
AVTY F116  Aviation History
3 Credits  Offered As Demand Warrants
Aviation from its early days to the present. People, places and machines contributing to the development of Alaskan aviation. (3+0)

AVTY F121  Introduction to Aviation Safety
2 Credits  Offered As Demand Warrants
An introduction to aviation safety designed to develop a positive attitude toward safety, refresh aeronautical knowledge and improve aeronautical skills. Prerequisites: Pilot's Certificate or enrollment in Aviation program. Proof required first day of class. (2+0)

AVTY F155  Preventive Maintenance
1-3 Credits  Offered As Demand Warrants
Mechanics of the airplane, its powerplant and systems to enable the student to evaluate malfunctions and make maintenance decisions. Designed for the pilot-owner. Special fees apply. Prerequisites: Pilot's Certificate or enrollment in Aviation program. Proof required first day of class. (1-3+0)

AVTY F200  Instrument Ground School
4 Credits  Offered As Demand Warrants
Instrument flight operations in detail, altitude instrument flying, air traffic control and navigation facilities, pilot responsibilities. IFR enroute charts, instrument approach procedures. Federal Aviation Regulations, flight planning, human factors and meteorology. Includes optional visits to FAA, RAPCO and ARTCC facilities. Prerequisites: Pilot's Certificate or enrollment in Aviation program. Proof required first day of class. (3+3)

AVTY F201  Instrument Pilot Training
2 Credits  Offered As Demand Warrants
Flight instruction is arranged by student through approved pilot school or independent flight instructor. Cost of flight instruction varies with location of instruction. Training will be in accordance with current Federal Aviation Regulations. Course completion requires awarding of instrument rating. Prerequisites: Private or Commercial Pilot Certificate or AVTY F200 or concurrent enrollment or passing score on FAA Private or Commercial Pilot written exam, or permission of instructor; department approval. (2+0)

AVTY F202  Flight Instructor Ground School
3 Credits  Offered As Demand Warrants
Preparation for the FAA certified flight instructor or advanced ground instructor written exam. Prerequisites: Commercial pilot certificate or permission of instructor. (3+0)

AVTY F203  Flight Instructor Flight Training
2 Credits  Offered As Demand Warrants
Flight instruction is arranged by student through approved pilot school or independent flight instructor. Training meets federal aviation regulations. Course completion requires awarding of certified flight instructor certificate. Prerequisites: Commercial pilot certificate with instrument rating; AVTY F202; or concurrent enrollment; or passing score on FAA flight instructor written exams; department approval. (2+0)

AVTY F205  Instrument Instructor Flying
3 Credits  Offered As Demand Warrants
Preparation for certification as an instrument flight instructor. Prerequisites: Commercial flight instructor certificate and department approval. (3+0)

AVTY F206  ATP Ground Instruction
4 Credits  Offered As Demand Warrants
Preparation for the FAA airline transport pilot written exam. Prerequisites: Compliance with FAR 61.151 and 61.155 or department permission. (4+0)

AVTY F207  ATP Flying
2 Credits  Offered As Demand Warrants
Qualification for single- or multi-engine FAA airline transport pilot certificate. Prerequisites: Commercial pilot certificate, 1500 hours of flight time as pilot or equivalent as described in FAR 61.155; AVTY F206 or passing score on FAA airline transport pilot written exam; current FAA first class medical certificate. (2+0)

AVTY F220  Basic Flight Physiology
3 Credits  Offered As Demand Warrants
Understanding the physiology of flight and using this knowledge to explain why certain phenomena occur to the mind and body during flight. Prerequisites: Pilot's Certificate or enrollment in Aviation program. Proof required first day of class. (3+0)

AVTY F226  Flight Engineer Ground School
4 Credits  Offered As Demand Warrants
A comprehensive examination of the major systems of one of the following aircraft: turbojet (B-727, DC-8, B-707); turboprop (L-382, L-188); or reciprocating (DC-6). Preparation for the FAA flight engineer written exam. Prerequisites: FAA commercial pilot license and instrument rating or equivalent; department approval. (4+0)

AVTY F231  Arctic Survival
3 Credits  Offered As Demand Warrants
Use of principles, procedures, techniques and equipment to survive extreme arctic conditions and assist in safe recovery. Lab required. Special fees apply. Cross-listed with EMS F257. (3+0)

AVTY F232  Aviation Astronomy and Navigation
3 Credits  Offered As Demand Warrants
Air navigation and astronomy, including charts, equipment, star and constellation identification, and calculations. (3+0)

AVTY F235  Elements of Weather
3 Credits  Offered As Demand Warrants
Weather as it affects aircraft operators with an emphasis on interior Alaska. (3+0)

AVTY F239  Aircraft Dispatcher
4 Credits  Offered As Demand Warrants
Coordinating functions involving the aircraft and other departments of an airline business. Those wanting to be eligible for aircraft dispatcher certification must be 23 years of age. (4+0)

AVTY F402  Aircraft Management
3 Credits  Offered As Demand Warrants
Securing, dispatching and monitoring aircraft operations. Safety, security, community relations, cost-effective scheduling and personnel management for mission scheduling. (3+0)

AVTY F405  Advanced Aircraft Operations
3 Credits  Offered As Demand Warrants
Techniques and requirements associated with the operation of turbine-powered aircraft, remotely piloted aircraft, helicopters and STOL aircraft for pilots and air workers; safety; systems; aerodynamics; operating characteristics. Prerequisites: AVTY F100 or AVTY F111 or AVTY F301 or permission of instructor. (3+0)

AVTY F410  Techniques of Bush Flying
2 Credits  Offered As Demand Warrants
Flight training emphasizing emergency procedures in remote locations, off-airport operations, critical flight attitudes, low-level flight, terrain flying, special maneuvers and unique soft and short field takeoffs and landings. Prerequisites: AVTY F231; flight training; AVTY F235; AVTY F301; commercial rating; 20 hours taildragger time. (1+2)

BIOL F100X  Human Biology (n)
4 Credits  Offered As Demand Warrants
Introduction to scientific methodology and biological principles with a focus on humans as biological organisms. Topics include organization of the human body, human genetics, human development and the relationship between our bodies and health. Includes lecture, discussion, lab and projects. May not be used as biology elective credit for a major in biological sciences. Note: Intended for non-science majors and those seeking...

<tr>
<td>BIOL F103L</td>
<td>Biology and Society Laboratory</td>
<td>1</td>
<td>Offered Spring</td>
<td>Fall at Northwest Campus; Fundamental principles of biology; emphasis on their application to humans in the modern world. Lectures, laboratory demonstrations, experiments and discussions of contemporary biological topics. For non-science majors; cannot be used as a biology elective by biological science majors. Special fees apply. Prerequisites: Placement in ENGL F111X or higher; placement in DEV M F105 or higher; or permission of instructor.</td>
</tr>
<tr>
<td>BIOL F104X</td>
<td>Natural History of Alaska (n); (n)</td>
<td>4</td>
<td>Offered Fall</td>
<td>The physical environment peculiar to the North and important in determining the biological setting; major ecosystem concepts to develop an appreciation for land use and wildlife management problems in both terrestrial and aquatic situations. May not be used as biology elective credit for a major in biological science. Special fees apply. Prerequisites: Placement in ENGL F111X or higher; placement in DEV M F105 or higher; or permission of instructor.</td>
</tr>
<tr>
<td>BIOL F105X</td>
<td>Fundamentals of Biology I (n)</td>
<td>4</td>
<td>Offered Fall</td>
<td>Introduction to the principles of biology for science majors, with emphasis on chemistry of life, cell structure, metabolism, genetics and animal form and function. Students for whom this course is required for their major will be given preference when space is limited. Special fees apply. Prerequisites: Placement in ENGL F111X or higher; placement in DEV M F105 or higher; or permission of instructor.</td>
</tr>
<tr>
<td>BIOL F116X</td>
<td>Fundamentals of Biology II (n)</td>
<td>4</td>
<td>Offered Spring</td>
<td>Continuation of topics addressed in BIOL F115X, with emphasis on evolutionary biology, diversity of life, plant form and function and ecology. Students for whom this course is required for their major will be given preferrence when space is limited. Special fees apply. Prerequisites: Placement in ENGL F111X or higher; placement in DEV M F105 or higher; or permission of instructor.</td>
</tr>
<tr>
<td>BIOL F120X</td>
<td>Introduction to Human Nutrition</td>
<td>4</td>
<td>Offered Spring</td>
<td>This course provides students with a understanding of basic nutritional science and how the principles of nutrition can be used to achieve and maintain optimum health and well-being. Students will consider their own food choices in light of the scientific concepts covered in class. May not be used as a biology elective credit for a major in biological sciences. Special fees apply.</td>
</tr>
<tr>
<td>BIOL F145</td>
<td>Introduction to Field Entomology</td>
<td>1</td>
<td>Offered Summer</td>
<td>An introduction to field entomology techniques. Emphasized will be professional procedures to collect and process (sort, mount, and label) non-marine arthropods. The skills necessary to identify most groups to Order will be taught. Students will create a collection from which specimens will be chosen for the University of Alaska Museum Insect Collection and the Teaching Collection. Note: This course cannot be used as a biology elective by biological science majors. Graded Pass/Fail. Special fees apply. Prerequisites: Placement in ENGL F111X or higher; placement in DEV M F105 or higher; or permission of instructor.</td>
</tr>
<tr>
<td>BIOL F150</td>
<td>Introduction to Marine Biology</td>
<td>3</td>
<td></td>
<td>Survey of marine organisms, evolution of marine life, habitats and communities of ocean zones, productivity and marine resources. For non-science majors; may not be used as biology elective credit for a major in biological science. Only available via eLearning and Distance Education. Special fees apply.</td>
</tr>
<tr>
<td>BIOL F213X</td>
<td>Human Anatomy and Physiology I (n)</td>
<td>4</td>
<td>Offered Fall</td>
<td>Integrated view of human structure and function for students in pre-professional allied health programs, biology, physical education, psychology and art. Covers cells, tissues and organs, skeletal and muscle systems, the nervous system, and integument. Special fees apply. Prerequisites: CHEM F103X or CHEM F105X; placement in ENGL F111X or higher; placement in DEV M F105 or higher; or permission of instructor.</td>
</tr>
<tr>
<td>BIOL F214X</td>
<td>Human Anatomy and Physiology II (n)</td>
<td>4</td>
<td>Offered Spring</td>
<td>Integrated view of human structure and function for students in pre-professional allied health programs, biology, physical education, psychology and art. Examines circulatory, respiratory, digestive, excretory, endocrine and reproductive systems. Special fees apply. Prerequisites: BIOL F213X; CHEM F103X or CHEM F105X or permission of instructor.</td>
</tr>
<tr>
<td>BIOL F239</td>
<td>Introduction to Plant Biology (n)</td>
<td>4</td>
<td>Offered Fall</td>
<td>Plant biology including plant form and function (morphology, physiology and development), ecology (including interactions with herbivores, pollinators and microbes), conservation, evolution and economic botany. Emphasis on vascular plants (particularly angiosperms) but includes comparisons with nonvascular plants. Special fees apply. Prerequisites: BIOL F115X; BIOL F116X.</td>
</tr>
<tr>
<td>BIOL F240</td>
<td>Beginnings in Microbiology</td>
<td>4</td>
<td>Offered As Demand Warrants</td>
<td>Fundamentals of microbiology. Survey of the microbial world, interactions between microbes and host, microbial human diseases, the environmental and economic impact of microorganisms. Provides background in basic and applied microbiology with emphasis on the role microorganisms play in human health and life. Offered at UAF Community and Technical College. Special fees apply. Prerequisites: One course in high school or college-level biology required, or permission of the instructor. Recommended: One course in chemistry. Note: May not be used as biology elective credit for a major or minor in biological sciences.</td>
</tr>
<tr>
<td>BIOL F260</td>
<td>Principles of Genetics</td>
<td>4</td>
<td></td>
<td>Principles of inheritance; physicochemical properties of genetic systems. Special fees apply. Prerequisites: BIOL F115X; BIOL F116X; CHEM F105X; MATH F107X or higher.</td>
</tr>
<tr>
<td>BIOL F277</td>
<td>Introduction to Conservation Biology</td>
<td>3</td>
<td>Offered Spring</td>
<td>Introduction to the basic ecological, genetic, management, legal and historical developments in conservation biology, and focused efforts to manage</td>
</tr>
</tbody>
</table>
biological diversity resources, with a status review of important habitats and endangered species. Special fees apply. *Prerequisites: BIOL F115X, BIOL F116X.* Cross-listed with NRM F277. (3+0)

**BIOL F288** Fish and Fisheries of Alaska  
3 Credits  
Offered Spring Even-numbered Years  
This course will provide mid-level undergraduate students with an introduction to the biology and fisheries of Alaskan fish, shellfish and marine mammals with important finishes as the main focus of the course. First, we will examine important recreational, subsistence and commercial shellfish and finfish species. Next, we will briefly cover fisheries economics and then turn our attention to lesser known freshwater and marine fish species. Finally, we will conclude with a brief overview of marine mammal fisheries in Alaska. The amount of coverage of each of these topics will vary depending on what is known about each group of organisms. Before enrolling students should have a basic understanding of basic biological and ecological concepts. This course is required of all fisheries students but should appeal to anyone interested in Alaska’s fish and fisheries. Special fees apply. *Prerequisites: BIOL F115X and FISH F101; or permission of instructor.* Cross-listed with FISH F288. (3+0)

**BIOL F301** Biology of Fishes  
4 Credits  
Offered Fall  
A broad overview of the biological diversity of fishes presented from the comparative and organismal perspectives. The course examines the relationship between physical and biological properties of aquatic environments and the anatomy, physiology, behavior and geographical distribution of living fish lineages. Topics include fish evolution, biogeography, classification, gross and fine anatomy, sensory biology, and form-function relationships. Topics are presented to highlight essential concepts generally relevant in biology. Special fees apply. *Prerequisites: BIOL F116X or equivalent; junior or senior standing. Recommended: BIOL F317.* Cross-listed with FISH F301. (3+3)

**BIOL F310** Animal Physiology (n)  
4 Credits  
Offered Fall  
Animal function, including respiration, digestion, circulation, nerve and muscle function, hormones and reproduction. Special fees apply. *Prerequisites: BIOL F115X; BIOL F116X; CHEM F105X; CHEM F106X.* (3+3)

**BIOL F317** Comparative Anatomy of Vertebrates (n)  
4 Credits  
Offered Spring  
Anatomy, phylogeny and evolution of the vertebrates. Special fees apply. *Prerequisites: BIOL F115X; BIOL F116X.* (2+6)

**BIOL F331** Systematic Botany (n)  
4 Credits  
Offered Spring  
Classification of flowering plants with emphasis on Alaskan flora; taxonomic principles, classical and experimental methods of research. Preregistration is required to ensure that each student will prepare a plant collection. Special fees apply. *Prerequisites: BIOL F239 or permission of instructor. Recommended: BIOL F260.* (2+6)

**BIOL F335** Principles of Epidemiology  
3 Credits  
Offered Spring  
Introduction to the basic concepts of epidemiology, with examples from human to veterinary medicine, including chronic and infectious disease epidemiology, social epidemiology, outbreak investigation, properties of tests, and an introduction to study design and surveillance. Special fees apply. *Prerequisites: STAT F200X or higher or permission of instructor.* (3+0)

**BIOL F342** Microbiology (n)  
4 Credits  
Offered Spring  
Morphology and physiology of microorganisms. The role of these organisms in the environment and their relationship to humans. Concepts of immunology. Laboratory stresses aseptic techniques for handling microorganisms. Special fees apply. *Prerequisites: BIOL F115X; BIOL F116X; CHEM F105X.* (3+3)

**BIOL F360** Cell and Molecular Biology (n)  
3 Credits  
Offered Fall or Spring  
An introduction to the structure and function of cells. Topics include: the structure and function of cellular components, including proteins, membranes and organelles; understanding how cells communicate; and how information is processed in the cell via DNA replication, transcription and translation. Special fees apply. *Prerequisites: BIOL F260; CHEM F105X; CHEM F106X or concurrent enrollment.* Cross-listed with CHEM F360. (3+0)

**BIOL F371** Principles of Ecology  
4 Credits  
Offered Fall  
Basic principles in physiological, ecosystem, population and community ecology. Environmental factors and their influence on plants and animals. Structure, growth and regulation of populations. The ecosystem concept, biogeochemical cycles, and the structure and function of major terrestrial biomes. Special fees apply. *Prerequisites: BIOL F115X; BIOL F116X; LS F100 or LS F101 or successful completion of library skills competency test; or permission of instructor.* (3+3)

**BIOL F402 W** Biomedical and Research Ethics (h)  
3 Credits  
Offered Fall  
Issues in biomedical ethics. Topics will vary but will include discussion of moral principles and problems of research ethics and medical ethics, such as: animal and human experimentation; data management; informed consent; therapeutic and non-therapeutic research; physician/patient relationship; autonomy; assisted reproductive technologies; euthanasia; organ transplantation; and allocation of scarce medical resources. Special fees apply. *Prerequisites: ENGL F111X; ENGL F211X or ENGL F213X; junior or senior standing; a course in philosophy, science, or nursing; permission of instructor. Recommended: A course in philosophy, science or nursing.* Cross-listed with PHIL F402. (3+0)

**BIOL F403 W** Metabolism and Biochemistry  
4 Credits  
Offered Fall  
Studies of the cells, genomics and proteomics of the nematode Caenorhabditis elegans have become a cornerstone of current biology. Using this simple and facile animal model, students will conduct their own biological investigations and, through this research learning, will gain an understanding of intermediary metabolism. Topics include major pathways of carbon, nitrogen, and lipid metabolism, structure and function of proteins, biological regulation and signaling, and longevity and aging. This course satisfies the writing-intensive requirement for a baccalaureate degree and the capstone project requirement in the Biological Sciences degree. Special fees apply. *Prerequisites: COMM F131X or F141X; ENGL F111X; ENGL F211X or F213X; CHEM F105X; CHEM F106X; BIOL F360 or permission of the instructor.* (2+2+6)

**BIOL F406** Entomology (n)  
4 Credits  
Offered Fall Odd-numbered Years  
Biology of insects and related arthropods, with emphasis on evolution, ecology, behavior, biodiversity, morphology and systematics. Lab emphasizes identification and collection. Special fees apply. *Prerequisites: BIOL F115X; BIOL F116X; BIOL F371; or permission of instructor.* (3+3)

**BIOL F417 O** Neurobiology  
3 Credits  
Offered Spring Even-numbered Years  
Organization and function of the vertebrate nervous system from the subcellular to the organismal levels. Neural bases of sensations, specific behaviors and homeostasis. Applications of basic neurobiological research to pathological conditions. Examples taken mostly from the recent vertebrate literature. Special fees apply. *Prerequisites: BIOL F310; COMM F131X or COMM F141X; or permission of instructor.* Stacked with BIOL F617. (3+0)

**BIOL F418** Biogeography  
3 Credits  
Offered Fall  
This course explores the geography of life by examining linkages between climate, geomorphology, and ecological communities with emphasis on the biogeography of subarctic, polar and alpine regions. Special fees apply. *Prerequisites: BIOL F271 or NRM/BIOL F277; junior/senior standing or...
BIOLOGY (Biol)

permission of instructor. Cross-listed with GEG F418. Stacked with BIOL F518 and GEOG F618. (3+0)

BIOL F425 W Mammalogy (n) 3 Credits Offered Fall

Variety of mammals, their behavior, life histories, identification, phylogeny and systematics, morphology, distribution and zoogeography. Special fees apply. Prerequisites: BIOL F317 or permission of instructor; junior standing or above. (2+3)

BIOL F426 W,O/2 Ornithology (n) 3 Credits Offered Spring

Evolution, anatomy, physiology, distribution, migration, breeding biology of birds, their classification and identification. Special fees apply. Prerequisites: BIOL F115X; BIOL F116X; COMM F131X or COMM F141X; ENGL F111X; ENGL F211X or ENGL F213X; or permission of instructor. (2+3)

BIOL F427 Ichthyology (n) 4 Credits Offered Spring

Major groups of fishes, emphasizing fishes of northwestern North America. Classification structure, evolution, general biology and importance to man. Special fees apply. Cross-listed with FISH F427. (3+3)

BIOL F433 Conservation Genetics 3 Credits Offered Spring

Concepts of population genetics, phylogenetics, pedigree analysis, systematics and taxonomy as they apply to conservation of species. Evaluating the impact of small population size, population fragmentation, inbreeding, hybridization, taxonomic uncertainties and other factors on viability and management of species. Special fees apply. Prerequisites: BIOL F371 or equivalent; BIOL F260 or equivalent; or permission of instructor. Recommended: BIOL F277; NRM F277. Cross-listed with WLF F433. (3+0)

BIOL F434 W Structure and Function of Vascular Plants 4 Credits Offered Spring Odd-numbered Years

Morphology, anatomy and physiology of vascular plants, stressing the interrelationships between development, anatomy, growth, water relations, photosynthesis, transport and metabolism. This course satisfies capstone project degree requirements in the Biological Sciences. Special fees apply. Prerequisites: BIOL F115X and F116X; MATH F107; STAT F200X; ENGL F111X; ENGL F211X or ENGL F213X; senior standing or permission of instructor. (3+3)

BIOL F441 W,O/2 Animal Behavior 3 Credits Offered Fall

Evolutionary and ecological principles of individual and social behavior, genetic and physiological basis of behavior, techniques of behavioral observation, experimental manipulation and analysis. Design and implementation of independent research project on live animals. This course satisfies capstone project degree requirements in the Biological Sciences. Special fees apply. Prerequisites: BIOL F310; STAT F200X; COMM F131X or COMM F141X; ENGL F111X; ENGL F211X or ENGL F213X; or permission of instructor. Co-requisite: BIOL F481. (2+2+1)

BIOL F445 W,O Molecular Ecology and Evolution (s) 3 Credits Offered Fall Odd-numbered Years

An introduction to theory and computational techniques used to analyze and interpret DNA sequence variation among populations and closely related species. Special fees apply. Prerequisites: BIOL F260; BIOL F481; ENGL F111X; ENGL F211X or ENGL F213X; COMM F131X or COMM F141X. Stacked with BIOL F645. (2+3)

BIOL F455 W,O Environmental Toxicology 3 Credits Offered Fall Even-numbered Years

Environmental toxicology will focus on the general properties and principles of persistent and/or poisonous (toxic) chemicals commonly encountered in air, water, fish and wildlife. Numerous natural and synthetic chemicals in the environment will be discussed from a global perspective with some bias towards arctic and subarctic regions. Special fees apply. Prerequisites: CHEM F451; BIOL F303; or one semester each of organic chemistry and cell or molecular biology; or permission of instructor; ENGL F111X; ENGL F211X or ENGL F213X; or permission of instructor. (3+0)

BIOL F456 Winter Ecology 3 Credits Offered Fall

The focus of this course is on morphological, physiological and behavioral responses of animals and plants to winter conditions. Strategies of avoidance and tolerance of cold temperatures and low resources will be discussed. Analysis of physical and biological processes in seasonally snow-covered ecosystems. Includes principles of radiation and heat exchange, physics and chemistry of snow, thermoregulatory strategies in animals, and discussion of how winter affects trophic dynamics and population processes. Special fees apply. Prerequisites: BIOL F371 (formerly BIOL F271) or permission of instructor. (2+3)

BIOL F457 W Environmental Microbiology 3 Credits Offered Fall

This course focuses on the role of microorganisms in environmentally-relevant processes including bioremediation of pollutants, biogeochemical cycling, corrosion and wastewater treatment, including current methods for studying microbial diversity and function. Special fees apply. Prerequisites: BIOL F115X and BIOL F116X; BIOL F424; CHEM F105X and CHEM F106X or equivalent, or permission of the instructor. Recommended: CHEM F451 or BIOL F303 or equivalent. Stacked with BIOL F657. (3+0)

BIOL F459 O/2 Wildlife Nutrition 4 Credits Offered Fall

The energy nutrient requirements of vertebrate animals in relation to their ecology, physiology and life history. Concepts and techniques used by wildlife biologists to understand relationships between wild animals and their habitats. Techniques for constructing energy and nutrient budgets of wild animals and applications of these budgets to population-level processes and habitat management. Special fees apply. Prerequisites: COMM F131X or COMM F141X; BIOL F310; BIOL F271; or permission of instructor. Cross-listed with WLF F460. (3+3)

BIOL F460 Principles of Virology 3 Credits Offered Spring

This course will explore current concepts in the field of virology, with emphasis on the structure, genetic material, and replication strategies of various human and animal viruses. In addition, mechanisms of viral pathogenesis, viral diagnostics, prevention and treatment of viral infection will be presented. Special fees apply. Prerequisites: BIOL F342; or permission of instructor. (3+0)

BIOL F462 O Concepts of Infectious Disease 3 Credits Offered Spring

Concepts of infectious disease biology using examples of different pathogens and exploring the concepts of their biology and the implication of these principles on pathology, epidemiology and sociology of infectious diseases. Special fees apply. Prerequisites: BIOL F261 or BIOL F342; or permission of instructor. Stacked with BIOL F662. (3+0)

BIOL F465 Immunology 3 Credits Offered Spring

Adaptive immune response including its components and activation from cells to molecules, clonal selection, antigen recognition, and discrimination between foreign and self. Concepts applied on the level of intact organisms addressing allergies, autoimmunity, transplantation, tumors and disease (AIDS). Special fees apply. Prerequisites: BIOL F115X and BIOL F116X; BIOL F310; or BIOL F111X and BIOL F112X; or permission of instructor. (3+0)

BIOL F469 O Landscape Ecology and Wildlife Habitat 3 Credits Offered As Demand Warrants

A problem-based learning and critical thinking approach to modern methods in landscape ecology, including geographic information systems, remote sensing, modeling, software and the Internet. Graduate students are expected to help undergraduates with occurring problems and questions. Special fees apply. Prerequisites: BIOL F371 or equivalent; COMM F131X or COMM F141X. Cross-listed with WLF F469. (2+3)
Biology of populations of plants and animals, including population structure, natality, mortality, population growth, regulation of population size, interaction in competition, herbivory, predation and parasitism. Special fees apply. Prerequisites: A calculus course and BIOL F271 (2+3)

BIOL F472 W Community Ecology 3 Credits Offered Fall Even-numbered Years Structure of plant and animal communities and their organization. Structuring forces of competition, predation, herbivory, mutualisms, and the flow of energy and nutrients. Latitudinal gradients in species richness and biogeography. This satisfies capstone project degree requirements in the Biological Sciences. Special fees apply. Prerequisites: BIOL F271; ENGL F111X; ENGL F211X or ENGL F213X or permission of instructor. (2+3)

BIOL F473 W Limnology 3 Credits Offered Fall The ecology of inland waters emphasizing lakes and rivers. Lecture provides graphically oriented view of concepts. Laboratory involves team-based original research from proposal to manuscript. This course satisfies capstone project degree requirements in the Biological Sciences. Special fees apply. Prerequisites: BIOL F115X; BIOL F16X; BIOL F371; CHEM F105X; CHEM F106X; ENGL F111X; ENGL F211X or F213X or permission of instructor. (2+3)

BIOL F476 O Ecosystem Ecology 3 Credits Offered Spring Odd-numbered Years Focus on the biological and physical principles that govern functioning of terrestrial ecosystems. Emphasis on how plants, animals and microorganisms control the movement of water, carbon and nutrients through ecosystems. Discussion of how changes in these processes have altered global cycles of carbon, water and nutrients and sustainability of the world’s ecosystems. Special fees apply. Prerequisites: ENGL F111X; ENGL F211X or F213X; COMM F13X or F141X; BIOL F371; BIOL F239 or permission of instructor. (3+0)

BIOL F481 Principles of Evolution 4 Credits Patterns and processes of evolutionary change are used to explore the unifying principles of the biological sciences. Basic models of population genetics, quantitative genetics, development, phylogenetics and systematics are used to build a conceptual framework for study of living systems. Special fees apply. Prerequisites: BIOL F362; STAT F200X; junior standing; or permission of instructor. Note: STAT F200X may be taken concurrently. Stacked with BIOL F681. (3+3)

BIOL F483 Stream Ecology 3 Credits Offered As Demand Warrants The ecology of streams and rivers focusing on physical, chemical and biological processes. Special fees apply. Prerequisites: BIOL F115X; BIOL F116X; BIOL F271. Recommended: CHEM F105X; CHEM F106X. (3+0)

BIOL F485 W Global Change Biology 3 Credits Offered Fall Causes of climate change, the climate record, and the effects of past and forecast climate change on biophysical systems. Consideration of impacts on plants, animals, ice, and people with an emphasis on Alaska and the Arctic. Special fees apply. Prerequisites: BIOL F371; CHEM F105X; CHEM F106X; ENGL F111X; ENGL F211X or F213X or permission of instructor. Cross-listed with WLF F485. (3+0)

BIOL F486 Vertebrate Paleontology 3 Credits Offered Spring Odd-numbered Years The study of vertebrate evolution through geologic time. Covers the temporal range, diversity and systematics of major vertebrate groups as documented in the fossil record, with an emphasis on current problems in vertebrate evolutionary pattern and process. Labs emphasize comparative morphology and identification of major vertebrate groups. Special fees apply. Prerequisites: BIOL F310; or BIOL F317; or GEOS F315; or permission of instructor. Cross-listed with GEOS F486. (2+3)

BIOL F487 Conceptual Issues in Evolutionary Biology 3 Credits Offered Spring Odd-numbered Years Analysis of some of the main models which explain evolutionary change, followed by consideration of the practical implications these models have on the study of biological phenomena in general. Special fees apply. Cross-listed with PHIL F487. (3+0)

BIOL F488 Arctic Vegetation Ecology: Geobotany 3 Credits Offered Spring Even-numbered Years Arctic plants in relationship to Earth, including arctic plant identification, climate, geology and geography controls on arctic plant communities, snow ecology, applications to wildlife studies and current Arctic issues. Lecture, labs, and 1 winter field trip. Special fees apply. Prerequisites: BIOL F115 and BIOL F116 or equivalent; BIOL F239 or BIOL F271; or approval of instructor. Stacked with BIOL F688 (3+1)

BIOL F489 Vegetation Description and Analysis 3 Credits Offered Fall Even-numbered Years Methods of vegetation science including sampling, classification, gradient analysis, ordination, field description and mapping. Field trips to the plant communities of interior Alaska. Special fees apply. Prerequisites: BIOL F239 or BIOL F233 or BIOL F371 or BIOL F331; or permission of instructor. Stacked with: BIOL F689 (2+3)

BIOL F490 W Research Experience in Biology 3 Credits Offered Fall and Spring Provides undergraduate opportunities for student research in advanced life science topics beyond typical undergraduate laboratory or course offerings. Students are required to publicly present their work and submit a final report summarizing their work and suitable as a component of a submission to a discipline-specific journal. Research areas range across all life sciences subjects (evolution, ecology, physiology, cell biology, biochemistry, molecular biology, etc.). A substantial level of background in the specific discipline, a level commensurate with having achieved junior or senior standing, is assumed. Special fees apply. Prerequisites: CHEM F105X; CHEM F106X; BIOL F115X; BIOL F116X or permission of the instructor. (1+0+6)

BIOL F602 Research Design 3 Credits Offered Fall An introduction to the philosophy, performance and evaluation of hypothetical/deductive research in the biological sciences, with emphasis on hypothesis formulation and testing. Each student will develop a research proposal. Special fees apply. Prerequisite: Graduate standing or permission of instructor. Cross-listed with WLF F602. (3+0)

BIOL F604 Scientific Writing, Editing, and Revising in the Biological Sciences 3 Credits Offered Spring For students who are ready to produce a manuscript or thesis chapter. Topics include the publishing process (e.g., the role of editors and reviewers), preparing to write (selecting a journal, authorship), the components of the scientific paper, revising and editing manuscripts, and responding to reviews. Students will produce a complete manuscript. Special fees apply. Prerequisites: Graduate standing in Biology, Wildlife, or related discipline and permission of instructor. Cross-listed with WLF F604. (3+0)

BIOL F605 Animal Stable Isotope Ecology 3 Credits Offered Spring Odd-numbered Years Recent primary literature in stable isotope ecology, which uses naturally occurring variation in stable isotopes of carbon, nitrogen, oxygen, hydrogen and sulphur as markers of organismal and ecological processes. The focus will be on animal studies, including diet reconstruction, mixing models, food web, metabolism, nutrient allocation and migration. Special fees apply. Prerequisite: Graduate standing; or permission of instructor. (3+0)

BIOL F613 Resilience Internship 2 Credits Offered Fall Students of the Resilience and Adaptation Program participate in internships to broaden their interdisciplinary training, develop new research tools, and build expertise outside their home disciplines. Internships are for eight
to ten weeks of full time commitment and take place during the student’s first summer in the program. In the autumn students meet to discuss their internship experiences and make public presentations. Special fees apply. Prerequisites: ANTH/BIOl/ECON/NRM F667; ANTH/BIOl/ECON/NRM F668; or permission of instructor. Cross-listed with ANTH F617; ECON F613; NRM F613. (2+0)

BIOL F614 Foraging Ecology
2 Credits Offered Fall Even-numbered Years
The dynamics of herbivory, emphasizing the foraging process, and including mechanisms of feeding, feeding behavior, habitat and plant selection, physiological influences on feeding, plant and community level responses, plant defenses against herbivory and management of plant-herbivore systems. Special fees apply. Prerequisites: Graduate standing or approval of instructor. Cross-listed with WLF F614. (2+0)

BIOL F615 Systematic and Comparative Biology
4 Credits Offered Fall Even-numbered Years
Concepts of systematic biology basic to a rigorous and complete understanding of modern evolutionary theory. Systematics provides the historical framework critical to a variety of comparative analyses in biology. Recent innovations in phylogenetic analyses will be explored in lecture and lab Special fees apply. Prerequisites: Graduate standing in biology or permission of instructor. Cross-listed with WLF F615. (2+0)

BIOL F616 Ecological Background for Resilience and Adaptation
1 Credit Offered Fall
Provides the ecological background that is necessary for understanding the role of ecology in complex systems involving interactions among biological, economic, and social processes. Designed for incoming students of the Resilience and Adaptation Program (RAP), who have not received training in ecology. Special fees apply. Prerequisites: Graduate student enrollment or permission of instructor. Cross-listed with NRM F616. (1+0)

BIOL F617 Neurobiology
3 Credits Offered Spring Even-numbered Years
Organization and function of the vertebrate nervous system from the subcellular to organismal levels. Neural bases of sensations, specific behaviors and homeostasis. Applications of basic neurobiological research to pathological conditions. Examples taken mostly from the recent vertebrate literature. Special fees apply. Prerequisites: BIOL F310 and graduate standing; or BIOL F417. (3+0)

BIOL F618 Biogeography
3 Credits Offered Fall
This course explores the geography of life by examining linkages between climate, geomorphology, and ecological communities with emphasis on the biogeography of subarctic, polar and alpine regions. Special fees apply. Prerequisites: Graduate standing or permission of instructor. Cross-listed with GEOG F618. Stacked with BIOL F418 and GEOG F418. (3+0)

BIOL F622 Current Issues in Conservation Biology
3 Credits Offered Spring Odd-numbered Years
Critical discussion of contemporary issues concerning extinction patterns, population viability and the preservation, design and management of habitats for populations/species of concern. Stresses integration of principles and policies into strategies for biological conservation. Special fees apply. Prerequisites: Graduate standing; BIOL F471 or WLF F410; or permission of instructor. Cross-listed with WLF F622. (3+0)

BIOL F628 Advanced Immunology
3 Credits Offered Fall Odd-numbered Years
Advanced level of knowledge and understanding of the structural and molecular basis of the innate and adaptive immune responses in terms of a complex system. Special fees apply. Prerequisites: BIOL F465; BIOL F261 or F360 or equivalent; or permission of instructor. Cross-listed with CHEM F628. (3+0)

BIOL F633 Conservation Genetics
4 Credits Offered Spring
Concepts of population genetics, phylogenetics, pedigree analysis, systematics and taxonomy as they apply to conservation of species. Evaluating the impact of small population size, population fragmentation, inbreeding, hybridization, taxonomic uncertainties and other factors on viability and management of species. Special fees apply. Prerequisites: BIOL F271 and BIOL F362 or equivalent or permission of instructor. Recommended: BIOL F277; NRM F277. Cross-listed with WLF F633. (3+3)

BIOL F644 Advanced Topics in Evolution
3 Credits Offered Spring
Modern theory and subdisciplinary directions in the expanding field of evolutionary biology. Topics include adaptation, speciation, reinforcement, comparative method, group selection, phylogeography, advanced systematics, geographic variation and the role of evolutionary biology in society. May be repeated for credit when content varies. Special fees apply. Prerequisites: Undergraduate course in evolution or permission of instructor. (3+0)

BIOL F645 W,O Molecular Ecology and Evolution (s)
3 Credits Offered Fall Odd-numbered Years
An introduction to theory and computational techniques used to analyze and interpret DNA sequence variation among populations and closely related species. Special fees apply. Prerequisites: BIOL F362; BIOL F481; graduate standing or permission of instructor. Stacked with BIOL F445. (2+3)

BIOL F647 Global to Local Sustainability
3 Credits Offered Fall
Explores basic principles that govern resilience and change of ecological and social systems. Principles are applied across a range of scales from local communities to the globe. Working within and across each of these scales, students address the processes that influence ecological, cultural and economic sustainability, with an emphasis on northern examples. Special fees apply. Prerequisites: Graduate standing in a natural science, social science, humanities, or interdisciplinary program at UAF; and permission of instructor. Cross-listed with ANTH F647; ECON F647; NRM F647. (3+0)

BIOL F649 Integrated Assessment and Adaptive Management
3 Credits Offered Spring
Interdisciplinary exploration of the theoretical and practical considerations of integrated assessment and adaptive management. Students survey concepts important in understanding societal and professional-level decision-making. Students work as individuals and as a team to undertake case studies with relevance to integrated assessment and adaptive management. The class builds a portfolio of cases and conducts an integrated assessment. Note: In case of enrollment limit, priority will be given to graduate students in the Resilience and Adaptation Program in order for them to be able to meet their core requirements. Special fees apply. Prerequisites: Graduate student standing in a natural science, social science, humanities or interdisciplinary program at UAF or another university; or permission of instructor. The course is designed to fit into the sequence of Resilience and Adaptation Program’s core courses. It is open to other graduate students interested in and prepared to conduct interdisciplinary studies relating to sustainability. Recommended: ANTH/BIOl/ECON/NRM F647; ANTH/ BIOl/ECON/NRM F667. In case of enrollment limits, priority will be given to graduate students in the Resilience and Adaptation Program in order for them to be able to meet their core requirement. Cross-listed with ANTH F649; ECON F649; NRM F649. (3+0)

BIOL F656 Environmental Toxicology
3 Credits Offered Fall Even-numbered Years
Environmental toxicology will focus on the general properties and principles of persistent and/or poisonous (toxic) chemicals commonly encountered in air, water, fish and wildlife. Numerous natural and synthetic chemicals in the environment will be discussed from a global perspective with some bias towards arctic and subarctic regions. Special fees apply. Prerequisites: CHEM F451; BIOL F303; or one semester each of organic chemistry and cell or molecular biology or permission of instructor. Cross-listed with CHEM F655. (3+0)
BIOL F657 W  Environmental Microbiology  3 Credits  Offered Fall
This course focuses on the role of microorganisms in environmentally-
relevant processes including bioremediation of pollutants, biogeochemical
 cycling, corrosion and wastewater treatment, including current methods for
studying microbial diversity and function. Special fees apply. Prerequisites:
BIOL F115X and BIOL F116X; BIOL F342; CHEM F105X and CHEM F106X
or equivalent, or permission of the instructor. Recommended: CHEM F451
or BIOL F303 or equivalent. Stacked with BIOL F457 (3+0)

BIOL F659  Wildlife Nutrition  4 Credits  Offered Fall
The energy nutrient requirements of vertebrate animals in relation to their
ecology, physiology and life history. Concepts and techniques used by
wildlife biologists to understand relationships between wild animals and
their habitats. Techniques for constructing energy and nutrient budgets of
wild animals and applications of these budgets to population-level processes
and habitat management. Special fees apply. Prerequisites: BIOL F310; BIOL
F271; graduate standing; or permission of instructor. Cross-listed with
WLF F660. (3+3)

BIOL F662  Concepts of Infectious Disease  3 Credits  Offered Spring
Covers infectious disease biology using examples of different pathogens
and exploring the concepts of their biology and the implication of these
principles on pathology, epidemiology and sociology of infectious diseases.
Special fees apply. Prerequisites: Graduate standing or BIOL F261 or BIOL
F342; or permission of instructor. Stacked with BIOL F462. (3+0)

BIOL F665  Aquatic Entomology  2 Credits  Offered Fall Odd-numbered Years
Aquatic invertebrate taxonomy, mostly to the family level, and ecology.
Includes field trips to learn collecting techniques and habitats. Special
fees apply. Prerequisites: Graduate standing or permission of instructor;
Students must be able to safely wade in streams and wetlands. Cross-listed
with FISH F665. (1+3)

BIOL F666  Scientific Teaching  2 Credits  Offered Spring Even-numbered Years
This course explores methods for teaching science at the university level.
Emphasis is placed on methods of course design, instructional techniques,
assessment and course management that have been shown by research to
improve student learning. This course is intended for graduate students in
the sciences who have an interest in improving their teaching skills. The
course format will be a mixture of discussion, workshops and seminars.
If the course is over-enrolled, priority will be given to teaching assis-
tants who are assigned to teach large, introductory level (100 or 200 level)
courses during the semester they are taking this course. Special fees apply.
Prerequisites: Graduate standing or permission of the instructor. Cross-
listed with STO F666, CHEM F666 and GEOS F666. (2+0)

BIOL F667  Resilience Seminar I  1 Credit  Offered Fall
Provides a forum for new students of the Resilience and Adaptation gradu-
ate program to explore issues of interdisciplinary research that are relevant
to sustainability. A considerable portion of the seminar is student-directed,
with students assuming leadership in planning seminar activities with the
instructor. Graded Pass/Fail. Special fees apply. Prerequisites: Student must
be enrolled in Resilience and Adaptation graduate program or permission
of instructor. Recommended: ANTH/BIOL/ECON/NRM F647 (taken con-
currently). Cross-listed with ANTH F667; ECON F667; NRM F667. (2+0)

BIOL F668  Resilience Seminar II  1 Credit  Offered Spring
Provides a forum for new students of the Resilience and Adaptation gradu-
ate program to explore issues of interdisciplinary research that are relevant
to sustainability. The seminar provides support to each student planning
his/her summer internship and preparing and presenting a thesis research
prospectus. Graded Pass/Fail. Special fees apply. Prerequisites: ANTH/
BIOL/ECON/NRM F647; ANTH/BIOL/ECON/NRM F667; or permission
of instructor. Cross-listed with ANTH F668; ECON F668; NRM F668. (2+0)

BIOL F669  Landscape Ecology and Wildlife Habitat  3 Credits  Offered As Demand Warrants
A problem based learning and critical thinking approach to modern
methods in landscape ecology, including geographic information systems,
remote sensing, modeling, software and the Internet. Graduate students are
expected to help undergraduates with occurring problems and questions.
Special fees apply. Prerequisites: Graduate standing Cross-listed with WLF
F669 (2+3)

BIOL F672  Ecosystem Processes  3 Credits  Offered Fall Odd-numbered Years
A comparative approach to the structural and functional components of
terrestrial ecosystems, emphasizing primary and secondary production and
the dynamics of nutrient cycling processes. Interactions between producers,
consumers and decomposition processes, and effects on the efficiencies of
nutrient and energy transfers. Special fees apply. Prerequisites: Graduate standing or permission of instructor. (2+2)

BIOL F675  Plant Physiological Ecology  3 Credits  Offered Fall Even-numbered Years
Physiological ecology of dormancy, germination, growth, photosynthesis,
water relations and nutrition with an emphasis on northern and other
stressful environments; relationship to community and ecosystem processes.
Special fees apply. Prerequisites: STAT F200X or equivalent; graduate standing; or permission of instructor. Cross-listed with NRM F676. (3+3)

BIOL F677  Advanced Topics in Plant Ecology and Systematics  3 Credits  Offered Spring
One of four topics is covered each year: 1) Current issues and concepts in
plant population and community ecology. 2) Reproductive ecology — polli-
nation, seed dispersal, breeding systems and coevolution. 3) Plant families of
the world. 4) Plant-animal interactions — evolution and ecology. Note: May
be repeated for credit when topic differs. Special fees apply. Prerequisites:
BIOL F474; graduate standing; or permission of instructor. (3+0)

BIOL F679  Cellular and Molecular Neuroscience  3 Credits  Offered Fall Even-numbered Years
The goal of this course is to provide an overview of the cellular and molecular
underpinnings of signaling in the nervous system. Discussions will be
focused on properties of excitable membranes, synaptic transmission, and
neurological integration. Fundamentals of the functional properties of neu-
rons will provide the background for discussions of small neuronal circuits
that regulate behavior, the cellular/molecular basis of learning and memory,
and pharmacological approaches for the treatment of neuronal patholo-
gies. Special fees apply. Prerequisites: Two F300-level courses in BIOL or
CHEM; MATH F200X or MATH F272X; or permission of the instructor
Recommended: MATH F201X. Cross-listed with CHEM F670 (3+0)

BIOL F680  Data Analysis in Biology  3 Credits  Offered Fall
Biological applications of nonparametric statistics, including tests based
on binomial and Poisson distributions, analysis of two-way and multway
contingency tables, and tests based on ranks; multivariate statistics, includ-
ing principal component analysis, ordination techniques, cluster analysis,
and discriminate analysis; and time-series analysis. Introduction to the use
of the computer and use of statistical packages. Each student will analyze
a data set appropriate to the student’s research interests. Special fees apply.
Prerequisites: STAT F200X; STAT F401; either graduate standing in a
biologically oriented field; or permission of instructor. Cross-listed with
WLF F680. (2+3)
BIOL F681  Principles of Evolution
4 Credits
Patterns and processes of evolutionary change are used to explore the unifying principles of the biological sciences. Basic models of population genetics, quantitative genetics, development, phylogenetics and systematics are used to build a conceptual framework for study of living systems. Special fees apply. Prerequisites: Graduate standing with courses in genetics, ecology and statistics; or permission of instructor. Stacked with BIOL F481. (3+3)

BIOL F686  Vertebrate Paleontology
3 Credits  Offered Spring Odd-numbered Years
The study of vertebrate evolution through geologic time. Covers the temporal range, diversity and systematics of major vertebrate groups as documented in the fossil record, with an emphasis on current problems in vertebrate evolutionary pattern and process. Labs emphasize comparative morphology and identification of major vertebrate groups. Special fees apply. Prerequisites: BIOL F310; or BIOL F317; or GEOS F315; or permission of instructor. Cross-listed with BIOL F486; GEOS F486. (2+3)

BIOL F687  Conceptual Issues in Evolutionary Biology
3 Credits  Offered Spring Odd-numbered Years
Analysis of some of the main models which explain evolutionary change followed by consideration of the practical implications these models have on the study of biological phenomena in general. Special fees apply. Cross-listed with PHIL F687. (3+0)

BIOL F688  Arctic Vegetation Ecology: Geobotany
3 Credits  Offered Spring Even-numbered Years
Arctic plants in relationship to Earth, including arctic plant identification, climate, geography and geography controls on arctic plant communities, snow ecology, applications to wildlife studies and current Arctic issues. Lecture, labs, and 1 winter field trip. Special fees apply. Prerequisites: BIOL F115X and BIOL F116X or equivalent; BIOL F239 or BIOL F271; or approval of instructor. Stacked with BIOL F488 (3+1)

BIOL F689  Vegetation Description and Analysis
3 Credits  Offered Fall Even-numbered Years
Methods of vegetation science including sampling, classification, gradient analysis, ordination, field description and mapping. Field trips to the plant communities of interior Alaska. Special fees apply. Prerequisites: BIOL F239 or BIOL F233 or BIOL F371 or BIOL F331; or permission of instructor. Stacked with BIOL F489 (2+3)

BUSINESS ADMINISTRATION
Students enrolling in School of Management courses are expected to have completed the necessary prerequisites for each course.

A per-semester student computing facility user fee will be assessed for students enrolling in one or more School of Management courses (ACCT, AIS, BA, ECON, HSEM, LEAD, and MBA) except ECON F100X. This fee is in addition to any materials fees.

BA F253  Internship in Business
1–3 Credits
Supervised work experience in an approved position related to the student’s career interests or objectives. Number of credits depends on type of position and time worked. No student can count more than eight internship credits towards a degree. Prerequisites: Approval of program or department head. (1-3+1-3)

BA F254  Personal Finance
3 Credits
Emphasis on personal investments and financial management. (3+0)

BA F280  Sports Leadership
3 Credits  Offered As Demand Warrants
Provides leadership theory and develop leadership skills for application internal and external to their sport. Focus on the identification and development of leadership skills/abilities and application within the classroom, a sport and for an on-campus project. This course is cross-listed with LEAD F280. (3+0)

BA F281  Sports Management
3 Credits  Offered As Demand Warrants
Provides a basic understanding of managing amateur and professional sports organizations and the legal issues involved. Topics such as stadium financing, risk management contracts and human resource management, public versus private sector labor laws, collective bargaining and drug testing will be examined. Prerequisites: Sophomore standing. (3+0)

BA F305  Leadership Alaska: Making a Difference (s)
4 Credits  Offered Spring
A leadership seminar and practicum which will involve building community, developing networks, learning leadership theories, understanding civic responsibility, and creating an action project through which the student becomes a leader. Prerequisites: Either be an Alaska Scholar; an Honors student; a member of the National Society of Collegiate Scholars; have a 3.25 GPA; or permission of instructor. (4+0)

BA F307  Introductory Human Resources Management
3 Credits
Introduction to management principles and personnel practice in industry, analysis of labor-management problems, methods and administration of recruiting, selecting, training and compensating employees, and labor laws and their applications. Prerequisite: ENGL F111X or equivalent. (3+0)

BA F317 W  Employment Law
3 Credits  Offered Fall or Spring
Basic personnel and human resource management law, including labor law and current management practices in administering collective bargaining agreements. Emphasis on the major federal and Alaska state laws affecting personnel management. Prerequisites: BA F307 or concurrent enrollment; ENGL F111X; ENGL F211X or ENGL F213X. (3+0)

BA F323X  Business Ethics (h)
3 Credits  Offered Fall, Spring, Summer; As Demand Warrants
A grounding in ethical theories and basic issues of moral thought, with examples which highlight the pitfalls in practical ethics which future managers are likely to face, and the need to design organizations so as to promote ethical behavior. (3+0)

BA F325  Financial Management
3 Credits  Offered Fall or Spring
Time value of money, bond and stock valuation, capital budgeting, risk-return trade-offs and option pricing. Prerequisites: ACCT F261; ECON F201 and ECON F202; MATH F262X or MATH F200X; ECON F227. (3+0)

BA F330  The Legal Environment of Business
4 Credits
The judicial system, legal processes, administrative procedures, law of torts, contract and agency government regulation of business, business ethics, corporate social responsibility and the uniform commercial code. (4+0)
BA F343 Principles of Marketing 3 Credits
Management of a firm’s marketing effort focusing on products, distribution, pricing and promotion to targeted consumers. Practices appropriate to domestic or international, small or large, goods or services, and for-profit or nonprofit organizations included. Prerequisites: ENGL F111X or equivalent; COMM F131X or COMM F141X or equivalent. (3+0)

BA F360 Operations Management 3 Credits
Operations management with an emphasis on systematic planning, design and operation of the processes that produce goods and deliver services that customers recognize to be of superior quality. Topics include operations strategy, process design, quality control, statistical process control, project scheduling, material requirements planning and just-in-time systems. Prerequisites: AIS F101; ECON F227. (3+0)

BA F390 Organizational Theory and Behavior 3 Credits
Understanding how and why organizations behave as they do, assessing whether the behavior is functional or dysfunctional, and learning to understand and change motivation, leadership, communications, group dynamics, conflict management, layout, technology, structure and policies to create high-functioning organizations. Prerequisite: ENGL F111X or equivalent. (3+0)

BA F423 W Investment Analysis 3 Credits
Offered Spring
Introduction to investment analysis. Presents an understanding of the investment environment and analytical tools in investing. Intended for undergraduate students. Prerequisites: BA F325; ENGL F111X; ENGL F211X or ENGL F213X. (3+0)

BA F424 Real Estate and Alternative Investments 3 Credits
Offered Spring
Develop skills required to value and finance residential and commercial real estate. Financing instruments, markets and taxation issues specific to real estate are covered in the first half; alternative investments such as REITs will be presented in the second half of the course. Prerequisites: BA F325. (3+0)

BA F436 Consumer Behavior (s) 3 Credits
Offered Fall or Spring
Effects of nationality, culture, social class, family, personality, symbolism and persuasion on consumer behavior. Qualitative methodologies such as focus groups covered. Prerequisites: BA F343 or PSY/SOC F330. (3+0)

BA F445 W Marketing Research 3 Credits
Offered Fall or Spring
Basic processes and tools of marketing research with emphasis on utilization of research findings as an integral part of the managerial decision-making process. Techniques of qualitative and quantitative data-gathering and analysis to solve a marketing problem. Practices appropriate to domestic or international, small or large, goods or services, and for-profit or nonprofit organizations. Prerequisites: BA F343; ECON F227; ENGL F111X; ENGL F211X or ENGL F213X; upper division BBA standing; or permission of the SOM advisor. (3+0)

BA F447 W,O Compensation Management 3 Credits
Offered Fall or Spring
Theory and practice of wage and salary, benefits and risk management. Planning, administration, auditing, adjusting and budgeting for compensation and risk. Prerequisites: BA F307; COMM F131X or COMM F141X; ENGL F111X; ENGL F211X or ENGL F213X. (3+0)

BA F452 W Internship in Emergency Management 3 Credits
Offered As Demand Warrants
A supervised practical work experience to enable students to apply their course work in a fire department or closely related field of emergency services. Admission dependent upon approved sponsorship arrangements. Prerequisites: ENGL F111X; ENGL F211X or ENGL F213X; BEM degree major; upper division standing; permission of instructor. Recommended: Four semesters of bachelor core; business administration courses. (0+6)

BA F453 Internship in Business Administration 1–3 Credits
Offered As Demand Warrants
A supervised practical work experience to enable students to apply their coursework in a business environment. Admission dependent upon approved sponsorship arrangements. Repeated for a maximum of six credits. Prerequisites: Accumulative 3.0 GPA in ACCT and BA courses. (0+2-9)

BA F454 O Student Investment Fund 3 Credits
Offered Fall or Spring
Hands-on experience in portfolio management. Students will be making investment and diversification decisions affecting the $500,000 Student Investment Fund. Prerequisites: COMM F131X or COMM F141X; BA F325 or equivalent; upper division BBA standing; permission of the SOM advisor or instructor. (3+0)

BA F455 Portfolio Management 3 Credits
The second course involved with the hands-on management of the $500,000 Student Investment Fund. Students will carry out the duties of officers of the fund and will be responsible for portfolio diversification and management decisions affecting the fund. Prerequisites: BA F454; upper division BBA standing; permission of the SOM advisor or instructor. (3+0)

BA F456 W Small Business Management 3 Credits
Offered Fall or Spring
Operations and special problems of the small business with emphasis on both existing firms and new ventures. Starting new businesses, buying going concerns, acquiring and operating franchises, establishing lines of credit, management, legal matters, profit planning, pricing, inventory levels, record systems, tax regulations and employee supervision. Prerequisites: ACCT F261; ACCT F262; ENGL F111X; ENGL F211X or ENGL F213X. (3+0)

BA F457 Training and Management Development 3 Credits
Offered Fall or Spring
Theory and practice of employee training programs, needs assessments, learning theories, instructional design, training techniques and evaluation, management development and career development techniques and practices. Prerequisites: BA F307. (3+0)

BA F460 O International Business 3 Credits
Offered Fall or Spring
Relationships among nations with particular emphasis on the business, economic, and sociocultural institutions that influence the performance of managers. Formulation of objectives, strategies and organizational structures within the context of international diversity. Prerequisites: COMM F131X or COMM F141X. Recommended: Senior standing. (3+0)

BA F461 International Finance 3 Credits
Offered Fall or Spring
Development of analytical skills, logical thought processes and information literacy necessary to make and implement investment decisions in a global setting. Prerequisites: BA F325. (3+0)

BA F462 O Corporate Strategy 3 Credits
Offered Fall or Spring
An integrative approach to strategy formulation and implementation to achieve organization goals. Students will be introduced to theoretical perspectives and associated methodologies directed toward resolving the unstructured problems and opportunities which confront general managers at the highest levels of an organization. Prerequisites: COMM F131X or COMM F141X; ACCT F262; BA F325; BA F343; BA F360; BA F390; ECON F321 or ECON F322 or ECON F324 or ECON F350; upper division BBA standing; or permission of the SOM advisor. (3+0)

BA F467 Current Topics in Management 3 Credits
Offered Fall or Spring
Examines current management trends with regard to major theories and practices in the field. Topics of interest could include organizational
courses

2014–2015 CATALOG

Chemistry

Chemistry in Complex Systems

Chemistry in Complex Systems

Basic General Chemistry

A Survey of Organic Chemistry and Biochemistry

General Chemistry I

Introduction to coordination theory, crystal field theory, kinetics and mechanisms of substitution and redox reactions, unit cells and ionic bonding, periodic law, and descriptive chemistry of selected main group elements. Special fees apply. Prerequisites: CHEM F106X. 2 Credits

Chemical Equilibrium and Analysis

Analytical Instrumental Laboratory

A laboratory course focusing on the acquisition and interpretation of spectroscopic and chromatographic data for qualitative characterization and quantitative chemical measurements. Students will learn to design and execute experiments with a variety of instruments, critically evaluate experimental data, and communicate their findings through scientific writing. Special fees apply. Prerequisites: CHEM F212; ENGL F211X or ENGL F213X and must be a Chemistry major or have permission of the instructor. 3 Credits

Basic Inorganic Chemistry

Aqeous chemical equilibrium as applied to chemical analysis, separations, spectrophotometry, potentiometry and factors considered in the analytical approach. Lab portion will include introductory experiments in analytical and instrumental techniques. Special fees apply. Prerequisites: Grade of C or better in CHEM F106X; MATH F107X or equivalent. 3 Credits

Chemistry for Life Science Majors

A systematic study of the more important functional groups of carbon compounds, including their mechanisms of reaction, methods of synthesis and physical and spectroscopic properties. Prerequisites: CHEM F321 or permission of instructor. 3 Credits

Chemistry in Complex Systems

A systematic study of the more important functional groups of carbon compounds, including their mechanisms of reaction, methods of synthesis and physical and spectroscopic properties. Prerequisites: CHEM F321 or permission of instructor. 3 Credits

Analytical Instrumental Laboratory

A laboratory course focusing on the acquisition and interpretation of spectroscopic and chromatographic data for qualitative characterization and quantitative chemical measurements. Students will learn to design and execute experiments with a variety of instruments, critically evaluate experimental data, and communicate their findings through scientific writing. Special fees apply. Prerequisites: CHEM F212; ENGL F211X or ENGL F213X and must be a Chemistry major or have permission of the instructor. 3 Credits

Chemistry in Complex Systems

Fundamentals of chemistry with an emphasis on the role of chemistry in environmental and life systems. The role of feedback systems on chemical behavior is illustrated in atmospheric, aquatic, nuclear and nutritional systems. For non-science majors. Special fees apply. Prerequisites: Placement in ENGL F111X or higher; placement in DEV M105 or higher; or permission of instructor. 3 Credits

Chemistry in Complex Systems

A systematic study of the more important functional groups of carbon compounds, including their mechanisms of reaction, methods of synthesis and non-science majors interested in the central role of chemistry in life. May be used to meet the general laboratory science requirement or for preparation for CHEM F105X. Special fees apply. Prerequisites: CHEM F103X; placement in ENGL F111X or higher; placement in DEV M105 or higher; or permission of instructor. 3 Credits
CHEM F323 Organic Chemistry Laboratory 1 Credit Offered Spring
A laboratory designed to illustrate modern techniques of isolation, purification, analysis and structure determination of covalent, principally organic, compounds. Intended for health science majors; chemistry majors must take CHEM F324W instead. Special fees apply. Co-requisite: CHEM F322 (3+3)

CHEM F324W Advanced Organic Chemistry Laboratory (n) 3 Credits Offered Spring
A laboratory designed to illustrate modern techniques of isolation, purification, analysis and structure determination of covalent, principally organic, compounds. Emphasis on research techniques including 2D nuclear magnetic resonance spectroscopy. Intended for chemistry majors. Special fees apply. Prerequisites: ENGL F211X or ENGL F213X; CHEM F212 or permission of instructor. Co-requisites: CHEM F322. (1+6)

CHEM F331 Physical Chemistry I 4 Credits Offered Fall
Principles of thermodynamics and kinetics with applications to phase equilibria, solutions, chemical equilibrium and electrochemistry. Course teaches these concepts using both lecture and laboratory instruction. Special fees apply. Prerequisites: CHEM F106X; MATH F201X; PHYS F104X or PHYS F212X; or permission of instructor. (3+3)

CHEM F332 Physical Chemistry II 4 Credits Offered Spring
Atomic and molecular structure, and spectroscopy, and statistical mechanics. Course teaches these concepts using both lecture and laboratory instruction. Special fees apply. Prerequisites: CHEM F331; MATH F202X; or permission of instructor. (3+3)

CHEM F360 Cell and Molecular Biology (n) 3 Credits Offered Fall or Spring
An introduction to the structure and function of cells. Topics include: the structure and function of cellular components, including proteins, membranes and organelles; understanding how cells communicate; and how information is processed in the cell via DNA replication, transcription and translation. Prerequisites: BIOL F260; CHEM F106X; CHEM F106X or concurrent enrollment. Cross-listed with BIOL F360. (3+0)

CHEM F402 Inorganic Chemistry 3 Credits Offered Fall
Symmetry and group theory, molecular orbital theory, solid state chemistry, acids and bases, redox reactions, non-aqueous solvents, descriptive chemistry of some main group elements. Prerequisites: CHEM F202; CHEM F322; CHEM F332. (1+6)

CHEM F406 Atmospheric Chemistry 3 Credits Offered Spring Odd-numbered Years
Chemistry of the lower atmosphere (troposphere and stratosphere) including photochemistry, kinetics, thermodynamics, box modeling, biogeochemical cycles and measurement techniques for atmospheric pollutants; study of important impacts to the atmosphere which result from anthropogenic emissions of pollutants, including acid rain, the "greenhouse" effect, urban smog and stratospheric ozone depletion. Prerequisites: CHEM F332 or equivalent or permission of instructor. Stacked with CHEM F606; ATM F606. (3+0)

CHEM F420 NMR Spectroscopy of Natural Products 3 Credits Offered Fall Even-numbered Years
Use of nuclear magnetic resonance (NMR) spectroscopy for the interpretation of the structure of organic molecules. Both one- and two-dimensional techniques will be covered. Theory will be introduced but most of the course will be structural elucidation by NMR. Includes training and use of the Varian Mercury NMR instrument. Prerequisites: CHEM F321; CHEM F322. Stacked with CHEM F620. (3+0)

CHEM F434W Chemistry Capstone Laboratory (n) 3 Credits Offered Fall
A capstone laboratory course with three major components: 1) experiments related to concepts learned in physical, analytical and inorganic chemistry courses emphasizing kinetics, spectroscopy and thermodynamics; 2) computer use in problem solving, data analysis and word processing; and 3) technical writing with emphasis on preparation of papers for publication. Special fees apply. Prerequisites: ENGL F111X; ENGL F211X or ENGL F213X; CHEM F212; CHEM F202 or permission of instructor. Co-requisites: CHEM F332. (1+6)

CHEM F450 General Biochemistry — Macromolecules 3 Credits Offered Fall
Focuses on the biochemistry of the two principal macromolecules: nucleic acids and proteins. Topics include: nucleotides metabolism, DNA structure and topology, DNA replication, RNA repair and recombination, cell cycle regulation, RNA transcription and processing. Gene expression, translation and protein metabolism. Biomedical relevance and contemporary techniques will be addressed if appropriate. Prerequisites: CHEM F322 or permission of instructor. Recommended: CHEM F331. (3+0)

CHEM F451 General Biochemistry — Metabolism 3 Credits Offered Spring
The biochemistry of metabolism. Topics include: chemistry of amino acids and its implication, protein structure-function, enzyme catalysis, glucose and glycogen metabolism and regulation, bioenergetics, lipid metabolism and biomembranes, amino acid metabolism and regulation of metabolism. Biomedical relevance and contemporary techniques will be addressed if appropriate. Prerequisites: CHEM F321; or permission of instructor. Recommended: CHEM F331. (3+0)

CHEM F455 W,O Environmental Toxicology 3 Credits Offered Fall Even-numbered Years
Environmental toxicology will focus on the general properties and principles of persistent and/or poisonous (toxic) chemicals commonly encountered in air, water, fish and wildlife. Numerous natural and synthetic chemicals in the environment will be discussed from a global perspective with some bias towards arctic and subarctic regions. Special fees apply. Prerequisites: CHEM F451; BIOL F303 or one semester each of organic chemistry and cell or molecular biology; or permission of instructor; ENGL F111X; ENGL F211X or F213X; COMM F131X or COMM F141X. Cross-listed with BIOL F455. (3+0)

CHEM F470 Cellular and Molecular Neuroscience 3 Credits Offered Fall Even-numbered Years
The goal of this course is to provide an overview of the cellular and molecular underpinnings of signaling in the nervous system. Discussion will be focused on properties of excitable membranes, synaptic transmission, and neurological integration. Fundamentals of the functional properties of neurons will provide the background for discussions of small neuronal circuits that regulate behavior, the cellular/molecular basis of learning and memory, and pharmacological approaches for the treatment of neuronal pathologies. Prerequisites: Two F300-level courses in BIOL or CHEM; MATH F200X OR MATH F272X; or permission of instructor Recommended: MATH F201X Stacked with CHEM F670. Cross-listed with BIOL F679. (3+0)

CHEM F474 Neurochemistry 3 Credits Offered Fall Odd-numbered Years
Covers basic and applied aspects of interneuronal signaling of specific neurotransmitter systems. Lectures will be based on chapters from assigned text as well as recent and historical literature relevant to these topics. Basic concepts introduced in lectures will be applied through guided discussion of original research papers. Students will learn to prepare “peer reviews” of selected papers and critically discuss original research. Prerequisites: BIOL F115X; CHEM F332; BIOL F470 or CHEM F470 or PSY F335. Stacked with CHEM F676. (3+0)

CHEM F481 Seminar 1 Credit Offered Fall or Spring
Introduction to the techniques and style of technical oral presentation generally accepted by professional chemists. Class will meet two hours per week, the first hour in closed session, the second, open to the public. Seminar attendance and participation in observing and critiquing presentations by graduate students, chemistry faculty, and their peers is required. Note: Oral
communication intensive credit is earned upon successful completion of CHEM F482. Graded Pass/Fail. Prerequisites: COMM F131X or COMM F141X. (2+0)

CHEM F482 O Seminar 2 Credits Introduction to the techniques and style of technical oral presentation generally accepted by professional chemists. Class will meet two hours per week, the first hour in closed session, the second, open to the public. Preparation of a 40 minute presentation to be delivered twice, first, to others in the course in the closed session for critiquing and suggestions for improvement and later, in the open seminar for evaluation by all. Prerequisites: CHEM F481; COMM F131X or COMM F141X. (2+0)

CHEM F488 Undergraduate Chemistry and Biochemistry Research 2–3 Credits Advanced research topics from outside the usual undergraduate laboratory offerings. The student will be required to make presentations and turn in a final report. Research areas range from atmospheric chemistry to molecular biology. A substantial level of chemistry or biochemistry background is assumed. Special fees apply. Prerequisites or Co-requisites: CHEM F324 or CHEM F434 or CHEM F413, or permission of instructor. (0+6–9)

CHEM F601 Introduction to Atmospheric Sciences 3 Credits Offered Fall Fundamentals of atmospheric science. Includes energy and mass conservation, internal energy and entropy, atmospheric water vapor, cloud microphysics, equations of motion, hydrostatics, phase oxidation, heterogeneous chemistry, the ozone layer, fundamentals of biogeochemical cycles, solar and terrestrial radiation and radiative-convective equilibrium. Also includes molecular, cloud and aerosol absorption and scattering. Prerequisites: Graduate standing. Cross-listed with ATM F601. (3+0)

CHEM F602 Bioinorganic Chemistry 3 Credits Offered Fall Even-numbered Years Survey of structure, functions, and chemical properties of natural metalloproteins and metalloenzymes, roles of metalloproteins in nucleic acid formation and replication, metal-based medicines. Prerequisites: CHEM F450 or CHEM F451. (3+0)

CHEM F605 Aquatic Chemistry 3 Credits Offered Fall Even-numbered Years Chemistry of aquatic systems, including the development of equilibrium and kinetic models to understanding the speciation, transformation and partitioning of inorganic chemical species in natural and engineered water systems. Emphasis is on the study of acid-base chemistry; complexation, precipitation-dissolution and reduction-oxidation reactions. Prerequisites: Graduate standing or permission of instructor. Cross-listed with ENVE F641. (3+0)

CHEM F606 Atmospheric Chemistry 3 Credits Offered Spring Odd-numbered Years Chemistry of the lower atmosphere (troposphere and stratosphere) including photochemistry, kinetics, thermodynamics, box modeling, biogeochemical cycles and measurement techniques for atmospheric pollutants; study of important impacts to the atmosphere which result from anthropogenic emissions of pollutants, including acid rain, the "greenhouse" effect, urban smog and stratospheric ozone depletion. Prerequisites or Co-requisite: ATM F601 or permission of instructor. Cross-listed with ATM F606. (3+0)

CHEM F609 Environmental Geochemistry 3 Credits Offered Spring Odd-numbered Years Focus on advanced topics and methods in chemistry of aquatic and soil environments. Detailed treatment of the thermodynamic, kinetic and structural principles involved in the description and modeling of low-temperature aqueous geochemical systems. Particular emphasis on heterogeneous interactions, including dissolution/precipitation, sorption and microbial processes, involved in the partitioning, transformation and transport of chemical species in the environment. Prerequisites: ENVE F641 or GEOS F618 or permission of instructor. Cross-listed with GEOS F633. (3+0)

CHEM F618 Crystallography and Diffraction 3 Credits Offered Spring Even-numbered Years The structure of solid-state materials and the analysis of materials using X-ray scattering techniques. Material structure topics will include crystal lattices, space-group symmetry, projections, the reciprocal lattice, and crystal chemistry. Methods for investigating the structure of materials and identification of phase will be covered in depth including: fundamentals of X-ray scattering, diffraction from single crystals, powder diffraction (quantitative) phase analysis, Rietveld refinements, texture analysis, and reflectivity. Students will be trained in the use of modern X-ray disciplines including materials chemistry, mineralogy, petrology, and engineering materials with an emphasis on methods of data collection and analysis. Special fees apply. Prerequisite: Graduate standing or permission of the instructor. (3+2)

CHEM F620 NMR Spectroscopy of Natural Products 3 Credits Offered Fall Even-numbered Years Use of nuclear magnetic resonance (NMR) spectroscopy for the interpretation of the structure of organic molecules. Both one- and two-dimensional techniques will be covered. Theory will be introduced but most of the course will be structural elucidation by NMR. Includes training and use of the Varian Mercury NMR instrument. Prerequisites: Graduate standing or permission of instructor. Stacked with CHEM F420. (3+0)

CHEM F621 Enzymology and Bio-Organic Chemistry 3 Credits Offered Spring Even-numbered Years Applications of the methods and concepts of physical organic chemistry to enzyme-catalyzed reactions. Prerequisites: CHEM F451. (3+0)

CHEM F622 Biosynthesis of Plant Natural Products 3 Credits Offered Fall Even-numbered Years Three major pathways of plant secondary metabolism: terpene, shikimate and acetyl-CoA pathways. Includes discussion of offshoots of these pathways to various classes of alkaloids. Use of stable and radioisotopes in conjunction with modern NMR spectroscopy and kinetic isotope effects will be stressed. Prerequisites: CHEM F322. (3+0)

CHEM F623 Molecular Modeling 3 Credits Offered Spring Even-numbered Years Theory and practice of quantum and molecular mechanics methods in organic, physical, inorganic and environmental chemistry and biochemistry; applications of computational software on workstations and multi-processor servers. Prerequisites: Graduate standing in chemistry of biochemistry, one year each of undergraduate organic, physical and analytical chemistry or equivalent or permission of instructor. Recommended: CHEM F402. (3+2+0)

CHEM F628 Advanced Immunology 3 Credits Offered Fall Odd-numbered Years Advanced level of knowledge and understanding of the structural and molecular basis of the innate and adaptive immune responses in terms of a complex system. Prerequisites: BIOL F463; BIOL F261 or F360 or equivalent or permission of instructor. Cross-listed with BIOL F628. (3+0)

CHEM F631 Environmental Fate and Transport 3 Credits Offered Spring Even-numbered Years Examination of the physical properties that govern the behavior, fate and transport of contaminants released into the environment. Topics include air-water partitioning and exchange, organic solvent-water partitioning, diffusion, sorption, chemical and biological transformation reactions, and modeling concepts. Cross-listed with ATM F631. (3+0)

CHEM F632 Molecular Spectroscopy 3 Credits Offered Fall Odd-numbered Years Application of quantum mechanics to molecular bonding and spectroscopy. Topics include: applications of lasers to probe chemical reactivity, photochemistry and the detection of trace compounds in mixtures. Variable content. May be repeated for credit. Prerequisites: CHEM F332 or permission of instructor. (3+0)
CHEM F654  Protein Structure and Function  
3 Credits  Offered Spring Even-numbered Years  
Contemporary topics in peptide and protein biochemistry. Topics include peptide synthesis, protein modification, comparative aspects of structure, protein engineering, enzyme and receptor function as well as molecular modeling. Prerequisite: CHEM F451. (3+0)

CHEM F655  Environmental Toxicology  
3 Credits  Offered Fall Even-numbered Years  
Environmental toxicology will focus on the general properties and principles of persistent and/or poisonous (toxic) chemicals commonly encountered in air, water, fish and wildlife. Numerous natural and synthetic chemicals in the environment will be discussed from a global perspective with some bias towards arctic and subarctic regions. Special fees apply. Prerequisites: CHEM F451; BIOL F303; or one semester each of organic chemistry and cell or molecular biology or permission of instructor. Cross-listed with BIOL F656. (3+0)

CHEM F657  Molecular Foundations of Gene Expression  
3 Credits  Offered Spring Even-numbered Years  
The molecular regulation of gene expression in prokaryotes and eukaryotes in the context of development and disease. Major topics include: protein/DNA interactions, structure-function relations of transcription factors, signal transduction, control of transcription and translation, chromatins structure and DNA replication. Prerequisites: CHEM F451; CHEM F456; CHEM F461 or equivalent; or permission of instructor. (3+0)

CHEM F658  Current Techniques in Biochemistry  
3 Credits  Offered Spring Even-numbered Years  
Focusses on current techniques in biochemistry. This is a laboratory intensive course covering: Restriction Enzymes, polymerase chain reaction (PCR), DNA electrophoresis, Enzyme Linked Immunosorbent Assays (ELISA), DNA recombination and cloning, protein purification by affinity chromatography, protein electrophoresis, Western blots, enzyme kinetics, protein quantification by spectrophotometry, and basic tissue culture techniques. It is an important goal of this graduate course to emphasize experimental design, evaluation, and trouble shooting within each of the biochemical techniques and also to challenge students to develop their own experimental designs, evaluate the scope and limitations of the design/technique, and propose solutions for potential problems. Special fees apply. Prerequisite: CHEM F450; CHEM F451; graduate standing; or permission of the instructor. (1+6)

CHEM F660  Chemical Oceanography  
3 Credits  Offered Spring  
An integrated study of the chemical, biological, geological and physical processes that determine the distribution of chemical variables in the sea. Topics include biogeochemical cycles and the use of tracers to follow these complex chemical cycles. The chemistry of carbon is considered in detail. Interactions with the atmosphere and lithosphere (including implications of the mid-ocean ridge vent system to ocean chemistry) are examined. Prerequisite: Graduate standing. Cross-listed with MSL F660. Stacked with MSL F461 (3+0)

CHEM F666  Scientific Teaching  
2 Credits  Offered Spring Even-numbered Years  
This course explores methods for teaching science at the university level. Emphasis is placed on methods of course design, instructional techniques, assessment and course management that have been shown by research to improve student learning. This course is intended for graduate students in the sciences who have an interest in improving their teaching skills. The course format will be a mixture of discussion, workshops and seminars. If the course is over-enrolled, priority will be given to teaching assistants who are assigned to teach large, introductory level (100 or 200 level) courses during the semester they are taking this course. Prerequisites: Graduate standing or permission of the instructor. Cross-listed with STO F666, BIOL F666, GEOS F666. (2+0)

CHEM F670  Cellular and Molecular Neuroscience  
3 Credits  Offered Fall Even-numbered Years  
The goal of this course is to provide an overview of the cellular and molecular underpinnings of signaling in the nervous system. Discussions will be focused on properties of excitable membranes, synaptic transmission, and neurological integration. Fundamentals of the functional properties of neurons will provide the background for discussions of small neuronal circuits that regulate behavior, the cellular/molecular basis of learning and memory, and pharmacological approaches for the treatment of neuronal pathologies. Prerequisites: Two F300-level courses in BIOL or CHEM; MATH F200X OR MATH F272X; or permission of instructor Recommended: MATH F201X. Cross-listed with BIOL F679. (3+0)

CHEM F671  Receptor Pharmacology  
3 Credits  Offered Spring Odd-numbered Years  
Covers basic drug/receptor theory to train students to a) assess affinity and efficacy of receptor ligands; b) work with and interpret functional assays and binding results; c) critically evaluate original research regarding receptor pharmacology with an emphasis on ligand-gated ion channels and G-protein coupled receptors; and d) identify testable hypotheses and design experiments to test these hypotheses. Prerequisites: Upper-division or graduate biochemistry or neuroscience course or permission of instructor. Recommended: BIOL F417 Neurobiology is recommended. (3+0)

CHEM F674  Membrane Biochemistry and Biophysics  
3 Credits  Offered Spring Odd-numbered Years  
Basic biophysical and molecular processes associated with membrane-mediated events in the context of cellular physiology. Major topics include biochemical and biophysical characteristics of membrane lipids; structure-function relation of membrane proteins; protein trafficking/targeting; vesicle transport and membrane fusion/exocytosis; the nature of membrane excibility; and the role of membrane in bioenergetics. Prerequisites: CHEM F451; CHEM F456; CHEM F461 or equivalent; or permission of instructor. (3+0)

CHEM F675  Cellular Signaling  
3 Credits  Offered Spring Odd-numbered Years  
Cellular signaling is of vital importance in complex biomolecular systems, development, physiology, and pathology and thus, constitutes a major topic in modern medical and pharmacological research. This course concentrates on cellular signal transduction and regulation in higher animals and humans. Major topics include G-proteins, Protein kinases, Ca2+, cAMP, lipid mediators, adaptor proteins and signal recognition domains. Prerequisites: Upper division or graduate biochemistry or neuroscience course or permission of instructor. (3+0)

CHEM F676  Neurochemistry  
3 Credits  Offered Fall Odd-numbered Years  
Covers basic and applied aspects of interneuronal signaling of specific neurotransmitter systems. Lectures will be based on chapters from assigned text as well as recent and historical literature relevant to these topics. Basic concepts introduced in lectures will be applied through guided discussion of original research papers. Students will learn to prepare "peer reviews" of selected papers and critically discuss original research. Prerequisites: BIOL F115X; CHEM F322; BIOL F417O or CHEM F470 or PSY F335. Stacked with CHEM F474. (3+0)

CHEM F688  Biochemical and Molecular Biology Seminar  
0–1 Credit  
A seminar on various topics related to biochemistry and molecular biology including discussions of recent literature and research results. (1+0)

CHEM F691  Research Presentation Techniques  
1 Credit  Offered Fall  
Review of recent research in chemistry to expose students to recent findings, methodologies and concepts in a broad range of chemistry and related disciplines. How to present and defend research proposals. Course may be repeated for credit. Prerequisites: Graduate standing in physical sciences or permission of instructor. (1+0)
CHINESE

Note: Two semester length courses in a single Alaska Native Language or other non-English language taken at the university level may replace 6 credits in the Perspectives on the Human Condition section of the Core. CHNS F101–F102 may be used to meet this requirement but then may not be used to meet the humanities degree requirement.

CHNS F100A  Chinese Culture and Conversation IA
3 Credits  Offered As Demand Warrants
An introductory course in Chinese language and culture with an emphasis on the spoken pronunciation, and contemporary use of the language. This class does not meet Perspectives on the Human Condition requirements, or Foreign Language major or minor requirements. (3+0)

CHNS F100B  Chinese Culture and Conversation IB
3 Credits  Offered As Demand Warrants
A continuation of introduction to the Chinese language and culture with an emphasis on the spoken and written language. Course will focus on language skills to include grammar, vocabulary, pronunciation, and contemporary use of the language. This class does not meet Perspectives on the Human Condition requirements, or Foreign Language major or minor requirements. Prerequisites: CHNS F100A or permission of the instructor. (3+0)

CHNS F100C  Chinese Culture and Conversation IIA
3 Credits  Offered As Demand Warrants
This is the first semester course of second-year examination of Chinese culture and conversation (a continuation of CHNS F100B). The student will continue to progress in the basic skills of listening, speaking, reading, and writing by learning more characters/vocabulary and broadened sentence patterns. Grammar and sentence pattern analysis will be presented systematically with respect to the course materials to help students establish a solid foundation for the use of language. Prerequisites: CHNS F100B or permission of the instructor. (3+0)

CHNS F100D  Chinese Culture and Conversation IIB
3 Credits  Offered As Demand Warrants
The second semester course of second-year examination of Chinese culture and conversation (a continuation of CHNS F100C). The student will continue to progress in the basic skills of listening, speaking, reading, and writing by learning more characters/vocabulary and broadened sentence patterns. Grammar and sentence pattern analysis will be presented systematically with respect to the course materials to help students establish a solid foundation for the use of language. Prerequisites: CHNS F100C or permission of the instructor. (3+0)

CHNS F101  Elementary Chinese I (h)
5 Credits  Offered Fall Odd-numbered Years
First year spoken and written Chinese. Emphasis on the basic elements of the language to acquire skills in listening, speaking, reading and writing. About 300 characters will be taught. Cultural aspects will be presented. (5+0)

CHNS F102  Elementary Chinese II (h)
5 Credits  Offered Spring Even-numbered Years
First year spoken and written Chinese. Emphasis on the basic elements of the language to acquire skills in listening, speaking, reading and writing. Approximately 300 characters will be taught. Cultural aspects are presented. Prerequisites: CHIN F101 or equivalent. (5+0)

CHNS F201  Intermediate Chinese I (h)
4 Credits  Offered Fall Even-numbered Years
Continuation of CHNS F102. Continue to gain language skills by learning more characters/vocabulary and broadened sentence patterns. About 200 characters and 700 vocabulary words will be taught. Prerequisites: CHNS F102 or equivalent. (4+0)

CHNS F202  Intermediate Chinese II (h)
4 Credits  Offered Spring Odd-numbered Years
Continuation of CHNS F102. Continue to gain language skills by learning more characters/vocabulary and broadened sentence patterns. About 200 characters and 700 vocabulary words will be taught. Prerequisites: CHNS F201 or equivalent. (4+0)

CIVIL ENGINEERING

A per-semester fee for computing facility user fee is assessed for CEM engineering courses. This fee is in addition to any lab/materials fee.

CE F112  Elementary Surveying
3 Credits  Offered Spring
Basic plane surveying; use of transit, level, theodolite and total station. Traverses, public land system, circular curves, cross-sectioning and earthwork. Special fees apply. Prerequisites: MATH F108. (2+3)

CE F302  Introduction to Transportation Engineering
3 Credits  Offered Spring
Introduction to multimodal transportation systems and the factors that influence the planning, design and operation of the systems. Prerequisites: CE junior standing or permission of instructor. (3+0)

CE F326  Introduction to Geotechnical Engineering
4 Credits  Offered Spring
Fundamentals of geotechnical engineering including identification and classification of soil, physical and mechanical properties of soil, subsurface exploration, laboratory testing techniques, seepage, compaction, stresses in soil, soil consolidation, and drained and undrained shear strength of soil. Special fees apply. Prerequisites: ES F331; GE F261. (3+3)

CE F331  Structural Analysis
3 Credits  Offered Spring
Analysis of statically determinate and indeterminate structures to include beams, trusses and frames. Internal force resultants, shear and moment diagrams, deflections, internal stresses. Influence lines and criteria for moving loads. Indeterminate analysis to include methods of consistent deflections, slope deflection and moment distribution. Introduction to matrix methods. Special fees apply. Prerequisites: ES F209; ES F331. (2+3)

CE F334  Properties of Materials
3 Credits  Offered Fall

CE F341  Environmental Engineering
4 Credits  Offered Spring
Fundamentals of environmental engineering including theory and application of water and wastewater, solid waste and air quality engineering practice; natural processes that influence pollutant fate and use of these processes in engineered systems for pollution control. Special fees apply. Prerequisites: CHEM F106X; ES F341; or graduate standing. (3+3)

CE F344  Water Resources Engineering
3 Credits  Offered Fall
Fundamentals of engineering hydrology and hydraulic engineering. Water cycle and water balance, precipitation, evaporation, runoff, statistical methods, flood control, open channels and groundwater. Special fees apply. Prerequisites: ES F341. (3+0)

CE F405  Highway Engineering
3 Credits  Offered Fall
Design of geometric elements of streets and highways with emphasis on safety and efficiency. Roadway functional classification, design controls, vertical and horizontal alignments, cross sections, interchanges and intersections. Co-requisite: CE F302 or permission of instructor. (2+3)
Recommended: CE F422; GE F384. 
Prerequisites: CE F326; or permission of instructor.

Thawing, foundations design alternatives, pipelines, roads and airfields in frozen and thawing soils, methods of thermal analysis of soil freezing and hazards related to permafrost, index, thermal, and mechanical properties of frost and ways of its formations, factors important for permafrost existence, 

UNIVERSITY OF ALASKA FAIRBANKS

Prerequisites: COMM F131X or COMM F141X; System design principles for large-scale constructed facilities. Application

CE F438 W,O (1+6)
Prerequisites: Permission of instructor.

The final structure will be load tested and graded based on meeting, safety, public speaking and teamwork are learned and used during the semester. The final structure will be load tested and graded based on meeting the goals of the specification. Prerequisites: CE F432; Permission of instructor. Recommended: CE F432. (1+6)

CE F433 (3+0)
CE F434 (3+0)
CE F435 (3+0)
CE F436 W,O (3+0)

Axially loaded members. Current ACI 318 Code used. Special fees apply.

3 Credits

CE F432 (3+0)

Steel Design

Design of Engineered Systems

Design-build technology for bridge structures is introduced. A bridge system is developed for a given crossing with predetermined specifications. Alternate designs are developed. These alternatives are based on design calculations, prepared drawings and suitability. Design ideas are developed and tested to verify if the idea meets the design assumptions. Techniques in design, fabrication, fund raising, project management, fiscal responsibility, safety, public speaking and teamwork are learned and used during the semester. The final structure will be load tested and graded based on meeting the goals of the specification. Prerequisites: Permission of instructor. Recommended: CE F432. (1+6)

CE F438 W,O (3+0)

Design of Engineered Systems

System design principles for large-scale constructed facilities. Application of ethics, liability and legal principles to professional practice. Emphasis on teamwork and leadership. Prerequisites: COMM F131X or COMM F141X; ENGL F111X; ENGL F211X or ENGL F213X; CE F405 or CE F422 or CE F432 or CE F433 or CE F434 or CE F442 or CE F445; last year of civil engineering BS program. (3+0)

CE F442 (3+0)
Environmental Engineering Design

Design of pollution control and remediation systems. Theories and principles for the design of engineering systems for environmental protection, management and control. Water and wastewater treatment and solid waste management. Special fees apply. Prerequisites: CE F341. (3+0)

CE F445 (3+0)
Hydrologic Analysis and Design

Design and analysis; extended coverage of hydrologic concepts from CE F344. Precipitation, snow cover and evaporation analysis; groundwater hydraulics; runoff analysis and prediction; statistical hydrology; application of simulation models. Design of structures such as culverts, reservoirs, wells, pumps and pipe networks. Prerequisites: CE F344. (2+3)

CE F451 (2+3)
Construction Cost Estimating and Bid Preparation

Compilation and analysis of the many items that influence and contribute to the cost of projects to be constructed. Preparation of cost proposals and study of bidding procedures. Recommended: College math. (3+0)

CE F470 (1+0)
Civil Engineering Internship

Supervised work experience in engineering organizations. Assignments individually arranged with cooperating organizations and agencies. Course may be repeated three times. Each repeat must be for a different type of project. As part of the requirements for earning credit, the student must have a letter of release of information from the company, prepare a written report and make an oral presentation. Program must be approved in advance by the department. Prerequisites: Upper division standing; permission of department coordinator. (0+3)

CE F490 (0.5+0)
Civil Engineering Seminar

CE F490-F491, together, constitute the standard one-year engineering seminar. The class is designed to provide the student with exposure to the latest information available from researchers and practicing professionals in industry. Graded Pass/Fail. Prerequisites: Junior/senior standing. (0.5+0)

CE F491 (0.5+0)
Civil Engineering Seminar

CE F490-F491, together, constitute the standard one-year engineering seminar. The class is designed to provide the student with exposure to the latest information available from researchers and practicing professionals in industry. Graded Pass/Fail. Prerequisites: Junior/senior standing. (0.5+0)

CE F490 (0+0)

Arctic Engineering

Application of engineering fundamentals to problems of advancing civilization to polar regions. Logistics, foundations on frozen ground and ice thermal aspects of structures, materials, transport and communications, and heating and ventilating. Special fees apply. Recommended: Senior standing or BS degree in engineering; permission of instructor. (3+0)

CE F603 (3+0)
Paved Road Design

Current design techniques for flexible and rigid pavements. Materials characterization, loading considerations, empirical design methods, mechanistic design methods and rehabilitation. Recommended: CE F402; graduate standing; or permission of instructor. (3+0)

CE F605 (3+0)
Pavement Design

Recommended: As Demand Warrants

Construction equipment, methods, planning and scheduling, construction contracts, management and accounting, construction estimates, costs, and project control. Recommended: ESM F450 or equivalent. (3+0)

CE F620 (3+0)
CE F622 Foundations and Retaining Structures  
3 Credits  
Offered As Demand Warrants  
Advanced study of shallow and deep foundations; analyses and design of retaining walls, free-standing sheet-pile walls, braced excavations, slurry walls, tied-back retention systems, reinforced earth, frozen soil walls, anchored bulkheads, and cellular cofferdams. Prerequisites: CE F422 or permission of instructor. (3+0)

CE F625 Soil Stabilization and Embankment Design  
3 Credits  
Offered As Demand Warrants  
Soil and site improvement using deep and shallow compaction, additives, pre-loading, vertical and horizontal drains, electro-osmosis and soil reinforcement, dewatering and stabilization; embankment design, earth pressure theories and pressure in embankment, embankment stability, embankment construction, control and instrumentation. Prerequisites: CE F422 or permission of instructor. (3+0)

CE F626 Thermal Geotechnics  
3 Credits  
Offered As Demand Warrants  
Fundamentals of thermal regimes of soils and rocks. Thermal impact of structures on soils. Thawing of permafrost beneath roads, buildings and around pipelines. Natural and artificial freezing of soils. Engineering means to maintain thermal regime of soils. Thermal design considerations. Prerequisites: CE F326; CE F422; CE F425; or permission of instructor. Cross-listed with GE F626. (3+0)

CE F627 Geotechnical Earthquake Engineering  
3 Credits  
Offered As Demand Warrants  
Introduction to soil dynamics and geotechnical aspects of earthquakes; influences of soils on ground motion, determination of soil response under strong seismic motion, causes of soil failures, soil liquefaction, lateral spreading, the seismic response of earth structures, and seismic-deformation procedures for slopes. Prerequisites: CE F326 or permission of instructor. (3+0)

CE F628 Unsaturated Soils Mechanics  
3 Credits  
Offered As Demand Warrants  
Fundamentals of soil behavior under load; pore pressure during monotonic loading; Ladd’s “Simple Clay” model; densification and drained cyclic loading of sand; undrained cyclic loading of soil. Prerequisites: CE F326. (3+0)

CE F630 Advanced Structural Mechanics  
3 Credits  
Offered As Demand Warrants  
Shear and torsion, nonsymmetrical bending, shear center, curved beams, introduction to composite material mechanics, application in bridge engineering. Prerequisites: Math F302; ES F331. Recommended: Graduate standing in engineering. (3+0)

CE F631 Advanced Structural Analysis  
3 Credits  
Offered Spring Odd-numbered Years  
Derivation of the basic equations governing linear structural systems. Application of stiffness and flexibility methods to trusses and frames. Solution techniques utilizing digital computers. Planar structures and space structures (trusses and frames) will be covered. Both exact and approximate solution techniques will be reviewed. Prerequisites: CE F331 or permission of instructor. (3+0)

CE F633 Theory of Elastic Stability  
3 Credits  
Offered Spring Odd-numbered Years  
The theory and implementation of the buckling of slender elements will be covered. Both lateral and local buckling concepts will be discussed. Emphasis will be placed on developing the ability to evaluate if a member is likely to buckle. The course will cover elastic and inelastic buckling of columns. Other topics include lateral torsional buckling of beams, potential buckling of beam-columns and rigid frame members and the buckling of non standard shapes. Prerequisites: CE F331; CE F432; MATH F302. (3+0)

CE F634 Structural Dynamics  
3 Credits  
Offered As Demand Warrants  
This course covers the theory of structural dynamics. Subjects include equations of motion for un-damped single and multiple degree of freedom systems. Free vibration and response to harmonic and periodic excitations will be studied. Response to arbitrary, step and pulse type excitations are studied in preparation for a study of earthquake type loading. The basic concepts related to the interaction of a structure to an earthquake event will be discussed. Prerequisites: ES F210; CE F331; MATH F302. (3+0)

CE F635 Numerical Methods for Geo-Mechanics and Soil-Structure Interaction  
3 Credits  
Offered As Demand Warrants  
Applications of numerical methods for problems involving seepage, consolidation, foundation on expansive soils and pile installation. Finite difference and element methods, non-linear analysis techniques, elastoplastic formulation with a tangent stiffness approach, seepage analysis, flow-deformation, coupled analysis, models for soil-structure interaction, solution accuracy and reliability. Prerequisites: CE F326; graduate standing; or permission of instructor. Recommended: MATH F302. (3+0)

CE F637 Earthquakes: Seismic Response of Structures  
3 Credits  
Offered As Demand Warrants  
Fundamentals of structural earthquake engineering; strong ground motion phenomena; dynamic analysis of structural systems for seismic motion; response spectrum and time history methods, design of structural systems for lateral forces; shearwalls and diaphragms; moment-resisting frames, braced frames; current design criteria and practice; connection details, serviceability requirement; story drift, non-structural building elements; soil-structure interaction. Prerequisites: ES F210 or permission of instructor. (3+0)

CE F640 Prestressed Concrete  
3 Credits  
Offered As Demand Warrants  

CE F646 Structural Composites  
3 Credits  
Offered As Demand Warrants  
The basics of structural composite theory. Basic design procedures related to structural composite members and the structural analysis of members made of various materials to create laminates or sandwich panels will be covered. Prerequisites: ES F331; CE F331 or permission of instructor. (3+0)

CE F650 Bridge Engineering  
3 Credits  
Offered As Demand Warrants  
Covers structural systems, loading and analysis by influence lines. Slab and girder bridges considering composite design, prestressed and concrete bridges and how these bridges are designed and rated using AASHTO specifications. Prerequisites: CE F432; CE F433; or permission of instructor. (3+0)

CE F652C Pre-Construction Contracts  
1 Credit  
Offered As Demand Warrants  
Provides an introduction to determining scope and scheduling needs for architectural and engineering contracts and other design-related contracts. A review of type of contracts and procurement methods available. Handling changes within the pre-construction contract. (1+0)

CE F659A Mentoring  
1 Credit  
Offered As Demand Warrants  
This course will provide insight into how to “train the trainer.” It will incorporate the role of HR in department and relevant case studies to enable students to understand key principles, and learn skills and behaviors to enhance knowledge transfer. (1+0)

CE F660A Project Management Boot Camp  
1 Credit  
Offered As Demand Warrants  
This course provides “basic training” in project management fundamentals, with emphasis on the management of engineering and construction projects. Much of the discussion is centered on the “triple constraint” of cost, schedule, and quality/scope. Topics include project characteristics; the project life cycle; project organizations, teams and leadership; planning;
monitoring and controlling each element of the triple constraint; and project termination and phase-out. Planning issues include the project charter and scope statement, the work breakdown structure, and both network- and non-network-based scheduling techniques. **Prerequisites:** Permission of instructor. (3+0)

**CE F661** Advanced Water Resources Engineering  
3 Credits  
Offered Odd-numbered Years  
Engineering hydraulics and hydrology including use of standard computer models to solve water resource engineering problems. Saint Venant shallow water equations. Introduction to perturbation method. **Recommended:** Permission of instructor. (3+0)

**CE F662** Open Channel and River Engineering  
3 Credits  
Offered Even-numbered Years  
Principles of open channel flow, specific energy, hydraulic jump, transitions and controls, uniform and non-uniform flows, steady and unsteady flows, numerical solution for unsteady flows. River engineering, stream channel mechanics, and mechanics of sedimentation. **Recommended:** Permission of instructor. (3+0)

**CE F663** Groundwater Dynamics  
3 Credits  
Offered Even-numbered Years  
Fundamentals of geohydrology, hydraulics of flow through porous media, well hydraulics, groundwater pollution, and groundwater resources development. **Recommended:** Permission of instructor. (3+0)

**CE F664** Sediment Transport  
3 Credits  
Offered Even-numbered Years  
Fundamentals of sediment transport processes in rivers, oceans and reservoirs. Bed-load and suspended-load transports. Mechanics of turbidity currents. Reservoir sedimentation. Numerical modeling. **Prerequisites:** Graduate standing or permission of instructor. (3+0)

**CE F681** Frozen Ground Engineering  
3 Credits  
Offered Fall Odd-numbered Years  
Nature of frozen ground; thermal properties of frozen soils, classification, physical and mechanical properties of frozen soils, subsurface investigation of frozen ground, thaw settlement and thaw consolidation, slope stability and principles of foundation design in frozen ground. **Prerequisites:** Training or experience in soil mechanics. (3+0)

**CE F682** Ice Engineering  
3 Credits  
Offered Odd-numbered Years  
The factors governing design of marine structures, which must contend with the presence of ice. Topics include ice growth, ice structure, mechanical properties and their dependence on temperature and structure, creep and fracture, mechanics of ice sheets, forces on structures, and experimental methods. **Prerequisites:** ES F331, MATH F202X, training or experience in soil mechanics. (3+0)

**CE F683** Arctic Hydrology and Hydraulic Engineering  
3 Credits  
Offered Odd-numbered Years  
Aspects of hydrology and hydraulics unique to engineering problems of the north. Although the emphasis will be on Alaskan conditions, information from Canada and other circumpolar countries will be included in the course. **Prerequisites:** CE F344 or equivalent. (3+0)

**CE F684** Arctic Utility Distribution  
3 Credits  
Offered As Demand Warrants  
Practices and considerations of utility distribution in Arctic regions. Emphasis on proper design to include freeze protection, materials, energy conservation and system selection. **Prerequisites:** ES F341 or permission of instructor. (3+0)

**CE F685** Topics in Frozen Ground Engineering  
3 Credits  
Offered As Demand Warrants  
Selected frozen ground foundation engineering problems will be explored in depth including refrigerated foundations and pile foundations. **Prerequisites:** CE F681. (3+0)

**COMM F111X** Introduction to Interpersonal Communication  
3 Credits  
This course features the fundamental principles of effective oral communication, emphasizing interpersonal communication as well as public speaking. Through role playing, speeches and evaluations of other speakers, students explore the complexities of communication in today’s society. (3+0)

**COMM F131X** Fundamentals of Oral Communication: Public Context  
3 Credits  
Presentational speaking skills: individual and group. Includes verbal and nonverbal skills, critical thinking in selecting and organizing materials, audience analysis and speaking presentation. Group skills include task and relational interaction, required interdependence, working across cultural differences, group decision-making and shared logistics of presentation. Student evaluations are based on nationally normed speaking competencies. (3+0)

**COMM F141X** Fundamentals of Oral Communication: Group Context  
3 Credits  
Public speaking. Through role playing, speeches and evaluations of other speakers, students explore the complexities of communication in today’s society. (3+0)
# COMMUNICATION (COMM)

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
<th>Offered</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>COMM F322 W</td>
<td>Communication in Interpersonal Relationships (s)</td>
<td>3</td>
<td>Offered</td>
<td>An examination of communication in the most basic human context, the relational dyad. Emphasis on the ongoing, co-construction of the relationship as communicative action. Discussion of interpersonal relationships generally, and extensive discussion of communication in the patterns of coming together, relationship maintenance, relational and personal growth in relationships, relational conflict, and relational disengagement. Theoretical and practical perspectives. Prerequisites: ENGL F111X; ENGL F211X or ENGL F213X; or permission of instructor. (3+0)</td>
</tr>
<tr>
<td>COMM F330</td>
<td>Intercultural Communication (s)</td>
<td>3</td>
<td>Offered</td>
<td>The nature and sources of problems in communication that may arise when persons with different cultural backgrounds interact. Emphasis on problems in intercultural communication in Alaska. Prerequisites: Any lower-division communication course or permission of instructor. (3+0)</td>
</tr>
<tr>
<td>COMM F331 O</td>
<td>Advanced Group Communication (s)</td>
<td>3</td>
<td>Offered Spring</td>
<td>Current research and theory in intergroup and intragroup relations. Topics include the study of leadership, power, group structure, participation and conflict. Prerequisites: COMM F131X or COMM F141X; any lower-division communication course or permission of instructor. (3+0)</td>
</tr>
<tr>
<td>COMM F335 O</td>
<td>Organizational Communication (s)</td>
<td>3</td>
<td>Offered</td>
<td>Examines current theoretical and methodological approaches undergirding the construction of organizations via the communication process. Includes functional (message flow, load and network analysis) as well as interpretive (metaphors, narratives and organizational culture) approaches to the study of organizational communication. Prerequisites: COMM F131X or COMM F141X; any lower-division communication course or permission of instructor. (3+0)</td>
</tr>
<tr>
<td>COMM F351</td>
<td>Gender and Communication (s)</td>
<td>3</td>
<td>Offered Fall</td>
<td>Basic socialization differences exist in the communication practices of women and men in every culture, resulting in differing cultural constructions of male and female gender. Those differences are addressed in the interpersonal, organizational and cultural contexts. Exploration of cultural female/male dichotomy as well as individual similarities. Prerequisites: Any lower-division communication course or permission of instructor. Cross-listed with WGS F351. (3+0)</td>
</tr>
<tr>
<td>COMM F352</td>
<td>Family Communication (s)</td>
<td>3</td>
<td>Offered</td>
<td>Exploration of the functions of communication in marriage and the family, sequences and patterns of family communication, family communication as a continual process of coping with dialectical tensions, and the complexity of changing family life in Western societies. Prerequisites: Any lower-division communication course or permission of instructor. Recommended: COMM F322. (3+0)</td>
</tr>
<tr>
<td>COMM F353</td>
<td>Conflict, Mediation, and Communication (s)</td>
<td>3</td>
<td>Offered</td>
<td>Examines conflict as a complex communication event, together with the role of the mediator in building constructive outcomes in conflicts. Emphasis on developing skills to engage in mediation. Prerequisites: Any F100-level communication course or permission of instructor. (3+0)</td>
</tr>
<tr>
<td>COMM F360</td>
<td>Introduction to Public Relations</td>
<td>3</td>
<td>Offered Fall</td>
<td>Introduction to the theories, practices, principles and history of public relations. COMM F131X or COMM F141X or permission of instructor (3+0)</td>
</tr>
<tr>
<td>COMM F380</td>
<td>Communication and Diversity (s)</td>
<td>3</td>
<td>Offered Spring</td>
<td>Provides students with a cognitive and experiential foundation for understanding how the communication process works in the context of diversity. Includes an in-depth examination of those processes and products of processes that lead communicators to devalue differences in one another. (3+0)</td>
</tr>
<tr>
<td>COMM F401</td>
<td>Communication Research Methods (s)</td>
<td>3</td>
<td>Offered Fall</td>
<td>Quantitative research methodologies employed in the conduct of research on communication phenomena. Prerequisites: Any F300-level communication course; senior standing; or permission of instructor. (3+0)</td>
</tr>
<tr>
<td>COMM F425 W</td>
<td>Communication Theory (s)</td>
<td>3</td>
<td>Offered</td>
<td>Theories of human communication, as well as of the nature of inquiry into human communication phenomena. Issues include the nature of communication as a discipline, critical and scientific inquiry, and major paradigms or perspectives within which communication theories are created. Prerequisites: ENGL F111X; ENGL F211X or ENGL F213X; any F300-level communication courses; senior standing; or permission of instructor. (3+0)</td>
</tr>
<tr>
<td>COMM F432 O</td>
<td>Professional Public Speaking</td>
<td>3</td>
<td>Offered</td>
<td>Professional clear effective speaking. Uses evaluation criteria and assignments to build speaking competencies. Professional preparation for students whose career path includes public speaking. Prerequisites: COMM F131X or COMM F141X; senior standing. (3+0)</td>
</tr>
<tr>
<td>COMM F441</td>
<td>Persuasion (s)</td>
<td>3</td>
<td>Offered</td>
<td>Examination of communication situations which involve attempts to modify the beliefs, attitudes, values, intentions or behaviors of another individual or group of individuals. Explores the process, methods and ethics of attempts to affect change via persuasive communication. Prerequisites: Any F300-level communication course or permission of instructor. (3+0)</td>
</tr>
<tr>
<td>COMM F462 W</td>
<td>Communication in Health Contexts (s)</td>
<td>3</td>
<td>Offered</td>
<td>Health communication as an established context for communication study will be explored. Problems in health communication will be examined as well as how those problems are exacerbated by the various matters of diversity, language and setting. Communication between health care professionals, between health care providers and health care consumers, between health care facilities and communities, and the legal perspectives of health communication will be topical. Prerequisites: Any F300-level communication course; ENGL F111X; ENGL F211X or ENGL F213X; or permission of instructor. (3+0)</td>
</tr>
<tr>
<td>COMM F469</td>
<td>Communication Internship</td>
<td>1–3</td>
<td>Offer As DemandWarrants</td>
<td>Links academic and professional on-site learning. Students must arrange an appropriate internship. The internship must be relevant to communication, provide guided learning experiences in a profession that would be appropriate and of interest for employment after graduation, and include a minimum of 150 hours on-site. COMM F469 receives a deferred grade, which will then be completed following (or concurrent) fall semester when the student enrolls in COMM F470. Evaluation will be done by both site supervisor and course instructor, and the grade assigned will apply to the credits for both COMM F469 and COMM F470. Prerequisites: Junior or senior standing; permission of instructor. (0+0+10-30)</td>
</tr>
<tr>
<td>COMM F470</td>
<td>Communication Internship Seminar</td>
<td>3</td>
<td>Offered As DemandWarrants</td>
<td>Will improve job-hunting and networking skills and apply organizational communication theories (workplace socialization processes, cultural rituals, negotiation of power, social capital, emotional labor, etc.). COMM F469 receives a deferred grade, which will then be completed following (or concurrent) fall semester when the student enrolls in COMM F470. Evaluation will be done by both site supervisor and course instructor, and the grade</td>
</tr>
</tbody>
</table>
COMM F475 W  Applied Communication in Training and Development (s)

3 Credits
Applies communication theory and research to organizational settings. Includes the identification and assessment of problems and opportunities that would benefit from the application of communication interventions including training, development and transformation technologies. Prerequisites: Any F300-level communication course; ENGL F111X; ENGL F211X or ENGL F213X; or permission of instructor. (3+0)

COMM F480  Organizational Communication: Performance Management

3 Credits
Offered Fall Even-numbered Years
A comprehensive introduction to the role of communication in organizational change and development using Performance Management (PM) principles and practices. Ethical responsibility of PM communicators will be considered. Prerequisite: Any F300-level communication course or permission of instructor. (3+0)

COMM F482 W,O  Capstone Seminar in Communication (s)

3 Credits
Offered Spring
Original research to demonstrate ability to read and understand social research, synthesize information, formalize a research question and use research skills. This senior capstone course requires a research project presented in a public speaking forum. Prerequisites: COMM F131X or COMM F141X; COMM F401; ENGL F111X; ENGL F211X or ENGL F213X; or permission of instructor. (3+0)

COMM F600  Introduction to Professional Communication

3 Credits
Offered Fall
An introduction to professional practices important to communication careers. Professional writing and editing methods and techniques used in academic and/or professional careers. Development and presentation of professional reports which would include quantitatively- and qualitatively-based support. A.P.A. style guide will be covered. Prerequisites: Enrollment in MA in Professional Communication or permission of instructor. (3+0)

COMM F601  Communication Research Methodologies: Social Science

3 Credits
Offered Fall
Introduction to the range of methodologies used to produce both practical and theoretical knowledge in the discipline. Presents the relationships between scientific questions, appropriate selection of methodology and types of knowledge products. Note: COMM/JRN F601 is a required core course for the MA in Professional Communication. Cross-listed with JRN F601. (3+0)

COMM F602  Communication Research Methodologies: Human Science

3 Credits
Offered Spring
An introduction to research using a constructionist epistemology and the methodologies of the human science contexture. Includes evaluation and preparation of research using a variety of methodologies and to employ the data collection techniques that are implied by those methodologies. Prerequisites: COMM F601; COMM F625; or permission of the instructor. (3+0)

COMM F622  Interpersonal Interaction

3 Credits
All understandings of communication study begin at the interpersonal level because this is the context in which the relation of self and the social is most clear. Interpersonal Interaction will provide students an opportunity to investigate a particular communication context of their choice (health, family, aging, conflict, relational, education, etc.) and ways in which interpersonal interactions interconnect human social life at all levels of lived experience. Prerequisites: Enrollment in MA in Professional Communication degree or permission of instructor. (3+0)

COMM F625  Communication Theory

3 Credits
Offered Fall
Required course for the master's degree in Professional Communication. The course is designed to acquaint students with both the historical evolution of the discipline against the backdrop of the evolution of the social sciences and with the theoretical perspectives of knowledge-building that have marked that disciplinary evolution. Students will learn the contextual interconnectedness of philosophy and theory. Finally, Communication Theory will also make the essential connections between theoretical perspectives and their professional uses. Cross-listed with JRN F625. (3+0)

COMM F631  Teambuilding

3 Credits
Offered As Demand Warrants
Small group communication theory and methods linked to professional applications. Ways to create, maintain and reward productive work teams. Face-to-face and mediated group sessions will be discussed as well as the impact of professional work groups on organizational teambuilding. Students will work with teambuilding interventions that they will be able to apply in a variety of organizational settings. Prerequisites: COMM F600. Recommended: COMM F625. (3+0)

COMM F635  Organizational Culture and Communication

3 Credits
Offered Fall
Contemporary perspectives on communication in the organizational context. The interpretive paradigm will be examined in terms of the broad range of knowledge currently being generated by communication scholars and other professionals who are looking more closely at the ways communication produces the social contexts in which it occurs. Human organizations and their transparency to the communication of their members is the pragmatic substance of the course. Prerequisites: Enrollment in MA in Professional Communication degree or permission of instructor. (3+0)

COMM F642  Health Communication

3 Credits
Offered As Demand Warrants
Health Communication is intended to give students and interested professionals in related fields access to the most current research in this area. The course will address human communication at every level of interaction in the provision of health care: interpersonal (e.g., doctor/patient), small group (e.g., clinic cardiac team), intra-organizational (e.g., medical staff and business staff), inter-organizational (e.g., hospital and schools), public campaigns (e.g., Center for Disease Control and prevention initiatives on drunk driving), and associated communication factors such as culture and diversity. Includes involvement in research and grant-proposal writing. Prerequisites: Enrollment in MA in Professional Communication degree or permission of instructor. (3+0)

COMM F661  Mentored Teaching in Communication

1 Credit
Offered Spring
Mentored teaching provides consistent contact on course-related issues between teaching assistants and mentoring faculty. Graded Pass/Fail. Prerequisites: Enrollment in MA in Professional Communication or permission of instructor; award of teaching assistantship in communication. Note: Teaching assistants are required to be enrolled in a mentoring teaching section while teaching. May be repeated up to four times for credit. (1+0+2)

COMM F675  Training and Development Communication

3 Credits
Offered Spring
Training and Development Communication offers students practical, current understandings of planned training, development and transformation processes as they are applied in the organizational setting. The information and class projects will help prepare training and development specialists, consultants and others whose interest is in this growing communication field. Prerequisites: Enrollment in MA in Professional Communication degree or permission of instructor. (3+0)
COMMUNICATION (COMM) — COMMUNITY HEALTH (CHP)

COMM F680 Communication and Diversity in the Professional World
3 Credits Offered Spring
Case study methods applied to the ever-expanding problems of communication in a changing workplace. The diversity of gender, race, ethnicity, nationality, physical ability, sexual orientation and age are reshaping the professional world at every level and communication professionals are increasingly called upon to formulate ways of accommodating this change. The course will prepare students to address diversity and planned changes in the workplace. Prerequisites: Enrollment in MA in Professional Communication degree or permission of instructor. (3+0)

COMM F682 Seminar in Communication
3 Credits Offered As Demand Warrants
A variable content seminar intended to give students an opportunity to work closely with communication faculty in the study of topics, ideas or methodologies significant to the communication discipline (e.g., relational conflict, social construction, narrative research, etc.). Prerequisites: Enrollment in MA in Professional Communication degree or permission of instructor. (3+0)

COMM F699 Thesis
1–9 Credits
Every candidate for the communication concentration of the master's degree in professional communication will complete a thesis project. The requirement consists of an original piece of communication research directed by a member of the graduate faculty in the communication department. The completed and accepted thesis will be presented in an appropriate public forum. Graded Pass/Fail. (0+0)

COMMUNITY HEALTH

CHP F131 Community Health Aide — Session I
8 Credits Offered As Demand Warrants
Introduction to providing village primary health care services with remote supervision of a physician. Topics include CHP standard of care, use of the CHA/P Manual, history-taking and physical exam, lab tests, reporting to the physician, medical charting and medication administration. Supervised clinical experiences prepare the student to conduct patient evaluation of common village health problems of children and adults. Introduction to human anatomy and function, wellness and disease concepts, crisis intervention and emergency care. A 200-hour field component at the students’ village clinic follows the didactic program. Graded Pass/Fail. Prerequisites: Employed as CHA by a health corporation or permission of the instructor. (8+0)

CHP F132 Community Health Aide — Session II
8 Credits Offered As Demand Warrants
Reinforces problem-oriented patient encounter process. Includes patient education, introduction to prenatal and well child care, sexually transmitted diseases, HIV, substance abuse, mental illness and death and dying issues. Session I material and emergency care are reinforced and expanded upon. Includes 200-hour field component at the student’s village clinic. Graded Pass/Fail. Prerequisites: CHP F131. (8+0)

CHP F133 Community Health Aide — Session III
8 Credits Offered As Demand Warrants
Session II content reinforced and expanded upon. Additional topics include prenatal care, family planning, fetal alcohol syndrome, emergency delivery techniques, newborn and well child care including immunizations, nutrition, dental health, adult health surveillance, family violence and sexual abuse/rape and clinic management. A 200-hour field component at the students’ village clinic follows the didactic program. Graded Pass/Fail. Prerequisites: CHP F132. (8+0)

CHP F134 Community Health Aide — Session IV
8 Credits Offered As Demand Warrants
Common patient problems within the body systems are reviewed with a focus on assessment skills and management plans. Previous session content is reviewed. Follow-up care for patients with chronic illness, injury prevention, tuberculosis, cancer, environmental health, post partum care, adolescent care and older adult/elder care. A 200-hour field component at the students’ village clinic follows the didactic program. Graded Pass/Fail. Prerequisites: CHP F133. (8+0)

CHP F135 Community Health Aide Preceptorship
2 Credits Offered As Demand Warrants
Supervised primary care clinical experience. Minimum of 30 contact hours of direct patient care required. Students provide patient care in a variety of clinical settings including outpatient (acute and emergency care), prenatal, well child and chronic care clinics. Additional experiences are scheduled with the referral center (hospital) departments. Graded Pass/Fail. Prerequisites: CHP F134. (2+0)

CHP F203 Clinical Update for Community Health Practitioners
1–3 Credits Offered As Demand Warrants
Review, update and reinforcement of knowledge and skills taught in CHP F131, CHP F132, CHP F133 and CHP F134. Emphasis is on patient evaluation skills, use of the manual, patient treatment plan, medicines, prenatal care, well-child care, chronic patient care and emergency care. Clinical training is provided. Prerequisites: CHP F134. (1-3+0)

CHP F207 Maternal and Infant Health
1–3 Credits Offered As Demand Warrants
Review of the anatomy of the reproductive system, family planning, pregnancy, fetal development, prenatal care, prenatal education, emergency delivery, postpartum care for mother and baby, and well-child evaluations and immunizations. Prerequisites: CHP F134 or permission of instructor. (1-3+0)

CHP F208 Communicable Diseases
1–3 Credits Offered As Demand Warrants
Expands concepts in relation to diagnosis, management and prevention of sexually transmitted diseases. Skills taught include male and female genitalia exam, pelvic exam, pap smear, gonorrhea culture and chlamydia culture. Prevention and patient education are emphasized. Prerequisites: CHP F134 or permission of instructor. (1-3+0)

CHP F210 CHAM Use and Documentation
1 Credit
Review and explore many types of patient encounters encompassed by the scope of practice of the Alaska Community Health Aid/Practitioner (CHA/P). Focus is on professional standard of care issues and provision of competent and legal documentation of patient encounters. Emphasis on proper use of the Alaska Community Health Aid/Practitioner (CHAM) to conduct and document the encounter and its legal significance. Prerequisites: CHP F131; CHP F132. Special restrictions: Employed as a Community Health Aide by a Native Tribal Health Organization. (0+0+32)

CHP F211 Health Education
1–3 Credits Offered As Demand Warrants
Methods and philosophy of health education, use and sources of audiovisual materials, presentation planning and participation in school and community health programs are included. A variety of teaching methods including role playing for individual and group presentations permit CHPs to practice their health education knowledge and skills. (1-3+0)

CHP F212 Diabetes: Primary Prevention and Village Medical Care
1–3 Credits Offered As Demand Warrants
Pathophysiology, primary prevention and follow-up treatment of the disease diabetes. Topics include the problem of Type II diabetes in rural Alaska, CHP role in the village health care system, Type 1 and Type II diabetes, primary prevention of Type II diabetes, village medical care and referral, patient education, emergency care and diabetes medications. The clinical
training portion of the course is available for Community Health Aides/Practitioners only. (1-3+0)

CHP F214 Cancer: Risks, Diagnosis and Treatment
3 Credits Offered Spring, As Demand Warrants
Causes and facts about cancer in the Alaska Native population. Includes cancer risk factors, healthy lifestyle behaviors and the importance of early screening. Presents cancer diagnosis and treatment. Explores pain management, loss and grief. Includes self-care, stress and burnout issues for family and caregivers. Recommended: CHP F134. (3+0)

CHP F215 Death and Dying
3 Credits Offered As Demand Warrants
Focusing on contemporary primary care issues relating to death and dying. Improving individual coping skills in loss and grief situations. Topics include theories of grief and loss, care of the terminally ill patient, suicide, euthanasia, traumatic death and neonatal death. Cultural perspectives on dying, body preparation, burial rites, advanced directives, death certificates and legal issues reviewed. (3+0)

CHP F220 Women's Health: Breast and Cervical Cancer Screening
2 Credits Offered As Demand Warrants
Review of anatomy, physiology and pathophysiology of the female breasts and genitals, with reinforcement of identification of risk factors as they relate to the development of breast and cervical cancer. Skills taught include female breast and genital history taking, examination to include Pap, chlamydia and gonorrhea specimen collection, development of appropriate assessments and plans. Areas emphasized: prevention and/or early detection. Prerequisites: CHP F134 or permission of instructor. (2+0)

CITS F201 Microcomputer Operating Systems Support
1–3 Credits Offered As Demand Warrants
Comprehensive exploration of a current microcomputer operating system: use, configuring, installing and administering. Topics include end-user and technical support. Special fees apply. Recommended: CIOS F150 or equivalent skills. (1-3+0)

CITS F202 Microcomputer Hardware Support
1–3 Credits Offered As Demand Warrants
Fundamental hardware and software (associated with hardware) configuration and troubleshooting. Includes installing, removing and configuring computer hardware components; installing and configuring software applications and operating systems to support hardware; diagnosing hardware and software problems; and developing troubleshooting and configuration procedures. Special fees apply. Recommended: CITS F201 or equivalent skills. (1-3+0)

CITS F203 Information Technology Support Fundamentals
4 Credits Offered As Demand Warrants
Overview of skills and knowledge required by professional computer support technicians to support and troubleshoot computer operating systems and computer hardware, including the purpose and function of the internal components of a computer, how to assemble a computer system, install an operating system and the basic skills and knowledge required to connect to and share resources in a network environment. Course covers objectives defined for CompTIA A+ certification. Special fees apply. Recommended: CIOS F150 or equivalent skills. (4+0)

CITS F204 Introduction to Network Support and Administration
3 Credits Offered As Demand Warrants
Features and functions of networking components and the knowledge and skills needed to install, configure and troubleshoot basic networking hardware, protocols and services. Develop technical ability in the areas of media and topologies, protocols and standards, network implementation and basic network administration and support. Course covers objectives defined for CompTIA Network+ certification. Special fees apply. Recommended: CITS F203 (may be taken concurrently) or equivalent skills. (3+0)

CITS F205 Introduction to Microcomputer Programming
1–3 Credits Offered As Demand Warrants
Microcomputer programming focused on programming concepts for applications, operating systems and web technologies. Supplementing and integrating computer applications with built-in programming tools. Special fees apply. Prerequisites: Math placement at the 100-level or instructor approval. (1-3+0)

CITS F212 Server Operating Systems
3 Credits Offered As Demand Warrants
Fundamentals in installing, configuring and maintaining server operating systems. Learn how to configure and administer network accounts, resources, and common services deployed on server operating systems. Course covers foundation server operating system knowledge required for Microsoft Certified Technology Specialist (MCTS) certification exams related to server technologies. Special fees apply. Prerequisite: CITS F204 (may be taken concurrently) or equivalent skills. (3+0)

CITS F219 Microcomputer Operating Systems: Topics
1–4 Credits Offered As Demand Warrants
In-depth and comprehensive technical class covering operating system skills and concepts. Course may be repeated for credit. Special fees apply. Special fees apply. Prerequisites: CITS F201 or equivalent skills. (1-4+0)

CITS F220 Implementing Internet Tools and Technologies
3 Credits Offered As Demand Warrants
Exploration of advanced Internet topics. Building a presence on the Internet — evaluate web hosting services, domain names and registration services. How to implement and understand web communication tools and develop and understand the impact of participating in social networks and the changing nature of these networks. Special fees apply. Recommended: CIOS F150 or equivalent skills. (3+0)

CITS F221 Graphics and Multimedia for the Web
3 Credits Offered As Demand Warrants
Creating graphics and multimedia content for the Web. Graphic topics include formats, size and resolution, optimization and design fundamentals. Multimedia topics include animation, interactivity and combining sound, speech, graphics, photographs and video. Special fees apply. Recommended: CIOS F150; or equivalent skills. (3+0)

CITS F222 Website Design
1–3 Credits Offered As Demand Warrants
Comprehensive survey of professional website design and authoring tools used to create Internet websites. Topics include: website design and planning; HTML, XHTML and CSS. Special fees apply. Recommended: CIOS F150 or equivalent skills. (1-3+0)

CITS F224 Web Scripting
3 Credits Offered As Demand Warrants
Introduction to client-side Web page scripting. Covers basic programming concepts, including data representation, functions, control structures and arrays. Topics include client-side scripting with JavaScript, object-oriented JavaScript, design issues, error handling, security, the Document Object Model and dynamic HTML and AJAX. Special fees apply. Prerequisite: CITS F205 or CS F103; CITS F222; or equivalent skills. (3+0)
Computer and Information Technology Systems (CITS)

CITS F225 Web Databases and Programming
3 Credits Offered As Demand Warrants
Programming and database design as it relates to creating dynamic web sites and applications. Develop web applications to automate websites, create and access web databases, provide tools for users to modify parts of their own website, create and access files on the fly and reduce repetitive maintenance. Course topics include CSS, SSI, DHTML, SQL, PHP and other web technologies. Special fees apply. Prerequisites: CITS F205 or CS F103; CITS F222; or equivalent skills. (3+0)

CITS F228 Advanced Website Design and Development
3 Credits Offered As Demand Warrants
Plan and implement professional and comprehensive websites that utilize and integrate multiple website design and development technologies such as XHTML, CSS, XML, Ajax, Web APIs, client-side and server-side programming, graphics and multimedia, and web communication tools. Special fees apply. Prerequisites: CITS F221; F222; F224; F225; or equivalent skills. (3+0)

CITS F240 System and Network Services Administration
3 Credits Offered As Demand Warrants
Implement and administer the core network services operating within a network environment. Topics include: DHCP, DNS, remote access, file and print, security and network management services. Develop a conceptual understanding of each network service and learn how to plan, implement and administer each service. Course covers system and network services objectives required for Microsoft Certified Technology Specialist (MCTS) certification exams related to server technologies. Special fees apply. Prerequisites: CITS F212 (may be taken concurrently) or equivalent skills. (3+0)

CITS F241 Networking and LAN Infrastructure Basics
4 Credits Offered As Demand Warrants
Design and implementation of networks in small- to medium-sized environments. Focuses on network terminology and protocols, local-area networks (LANs), wide-area networks (WANs), open systems interconnection model, cabling, cabling tools, routers, router programming, Ethernet, Internet protocol addressing and network standards. Special fees apply. Recommended: CITS F201; CITS F202; or equivalent skills. (4+0)

CITS F242 Routers and Routing Concepts
4 Credits Offered As Demand Warrants
The skills and knowledge necessary to configure routers, manage router software, configure routing protocols. Troubleshooting internets and implementing IP-based networks. This course is the second of four courses that cover objectives required for the Cisco Certified Networking Associate (CCNA) certification. Special fees apply. Prerequisites: CITS F241 or permission of instructor. (4+0)

CITS F243 Intermediate Networking and LAN Infrastructure
4 Credits Offered As Demand Warrants
Provide an understanding of the intermediate LAN technologies and protocols used to build hierarchical networks. Learn how to configure and integrate LAN devices and technologies into hierarchical internetworks. Topics include: switch configuration, virtual LANs, spanning tree protocol, and VLAN trunking protocol, inter-VLAN routing, and wireless LANs. This course is the third of four courses that cover objectives required for the Cisco Certified Networking Associate (CCNA) certification. Special fees apply. Prerequisites: CITS F241; or permission of instructor. (4+0)

CITS F244 Advanced Network Infrastructure Services
4 Credits Offered As Demand Warrants
Provides the skills and knowledge to select and implement advance services used within a network infrastructure. Learn to implement and configure common wide area network (WAN) data link protocols, how to create and implement security policies, access control lists and advanced addressing services. Learn to detect, troubleshoot and correct common network implementation issues. Topics include: WAN technology and terminology, PPP, frame relay, network security, DHCP, NAT, IPv6 and network troubleshooting. This course is the fourth of four courses that cover objectives required for the Cisco Certified Networking Associate (CCNA) certification. Special fees apply. Prerequisites: CITS F242; CITS F243; or permission of instructor. (4+0)

CITS F249 Networking and Communications: Topics
1–4 Credits Offered As Demand Warrants
In-depth technical and comprehensive coverage of networking and communications skills and concepts. Note: May be repeated for credit. Special fees apply. Recommended: CITS F204 or equivalent skills. (1–4+0)

CITS F261 Computer and Network Security
3 Credits Offered As Demand Warrants
The fundamental concepts of computer and network security. Course topics include: understanding threats to a computing infrastructure, understanding encryption technologies, securing network communications and applications, security policies and responding to incidents. Course covers objectives defined for CompTIA Security+ certification. Special fees apply. Prerequisites: CITS F204 or equivalent skills. (3+0)

CITS F262 Cybersecurity Defense and Countermeasures
3 Credits Offered As Demand Warrants
This course focuses on network and information systems security from a defensive point of view. Students will learn how to analyze internal and external security threats, develop security policies, and implement security measures to protect information within an enterprise. Topics include risk assessment, security policies and procedures, incident response, graphic and communicatıve, network and host-based security. Special fees apply. Prerequisites: CITS F261 or equivalent skills. (3+0)

CITS F263 Network Security Penetration Testing
3 Credits Offered As Demand Warrants
This course focuses on network and information systems security from an offensive point of view. Students will learn technical testing and examination techniques used to identify, validate and assess technical vulnerabilities within an enterprise. Topics include penetration testing methodology, footprinting and reconnaissance, scanning and enumeration, vulnerability validation, data collection and reporting. Special fees apply. Prerequisites: CITS F261 or equivalent skills. (3+0)

CITS F265 Directory Services Administration
3 Credits Offered As Demand Warrants
The purpose and components that make up directory services and the role these services play in storing, organizing and managing information in a network environment. How to create and configure directory service objects to manage access to network resources, to implement and manage group policy objects, and to backup, restore, monitor and troubleshoot directory service related issues. Course covers directory services administration objectives required for Microsoft Certified Technology Specialist (MCTS) certification exams related to server technologies. Special fees apply. Prerequisite: CITS F212 (may be taken concurrently) or equivalent skills. (3+0)

CITS F281 Professional Practices in IT
1–3 Credits Offered As Demand Warrants
Prepares students for work as an IT professional. Topics include: providing computer technical support, user support management, soft skills in IT, resume writing and career exploration, diagnosing problems, researching and documenting solutions, meeting user needs, developing training materials and giving workshops and lessons. Special fees apply. Prerequisites: 24 credits in CITS courses or permission of instructor. (1–3+0)

CITS F282 IT Troubleshooting Skills
1–3 Credits Offered As Demand Warrants
Practical IT troubleshooting skills, including hardware, software, networks and operating systems. The course will include practical and useful troubleshooting scenarios. Special fees apply. Prerequisites: CITS F203; CITS F204 or equivalent skills. (1–3+0)
CTIS F284  Independent Project
1–3 Credits  Offered As Demand Warrants
Student created project or internship that includes learning new skills, applying the skills to significant problems, and demonstrating the results to other computer users. Includes application of learned skills in a professional manner. Special fees apply. Prerequisites: 12 credits in CITS courses or permission of instructor. (1-3+0)

CTIS F285  Cooperative Work Experience
3 Credits  Offered As Demand Warrants
On-the-job training related to occupational objectives. Weekly seminar with coordinator required. Special fees apply. Prerequisites: 12 credits in CITS courses and permission of instructor. (3+0)

CTIS F288  Professional Certification Review
1–3 Credits  Offered As Demand Warrants
Prepares students for national or industry specific certification examination. Special fees apply. (1-3+0)

CTIS F289  Information Technology: Topics
1–3 Credits  Offered As Demand Warrants
Comprehensive coverage of a specific information technology topic. Special fees apply. Recommended: CITS F203 or equivalent skills. (1-3+0)

---

**COMPUTER INFORMATION AND OFFICE SYSTEMS**

CIOS F100  Introduction to Personal Computers
1 Credit  Offered As Demand Warrants
Introduction to basic computer skills including using the mouse and menus, opening and exiting applications, creating basic word processing and spreadsheet files, basic file management, web browsing, email and virus protection. Graded Pass/Fail. (1+0)

CIOS F103  Computer Survey
1–3 Credits  Offered As Demand Warrants
An introduction to the world of computers emphasizing microcomputers. Provides computer terminology and how to use computers as a tool to make work easier and to extend the reach of the mind. (1-3+0)

CIOS F128  Microcomputer Operating Systems
3 Credits  Offered As Demand Warrants
Introduces students to the use and configuration of a current microcomputer operating system. Topics include: basic use, configuration, troubleshooting and maintenance, connecting to the Internet and security basics and safe computing practices. Prerequisites: Recommended: CIOS F150 or equivalent skills. (3+0)

CIOS F130  Microcomputer Word Processing
1–3 Credits  Offered As Demand Warrants
Comprehensive exploration of topics related to using microcomputer word processors. Includes creating, formatting and revising documents; using proofreading and editing tools; implementing styles; using templates; and customizing the application. Recommended: CIOS F150 or equivalent skills. (1-3+0)

CIOS F133  Microcomputer Presentation Software
1–3 Credits  Offered As Demand Warrants
Designing effective presentations. Includes organizing and designing an effective presentation of information using current microcomputer software. Recommended: CIOS F150 or equivalent skills. (1-3+0)

CIOS F135  Microcomputer Spreadsheets
1–3 Credits  Offered As Demand Warrants
Comprehensive exploration of topics related to using microcomputer spreadsheets. Includes creating, formatting and revising spreadsheets; creating formulas, graphics and charts; and using spreadsheets to organize, analyze and query information. Recommended: CIOS F150 or equivalent skills. (1-3+0)

CIOS F146  Using Internet Tools and Technologies
1–3 Credits  Offered As Demand Warrants
Presentation of the Internet. Includes using and configuring current World Wide Web and email, and other communication tools; developing searching strategies; current and future trends; and basic web authoring. Develop a basic understanding of technologies and protocols used on the Internet. Recommended: CIOS F150 or equivalent skills. (1-3+0)

CIOS F150  Computer Business Applications
1–3 Credits  Offered As Demand Warrants
Designed to develop computer literacy in the use and understanding of computer systems, office productivity applications and the Internet. Topics include operating system fundamentals, file management, word processing and spreadsheet fundamentals and safe, secure and effective use of Internet technologies. (1-3+0)

CIOS F189  Microcomputer Applications: Topics
1–3 Credits  Offered As Demand Warrants
Extensive coverage of a specific microcomputer application. May be repeated for credit. (1-3+0)

CIOS F216  Information Technology Certification II
1–4 Credits  Offered As Demand Warrants
In-depth technical and comprehensive coverage of skills required for the intermediate stage of a specific information technology certification. Course may be repeated for different certifications. Special fees apply. Prerequisites: Instructor approval. (1-4+0)

CIOS F217  Information Technology Certification III
1–4 Credits  Offered As Demand Warrants
In-depth technical and comprehensive coverage of skills required for the advanced stage of a specific information technology certification. Course may be repeated for different certifications. Special fees apply. Prerequisites: Instructor approval. (1-4+0)

CIOS F230  Advanced Word Processing
1–3 Credits  Offered As Demand Warrants
Advanced concepts of word processing using various software. Prerequisites: CIOS F130. (1-3+0)

CIOS F231  Introduction to Desktop Publishing
1–2 Credits  Offered As Demand Warrants
Entry-level desktop publishing course introducing the chief features of a page layout program. Step-by-step instructions to create at least three simple publications. Prerequisites: Previous computer experience. (1-2+0)

CIOS F233  Desktop Publishing
1–3 Credits  Offered As Demand Warrants
Publication design and layout using desktop publishing software. Includes integrating text and graphics, page layout design, scanning and basic image editing. Recommended: CIOS F150 or equivalent skills. (1-3+0)

CIOS F240  Microcomputer Databases
1–3 Credits  Offered As Demand Warrants
Comprehensive introduction to microcomputer databases. Includes basic database concepts; how to maintain and update databases; how to build and use queries and forms; and how to build reports. Introduction to database design. Recommended: CIOS F135 or equivalent skills. (1-3+0)

CIOS F255  Microcomputer Graphics
1–3 Credits  Offered As Demand Warrants
Comprehensive survey of microcomputer graphics using a graphics application. Includes use of professional-level graphics programs to create sophisticated graphics for a variety of uses. Recommended: CIOS F150 or equivalent skills. (1-3+0)

CIOS F257  Digital Video
1–3 Credits  Offered As Demand Warrants
Comprehensive survey of creating and editing digital video using microcomputer tools. Includes the use of professional-level digital video applications to create short videos for a variety of uses. Recommended: CIOS F150 or equivalent skills. (1-3+0)
COMPUTER INFORMATION AND OFFICE SYSTEMS (CIOS) — COMPUTER SCIENCE (CS)

COURSES

CIOS F258  Digital Photography (m)
1–3 Credits  Offered As Demand Warrants
Comprehensive survey of tools and methods to create and edit digital images using microcomputer tools. Includes the use of professional-level digital photography applications. Recommended: CIOS F150 or equivalent skills. (1-3+0)

CIOS F503  Applying Telecommunications (m)
1 Credit
Design and implementation of an approved project using telecommunications in the classroom or work place, or an in-depth research paper. Ongoing Independent Learning. Special fees apply. Prerequisites: CIOS F502. (1+0)

COMPUTER SCIENCE

A per-semester fee for computing facilities will be assessed for one or more CS courses. This fee is in addition to any materials fees.

CS F101  Computers and Society (m)
3 Credits
Computer literacy for everyone. Overview of computing machines and automatic data processing. Interaction between social institutions and automated decision-making. Introduction to business applications software and electronic mail. Some programming for understanding, not for skill development. Prerequisites: Two years of high school mathematics, including at least one year of algebra. (3+0)

CS F102  Introduction to Computer Science (m)
3 Credits
Introduction to computer science including a discussion of binary numbers, data representation, hardware, software, programming layers, operating systems, applications and networks. This web-based course is offered through eLearning and Distance Education. Prerequisites: Two years of high school mathematics including at least one year of algebra. (3+0)

CS F103  Introduction to Computer Programming (m)
3 Credits
Programming for non-majors and for those computer science students without the background for CS F201. Concepts of object-oriented programming and algorithm design within the syntax of the JAVA programming language. Prerequisites: Math placement at the 100-level. (3+0)

CS F201  Computer Science I (m)
3 Credits
The discipline of computer science including problem solving, algorithm development, structured programming, top-down design, good programming style, object-oriented programming and elementary data structures. Concepts implemented with extensive programming experience in a structured language and with a group programming project. Prerequisites: One year high school programming or CS F103; mathematics placement at the F200-level. (3+0)

CS F202  Computer Science II (m)
3 Credits
The discipline of computer science including problem solving, algorithm development, structured programming, top-down design, good programming style, object-oriented programming and elementary data structures. Concepts implemented with extensive programming experience in a structured language and with a group programming project. Prerequisites: CS F201. (3+0)

CS F205  C Programming (m)
3 Credits  Offered As Demand Warrants
A high-level programming course using C for students with some experience in other programming languages such as Java, Perl, Basic, Pascal or Fortran. Prerequisites: One year high school programming, CS F103 or CS F201 or ES F201. (3+0)

CS F301  Assembly Language Programming (m)
3 Credits  Offered Fall
Organization of computer registers, I/O and control. Digital representation of data. Symbolic coding, instructions, addressing modes, program segmentation, linkage, macros and subroutines. Prerequisites: CS F201. (3+0)

CS F307  Discrete Mathematics (m)
3 Credits
Logic, counting, sets and functions, recurrence relations graphs and trees. Additional topics chosen from probability theory. Prerequisites: MATH F201X or permission of instructor. Cross-listed with MATH F307. (3+0)

CS F311  Data Structures and Algorithms (m)
3 Credits
Data structures and the algorithms for their manipulation. Object-oriented programming, arrays, tables, stacks, queues, trees, linked lists, sorting, searching and hashing. Prerequisites: CS F202. (3+0)

CS F321  Operating Systems (m)
3 Credits  Offered Spring
Functions of files and operating systems. Review of required architectural features. The PROCESS concept. Storage management, access methods and control, interrupt processing, scheduling algorithms, file organization and management, and resource accounting. Prerequisites: CS F301. (3+0)

CS F331  Programming Languages (m)
3 Credits  Offered Spring
Syntax and semantics of widely differing programming languages. Syntax specification, block structure, binding, data structures, operators and control structures. Comparison of several languages such as ALGOL, LISP, SNOBOL and APL. Prerequisites: CS F311. (3+0)

CS F361  Systems Security and Administration (m)
3 Credits  Offered Alternate Fall Odd-numbered Years
Advanced systems programming including privileged instructions and system services, authentication technologies, host-based and network-based security issues. Applications to asynchronous I/O, process control and communication, device drivers and file management. Prerequisites: CS F301. (3+0)

CS F371  Computer Ethics and Technical Communication
3 Credits  Offered Fall
This course explores the social, legal and ethical issues aggravated, transformed or created by computer technology. Additional focus is on technical communication skills needed in the computer industry. Prerequisites: ENGL F211X or ENGL F213X; COMM F131X or COMM F141X; CS F202. (3+0)

CS F372  Software Construction
3 Credits  Offered Spring
Methods for programming and construction of complete computer applications, including refactoring, performance measurement, process documentation, unit testing, version control, integrated development environments, debugging and debuggers, interpreting requirements, and design patterns. Prerequisites: CS F311. (3+0)

CS F381  Computer Graphics (m)
3 Credits  Offered Fall
Creation of computer-generated images on programmable 3-D graphics hardware. Color, lighting, textures, hidden surfaces, 3-D geometric transformations, curve and surface representations, 2-D and 3-D user interfaces, and the visual modeling of physical phenomena. Prerequisites: CS F202; MATH F202X or MATH F314. (3+0)

CS F405  Introduction to Artificial Intelligence (m)
3 Credits  Offered Spring Even-numbered Years
Examine diverse branches of AI placing AI in larger context of computer science and software engineering. Knowledge representation formalism and search technology. Programming methodologies; procedural systems such as expert systems and blackboard systems and non-procedural systems such as neural networks. Software engineering aspects of problem selection,
knowledge acquisition, verification and validation. Individual projects. 
Prerequisites: CS F311 or permission of instructor. (3+0)

CS F411 Analysis of Algorithms (m) 
3 Credits Offered Fall 
Analysis of classic algorithms, their implementation and efficiency. Topics from combinatorics (sets, graphs), algebra (integer arithmetic, primes, polynomial arithmetic, GCD, Diophantine equations, encryption), systems (parsing searching, sorting) and theory (recursion, Turing machines). The complexity classes P, NP and NP complete. Prerequisites: MATH F307, CS F311. (3+0)

CS F421 W Distributed Operating Systems (m) 
3 Credits Offered Fall 
Detailed level study of distributed operating system algorithms, functions and associated implementation. Distributed operating system tuning methods and security. Role of distributed operating systems in net-centric computing. Programming, documentation and evaluation of distributed operating system segments as projects. Prerequisites: CS F321; ENGL F211X or ENGL F213X; or permission of instructor. (3+0)

CS F425 Database Systems (m) 
3 Credits Offered Spring Odd-numbered Years 
Data independence, modeling, relationships and organization. Hierarchical, network and relational data models; canonical schema. Data description languages, SQL, query facilities, functional dependencies, normalization, data integrity and reliability. Review of current database software packages. Prerequisites: CS F311; CS F321. (3+0)

CS F431 W Programming Language Implementation (m) 
3 Credits Offered As Demand Warrants 
Design and implementation of major phases of high level language translators including scanning, parsing, translation, code generation and optimization. Students develop a compiler for a language in a group project which emphasizes good software engineering practices in structured design, testing and documentation. Prerequisites: CS F331; ENGL F111X; ENGL F211X or ENGL F213X; or permission of instructor. (3+0)

CS F441 System Architecture (m) 
3 Credits Offered Fall 
Computer design fundamentals, performance and cost, pipelining, instruction-level parallelism, memory hierarchy design, storage systems, and vector processing. Prerequisites: CS F321; EE F341. (3+0)

CS F442 Computer Communication and Networks (m) 
3 Credits Offered Fall Even-numbered Years 
Study of computer networks using the ISO/OSI layered model as a framework. Design issues and trade-offs, protocols and selected standards. Emphasis on ISO/OSI Layers 1-4 (Physical, Data Link, Network and Transport Layers), plus medium access sublayers (LAN’s, etc.). Prerequisites: CS F321. (3+0)

CS F451 Automata and Formal Languages (m) 
3 Credits Offered Spring Odd-numbered Years 
Finite automata, regular languages, phrase structured grammars, context free language, push down automata, deterministic context free languages, recursive and recursively enumerable languages, Turing machines, decision problems, and undecidability. Prerequisites: MATH F307; CS F201. (3+0)

CS F460 Introduction to Digital Forensics 
3 Credits Offered Fall Odd-numbered Years 
Takes a hands-on approach to the forensics examination of computer technology. Focuses on the forensic process, methods, and tools utilized to collect and preserve and examine digital evidence. Course topics include: collection, preservation and examination of evidence from computers including file systems, email and malicious code. Prerequisites: CS F321; or permission of instructor. (3+0)

CS F462 Intrusion Detection Systems 
3 Credits Offered Fall Even-numbered Years 
Focus on IDS theory and practice and its importance; the origin and resolution of common security threats and vulnerabilities; host and network approaches to IDS implementation; and the legal, ethical, and privacy issues associated with IDS use and policies. Prerequisites: CS F361; or permission of instructor. (3+0)

CS F463 Cryptography and Data Security 
3 Credits Offered Spring Odd-numbered Years 
Specialized study of cryptography and its application in securing data systems, with an emphasis on applied cryptography. Topics include history of cryptography, encryption, digital signatures, authentication, electronic commerce, key distribution and management, private and public key cryptography, and protocols. Prerequisites: MATH F307; CS F311; or permission of instructor. (3+0)

CS F471 W Senior Capstone I (m) 
3 Credits Offered Fall 
Introduction to basic software engineering principles, techniques, methods and standards as applied to the engineering of complex software systems. Topics from software system development process models, multiple view system modeling and specification using UML, classification of software systems, project management and legal issues. Prerequisites: Senior standing; CS F311; ENGL F314 or CS F371. (3+0)

CS F472 W,O Senior Capstone II 
3 Credits Offered Spring 
Group projects in a real computer industry environment and produce appropriate documentation and reports. Nature, ethics, and legal considerations of the computer science profession are discussed with an emphasis on ethics. Additional topics include project management, design methodologies, technical presentation, human-machine interface and programming team interactions. Prerequisites: Senior standing; CS F471. (3+0)

CS F480 Topics in Computer Science 
3 Credits Offered As Demand Warrants 
Topics include, but are not limited to: computational linear algebra, cryptography, parallel algorithm development and analysis. Note: Course may be repeated when topics change. (0+3)

CS F481 Graphics Rendering (m) 
3 Credits Offered Spring Even-numbered Years 
High-quality rendering techniques used in computer graphics: raytracing, shadows, antialiasing, volume rendering, radiometry and radiosity. Also topics such as particle systems, shading, image processing, computer aided design, video effects, animation and virtual environments. Prerequisites: CS F381. (3+0)

CS F482 Simulations in Computer Graphics 
3 Credits Offered Spring Odd-numbered Years 
Software to simulate physical phenomena for use in interactive visualization, such as particle systems, Naiver-Stokes fluid dynamics, and finite element solid mechanics. Includes Lagrangian and Eulerian meshes, stability, and discretization order. Our focus is high performance qualitatively correct simulations, rather than high-precision solutions. Prerequisites: CS F381 and PHYS F212X. (3+0)

CS F490 Student Internship (m) 
1–3 Credits 
Students work on computer science project under the joint direction of a faculty member and participating industry or governmental agency. Graded Pass/Fail. Prerequisites: Junior standing and acceptance in an approved internship program. (0+0)

CS F602 Software Project Management 
3 Credits Offered Spring 
Work in an IT project environment to produce appropriate documentation and reports. Nature, ethics and legal considerations of managing IT projects are discussed. Includes project management, design methodologies, scope
management, risk management, human-machine interface and IT team interactions. Prerequisites: Graduate standing or permission of instructor. (3+0)

CS F605 Artificial Intelligence
3 Credits Offered Spring Even-numbered Years
Study and writing of AI programs: expert systems, expert system shells, blackboard systems, neural networks. Representation of knowledge, pattern analysis, inference networks, neural network training. Study of software engineering aspects of AI software. Prerequisites: Graduate standing or permission of CS graduate advisor. (3+0)

CS F611 Complexity of Algorithms
3 Credits Offered Fall
Theoretical analysis of various algorithms: topics include sorting, searching, selection, polynomial evaluation, NP completeness, decidability. Prerequisites: CS F411. (3+0)

CS F621 Advanced Systems Programming
3 Credits Offered As Demand Warrants
Multiprogramming and multiprocessing systems. File and program security. Scheduling optimization and system tuning, I/O processing, archiving and system recovery, and initialization. Study of current systems. Prerequisites: CS F311 and CS F321. (3+0)

CS F625 Database Systems Design
3 Credits Offered Fall
The design and analysis of database systems including data independence, relationships, and organization. Focus on data models, file organization and security, index organization, data integrity and reliability. Review of current database software packages. Design and implementation of a database application project. Prerequisites: CS F311. (3+0)

CS F631 Programming Language Implementation
3 Credits Offered Fall
Formal treatment of programming language translation and compiler design. Parsing context-free languages, translation specifications, machine independent code, NBF scanners, symbol tables, parsers and recursive descent. Programming of compiler or interpreter segments as projects. Prerequisites: CS F331. (3+0)

CS F641 Advanced Systems Architecture
3 Credits Offered Spring
A study of advanced single processor systems. Detailed study of multiprocessor architectures, such as vector architectures, massively parallel processors and shared-memory multi-processors. Prerequisites: CS F441 or permission of Computer Science graduate advisor. (3+0)

CS F642 Advanced Computer Networks
3 Credits Offered Fall
A study of networks of interacting computers. The problems, rationales and possible solutions for both distributed processing and distributed databases will be examined. Major national and international protocols will be presented. Prerequisites: Graduate standing or permission of Computer Science graduate advisor. (3+0)

CS F651 The Theory of Computation
3 Credits Offered Spring Odd-numbered Years
Languages and formal models of algorithms: Turing machines, phrase structured grammars and recursive functions. Undecidability, the halting problem, Rice's Theorem. Prerequisites: CS F451. (3+0)

CS F661 Optimization
3 Credits Offered Fall Even-numbered Years
Linear and nonlinear programming, simplex method, duality and dual simplex method, post-optimal analysis, constrained and unconstrained nonlinear programming, Kuhn-Tucker condition. Applications to management, physical and life sciences. Computational work with the computer. Prerequisites: Knowledge of calculus, linear algebra, and computer programming. Cross-listed with MATH F661. (3+0)

CS F670 Computer Science for Software Engineers
3 Credits
An overview and survey of the theoretical underpinnings of computer science. Topics are taken from the areas of algorithms and data structures; computer architecture; computer networks, communications and operating systems; computability and formal languages; languages and compilation. Prerequisites: Graduate standing. Cross-listed with SWE F670. (3+0)

CS F671 Advanced Software Engineering
3 Credits Offered Spring
Advanced software development as an engineering discipline. Includes investigation of current tools, standards, foundation and trends in software engineering from component-ware, software system composition, e-systems, software architecture and CASE tools. Prerequisites: CS F471. Cross-listed with SWE F671. (3+0)

CS F672 Software Process Improvement
3 Credits Offered Spring Odd-numbered Years
Commonly applied methods for improving the software development process. Emphasis on the Software Engineering Institute's Capability Maturity Model, and specifically on the key process areas of Level 2 and Level 3 of that model. These include software configuration management, software quality assurance and software standards. Prerequisites: CS F671 or permission of instructor. Cross-listed with SWE F672. (3+0)

CS F673 Software Requirements Engineering
3 Credits Offered As Demand Warrants
Focus on the requirements analysis phase of the software development life cycle. Study ways to obtain, analyze and specify complete and correct sets of requirements. Critique of selected requirements analysis models. Study of current large scale software developments that have failed or are failing. Development of software requirements specifications for large and real software systems via team efforts. Prerequisites: CS F671 or permission of instructor. Cross-listed with SWE F673. (3+0)

CS F674 Software Architecture
3 Credits Offered Spring
Software architectural styles are introduced and defined as structural descriptions of software systems. Methods for constructing and binding software systems are introduced and specified as operational views. The architectural approach, as a classical engineering method for describing structure and behavior of technical artifacts, will be applied for the composition of software systems. Prerequisites: CS F671. Cross-listed with SWE F674. (3+0)

CS F680 Topics in Computer Science
1–4 Credits Offered As Demand Warrants
Example topics include, but are not limited to, software requirements engineering, cryptography, parallel algorithm development and analysis. May be repeated for credit with change of topic. Prerequisites: Varies with each topic. Recommended: Varies with each topic. (1-4+0)

CS F681 Topics in Computer Graphics
3 Credits Offered Spring
Hardware, software and techniques used in computer graphics taken from topics such as refresh, storage, raster scan technology, volume rendering, particle systems, shading, image processing, computer aided design, video effects, animation and virtual environments. Prerequisites: CS F481 and MATH F314. (3+0)

CS F690 Graduate Seminar and Project
1–6 Credits Offered Fall
First semester of two-semester seminar in which students will, individually or in teams, work on and present the results of major programming or literature survey projects in computer science or software engineering. Written and oral reports will be required. Graded Pass/Fail. Prerequisites: 12 credits in graduate computer science or software engineering courses; or permission of Computer Science or Software Engineering graduate advisor. Cross-listed with SWE F690. (1-6+0)

#### CONSTRUCTION TRADES TECHNOLOGY

<table>
<thead>
<tr>
<th>COURSES</th>
<th>Credits</th>
<th>Offered As Demand Warrants</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>CTT F100 Construction Technology Core</td>
<td>3</td>
<td>Offered As Demand Warrants</td>
<td>Basic construction techniques using OSHA approved standards by stressing how to follow safe work practices and procedures, how to safely use hand and power tools, how to extract information from construction blueprints and drawings, good housekeeping habits, and material handling on the construction site. This course is divided into six modules. Each module must be successfully completed. May be repeated twice for credit. (Alternative: CTT F101; CTT F102; CTT F103; CTT F104.) (2.5+1.5)</td>
</tr>
<tr>
<td>CTT F101 Basic Construction Safety</td>
<td>1</td>
<td>Offered As Demand Warrants</td>
<td>Introduction to basic construction safety using OSHA approved standards. Focus is on safe work practices and procedures, the proper inspection of safety equipment before use and the proper use of safety equipment. (Alternative to CTT F100 when taken with CTT F102; CTT F103; CTT F104.) (1+0.5)</td>
</tr>
<tr>
<td>CTT F102 Introduction to Hand and Power Tools</td>
<td>1</td>
<td>Offered As Demand Warrants</td>
<td>Introduction to basic hand and power tools used in construction and maintenance and the importance of their care and use. Valuable safety information for each type of tool is discussed. Understanding proper usage helps trainees to prevent accidents. Some specialty tools used by different crafts are also introduced. (Alternative to CTT F100 when taken with CTT F101; CTT F103; CTT F104.) Prerequisites: CTT F101 or permission of instructor. (0.5+1)</td>
</tr>
<tr>
<td>CTT F103 Introduction to Blueprint Reading</td>
<td>1</td>
<td>Offered As Demand Warrants</td>
<td>Introduction to basic blueprint terms, components and symbols. Different types of construction drawings commonly used on job sites and why each type of drawing is important will be presented. Standardized information contained on blueprints such as identification, revision status, symbols, project titles, dimension and scale will be covered. (Alternative to CTT F100 when taken with CTT F101; CTT F102; CTT F104.) Prerequisites: CTT F102 or permission of instructor. (1+1)</td>
</tr>

#### CONSTRUCTION MANAGEMENT

<table>
<thead>
<tr>
<th>COURSES</th>
<th>Credits</th>
<th>Offered As Demand Warrants</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>CM F102 Methods of Building Construction</td>
<td>3</td>
<td>Offered As Demand Warrants</td>
<td>Introduces basic knowledge of building materials, technical specifications, techniques, and systems. Outlines structural systems, construction processes, and assemblies. Includes a field project student team research of current Alaskan building type. Special fees apply. (3+0)</td>
</tr>
<tr>
<td>CM F123 Codes and Standards</td>
<td>3</td>
<td>Offered As Demand Warrants</td>
<td>Provides an introduction and overview of the fundamental provisions of the building codes used for plan review, life-safety evaluation of buildings, and community development. Special fees apply. Prerequisites: CM F102; DRT F170. (3+0)</td>
</tr>
<tr>
<td>CM F142 Mechanical and Electrical Technology</td>
<td>4</td>
<td>Offered As Demand Warrants</td>
<td>Introduces the basic mechanical and electrical systems required in all buildings for the safety, health, comfort, and convenience of the occupants. Emphasizes design criteria, code requirements and interpretation of construction drawings. Special fees apply. (3+2)</td>
</tr>
<tr>
<td>CM F163 Building Construction Cost Estimating</td>
<td>3</td>
<td>Offered As Demand Warrants</td>
<td>Presents methods and techniques for preparing accurate cost estimates for building construction projects. Emphasizes quantity surveys, productivity, bidding and negotiation procedures, and cost control systems. Special fees apply. Prerequisites: CM F102; DRT F170; MATH F107X. (2+2)</td>
</tr>
<tr>
<td>CM F201 Construction Project Management</td>
<td>3</td>
<td>Offered As Demand Warrants</td>
<td>Examines construction project management methods and processes. Includes project delivery systems, contract agreements, contract general and supplementary conditions and contract administration procedures. Special fees apply. Prerequisites: CM F102; DRT F170. (3+0)</td>
</tr>
<tr>
<td>CM F202 Project Planning and Scheduling</td>
<td>3</td>
<td>Offered As Demand Warrants</td>
<td>Examines concepts and methods for planning and scheduling of construction projects. Includes identifying work elements, analyzing resources, determining activity durations, preparing CPM schedules using computer scheduling software, preparing schedule updates and analyzing planning versus actual progress for cost control. Special fees apply. Prerequisites: CM F201; MATH F108. (2+2)</td>
</tr>
<tr>
<td>CM F205 Construction Safety</td>
<td>3</td>
<td>Offered As Demand Warrants</td>
<td>Examines safety and health practices for the construction industry. Includes developing and implementing construction project site-specific safety plans, analyzing the laws and regulations that govern safety, evaluating construction site hazards and environmental conditions and incident investigation and reporting. Special fees apply. Prerequisites: CM F201. (3+0)</td>
</tr>
<tr>
<td>CM F213 Civil Technology</td>
<td>4</td>
<td>Offered As Demand Warrants</td>
<td>Outlines elements of civil design, including soils and soil mechanics, foundations, roads, and utilities using local, state and federal regulations. Students will also be introduced to elements of construction surveying. Special fees apply. Prerequisites: CM F102; DRT F170. (2+4)</td>
</tr>
</tbody>
</table>

### COURSES

**CONSTRUCTION TRADES TECHNOLOGY (CTT)**

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
<th>Prerequisites</th>
</tr>
</thead>
<tbody>
<tr>
<td>CTT F104</td>
<td>Basic Communication and Employability Skills</td>
<td>2</td>
<td>Offered As Demand Warrants</td>
</tr>
<tr>
<td></td>
<td>Techniques for communicating effectively with co-workers and supervisors. Includes critical thinking and problem-solving skills and reviews effective presentation and key workplace issues such as sexual harassment, stress and substance abuse. (Alternative to CTT F100 when taken with CTT F101; CTT F102; CTT F103.) Prerequisites: CTT F103 or permission of instructor. (2+0)</td>
<td></td>
<td></td>
</tr>
<tr>
<td>CTT F106</td>
<td>Construction Mathematics</td>
<td>3</td>
<td>Offered As Demand Warrants</td>
</tr>
<tr>
<td></td>
<td>Introduction to basic mathematical procedures commonly used in the construction and maintenance crafts. Includes multiplication, subtraction, addition, division, working with fractions and measuring areas, volume and capacity of shapes. (3+0)</td>
<td></td>
<td></td>
</tr>
<tr>
<td>CTT F110</td>
<td>Residential Carpentry — Level I</td>
<td>8.5</td>
<td>Offered As Demand Warrants</td>
</tr>
<tr>
<td></td>
<td>Introduction to basic materials and framing techniques used in the construction trades. Includes an orientation, introduction to materials and advanced tools used in the trades. Includes techniques used in framing a structure and to exterior doors and windows commonly installed on construction projects and their proper installation. This course is divided into seven modules. Each module must be successfully completed. (Alternative: CTT F111; CTT F112; CTT F113; CTT F114.) Prerequisites: CTT F100 or permission of instructor. (5+7)</td>
<td></td>
<td></td>
</tr>
<tr>
<td>CTT F111</td>
<td>Materials and Tools Used in the Trade</td>
<td>2.5</td>
<td>Offered As Demand Warrants</td>
</tr>
<tr>
<td></td>
<td>Examines the sources and uses of various softwoods and hardwoods, the grading system for lumber and plywood, composition and uses of various engineered sheet materials and laminated lumber products and the many kinds of fasteners and adhesives used with wood and masonry construction. Expands on the hand and power tool information provided in the construction technology core and introduces the carpentry trainee to additional tools used in the carpentry trade. (Alternative to CTT F110 when taken with CTT F112; CTT F113; CTT F114.) Prerequisites: CTT F100 or permission of instructor. (2+1)</td>
<td></td>
<td></td>
</tr>
<tr>
<td>CTT F112</td>
<td>Floor Systems, Wall and Ceiling Framing</td>
<td>2</td>
<td>Offered As Demand Warrants</td>
</tr>
<tr>
<td></td>
<td>Focuses on framing basics. Includes the procedures for laying out and constructing a wood floor using common lumber as well as engineered building materials, procedures for laying out and framing walls and ceilings, roughing in doors and window openings, construction corners and partition tips, bracing walls and ceilings, and applying sheathing. (Alternative to CTT F110 when taken with CTT F111; CTT F113; CTT F114.) Prerequisites: CTT F110 or permission of instructor. (1+2)</td>
<td></td>
<td></td>
</tr>
<tr>
<td>CTT F113</td>
<td>Roof Framing, Windows, and Exterior Doors</td>
<td>2</td>
<td>Offered As Demand Warrants</td>
</tr>
<tr>
<td></td>
<td>Describes the various kinds of roofs and instructions for laying out rafters for gable roof, hip roof and valley intersections. Includes both stick built and truss built roofs, various types of windows, skylights, exterior doors, and instructions for installing weather stripping and lock sets. (Alternative to CTT F110 when taken with CTT F111; CTT F112; CTT F114.) Prerequisites: CTT F112 or permission of instructor. (1+2)</td>
<td></td>
<td></td>
</tr>
<tr>
<td>CTT F114</td>
<td>Introduction to Concrete Materials and Forms</td>
<td>2</td>
<td>Offered As Demand Warrants</td>
</tr>
<tr>
<td></td>
<td>Introduction to various cements and other materials which when mixed form various types of concrete. Includes concrete volume estimates, concrete tests, concrete curing methods, reinforcement materials such as rebar, bar supports and welded-wire fabric and tasks in the construction of foundations and flat work. (Alternative to CTT F110 when taken with CTT F111; CTT F112; CTT F113.) Prerequisites: CTT F113 or permission of instructor. (1+2)</td>
<td></td>
<td></td>
</tr>
<tr>
<td>CTT F115</td>
<td>Residential Carpentry — Level II</td>
<td>12</td>
<td>Offered As Demand Warrants</td>
</tr>
<tr>
<td></td>
<td>This course builds upon the skills learned in CTT F110. Includes methods and techniques used to locate structures and install exterior siding and related element protection. Various types of roofing and installation of those materials, types and methods of drywall and its installation and interior finish applications. This course is divided into eleven modules. Each module must be successfully completed. (Alternative: CTT F116; CTT F117; CTT F118; CTT F119.) Prerequisites: CTT F110 or permission of instructor. (6+12)</td>
<td></td>
<td></td>
</tr>
<tr>
<td>CTT F116</td>
<td>Reading Plans and Site Layout — Level I</td>
<td>2</td>
<td>Offered As Demand Warrants</td>
</tr>
<tr>
<td></td>
<td>This course builds upon CTT F110. Introduces the principles, equipment and methods used to perform site layout tasks of distance measurements, differential leveling and the site layout responsibilities of individuals on the site. (Alternative to CTT F115 when taken with CTT F117; CTT F118; CTT F119.) Prerequisites: CTT F110 or permission of instructor. (1+2)</td>
<td></td>
<td></td>
</tr>
<tr>
<td>CTT F117</td>
<td>Exterior Finish and Moisture Protection</td>
<td>2</td>
<td>Offered As Demand Warrants</td>
</tr>
<tr>
<td></td>
<td>Introduction to materials and installation techniques used in various types of siding. Includes the installation procedures and basic requirements for insulation, moisture control and ventilation. (Alternative to CTT F115 when taken with CTT F116; CTT F118; CTT F119.) Prerequisites: CTT F116 or permission instructor approval. (1+2)</td>
<td></td>
<td></td>
</tr>
<tr>
<td>CTT F118</td>
<td>Roofing, Stairs and Metal Studs Applications</td>
<td>3</td>
<td>Offered As Demand Warrants</td>
</tr>
<tr>
<td></td>
<td>Introduction to materials and installation techniques for a number of basic types of roofing. Includes installation techniques of stairs and metal studs. (Alternative to CTT F115 when taken with CTT F116; CTT F117; CTT F119.) Prerequisites: CTT F115 or permission of instructor. (2+2)</td>
<td></td>
<td></td>
</tr>
<tr>
<td>CTT F119</td>
<td>Drywall and Interior Finish Applications</td>
<td>5</td>
<td>Offered As Demand Warrants</td>
</tr>
<tr>
<td></td>
<td>Introduction to materials, tools and procedures used to install and finish gypsum drywall on walls and ceilings and to correct drywall finishing problems. Includes installation of various types of doors and their related hardware in several types of walls, materials, tools and procedures used to lay out, install, and maintain suspended ceilings and the different types of trim. (Alternative to CTT F115 when taken with CTT F116; CTT F117; CTT F118.) Prerequisites: CTT F110 or permission of instructor. (2+6)</td>
<td></td>
<td></td>
</tr>

CONSTRUCTION TRADES TECHNOLOGY (CTT)

Course Descriptions

UNIVERSITY OF ALASKA FAIRBANKS

CTT F132  Flooring Installation: Vinyl, Wood and Parquet
1 Credit  Offered As Demand Warrants
Introduces students to concepts and practical applications of installing vinyl, wood and parquet floor coverings. Students will learn how to install underlayment, vinyl flooring tiles, trim and baseboard components, as well as, use special tools for correctly installing parquet flooring with subflooring installation. (0.5+1)

CTT F133  Cabinet Installation with Countertops
1 Credit  Offered As Demand Warrants
Provides students with basic concepts of installing cabinets with countertops and identify different types of cabinet construction (stock, semi-custom and custom built). Students will be shown different types of wood products and be introduced to special tools. Face-to-face instruction and practical application of different techniques of installing base cabinets and top or wall cabinets will be shown. (1+0)

CTT F134  Garbage Disposal Installation
1 Credit  Offered As Demand Warrants
Inform students of the basic knowledge of installing a garbage disposal unit in a kitchen cabinet. Students will learn how to use special tools in connecting drain and waste piping and venting systems from a house unit. Students will review safety issues related to the proper handling of plumbing hand and power tools in the installation process. (0.5+1)

CTT F135  Boiler Troubleshooting and Burner Repair
2 Credits  Offered As Demand Warrants
Focuses on the basic components of boilers and burners used in industry for heating residential and commercial properties. Key concepts and strategies related to the process and safety of boilers, boiler thermodynamics, controls systems, fuel pumps, ignition systems, draft and venting principles and boiler operation according to hydronic principals and Alaska code. (2+0)

CTT F136  Landscaping and Horticulture
2 Credits  Offered As Demand Warrants
Introduces students to the process/procedure of preparing and landscaping a grounded area. Students will be introduced to concepts of placement of appropriate plants and vegetation, maintenance of edged and mowed lawn area, weed and fertilization control and watering schedules. (2+0)

CTT F137  Appliance Troubleshooting and Repair
2 Credits  Offered As Demand Warrants
Provides students with conceptual and practical applications in troubleshooting and repairing appliances. Students will be instructed in diagnostic skills that support repairing and replacing components in various equipment such as refrigerators, washing machines, dishwashers, clothes dryer and oven and cook-tops. Prerequisite: Instructor approval. (2+0)

CTT F138  Residential Heating Controls
2 Credits  Offered As Demand Warrants
Provides conceptual and practical applications for students wishing to become a residential heating control technician. Topics will explore diagnosis of equipment problems in operation, testing and adjusting conventional and electronic thermostats. Students will also receive instruction on the operation of common electrical and electronic circuits used to control residential heating systems. Recommended: Instructor approval if student has not taken CTT courses. (2+0)

CTT F150  Plumbing — Level I
4 Credits  Offered As Demand Warrants
Introduction to basic plumbing techniques, math, hand and power tools, extraction of information from construction drawings and materials used in the plumbing trade. This course is divided into ten (10) modules. Each module must be successfully completed. (Alternative: CTT F151; CTT F152; CTT F153; and CTT F154.) Prerequisites: CTT F110 or permission of instructor. (3+2)

CTT F151  Introduction to Plumbing Tools and Drawings
1 Credit  Offered As Demand Warrants
Introduction to a plumber’s basic hand and power tools, their care and maintenance, and safety procedures. Includes the basics of reading plumbing blueprints and drawings and specific plumbing drawings such as isometric and oblique pictorial drawings, orthographic drawings and schematic drawings. (Alternative to CTT F150 when taken with CTT F152; CTT F153; and CTT F154.) Prerequisites: CTT F110 or permission of instructor. (1+0.5)

CTT F153  Plastic and Copper Pipe and Fittings
1 Credit  Offered As Demand Warrants
Introduction to the various types of plastic and copper pipe used in the plumbing industry. Includes various methods of joining plastic and copper pipe and a variety of fittings commonly found in commercial and residential dwellings. (Alternative to CTT F150 when taken with CTT F151; CTT F152; CTT F154.) Prerequisites: CTT F152 or permission of instructor. (0.5+1)

CTT F154  Fixtures, Faucets and Venting Systems
1 Credit  Offered As Demand Warrants
Covers the various types of fixtures plumbers install, including sinks, bathtubs, water closets, garbage disposals, dishwashers and mop basins. An overview of the drain, waste and vent system from inside the building, where the liquid drains into pipes, to the sewer and waste treatment plants. (Alternative to CTT F150 when taken with CTT F151; CTT F152; CTT F153.) Prerequisites: CTT F153 or permission of instructor. (0.5+1)

CTT F155  Plumbing — Level II
8 Credits  Offered As Demand Warrants
Introduction to basic plumbing techniques, math, hand and power tools, extraction of information from construction drawings and materials used in the plumbing trade. This course is divided into thirteen modules. Each module must be successfully completed. Generally, each will have two components, a written exam and a hands-on competency test. (Alternative: CTT F156; CTT F157; CTT F158; CTT F159.) Prerequisites: CTT F150 or permission of instructor. (4.5+7)

CTT F160  Photovoltaic Systems — Part I
5 Credits  Offered As Demand Warrants
This course is a practical introduction to electric power generation through photovoltaic cells. During this course the student will build a solar panel to understand its operation, installation and maintenance. Prerequisites: CTT F106 and CTT F100 or permission of instructor. (4+2)

CTT F161  Photovoltaic Systems — Part II
5 Credits  Offered As Demand Warrants
This course covers practical methods of installing photovoltaic systems in residential settings. The students will also learn basic troubleshooting techniques. Prerequisites: CTT F160 or permission of the instructor. (4+2)

CTT F170  Residential Electrical — Level I
9 Credits  Offered As Demand Warrants
Introduction to basic electrical techniques, electrical theory, and extraction of information from construction drawings, tools, and materials used in the electrical trades. Course is divided into twelve modules. Each module must be successfully completed. (Alternative: CTT F171; CTT F172; CTT F173; CTT F174.) Prerequisites: CTT F115 or permission of instructor. (8+2)

CTT F171  Electrical Safety and Electric Theory
2 Credits  Offered As Demand Warrants
Course covers the safety rules as applied to handling and working with electrical systems and circuits. Includes the required OSHA mandated lockout/tag out procedure, basic electric theory and circuit calculations involving the application of Ohm’s and Kirchoff’s laws. The student is made aware of precautions to take for various electrical hazards found on the job site. (Alternative to CTT F170 when taken with CTT F172; CTT F173; CTT F174.) Prerequisites: CTT F115 or permission of instructor. (2+0)
COURSES

CONSTRUCTION TRADES TECHNOLOGY (CTT) — COUNSELING (COUN)

CTT F172  Alternating Current, Electrical Test Equipment and the NEC
2 Credits  Offered As Demand Warrants
Introduction to the principles of alternating current and the operation and applications of various types of electrical test equipment. Includes National Electrical Code. (Alternative to CTT F170 when taken with CTT F171, CTT F173; CTT F174.) Prerequisites: CTT F171 or permission of instructor. (2+0)

CTT F175  Residential Electrical — Level II
8 Credits  Offered As Demand Warrants
Introduction to basic electrical techniques, electrical theory and extraction of information from construction drawings, tools and materials used in the electrical trades. This course is divided into ten modules. Each module must be successfully completed. (Alternative: CTT F176; CTT F177; CTT F178; CTT F179.) Prerequisites: CTT F170 or permission of instructor. (4+8)

CTT F199  Student Practicum I
1–3 Credits
Provides the student the opportunity to practice and develop the skills learned in the classroom. Skills will be developed under the guidance of journeyman and/or qualified personnel on the job site. Course may be repeated twice for a total of three credits. Prerequisites: CTT F195 or permission of instructor. (0+2–6)

CTT F240  Introduction to Project Development for Tribal Residential Construction
3 Credits  Offered As Demand Warrants
This course introduces the roles and responsibilities of project managers who manage and supervise the construction of housing projects in rural Alaska. Because they are funded predominantly by the U.S. Department of Housing and Urban Development (HUD) through the Native American Housing Assistance and Self-Determination Act (NAHASDA), projects conducted by rural housing authorities and tribal organizations have unique planning and administrative requirements. Project managers working in rural Alaska also require specialized training due to complicating factors such as problematic soil conditions, materials availability, transportation and other logistical challenges, and variable workforce capacity. Students will gain skills in developing plans and specifications for rural construction projects, ensure building codes are met during project development, and learn processes and materials unique to isolated locations with limited services. Prerequisites: CLOS F150, CTT F106, Certificate in Construction Trades Technology or permission of instructor. (3+0)

CTT F241  Introduction to Estimating, Cost Control, and Quality Control for Tribal Residential Construction
3 Credits  Offered As Demand Warrants
This course builds upon the skills obtained in CTT F240 by introducing the roles and responsibilities of project managers relative to project scheduling, estimating, cost control and quality control. Because they are funded predominantly by the U.S. Department of Housing and Urban Development (HUD) through the Native American Housing Assistance and Self-Determination Act (NAHASDA), projects conducted by rural housing authorities and tribal organizations have unique planning and administrative requirements. Students will learn to use project scheduling and cost control tools which incorporate these requirements and that have been developed for and proven effective in the management of residential construction projects in rural Alaska. Complicating factors for rural Alaska projects such as materials availability, transportation and other logistical challenges, variable workforce capacity, and complex political environment as they relate to project estimating, cost control and quality assurance will also be discussed. Prerequisites: CTT F240, Certificate in Construction Trades Technology or permission of instructor. (3+0)

CTT F250  Current Topics in Construction Trades
1–3 Credits  Offered As Demand Warrants
Various topics of current interest in the Construction Trades. Topics announced prior to each semester. Course may be repeated for credit. Prerequisites: CTT F100. Recommended: CTT F106. (1–3+0.5–1.5)

CTT F299  Student Practicum II
1.5 Credits  Offered As Demand Warrants
Provides the student the opportunity to practice and develop the skills learned in the classroom. Skills will be developed under the guidance of journeyman and/or qualified personnel on the job site. Prerequisites: CTT F155 or permission of instructor. (0+3)

COUN F299P  Student Practicum II
1.5 Credits  Offered As Demand Warrants
Provides the student the opportunity to practice and develop the skills learned in the classroom. Skills will be developed under the guidance of journeyman and/or qualified personnel on the job site. Graded Pass/Fail. Prerequisites: CTT F155 or permission of instructor. (0+3)

COUN F615  Foundations of Counseling
3 Credits  Offered Fall As Demand Warrants
Introduction to the philosophies, organization, patterns and techniques that aid counselors in preparing clients for responsible decision-making in modern society. Prerequisites: Admittance to Counseling program or School Counseling Certification program; or permission of instructor. (3+0)

COUN F623  Counseling Theories and Applications I
3 Credits  Offered Fall As Demand Warrants
A survey of the major theoretical systems of counseling and psychotherapy combined with a laboratory experience focused on building microskills in counseling. Specific application of theoretical principles will be investigated, analyzed and described. Prerequisites: Admittance to Counseling program or School Counseling Certification program or permission of instructor. Cross-listed with PSY F660. (3+2)

COUN F627  Developmental Interventions
3 Credits  Offered Spring
Designed to give students an opportunity for limited practice in applying developmental theory to work with children and youth. Attention is placed on assisting children and youth to accomplish developmental tasks appropriate to their psychological growth. Prerequisites: COUN F623; admittance to the Counseling program; or permission of instructor. (3+0)

COUN F628  Child and Adolescent Development
3 Credits  Offered Fall
Focus on developmental processes and sequences of change that children experience within each developmental domain from birth through adolescence. Prerequisites: Admittance to Counseling program or School Counseling Certification program; or permission of instructor. (3+0)

COUN F629  Counseling Interventions for Adults
3 Credits  Offered Spring
Examines various intervention strategies for working primarily with adult individuals in a variety of situations. Attention is placed on assisting adults in accomplishing developmental tasks appropriate to their psychosocial growth. Descriptive intervention techniques with respect to assessing individuals in crisis will be discussed and strategies for handling those crises situations will be examined. Prerequisites: COUN F623; admittance to the Counseling program or School Counseling Certification program; or permission of instructor. (3+0)

COUN F630  Appraisal for Counselors
3 Credits  Offered Fall and Spring
Introduction to the kinds of assessment information school and community counselors utilize in the assessment process. Prerequisites: COUN F623; admittance to Counseling program or School Counseling Certification program; or permission of instructor. (3+0)

COUN F632  Career Development
3 Credits  Offered Spring: Summer
An introduction to the theories of career development, career choices and how to translate theory into practice. Emphasis will be on career education

304  Course Descriptions  2014–2015 CATALOG
development and the utilization of information resources for facilitating the career choice decision-making process. Prerequisites: COUN F615; admittance to Counseling program or School Counseling Certification program; or permission of instructor. (3+0)

COUN F634 Practicum in Individual Counseling
3 Credits Offered Fall; Spring; Summer Even-numbered Years Supervised practice in basic counseling skills and techniques. Supervised work with one-on-one counseling relationships. Actual practice in listening, problem identification, goal setting and session management. Prerequisites: COUN F623; admittance to Counseling program or School Counseling Certification program; or permission of instructor. (2+7)

COUN F636 Internship I
3 Credits Offered Fall; Spring; Summer As Demand Warrants Supervised practice in school or community setting. Focus on directed practice of particular skills relevant to the counselor’s role. Weekly seminars will cover actual and role playing situations providing opportunities to operationalize theory in counseling, interventions and ethical issues. Special fees apply. Prerequisites: COUN F634; admittance to Counseling program or School Counseling Certification program; or permission of instructor. (3+0+20)

COUN F638 Adult Development
3 Credits Offered Spring As Demand Warrants An overview of physical, cognitive, personality and social development across the adult life span, from high school graduation through death. Major theories and research findings in the field of adult development are explored with an emphasis on examining how individuals progress through a series of predictable stages during their lifetime. Prerequisites: COUN F615; admittance to Counseling program or School Counseling Certification program; or permission of instructor. (3+0)

COUN F646 School Counseling
3 Credits Offered Fall Topics related to the role of the school counselor such as consultation, career guidance and culturally appropriate assessment. Prerequisites: COUN F623; admittance to Counseling program or School Counseling Certification program; or permission of the instructor. Cross-listed with PSY F646. (3+0)

COUN F647 Professional Ethics
3 Credits Offered Fall; Spring The ethical standards of the American Counseling Association and the American School Counseling Association will be examined, discussed and compared. Students will be provided with opportunities to apply these general principles to specific cases. Students will be expected to demonstrate knowledge of the principles of these ethical codes in practice. Prerequisites: COUN F615; admittance to Counseling program or School Counseling Certification program; or permission of instructor. (3+0)

COUN F650 Cross-Cultural Psychopathology
3 Credits Offered Fall An overview of contemporary perspectives on child and adult psychological disorders from the perspective of cultural psychology. Fundamentals of therapeutic interviewing. Training in use of the DSM-IV diagnostic system. Examination of the role of culture, ethnicity, gender and social class in symptom formation and the experience of illness, and critical examination of these issues in clinical application of the DSM-IV. Training in DSM-IV cultural formulation. Prerequisites: PSY F345; COUN F623; admittance to the Counseling program or School Counseling Certification program or permission of the instructor. Cross-listed with PSY F650. (3+0)

COUN F660 Cross-Cultural Counseling
3 Credits Offered Spring; As Demand Warrants An examination of cultural and ethnic variables in human nature and their effect on the counseling process. Specific focus will be placed on the nature and function of culture, cultural variables in the context of the human experience, universal and culture specific aspects of the counseling process, barriers to effective cross-cultural counseling, specific ethnic and cultural considerations, and methods of intellectual training with special emphasis on Alaskan applications. Prerequisites: Admittance to the Counseling program; or School Counseling Certification program; or permission of instructor. Cross-listed with PSY F661. (3+0)

COUN F666 Family and Network Therapy
3 Credits Offered Spring Survey of concepts and theories of function and dysfunction in the area of couples and families as social networks. In addition, it provides an introduction to the skills necessary for one who would intervene in these systems. Prerequisites: COUN F623; admittance to the Counseling program; or School Counseling Certification program; or permission of instructor. Cross-listed with PSY F666. (3+0)

COUN F667 Ethnicity and Family Studies
3 Credits Offered Spring This course is designed to focus on the contribution of ethnic background to family makeup and functioning. Major ethnic groups are studied along with the counseling, social justice, and advocacy approaches appropriate to each. In a similar fashion, the overarching cultural context of relationships, including factors such as age, gender, sexual orientation, religious and spiritual values, mental and physical characteristics, education, family values, socioeconomic status, and within group as well as between as groups cultural differences are examined. Theories of multicultural counseling, and systems-oriented intervention strategies (couple, family, group, and community) are considered. Counselor cultural self-awareness and the role of counseling in eliminating biases, prejudice, oppression, and discrimination are emphasized. Prerequisites: COUN F666 or permission of instructor. (3+0)

COUN F674 Group Counseling
3 Credits Offered Summer Even-numbered Years Kinds and types of groups with emphasis on methods, problems and needed skills in working with groups in a counseling situation. Prerequisites: COUN F623; admittance to Counseling program or School Counseling Certification program; or permission of instructor. Cross-listed with PSY F674. (3+0)

COUN F686 Internship II
3 Credits Offered Fall; Spring; Summer As Demand Warrants Opportunity to perform all the activities that a regularly employed counselor would be expected to perform in a school or community setting. At the completion of the internship the student will be able to demonstrate knowledge and skills needed to administer school and/or community counseling services. Special fees apply. Prerequisites: COUN F634; COUN F636; admittance to Counseling program or School Counseling Certification program; or permission of the instructor. (3+0+20)

COUN F687 Internship III
3 Credits Offered Fall; Spring; Summer As Demand Warrants The course is designed to give counseling program candidates experience and supervised practice in the broad scope of activities (i.e. record keeping, individual and group counseling, information and referral, consultation, in-service and staff/faculty meetings, supervision) engaged in by either fully credentialed school counselors or licensed professional counselors. Special fees apply. Prerequisites: COUN F636; admittance to the Counseling program or School Counseling Certification program; or permission of the instructor. (3+0+20)

COUN F688 Internship IV
3 Credits Offered As Demand Warrants The course is designed to give counseling program candidates experience and supervised practice in the broad scope of activities (i.e. record keeping, individual and group counseling, information and referral, consultation, in-service and staff/faculty meetings, supervision) engaged in by either fully credentialed school counselors or licensed professional counselors. Special fees apply. Prerequisites: COUN F687; admittance to the Counseling program or School Counseling Certification program; or permission of the instructor. (3+0+20)
CROSS-CULTURAL STUDIES

CCS F454  Comparative Farming and Sustainable Food Systems
3 Credits  Offered Fall
Principles of food systems geography and food security. Cross-cultural examination of dietary traditions, poverty, hunger, equity and food access and distribution. Comparison of multiple varieties and scales of agricultural systems in the context of social, ecological and economic sustainability. Considers Alaskan and other high-latitude food systems, including country food, wild game harvest and rural to urban nutrition transition. Junior standing and ENGL F211X or F213X; or permission of instructor. Cross-listed with NRM F454 and GEOG F454. (3+0)

CCS F602  Cultural and Intellectual Property Rights
3 Credits  Offered Spring
Examines issues associated with recognizing and respecting cultural and intellectual property rights with respect to the documentation, publication and display of knowledge, practices, beliefs and artifacts of cultural traditions. Appropriate research principles, ethical guidelines and legal protections will be reviewed for their application to cross-cultural studies. Prequisites: Graduate standing or approval of the instructor. (3+0)

CCS F603  Field Study Research Methods
3 Credits
Focus on techniques for conducting both quantitative and qualitative field research. Particular emphasis on considerations for conducting field research in cross-cultural settings. Prequisites: Graduate standing or permission of instructor. Cross-listed with ED F603. (3+0)

CCS F604  Documenting Indigenous Knowledge
3 Credits  Offered Fall
A thorough grounding in research methodologies and issues associated with documenting and conveying the depth and breadth of indigenous knowledge systems and their epistemological structures. Includes a survey of oral and literate data-gathering techniques, a review of various modes of analysis and presentation, and a practical experience in a real-life setting. Recommended: Graduate-level survey course in research methods or approval of the instructor. Cross-listed with ED F604. (3+0)

CCS F608  Indigenous Knowledge Systems
3 Credits  Offered Fall
A comparative survey and analysis of the epistemological properties, world views and modes of transmission associated with various indigenous knowledge systems. Emphasis on knowledge systems practiced in Alaska. Prequisites: Graduate standing or approval of instructor. Cross-listed with RD F608; ED F608; ANL F608. (3+0)

CCS F610  Education and Cultural Processes
3 Credits  Offered As Demand Warrants
Advanced study of the function of education as a cultural process and its relation to other aspects of a cultural system. Students will be required to prepare a study in which they examine some aspect of education in a particular cultural context. Cross-listed with ED F610. (3+0)

CCS F611  Culture, Cognition and Knowledge Acquisition
3 Credits  Offered Fall
An examination of the relationship between learning, thinking and perception in multicultural contexts. Particular emphasis will be on the implications of these relationships for schooling. Content will focus on cultural influences on perception, conceptual processes, learning, memory and problem solving. Content will also reflect concern for practical teaching problems. Cross-listed with ED F611. (3+0)

CCS F612  Traditional Ecological Knowledge
3 Credits  Offered Spring
Examines the acquisition and utilization of knowledge associated with long-term inhabitation of particular ecologial systems and adaptations that arise from the accumulation of such knowledge. Attention will be given to the contemporary significance of traditional ecological knowledge as a complement to academic fields of study. Prequisites: Graduate standing or approval of the instructor. Cross-listed with RD F612. (3+0)

CCS F613  Alaska Standards for Culturally Responsive Schools
3 Credits  Offered As Demand Warrants
Guidelines, rationale and resources for adapting educational policies, programs and practices to better address the cultural well-being of the students and communities they serve. Content will be grounded in the "Alaska Standards for Culturally Responsive Schools" including standards for students, teachers, curriculum, schools and communities. Cross-listed with ED F613. (3+0)

CCS F616  Education and Socioeconomic Change
3 Credits  Offered As Demand Warrants
An examination of social change processes, particularly in relation to the deliberate development of new institutions and resulting forms of new consciousness. Emphasis is placed on the role of education and schooling in this development dynamic. Cross-listed with ED F616. (3+0)

CCS F620  Critiquing Indigenous Literature for Alaska's Children
3 Credits  Offered As Demand Warrants
Provides educators with a comprehensive framework for reviewing literature that is written about and for Alaska's indigenous children. An in-depth look at how children's literature influences the image of the indigenous children of Alaska and provides a foundation for selecting curriculum materials that accurately represent and address the cultural context of the students and communities they serve. This is an e-learning/audio-conference course. Prequisites: Graduate standing, teaching certificate, or approval of the instructor. (3+0)

CCS F631  Culture, Community and the Curriculum
3 Credits  Offered Fall
Salient issues involved with the development of effective programs of instruction in small schools, including foundational design, conceptual models, organizational strategies, technical skills, current issues and trends, and their implications and application to the environment of rural Alaska. Cross-listed with ED F631. (3+0)

CCS F656  Sustainable Livelihoods and Community Well-Being
3 Credits  Offered Fall
Review the basic principles that govern the sustainability of systems and look at the cultural practices and individual behaviors that enhance or degrade sustainable livelihoods and community well-being. Emphasis is on understanding the historical context of ideas about sustainability, on understanding the nature and magnitude of the social, economic and ecological dimensions of contemporary change, and the "best practices" currently in place for communities to respond effectively to change. Prequisites: Graduate standing or permission of instructor. Cross-listed with NRM F656 and GEOG F656. (3+0)

CCS F690  Seminar in Cross-Cultural Studies
3 Credits  Offered As Demand Warrants
Investigation of current issues in cross-cultural contexts. Opportunity for students to synthesize their prior graduate studies and research. Seminar is taken near the terminus of a graduate program. Prequisites: Advancement to candidacy and permission of student's graduate committee. Cross-listed with ANL F690; ED F690; RD F690. (3+0)
CULINARY ARTS AND HOSPITALITY

CAH F060  Basic Techniques of Cooking I  3 Credits
Basics in the culinary arts field designed for students with special needs. Special fees apply. Prerequisites: Permission of instructor. (1.5+6)

CAH F070  Basic Techniques of Cooking II  6 Credits
An open ended course providing an appropriate learning sequence for students with special needs. Special fees apply. Prerequisites: Permission of instructor. (3+12)

CAH F101  Introduction to the Culinary Field  1 Credit
Provides an overview of the many facets of the food industry and begins the student portfolio. Students will learn culinary related math concepts; topics include basic math principles, weights and measures, recipe conversion and baking formulas. These lessons will be used throughout the culinary program. (1+3)

CAH F105  Principles of Food Service I  3 Credits
Offered Fall, Spring, As Demand Warrants
Food service and the principle variations which students may encounter in the industry; professional standards, kitchen safety, first aid, storeroom operation, kitchen equipment and basic culinary terminology. (3+0)

CAH F117  Art in Cake Icing  2 Credits
The preparation of cakes for icing and decorating. Topics include borders, clowns, flowers, leaves, pattern transfer, frozen buttercream, confectionery coating, royal icing, plus designing cakes, and rolled buttercream. Use of an airbrush, flow in techniques and tiered cake assembly covered. Graded Pass/Fail. Special fees apply. (1+2)

CAH F140  Culinary I — Principles and Techniques  4 Credits
The student learns concepts of sanitation and safety as they relate to the foodservice industry. Areas addressed include: tools, equipment, knife skills, kitchen safety, food and plate presentation, food evaluation, basic cooking principles to include moist and dry heat methods, seasonings, flavorings and aromatics, fats, emulsions, dairy products, eggs and palate development. Special fees apply. Prerequisite/co-requisite: CAH F101; CAH F150. (1+6)

CAH F141  Culinary II — Stocks, Soups and Sauces  4 Credits
Students study and apply cooking methods of scratch cookery through small batch assignments. Areas of study include stocks, thickeners, roux based sauces to include the four mother sauces, hot and cold emulsions, butter sauces, salsas, vinaigrettes, and reductions as well as soups to include cream, clear and potage soups. Special fees apply. Prerequisites: CAH F140; CAH F150. (1+6)

CAH F145  Bakery Production I  5 Credits
Basic commercial baking skills and procedures. Standardized recipes and procedures stressed. End product critiqued daily. Emphasis on sanitary food handling practices and professional work habits. Special fees apply. (5+0)

CAH F146  Introduction to Baking and Pastry  4 Credits
Students learn to apply fundamental baking skills in preparing yeast breads, quick breads, cookies, pies, pastries, cakes, custards, creams and sauces. Students will gain confidence in their abilities while learning in a professional bakery setting. Special fees apply. Prerequisite/co-requisite: CAH F101; CAH F140; CAH F150. (1+6)

CAH F150  Food Service Sanitation  2 Credits
Designed for entry-level through supervisory personnel of food service establishments. Basic microbiology, safe food handling techniques, good hygienic practices, pest control, employee training, and the Alaska laws governing food service establishments. Upon successful completion the student can earn ServSafe Managers Certification from the National Restaurant Association Education Foundation; the course also satisfies a requirement for certification with the American Culinary Federation. (2+0)

CAH F152  Supervisory Development  2 Credits
Problems and challenges that food service supervisors deal with every day. Development of personnel management methods. (2+0)

CAH F154  Food and Beverage Service  2 Credits
Introduce students to dining room and front-of-the-house operations. Students will gain competence in dining room operation and table service techniques. Students will perform duties in the dining room of our student-run restaurant. Prerequisites CAH F150. Note CAH F150 may be taken concurrently. (0.5+3)

CAH F160  Principles of Nutrition  2 Credits
Basic principles of nutrition with emphasis on nutrients and their function in relation to human health. (2+0)

CAH F161  Pastry Tube Art  1.5 Credits
Basic cake and food product techniques including borders, flowers, cake designing and proper use of pastry tube bags. Special fees apply. (0.5+2)

CAH F170  Gourmet Cooking  2 Credits
Preparation and service of gourmet beef, poultry and seafood entrees for the home cook. Recipes represent new ideas in home entertainment and menus change every semester. Graded Pass/Fail. Special fees apply. (2+0)

CAH F171  Gourmet Baking  2 Credits
Preparation of a wide range of breads, pastries, fancy desserts. French pastry and simple tortes. Recipes represent traditional methods of baking along with current trends in home entertainment. Graded Pass/Fail. Special fees apply. (0.5+3)

CAH F172  Gourmet Asian Cooking  2 Credits
Preparing and serving Asian dishes. Study and use of proper cooking methods will be emphasized. Students prepare and enjoy a full meal Graded Pass/Fail. Special fees apply. (0.5+3)

CAH F174  Vegetarian Cooking  2 Credits
Preparation and service of vegetarian foods and balanced meals. Use of nourishing condiments will be explored. Recipes will include some seasonal, ethnic and gourmet foods; however the emphasis will be on preparing quick, healthful, tasty meatless meals. Graded Pass/Fail. Special fees apply. (0.5+3)

CAH F175  Protein Fabrication  3 Credits
Study focuses on the identification and fabrication of protein items to include poultry, beef, veal, pork, lamb, shellfish, and finfish. Students will be introduced to the concepts of protein cookery. Emphasis is on product fabrication to practical industry applications. Special fees apply. (1+4)

CAH F176  Heart-Healthy and Diabetic Cooking  2 Credits
Demonstrations of healthy cooking using glycemic index and other heart-healthy and diabetic texts, in order to encourage participants to monitor weight, control blood sugar, reduce risk of heart disease and manage type 1 and 2 diabetes. Graded Pass/Fail. Special fees apply. (0.5+3)
CULINARY ARTS AND HOSPITALITY (CAH)

CAH F177 Understanding Brewing and Fermentation
1 Credit
The student will receive an introduction to the history, science and process of brewing. Focus will be on the importance of sanitation for the home brewery, brewing traditional styles with an introduction to specialty brews. Attention will be given to the pairing of beer styles to food. Graded Pass/Fail. Special fees apply. Prerequisites: Students must be 21 years of age to enroll. (0.5+1)

CAH F178 Intermediate Brewing and Fermentation
1 Credit
Emphasis in brewing will focus on the use of adjuncts and their specific purposes. The effects they have on the brewing/fermentation process will be paramount. Focus will be on the more advanced style of brewing called partial mash. We may, time and weather permitting, brew a batch from grain. All brews done in this class will make use of adjuncts and/or grains. Graded Pass/Fail. Special fees apply. Prerequisites: CAH F177; student must be 21 years of age to enroll. (0.5+1)

CAH F180 Artisan Breads
2 Credits
Offered Fall
Learn the fundamentals of bread making. Take simple ingredients and transform them into handcrafted fresh-baked bread. Learn how to mix, ferment, proof, and bake like a skilled artisan baker. Explore the world of breads starting with crusty French baguettes to sourdough, ciabatta, focaccia, multigrain and much more. Special fees apply. (0.5+3)

CAH F199 Culinary Arts Externship
2 Credits
Offered Fall
The student will complete a 240 hour externship. Student will begin to apply their education within the industry providing genuine experience that reflects the student's career goals. The student will study in an approved externship experience within the industry. Enrollment in this class will be after completing the 2nd, 3rd or 4th semester. Prerequisites: Departmental approval required. (0+0+18)

CAH F230 Menu Planning
1 Credit
The importance of the menu in various food operations. The menu is considered to be the controlling factor in both commercial and noncommercial food service operations. Using a menu as a management tool in every area of the operation from planning the facility, purchasing food items, promoting items to customers and providing excellent service to help ensure success. The student will plan and write a variety of menus. Recommended: CAH F140; CAH F146; CAH F150. (1+0)

CAH F242 Culinary III — Vegetables and Starch
4 Credits
Students study and apply cooking methods of scratch cookery through small batch assignments. Areas of study include rice and grains, potato products, wheat based products to include pastas, dumplings, beans and soy products, fruits, vegetables, salads, center-of-the plate items and sandwiches. Students will continually be given the opportunity to express themselves through the art of plate presentation and garnishing. Special fees apply. Prerequisites: CAH F140. (1+6)

CAH F243 Culinary IV — A la Carte Cookery
4 Credits
Study focuses on the preparation of food items for service in a guest-centered a la carte environment. Students will work in a la carte stations to include salads, broiler, saute, expediter, and tournant. Line cooking skills for fine dining as well as time budgeting and management will be emphasized. Students will gain proficiency in the areas of kitchen sense, mise en place, and hustle. An increased focus on the concepts of food presentation is emphasized. Projects include menu design, research and design of dishes to include plate presentation. Students plan and prepare up-scale theme menus. Special fees apply. Prerequisites: CAH F141, CAH F175, CAH F242 or permission of instructor. (1+6)

CAH F248 Intermediate Baking and Pastry
4 Credits
This course is designed to give the student an overall appreciation and increased understanding of bread and fine pastry. Students will learn to effectively produce a variety of specialty dough, pastries, and desserts such as flans, tarts, individual and miniature pastries, souffles, chocolates, plated desserts, ice cream and sugar work, tortes and mousse tortes. Special fees apply. Prerequisites: CAH F146, CAH F150 or permission of instructor. (1+6)

CAH F250 Garde Manger
4 Credits
Students study traditional upscale pantry preparation. Students practice techniques for artistic displays of hors d’oeuvres, canape’, paté’, terrines and charcuterie. The student gains practical experience preparing and serving theme buffets for guests. Special fees apply. Prerequisites: CAH F141, CAH F175, CAH F242. (1+6)

CAH F253 Storeroom Purchasing and Receiving
2 Credits
Purchasing and receiving methods and specifications in a variety of food operations are covered in this course. Students will gain exposure to purchasing specifications for a variety of foods, using general purchasing methods, requirements, procedures and ethics. (2+0)

CAH F255 Human Resource and Supervision in Hospitality
3 Credits
Approaches for effective culinary or hospitality supervision are considered in this course. Methods of recruiting, selecting, training, and evaluating personnel are covered. Team building and conflict management concepts are examined. Skills in communication, empowerment and planning are introduced. This course fulfills a requirement of certification with the American Culinary Federation. (3+0)

CAH F256 Restaurant and Hospitality Cost Management
2 Credits
A course designed to relate principles of calculation to the food service industry. Recipe computations, food cost estimates, cash procedures, and payroll practices are studied. Practices for controlling portions, inventories and costs are explored as they affect business operations. Prerequisites: CAH F101. (2+0)

CAH F257 Introduction to Wine Appreciation
1 Credit
This is a foundation wine course with a focus on learning systematic professional tasting techniques, identifying the classic grape varietals, understanding the characteristics of wine, learning the language of wine, and beginning to identify how to pair wine with food. Proper service techniques and how to navigate an extensive wine list will also be explored. Graded Pass/Fail. Special fees apply. Prerequisites: Students must be at least 21 years of age to enroll. (0.5+1)

CAH F258 Intermediate Wine Appreciation
1 Credit
This course will focus on the study of wine from around the world with an emphasis on the similarities and differences of those regions. Consideration will be given to the influence of climate, topography, and culture along with many other factors that affect the grapes. A goal will be to identify the varietals through focused blind tastings. Focus will be on preparing the new sommelier with special attention given to selecting wines with integrity for a cellar. Costing and inventory controls will also be covered. Graded Pass/Fail. Special fees apply. Prerequisites: CAH F257 or permission of the instructor. Must be 21 years of age to enroll. (0.5+1)
# DENTAL ASSISTING

<th>Course Title</th>
<th>Credits</th>
<th>Offered Term</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>DA F132</td>
<td>Administrative Procedures for the Dental Assistant</td>
<td>2</td>
<td>Fall</td>
<td>Administrative responsibilities performed by dental assistants in dental facilities. Includes duties of the office assistant, receptionist or secretary, and insurance coordinator. Focus on reception, telephone procedures, scheduling, public relations, insurance and professionalism. Prerequisites: High school graduation, GED, or permission of instructor. (2+0)</td>
</tr>
<tr>
<td>DA F150</td>
<td>Dental Radiography</td>
<td>4</td>
<td></td>
<td>The study of film and digital radiographic techniques in the dental practice. Introduces student to radiographic anatomy and radiation physics. Includes safety in exposing, processing and mounting dental radiographs. Presents hazardous materials handling, equipment operation and maintenance. Prepares students for the Dental Assisting National Board’s radiology health and safety examination. Special fees apply. (3+2)</td>
</tr>
<tr>
<td>DA F151</td>
<td>Dental Infection Control</td>
<td>2</td>
<td></td>
<td>Principles and practices of infection control in the dental office. Includes knowledge of disease, microbiology, transmission prevention and methods of compliance with OSHA and CDC regulations. Prepares students for the Dental Assisting National Boards infection control examination. (2+0)</td>
</tr>
<tr>
<td>DA F152</td>
<td>Dental Materials and Applications</td>
<td>4</td>
<td></td>
<td>Physical and chemical properties of restorative dental materials and the application of those materials. Includes properties and manipulation of gypsum material, impression materials and custom trays, basic crown and bridge procedures. Special fees apply. Prerequisites: DA F151 or may be taken concurrently. (2+4)</td>
</tr>
<tr>
<td>DA F153</td>
<td>Anatomy for Dental Assistants</td>
<td>3</td>
<td></td>
<td>Study of anatomy as it applies to the field of dental assisting. Includes basic body systems and an in-depth examination of dental embryology, histology, morphology and head/neck anatomy. (3+0)</td>
</tr>
<tr>
<td>DA F251</td>
<td>Clinical Chairside I for Dental Assistants</td>
<td>6</td>
<td></td>
<td>Introduction to dental assisting. Beginning skills necessary to function as a chairside dental assistant in a general dentistry practice. Emphasis on developing clinical skills in four-handed dentistry techniques. Special fees apply. Prerequisites: Permission of program coordinator. (3+6)</td>
</tr>
<tr>
<td>DA F252</td>
<td>Clinical Chairside II for Dental Assistants</td>
<td>6</td>
<td></td>
<td>Emphasizes advanced dental assisting skills necessary in general dentistry. Includes taking impressions for study models, radiography, matrix assembly, rubber dam application, assisting with the administration of local anesthetics, temporary crowns, oral health and nutrition. Includes introduction to specialty practices. Special fees apply. Prerequisites: DA F251. (3+6)</td>
</tr>
<tr>
<td>DA F253</td>
<td>Clinical Chairside III for Dental Assistants</td>
<td>3</td>
<td></td>
<td>Continued learning in the dental specialties including prosthodontics, endodontics, periodontics, pedodontics, orthodontics, and oral and maxillofacial surgery. Special fees apply. Prerequisites: DA F251; DA F252; permission of program coordinator. (2+2)</td>
</tr>
<tr>
<td>DA F254</td>
<td>Dental Assistant Practicum</td>
<td>4</td>
<td></td>
<td>Clinical, off-campus course for dental assisting students. Placement in general and specialty dental offices under direct supervision by participating dentist and program faculty. Includes seminars to discuss progress and experiences. Graded Pass/Fail. Prerequisites: DA F132; DA F150; DA F152; DA F153; DA F251; DA F252; DA F253; enrollment by special permission only. (1+0+20)</td>

<tr>
<td>DH F111</td>
<td>Dental Anatomy, Embryology and Histology</td>
<td>2</td>
<td>Fall</td>
<td>Introduction to embryology and histology of the periodontal tissues. Includes discussion of dental accretions and cariology. Special fees apply. Prerequisites: Admission to the dental hygiene program or permission of department. (2+0)</td>
</tr>
<tr>
<td>DH F112</td>
<td>Techniques I for Dental Hygienists</td>
<td>7</td>
<td>Fall</td>
<td>A pre-clinical course introducing the basic dental hygiene procedures including data gathering, patient education and basic instrumentation. Emphasis is placed on skill development in basic instrumentation and infection control. Special fees apply. Prerequisites: Admission to the dental hygiene program. (3+8)</td>
</tr>
<tr>
<td>DH F114</td>
<td>Anatomy of the Orofacial Structures</td>
<td>2</td>
<td>Fall</td>
<td>Provides students with knowledge to perform technical skills within the oral cavity, especially those relating to dental screening and record-taking. Special fees apply. Prerequisites: Permission of department. (2+0)</td>
</tr>
<tr>
<td>DH F121</td>
<td>Periodontics I</td>
<td>2</td>
<td></td>
<td>Introduction to periodontal disease. Emphasis is placed on recognition of periodontal disease and treatment planning. Prerequisites: Admission to the dental hygiene program. (2+0)</td>
</tr>
<tr>
<td>DH F122</td>
<td>Techniques II for Dental Hygienists</td>
<td>4</td>
<td>Spring</td>
<td>Introduces adjunctive techniques used in dental hygiene treatment. Basic manipulation of dental materials. Emphasis is placed on care of materials and restorations that are encountered intra-orally during dental hygiene treatment. Radiology lab provides opportunity to develop competence in exposing radiographs on patients under direct faculty supervision. Special fees apply. Prerequisites: Admission to the dental hygiene program. (2+4)</td>
</tr>
<tr>
<td>DH F165</td>
<td>Introduction to Dental Pharmacology</td>
<td>2</td>
<td>Fall</td>
<td>Introduction to general concepts of pharmacology, the nature of drug reactions, individual responses to drugs, principles of neuropharmacology, toxicology, anti-infective therapy, effect of drugs on cardiovascular, endocrine and other body systems. Emphasis is placed on drugs used in dentistry. Prerequisites: Permission of department. (2+0)</td>
</tr>
<tr>
<td>DH F181</td>
<td>Clinical Practicum I</td>
<td>4</td>
<td>Spring</td>
<td>Provides opportunity for the student to achieve clinical skill competency with individuals presenting themselves as periodontally healthy or with signs of gingivitis. Special fees apply. Prerequisites: Admission to the dental hygiene program. (0+0+12)</td>
</tr>
<tr>
<td>DH F182</td>
<td>Clinical Seminar I</td>
<td>1</td>
<td>Spring</td>
<td>Discussion and evaluation of clinical experiences encountered in DH F181. Emphasis is placed on review of treatment plans and case presentation. Introduces ethical and legal concerns of the dental hygiene profession. Guest speakers, patient management and teamwork are emphasized. Prerequisites: Admission to the dental hygiene program. (1+0)</td>
</tr>
<tr>
<td>DH F211</td>
<td>Periodontics II</td>
<td>2</td>
<td>Fall</td>
<td>Develops familiarity with current non-surgical and surgical techniques in the treatment of periodontal disease. Nutrition and immunology as it relates to periodontal diseases are discussed. Case presentations are made by students. Prerequisites: Completion of all F100-level dental hygiene classes with a C- grade or better. (2+0)</td>
</tr>

### DENTAL HYGIENE (DH) — DEVELOPMENTAL MATHEMATICS (DEVM)

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
<th>Offered</th>
<th>Description</th>
</tr>
</thead>
</table>
| DH F212 | Techniques III for Dental Hygienists | 3 | Fall | Advanced dental hygiene instruments and intra-oral techniques. Provides for discussion of patients with special needs. Special fees apply. *Prerequisites: Completion of all F100-level dental hygiene classes with a C- grade or better.* (1-4)

| DH F214 | Pathology of Oral Tissues | 2 | Fall | Includes the signs, symptoms, contagion recognition of selected diseases of the oral cavity and systemic diseases that manifest themselves in the oral cavity. *Prerequisites: Completion of all F100-level dental hygiene classes with a C- grade or better; or permission of department.* (2+0)

| DH F224 | Principles of Dental Health | 3 | Spring | Provides a broad understanding of community dental health and dental epidemiology. Students develop and implement a basic community dental health project. *Prerequisites: Completion of all F100-level dental hygiene classes with a C- grade or better.* (2+0+3)

| DH F283 | Clinical Practicum II | 5 | Fall | Provides opportunity to achieve clinical skill competency with individuals presenting themselves with mild to moderate periodontal disease. Conducted in a clinical setting with volunteer patients and individualized instruction. Special fees apply. *Prerequisites: Completion of all F100-level dental hygiene classes with a C- grade or better.* (0+0+15)

| DH F284 | Clinical Seminar II | 1 | Fall | Discussion and evaluation of clinical experiences encountered in DH F283. Emphasis is placed on review of treatment plans and case presentations of patients exhibiting mild to moderate periodontal disease. *Prerequisites: Completion of all F100-level dental hygiene classes with a C- grade or better.* (2+0)

| DH F285 | Clinical Practicum III | 6 | Spring | Provides opportunity to achieve clinical skill competency with individuals presenting themselves with moderate to advanced periodontal disease. Learning occurs through student practice and individualized instruction. Special fees apply. *Prerequisites: Completion of all F100-level dental hygiene classes with a C- grade or better.* (0+0+18)

| DH F286 | Clinical Seminar III | 1 | Fall | Discussion and evaluation of clinical experiences encountered in DH F285. Emphasis is placed on review of treatment plans and case presentations of patients exhibiting mild to moderate periodontal disease. *Prerequisites: Completion of all F100-level dental hygiene classes with a C- grade or better.* (2+0)

| DH F310 | Oral Pain Control for Dental Hygienists | 3 | Fall | Examines pharmacology, armamentarium, anatomical and physiological consideration, administration techniques and potential complication of local anesthetic. Analyzes pharmacology, techniques, medical contraindications and management complications accompanying administration and monitoring of nitrous oxide. Special fees apply. *Prerequisites: Completion of all F100-level dental hygiene classes with a C- grade or better or current Alaska licensure in dental hygiene; permission of department; current certification in cardiopulmonary resuscitation.* (1.5+3)

### DEVELOPMENTAL ENGLISH

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
<th>Offered</th>
<th>Description</th>
</tr>
</thead>
</table>
| DEVE F060 | Preparatory College Writing I | 3 | | Intensive basic work in the process of writing and revising paragraphs and short academic papers. Focus on basic sentence and paragraph structure, revision techniques, and basic critical reading in the academic context. Special fees apply. *Prerequisites: Appropriate placement test scores.* (3+0)

| DEVE F068 | College Writing Skills | 1–3 | | Individualized instruction in written skills. Open entry/open exit, one credit modules in spelling/vocabulary, writing and grammar usage. Enrollment in one or more modules based on diagnosed need or student decision; may be repeated. Does not fulfill degree requirements in written communications or humanities. Graded Pass/Fail. (1-3+0)

| DEVE F104 | Preparatory College Writing II | 3 | | Intensive intermediate work in the process of writing and revising short academic papers. Focus on complex sentence and paragraph structure, major revision techniques, and critical reading in the academic context. Preparation for DEVE F109 and ENGL F111X. Special fees apply. *Prerequisites: C or better in DEVE F060/DEVS F052 or appropriate placement test scores.* (3+0)

| DEVE F109 | Preparatory College Writing III | 3 | | Intensive preparatory work in the college writing skills needed for ENGL F111X, including research, writing and revising, and critical reading skills. Special fees apply. *Prerequisites: C or better in DEVE F104/ DEVS F105 or appropriate placement test scores.* (3+0)

### DEVELOPMENTAL MATHEMATICS

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
<th>Offered</th>
<th>Description</th>
</tr>
</thead>
</table>
| DEVM F050 | Prealgebra | 3 | | Operations with whole numbers, fractions, decimals, percents and ratios, signed numbers, evaluation of algebraic expressions and evaluation of simple formula. Metric measurement system and geometric figures. Special fees apply. *Prerequisites: Appropriate placement test scores.* (3+0)

| DEVM F051 | Math Skills Review | 1 | | Offered As Demand Warrants Develops and reviews basic mathematical terminology, theory and operations as outlined by the Alaska State Mathematics Standards. Mathematics topics focus on reviewing the six basic “strands” of mathematical content: numeration, measurement, estimation and computation, function and relationship, geometry, and statistics and probability. Approaches to problem solving will emphasize the process of mathematical thinking, communication and reasoning. It is an appropriate course for those preparing for the High School Qualifying Exam in Alaska or those needing a review of basic math skills in preparation for a math placement test at UAF. May be repeated for a total of three credits. Graded Pass/Fail. (1+0)

| DEVM F056 | Math Fast Track: Prealgebra/Elementary Algebra Review | 1 | | Offered 3 times per year: Augustmester, Wintermester, Maymester A 20-hour intensive review of math concepts offered prior to each semester. Covers prealgebra and elementary algebra topics to prepare qualified students to potentially improve their math course placement. Students should have a history of being successful in equivalent levels of math, although they may not recall enough information to place well on the placement test. Students who are successful in this class have the possibility of advancing through one or two semesters of development math. Graded Pass/Fail. *Prerequisites: Placement into DEVM F050 or DEVM F060.* (1+0)

COURSES

310  Course Descriptions

2014-2015 CATALOG
Course Descriptions 311

DEVM F060  Elementary Algebra
3 Credits
First year high school algebra. Evaluating and simplifying algebraic expressions, solving first degree equations and inequalities, integer exponents, polynomials, factoring, rational expressions, equations and graphs of lines. Special fees apply. Prerequisites: Grade of C- or better in DEV M F050; or ABUS F155; or appropriate placement test scores. Prerequisite courses and/or placement exams must be taken within one calendar year prior to commencement of the course. (3+0)

DEVM F061  Review of Elementary Algebra
1 Credit
Designed to assist students in reviewing material covered by DEV M F060. Individuals who have not previously taken an elementary algebra course are recommended to enroll in DEV M F060. Available via eLearning and Distance Education only. (1+0)

DEVM F062  Alternative Approaches to Math: Elementary Algebra
3 Credits
Algebraic topics. Includes operations with polynomial expressions, first- and second-degree equations, graphing, integral and relational exponents, and radicals using alternative teaching styles. Prerequisites: Grade of C- or better in DEV M F050; or ABUS F155; or appropriate placement test scores. Prerequisite courses and/or placement exams must be taken within one calendar year prior to commencement of the course. (3+0)

DEVM F065  Mathematics Skills
1–3 Credits
Designed to assist students in reviewing and reinforcing course concepts covered by DEV M F050, DEV M F060, DEV M F062, DEV M F105 and DEV M F106. Consists of instruction which may include lab instruction, individual student work or group work. May be repeated. Recommended for students who need more time and help to master the material in Developmental Math courses. (1-3+0)

DEVM F066  Advanced Math Fast Track: Elementary/Intermediate Algebra Review
1 Credit
Offered 3 times per year: Augustmester, Wintermester, Maymester
A 20-hour intensive review of math concepts offered prior to each semester. Covers elementary and intermediate algebra topics to prepare qualified students to potentially improve their math course placement. Students should have a history of being successful in equivalent levels of math, although they may not recall enough information to place well on the placement test. Students who are successful in this class have the possibility of advancing through one or two semesters of development math. Graded Pass/Fail. Prerequisites: Placement into DEV M F060 or DEV M F105 or DEV M F106. (1+0)

DEVM F071  Review of Intermediate Algebra
1 Credit
Course reviews material covered by DEV M F105. Individuals who have not taken an intermediate algebra course on the high-school level are recommended to enroll in DEV M F105. Available via eLearning and Distance Education only. (1+0)

DEVM F094D  Modularized Mastery Math: Elementary Algebra
1 Credit
Offered Fall and Spring
This course covers one credit of the DEV M F060 Elementary Algebra course and includes the following topics: simplifying algebraic expressions, solving linear equations in one variable, solving linear and compound inequalities in one variable, applications of linear equations, and solving formulas. A modularized, mastery learning approach is used with computers. Prerequisites: Grade of B or better in DEV M F050; or ABUS F155; or appropriate placement test scores. Prerequisite courses and/or placement exams must be taken within one calendar year; permission of instructor also required. (3+0)

DEVM F094E  Modularized Mastery Math: Elementary Algebra
Module E
1 Credit
Offered Fall and Spring
This course covers one credit of the DEV M F060 Elementary Algebra course and includes the following topics: linear equations in two variables, graphing linear equations, finding the slope of linear equations, writing equations of lines, exponent rules, and operations and polynomials. A modularized mastery learning approach is used with computers. Prerequisites: Grade of B or better in DEV M F094D taken within one calendar year; permission of instructor also required. (3+0)

DEVM F094F  Modularized Mastery Math: Elementary Algebra
Module F
1 Credit
Offered Fall and Spring
This course covers one credit of the DEV M F060 Elementary Algebra course and includes the following topics: factoring polynomials, solving quadratic equations by factoring, simplifying rational expressions, operations with rational expressions, complex fractions, solving rational equations, and applications of quadratic and rational equations. A modularized, mastery learning approach is used with computers. Prerequisites: Grade of B or better in DEV M F094E taken within one calendar year; permission of instructor also required. (3+0)

DEVM F105  Intermediate Algebra
3 Credits
Second year high school algebra. Operations with rational expressions, radicals, rational exponents, logarithms, inequalities, quadratic equations, linear systems, functions, Cartesian coordinate system and graphing. To matriculate to MATH F107X from DEV M F105 a grade of B or higher is required. Special fees apply. Prerequisites: Grade of C- or better in DEV M F060; or DEV M F062; or appropriate placement test scores. Prerequisite courses and/or placement exams must be taken within one calendar year prior to commencement of the course. (3+0)

DEVM F106  Intensive Intermediate Algebra
4 Credits
Algebraic topics. Includes exponents, radicals, graphing, systems of equations, quadratic equations and inequalities, logarithms and exponentials, and complex numbers using alternative teaching styles. Note: This course satisfies elective credit only. Special fees apply. Prerequisites: Grade of C- or better in DEV M F060; or DEV M F062; or appropriate placement test scores. Prerequisite courses and/or placement exams must be taken within one calendar year prior to commencement of the course. (4+0)

DEVM F194G  Modularized Mastery Math: Intermediate Algebra
Module G
1 Credit
Offered Fall and Spring
This course covers one credit of the DEV M F105 Intermediate Algebra course and includes the following topics: solving systems of equations and applications, simplifying radicals and expressions with rational exponents, performing operations on radical expressions, solving radical equations, and performing operations on complex numbers. A modularized, mastery learning approach is used with computers. Prerequisites: Grade of B or better in DEV M F105; or DEV M F106; or appropriate placement test scores. Prerequisite courses and/or placement exams must be taken within one calendar year prior to commencement of the courses. (1+0)

DEVM F194H  Modularized Mastery Math: Intermediate Algebra
Module H
1 Credit
Offered Fall and Spring
This course covers one credit of the DEV M F105 Intermediate Algebra course and includes the following topics: review of solving quadratic equations by factoring, solving quadratic equations that are not factorable, relations and functions, graphs and transformations of functions, quadratic functions and their graphs, performing operations on functions, composition of functions, and applications of quadratic equations and functions. A modularized, mastery learning approach is used with computers. Prerequisites: Grade of B or better in DEV M F194G taken within one calendar year; and instructor permission. (1+0)
DEVM F194J  Modularized Mastery Math: Intermediate Algebra Module J 1 Credit  Offered Fall and Spring
This course covers one credit of the DEVM F105 Intermediate Algebra course and includes the following topics: solving absolute value equations and inequalities, solving linear and compound linear inequalities, solving quadratic and rational inequalities, inverse functions, exponential functions, logarithmic functions, properties of logarithms, and solving exponential and logarithmic equations. A modularized, mastery learning approach is used with computers. Prerequisites: Grade of B or better in DEVM F194H taken within one calendar year; and instructor permission. (1+0)

DEVELOPMENTAL STUDIES

DEVS F052  Reading Enhancement 3 Credits
Intensive instruction in reading designed to increase vocabulary and comprehension skills necessary for successful reading in the content areas of college courses. Focus is on improved reading comprehension and vocabulary development. Special fees apply. Prerequisites: Appropriate placement test scores. (3+0)

DEVS F058  Reading Skills 1–3 Credits  Offered As Demand Warrants
Course emphasis is on improving reading comprehension using texts and other materials. Focus is on paragraph structure to recognize main idea, supporting details and author’s purpose. Study techniques for recognizing new vocabulary. Small groups allow individually designed course of instruction to meet the needs of the students. May be repeated. Graded Pass/Fail. Prerequisites: Placement or permission of instructor. (1+0)

DEVS F100  Introduction to Science 4 Credits
Introduction to skills needed to succeed in core science courses. Topics include scientific terminology, scientific mathematical notation, and the fundamentals of chemistry, physics and biology. Includes basic scientific lab techniques and the skills needed to learn scientific material. Prerequisites: Elementary algebra and college reading level. (3+3)

DEVS F101  Skills for College and Career Success 3 Credits
A diverse menu of study skills for the student entering the college environment. Skills include active listening, effective reading, taking usable notes, test taking, communication, time and money management. Students learn personal development skills that assist in addressing intrusive issues that impact the learning process, increasing self-esteem, and relating these skills to the classroom and later to a career. Class sessions offer diverse learning experiences. (3+0)

DEVS F102  Introduction to Distance Education 1–3 Credits  Offered As Demand Warrants
A diverse menu of study skills for the student entering the distant learning college environment. Skills include: active listening, effective reading, taking usable notes, test preparation and test taking strategies, communication, and the use of technology as a study resource, all in the distance learning context. Additionally, personal development elements such as time management, working with university representatives, and accessing local resources will provide skills to maximize the learning experience and address the intrusive issues that impact the learning process. (1-3+0)

DEVS F104  University Communications 1–3 Credits  Offered As Demand Warrants
Introduces the unique methods of communication required at the college level, including combinations of reading, writing and oral communication as required for degree content purposes for certificate degree programs. May link with selected lecture and/or discussion courses. May be repeated for credit when content varies. Note: Does not meet prerequisite requirements for ENGL F111X without further placement testing. Recommended: Placement into DEVE F104/DEVS F105. (1+3+0)

DEVS F105  Academic Reading for College 3 Credits
Strengthens academic and critical reading and literacy skills required for college-level courses. Emphasizes practice and transfer of reading and study skills that increase comprehension and retention of narrative and expository materials typically encountered in college courses, e.g. textbooks, websites, research articles, etc. Special fees apply. Prerequisites: Core better in DEVE F060/DEVS F052 or appropriate placement test scores. (3+0)

DEVS F107  Reader-Writer Workshop 3 Credits  Offered As Demand Warrants
A reader-writer workshop to develop fluency in reading and writing skills for persons whose first language is not English. Intensive speaking, listening, reading and writing activities. Prerequisites: Placement by examination or student decision. (3+0)

DEVS F108  Study Skills Lab 1 Credit  Offered As Demand Warrants
Improvement of study skills in areas of greatest need on an individual or small group basis in the lab or other workshop or individualized format. Topics include time and stress management, listening/note taking, library research and memory. Course may be repeated for credit when content varies. (1+0)

DEVS F110  College Success Skills 1 Credit
An introduction and overview of the diverse skills, strategies and resources available to ensure success in the college experience. Topics include study skills, time management, career planning, stress management, communication skills, test taking and personal development skills. Graded Pass/Fail. (1+0)

DEVS F111  Reading in the Mathematical Sciences 1 Credit
Will improve reading skills in math and will support students in their math class. Will provide a supplement instruction time focusing on the introduction and/or development of reading skills that will aid in solving math problems and understanding and retaining the math information delivered in the class. This course will be linked to a math course. Graded Pass/Fail. (1+0)

DEVS F112  Reading in the Natural Sciences 1 Credit
Will improve student success in their current and future natural science classes. Will provide a supplement instructional time focusing on introducing and/or developing reading skills that will aid in reading, understanding, and retaining science information delivered in the natural science lecture and lab. Skills emphasized will include identifying, organizing and prioritizing topic, main idea, and details, note taking, and using effective reading to improve test performance. Must be linked to freshman level science class. Graded Pass/Fail. (1+0)

DEVS F114  Reading in the Humanities/Social Sciences 1 Credit  Offered Fall
Introduction and application of effective reading strategies for increased comprehension and retention of course content delivered via written formats, e.g., textbooks, articles, web pages, etc. Graded Pass/Fail. Co-requisite: Core humanities/social science course. (1+0)

DEVS F150  Life Work Planning 1 Credit
Planning for a satisfying career choice based on realistic assessment of self, accurate knowledge of the world of work and experience with ways to activate career plans. Enables students to evaluate potential careers and to make educational and job search plans. Graded Pass/Fail. (1+0)
DEVS F160  The Resume: Key to Success  
1 Credit  
Use the resume writing process to develop job seeking skills: locating the hidden market; researching job potential; learning to fill out effective applications; designing and printing a custom resume; assembling a portfolio; and developing effective interview skills. Recommended: DEVS F150. (1+0)

DEVS F185  Straight Thinking  
3 Credits  
Offered As Demand Warrants  
A study of inductive, deductive and seductive thinking, and skill building to recognize and use all three. Critical thinking skills to analyze newspaper, magazine and spoken arguments. Political speeches and other media presentations examined. Effective and convincing presentation of one's own ideas including formal and informal logic. (3+0)

DIESEL TECHNOLOGY

DSLT F101  Safety Including Rigging and Lifting  
1 Credit  
Offered Fall  
Materials covered will be the importance of and proper use of personal protective gear and air ventilation systems; how to identify harmful chemicals in a shop atmosphere and how to use them in a safe manner; the importance of identifying the weight of an item before lifting with lifting equipment or by hand, and proper lifting procedures of heavy items when using a lifting device. Special fees apply. (1+0)

DSLT F103  Basic Equipment and Truck Operation  
1 Credit  
Offered Fall  
Basic operation of heavy equipment and diesel trucks to include: stating, clutching, braking, and steering procedures. Basic forklift operation to include: lifting weight, calculation and point of balance of machine versus lifting load. Special fees apply. (0.5+1.5)

DSLT F105  Preventive Maintenance  
3 Credits  
Offered Fall  
Perform scheduled preventive maintenance on vehicles and heavy equipment. Gain knowledge of lubricants, filters, lubrication points and proper fluid levels and understanding of what to look for when performing a visual inspection. Special fees apply. Prerequisites: DSLT F101; DSLT F103. (1.5+3)

DSLT F107  Basic Electrical Systems and Electronic Fuel Injection  
3 Credits  
Offered Fall  
DC voltage and amperage, fuses, circuit breakers, relays and junction boxes will be covered along with an understanding of wiring schematics and identification of and repair of lighting. Special fees apply. (1.5+3)

DSLT F110  Basic Industrial Fabrication  
2 Credits  
Offered Fall  
Students will learn the concepts of industrial fabrication. When working with heavy equipment, things can break. This class will teach the basics of how to fabricate and repair heavy equipment in and out of the field using various techniques. Special fees apply. Prerequisite: Department or Instructor approval required. (1+2)

DSLT F111  Diesel Emissions  
2 Credits  
Offered Spring  
Students will learn the concepts of diesel engine emissions and how diesel emissions significantly contribute to air pollution. Knowledge of how to create cleaner running diesel engines, promote pollution-control technology, prevent unnecessary idling, and ultimately, make that puff of smoke that can come from these engines an image of the past. We will study and practice the actions taken to reduce diesel emissions using measuring devices, learn the terms and technologies of catalytic converters, particulate filters, the use diesel exhaust fluid, and be able to troubleshoot emission components. Special fees apply. Prerequisite: Department or Instructor approval required. (1+2)

DSLT F123  Heavy Duty Braking Systems  
3 Credits  
Offered As Demand Warrants  
Braking systems for commercial trucks and heavy equipment applications; compressor testing and overhaul, relay valves, actuators, wear limits, acceptable tolerances, brake lining replacement, government regulations and pneumatic controls; evolving technologies such as anti-lock brakes. Remove and replace brake shoes, drums, hardware, S-cams and air chambers. Includes the inspection, preventive maintenance and overhaul of a commercial truck or heavy equipment braking system. Special fees apply. Prerequisites: DSLT F101; DSLT F103. (1.5+3)

DSLT F154  Diesel Fuel Injection  
3 Credits  
Offered Fall  
Theory and functional operation of all common diesel fuel injection systems including those produced by modern Bosch, Mack, Cummins, Caterpillar and Detroit Diesel. Direct injection and pre-combustion fuel injection systems. Testing procedures, when testing high pressure diesel injection pumps and injectors as well as removing, installing and adjusting the most common systems used in the heavy truck and heavy equipment industry. Special fees apply. (2+2)

DSLT F201  Manual Transmissions and Differentials  
3 Credits  
Offered As Demand Warrants  
Theory, diagnosis and repair of manual transaxles and transmissions, transfer cases, differentials, clutch assemblies, power take off units, driveshafts and axles as well as removing and installing clutches, transmissions and differentials in a truck or piece of heavy equipment. Preventive maintenance and cold weather component problems will also be covered. Special fees apply. Prerequisites: DSLT F101; DSLT F103. (1+4)

DSLT F202  Heavy Duty Automatic Transmissions  
2 Credits  
Offered Spring  
Theory, operation and troubleshooting of heavy duty automatic transmissions; hydraulic, electrohydraulic, pneumatic and electronic controls. Prepares the student to overhaul Allison, ZF and similar automatic transmissions. Special fees apply. (1+3)

DSLT F210  Heavy Equipment Fabrication  
2 Credits  
Offered Spring  
Students will learn advanced concepts of industrial fabrication in the maintenance of heavy duty equipment, develop a strong understanding of metals and their applications, and have the ability to bend, heat, and apply welding techniques that will support heavy duty equipment for long term use. Special fees apply. Prerequisite: Department or Instructor approval is required. (1+2)

DSLT F254  Engine  
5 Credits  
Offered Fall  
Understanding the two cycle and four cycle diesel engine. Performing tune-ups, as well as disassembling and reassembling a modern diesel engine commonly found in the heavy truck or heavy equipment industry. Special fees apply. Prerequisites: DSLT F101; DSLT F103; DSLT F105; or permission of instructor. (2.5+5)

DRAFTING TECHNOLOGY

DRT F101  Introduction to Drafting  
3 Credits  
Offered As Demand Warrants  
Introduction to basic drafting skills necessary to communicate in the building, construction, design and process technology industries for freshman-level students and for certificate or associate degree-seeking students. Limited manual drafting techniques will be used to gain basic skills and to contrast the speed and accuracy to that of computer-aided drafting (CAD). Special fees apply. (2+2)
COURSES

DRAFTING TECHNOLOGY (DRT) — EARLY CHILDHOOD EDUCATION (ECE)

DRT F110  Computer Literacy for Technicians
3 Credits  Offered As Demand Warrants
Introduction to operating systems and their applications to technology. Emphasis will be placed on computer literacy for technology and industrial business applications relevant to technicians. Special fees apply. (2+2)

DRT F112  Introduction to GIS
3 Credits  Offered As Demand Warrants
Provides drafters with a general overview of what GIS is, who uses GIS, where GIS is used, and how GIS information is obtained and assimilated. There will be a section of practical use on one of the following systems: Manifold, Autodesk MAP, or Arch View. (3+0)

DRT F115  Graphics I
3 Credits  Offered As Demand Warrants
Study and application of methods, problems and solutions in graphic design using AutoCAD and Viz. (3+0)

DRT F121  Construction Documents and Drawings
3 Credits  Offered As Demand Warrants
Reading and interpretation of construction documents for residential, light commercial and heavy commercial structures using conventional symbols and representation. (3+0)

DRT F123  Uniform Building Code
3 Credits  Offered As Demand Warrants
Covers the minimum required construction standards of the Uniform Building Code. Use of local zoning ordinances and the UBC as comprehensive building guides and their principal aspects applied to various building types and trades. Concentrates on zoning, the UBC and some fire codes. Mechanical and electrical codes are introduced only for student familiarity. Recommended: Working knowledge of building systems. (3+0)

DRT F140  Architectural Drafting
3 Credits  Offered As Demand Warrants
Architectural drafting principles including site plans, foundations, floor plans, elevations, architectural sections, framing plans, area plans and graphic standards. Special fees apply. (2+2)

DRT F141  Architectural Concepts
2 Credits  Offered As Demand Warrants
Architectural drafting concepts including basic site plans, foundations, floor plans, elevations, architectural sections, framing plans, area plans and graphic standards. Also available eLearning and Distance Education. (2+0)

DRT F145  Structural Drafting
3 Credits  Offered Fall
Introduces technical skills needed by structural drafters and technicians to work with structural engineers. Includes office practices, staff relationships, and structural drafting production. Develops computer-aided drafting skills in symbols, conventions, dimensioning systems, sheet organizations, code analysis and research methods for steel, wood, and reinforced concrete buildings. Special fees apply. Prerequisites: DRT F170 or permission of program coordinator. (3+0)

DRT F150  Civil Drafting
3 Credits  Offered As Demand Warrants
Civil drafting principles including plotting traverse and surveys by bearing and distance, latitudes and departures, topographic drawings and maps, contours and elevations, profiles and highway curves, cross-section drawings and grading plans. Special fees apply. (2+2)

DRT F151  Civil Concepts
2 Credits  Offered As Demand Warrants
Overview of civil drafting concepts and survey drafting including the plotting of traverse and surveys by bearing and distance. (2+0)

DRT F155  Mechanical and Electrical Drafting
3 Credits  Offered As Demand Warrants
Introduces technical analysis, theory, code requirements, and CAD techniques to produce construction drawings for mechanical and electrical building systems. Includes drafting conventions, drawing symbols, terminology, and research methods for residential and commercial building systems and equipment. Special fees apply. Prerequisites: DRT F170 or permission of program coordinator. (3+0)

DRT F170  Beginning CAD
3 Credits  Offered As Demand Warrants
Instruction in basic working knowledge of CAD software and its applications in drafting. Topics covered include an introduction to CAD software applications, basic CAD skills and tools, through plotting finished drawings. Practical applications. Special fees apply. (2+2)

DRT F210  Intermediate CAD
3 Credits  Offered As Demand Warrants
Techniques for construction and drafting output using CAD. Emphasis will be on the construction drawings produced for a building project and the software tools used in this process. Special fees apply. Prerequisites: DRT F170 or enrolled as a CE Major or permission of the program coordinator. (2+2)

DRT F250  Civil Drafting II — Advanced
3 Credits  Offered As Demand Warrants
Techniques of highway design, boundaries, right of way layouts, curves and grades, culverts, signs and guard rails. Special fees apply. Prerequisites: DRT F150; DRT F171; or permission of program coordinator. (2+2)

DRT F260  Drafting Internship
1–6 Credits  Offered As Demand Warrants
Supervised work experience in process organizations. Assignments will be individually arranged with cooperating organizations from the private and public sectors. A maximum of 6 credits may be earned. Special fees apply. Prerequisites: Permission of program coordinator. (0+3-18)

DRT F270  Advanced CAD
3 Credits  Offered As Demand Warrants
Advanced areas of CAD (3-D, menu modifications and Auto lisp). Special fees apply. Prerequisites: DRT F170; DRT F210; or permission of program coordinator. (2+2)

EARLY CHILDHOOD EDUCATION

ECE F101  Introduction to Early Childhood Profession
3 Credits  Offered As Demand Warrants
Includes historical foundation, current issues and trends, exposure to a variety of developmentally appropriate programs, contemporary needs of children and families, the importance of being an advocate, professional standards and career opportunities, introduction to NAEYC and the code of ethical conduct. (2.75+0.5)

ECE F102  Essentials of Parenting
3 Credits  Offered As Demand Warrants
An introductory course to help new parents with basic information and skills needed to care for young children. Includes basics of child development, infant care and relationship-building, nutrition and budgeting. May be offered through the high schools with a tech-prep agreement and applied to the early childhood degree programs as elective credit. (3+0)

ECE F104  Child Development I: Prenatal, Infants and Toddlers (s)
3 Credits  Offered As Demand Warrants
Foundation in child development prenatal to age 3. Includes anticipating the emerging development during the rapid growth of these critical years. Focuses on domains, theories, cultural perspectives and multiple influences on development, with an emphasis on prenatal development, healthy childbirth, the importance of relationships, and meaningful environments. Includes observation, reflection, early intervention and labs. (2.5+1)
ECE F105  Developmentally Appropriate Practice
1 Credit
Introduction to developmentally and culturally appropriate teaching practice in early childhood settings. Topics include basic verbal skills, inclusion, the teaching process, organizing a class, lesson planning and curriculum development. Note: Successful completion of this course is required prior to enrollment in any of the ECE activity classes. (0.75+0.5)

ECE F106  SEED Level I (Alaska System for Early Education Development)
1 Credit
Offered As Demand Warrants
An entry level overview of the Alaska System for Early Education Development (SEED). Through class instruction and guided self-study, students explore the basics of an early childhood career path. Graded Pass/Fail. (1+0)

ECE F107  Child Development II: The Preschool and Primary Years (s)
3 Credits
Foundation in development for the study of children ages 3-8, including developmental domains, theories, milestones and cultural influences, including indigenous and traditional practices. The emphasis is on helping students use their knowledge of child development to predict and promote optimal growth in children. Practical experiences, such as observations and laboratory participation, will be included. Recommended: ECE F104. (2.5+1)

ECE F110  Safe, Healthy, Learning Environments
3 Credits
Establishing and maintaining safe, healthy and inclusive environments for children ages 0-8. Emphasis is on environments that are developmentally and culturally appropriate and encourage play, exploration and learning. Topics include common illnesses, preventative health care, safety aspects in indoor and outdoor settings as well as on field trips. Laws and regulations relative to course content are included. Lab required. (2.5+1)

ECE F111  Nutrition for Young Children
1 Credit
Appropriate ways to meet the nutritional needs of infants and young children, including laws, regulations and appropriate practices relative to food handling service. (1+0)

ECE F112  Healthy Environments for Young Children
1 Credit
Establishing and maintaining a physically and psychologically safe environment for children, including common illnesses, preventative health care and Alaska laws and regulations relating to the health of young children. (1+0)

ECE F113  Safe Environments for Young Children
1 Credit
Establishing and maintaining a physically and psychologically safe environment for children, including safety aspects of caring for young children and Alaska laws and regulations relating to safety. (1+0)

ECE F114  Learning Environments
1 Credit
Space, relationships, materials and routines as resources for constructing interesting, secure and enjoyable environments that encourage play, exploration and learning. (1+0)

ECE F115  Responsive and Reflective Teaching
3 Credits
How to be ethical, responsive, productive, and well-informed practitioners in the field of early childhood. Emphasis on using traditional and local knowledge and values to inform practice, manage personnel and programs, and provide appropriate services and support to young children and their families. Includes the NAEYC Code of Ethics and NAEYC Standards. Use of observation to transform teaching and management practices. Lab required. This course is comparable to ECE F170. Students should take either ECE F115 or ECE F170 to meet the practicum and reflection requirement for the Certificate and AAS degree. Prerequisites: ECE F101; placement in ENGL F111X or higher. (2+2)

ECE F117  Math Skills for Early Childhood Educators
3 Credits
Offered Spring
Computation involving percentages, estimation, problem solving, reading and creating graphs and tables, data organization and interpretation. Emphasis on applications of computational skills. Cross-listed with HUMS F117. (3+0)

ECE F119  Curriculum I: Principles and Practices
3 Credits
Methods of creating and facilitating individually and culturally appropriate curriculum for young children. Establishing integrated, meaningful and relevant experiences applied to the area of language and literacy. Includes a balance of individual and small group experiences, child-centered curriculum and teacher-directed times, as well as transitions. Focus on emergent curriculum, active learning and play. The use of local materials and resources is incorporated. Labs required. (2+1)

ECE F121  Physical Activities for Young Children
1 Credit
Essentials of creating an environment which provides space, materials, equipment and activities to promote the physical development of children. (1+0)

ECE F122  Cognitive Activities for Young Children
1 Credit
Curriculum planning and facilitation of activities and experiences which encourage questioning, probing and problem-solving skills appropriate for different developmental levels and various learning styles of young children. (1+0)

ECE F123  Language and Literature Activities for Young Children
1 Credit
Curriculum planning and facilitation of activities that help children acquire and use language as a means of communicating their thoughts and feelings. Includes nonverbal communication and understanding of others. (1+0)

ECE F124  Creative Activities for Young Children
1 Credit
Curriculum planning and facilitation of activities which provide a variety of experiences and media that stimulate children to explore and express their creative ability. (1+0)

ECE F125  Math Activities
1 Credit
Overview of how children construct mathematical meanings. Introduction to mathematical learning principles and experiences for children, 3–8 years. (1+0)

ECE F126  Activities for School-Age Child Care
1 Credit
Offered As Demand Warrants
For child care staff who work in after-school and/or summer programs. Focus on daily activity schedules and appropriate, fun, challenging activities and projects for young school-age children. (1+0)

ECE F127  Language and Creative Expression
3 Credits
Culturally and developmentally appropriate curriculum to promote language and literacy, creativity, and physical development. Emphasis on emergent curriculum, active learning, play observation and creative expression methodologies. Understanding of emergent literacy in young children and how to promote children's development in pre-reading activities. Emphasizes incorporating indigenous knowledge, local materials, resources, elders, artists and parents in addressing language and creative expression development in young children. Lab required. Prerequisite: Placement in ENGL F111X or higher. (2+2)
ECE F130  Culture, Learning and the Young Child
2 Credits
Ways each child within a culture comes to know, accept and take pride in himself or herself. Maintaining a culturally appropriate, open, friendly and cooperative caring relationship with each child's family. (2+0)

ECE F132  Young Child and the Family
1 Credit
Introduction to the importance of a positive and productive relationship between families and the child development centers. Emphasis on using this relationship to coordinate child rearing efforts of both the family and the educator. (0.75+0.5)

ECE F135  Family Day Care Home Provider Training
1 Credit
Offered As Demand Warrants
Operation of safe, successful day care home or family day care program.
Overview of laws and regulations, business practices, parental concerns, health and safety, activities, space planning, snack and meal service, community support, and provider concerns. (1+0)

ECE F140  Positive Social and Emotional Development
3 Credits
Explores the importance of self-regulation, a strong self-concept and methods for helping children develop positive self-esteem. Focus on emotional intelligence, pro-social orientation, and social competence. Anti-bias curriculum is included. Techniques explored for working with groups of children birth–8 years old including social problem solving and developing skills for making friends. (2.5+1)

ECE F141  Class Management
1 Credit
Classroom management for teachers working with groups of children 3–8 years old. Explores skills needed to provide an environment in which children can begin to learn and practice appropriate and acceptable behaviors as individuals and as a group. Appropriate guidance including: setting limits, use of logical and natural consequences and helping children learn social problem solving, conflict resolution and negotiation. (1+0)

ECE F142  Social Development of the Young Child
1 Credit
Explores skills that help each child feel accepted in the group. Encourages communication empathy and mutual respect among children and adults. Emphasis on methods used to promote pro-social skills such as sharing, making friends, helping children learn social problem solving, conflict resolution and negotiation. (1+0)

ECE F143  Developing Positive Self-Concepts in Young Children
1 Credit
Explores the importance of a strong self-concept and methods for helping children develop positive self esteem. Emphasis on providing success-oriented activities, encouraging acceptance and expression of children’s feelings and developing pride as an individual and as a member of a cultural/ethnic group. (1+0)

ECE F170  Practicum I
3 Credits
A guided student teaching experience in working with a group of 0–8 year old children. Students apply skill in providing quality early care and education based on the knowledge of early childhood theories and approved practices. Assumes increasing responsibility for planning and lead teaching. Prerequisites: ECE F101; ECE F104; ECE F107; ECE F110; ECE F119; ECE F140; ECE F213; ECE F229; (0.5+0.5+1)

ECE F171  Program Management
1 Credit
The importance of coordination and communication among staff in the classroom. Emphasis on effective group planning, using resources, improving communication, sharing information about children, maintaining records, and establishing and following policies, rules and regulations. (1+0)

ECE F172  Professionalism
1 Credit
Awareness of one’s own personal qualities, feelings, and values that affect the teaching atmosphere; one’s relationships with children; one’s own teaching style. (1+0)

ECE F173  Reflective Teaching
1 Credit
Students will develop and expand their capacities to be self-reflective teachers. Promote skills to understand and reflect on early childhood principles, theories and their teaching practices in programs for young children birth to age eight. Prerequisites: ECE F101; ECE F104; ECE F107; ECE F110; ECE F119; ECE F140; ECE F213; ECE F229; (0+3.5)

ECE F210  Child Guidance
3 Credits
Guidance and discipline approaches for young children, based on an understanding of child development and of developmentally appropriate education practices. Such an understanding assists teachers and parents in addressing the cause of a behavior problem rather than the symptoms. Prerequisites: Placement in ENGL F111X or higher or permission of the program head. (3+0)

ECE F213  Curriculum: Thinking, Reasoning, and Discovery
3 Credits
Emphasizes culturally and developmentally appropriate curriculum and activities to advance the cognitive development of young children, with particular focus on science, math and creativity. Includes a variety of approaches to curriculum development, assessment and necessary skills for early childhood teachers. Lab required. Recommended: ECE F104, F110, and F119. (2.5+1)

ECE F214  Infants and Toddlers
3 Credits
Developmentally appropriate care and nurturance of infants and toddlers, with an emphasis on the importance of building relationships as the foundation of curriculum. Course will include segments which will prepare students to create, facilitate, and evaluate infant/toddler curriculum utilizing relationship-based practices, knowledge of child development, and routines. Includes activities to stimulate development and learning and support communication, guidance and health. Research-based techniques and cultural practices included. Weekly practice labs (14 hours) required. Prerequisites: ECE F104 or permission of program head. (2.5+1)

ECE F229  Foundations in Nutrition and Physical Wellness
3 Credits
Offered As Demand Warrants
Appropriate ways to meet the physical needs of infants and young children including nutrition, movement and exercise. Includes laws, regulations and appropriate practices in child nutrition as well as initiatives and trends to combat malnutrition and obesity in young children. Includes providing positive role modeling and helping families understand the essentials of good health in the home, starting with prenatal maternal health and including breastfeeding and traditional and local foods. Explores space, materials, equipment and activities to promote physical health and fitness. (2.5+1)

ECE F230  Introduction to Children with Special Needs
3 Credits
Offered As Demand Warrants
An overview of categories of exceptionality includes hearing and visual impairments; learning, speech and language disabilities; emotional disturbances; physical and mental challenges; and the gifted and talented. Prerequisites: ECE F245; placement in ENGL F111X or higher; or permission of program head. (3+0)

ECE F235  Screening, Assessment and Recording
2 Credits
Information to help teachers of young children understand the purpose of screening. Presents use of good screening procedures. Explores the importance of assessing young children's development and provides tools and practice for recording and evaluating children's progress towards goals. Includes a variety of evaluation tools for assessing young children's
development. Prerequisites: Placement in ENGL F111X or higher or permission of program head. Recommended: ECE F105 or ECE F119 (2+0)

ECE F240 Inclusion of Children with Special Needs (s)
3 Credits Offered Fall
Developmental, social, educational and legal (PL94-142 and 99-457) issues related to the education of young children with special needs. Includes the role of the teacher in identifying, assessing and individualizing educational programs for young children with special needs. Emphasis on including the children in the least restrictive and most responsive environments. Prerequisites: ECE F104 or ECE F107; placement in ENGL F111X or higher or permission of the program head. (3+0)

ECE F242 Child and Family Ecology
3 Credits
Examines the influences the family has on the child, family dynamics and issues impacting families. Focus on the importance of understanding relationship building, support for families and interpersonal skill development that is culturally conducive with individual communities. Examines the ECE program’s policies and procedures on families and parental involvement. Includes practical applications of course reading and content. Prerequisites: Placement in ENGL F111X or higher or permission of program head. (2.5+1)

ECE F249 Current Issues in Early Childhood Education
1–3 Credits Offered As Demand Warrants
Selected current issues of importance to the human services, early childhood education or child development and family studies fields. Repeatable for credit by Early Childhood Education and Child Development and Family Studies majors to a maximum of nine credits. (1-3+0)

ECE F270 Practicum II
3 Credits
An advanced guided field experience in working with a group of young children in a school or center. May include teaching in a team situation and working with families. Prerequisites: ECE F170; placement in ENGL F111X or higher. (0.5+0+15)

ECE F299 Practicum for CDAs
1–3 Credits
A practical application of all previous CDA competency courses. The student will assume responsibility for children in an approved early childhood setting. (CDA curriculum.) Prerequisites: Placement in ENGL F111X or higher. (0+0)

ECE F301 Parents as Partners in Education
3 Credits Offered Spring as Demand Warrants
Study of strategies that will assist those who work with children and/or families to facilitate supportive partnerships with parents. Includes partnerships, contemporary issues, school and home-based programs, rights and responsibilities, professional ethics, and parents with special or unique needs. Prerequisites: ENGL F211X or ENGL F213X. (3+0)

ECE F302 Building Home Program Relationships: Prenatal to 3 Years
3 Credits Offered As Demand Warrants
Focuses on professionalism, family support, ethics, cultural continuity, child development, attachment and curriculum of home-based programs. Addresses the broad continuum of services across multiple domains and how staff that work in these programs can meet the needs of children pre-natal to 3 and their families in the home setting. Prerequisite: ENGL F111X
Recommended: ENGL F211X or F213X; ECE F342 (3+0)

ECE F304 W Attachment and Social Development (s)
3 Credits Offered Fall or As Demand Warrants
Principles and practices in understanding and supporting attachment and social development in conjunction to reciprocal communication streams and social interactions. Strategies for working with families as a continuum for each specific child’s development. Prerequisites: ENGL F111X, ENGL F211X or ENGL F213X. Recommended: ECE F104 or ECE F110 or ECE F45 or ED F245 or PSY F245 or other early development course. (3+0)

ECE F305 Social Emotional Development: Reflection and Practice
3 Credits Offered Fall; As Demand Warrants
Examination of the many ways teachers can help young children with their social development by addressing the common problems and situations that arise in teaching all children between the ages of 3 and 6 years. Development of strategies to improve teacher practices that will support social and emotional competence. Prerequisites: ENGL F211X or ENGL F213X (3+0)

ECE F306 W Building Bridges to Support Family Mental Health
3 Credits Offered Spring or As Demand Warrants
Understanding and providing assistance to families who live in environments with multi-risk factors requires professionals working together to provide the best possible interventions. Demonstration and examples of strategies that help multi-risk families that assists in bringing together the most effective intervention techniques from a variety of theoretical approaches, parenting strategies and innovative programs. Prerequisites: ENGL F111X or ENGL F211X or ENGL F213X (3+0)

ECE F310 Constructivist Curriculum
3 Credits Offered Fall
A focus on the issues involved in developing constructivist curriculum for young children. Includes a foundation in the aims and assumptions of constructivist teaching and key components of this type of curriculum. Emphasis is on best practices for constructivist classrooms. Prerequisites: ENGL F211X or ENGL F213X (3+0)

ECE F320 Environment and Curriculum for Infants and Toddlers
3 Credits Offered Fall
Roles and practices adults take for supporting learning and development in infants and toddlers aged birth - 3 years of age. Stresses the adoption of the child’s individual abilities and interests while supporting their exploration, discovery, relationship building and problem solving through environment development. Prominence for family inclusion in curriculum development through reciprocal relationships. Prerequisites: ENGL F211X or ENGL F213X (2.5+0+1.5)

ECE F340 Financial Management of Early Childhood Programs
3 Credits Offered Fall Odd-numbered Years
The financial aspects of managing a child care center or preschool program. Includes budgeting, program resource management, marketing, purchasing, pay and compensation, and fee collection issues important to maintaining quality programs for young children. Prerequisites: ENGL F211X or ENGL F213X or equivalent. (3+0)

ECE F341 W Personnel Management of Early Childhood Programs
3 Credits Offered As Demand Warrants
Management of personnel of child care programs, including recruitment, hiring, in-service training, staff meetings and communication, supervision, evaluation, motivation, burnout prevention and termination of employees. Focus on maintaining quality programs for young children. Prerequisites: ENGL F211X or ENGL F213X (3+0)

ECE F342 O Family Relationships
3 Credits Offered Fall
Examination of relationships in contemporary family life. Focus on the changing family, gender roles, living together, and relationships with children and grandchildren. Includes current family research and issues within and effect of public policy on families in our multicultural society. Prerequisites: COMM F11X or COMM F141X; upper-division standing; or permission of instructor. (3+0)

ECE F350 Play: Foundation for Development (s)
3 Credits Offered As Demand Warrants
Concepts, theories and empirical research on the role of the play in the total development of children. Utilizing three major ideas — the effective quality of play in early childhood development, as a means of self-expression, and as a channel of communication. Examines the effects culture, media and
technology have on play. Includes roles of early care-giving staff, teachers, and parents in supporting appropriate play experiences. Prerequisites: ENGL F111X or F213X; ECE F107; ECE F245; or approved development class. (3+0)

ECE F360 Assessment in Early Childhood 3 Credits Offered Spring Examination of policies and practices related to evaluation and assessment of young children’s progress. Includes legal, ethical and professional responsibilities in assessment. Exploration of “what, when, why and how” to assess young children. Includes practice and analysis of various assessment styles and tools as well as how to use information gained through assessment. Prerequisites: ENGL F111X and ENGL F211X or ENGL F213X. (3+0)

ECE F405 Seminar in Culture and Child Rearing Practices 3 Credits Offered As Demand Warrants Seminar course providing opportunity for students, cross regionally throughout Alaska and beyond, to engage in the comparative study of issues associated with culture and child rearing practices of families within Alaska and throughout the world. An emphasis will be placed on the role of caregiver working with children aged birth through three years of age. Prerequisite: ENGL F211X or ENGL F213X Recommended: ECE F104, or ECE/PSY/ED F245, ECE F130, ECE F342 (3+0)

ECE F420 W Developing Literacy in the Early Years 3 Credits Offered Fall Principles and practices in understanding and supporting young children’s emerging literacy. Links the importance of oral language and early exploration with later reading and writing skills. Strategies for assisting emergent readers and writers are included, as well as how to use play and children’s interests to assist in developing their literacy. Prerequisites: ECE F310; ECE F360; ENGL F111X; ENGL F211X or ENGL F213X or permission of instructor; upper-division standing. (3+0)

ECE F421 From Babbling to Talking to Early Literacy 3 Credits Offered Spring As Demand Warrants This course provides the opportunity for exploration and understanding of infant-toddler beginning language and early literacy development as it reflects on research from multiple fields. Looks at the importance of oral language development and early explorations with literacy while considering principles and practices that provide support for families and culture. Prerequisite: ECE F220, ENGL F111X, ENGL F211X or ENGL F213X. (2.5+0+1.5)

ECE F430 Fine Arts for the Early Years (h) 3 Credits Offered Spring Focused on promoting the arts in children’s lives. Explores the role of the teacher in helping children become aware of the beauty around them and to appreciate the variety and skill of many different kinds of art including: theatre, two- and three-dimensional art, crafts, vocal and instrumental music and dance. Strategies for assessing artistic development and working with families are incorporated. Prerequisites: ENGL F111X; ENGL F211X or ENGL F213X; ECE F240; ECE F310 (2.5+0+1.5)

ECE F440 Exploring Math and Science 3 Credits Offered Fall Odd-numbered Years Focused on constructivist teaching of math and science. Explores the role of the teacher in helping children become theory builders in an environment designed to promote learning in math and science. Includes specific examples in chemistry, biology, ecology, numbers, patterns, geometry, measurement, and data analysis. Emphasis is on teaching children an interactive, analytic and reflective process of inquiry. Prerequisites: ECE F310; ECE F360; upper-division standing. Recommended: Completion of at least one natural science course. (2.5+1)
ECON F237  The Alaskan Economy (s)  3 Credits  Offered Spring
Economic problems in Alaska with analysis of historical trends and current patterns of economic growth; emphasis on present and future alternative economic policies and their potential impacts. (3+0)

ECON F321  Intermediate Microeconomics (s)  3 Credits
Analysis of demand and supply under various market forms, cost and theory of production, factor pricing and theory of distribution, and survey of welfare economics. Prerequisites: ECON F201 and ECON F202; MATH F262X or equivalent. (3+0)

ECON F322  Managerial Economics  3 Credits  Offered Fall or Spring
Interpretation of economic data and applications of economic theory in business firms. Bridging the gap between theory and practice through empirical studies, cases and decision problems. Emphasis upon decision-making using analysis of research data. Prerequisites: ECON F201 and ECON F202; MATH F262X or equivalent (3+0)

ECON F324  Intermediate Macroeconomics (s)  3 Credits  Offered Fall or Spring
Concepts and measurement of income, analysis of aggregate demand and supply and their relation to the level of prices, employment and economic growth. Prerequisites: ECON F201 and ECON F202; MATH F262X or equivalent (3+0)

ECON F327  Intermediate Econometrics for Forecasting and Business  3 Credits  Offered As Demand Warrants
Extension of topics developed in ECON F227 including methods of empirical analysis in the context of economic analysis and forecasting problems. Development of the science and art of building and using models in the context of economic analysis and forecasting. Understanding the fundamental theory underlying regression methods (including estimation, hypothesis testing, and prediction) and learning how to appropriately apply these techniques in the analysis of economic and business problems. Simple and multiple regression and correlation, analysis of variance, forecasting techniques, quality control, nonparametric methods and decision theory. STAT F200X and ECON F227 or permission of instructor. (3+0)

ECON F335 O  Intermediate Natural Resource Economics (s)  3 Credits  Offered Fall or Spring
Extension of concepts developed in ECON F235, using a higher level of economic analysis. Topics include welfare economics and economic efficiency concepts, benefit/cost analysis, resource allocation over time, resource taxation, common property problems, externalities, public goods, valuation of non-market resources, and land use planning issues. Prerequisites: COMM F131X or COMM F141X; ECON F201 and ECON F202, or ECON F235; MATH F262X or equivalent. (3+0)

ECON F350  Money and Banking (s)  3 Credits  Offered Fall or Spring
The liquid wealth system in the United States, including the commercial banking system, the Federal Reserve System and nonbank financial institutions; the regulation of money and credit and its impact on macroeconomic policy objectives. Prerequisites: ECON F201 and ECON F202. (3+0)

ECON F351  Public Finance (s)  3 Credits  Offered Fall
Economic justifications for government; federal, state and local government, taxation, spending and debt; their effects on allocation, distribution, stabilization and growth. Prerequisites: ECON F201; ECON F202; MATH F262X or equivalent. (3+0)

ECON F409 W  Industrial Organization and Public Policy (s)  3 Credits
The relationship of market structure to the economic conduct and performance of firms and industries, the determinants, measurement and classification of market structure, public policy toward mergers, industrial
ECON F420 W Labor Markets and Public Policy (s)
3 Credits
Offered Spring Odd-numbered Years
Application of labor market analysis and wage theory as they relate to public policy issues. Topics include determination of wages, taxation and employment, economic impact of unions, economics of discrimination, and issues relating to women’s and minorities’ changing roles in the labor market. 
Prerequisites: ECON F201; ECON F202; ENGL F111X; ENGL F211X or ENGL F213X; or permission of instructor. (3+0)

ECON F434 W Environmental Economics (s)
3 Credits
Offered Spring Odd-numbered Years
An extension of concepts introduced in ECON F235, using a higher level of economic analysis. An analysis of the economic forces involved in environmental degradation, preservation and regulation. Topics include pollution, biodiversity, wilderness and climatic change. 
Prerequisites: ECON F201 and ECON F202, or ECON F235; ENGL F111X; ENGL F211X or ENGL F213X; permission of instructor; MATH F262X or equivalent. (3+0)

ECON F439 W Energy Economics (s)
3 Credits
Offered Fall Odd-numbered Years
Market forces and institutions affecting the allocation of energy resources. Special attention to intertemporal allocative decisions and the role that public policy plays in influencing the rate at which energy resources are used over time. 
Prerequisites: ECON F201 and ECON F202, or ECON F235; ENGL F111X; ENGL F211X or ENGL F213X; permission of instructor. Stacked with ECON F639. (3+0)

ECON F451 W Public Expenditure Analysis
3 Credits
Offered Spring Odd-numbered Years
Purposes and economic effects of governmental expenditures, budgeting techniques, and their effects on resource allocation. 
Prerequisites: ECON F201 and ECON F202; ENGL F111X; ENGL F211X or ENGL F213X or permission of instructor; MATH F262X or equivalent. (3+0)

ECON F463 W International Economics (s)
3 Credits
Offered Fall or Spring
Prerequisites: ECON F201 and ECON F202; ENGL F111X; ENGL F211X or ENGL F213X or permission of instructor; MATH F262X or equivalent. (3+0)

ECON F601 Microeconomic Theory I
3 Credits
Offered Fall
Analysis of consumer and producer theory, price determination and welfare economics. 
Prerequisites: ECON F321 or equivalent; MATH F200X or equivalent; graduate standing; or permission of instructor. (3+0)

ECON F602 Economic Modeling
3 Credits
Offered Fall
A hands on approach to applied microeconomics and resource modeling. Students extend their training in economic theory and econometrics to model real life problems in the areas of renewable and exhaustible resources, non-market valuation and environmental economics. Special emphasis will be given to the use of econometric analyses. 
Prerequisites: ECON F601; ECON F626 or equivalent; graduate standing; or permission of instructor. (3+0)

ECON F603 Macroeconomic Theory I
3 Credits
Offered Spring
Analysis of the underlying causes of unemployment, economic instability, inflation and economic growth. 
Prerequisites: ECON F321 or equivalent; ECON F324 or equivalent; MATH F200X or equivalent; graduate standing; or permission of instructor. (3+0)

ECON F613 Resilience Internship
2 Credits
Offered Fall
Students of the Resilience and Adaptation Program participate in internships to broaden their interdisciplinary training, develop new research tools and build expertise outside their home disciplines. Internships are eight to ten weeks of full time commitment and take place during the student’s first summer in the program. In the autumn students meet to discuss their internship experiences and make public presentations. 
Prerequisites: ANTH/BIOL/ECON/NRM F667; ANTH/BIOL/ECON/NRM F668; or permission of instructor. Cross-listed with ANTH F617; BIOL F613; NRM F613. (2+0)

ECON F616 Economics Background for Resilience and Adaptation (s)
1 Credit
Offered Fall
Provides the economics background that is necessary for understanding the role of economics in complex systems involving interactions among biological, economic, and social processes. Designed for incoming students of the Resilience and Adaptation Program (RAP), who have not received training in ecology; Graded Pass/Fail. 
Prerequisites: Graduate student enrollment or permission of instructor. (1+0)

ECON F623 Mathematical Economics
3 Credits
Offered Fall
Mathematical techniques including matrix algebra, differential and integral calculus. Particular attention is given to static and comparative statics analysis and dynamic models. 
Prerequisites: MATH F200X or equivalent; graduate standing; or permission of instructor. (3+0)

ECON F626 Econometrics
3 Credits
Offered Spring
Introduction to econometric theory. Single equation and multiple equation system estimation, including inference and hypothesis testing and results of assumption violation. 
Prerequisites: ECON F227 or equivalent; MATH F200X or equivalent; STAT F401; graduate standing; or permission of instructor. (3+0)

ECON F627 Advanced Econometrics
3 Credits
Offered Fall
Advanced Econometrics is the second graduate econometrics course in the Ph.D. in Resource Economic program. This course builds upon the theoretical and empirical tools developed in ECON F626. Large sample theory and the Maximum Likelihood estimation theory are covered. Limited dependent variable models widely used in applied microeconometric modeling are developed and extended. Univariate and multivariate time series modeling and forecasting is developed. 
Prerequisites: ECON F626 or equivalent; graduate standing; or permission of instructor. (3+0)

ECON F635 Renewable Resource Economics (s)
3 Credits
Offered Fall
The theory, methods of analysis and current literature of natural resource economics and policy for fisheries, forests and wildlife. Topics include externalities, property rights, public goods, benefit-cost analysis, amenity values and other non-market resource services, and environmental policy. 
Prerequisites: ECON F321; ECON F335 or equivalent; MATH F200X or equivalent; graduate standing; or permission of instructor. (3+0)

ECON F636 Non-Renewable Resource Economics (s)
3 Credits
Offered Spring
Exploration of issues relating to the mineral and energy markets. The analysis of energy and mineral use over time, capital investment problems and world market dynamics are explored. Topics include futures markets, present value, energy value and entropy. 
Prerequisites: ECON F321; ECON F335 or equivalent; MATH F200X or equivalent; graduate standing; or permission of instructor. (3+0)

ECON F637 Evolution of Conservation Concepts and Policy
3 Credits
Offered Fall Even-numbered Years
Resource policy issues development and implementation including forestry, mining, fisheries, oil, wildlife and other topics as demand warrants.

Focus on policy issues involved in management of Alaska’s resources. **Prerequisites:** Graduate standing or permission of instructor. Cross-listed with NRM F637. (3+0)

Explores the basic principles that govern resilience and change of ecological and social systems. Principles are applied across a range of scales from local communities to the globe. Working within and across each of these scales, students address the processes that influence ecological, cultural and economic sustainability, with an emphasis on northern examples. **Prerequisites:** Graduate standing in a natural science, social science, humanities or interdisciplinary program at UAF; permission of instructor. Cross-listed with ANTH F647; BIOL F647; NRM F647. (3+0)

Interdisciplinary exploration of theoretical and practical considerations of integrated assessment and adaptive management. Students survey concepts important in understanding societal and professional-level decision-making. Students work as individuals and as a team to undertake case studies with relevance to integrated assessment and adaptive management. Collectively, the class builds a portfolio of cases and conducts an integrated assessment. Note: In case of enrollment limit, priority will be given to graduate students in the Resilience and Adaptation Program in order for them to be able to meet their core requirement. **Prerequisites:** Graduate standing in a natural science, social science, humanities or interdisciplinary program at UAF or another university, or permission of instructor. The course is designed to fit into the sequence of the Resilience and Adaptation program’s core courses. It is open to other graduate students interested in and prepared to conduct interdisciplinary studies relating to sustainability. Recommended: ANTH/BIOL/ECON/NRM F647; ANTH/BIOL/ECON/NRM F648 and ANTH/BIOL/ECON/NRM F667 previously or concurrently. Cross-listed with ANTH F449; BIOL F469; NRM F469. (3+0)

A seminar in issues related to Alaska Native and rural education. Through weekly meetings held both on campus and in Fairbanks schools, students examine and discuss issues with Alaska Native educators on topics related specifically to rural and urban Alaska Native education. Issues include: Native ways of knowing, local control, curriculum development for small/multi-graded/rural schools, cultural differences in teaching and learning, and bilingual programs. Graded Pass/Fail. **Prerequisites:** Permission of instructor. Cross-listed with ANS F102. (2+0)

ED F237C  Technology Tools for Teachers: Google Drive  
0.5 Credit  Offered Fall, Spring, As Demand Warrants  
Designed to equip pre-service teachers with the necessary technology skills to be successful in their pre-service programs. Successful challenge or completion of all modules is a prerequisite for ED F329. May be repeated once for credit. Each module will require approximately six hours direct instruction and four to eight hours of lab work. This module covers the use of Google Drives (Google Apps) for word processing, creating presentation, working with spreadsheets/charting, converting documents to Office format, and sharing of documents. Graded Pass/Fail. Prerequisite: Access to MS Office is required. (0.5+2)

ED F237D  Technology Tools for Teachers: Office  
0.5 Credit  Offered Fall, Spring, As Demand Warrants  
Designed to equip pre-service teachers with the necessary technology skills to be successful in their pre-service programs. Successful challenge or completion of all modules is a prerequisite for ED F329. May be repeated once for credit. Each module will require approximately six hours of direct instruction and four to eight hours of lab work. This module covers the basic uses of Microsoft Office (Word, PowerPoint, Excel) for productivity tasks. Graded Pass/Fail. Prerequisite: Access to MS Office is required. (0.5+2)

ED F245  Child Development  
3 Credits  
A study of the physical, cultural, emotional, cognitive and social aspects of a child’s development from prenatal period through early adolescence. Focus on developmental theories including Erikson, Gardner, Gilligan, Kagen, Sternberg, Vygotsky and other contemporary theories of child and adolescent development. Prerequisites: ENGL F111X or permission of instructor. Recommended: PSY F245. (3+0)

ED F303 W,O  Language Acquisition  
3 Credits  Offered as Demand Warrants  
Theories of the acquisition and development of first and second languages, including consideration of biological and sociocultural factors. Survey of traditional and contemporary theories, and implications for pedagogy and public policy. Prerequisites: COMM F131X or COMM F141X; ENGL F111X; ENGL F211X or ENGL F213X or permission of instructor. Recommended: LING F101. Cross-listed with LING F303. (3+0)

ED F309  Elementary School Music Methods  
3 Credits  Offered Fall Even-numbered Years  
Principles, procedures and materials for teaching music to children at the elementary level. Cross-listed with MUED F309. (3+0)

ED F329  Teaching with Technology  
3 Credits  
Participants will examine multiple strategies for the effective use of computers and related technologies in the classroom. Emphasis will be on the use of mainstream cross-platform productivity applications to develop understanding of the schemes for using databases, spreadsheets, page layouts, digital video, presentations and graphical organizers in transformed instructional settings. Students must have access to Word, PowerPoint, Excel, and Inspiration. Prerequisites: ED F237A; ED F237B; ED F237C; ED F237D or passing the equivalent competency test, or permission of instructor; laptop computer required. (3+0)

ED F330  Assessment of Learning  
3 Credits  
Review and examination of the range of traditional and alternative assessment and evaluation approaches used in educational contexts. Focus is on developing assessment practices and policies that are appropriate for the diverse student population in Alaska’s rural and urban schools. Field experience required. Prerequisites: ED F201; a mathematics baccalaureate core course; or permission of instructor. (3+0)

ED F344 W  Foundations of Literacy Development  
3 Credits  
Language, reading, and writing development examined in children of varying ages and within a range of social and cultural contexts, with emphasis on a developmental approach to literacy development in school and home settings. Introduction to best practices in research-based methods for teaching and learning of reading and writing. Field experience required. Prerequisites: ED F201; ED F204; ENGL F111X; ENGL F211X or ENGL F213X or permission of instructor; upper-division standing; laptop computer required. (3+0)

ED F345  Sociology of Education  
3 Credits  Offered Fall Odd-numbered Years  
Theoretical perspectives on various dimensions of the relationship between education and society, including the institutional context for schooling, the impact of schooling on social stratification and social organization within the school and classroom. Special attention is given to issues of equity and contemporary education reform efforts. Prerequisites: SOC F100X or permission of instructor. Cross-listed with SOC F345. (3+0)

ED F350  Communication in Cross-Cultural Classrooms  
3 Credits  
Interdisciplinary examination of communication and language in cross-cultural educational contexts, including language, literacy and interethnic communication related to classrooms in Alaska. Prerequisites: ED F201. (3+0)

ED F370  Issues in Alaska Bilingual and Multicultural Education  
1 Credit  Offered As Demand Warrants  
Current issues related to Alaska bilingual and multicultural education. Students must attend all three days of the annual Alaska Bilingual/Multicultural Education and Equity Conference and write a paper reflecting on how they will use information gained from the conference in their own multicultural education context. Course may be repeated for credit since the content of the conference changes each year. Graded Pass/Fail. Prerequisites: Prior course work at the lower-division level. Cross-listed with ANS F370. (1+0)

ED F380  Cultural Influences in Education  
3 Credits  Offered As Demand Warrants  
Interdisciplinary study of the educational problems, concerns and successes in a variety of cultural contexts. Social, cultural and psychological factors inherent in the educational process and how they are affected by a multicultural setting. Attention given to curriculum improvement and teaching strategies appropriate for the multicultural classroom and school. Prerequisites: Junior standing. (3+0)

ED F385  International Perspectives on Education  
3 Credits  Offered As Demand Warrants  
A comparative analysis of the influences of changing political, social and economic conditions and relationships with other countries in the world on U.S. and Alaska education policies. Examination of school systems in several industrialized and developing countries with focus on understanding Alaska’s educational system within the context of this wider global community. Prerequisites: Junior standing. (3+0)

ED F411  Reading, Writing, Language Arts: Methods and Curriculum Development  
3 Credits  Offered Fall  
Study and application in the classroom of best practices from research-based strategies for the teaching and learning of reading, writing and language arts concepts. Includes content and methods for students in elementary classrooms with diverse populations. Requires development and classroom implementation of integrated reading and writing unit. Concurrent internship required. Prerequisites: Admission to Internship Year. (2.5+0+1.5)

ED F412 W  Integrated Social Studies and Language Arts: Methods and Curriculum Development  
3 Credits  Offered Fall  
Study and application in the classroom of best practices from research-based strategies for the teaching and learning of social studies concepts, content, and methods integrated with language arts for students in elementary classrooms with diverse populations. Requires development and classroom implementation of integrated social studies and language arts unit.
Concurrent internship required. **Prerequisites:** ENGL F111X; ENGL F211X or ENGL F213X or permission of instructor; admission to Internship Year. (2+0+3)

ED F414 3 Credits **Art, Music and Drama in Elementary Classrooms** Offered Spring Exploration and application, in the classroom, of theory, practice, methods and materials used in teaching in and through visual art, music and drama. Concurrent internship required. **Prerequisites:** Admission to the Internship Year. (1.5+0+4.5)

ED F417 3 Credits **Physical and Health Education for Elementary Teachers** Offered Fall School systems historically serving Native people, current efforts toward local control, and the cross-cultural nature of this education. Field experience required. **Prerequisites:** ANTH F242 and Junior standing or permission of instructor. Concurrent internship required. **Prerequisites:** Admission to the Internship Year. (1.5+0+4.5)

ED F420 3 Credits **Alaska Native Education** (s) Offered Fall School systems historically serving Native people, current efforts toward local control, and the cross-cultural nature of this education. Field experience required. **Prerequisites:** ANTH F242 and Junior standing or permission of instructor. Concurrent internship required. **Prerequisites:** Admission to the Internship Year. (1.5+0+4.5)

ED F431 3 Credits **Web 2.0 Fundamentals: Participate, Produce, Publish** Offered Fall as Demand Warrants Examine the impact of Web 2.0, cloud computing and mobile technologies on K–12 education and other social institutions. Establish and publish to frameworks — web-based e-portfolio, personal learning network, blog, podcasts — that will form the core elements of the MEd Instructional Technology Innovation (MITI). This course is a prerequisite for subsequent work toward the MITI and should be taken before or concurrently with ED F432, Fundamentals of Media Design. **Prerequisites:** Admission to the Master of Education program or permission of instructor. (3+0)

ED F432 3 Credits **Fundamentals of Media Design** Offered As Demand Warrants Create and publish materials with proper media design for use in teaching and learning. Topics include photo and graphics formatting, video production, video podcast production, SMART technologies, static screen capture and motion screen capture. These productions will be included on students’ MITI e-portfolios. This course is a prerequisite for subsequent MITI courses and should be taken after or concurrently with ED F431, Web 2.0 Fundamentals: Participate, Produce, Publish. **Prerequisites:** Admission to the Master of Education program or permission of instructor. (3+0)

ED F440 3 Credits **Gender and Education** (s) Offered Spring Even-numbered Years Educational practices and processes and their relation to the changing situation of women in society. Examination of schools as sites of pervasive gender socialization and discrimination as well as offering new possibilities for liberation. Topics include social construction of gender, patterns of access and achievements, gender as an organizing principle in schools and classrooms, and feminist agendas and strategies for change. **Prerequisites:** Junior standing or permission of instructor. Cross-listed with WGS F440. Stacked with ED F640. (3+0)

ED F449 3 Credits **Elementary Art Methods** Offered Spring Methodologies of instruction and assessment in art education at the elementary level. Focus is on the knowledge and tools necessary to become excellent elementary art educators. Students will be expected to construct lessons reflecting theory and practice that are developmentally appropriate for elementary level students of all ages. Particular attention will be given to using and understanding the National Standards for Art Education, Alaska Content/Performance Standards, and key curriculum documents in an elementary context. **Prerequisites:** Admission to K–12 Art post-baccalaureate licensure program or to MED in Curriculum and Instruction option for post-baccalaureate students. Stacked with ED F649. (3+0)

ED F450 3 Credits **Education and Cultural Transmission** Offered As Demand Warrants Education as a process for transmitting culture with examination of issues related to cultural transmission in a multicultural environment. Emphasis on dynamics of cultural change. **Prerequisites:** Junior standing. (3+0)

ED F451 1–9 Credits **Practicum in Education** Offered As Demand Warrants Practical application of general ideas and techniques addressed in methods courses in which the student is currently enrolled or previously completed. **Prerequisites:** Permission of Office of Practical Experiences. (0+0)

ED F452 O 3–15 Credits **Elementary Internship** Offered Spring Even-numbered Years Supervised teaching in elementary schools approved by the School of Education. Students should expect to be involved in the school setting for some or all of the school day (depending on number of credits taken) for the entire university semester. The School of Education may limit enrollment, determine assignments and cancel the registration of students doing unsatisfactory work. Graded Pass/Fail. Special fees apply. **Prerequisites:** COMM F131X or COMM F141X; and successful completion of methods practicum and methods course work with a C or better. Post-baccalaureate students must be admitted to the Art K–12 licensure program. Passing Praxis I scores. Cross-listed with ART F458. (1+0+42)

ED F453 O 3–15 Credits **Secondary Internship** Offered Spring Even-numbered Years Supervised teaching in secondary schools approved by the School of Education. Students should expect to be involved in the school setting for some or all of the school day (depending on number of credits taken) for the entire university semester. The School of Education may limit enrollment, determine assignments and cancel the registration of students doing unsatisfactory work. Graded Pass/Fail. Special fees apply. **Prerequisites:** COMM F131X or COMM F141X; and successful completion of methods practicum and methods course work with a C or better. Post-baccalaureate students must be admitted to the K–12 Art licensure program. Passing Praxis I scores. Cross-listed with ART F459. (1+0+42)

ED F454 O 15 Credits **Student Teaching K–12** Offered Summer, As Demand Warrants Supervised teaching in both elementary and secondary schools approved by the Music Department and the School of Education. Open only to Music majors seeking K–12 certification. Students should expect to be involved in the school setting for the entire school day for the entire university semester. The department may limit enrollment, determine assignments and cancel the registration of students doing unsatisfactory work. Graded Pass/Fail. Special fees apply. **Prerequisites:** COMM F131X or COMM F141X, successful completion of methods practicum and methods course work with a C or better. Passing Praxis scores. For Bachelor of Music students, see BM degree requirements. (1+0+42)

ED F456 3 Credits **Orientation to Teaching in Rural Alaska** Offered Summer, As Demand Warrants Needs of rural schools, their environments and the recipients of school services with special attention given to cross-cultural educational issues. **Prerequisites:** Permission of instructor. (2+3)

ED F461 3 Credits **Native Ways of Knowing** Offered Spring Focus on how culture and worldview shape who we are and influence the way we come to know the world around us. Emphasis on Alaska Native knowledge systems and ways of knowing. **Prerequisites:** Junior standing. Cross-listed with ANS F461. (3+0)
### Course Descriptions

**ED F462**  
**Alaskan Environmental Education **  
3 Credits  
Offered As Demand Warrants  
Utilization of the environment inside and outside the formal classroom in all subject areas. Curriculum materials (K–12), interpretive and audiovisual aids, problem solving and applications to situations from the public schools to summer camp, short courses and workshops for individuals of any age.  
**Prerequisites:** Junior standing. Cross-listed with NRM F462. (3+0)

**ED F465**  
**Working with FAS/FAE Children**  
3 Credits  
Offered Fall  
For families of children with FAS/FAE and professionals — teachers, social workers and health workers who deal with these children. Guest speakers, interviews and reading materials. Project is the development of activities to use with these children with FAS/FAE. Access to work in a school setting required. (Not available on Fairbanks campus.) (2+4)

**ED F466**  
**Internship and Collaborative Student Teaching**  
3 Credits  
Offered Fall  
Supervised internship for students in the first half of a year-long professional internship in elementary teacher education. Includes immersion in planning and teaching. Course work is integrated into the internship experience. Interns are assessed in relationship to UAF/Alaska state and national standards. Graded Pass/Fail. Special fees apply. **Prerequisites:** Admission to Internship Year. (1.5+0+12)

**ED F467**  
**Synthesizing the Standards I**  
2 Credits  
Offered Fall  
For student interns participating in the first half of the professional internship year. Interns use the UAF/Alaska Teacher Standards as the basis for examining field- and course-based experiences and activities during the internship year. Includes collection and analysis of selected artifacts to document and provide evidence of professional development and achievement relative to educational standards. Interns present portfolio for midyear assessment. Concurrent internship required. **Prerequisites:** Admission to Internship Year. (1+0+8)

**ED F468 O**  
**Internship and Student Teaching**  
4 Credits  
Offered Spring  
For student interns participating in the second half of the year-long professional elementary teacher education internship. Interns must spend at least four days per week in the classroom, one month full-time in the classroom including at least three weeks of full responsibility for the classroom. Builds on ED F466 requirements with continued assessment based on UAF/Alaska State and National Standards. Graded Pass/Fail. Special fees apply. **Prerequisites:** COMM F131X or COMM F141X; junior standing; laptop computer. (3+0)

**ED F469**  
**Synthesizing the Standards II**  
2 Credits  
Offered Spring  
For student interns participating in the second half of the professional internship year. Interns use the UAF/Alaska Teacher Standards as a basis for examining field- and course-based experiences and activities during the internship year. Includes collection and analysis of selected artifacts to document and provide evidence of professional development and achievement relative to educational standards. Interns formally present completed portfolios for reviews and evaluations. Concurrent internship required. **Prerequisites:** Admission to the Internship Year. (1+0+3)

**ED F476**  
**Assessment of Literacy Development**  
1 Credit  
Offered Spring  
Interns will review, evaluate and create assessments to document elementary student literacy development. Interns will analyze results of literacy assessments and develop plans for instruction for each elementary student. Assessments may include teacher-made quizzes or tests, anecdotal records based on observing children, student reading and writing samples, and spelling assessments. Interns will identify important characteristics of each student including, but not limited to, student interests and goals for literacy development. **Prerequisites:** Admission to the internship year or permission of the instructor. (1+0+22)

**ED F478**  
**Math Methods and Curriculum Development**  
3 Credits  
Offered Fall  
Study and application in the classroom of best practices from research-based strategies for the teaching and learning of mathematical concepts, content and methods for students in elementary classrooms with diverse populations. Requires development and classroom implementation of mathematics unit. Concurrent internship required. **Prerequisites:** Admission to Internship Year. Stacked with ED F678. (2+0+8)

**ED F479**  
**Science Methods and Curriculum Development**  
3 Credits  
Offered Spring  
Study and application in the classroom of the best practices from research-based strategies for the teaching and learning of science concepts, content and methods for students in elementary classrooms with diverse populations. Requires development and classroom implementation of science unit. Classroom internship required. **Prerequisites:** Admission to internship year; concurrent enrollment in other internship year courses; Alaska passing scores for three Praxis I exams. Stacked with ED F688. (2.5+0+4)

**ED F486 O/2**  
**Media Literacy (h)**  
3 Credits  
Promotes critical thinking skills that empower people to make independent judgments and informed decisions in response to information conveyed through the channels of mass communications. Emphasis on developing students and others into critical viewers, listeners and readers of media. **Prerequisites:** COMM F131X or COMM F141X; junior standing; laptop computer. (3+0)

**ED F601**  
**Introduction to Applied Social Science Research**  
3 Credits  
Review of the most common educational research paradigms, data gathering techniques and analytical tools used in the study of human behavior and educational institutions. Attention will be given to collaborative research models, with a focus on the translation of research results into practical application. (3+0)

**ED F603**  
**Field Study Research Methods**  
3 Credits  
Focus on techniques for conducting both quantitative and qualitative field research. Particular emphasis on considerations for conducting field research in cross-cultural settings. **Prerequisites:** ED F601. Cross-listed with CCS F603. (3+0)

**ED F604**  
**Documenting Indigenous Knowledge**  
3 Credits  
Offered Fall  
A thorough grounding in research methodologies and issues associated with documenting and conveying the depth and breadth of indigenous knowledge systems and their epistemological structures. Includes a survey of oral and literate data-gathering techniques, a review of various modes of analysis and presentation, and a practical experience in a real-life setting. Recommended: Graduate-level survey course in research methods or approval of instructor. Cross-listed with CCS F604. (3+0)

**ED F606**  
**Alaska Native Education**  
3 Credits  
Offered Fall  
School systems historically serving Native people, current efforts toward local control and the cross-cultural nature of this education. Field experience required. **Prerequisites:** ANTH F242 and graduate standing or permission of instructor. (3+0)

**ED F608**  
**Indigenous Knowledge Systems**  
3 Credits  
Offered Fall  
A comparative survey and analysis of the epistemological properties, world views and modes of transmission associated with various indigenous knowledge systems. Emphasis on knowledge systems practiced in Alaska. **Prerequisites:** Graduate standing or permission of instructor. Cross-listed with CCS F608; RD F608; ANL F608. (3+0)
ED F610  Education and Cultural Processes  3 Credits
Offered As Demand Warrants
Advanced study of the function of education as a cultural process and its
relation to other aspects of a cultural system. Students will be required to
prepare a study in which they examine some aspect of education in a par-
ticular cultural context. Cross-listed with CCS F610. (3+0)

ED F611  Culture, Cognition and Knowledge Acquisition  3 Credits
Offered Fall
An examination of the relationship between learning, thinking and
perception in multicultural contexts. Particular emphasis will be on the
implications of these relationships for schooling. Content will focus on
cultural influences on perception, conceptual processes, learning, memory
and problem solving. Content will also reflect concern for practical teaching
problems. Recommended: ED F610. Cross-listed with CCS F611. (3+0)

ED F612  Foundations of Education  3 Credits
Offered Fall
Introduces a range of philosophical thought with emphasis on schooling in
the cross-cultural context and on issues of social justice and quality in
education. Students will explore the interplay between cultural processes
and various philosophical positions adopted by educators in the design and
practice of pedagogy, learn the history of public school education in the U.S.
and Alaska and analyze the policies affecting public school education today.
(3+0)

ED F613  Alaska Standards for Culturally Responsive Schools  3 Credits
Offered As Demand Warrants
Guidelines, rationale and resources for adapting educational policies,
programs and practices to better address the cultural well-being of the
students and communities they serve. Content will be grounded in the
Alaska Standards for Culturally Responsive Schools, including standards for
students, teachers, curriculum, schools and communities. Cross-listed with
CCS F613. (3+0)

ED F616  Education and Socioeconomic Change  3 Credits
Offered As Demand Warrants
An examination of social change processes, particularly in relation to the
deliberate development of new institutions and resulting forms of new con-
sciousness. Emphasis is placed on the role of education and schooling in this
development dynamic. Cross-listed with CCS F616. (3+0)

ED F620  Language, Literacy and Learning  3 Credits
Offered Fall
The relationships among language, culture and thinking as issues of lit-
eracy and learning. Specific areas of emphasis include linguistic relativity,
discourse, role of context in communications, variant language learning
strategies and styles, speech community, open and closed linguistic systems,
cognitive styles, and literacy as a cultural and cognitive phenomenon. (3+0)

ED F621  Cultural Aspects of Language Acquisition  3 Credits
An expanded view of the ways in which individuals become socialized into
particular patterns of first and second language and literacy. The ongo-
ing acquisition of both oral and written language(s) from early childhood
through adult life. Topics will include: the cultural dimensions of lan-
guage development; the relationship between communication and culture;
 bilingualism; and the role of language in the transmission of sociocultural
knowledge. Cross-listed with LING F621. (3+0)

ED F624  Foundations of Education in Alaska: From Segregation to Standards  3 Credits
Offered Summer As Demand Warrants
Review of major Alaska educational reform efforts as a means of under-
standing historical and current state, national and international policies and
practices related to development of curriculum, pedagogy and assessment
that respond to the needs and interests of culturally and linguistically
diverse populations. Examination of Alaska Quality Schools Initiative
reform effort with focus on use of Alaska Standards for Culturally
Responsive Schools. Prerequisites: Admission to Internship Year or permis-
sion of instructor; a laptop computer. (3+0)

ED F625  Exceptional Learners and Child Development: Individual and Cultural Characteristics  3 Credits
Offered Summer As Demand Warrants
Foundation for understanding, identifying and teaching to developmental
abilities of children and early adolescents. Human development examined
in context of cognition, personality, social behavior, language and physi-
cal development with focus on understanding and using cross-cultural
influences specific to Alaska. Emphasis on development of children with
exceptional abilities. Design, develop and modify curriculum and instruc-
tion to developmentally and culturally appropriate approaches. Theory is
applied to practice in practicum. Prerequisites: Admission to Internship
Year or permission of instructor. (3+0)

ED F626  Teaching Reading, Writing and Language Arts  3 Credits
Offered Summer As Demand Warrants
Examination of the nature and process of reading and writing for elemen-
tary students and focus on process of developing a language arts program.
Includes acquisition and role of language in this process. Examination and
evaluation of materials and methods of teaching language arts, includ-
ing those used in some Alaska districts. Examination and evaluation of
children's literature. Practicum with application of language arts concepts.
Prerequisites: Admission to Internship Year or permission of instructor.
(3+0)

ED F630  Curriculum Development  3 Credits
Offered Fall
Basic definition of curriculum. Includes the present need for curriculum
improvement, criteria for selection of broad goals, types of curriculum
frameworks and consideration of the organization of specific learning expe-
riences as part of the curriculum structure. (3+0)

ED F631  Culture, Community and the Curriculum  3 Credits
Offered Fall
Salient issues involved with the development of effective programs of
instruction in small schools, including foundational design, conceptual
models, organizational strategies, technical skills, current issues and trends,
and their implications and application to the environment of rural Alaska.
Cross-listed with CCS F631. (3+0)

ED F635  Strategies for Cooperating/Mentor Teachers  3 Credits
Offered As Demand Warrants
Study of effective teaching using alternative strategies appropriate to
differing goals. Consideration will also be given to teaming with and/or
supervising interns as a technique for improving instruction. Course may
be repeated for credit as readings and topics change. Prerequisites: Licensed
teacher employed in a school district. (3+0)

ED F636  Improvement of Elementary Teaching  3 Credits
Offered As Demand Warrants
Emphasis on improvement of elementary teaching through professional
development in which mentor teachers read, reflect and collaborate with
one another and with university faculty to develop new approaches for their
own professional development as well as developing and refining strategies
that contribute to the preparation of student interns who can successfully
demonstrate competence in the Alaska Teacher Standards and the Alaska
Standards for Culturally Responsive Schools. Course may be repeated for
credit as readings and topics change. (3+0)

ED F640  Gender and Education  3 Credits
Offered Spring Even-numbered Years
Educational practices and processes and their relation to the changing
situation of women in society. Schools will be examined as sites of pervasive
gender socialization and discrimination as well as offering new possibilities
for liberation. Topics include the social construction of gender, patterns of
access and achievement, gender as an organizing principle in schools and
classrooms, and feminist agendas and strategies for change. Stacked with ED
F440; WGS F440. (3+0)
ED F642  Portfolio Preparation: Integrating Theory and Practice  3 Credits  Offered Spring
Continued systematic collection of selected work, and final preparation and presentation of required portfolios that document and provide evidence of professional development and achievement as beginning teachers relative to Alaska Teacher Standards and Alaska Student Content Standards, integrated with the Alaska Standards for Culturally Responsive Schools. Processes and products involved in portfolio preparation serve as basis for goal setting and assessment by interns, peers, mentors and university faculty. Portfolios must provide tangible evidence of the range of knowledge, dispositions and skills that the intern possesses. Technology focus: utilization of technology to prepare portfolios. Addresses Alaska Teacher Standards. Prerequisites: Admission to the post-baccalaureate elementary or secondary licensure program or permission of instructor. (2+0+3)

ED F649  Elementary Art Methods  3 Credits  Offered Spring
Methodologies of instruction and assessment in art education at the elementary level. Focus is on the knowledge and tools necessary to become excellent elementary art educators. Students will be expected to construct lessons reflecting theory and practice that are developmentally appropriate for elementary level students of all ages. Particular attention will be given to using and understanding the National Standards for Art Education, Alaska Content/Performance Standards and key curriculum documents in an elementary context. Prerequisites: Admission to K–12 Art post-baccalaureate licensure program or MEd in Curriculum and Instruction option for post-baccalaureate students. Stacked with ED F449. (3+0)

ED F650  Current Issues in Technology  3 Credits  Offered Fall As Demand Warrants
The primary objective for the course is to develop a higher level of awareness and responsibility regarding student's digital presence in an ever-evolving technological landscape. Students will study a series of social, professional, personal and research technology based topics while developing connections between these current events, issues and emerging technologies. Students will then evaluate their social, personal and professional presence in these technologies while seeking to extrapolate the possible ramifications of these current issues on their digital footprints. Prerequisites: Admission to the Master of Education program or permission of the instructor. (3+0)

ED F653  Instructional Design  3 Credits  Offered Spring As Demand Warrants
Instructional design combines technology skills with application of learning theory to maximize the effectiveness of education. This course explores instructional design from a practical perspective. Students will acquire hands-on practice with a variety of computer-based tools while exploring instructional methods and principles of design. Prerequisite: Admission to the Master of Education program or permission of instructor. (3+0)

ED F654  Digital Citizenship, Internet Legal Issues, Digital Copyright and Fair Use  3 Credits  Offered Fall As Demand Warrants
An examination of critical elements of digital citizenship, a survey of contemporary legal issues, and an exploration of copyright, fair use, and intellectual property relevant to educators and instructional designers. Also available through eLearning and Distance Education. Prerequisites: Admission to the Master of Education program or permission of the instructor. (3+0)

ED F655  Online Pedagogy  3 Credits  Offered Fall As Demand Warrants
A study of theory, tools and methods for teaching online courses. Topics include prominent learning theories, affordance of new technologies, strategies for assessment and techniques for classroom management in an online environment. Students will develop and articulate a personal philosophy of teaching and learning appropriate for the 21st Century. Prerequisite: Admission to the Master of Education program or permission of instructor. (3+0)

ED F659  Multimedia Tools for Teachers  3 Credits  Offered Spring
Emerging technologies and software applications in education. The use of multimedia in designing teaching/learning experiences will be emphasized. Students will develop a multimedia classroom presentation and will demonstrate knowledge of Internet resources. (1+6)

ED F660  Educational Administration in Cultural Perspective  3 Credits  Offered As Demand Warrants
Issues related to the social organization and socio-political context of schools, administrative and institutional change processes and the changing role of administrators in education, using a cross-cultural framework for analysis. (3+0)

ED F669  Reading, Language and Culture  3 Credits  Offered Fall, As Demand Warrants
Introduction to the foundations of psycholinguistic and sociolinguistic theories as they relate to oral and written language acquisition and development. Focus on issues of language and literacy education practices in the Alaska context. Topics include bi-lingual and bi-literacy education, school and community languages and literacies, and culturally responsive pedagogy. Emphasis on teachers/students developing the skills and dispositions to become researchers of culture, language and literacy in their communities. (3+0)

ED F676  Supporting Learning in Diverse Systems  3 Credits  Offered Spring As Demand Warrants
Provides students with the skills necessary to support student learning in a variety of managed and unmanaged computing environments. Students will explore methods of local and remote support, perform tasks to ensure an optimal managed learning environment for students and teachers, and create documentation for student and teacher use. Finally, students will step through the entire process of taking an idea for improving their learning environment by evaluating, implementing and instructing use of a solution of their choice. Prerequisites: Admission to the Master of Education program or permission of the instructor. (3+0)

ED F677  Digital Storytelling  3 Credits  Offered Spring As Demand Warrants
This course examines the principles of storytelling in general and digital storytelling in particular, paying close attention to the use of digital storytelling to inform, persuade and entertain across a variety of social and cultural institutions. Elements of digital storytelling will be investigated and used to create original digital stories in a variety of media. Prerequisites: Admission to the Master of Education program or permission of the instructor. (3+0)

ED F678  Mathematics Methods and Curriculum Development  3 Credits  Offered Fall
Study and application in the classroom of best practices from research-based strategies for the teaching and learning of mathematical concepts, content and methods for students in elementary classrooms with diverse populations. Requires development and classroom implementation of mathematics unit. Concurrent internship required. Prerequisites: Admission to the post-baccalaureate elementary licensure program; graduate standing; or permission of instructor. Stacked with ED F478. (2+0+8)

ED F681  Place-Based Education  3 Credits  Offered Spring
An examination of the relationship between local landscape and community and the development of human perception. Emphasis on the importance of the development of ecologically appropriate community-based educational programs in rural and urban schools. Priority placed on project-centered programs lending themselves to experimental learning opportunities. Includes literature review, discussion, curriculum exploration and design and on-site community exploration of active place-based educational programs. (3+0)

**COURSES**
EDSC F431  Secondary Instruction and Assessment in the Content Area
3 Credits  Offered Fall
Methodologies of instruction and assessment in the candidate’s specific content area. Course is taught by content specialists. Discusses current issues, methodologies and teaching strategies specific to the various disciplines. A maximum of nine credits may be earned. Prerequisites: Admission to the secondary post-baccalaureate licensure program or permission of instructor. Stacked with EDSC F631. (3+0)

EDSC F432  English/Language Arts Secondary Instruction and Assessment
3 Credits  Offered Fall
Methodologies of instruction and assessment in English/language arts. Course is taught by content specialists. Includes discussion of current issues, methodologies and teaching strategies specific to English/language arts. Prerequisites: Admission to the Internship year or permission of instructor. Stacked with EDSC F632. (3+0)

EDSC F433  Mathematics Secondary Instruction and Assessment
3 Credits  Offered Fall
Methodologies of instruction and assessment in mathematics. Course is taught by content specialists. Includes discussion of current issues, diverse methodologies and practical application lessons for teaching mathematics. Prerequisites: Admission to Internship year or permission of instructor. Stacked with EDSC F633. (3+0)

EDSC F434  Science Secondary Instruction and Assessment
3 Credits  Offered Fall
Methodologies of instruction and assessment in science. Course is taught by content specialists. Includes discussion of current issues, diverse methodologies, inquiry-based lessons, laboratory experiences and field trips for teaching science. Prerequisites: Admission to Internship year or permission of instructor. Stacked with EDSC F634. (3+0)

EDSC F435  Social Studies Secondary Instruction and Assessment
3 Credits  Offered Fall
Methodologies of instruction and assessment in social studies. Course is taught by content specialists. Includes discussion of current issues, diverse methodologies, project-based activities and community-as-laboratory experiences for teaching social studies. Prerequisites: Admission to the Internship year or permission of instructor. Stacked with EDSC F635. (3+0)

EDSC F436  Art Secondary Instruction and Assessment
3 Credits  Offered Fall
Methodologies of instruction and assessment in art. Course is taught by content specialists. Includes discussion of current issues, methodologies and teaching strategies specific to arts. Prerequisites: Admission to Internship year or permission of instructor. Stacked with EDSC F636. (3+0)

EDSC F437  World Language Secondary Instruction and Assessment
3 Credits  Offered As Demand Warrants
Methodologies of instruction and assessment in world languages. Course is taught by content specialists. Includes discussion of current issues, diverse methodologies, and current application of teaching strategies and assessment specific to world languages. Prerequisites: Admission to the Internship year or permission of instructor. (3+0)

EDSC F442  Technology Applications in Education I
1 Credit  Offered Fall
The course focuses on Initial instruction in educational technology and applications as a resource for the delivery of instruction to enhanced student learning. The course is designed to introduce participants to technology tools to create, implement and assess instructional material in a variety of media. Participants will set up a professional electronic portfolio that demonstrates professional development and achievement relative to the ISTE National Technology Standards for Students and Teachers, Alaska Education Standards, and integrated with Standards for Culturally Responsive Schools. Prerequisites: Admission to the Internship year or permission of the instructor. Stacked with EDSC F642. (1+0)

EDSC F443  Technology Application in Education II
2 Credits  Offered Spring
The course is designed to increase participants’ use of technology tools to create and implement instructional material in a variety of media to support and assess learning. Participants will develop an electronic portfolio that demonstrates professional development and achievement relative to the ISTE National Technology Standards for Students and Teachers, Alaska Education Standards and integrated with Standards for Culturally Responsive Schools. Prerequisites: Successful completion of EDSC F442 or permission of instructor. Stacked with EDSC F643. (2+0)

EDSC F457  Multicultural Education and School-Community Relations
4 Credits  Offered Spring
Focuses on the philosophy and theories underlying multicultural education as well as the development of positive school community relationships. Encourages pre-service educators to identify their own philosophy and culture and to recognize their cultural background as they instruct, assess and manage their students. Helps educators clarify the value of diversity in the classroom setting. Candidates discern the influence of diversity factors on students’ educational careers and the value of diversity to the Alaskan community. Acquaints candidates with teaching in rural Alaska. Explores models for effective teaching, means of village socialization, cultural information and programs that are particularly effective in rural and small school settings. Prerequisites: Admission to Internship year or permission of instructor. Stacked with EDSC F657. (3+0+1)

EDSC F458  Classroom Organization and Management
3 Credits  Offered Fall
Focus on establishment of a positive learning environment, development of a successful discipline plan consistent with an educator’s philosophy of education and a review of the major discipline models. Candidates will examine the role that factors such as culture, gender, interest, ability and exceptionality play in student’s behavior. Techniques to maintain positive student-teacher interactions in the classroom and establish a positive relationship with parents. Developing strategies to incorporate local knowledge and community culture in to classroom practice. Field experience required. Completion of EDSC F205 or EDSC F415 is recommended prior to enrollment in this course. Prerequisites: ENGL F111X; junior standing or above; or permission of instructor. Stacked with EDSC F658. (3+0)

EDSC F471  Secondary Teaching: School Internship I and Seminar
3 Credits  Offered Fall
Supervised observation and teaching in secondary schools approved by the School of Education. Seminar topics may include special attention to school-community relations, special needs, curriculum development, teaching strategies and the integration of technology across the curriculum. The School of Education may limit enrollment, determine assignments and cancel registration of candidates doing unsatisfactory work. Graded Pass/Fail. Special fees apply. Prerequisites: Admission to secondary post-baccalaureate licensure program or permission of instructor. (1+0+25)

EDSC F472 O  Secondary Teaching: School Internship II and Seminar
3–9 Credits  Offered Spring
Supervised observation and teaching in secondary schools approved by the School of Education. Seminar topics may include special attention to school-community relations, special needs, curriculum development, teaching strategies and the integration of technology across the curriculum. Credits may be added upon completion of designated special projects developed by students and faculty. The School of Education may limit enrollment, determine assignments and cancel registration of candidates doing unsatisfactory work. Graded Pass/Fail. Special fees apply. Prerequisites: COMM F131X or F411X; admission to the secondary post-baccalaureate licensure program or permission of instructor. (1+0+4.16)
EDSC F614 Learning, Development and Special Needs Instruction
3 Credits Offered Summer
Survey of learning theory, adolescent development and special needs instruction. Attention will be given to the cognitive, social and moral theories of development, and to current theories of learning. Consideration will be given to cultural and individual differences among learners including those with special needs. Completion of EDSC F205 or EDSC F415 is recommended prior to enrollment in this course. Stacked with EDSC F414. (3+0)

EDSC F631 Secondary Instruction and Assessment in the Content Area
3 Credits Offered Fall
Methodologies of instruction and assessment in the candidate's specific content area. Course is taught by content specialists. Discusses current issues, methodologies and teaching strategies specific to the various disciplines. A maximum of nine credits may be earned. Prerequisites: Admission to the secondary post-baccalaureate licensure program or permission of instructor. Stacked with EDSC F431. (3+0)

EDSC F632 English/Language Arts Secondary Instruction and Assessment
3 Credits Offered Fall
Methodologies of instruction and assessment in English/language arts. Course is taught by content specialists. Includes discussion of current issues, methodologies, and teaching strategies specific to English/language arts. Prerequisites: Admission to Internship year or permission of instructor. Stacked with EDSC F432. (3+0)

EDSC F633 Mathematics Secondary Instruction and Assessment
3 Credits Offered Fall
Methodologies of instruction and assessment in mathematics. Course is taught by content specialists. Includes discussion of current issues, diverse methodologies and practical application for teaching mathematics. Prerequisites: Admission to Internship year or permission of instructor. Stacked with EDSC F433. (3+0)

EDSC F634 Science Secondary Instruction and Assessment
3 Credits Offered Fall
Methodologies of instruction and assessment in science. Course is taught by content specialists. Includes discussion of current issues, diverse methodologies, inquiry-based lessons, laboratory experiences and field trips for teaching science. Prerequisites: Admission to the Internship year or permission of instructor. Stacked with EDSC F434. (3+0)

EDSC F635 Social Studies Secondary Instruction and Assessment
3 Credits Offered Fall
Methodologies of instruction and assessment in social studies. Course is taught by content specialists. Includes discussion of current issues, diverse methodologies, project-based activities and community associated laboratory experiences for teaching social studies. Prerequisites: Admission to Internship year or permission of instructor. Stacked with EDSC F435. (3+0)

EDSC F636 Art Secondary Instruction and Assessment
3 Credits Offered Fall
Methodologies of instruction and assessment in art. Course is taught by content specialists. Includes discussion of current issues, methodologies and teaching strategies specific to arts. Prerequisites: Admission to Internship year or permission of instructor. Stacked with EDSC F436. (3+0)

EDSC F637 World Language Secondary Instruction and Assessment
3 Credits Offered As Demand Warrants
Methodologies of instruction and assessment in world languages. Course is taught by content specialists. Includes discussion of current issues, diverse methodologies and current application of teaching strategies and assessment specific to world languages. Prerequisites: Admission to the Internship year or permission of the instructor. Stacked with EDSC F437. (3+0)

EDSC F642 Technology Applications in Education I
1 Credit Offered Fall
This course focuses on initial instruction in educational technology and applications as a resource for the delivery of instruction to enhance student learning. The course is designed to introduce participants to technology tools to create, implement and assess instructional material in a variety of media. Participants will set up a professional electronic portfolio that demonstrates professional development and achievement relative to the ISTE National Technology Standards for Students and Teachers, Alaska Education Standards, and integrated with Standards for Culturally Responsive Schools. Prerequisites: Admission to the Internship year or permission of instructor. Stacked with EDSC F442. (1+0)

EDSC F643 Technology Application in Education II
2 Credits Offered Spring
This course is designed to increase participants’ use of technology tools to create and implement instructional materials in a variety of media to support and assess learning. Participants will develop an electronic portfolio that demonstrates professional development and achievement relative to the ISTE National Standards for Students and Teachers, Alaska Education Standards and integrated with Standards for Culturally Responsive Schools. Prerequisites: Successful completion of EDSC F642 or permission of the instructor. Stacked with EDSC F443. (2+0)

EDSC F657 Multicultural Education and School-Community Relations
4 Credits Offered Spring
Focuses on the philosophy and theories underlying multicultural education as well as the development of positive school community relationships. Encourages pre-service educators to identify their own philosophy and culture and to recognize their cultural background as they instruct, assess, and manage their students. Helps educators clarify the value of diversity in the classroom setting. Candidates discern the influence of diversity factors on students’ educational careers and the value of diversity to the Alaskan community. Acquaints candidates with teaching in rural Alaska. Explore models for effective teaching, means of village socialization, cultural information and programs that are particularly effective in rural and small school settings. Prerequisites: Admitted to the Internship year or permission of instructor. Stacked with EDSC F457. (3+0)

EDSC F658 Classroom Organization and Management
3 Credits Offered Fall
Focuses on establishment of a positive learning environment, development of a successful discipline plan consistent with an educator’s philosophy of education and a review of the major discipline models. Candidates will examine the role that factors such as culture, gender, interest, ability and exceptionality play in student’s behavior. Candidates will study techniques to maintain positive student-teacher interactions in the classroom and establish a positive relationship with parents. Developing strategies to incorporate local knowledge and community culture into classroom practice. Field experience required. Completion of EDSC F205 or EDSC F415 is recommended prior to enrollment in this course. Stacked with EDSC F458. (3+0)

EDSE F316 Introduction to Special Education for Elementary Classroom Teachers
3 Credits Offered Fall and Spring
The course provides an introduction to special education for students preparing to become an elementary classroom teacher. It provides an in-depth understanding of concepts, strategies and issues identifying and supporting the needs of elementary students who experience disabilities. Course content includes reviews of all categorical disabilities, developmental disabilities, and laws pertinent to elementary-aged children’s disabilities. Requires field-work in an elementary special education classroom or an inclusive general elementary classroom. Prerequisites: ED F201 and Praxis I or permission of the instructor. (2.5+0+1)

EDUCATION: SPECIAL EDUCATION (EDSE)

EDSE F361 Introduction to Special Education for Elementary Classroom Teachers
3 Credits Offered Fall and Spring
The course provides an introduction to special education for students preparing to become an elementary classroom teacher. It provides an in-depth understanding of concepts, strategies and issues identifying and supporting the needs of elementary students who experience disabilities. Course content includes reviews of all categorical disabilities, developmental disabilities, and laws pertinent to elementary-aged children’s disabilities. Requires field-work in an elementary special education classroom or an inclusive general elementary classroom. Prerequisites: ED F201 and Praxis I or permission of the instructor. (2.5+0+1)
EDSE F648  Understanding FASD: Diagnosis, Intervention and Strategies  
3 credits  
This course gives students an overview of fetal alcohol spectrum disorders: how they are acquired; current diagnostic strategies; intervention strategies in social services, therapeutic environments and school settings; and individual case management strategies. By the end of the course, students should possess knowledge of working with children affected by fetal alcohol spectrum disorders, understand the psychosocial implications of this disorder, and be able to identify best possible strategies to accommodate and intervening with these individuals in a classroom setting. Stacked with EDSE F422. (3+0+1)

EDSE F422  Curriculum and Strategies II: High Incidence Disabilities  
3 credits  
Examines methods of instruction and strategies for addressing the needs of students with mild learning and behavior problems. A theoretical basis for selecting approaches is presented along with practical strategies that can be used in the classroom. Field experience required. Prerequisites: ED F201; EDSE F316, or permission of instructor. (2.5+0+1)

EDSE F424  Social/Emotional Development, Assessment, and Intervention  
3 credits  
Review current research in both normal and abnormal social/emotional development. Emphasizes the use of research-based practices in assessment and intervention. Explores academic and cultural diversity in the social/emotional growth of students with learning differences. Field experience required. (3+0+1)

EDSE F622  Curriculum and Strategies II: High Incidence Disabilities  
3 credits  
Examines methods of instruction and strategies for addressing the needs of students with mild learning and behavior problems. A theoretical basis for selecting approaches is presented along with practical strategies that can be used in the classroom. Additionally, development, implementation support and evaluation of Individual Education Program (IEP) plans for students with high incidence disabilities such as attention deficit hyperactivity disorder, specific learning disabilities, emotional and behavioral disorders and communication disorders. Provides in-depth understanding of best practice strategies for supporting students with high incidence disabilities. Field and research experience required. Prerequisite: ED F201 or EDSC F205 or other introduction to education course or permission of the instructor. Stacked with EDSE F422. (3+0+1)

EDSE F625  Teaching Mathematics to Special Learners  
3 credits  
Provides assessment and instructional strategies in mathematics for teachers of students with disabilities. Focuses on standards-based instruction, explicit instruction, curriculum-based assessments and preparation of students for high stakes testing. Field experience required. (3+0+1)

EDSE F632  Special Education Law: Principles and Practices  
3 credits  
Examines three federal laws that form the foundation of disability law: Individuals with Disabilities Education Act (IDEA) 2004; Section 504 of the Rehabilitation Act of 1973; and the Americans with Disabilities Act. Focuses on substantive principles that underlie procedural requirements including due process issues, case law analysis, policy changes and the creation of a legally defensible Individual Educational Program (IEP). (3+0)

EDSE F642  Understanding FASD: Diagnosis, Intervention and Strategies  
3 credits  
This course gives students an overview of fetal alcohol spectrum disorders: how they are acquired; current diagnostic strategies; intervention strategies in social services, therapeutic environments and school settings; and individual case management strategies. By the end of the course, students should possess knowledge of working with children affected by fetal alcohol spectrum disorders, understand the psychosocial implications of this disorder, and be able to identify best possible strategies to accommodating and intervening with these individuals in a classroom setting. (3+0+1)

EDSE F610  Assessment of Students with Disabilities  
3 credits  
Techniques and methods used for assessing students with disabilities. Focuses on the purpose of assessment, testing terminology and statistics, and administration and interpretation of formal and informal assessment procedures. Address assessment issues in all Alaskan communities. Field experience required. (3+0+1)

EDSE F648  Understanding FASD: Diagnosis, Intervention and Strategies  
3 credits  
This course gives students an overview of fetal alcohol spectrum disorders: how they are acquired; current diagnostic strategies; intervention strategies in social services, therapeutic environments and school settings; and individual case management strategies. By the end of the course, students should possess knowledge of working with children affected by fetal alcohol spectrum disorders, understand the psychosocial implications of this disorder,
and be able to identify best possible strategies to accommodating and intervening with these individuals in a classroom setting. Research projects required. **Prerequisite:** Graduate standing. Stacked with EDSE F448. (3+0)

**EDSE F677**  
**Reading Assessment, Curriculum and Strategies**  
3 Credits  
Offered: Spring; As Demand Warrants  
Use and interpretation of reading assessments. The development of effective, research-based instructional strategies for students with disabilities who experience difficulties reading in any Alaska community. Field experience required. (3+0+1)

**EDSE F678**  
**Special Education Clinical Practice: Initial**  
3 Credits  
Offered: Every Fall, Spring, Summer  
For initial licensure candidates only. Part-time fieldwork experience (minimum 120 hours) with individuals who have disabilities in approved K–12 public schools and affiliated facilities. Fieldwork assignments are in inclusive pullout and self-contained settings. Includes immersion in special education planning and teaching under the direction of a supervising teacher and university supervisor. Includes regularly scheduled seminars. Must be completed before enrollment in EDSE F680. Special fees apply. **Prerequisite:** Successful completion of 18 approved credits in graduate level special education coursework. (3+0+20)

**EDSE F680**  
**Special Education Clinical Practice**  
3 Credits  
For certified and initial licensure special education candidates. Full time field experience with individuals who have disabilities in approved K–12 public schools and affiliated facilities. Fieldwork assignments vary across areas of teaching specialization. Candidates assume full classroom responsibilities for planning, instruction and assessment under the direction of site and university supervisors. Includes regular seminars. Special fees apply. **Prerequisite:** Successful completion of 18 approved credits in graduate level special education coursework. EDSE F678 (for initial licensure students only) Must be taken concurrently with EDSE F681. (1+0+35)

**EDSE F681**  
**Special Education Portfolio**  
3 Credits  
Offered: Fall; As Demand Warrants  
Development of special education portfolio based on UAF School of Education conceptual framework, Council for Exceptional Children (CEC) Special Education Standards, Alaska Teacher Standards, and Assembly of Alaska Native Educator (AANE) Guidelines for Preparing Culturally Responsive Teachers for Alaska's Schools. Must be taken concurrently with EDSE F680. **Prerequisite:** Successful completion of 18 credits in graduate level special education coursework. (3+0)

**EDUCATOR: PARA-PROFESSIONAL**

**EDPA F110**  
**Introduction to Para-Professional Education**  
2 Credits  
The roles and responsibilities of the para-professional educator, including requirements of confidentiality, school policies and procedures, and rights and responsibilities, of parents students and school staff. **Recommended:** ABUS F170; DEVS F104; ENGL F111X or above. (2+0)

**EDPA F120**  
**Classroom Management**  
2 Credits  
Offered As Demand Warrants  
Comprehensive course to observe and document a variety of strategies for effective classroom organization, management and communication. Students will discuss and reflect upon the relationship between classroom management and student learning and learn strategies for establishing a positive classroom environment. **Recommended:** ABUS F170; DEVS F104; ENGL F111X or above. (2+0)

**EDPA F130**  
**Differentiating Instruction**  
2 Credits  
Offered As Demand Warrants  
Different modalities of learning and teaching strategies necessary for meeting individual learners’ needs. Course may be repeated once for credit. **Recommended:** ABUS F170; DEVS F104; ENGL F111X or above. (2+0)

**EDPA F140**  
**Developing Children as Writers**  
1 Credit  
Offered As Demand Warrants  
How to assist teachers in assessing student writing skills and developing children as writers. Para-professionals will become skilled in linking writing to the culture and environment of the child. Course may be repeated twice for credit. Graded Pass/Fail. **Recommended:** ABUS F170; DEVS F104; ENGL F111X or above. (1+0)

**EDPA F150**  
**Developing Children as Readers**  
1 Credit  
Offered As Demand Warrants  
Developing skills necessary for assisting teachers in using best practices in teaching reading in the elementary classroom. Para-professionals will become skilled in linking reading to the culture and environment of the child. Course may be repeated twice for credit. Graded Pass/Fail. (1+0)

**EDPA F160**  
**Primary Math Methods**  
1 Credit  
Offered As Demand Warrants  
Developing the skills necessary for assisting teachers in using best practices in teaching math in the primary classroom. Para-professionals will become skilled in linking mathematics to the culture and environment of the child. Course may be repeated twice for credit. (1+0)

**EDPA F170**  
**Upper Elementary Math Methods**  
1 Credit  
Offered As Demand Warrants  
Developing the skills necessary for assisting teachers in using best practices in teaching math in the elementary classroom. Para-professionals will become skilled in linking mathematics to the culture and environment of the child. Course may be repeated three times for credit. Graded Pass/Fail. (1+0)

**EDPA F190**  
**Integrating Local Knowledge into the Curriculum**  
1 Credit  
Offered As Demand Warrants  
Learn the prehistory, history and culture of the students’ communities and regions, and strategies for integrating this knowledge into the school curriculum. Course may be repeated three times for credit. Graded Pass/Fail. (1+0)

**EDPA F199**  
**Practicum I**  
1 Credit  
Offered As Demand Warrants  
Individualized work experience. The student will work as a para-professional in the classroom with a teacher or para-professional over a sustained period of at least three weeks. Course may be repeated once for credit. Graded Pass/Fail. **Recommended:** EDPA F110. (1+0)

**EDPA F210**  
**Technology in the Classroom**  
1 Credit  
Offered As Demand Warrants  
Comprehensive introduction to various ways that technology can be utilized in the classroom. Students will be exposed to practical computer use such as exploring software, electronic grade books, lesson plans, graphics, digital photography, internet use and Internet safety. Course may be repeated once for credit. **Prerequisites:** CIOS F100. (0.5+1)

**EDPA F250**  
**Current Topics for Educators**  
1 Credit  
Offered As Demand Warrants  
Focus on in-service training offered through school districts to update and train para-professionals and teachers on the use of district curriculum, policies, procedures, etc. Course may be repeated three times for credit. Graded Pass/Fail. (1+0)

**EDPA F299**  
**Practicum II**  
1 Credit  
Offered As Demand Warrants  
Individualized work experience. The student will work as a para-professional in the classroom with a teacher or para-professional over a sustained period of at least three weeks. Course may be repeated once for credit. Graded Pass/Fail. **Recommended:** EDPA F110. (1+0)
COURSES

ELECTRICAL ENGINEERING

EE F102  Introduction to Electrical and Computer Engineering  3 Credits  Offered Spring
Basic modern devices, concepts, technical skills and instruments of electrical engineering. Special fees apply.  **Prerequisite or Co-requisite: MATH F200X.** (2+3)

EE F203  Electrical Engineering Fundamentals I  4 Credits  Offered Fall
Analysis of alternating-current circuits using complex notation and phasor diagrams, resonance, transformers and three-phase circuits. Introduction to network and system analysis. Special fees apply.  **Prerequisites: MATH F200X; EE F102. Prerequisite or Co-requisite: MATH F201X.** (3+3)

EE F204  Electrical Engineering Fundamentals II  4 Credits  Offered Spring
Electronics of solid state devices, amplifier design, digital circuits, electromechanics, control systems and instrumentation. Special fees apply.  **Prerequisites: EE F203; MATH F201X. Prerequisite or Co-requisite: MATH F202X.** (3+3)

EE F303  Electrical Machinery  4 Credits  Offered Fall
Electromechanical energy conversion principles, characteristics and applications of transformers, synchronous and induction machines, DC machines, and special machines. Special fees apply.  **Prerequisites: EE F204.** (3+3)

EE F311  Applied Engineering Electromagnetics  3 Credits  Offered Fall
Analysis and design of transmission lines and distributed linear circuits using impedance concepts. Development of electromagnetic field equations and their relation to circuit models. Magnetostatics and the magnetic circuit. Electromagnetic wave propagation. Application of the wave equation to engineering systems.  **Prerequisites: EE F204; MATH F201X. Prerequisite or Co-requisite: MATH F202X.** (3+3)

EE F331  High Frequency Lab  1 Credit  Offered Fall
Laboratory experiments in transmission lines, impedances, bridges, scattering parameters, hybrids and waveguides. Special fees apply.  **Prerequisite or Co-requisite: EE F311.** (0+3)

EE F333 W  Physical Electronics  4 Credits  Offered Fall
Basic properties of semiconductors. Principles of semiconductor devices, diodes, transistors and integrated circuits. Special fees apply.  **Prerequisites: EE F204; ENGL F111X; ENGL F211X or ENGL F213X or permission of instructor.** (3+3)

EE F334  Electronic Circuit Design  4 Credits  Offered Spring
Application of semiconductor devices in circuit design in computation, automatic control and communication. Special fees apply.  **Prerequisites: EE F333.** (3+3)

EE F341  Digital and Computer Analysis and Design  4 Credits  Offered Fall
Modular structure of computer systems. Analysis, design and implementation of combinational and sequential logic machines. Introduction to microprocessor architecture and microprocessor programming. Design with traditional and hardware description language techniques. Special fees apply.  **Prerequisites: CS F201; one year of college physics.** (3+3)

EE F343  Digital Systems Analysis and Design  4 Credits  Offered Fall
Fundamental principles and practices of digital design. Analysis, design and implementation of combinational and sequential logic machines. Introduction to microprocessor architecture and microprocessor programming. Analysis of digital data transmission techniques and microprocessor interfacing. Design with traditional and hardware description language techniques. Implementation with both medium and large scale integrated (M/LSI) chips and programmable logic devices (PLDs). Special fees apply.  **Prerequisites: ES F201 or CS F201; EE F204; EE F333. Note: EE F333 may be taken concurrently.** (3+3)

EE F353  Circuit Theory  3 Credits  Offered Fall
Analysis by Laplace transform, state variable, and Fourier methods, convolution, frequency selective networks, and two-port circuits.  **Prerequisites: EE F204; ES F201 or CS F201; MATH F202X. Prerequisite or Co-requisite: MATH F302.** (3+0)

EE F354  Engineering Signal Analysis  3 Credits  Offered Spring
Analog signals and Fourier transformations. Discrete time signals and FFT. Probability theory and random variables. Random signals and noise.  **Prerequisites: EE F353; MATH F302.** (3+0)

EE F404  Electrical Power Systems  4 Credits  Offered Spring
Electrical power transmission and distribution systems, power flow, symmetrical faults, and economic dispatch with computer-aided analysis. Special fees apply.  **Prerequisites: EE F303.** (3+3)

EE F406  Electrical Power Engineering  4 Credits  Offered Fall
Economic operation of power systems, symmetrical and unsymmetrical faults, power system protection, dynamic power system stability, and computer-aided fault and transient stability analysis. Special fees apply.  **Prerequisites: EE F404 or equivalent.** (3+5)

EE F408 W,O  Power Electronics Design  4 Credits  Offered Spring
Analysis and design of power electronic conversion, control and drive systems. Topics will include the theory and application of thyristors, rectifiers, DC-DC converters, inverters, resonant converters, AC and DC switches and regulators, power supplies, DC drives and adjustable-speed drives, including variable-frequency drives. Includes laboratory exercises exercises using power electronic converter boards, PSPICE, and a complete power electronics design project.  **Prerequisites: ENGL F111X; ENGL F211X or ENGL F213X; COMM F131X or COMM F141X; EE F303; EE F334; EE F354 or permission of instructor. Prerequisites: Senior standing. Stacked with EE F608.** (3+3)

EE F412  Electromagnetic Waves and Devices  3 Credits  Offered Fall
Solution of Maxwell’s equations for the interaction of electromagnetic waves with conducting and dielectric media. Theory and design of antennas and waveguides.  **Prerequisites: EE F311; EE F331; MATH F302.** (3+0)

EE F432  Electromagnetics Laboratory  1 Credit  Offered Spring
Laboratory experiments with microwave sources, propagating electromagnetic waves, waveguides and antennas. Design, construction and testing of antenna systems.  **Co-requisites: EE F412.** (0+3)

EE F434 W,O  Instrumentation Systems  4 Credits  Offered Spring
Analysis and design of instrumentation systems. Static and dynamic characteristics; accuracy, noise and reliability; sensors; signal conditioning; typical measurement systems and microprocessor applications. Special fees apply.  **Prerequisites: COMM F131X or COMM F141X; EE F334; EE F433; EE F354; ENGL F111X; ENGL F211X or ENGL F213X or permission of instructor; senior standing.** (3+3)

EE F443  Computer Engineering Analysis and Design  4 Credits  Offered Spring
Advanced digital design, and principles and practices of computer engineering. Analysis and design of computer architecture and organization. Digital signal processing techniques and hardware. Microprocessor operation, control and interfacing. Design with traditional and hardware description

332  Course Descriptions  2014-2015 CATALOG
## Course Descriptions

### Electrical Engineering (EE)

#### EE F444 W,O
**Embedded Systems Design**

**4 Credits**  
Offered Spring

Issues surrounding the design and implementation of microcontroller-based embedded systems. Topics include hardware architecture and glue logic, embedded programs design, analysis, and optimization, hardware/firmware partitioning, firmware architecture and design. Includes laboratory exercises using evaluation board and a complete embedded system design project. Emphasis on robust designs, energy efficiency, and proper documentation. Special fees apply.  
**Prerequisites:** EE F341 or EE F343.  
(3+3)

#### EE F451
**Digital Signal Processing**

**4 Credits**  
Offered Fall

Time, frequency and Z-transformation domain analysis of discrete time systems and signals; discrete Fourier transformation (DFT) and FFT implementations; FIR/IIR filter design and implementation techniques; discrete time random signals and noise analysis; quantization and round off errors; and spectral analysis. Includes applications to medical, speech, electromagnetic and acoustic signal analysis. Special fees apply.  
**Prerequisites:** EE F354 or equivalent. Stacked with EE F651.  
(3+3)

#### EE F461
**Communication Systems**

**4 Credits**  
Offered Fall

Theory, design and implementation of communication systems. Measurement of modulation, noise, channel spectrum, satellite link budget and microwave path design. Special fees apply.  
**Prerequisites:** EE F354; senior standing.  
(3+3)

#### EE F463
**Communication Networks**

**3 Credits**  
Offered Spring

**Prerequisites:** EE F354 and Senior standing.  
(3+0)

#### EE F464 W,O
**Communication Networks Design**

**4 Credits**  
Offered Spring

**Prerequisites:** COMM F131X or COMM F141X; EE F343; ENGL F111X; ENGL F211X or ENGL F213X or permission of instructor; senior standing.  
(3+3)

#### EE F471
**Fundamentals of Automatic Control**

**3 Credits**  
Offered Spring

**Prerequisites:** EE F353; MATH F302.  
(3+0)

#### EE F488
**Undergraduate Research**

**1–3 Credits**  
Advanced research topics from outside the usual undergraduate requirements.  
**Prerequisites:** Permission of instructor. Recommended: A substantial level of technical/scientific background.  
(0+0)

#### EE F608 W.O
**Power Electronics Design**

**4 Credits**  
Offered Spring

Analysis and design of power electronic conversion, control and drive systems. Topics will include the theory and application of thyristors, rectifiers, DC-DC converters, inverters, resonant converters, AC and DC switches and regulators, power supplies, DC drives and adjustable-speed drives, including variable-frequency drives. Includes laboratory exercises using power electronic converter boards, PSFICE, and a complete power electronics design project.  
**Prerequisites:** ENGL F111X; ENGL F211X or ENGL F213X; COMM F131X or COMM F141X; EE F303; EE F334; EE F354 or permission of instructor; senior standing. Stacked with EE F408.  
(3+1)

#### EE F611
**Waves**

**3 Credits**  
Offered Spring Odd-numbered Years

Introduction to waves and wave phenomena. Includes electromagnetic, acoustic, seismic, atmospheric and water waves and their mathematical and physical treatment in terms of Hamilton’s principle. Discusses propagation, attenuation, reflection, refraction, surface and laminal guiding, dispersion, energy density, power flow, and phase and group velocities. Treatment limited to plane harmonic waves in isotropic media.  
**Prerequisites:** MATH F302 or MATH F421 or permission of instructor.  
(3+0)

#### EE F634
**Microwave Design I**

**3 Credits**  
Offered Fall Odd-numbered Years

Analysis, design, fabrication and measurement of passive microwave components and circuits using microstrip construction techniques. Theoretical and computer-aided design of transmission lines, power dividers, hybrids, directional couplers and filters. Special fees apply.  
**Prerequisites:** EE F334; EE F412; EE F432; or permission of instructor.  
(2+3)

#### EE F635
**Microwave Design II**

**3 Credits**  
Offered Spring Even-numbered Years

Analysis and design of solid-state microwave circuits. Amplifier and oscillator circuits are designed and fabricated using microstrip construction techniques and computer-aided design tools. Special fees apply.  
**Prerequisites:** EE F634 or permission of instructor.  
(2+3)

#### EE F643
**Advanced Architectures for Parallel Computing**

**3 Credits**  
Offered Fall Odd-numbered Years

This course covers massively parallel computer architectures and their application for computationally intensive engineering problems. Fundamental hard-ware concepts and issues in designing such systems are introduced. Compute Unified Device Architecture (CUDA), developed by NVIDIA for the compute engines in their graphic processing units (GPUs), will be used as an example and a practical platform for student assignments. Through assignments and a project students will learn simulation, computational engineering, convolution, correlation, filtering, and similar problems of particular interest to engineering students.  
**Prerequisites:** CS F201 or ES F201; EE F443 graduate standing or permission of the instructor.  
(3+0)

#### EE F645
**Embedded Systems Design**

**4 Credits**  
Offered Spring

Issues surrounding the design and implementation of microcontroller-based embedded systems. Topics include hardware architecture and glue logic, embedded programs design, analysis, and optimization, hardware/firmware partitioning, firmware architecture and firmware design. Includes laboratory exercises using evaluation board and a complete embedded system design project. Emphasis on robust designs, energy efficiency, and proper documentation. Special fees apply.  
**Prerequisites:** Graduate standing or permission of the instructor. Stacked with EE F444.  
(3+3)

#### EE F646
**Wireless Sensor Networks**

**3 Credits**  
Offered Fall, Even-numbered Years

The course will survey the area of networked sensors, with a special focus on low-power wireless sensor networks. Topics covered will include communication standards and protocols for sensor networks, embedded operating systems, applications, collaborative processing, data fusion, and system architecture. Students will undertake a theoretical or practical research project.  
**Prerequisites:** CS F201 or ES F201; EE F343 or EE F341; graduate standing or permission of instructor.  
(3+0)

EMERGENCY MEDICAL SERVICES

EMS F150 Wilderness Emergency Care
3 Credits
Introduction to medicine in a remote setting. Assessment and management of life-threatening and non-threatening injuries, common medical emergencies and a variety of environmental injuries. Academically challenging training includes basic anatomy and physiology, appropriate short-term to multi-day patient care, the incident command system and evacuation and considerations. (3+0)

EMS F152 Emergency Trauma Training First Responder
3 Credits
Basic emergency care knowledge and skills for the student who will provide the first emergency care. The objective of the first person on the emergency scene is to recognize the needs of the victim and deliver quality care to the patient, minimizing discomfort and preventing further complications. (2+2)

EMS F154 Emergency Trauma Training Refresher
1 Credit
Offered Fall
For individuals who have been previously certified in Emergency Trauma Training (40 hrs.). Certification is valid for two years. Prerequisites: EMS F152 or ETT Certification which may not be expired more than one calendar year. (1+0)

EMS F160 Basic Trauma Life Support
1 Credit
Offered As Demand Warrants
Provides the first line of life support to the trauma patient as encountered in situ and to maintain life until the patient is handed off to the next level of medical help. Graded Pass/Fail. (1+0)

EMS F168 ETT to EMT Bridge Course
3 Credits
Offered As Demand Warrants
Allows certified emergency trauma technician (ETT) to progress to the emergency medical technician in an efficient manner. Credits the ETT with the knowledge and skills learned in primary training. Prerequisites: Current Emergency Trauma Technician certificate. (0.5+5)

EMS F170 EMT: Emergency Medical Technician I
6 Credits
Offered As Demand Warrants
Basic life support such as splinting, hemorrhage control, oxygen therapy, suction, CPR and use of automated external defibrillators (AEDs). EMT I is the foundation of all emergency medical training. Mastering of EMT I level knowledge and techniques must occur before moving on to advanced levels. Cross-listed with ARSK F170. (4+4)

EMS F172 EMT: Emergency Medical Technician I Refresher
1 Credit
Offered Fall
Review of basic skills and emergency medical procedures at the Basic EMT I level. Covers emergency medical care procedural changes, newly developed equipment and its use, changes in state licensure or other medical-legal requirements. Also offered Pass/Fail as EMS F172P. Prerequisites: EMT I certification. (0.5+1)

EMS F173 EMT I Internship
6 Credits
Offered Spring
Synthesize cognitive and psychomotor skills from the EMT I course and observe skills performed by Advanced Care Providers. Designed for individuals planning to participate in the CTC paramedic program in the fall semester. Interns will perform all aspects of emergency care for an Alaska certified EMT I under the guidance of an Advanced Care Provider. Graded Pass/Fail. Prerequisites: EMS F170; concurrent EMT I certification; permission of instructor. (0+16)

EMS F176 Aeromedical Evacuations in Alaska
1 Credit
Offered Fall
History of Alaska aeromedical transport; physiological aspects of pressure and atmosphere; physical effects of flight on the patient and escort; aircraft and equipment considerations; legal aspects of air transport; effects of aeromedical transport on specific medical situations. Graded Pass/Fail. Special fees apply. Prerequisites: EMT I certification or permission of instructor. (1+0)

EMS F181 Clinical Rotation I
4 Credits
Offered Fall, As Demand Warrants
Perform paramedic skills in the hospital setting under the guidance of a clinical preceptor. Rotations include the emergency department, ICU, operating room, respiratory therapy, and mental health units. Provides an in-depth look at the respiratory, circulatory and nervous systems. Includes interpretation of cardiac rhythms and advanced cardiac life support. Special fees apply. Prerequisites: Permission of program coordinator. Note: Student must have the strength to be able to move patients, sufficient vision to assess the condition of the patient and the dexterity to perform the skills of a paramedic. (0+4+4)

EMS F183 Clinical Rotation II
4 Credits
Offered Spring, As Demand Warrants
Perform paramedic skills in the hospital setting under the guidance of a clinical preceptor. Rotations include the emergency department, ICU, OR, labor and delivery, pediatrics and geriatrics. Prerequisites: EMS F181. Note: Student must have the strength to be able to move patients, sufficient vision to assess the condition of the patient and the dexterity to perform the skills of a paramedic. (0+4+4)

EMS F251 Basic Life Support Instructor
1 Credit
Offered As Demand Warrants
The American Heart Association Basic Life Support instructor’s course provides the knowledge and skills necessary to instruct and evaluate potential BLS providers. Balances what information to teach with how to teach BLS. The BLS instructor student will be monitored during the first class she/he teaches by the BLS instructor trainer. Graded Pass/Fail. Special fees apply. Prerequisites: Basic Life Support certified; permission of program coordinator. (1+0)

EMS F253 Alaska EMT Instructor Orientation
3 Credits
Offered As Demand Warrants
Adult education and learning environment, as well as regulations governing the teaching of EMTs in the state of Alaska. This course is designed to be an intensive learning experience with extensive out-of-class preparation. Proficiency with EMT skills and knowledge prior to entering this training program is expected as there will be no review of EMT skills or knowledge during this class. Graded Pass/Fail. Prerequisites: Current EMT I, II, III or MICP certification and three years of experience; evidence of successful completion of state of Alaska practical exam and written exam with a score of 90% within the last 12 months. Recommended: FIRE F216. (3+0)

EMS F257 Arctic Survival
3 Credits
Offered Spring
Principles, procedures, techniques and equipment necessary to survive extreme arctic conditions and to assist in safe recovery. Lab required. Special fees apply. Cross-listed with AVTY F231. (3+0)

EMS F261 EMT: Emergency Medical Technician II
3 Credits
Offered Spring
Advancement of EMT I skills and knowledge through advanced techniques in fluid therapy and advance airway management. Includes use of specific drug therapy. Special fees apply. Prerequisites: EMT I certification and proof of 10 patient contacts as an EMT II. (2+2)

EMS F265 Emergency Medical Technician III
2 Credits
Offered Fall
Introduction to basic cardiac anatomy and physiology, cardiac electrophysiology, recognition and treatment of basic lethal arrhythmias, use of monitor, defibrillator and pharmacological management. Special fees apply. Prerequisites: EMT II certification and proof of 10 patient contacts and 10 venipunctures as an EMT II. (0.5+3)
### COURSES

#### 336 Fundamentals of engineering economy, project scheduling, estimating, and cost analysis. 3 Credits

Offered As Demand Warrants
State requirements for recertification at the EMT II or III levels. Reviews advanced medical skills and emergency medical procedures at the EMT II and III levels. Emergency medical care procedural changes, newly developed equipment and its use, changes in state certification and other medical-legal requirements. Course may be repeated ten times but not for credit. Graded Pass/Fail. Special fees apply. **Prerequisites:** Current EMT II or III certification. *(0.5+1)*

#### 337 Project Management 3 Credits

Stacked with ESM F622. *(3+0)*
Recommended: Calculus through MATH F302. Network models and utility theory. Engineering judgment and uncertainty. Applications of decision tools: linear programming, inventory analysis, queuing, simulation, dynamic programming. Emphasis on use of techniques in actual situations. Solutions. **Prerequisites:** Calculus through MATH F302 or equivalent. *(3+0)*

#### 338 Economic Analysis and Operations 3 Credits

Fundamentals of engineering economy, project scheduling, estimating, legal principles, professional ethics and human relations. Note: Not offered for credit toward the M.S. degree in Engineering Management or Science Management. **Prerequisites:** ENGL F111X; ENGL F211X or ENGL F213X; ES F201 or CS F201; senior standing in engineering; or permission of instructor. Note: Undergraduate engineering students who are taking graduate ESM courses as technical electives should have completed or be concurrently enrolled in ESM F450. *(3+0)*

#### 339 Managing and Leading Engineering Organizations 3 Credits

Offered Fall Even-numbered Years
Leadership knowledge and skills as applied to motivation, direction and communication within engineering and technical organizations, and their relations with other organizations and the public. Leadership training complements management knowledge and activities such as organizational structures, planning, monitoring, directing and controlling. The general tools of management are reviewed including management theory, communications, conflict management and resolution. **Recommended:** BS degree in engineering or physical science or permission of instructor. *(3+0)*

#### 340 Risk and uncertainty in engineering decisions. Basic applied probability and statistics, data analysis, regression analysis and time series. Practical applications of decision tools: linear programming, inventory analysis, queuing, network models, utility theory. Engineering judgment and uncertainty. Public safety and ethics. A class project and paper are required. **Recommended:** Calculus through MATH F302. *(3+0)*

#### 341 Project Management 3 Credits

Offered As Demand Warrants
Organizing, planning, scheduling and controlling projects. Use of CPM andPERT, computer applications. Case studies of project management problems and solutions. **Recommended:** Graduate standing or permission of instructor. *(3+0)*

#### 342 Operations Research 3 Credits

Offered As Demand Warrants
Mathematical techniques for aiding technical managers in decision making. Linear programming, transportation problem, assignment problem, network models, PERT/CPM, inventory models, waiting line models, computer simulation, dynamic programming. Emphasis on use of techniques in actual technical management situations. Computer applications. **Recommended:** MATH F202X; STAT F200X. *(3+0)*

#### 343 Risk and uncertainty in engineering decisions. Basic applied probability and statistics, data analysis, regression analysis and time series. Practical applications of decision tools: linear programming, inventory analysis, queuing, network models, utility theory. Engineering judgment and uncertainty. Public safety and ethics. A class project and paper are required. **Recommended:** Calculus through MATH F302. *(3+0)*

#### 344 Engineering Management Project 3 Credits

Comprehensive study of an actual engineering management problem resulting in reports and presentations which include recommendations for action. **Prerequisites:** Graduate standing in Engineering Science Management or permission of instructor. *(3+0)*

---

### ENSR F267 Advanced Medical Procedures 1 Credit

Offered As Demand Warrants
Introduction to emergency medical services, the roles and responsibilities of a paramedic and medical/legal/ethical issues. Basic pathophysiology, pharmacology, venous access and advanced airway management techniques. Also includes an in-depth look at the circulatory, respiratory and nervous systems which includes interpretation of cardiac rhythms, pharmacology and advanced cardiac life support. Note: Student must apply for admission into the Paramedic Academy. Applications are reviewed by the Paramedic Advisory board. Special fees apply. **Prerequisites:** ENSR F280. **Note:** Student must have the strength to be able to move patients, sufficient vision to assess the condition of the patient and the dexterity to perform the skills of a paramedic. *(8+8)*

#### 268 Paramedicine I 12 Credits

Offered As Demand Warrants
Assessment and management of medical emergencies, geriatrics, pediatrics and traumatic injuries. Includes pediatric advanced life support and basic trauma life support certifications. Special fees apply. **Prerequisites:** ENSR F280. **Note:** Student must have the strength to be able to move patients, sufficient vision to assess the condition of the patient and the dexterity to perform the skills of a paramedic. *(8+8)*

#### 269 Paramedic Internship 12 Credits

Offered Spring
Prehospital field experience under the guidance of a paramedic preceptor on an advanced life support ambulance. Interns perform all aspects of paramedic care. Special fees apply. **Prerequisites:** ENSR F183; ENSR F277. **Note:** Student must have the strength to be able to move patients, sufficient vision to assess the condition of the patient and the dexterity to perform the skills of a paramedic. *(0+24)*

#### 270 Paramedic Refresher 3 Credits

Offered As Demand Warrants
Integration of paramedicine knowledge and techniques with evaluation of applied skills. **Prerequisites:** Current State of Alaska or National Registry paramedic license. **Note:** Student must have the strength to be able to move patients, sufficient vision to assess the condition of the patient and the dexterity to perform the skills of a paramedic. *(2+2)*
ENGINEERING SCIENCE

A per-semester fee for computing facilities will be assessed for one or more CEM courses. This fee is in addition to any materials fees.

ES F101 Introduction to Engineering
3 Credits
Overview of the engineering profession and introduction to the fields of engineering. Basic concepts from engineering, physics and mathematics applied to engineering problem solving. Basic skills required of engineers, including an introduction to engineering communications: word processing, descriptive geometry, orthographic and isometric drawings, graphics, computer graphics and use of spreadsheets. Special fees apply. Prerequisites or Co-requisite: MATH F107X or MATH F108 OR enrollment in MATH F200X. (2+3)

ES F166 Electric Car Conversion
2 Credits
Offered Summer
An introduction to the principles of electrical vehicle propulsion systems. Fundamentals of electrical motors, electrical motor controls, electrical energy storage systems and automotive power-train design. Students will conduct practical design projects culminating with a complete electric car conversion. Relevant codes and standards will be emphasized. (1+3)

ES F201 Computer Techniques
3 Credits
Basic computer programming, in C/C++, with applications from all fields of engineering. Introduction to MATLAB. Prerequisites: MATH F107X and MATH F108 OR enrollment in MATH F200X. (2+3)

ES F208 Mechanics
4 Credits
Engineering-oriented coverage of statics and dynamics. Vector methods used where appropriate. Prerequisites: ES F101 or GE F101 or MIN F103 or PETE F104; MATH F201X; PHYS F211X. (3+3)

ES F209 Statics
3 Credits
Force systems in two and three dimensions. Composition and resolution of forces and force systems; principles of equilibrium applied to various bodies, simple structures, friction, centroids, moments of inertia. Vector algebra used where appropriate. Prerequisites: ES F101. Prerequisite or Co-requisite: MATH F201X; PHYS F211X. (3+0)

ES F210 Dynamics
3 Credits
Motion of particles, kinematics and kinetics of plane motion of rigid bodies, and principles of work and energy, impulse and momentum. Vector methods used where appropriate. Prerequisites: ES F209 and MATH F201X. (3+0)

ES F301 Engineering Analysis
3 Credits
Application of mathematical tools to typical engineering design problems. Selected topics from all fields of engineering. Prerequisites or co-requisites: MATH F302. (3+0)

ES F307 Elements of Electrical Engineering
3 Credits
Offered Fall
Elementary circuits and theorems, natural, forced and steady state response, principles of electronics, circuit models and system parameters, elements of measurement and instrumentation, characteristics of DC machines, and AC machines and transformers. Prerequisites: MATH F202X or permission of instructor. (3+0)

ES F331 Mechanics of Materials
3 Credits
Analysis of internal forces in members subjected to axial, torsional and flexural loads, singly and in combination. Stress-strain relationships and material property definitions; shear and moment diagrams, Mohr’s Circle. Applications include beams, columns, connections and indeterminate cases. Prerequisites: ES F208 or ES F209; MATH F201X. (3+0)

ES F341 Fluid Mechanics
4 Credits
Statics and dynamics of fluids; energy and momentum principles. Dimensional analysis; flow in open channels, closed conduits and around submerged bodies. Special fees apply. Prerequisites: ES F208 or ES F210; MATH F201X. (3+3)

ES F346 Basic Thermodynamics
3 Credits
Thermodynamic systems, properties, processes and cycles. Fundamental principles of thermodynamics (first and second laws), and elementary applications. Prerequisites: MATH F201X; PHYS F211X. (3+0)

ENGLISH

It is the policy of the English Department to drop from the class roll any student who fails to attend either of the first two meetings of a basic course (ENGL F111X, ENGL F200X, ENGL F211X, ENGL F213X) regardless of whether or not fees have been paid.

Developmental English

DEVE F060 Preparatory College Writing I
3 Credits
Intensive basic work in the process of writing and revising paragraphs and short academic papers. Focus on basic sentence and paragraph structure, revision techniques, and basic critical reading in the academic context. Special fees apply. Prerequisites: Appropriate placement test scores. (3+0)

DEVE F068 College Writing Skills
1–3 Credits
Individualized instruction in written language skills. Open entry/open exit, one credit modules in spelling/vocabulary, writing and grammar usage. Enrollment in one or more modules based on diagnosed need or student decision; may be repeated. Does not fulfill degree requirements in written communications or humanities. Graded Pass/Fail. (1-3+0)

DEVE F014 Preparatory College Writing II
3 Credits
Intensive intermediate work in the process of writing and revising short academic papers. Focus on complex sentence and paragraph structure, major revision techniques, and critical reading in the academic context. Preparation for DEVE F109 and ENGL F111X. Special fees apply. Prerequisites: C or better in DEVE F060/DEVS F052 or appropriate placement test scores. (3+0)

DEVE F109 Preparatory College Writing III
3 Credits
Intensive preparatory work in the college writing skills needed for ENGL F111X, including research, writing and revising, and critical reading skills. Special fees apply. Prerequisites: C or better in DEVE F104/DEVS F105 or appropriate placement test scores. (3+0)

English

ENGL F104 Institute on Language, Thought and Culture
3 Credits
Offered As Demand Warrants
Development of critical thinking, writing, and reading skills using the Bard College model. The intensive institute establishes and nurtures learning communities which support bold thinking, risk-taking, collaboration and independence. Offered only at the Kuskokwim Campus. (3+0)

ENGL F111X Introduction to Academic Writing
3 Credits
Instruction and practice in written inquiry and critical reading. Introduction to writing as a way of developing, exploring and testing ideas. Concentration on research methods and techniques. Available via eLearning and Distance Education. Prerequisites: Placement into ENGL F111X. (3+0)

</table>
criticism will foster in-depth understanding of chosen topic. Course may be repeated once for credit when content varies. **Prerequisites:** COMM F131X or COMM F141X; ENGL F211X or ENGL F213X or permission of instructor. (3+0)

ENGL F414 W Research Writing (h) 3 Credits Offered Fall Practice in reporting primary and secondary research in the forms and styles appropriate to the student's field. Preference given to seniors. **Prerequisites:** ENGL F111X; ENGL F211X or ENGL F213X or their equivalent or permission of instructor. (3+0)

ENGL F415 W,O/2 Studies in 17th- and 18th-Century British Literature (h) 3 Credits Offered Every Third Fall Intensive study of variable topics in 17th- and 18th-century British literature. May focus on themes or subjects such as gender or war in literature; a specific period such as literature of the 1660s; particular genres such as the gothic, satire, the sentimental novel; an important author; or an aspect of contemporary literary or cultural theory. Intensive readings and research in contemporary literary theory and criticism will foster in-depth understanding of chosen topic. Course may be repeated once for credit when content varies. **Prerequisites:** COMM F131X or COMM F141X; ENGL F211X or ENGL F213X or permission of instructor. (3+0)

ENGL F420 W,O/2 Studies in Medieval and 16th-Century British Literature (h) 3 Credits Offered Every Third Fall Intensive study of variable topics in medieval and 16th-century British literature. Themes may include Arthurian literature, fin'amor (courtly love), orality and literacy, and the Otherworld and other imaginary lands. Intensive readings and research in both primary texts and contemporary literary theory and criticism will foster in-depth understanding of chosen topic. Course may be repeated once for credit when content varies. **Prerequisites:** COMM F131X or COMM F141X; ENGL F211X or ENGL F213X or permission of instructor. (3+0)

ENGL F422 W,O/2 Shakespeare: History Plays and Tragedies (h) 3 Credits Offered Fall Major chronicle plays and tragedies, including significant criticism. **Prerequisites:** COMM F131X or COMM F141X; ENGL F111X; ENGL F211X or ENGL F213X or permission of instructor. Recommended: ENGL F308 desirable but not required. (3+0)

ENGL F425 W,O/2 Shakespeare: Comedies and Non-Dramatic Poetry (h) 3 Credits Offered Spring Major comedies and non-dramatic poems, including significant criticism. **Prerequisites:** COMM F131X or COMM F141X; ENGL F111X; ENGL F211X or ENGL F213X or permission of instructor. Recommended: ENGL F308 desirable but not required. (3+0)

ENGL F427 Topics in Film Studies (h) 3 Credits Offered Spring Intensive study of variable topics in film studies. May focus on themes such as race or war in film; a specific period such as films of the 1940s; particular genres such as horror, film noir, or the musical, an important director, or an aspect of contemporary film theory. Intensive readings and research in contemporary film theory and criticism will foster in-depth understanding of chosen topic. Course may be repeated two times for credit when content varies. **Prerequisites:** ENGL F217 or FLM F217; ENGL F211X or ENGL F213X; or permission of instructor. Cross-listed with FLM F427. (2+2)

ENGL F435 Authors (h) 3 Credits Offered Fall Intensive, in-depth study of the works of an individual author. Readings from the author's oeuvre along with significant criticism and commentary on the author's works. Course may be repeated once for credit when content varies. **Prerequisites:** ENGL F211X or ENGL F213X or permission of instructor. (3+0)

ENGL F440 W,O/2 Studies in 20th- and 21st-Century British Literature (h) 3 Credits Offered Every Third Spring Variable subject matter in significant topics in modern and contemporary British literature. Focus may be prose (fiction and nonfiction), poetry, drama, film, or a combination of the above. Course may be repeated once for credit when content varies. **Prerequisites:** ENGL F211X or ENGL F213X or permission of instructor. (3+0)

ENGL F450 W,O/2 Studies in 19th-Century British Literature (h) 3 Credits Offered Every Third Fall Intensive study of variable topics in 19th-century British literature. May take up a variety of concerns by focusing on literature associated with one or more specific 19th-century literary movements (e.g., Romanticism, Realism); historical developments (e.g., the Victorian Age, British colonialism); groups of related writers (e.g., the Lake Poets); social issues (e.g., industrialization, social reform, religion, gender); or an aspect of 19th-century literary theory. Intensive readings and research in contemporary literary theory and criticism will foster in-depth understanding of chosen topic. Course may be repeated once for credit when content varies. **Prerequisites:** COMM F131X or COMM F141X; ENGL F211X or ENGL F213X or permission of instructor. (3+0)

ENGL F455 W,O/2 Studies in 20th- and 21st-Century American Literature (h) 3 Credits Offered Every Third Spring Intensive study of variable topics in American literature. May focus on themes such as Modernism or Postmodernism, Urban Experience, Alienation, Multiculturalism, Race or War; a specific period such as literature of the 1960s; particular genres such as the novel or poetry, an important author; or an aspect of contemporary literary theory. Intensive readings and research in contemporary literary theory and criticism will foster in-depth understanding of chosen topic. Course may be repeated once for credit when content varies. **Prerequisites:** COMM F131X or COMM F141X; ENGL F211X or ENGL F213X or permission of instructor. (3+0)

ENGL F460 W,O/2 Studies in Comparative/World Literature (h) 3 Credits Offered Every Third Fall Intensive study of variable topics in Comparative/World Literature studies. May focus on themes, such as gender and race in world literature; a specific period, such as World Literature after 1945; a particular region, such as Africa; an important author; or an aspect of contemporary literary theory and criticism. Intensive readings and research in contemporary literary theory and criticism will foster in-depth understanding of chosen topic. Course may be repeated once for credit when content varies. **Prerequisites:** COMM F131X or COMM F141X; ENGL F211X or ENGL F213X or permission of instructor. (3+0)

ENGL F462 Applied English Linguistics (h) 3 Credits Offered Spring Even-numbered Years Topic(s) for each offering of the course are announced. Examples include teaching English as a second language, dialects and education, dictionaries, stylistics, and composition. **Prerequisites:** ENGL F211X or ENGL F213X or permission of instructor. (3+0)

ENGL F465 Genre (h) 3 Credits Offered Spring Intensive study of genre focusing on variable subjects such as epic, romance, science fiction, horror narratives, detective narratives, utopian fiction, and roman noir. Intensive readings and research in both primary texts and genre theory will foster in-depth understanding of chosen topic. Course may be repeated once for credit when content varies. **Prerequisites:** ENGL F211X or ENGL F213X or permission of instructor. (3+0)

ENGL F471 W Undergraduate Writers' Workshop (h) 3 Credits Offered Fall and Spring Discussion of craft and techniques and student work. For advanced students who prepare a manuscript as a final project. May be repeated one time for credit. **Prerequisites:** ENGL F111X; ENGL F211X or ENGL F213X; ENGL F371; or permission of instructor. (3+0)
ENGL F472 History of the English Language (h) 3 Credits
Offered Spring Even-numbered Years
Origin and development of the English language from prehistoric times to the present. Prerequisites: ENGL F211X or ENGL F213X or permission of instructor. Recommended: ENGL F318 or a linguistics course is desirable, but not required. (3+0)

ENGL F482 Topics in Language and Literature (h) 3 Credits
Offered Every Fall and Spring
Intensive study of variable topics in language and literature. May focus on themes, such as race, war, or the natural world; an aspect of language and linguistics; or an aspect of contemporary literary theory. Intensive readings and research in contemporary theory will foster in-depth understanding of chosen topic. Course may be repeated once for credit when content varies. Prerequisites: ENGL F211X or ENGL F213X or permission of instructor. (3+0)

ENGL F485 Teaching Composition in the Schools 3 Credits
Offered Spring Even-numbered Years
Theoretical background and workshop experience for teaching composition in middle and high schools with current pedagogy on teaching of writing stressed. Variety of teaching methods demonstrated, practiced and discussed. Prerequisites: ENGL F211X or ENGL F213X or permission of instructor. (3+0)

ENGL F488 W Dramatic Writing (h) 3 Credits
Offered Fall Odd-numbered Years
Introduction to the craft of dramatic writing for theater and film, with an emphasis on dramatic storytelling. Course will focus on giving students a practical understanding of the uses of story structure, setting, character, plot and dialog, and how these elements work together to create compelling drama. Prerequisites: ENGL F111X; ENGL F211X or ENGL F213X or permission of instructor. Cross-listed with FLM F488; THR F488. (3+0)

ENGL F601 Theory, Criticism and Methods 3 Credits
Offered Spring
A study of the theoretical debates that inform contemporary criticism, and of the methods for conducting and evaluating research. Prerequisites: Graduate standing or permission of instructor. (3+0)

ENGL F603 Studies in British Literature: Old and Middle English 3 Credits
Offered Fall Odd-numbered Years
Variable subject matter in significant topics in Anglo-Saxon and Middle English literature. Prerequisites: Graduate standing or permission of instructor. (3+0)

ENGL F604 Studies in British Literature: Renaissance and 17th-Century 3 Credits
Offered Fall Even-numbered Years
Variable subject matter in significant topics in 16th- and 17th-century British literature. Prerequisites: Graduate standing or permission of instructor. (3+0)

ENGL F606 Studies in British Literature: Restoration and 18th Century 3 Credits
Offered Fall Odd-numbered Years
Variable subject matter in significant topics in British literature of the Restoration period and the 18th century. Prerequisites: Graduate standing or permission of instructor. (3+0)

ENGL F607 Studies in British Literature: 19th Century 3 Credits
Offered Fall Even-numbered Years
Variable subject matter in significant topics in British literature of the Romantic and Victorian periods. Prerequisites: Graduate standing or permission of instructor. (3+0)

ENGL F608 Studies in British Literature after 1900 3 Credits
Offered Spring Odd-numbered Years
Variable subject matter in significant topics in modern British literature. Prerequisites: Graduate standing or permission of instructor. (3+0)

ENGL F609 Early and Romantic American Literature 3 Credits
Offered Fall Odd-numbered Years
Variable subject matter in significant topics of the colonial, national, and romantic periods of American literature. Prerequisites: Graduate standing or permission of instructor. (3+0)

ENGL F611 American Realism and Modernism 3 Credits
Offered Spring Even-numbered Years
Variable subject matter in significant topics in American literature of the late 19th and early 20th centuries. Prerequisites: Graduate standing or permission of instructor. (3+0)

ENGL F612 Twentieth-Century American Literature 3 Credits
Offered Spring Even-numbered Years
Variable subject matter in American Literature of the 20th-century. Prerequisites: Graduate standing or permission of instructor. (3+0)

ENGL F614 Studies in Comparative Literature 3 Credits
Offered Spring Odd-numbered Years
Advanced study in literature on a transnational basis with varying emphases, including literature of particular locales, modes or themes. Prerequisites: Graduate standing or permission of instructor. (3+0)

ENGL F615 Contemporary Literature 3 Credits
Offered Spring Even-numbered Years
Variable subject matter in significant topics in post-World War II literature. Prerequisites: Graduate standing or permission of instructor. (3+0)

ENGL F620 Images of the North 3 Credits
Offered Spring Even-numbered Years
Interdisciplinary approaches to the variety of images created about and by the people and environment of the circumpolar North. The course will analyze conceptualizations of the North as expressed in a number of media such as film, art, literature, travel journals and oral tradition employing methodologies from many disciplines. Prerequisites: Graduate standing or permission of instructor. Cross-listed with NORS F620. (3+0)

ENGL F661 Mentored Teaching in English 1 Credit
Offered Fall and Spring
Mentored teaching provides consistent contact on course-related issues between teaching assistants and mentoring faculty. Graded Pass/Fail. Prerequisites: Acceptance into the MA, MFA in creative writing program, or MFA/MA combined degree program, and a teaching assistantship award. Note: Teaching assistants are required to be enrolled in a mentored teaching section while teaching. May be repeated up to six times, for one credit per semester. (1+0+2)

ENGL F671 Writers’ Workshop 3 Credits
Offered Fall and Spring
The writing of verse, fiction, drama or nonfiction prose in accordance with the individual student’s needs and the instructor’s specialization. Depending on available staff, the workshop may be limited during any semester to work in a particular genre. Prerequisites: Graduate standing or permission of instructor. (3+0)

ENGL F681 Forms of Poetry 3 Credits
Offered Every Third Semester
Intensive study of the forms and techniques of poetry writing. Includes readings and poetry writing exercises. Prerequisites: Graduate standing or permission of instructor. (3+0)

ENGL F682 Forms of Fiction 3 Credits
Offered Every Third Semester
Advanced study in narrative technique through analysis of selected fiction and the students’ own writing. Variable content in terms of the writers to be studied and the kinds of narrative writing to be assigned. Prerequisites: Graduate standing or permission of instructor. (3+0)
ENGLISH (ENGL) — ENVIRONMENTAL ENGINEERING AND ENVIRONMENTAL QUALITY SCIENCE (ENVE)

ENGL F684  Forms of Nonfiction Prose  
3 Credits  
Offered Every Third Semester  
Intensive study of the forms and techniques of nonfiction. Includes readings and writing exercises. **Prerequisites: Graduate standing or permission of instructor.** (3+0)

ENGL F685  Teaching College Composition  
3 Credits  
Offered Fall  
An investigation into current practice and theory with demonstrations and reports on pedagogy. Required of all teaching assistants in English. **Prerequisites: Graduate standing or permission of instructor.** (3+0)

ENGL F686  Teaching Writing in a Cross-Cultural Context  
3 Credits  
Offered As Demand Warrants  
Contemporary methods of teaching writing in middle school and high school classrooms, with special emphasis on cross-cultural issues and pedagogy and on contemporary rhetorical theory. Includes methodologies and theoretical underpinnings of teaching grammar and fiction writing. **Prerequisites: Graduate standing or permission of instructor.** (3+0)

ENGL F688  Writing for Film and Television  
3 Credits  
Offered Spring Odd-numbered Years  
Advanced training in dramatic writing for film and television, with a focus on cinematic story structure, visual imagery, dialogue, pacing, continuity and manuscript format. **Prerequisites: Graduate standing or permission of instructor.** (3+0)

ENGL F692  Graduate Seminar  
3 Credits  
Offered As Demand Warrants  
Intensive study of selected topics in the discipline. (0+0+3)

ENVIRONMENTAL AS A SECOND LANGUAGE

ESLG F051  Speaking English as a Second Language  
1–3 Credits  
Offered As Demand Warrants  
Engaging in English conversation. For students who do not speak English as their first language, but who can understand and follow simple instructions in English. The emphasis is on large quantities of comprehensible English, and building student confidence in understanding and speaking it. May be repeated up to nine credits. (1-3+0)

ESLG F061  Reading English as a Second Language  
1–3 Credits  
Offered As Demand Warrants  
Language experience approach and other methods are used to increase students' abilities and to build their confidence in reading English as it is encountered everyday. For students whose first language is not English, this class provides an opportunity to develop the skills involved in reading simple passages in English. May be repeated up to nine credits. (1-3+0)

ESLG F071  Writing English as a Second Language  
1–3 Credits  
Offered As Demand Warrants  
Developing skills at writing simple English compositions. For students whose first language is not English. The emphasis is on writing large quantities of English which is understandable to native English speakers, and on building students' confidence in communicating through written English. May be repeated up to nine credits. (1-3+0)

ESLG F121  Intermediate Academic Listening and Speaking I  
4 Credits  
Offered Fall  
This course provides listening, note taking, and speaking skills development for the American university context. By the end of the course, students will be better able to understand and take notes on lectures covering a variety of academic topics, take an active role in classroom discussions, and give formal presentations. **Prerequisites: A minimum score of 50 on the TOEFL Internet-based test (iBT) or permission of the instructor.** (4+0)

ESLG F131  Intermediate Academic Listening and Speaking II  
4 Credits  
Offered Spring  
This course provides listening, note taking, and speaking skills development for the American university context. By the end of the course, students will be better able to understand and take notes on lectures covering a variety of academic topics, take an active role in classroom discussions, and give formal presentations. **Prerequisites: A minimum score of 50 on the TOEFL Internet-based test (iBT) or permission of the instructor.** (4+0)

ENVIRONMENTAL ENGINEERING AND ENVIRONMENTAL QUALITY SCIENCE

A per-semester fee for computing facilities will be assessed for one or more CEM courses. This fee is in addition to any materials fees.

ENVE F458  Energy and the Environment  
3 Credits  
Offered Fall Odd-numbered Years  
Overview of basic concepts of energy supply, demand, production of heat and power impacts of energy use on the environment. Extensive discussion of mitigation technologies and strategies for meeting energy needs while preserving environmental quality. **Prerequisites: CHEM F106X or equivalent; MATH F201X; PHYS F211X.** Cross-listed with ME F458. (3+0)

ENVE F642  Contaminant Hydrology  
3 Credits  
Offered Spring Odd-numbered Years  
Theoretical and applied aspects of the movement of contaminants through saturated and unsaturated soil. **Recommended: CE F663 or equivalent; graduate standing; or permission of instructor.** (3+0)

ENVE F644  Environmental Management and Permitting  
3 Credits  
Offered Spring Odd-numbered Years  
Topics of environmental impact statements, environmental law (local, state and federal), public involvement and environmental quality. Impact from projects of mining, highways, airports, pipelines, industrial development, water, wastewater and solid waste, and others — theoretical considerations and case studies. **Recommended: Graduate standing or permission of instructor.** (3+0)

ENVE F645  Unit Processes-Chemical and Physical  
3 Credits  
Offered Spring Even-numbered Years  
Theory and design of chemical and physical unit processes for water and wastewater. Sedimentation, coagulation, flocculation, filtration, ion exchange, adsorption/absorption, gas transfer and other special topics. Emphasis on arctic applications and design. **Recommended: MATH F201X; CHEM F106X or equivalent; graduate standing; or permission of instructor.** (3+0)

ENVE F646  Unit Processes — Biological  
3 Credits  
Offered Fall Odd-numbered Years  
Theoretical and applied aspects of biological wastewater treatment, including waste-activated sludge processes, trickling filters, lagoons, sludge digestion and processing, nutrient removal, biology of polluted waters, state and federal regulations. **Recommended: Graduate standing or permission of instructor.** (3+0)
ENVE F647  Biotechnology  
3 Credits  
Offered Fall Even-numbered Years  
Theoretical and applied aspects of bioengineering. Issues studied include microbiology, metabolism, genetics, genetic engineering, enzymes and catalysis, stoichiometry and kinetics, biological reactor design and bioremediation. Recommended: Graduate standing or permission of instructor. (3+0)

ENVE F648  Solid Waste Management  
3 Credits  
Offered Spring Even-numbered Years  
Characterization, collection, disposal and treatment of municipal and industrial residuals. Emphasis on regulations that control waste management, waste generation rates, waste characterization procedures, the flow of materials in society, recycle/reuse and landfill disposal. Recommended: Graduate standing or permission of instructor. (3+0)

ENVE F649  Hazardous and Toxic Waste Management  
3 Credits  
Offered Fall Odd-numbered Years  
Course provides in-depth coverage of hazardous and toxic substance management including legal, economic and technical issues. Topics will include characterization of hazardous materials, economics of toxics minimization, hazardous materials use, storage and disposal, technical aspects of landfill siting, and selection and design of treatment technologies. Includes case studies of current waste management issues. Recommended: Bachelor’s degree in science or engineering. Cross-listed with GE F649. (3+0)

ENVE F650  Advanced Topics  
1 Credit  
Offered Fall  
Presentations by students, faculty and outside experts on current issues in environmental science and engineering. Course may be repeated twice for credit. Prerequisites: Graduate Standing. (1+0)

ENVE F651  Environmental Risk Assessment  
3 Credits  
Offered Spring Odd-numbered Years  
The characterization of population exposures and the evidence used to identify environmental substances that may pose a human health risk. The theory and methods for estimating risk: hazard identification, dose-response assessment, exposure assessment and risk characterization. Recommended: Undergraduate degree in engineering or natural science. (3+0)

ENVE F652  Introduction to Toxicology for Engineers and Scientists  
3 Credits  
Offered Fall Even-numbered Years  
Introduction to the science of toxicology for graduate students in fields that use information about hazardous chemicals for input into decisions. Topics include an overview of the effects of chemicals on cells, organs and organ systems, and the toxic effects of classes of chemicals such as pesticides, metals and solvents. Use of data from animal testing and common lists, factors and extrapolation are reviewed. Recommended: Undergraduate degree in engineering or natural science. (3+0)

ENVE F653  Environmental Measurements Laboratory  
1 Credit  
Offered Spring  
Introduction to analytical methods and measurement techniques used in environmental engineering and environmental quality science. Students will design, conduct and report on a laboratory experiment. Includes sample preparation techniques and analytical methods such as microscopy, atomic adsorption spectroscopy, gas chromatography, liquid chromatography and mass spectrometry. Recommended: ENVE F641. (0+3)

ENVE F658  Energy and the Environment  
3 Credits  
Basic concepts of energy supply, demand, production of heat and power impacts of energy use on the environment. Extensive discussion of mitigation technologies and strategies for meeting energy needs while preserving environmental quality. Recommended: CHEM F106X; ES F346 or equivalent; MATH F201X; PHYS F211X; graduate standing. Cross-listed with ME F658. (3+0)
environmental studies. The intern will explore the interdisciplinary aspects of field or laboratory research, build practical expertise and make contacts. Internships may one to ten weeks of full-time commitment to the agency or business and when completed make public presentations on the experience. Graded Pass/Fail. Prerequisites: ENVI F101 or permission of instructor. (0+0+3.1-15.4)

ENVI F220  Introduction to Sustainable Energy  3 Credits  Offered Fall
Introduction to societal problems and solutions related to its energy use and production. Problems discussed are mainly related to the extent of sustainability of current energy practices. Solutions discussed cover both energy efficiency and renewable energy. Prerequisites: DEV M105 or CTT F106 or TTCH F131 or permission of instructor. Recommended: ENVI F101; ENVI F120. (3+0)

ENVI F250  Current Topics in Environmental Studies  1–3 Credits  Offered As Demand Warrants
Using multiple scientific viewpoints, a specific environmental issue is explored through case studies and in-depth discussions with an emphasis on complex connections between ecosystems and society. Themes include sustainability, resource development, indigenous viewpoints, resource management, building technology, and energy applications. Topics announced prior to each offering and course may be repeated for credit towards a certificate or degree program to a maximum of 3 credits. Prerequisites: ENVI F101; ENVI F111X; 100-level science class; or permission of instructor. (3+0)

ENVI F260  Field Techniques for Environmental Technicians  2 Credits  Offered Summer
Provides hands-on instruction in interdisciplinary field and laboratory techniques used by environmental technicians. Basic methods for sampling and studying terrestrial or aquatic ecosystems will be introduced. Students will participate in data collection and analysis procedures as part of an independent research project. Prerequisites: ENVI F101 or NRM F101; ENVI F110; 4 credit lab-based F100-science course; or permission of instructor. Recommended: CIOS F100; CIOS F135. (1+3)

ENVI F265  Introduction to Methods in Environmental Studies Reporting  2 Credits  Offered Fall
Introduces basic data collection methods used in environmental studies then concentrates on research skills necessary to analyze, interpret, and document field and laboratory data and the technical reporting processes. The course is designed to integrate raw environmental data into a technical report covered include ecosystem functions, energy, biodiversity, that can be presented in scientific meeting format. Prerequisites: ENVI F101 or NRM F101; ENVI F110; ENVI F260; a lab-based F100 level science course; or permission of instructor. Recommended: ENVI F104 or ENVI F111X; ENVI F160. (1.5+0+1.5)

ESK  Elementary Inupiaq Eskimo (h)  5 Credits  Offered Fall
Introduction to Central Yup’ik, the language of the Yukon and Kuskokwim deltas and Bristol Bay. Open to both speakers and non-speakers. For speakers the course provides literacy and grammatical analysis. For others it provides a framework for learning to speak, read and write the language. Consideration given to dialect differences. (5+0)

ESK F102  Elementary Central Yup’ik Eskimo (h)  5 Credits  Offered Spring
Introduction to Central Yup’ik, the language of the Yukon and Kuskokwim deltas and Bristol Bay. Open to both speakers and non-speakers. For speakers the course provides literacy and grammatical analysis. For others, it provides a framework for learning to speak, read and write the language. Consideration given to dialect differences. (5+0)

ESK F103  Conversational Central Yup’ik  1–3 Credits  Offered As Demand Warrants
Entry-level course to learn to speak and understand Yup’ik Eskimo. Focus on communication in everyday situations. Kuskokwim and Northwest Campuses only. Prerequisites: Permission of instructor. (1-3+0)

ESK F104  Conversational Central Yup’ik  3 Credits  Offered As Demand Warrants
Entry-level course to learn to speak and understand Yup’ik Eskimo. Focus on communication in everyday situations. Kuskokwim and Northwest Campuses only. Prerequisites: ESK F103 or permission of instructor. (1-3+0)

ESK F106  Introduction to Inupiaq Eskimo  1 Credit  Offered Fall
Entry-level course to learn to speak and understand basic words and phrases of the Inupiaq Eskimo language of the Northwest Arctic. Instruction is thematic and the focus is on communications for everyday situations. Graded Pass/Fail. (1+0)

ESK F109  Elementary Inupiaq Central Yup’ik Orthography  3 Credits  Offered Fall
An entry-level class for persons fluent in Central Yup’ik. Covers reading, silent and oral, and writing, emphasizing specific skills and practical application of those skills through writing assignments. Dialect differences in the Central Yup’ik region are used to demonstrate standardization of the writing systems. Prerequisites: Demonstrated conversational Yup’ik skills. (3+0)

ESK F111  Elementary Inupiaq Eskimo  5 Credits  Offered Spring
Introduction to Inupiaq, the language of Unalakleet, Seward Peninsula, Kotzebue Sound, and the North Slope. Open to both speakers and non-speakers. For speakers the course provides literacy and grammatical analysis. For others it provides a framework for learning to speak, read, and write the language. Consideration given to dialect differences. (5+0)

ESK F112  Elementary Inupiaq Eskimo  5 Credits  Offered Spring
Introduction to Inupiaq, the language of Unalakleet, Seward Peninsula, Kotzebue Sound, and North Slope. Open to both speakers and non-speakers. For speakers the course provides literacy and grammatical analysis. For others it provides a framework for learning to speak, read, and write the language. Consideration given to dialect differences. Prerequisites: ESK F111. (5+0)

ESK F115  Conversational Inupiaq  1–3 Credits  Offered As Demand Warrants
Introductory course for students who wish to acquire the ability to speak Inupiaq, the language of Norton Sound, the Seward Peninsula, Kotzebue Sound, the North Slope, and the arctic portions of Canada and Greenland. Students first learn to understand simple spoken language, then to speak simple Inupiaq, developing a beginning level of communicative competence in the language. Graded Pass/Fail. (1-3+0)

ESK F116  Conversational Inupiaq  1–3 Credits  Offered As Demand Warrants
Introductory course for students who wish to acquire the ability to speak Inupiaq, the language of Norton Sound, the Seward Peninsula, Kotzebue Sound, the North Slope, and the arctic portions of Canada and Greenland. Students first learn to understand simple spoken language, then to speak simple Inupiaq, developing a beginning level of communicative competence in the language. Prerequisites: ESK F115. (1-3+0)

ESK F118  Inupiaq Orthography  3 Credits  Offered As Demand Warrants
Entry-level course designed for students who are fluent in Inupiaq, Reading silently and aloud, and writing. Emphasis on specific skills and practical application of skills through writing assignments. Prerequisites: Demonstrated conversational Inupiaq skills. (3+0)
ESK F121 Elementary Central Yup'ik Apprenticeship I ✦
4 Credits Offered As Demand Warrants
Entry-level course to learn to speak/understand Yup’ik Eskimo. Local speaker acts as language mentor/primary resource. Focus on everyday situations. Yup’ik faculty member serves as instructor of record. Student and mentor required to participate in 10 hr orientation, maintain weekly contact with instructor of record, and participate in monthly assessment. Kuskokwim campus only. Special Conditions: Dependent on ability to identify willing mentor who meets Yup’ik faculty approval. (1+10)

ESK F122 Elementary Central Yup’ik Apprenticeship II ✦
4 Credits Offered As Demand Warrants
Continuation of ESK F121. Increasing emphasis on listening and speaking skills. Kuskokwim campus only. Prerequisites: ESK F121 or formal assessment indicating equivalent speaking and listening skills. Special Conditions: Dependent on ability to identify willing mentor who meets Yup’ik faculty approval. (1+10)

ESK F123 Elementary Central Yup’ik Apprenticeship III ✦
4 Credits Offered As Demand Warrants
Continuation of ESK F122. Increasing emphasis on listening and speaking skills. Kuskokwim campus only. Prerequisites: ESK F122 or formal assessment indicating equivalent speaking and listening skills. Special Conditions: Dependent on ability to identify willing mentor who meets Yup’ik faculty approval. (1+10)

ESK F124 Elementary Central Yup’ik Apprenticeship IV ✦
3 Credits Offered As Demand Warrants
Continuation of ESK F123. Increasing emphasis on listening and speaking skills. Kuskokwim campus only. Special Conditions: Dependent on ability to identify willing mentor who meets Yup’ik faculty approval. (1+10)

ESK F130 Beginning Yup’ik Grammar (h)✦
3 Credits Offered Spring
Literacy and grammatical analysis of Central Yup’ik language for language learners. Students will learn basic grammatical concepts and literacy skills, with consideration given to dialect differences. Prerequisites: ESK F103 or ESK F122 or basic conversational Yup’ik skills. (3+0)

ESK F155 Conversational Siberian Yup’ik ✦
1–3 Credits Offered As Demand Warrants
Introductory courses for students who wish to acquire the ability to speak in Siberian Yupik, the language of St. Lawrence Island and parts of the Chukchi Peninsula in Siberia. Students first learn to understand simple spoken language, then to speak simple Siberian Yupik, developing a beginning level of communicative competence in the language. Northwest Campus only. (1-3+0)

ESK F156 Conversational Siberian Yup’ik ✦
1–3 Credits Offered As Demand Warrants
Introductory courses for students who wish to acquire the ability to speak in Siberian Yupik, the language of St. Lawrence Island and parts of the Chukchi Peninsula in Siberia. Students first learn to understand simple spoken language, then to speak simple Siberian Yupik, developing a beginning level of communicative competence in the language. Northwest Campus only. (1-3+0)

ESK F158 Siberian Yupik Orthography ✦
1–3 Credits Offered As Demand Warrants
Introduction to the standard writing system (orthography) of Siberian Yupik. Students learn the skills of spelling, reading and writing words in Siberian Yupik, which are the fundamentals of basic literacy. Northwest Campus only. Prerequisites: Ability to speak Siberian Yupik or permission of instructor. (1-3+0)

ESK F201 Intermediate Central Yup’ik (h)✦
3 Credits Offered Fall
Continuation of ESK F101 and ESK F102. Increasing emphasis on speaking, reading and writing. Prerequisites: ESK F102 or permission of instructor. (3+0)

ESK F202 Intermediate Central Yup’ik (h)✦
3 Credits Offered Spring
Continuation of ESK F101 and ESK F102. Increasing emphasis on speaking, reading and writing. Prerequisites: ESK F102 or permission of instructor. (3+0)

ESK F203 Conversational Central Yup’ik III (h)✦
3 Credits Offered Fall
A continuation of ESK F103 and ESK F104. Kuskokwim campus only. Prerequisites: ESK F104 or permission of instructor. (3+0)

ESK F204 Conversational Central Yup’ik IV (h)✦
3 Credits Offered Spring
Continuation of ESK F203. Development of proficiency in the Central Yup’ik language, vocabulary for everyday situations, reading and writing. (3+0)

ESK F205 Regaining Fluency in Yup’ik (h)✦
3 Credits Offered Fall
Yup’ik speaking skills and fluency for those with some background in the language. Prerequisites: Permission of instructor. Each potential student must be evaluated for language capabilities. (3+0)

ESK F206 Regaining Fluency in Yup’ik II (h)✦
3 Credits Offered Spring
Continuation of ESK F205. Speaking skills and fluency for those with some background in the language. Prerequisites: ESK F205 or permission of instructor. Each potential student must be evaluated for language capabilities. (3+0)

ESK F208 Yup’ik Composition (h)✦
3 Credits Offered Spring
An examination of the development of written Yup’ik and exploration of writing for entertainment, information, transcription of oral narratives and note taking in meetings where Yup’ik is the dominant language. New writing styles are examined, rather than simply translating the standard categories of English composition. Students receive extensive practice in Yup’ik orthography and participate in the evaluation of each other’s writings. Prerequisites: ESK F109. (3+0)

ESK F211 Intermediate Inupiaq Eskimo (h)✦
3 Credits Offered Fall
Continuation of ESK F111 and ESK F112, concentrating on development of conversational ability, with presentation of additional grammar and vocabulary. Prerequisites: ESK F112. (3+0)

ESK F212 Intermediate Inupiaq Eskimo (h)✦
3 Credits Offered Spring
Continuation of ESK F211, concentrating on development of conversational ability, with presentation of additional grammar and vocabulary. Prerequisites: ESK F211. (3+0)

ESK F218 Inupiaq Composition ✦
3 Credits Offered As Demand Warrants
An examination of the development of written Inupiaq uses to entertain, inform, persuade, transcribe oral narratives and take notes on such occasions as city council meetings. Open to new genres, rather than simply translating the standard categories of English composition. Students receive extensive practice in the Inupiaq orthography and actively participate in evaluation of each other’s writings. Prerequisites: ESK F118 or equivalent. (3+0)

ESK F221 Intermediate Central Yup’ik Apprenticeship I ✦
3 Credits Offered As Demand Warrants
Intermediate-level learning to speak and understand Yup’ik. Local speaker acts as mentor/primary resource. Focus on everyday situations. Yup’ik faculty member serves as instructor of record. Student and mentor required to participate in ten hour orientation, maintain weekly contact with instructor of record, and participate in monthly assessment. Kuskokwim campus only. Prerequisites: ESK F123 or formal assessment indicating equivalent speaking and listening skills. Special Conditions: Dependent on ability to identify willing mentor who meets Yup’ik faculty approval. (1+10)

ESK F222 Intermediate Central Yup’ik Apprenticeship II ✦
3 Credits Offered As Demand Warrants
Continuation of ESK F221. Increasing emphasis on listening and speaking skills. Dependent on ability to identify willing mentor who meets Yup’ik
ESKIMO (ESK) — ETHNOBOTANY (EBOT)

faculties. Kuskokwim campus only. Prerequisites: ESK F221 or formal assessment indicating equivalent speaking and listening skills. 

ESK F223 Intermediate Central Yup'ik Apprenticeship III 3 Credits Offered As Demand Warrants Continuation of ESK F222. Increasing emphasis on listening and speaking skills. Dependent on ability to identify willing mentor who meets Yup’ik faculty approval. Kuskokwim campus only. Prerequisites: ESK F222 or formal assessment indicating equivalent speaking and listening skills. 

ESK F230 Introduction to Interpreting and Translating I (h) 3 Credits Offered As Demand Warrants Introduction to interpreting and translating, designed for both those wishing to enter the field and those who wish to upgrade their skills. Discussion of problems which arise during interpreting and translating along with suggestions on how to handle them. Prerequisites: Must be fluent in English and Yup’ik; permission of instructor. 

ESK F231 Introduction to Interpreting and Translating II (h) 3 Credits Offered As Demand Warrants Continuation of ESK F230. Prerequisites: ESK F230. 

ESK F240 Introduction to Reading and Writing Yup’ik 3 Credits Offered Fall Odd-numbered Years Emphasis on reading and writing Yup’ik for practical purposes (posters, brochures, pamphlets, newsletters, signs) and continued language learning (short stories, descriptions and narratives). Prerequisites: ESK F130; ESK F204 or ESK F222. 

ESK F250 Yup’ik Literature for Children 3 Credits Offered As Demand Warrants Students explore and practice reading children’s literature in Yup’ik. Students are exposed to a variety of genres (fiction, nonfiction, traditional stories, poetry, songs, etc.). Reader level will be discussed. Students are required to write targeted readers for specific reading levels in Yup’ik. Kuskokwim campus only. Prerequisites: ESK F208 or equivalent reading and writing skills. 

ESK F251 Teaching Beginning Yup’ik Reading and Writing 3 Credits Offered As Demand Warrants Teaching strategies in Yup’ik literacy. Focus on reading and writing at the primary-early entry through intermediate levels. Students develop lessons for reading, writing and word study, manage instructional time, and use assessment for placement and instructional purposes. Materials, reading resources, and instructional guides will be reviewed and used for the development of lessons. Kuskokwim campus only. Prerequisites: ESK F208 or equivalent reading and writing skills. 

ESK F260 Siberian Yupik Eskimo (h) 3 Credits Offered As Demand Warrants A course in Eskimo language of St. Lawrence Island and the opposing area of Chukotka in Russia. Concentration on literacy and grammar with background given for conversation. Open to speakers of the language and to others if they have taken one or more years of Central Yup’ik or Inupiaq courses. Prerequisites: Ability to speak Siberian Yupik or one year study of other Eskimo language. 

ESK F261 Siberian Yupik Eskimo (h) 3 Credits Offered As Demand Warrants A course in Eskimo language of St. Lawrence Island and the opposing area of Chukotka in Russia; concentration on literacy and grammar (with background given for conversation); open to speakers of the language and to others if they have taken one or more years of Central Yup’ik or Inupiaq courses. Prerequisites: Ability to speak Siberian Yupik or one year study of other Eskimo language. 

ESK F301 Advanced Central Yup’ik Eskimo (h) 3 Credits Offered Fall Continuation of ESK F201 and F202. Completes the basic study of the Central Yup’ik grammar. Prerequisites: ESK F101; ESK F102; ESK F201; ESK F202; or permission of instructor. 

ESK F330 W Yup’ik Literature/Yupiit Quliraitnek Igkaryaraq (h) 3 Credits Offered Fall Even-numbered Years Central Yup'ik literature with exposure to a variety of literary styles, including qulirat, ganeryaragetaarq, ak’allaat qulirat, qanruyutet/alerquutet. Broad range of regional, stylistic and orthographic traditions through a variety of short papers and a final paper/project. Specific content to be announced at time of registration. Taught entirely in Yup’ik. Kuskokwim campus only. Prerequisites: ENGL F111X; ENGL F211X or ENGL F213X or permission of instructor; ESK F208; ESK F240. 

ESK F375 O Yup’ik Philosophy/Umyuartaqsaraq (h) 3 Credits Offered Fall Even-numbered Years Exploration of Yup'ik philosophy and spirituality, including exploration of the relationship between modern and traditional belief systems and the influence of western religion and philosophy. Taught entirely in Yup'ik. Kuskokwim campus only. Prerequisites: COMM F131X or COMM F141X; ESK F204. 

ESK F415 Additional Topics in Advanced Yup’ik Eskimo (h) 3 Credits Offered Spring Further study of Yup’ik linguistics. Includes text transcription, editing, analysis and discussion. Yup’ik dialectology. Study of related Eskimo languages from the standpoint of Central Yup’ik. Additional topics to be studied depending upon the interests of the students and the instructor. Prerequisites: ESK F101; ESK F102; ESK F201; ESK F202; or permission of instructor. 

ESK F417 Advanced Inupiaq Eskimo (h) 3 Credits Offered Spring Advanced study in Inupiaq Eskimo. Continuation of ESK F212. Prerequisites: ESK F111; ESK F112; ESK F211; ESK F212; or permission of instructor. 

ESK F488 W Documenting Yup’ik Traditions/Caliarkaq (h) 3 Credits Offered Fall Even-numbered Years Major research project relating to Yup’ik language and culture (e.g. traditional narratives, personal/local histories, local customs/beliefs). Project formats include (but are not limited to) research papers, video/audiotapes, curricula and public presentations. Note: As a writing intensive course, all formats will include a significant written component. Taught entirely in Yu’pik. Kuskokwim campus only. Prerequisites: ENGL F111X; ENGL F211X or ENGL F213X; ESK F330; senior standing; or permission of instructor. 

ETHNOBOTANY

EBOT F100 Introduction to Ethnobotany 3 Credits Basic concepts of botany and ethnobotany, with emphasis on the native flora of Alaska and how people use these plants. Basic plant biology and taxonomy; scientific methods of plant collection, including identification and curation; use of native Alaska plants for food and medicines; ethnobotanical methods of collecting plant-use information from indigenous cultures and ways that this information contributes to other fields of study, such as resource management, community development, and human health. 

EBOT F200 Seminar in Ethnobotany 1 Credit Offered Spring Odd-numbered Years Surveys basic concepts of ethnobotany and ethnecology, with emphasis on how people use plants, the role of plants in traditional food systems, and the dynamics of human-plant -ecosystem interactions in a context of rapid social, ecological and climatic change. Lectures and discussion
Focus specifically on plant use in Alaska and other high latitude geographic and ecological settings, but ethnobotanical research in mid latitude and tropical settings will be referenced where appropriate. Students will gain a basic understanding of plant biology and taxonomy; plants and ecosystem services; the use of native Alaska plants for food and medicines; the economics of innovative plant-based businesses; and the cultural and economic significance of plant use to other cultures worldwide. **Prerequisites: EBOT F100; or permission of instructor. (1+0)**

**EBOT F210 Ethnical Wildcrafting**  
1 Credit  
Offered Fall  
Provides an understanding of the industry of wildcrafting: the gathering, harvesting, processing and in some cases, marketing of nontimber forest products. Specific examples from Alaska will be used to illustrate all aspects of this course, from identification of native flora, to a conceptualization of the unique market niche that Alaskan natural products fill, to native plant propagation and effects of invasive plants. **Prerequisites: EBOT F100; or permission of instructor. (1+0)**

**EBOT F220 Ethnobotanical Techniques**  
2 Credits  
Offered Spring  
Provides required skills for conducting field investigations into the human use of plants. Focuses on interviewing elders about native plant use and methods for conducting structured and non-structured interviews, plant collection, participant observation and data analysis. Ethical issues in ethnobotany, e.g., intellectual property rights, benefit-sharing and conservation of native plants. **Prerequisites: EBOT F100; EBOT F200. (1.5+0+1.5)**

**EBOT F230 Ethnobotanical Chemistry**  
3 Credits  
Offered Fall  
Basic understanding of chemical structure and function of medicinally active plant compounds. How and why plants produce primary and secondary compounds, how humans use these compounds and methods used to isolate and deliver plant-derived compounds. How drugs are derived from plants and the ethics of bioprospecting. Medicinal flora of Alaska from a chemical perspective. **Prerequisites: EBOT F100; CHEM F103X or CHEM F105X. (3+0)**

**FLM**

**FLM F105 History of the Cinema (h)**  
3 Credits  
History and development of the medium of film in the U.S. and abroad during the last 100 years. Content will vary each semester. Note: Available via eLearning and Distance Education only. Cross-listed with JRN F105. (3+0)

**FLM F172 Previsualization and Preproduction for Digital Cinema (h)**  
3 Credits  
Offered Spring Even-numbered Years  
Previsualization is a collaborative process that generates a group’s ideas, plan technical solutions and communicate a shared vision for efficient production. Laying a foundation for cinema production, this course will explore screenwriting, storyboarding, previsional animation, animation and film pre-production approaches. This course will focus on developing original stories for animation or dramatic film productions and preparing those concepts for cinematic production. Special fees apply. Cross-listed with THR F172 and ART F172. (3+0)

**FLM F217 Introduction to the Study of Film (h)**  
3 Credits  
Offered Spring  
An appreciation course designed to introduce the student to the various forms of cinematic art with special emphasis on humanistic and artistic aspects. **Prerequisites: ENGL F111X. Cross-listed with ENGL F217; JRN F217. (2+2)**

**FLM F251 Introduction to Video Production**  
4 Credits  
Offered Fall  
An introduction to video production with an emphasis on television studio production. Special fees apply. Cross-listed with JRN F251. (2+5)

**FLM F271 Let’s Make a Movie!**  
3 Credits  
Offered Fall  
Produce a short dramatic video including concept and script development, basic camera and shooting techniques, working with actors/directing fundamentals, location scouting, production schedule development, basic non-linear editing techniques, and DVD authoring. Students do not need previous experience making movies to take this class. Special fees apply. **Recommended: THR F213; THR F241. Cross-listed with THR F271. (3+0)**

**FLM F280 Video Storytelling (h)**  
3 Credits  
Offered Fall  
Basics of digital video production technology, composition, audio, lighting and editing as it relates to primarily nonfiction filmmaking. Students will conclude the course by producing their own short videos. Special fees apply. Cross-listed with JRN F280. (3+0)

**FLM F290 Digital Video Editing**  
3 Credits  
Offered As Demand Warrants  
Introduction to the technical and aesthetic aspects of non-linear digital video editing. Students will go from little or no experience in non-linear editing to being comfortable with some of the advanced editing techniques. Address motion picture editing theories that are not bound to time or specific editing technology. Special fees apply. Cross-listed with JRN F290. (3+0)

**FLM F308 Film Criticism (h)**  
3 Credits  
Theoretical approaches to viewing, analyzing and evaluating film and television program content. Note: Available via eLearning and Distance Education only. Cross-listed with JRN F308. (3+0)

**FLM F310 Acting for the Camera (h)**  
3 Credits  
Offered Fall Even-numbered Years  
Students will apply skills introduced in Fundamentals of Acting to acting for the camera. By acting in numerous on-camera exercises, television, and film scenes, the class will expand each performer’s expressiveness for the camera. May be repeated twice for credit. Special fees apply. **Prerequisites: THR F121. Recommended prerequisite: THR F221. Cross-listed with THR F310. (3+0)**

**FLM F331 Directing Film/Video (h)**  
3 Credits  
Offered Fall Odd-numbered Years  
Introduction to the history, theory and basic concepts of film direction. Includes interpretative script analysis, creative visualization, conceptualization, use of space, working with actors and designers, and direction of short scenes and videos. Special fees apply. **Prerequisites: FLM/THR F271; FLM/THR F273; FLM/JRN F290 or permission of instructor. Recommended: FLM/ENGL F217; THR F121; THR F215. Cross-listed with THR F331. (1+4)**

**FLM F334 W Movies and Films: Watching and Analyzing (h)**  
3 Credits  
Offered Spring  
Thematic topics in the study of the art of classic cinema (films) and popular mass media (movies). Comparative analysis of classics and recent motion pictures is used to present elements of film language, analysis and criticism in this writing intensive course. **Prerequisites: ENGL F111X; ENGL F211X or ENGL F213X or permission of instructor. Cross-listed with THR F334. (3+0)**

**FLM F358 Lights, Camera, Audio!**  
3 Credits  
Offered Spring Even-numbered Years  
Focusing on what actually makes a video, we will explore lighting and sound design techniques to improve the quality of video projects. Idealized and practical tactics will be investigated. Special fees apply. **Prerequisites: FLM F271 or JRN F280 Recommended: FLM F273 (3+0)**

<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>FLM F368</td>
<td>Topics in American Film History (s)</td>
<td>3</td>
<td>An in-depth study of American film and how it shapes and warps popular perceptions of America's past. A historical contrast according to Hollywood with the views and interpretations of historians. Content will vary depending on the specific genre or period of focus, such as World War II, the Vietnam War, the Great Depression, the Cold War and development of the west, etc. Course may be repeated for credit when content varies. Available via eLearning and Distance Education only. Prerequisites: ENGL F111X; junior standing; or permission of instructor. Cross-listed with HIST F368 and JRN F368. (3+0)</td>
</tr>
<tr>
<td>FLM F371 O</td>
<td>Digital Imaging (h)</td>
<td>3</td>
<td>This course focuses on creating and manipulating digital images, including digital painting and photography. The varied ethical issues engendered by this expertise will be addressed in depth. Skills and knowledge useful for digital photography, digital video compositing and digital painting will be covered. Special fees apply. Prerequisites: ART F161 or ART F271 or ART F284/JRN F204 or FLM/JRN F290; COMM F131X or COMM F414X. Cross-listed with ART F371; JRN F371. (1+4)</td>
</tr>
<tr>
<td>FLM F381 W</td>
<td>Alaska Natives in Film (h)</td>
<td>3</td>
<td>Analysis of the portrayal of Alaska’s Inupiaq and Yup’ik peoples (with some on Canada’s Inuit) through select films and readings. Learning to critically analyze films and understanding how various film techniques are accomplished while focusing on feature films’ treatment and use of Northern peoples in film, as well as looking at the social impact of such films. Prerequisites: ENGL F111X or ENGL F211X or ENGL F213X; or permission of instructor. Recommended: ART/MUS/THR F200X. Cross-listed with ANS F381. (1.5+2–4)</td>
</tr>
<tr>
<td>FLM F418</td>
<td>Internship in Film Production (h)</td>
<td>1–6</td>
<td>This course offers students unique opportunities to work in the professional film industry. Professional internships require a faculty advisor as well as professional evaluation for the supervised work. Course can be repeated twice for a maximum of 12 credits. Variable Credit, 40 hours of internship is equal to 1 credit. Prerequisites: 18 credits in upper division film classes or permission of instructor. Recommended: FLM F271, FLM F245. (0+0+1–6)</td>
</tr>
<tr>
<td>FLM F427</td>
<td>Topics in Film Studies (h)</td>
<td>3</td>
<td>Intensive study of variable topics in film studies. May focus on themes such as race or war in film; a specific period such as films of the 1940s; particular genres such as horror, film noir, or the musical, an important director, or an aspect of contemporary film theory. Intensive readings and research in contemporary film theory and criticism will foster in-depth understanding of chosen topic. Course may be repeated two times for credit when content varies. Prerequisites: ENGL F217 or FLM F217; ENGL F211X or ENGL F213X; or permission of instructor. Cross-listed with FLM F271, FLM F245. (2+2)</td>
</tr>
<tr>
<td>FLM F431</td>
<td>Advanced Film Production</td>
<td>3</td>
<td>In depth investigation into the history, theory and concepts of film and video direction. Script preparation, storyboard and animatics, blocking actors and staging the camera, sound design, special effects, and editing techniques will be explored. Each student will produce their own capstone film project. Special fees apply. Prerequisites: FLM F273, FLM F331, FLM/JRN F290. Recommended: FLM F271, FLM F334. Cross-listed with THR F431. (3+0)</td>
</tr>
<tr>
<td>FLM F433</td>
<td>Studies in French and European Cinema (h)</td>
<td>3</td>
<td>The course discusses the evolution of French and European cinema in historical and artistic contents. Prerequisites: ENGL F217 or FLM F217; ENGL F211X or ENGL F213X; FREN F301 or FREN F302 or permission of instructor. Cross-listed with FREN F433. (2+2)</td>
</tr>
<tr>
<td>FLM F458</td>
<td>SFX Up Your Video (h)</td>
<td>3</td>
<td>An exploration into adding special effects to your video projects. Will include “green screen,” titles, animation, color grading, DVD menu design and more. Special fees apply. Prerequisites: FLM/JRN F290; FLM/JRN F271 or FLM/JRN F280; video editing experience or permission of instructor. Cross-listed with JRN F458. (3+0)</td>
</tr>
<tr>
<td>FLM F460</td>
<td>Cross-Cultural Filmmaking (h)</td>
<td>3</td>
<td>The use of film as a documentary tool for describing and understanding scientific and cultural phenomenon has led to the education of generations. Understanding the implications of our film work with a theoretical base for cultural understanding, scientific need and educational potentials will strengthen the film’s integrity and production methods in creating video documents useful as a scientific/cultural record. Pre- production will include research of archival visual media, oral histories and print materials; analysis of educational and scientific funding and distribution options and preliminary interviews, location scouting and film treatment. Production will include time on location with small film crews, media logging and record keeping. Post- production will include basic editing of sequences for distribution. Special fees apply. Prerequisites: Junior, senior or graduate standing or permission of instructor. Cross-listed: ANTH F460 and ART F460. (3+0)</td>
</tr>
<tr>
<td>FLM F470</td>
<td>Advanced Film and Video Directing (h)</td>
<td>3</td>
<td>In depth investigation into the history, theory and basic concepts of film and video direction. Script preparation, story board, blocking actors and staging the camera, sound and editing. Projects include directing and shooting short videos. Special fees apply. Recommended: FLM/THR F331. Cross-listed with THR F470. (1+6)</td>
</tr>
<tr>
<td>FLM F472 O</td>
<td>3D Animation (h)</td>
<td>3</td>
<td>Concept and technique of 3D computer generated animation with applications in fine and commercial art and science. Students will produce a series of three dimensional animation projects which will introduce them to the tools and concepts used by animation and visualization professionals. Note: May be repeated for credit. Special fees apply. Prerequisites: ART/FLM/THR F172; ART F371/FLM F371; or equivalent; COMM F131X or COMM F414X. Cross-listed with ART F472; JRN F472. (1+4)</td>
</tr>
<tr>
<td>FLM F475</td>
<td>Digital Video Compositing (h)</td>
<td>3</td>
<td>Digital compositing techniques for creating moving imagery. The course covers video manipulation, layering images, synthesizing realistic video imagery, integration of live action and computer generated animation. Course can be repeated for a total of nine credits with permission of instructor. Prerequisites: ART/F472 or JRN F472 or FLM F472 or equivalent. Cross-listed with ART F475. (1+4)</td>
</tr>
<tr>
<td>FLM F480</td>
<td>Documentary Filmmaking (h)</td>
<td>3</td>
<td>Basics of hands-on documentary filmmaking techniques, including preproduction, production and postproduction. Different documentary filmmaking directing styles and the process of distributing a document- tary. Each student will produce a short documentary as the capstone of the course. Special fees apply. Prerequisites: Basic experience in shooting and editing video or permission of instructor. Cross-listed with JRN F480. (3+0)</td>
</tr>
<tr>
<td>FLM F484</td>
<td>Russian and Soviet Cinema (h)</td>
<td>3</td>
<td>Study of Russian culture and society through the medium of film, focusing on the history of Russian cinema and genres. Films by award-winning directors. Designed to familiarize students with Russian history and culture from 1900s to the present, and present topics in film theory. Readings and topics discussed reflect issues of current interest. Prerequisites: Junior standing, or permission of instructor. Cross-listed with RUSS F484. (3+0)</td>
</tr>
</tbody>
</table>
FIRE SCIENCE

FIRE F101 Principles of Emergency Services 3 Credits Offered Fall
Overview of fire protection, career opportunities in fire protection and related fields, philosophy and history of fire protection/service. Fire loss analysis, organization and function of public and private protection services. Fire departments as part of local government, laws and regulations affecting fire services, fire service nomenclature, specific fire protection functions. Basic fire chemistry and physics, introduction to fire protection systems and introduction to fire strategy and tactics. (3+0)

FIRE F105 Fire Prevention 3 Credits Offered Fall
The history and philosophy of fire prevention, organization and operation of a fire prevention bureau. Use of fire codes, identification and correction of fire hazards, and the relationships of fire prevention with built-in fire protection systems, fire investigation, and fire and life-safety education. Prerequisites: FIRE F101 or permission of instructor. (3+0)

FIRE F107 Strategy and Tactics 3 Credits Offered Spring
The principles of fire control through utilization of personnel, equipment and extinguishing agents on the fire ground. Prerequisites: FIRE F101 or permission of instructor. (3+0)

FIRE F110 Introduction to Hazardous Waste Operations and Emergency Response 3 Credits Offered As Demand Warrants
Review of federal and state hazardous materials laws and regulations. Career opportunities related to the field of hazardous materials including transportation, emergency response, site clean up and Incident Command System (ICS). (3+0)

FIRE F115 Fire Apparatus and Equipment 3 Credits Offered Spring Even-numbered Years
Fire apparatus design, specifications and performance capabilities, effective use of apparatus in fire emergencies. Prerequisites: FIRE F101 or permission of instructor. (3+0)

FIRE F117 Rescue Practices 3 Credits Offered Spring
Rescue situations and techniques including vehicle extrication, rescue carries, ventilation principles, structural rescue, use of portable hand and power tools, wildland/canine search and rescue, ice and water rescue and emergency life saving principles. Also Offered Pass/Fail as FIRE F117P. Special fees apply. Prerequisites: EMS F170, or permission of instructor. All students are required to wear a complete set of fire department-approved protective clothing (turnout gear). Limited quantities are available for loan through the emergency services program coordinator. An eight-hour personal protective equipment and self-contained breathing apparatus safety orientation must be completed in order to participate in live fire exercises. (3+0)

FIRE F121 Fire Behavior and Combustion 3 Credits Offered Fall
Theories and fundamentals of how and why fires start, spread, and how they are controlled. (3+0)

FIRE F123 Fire Investigations I 3 Credits Offered Spring Odd-numbered Years
Fundamentals and technical knowledge needed for proper fire scene interpretations, including recognizing and conducting origin and cause, preservation of evidence and documentation, scene security, motives of the firesetter and types of fire causes. Prerequisites: FIRE F101 or permission of instructor. (3+0)

FIRE F127 Vessel Safety: Emergency Equipment, Procedures and Drills 1 Credit Offered Fall
Introduction to safe boating practices and skills including boat handling, rules of navigation, proper safety equipment, weather, boat trailering, lines and knots, first aid and emergency procedures. Graded Pass/Fail. (1+0)

FIRE F131 Firefighter I, Series I 3 Credits Offered Spring, As Demand Warrants
The initial phase in a four-phase process for achieving State of Alaska Fire Fighter I certification. Fundamental knowledge of fire behavior, fire organizations, types of fire equipment emergency response services possess and methods of their use. Successful completion of all four phases will qualify the student for Alaska State Fire Fighter I certification. Special fees apply. Prerequisites: All students are required to wear a complete set of fire department approved protective clothing (turnout gear). Limited quantities are available for loan through the Emergency Services Program coordinator. (3+0)

FIRE F133 Firefighter I, Series II 3 Credits Offered Fall, As Demand Warrants
The second phase in a four-phase process for achieving State of Alaska Fire Fighter I certification. Fundamental knowledge of fire behavior, fire organizations, types of fire equipment emergency response services possess and methods of their use. Successful completion of all four phases will qualify the student for Alaska State Fire Fighter I certification. Special fees apply. Prerequisites: All students are required to wear a complete set of fire department approved protective clothing (turnout gear). Limited quantities are available for loan through the Emergency Services Program coordinator. An 8 hour Personal Protective equipment (PPE) and Self-Contained Breathing Apparatus (SCBA) safety orientation offered each semester must be completed in order to participate in live fire exercises. (2+2)

FIRE F135 Firefighter I, Series III 3 Credits Offered Fall, As Demand Warrants
The third phase in a four-phase process for achieving State of Alaska Fire Fighter I certification. Fundamental knowledge of fire behavior, fire organizations, types of fire equipment emergency response services possess and methods of their use. Successful completion of all four phases will qualify the student for Alaska State Fire Fighter I certification. Special fees apply. Prerequisites: All students are required to wear a complete set of fire department approved protective clothing (turnout gear). Limited quantities are available for loan through the Emergency Services Program coordinator. An 8 hour Personal Protective equipment (PPE) and Self-Contained Breathing Apparatus (SCBA) safety orientation offered each semester must be completed in order to participate in live fire exercises. (2+2)

FIRE F137 Firefighter I, Series IV 3 Credits Offered Spring, As Demand Warrants
The final phase in a four-phase process for achieving State of Alaska Fire Fighter I certification. Fundamental knowledge of fire behavior, fire organizations, types of fire equipment emergency response services possess and methods of their use. Successful completion of all four phases will qualify the student for Alaska State Fire Fighter I certification. Special fees apply. (3+0)

FIRE F143 Firefighter Internship, Series I 1 Credit Offered Fall
Practical experience in fire operations and training by arrangement through local fire departments. Graded Pass/Fail. (0+2)
FIRE F145  Firefighter Internship, Series 2  
1 Credit  
Offered Spring, As Demand Warrants  
Practical experience in fire operations and training by arrangement through local fire departments. Graded Pass/Fail. **Prerequisites:** FIRE F143. (0+2)  

FIRE F147  Firefighter Internship, Series 3  
1 Credit  
Offered Spring, As Demand Warrants  
Practical experience in fire operations and training by arrangement through local fire departments. **Prerequisites:** FIRE F145. (0+2)  

FIRE F151  Wildland Firefighter I  
3 Credits  
Offered Spring  
Designed to provide entry-level wildland firefighters the skills and knowledge to safely function as a member of a firefighting crew. Includes fundamental knowledge of wildland fire organization, fire behavior, suppression methods, safety and the incident command system. This course is based on a number of individual National Wildfire Coordinating Group (NWCG) courses. Successful course completion combined with national age and physical fitness requirements will qualify the student for an interagency fire qualification card (red card) with a rating of Firefighter (FFT2). NWCG courses for F151 include: S-130 Firefighter Training S-190 Introduction to Wildland Fire Behavior L-180 Human Factors in Wildland Fire Service L-200 Basic ICS, ICS for Single Resource and Initial Action Incidents. (3+0)  

FIRE F152  Wildland Firefighter II  
3 Credits  
Offered Spring  
Provides wildland firefighters with knowledge and skills in the deployment, use, safe practices and field maintenance of engine-powered wildland firefighting tools: portable pumps and chainsaws. This course is based on National Wildlife Coordinating Group (NWCG) courses: S-211 Portable Pumps and Water Use; S-212 Wildland Fire Chainsaws. Must have the ability/strength to start a portable pump and chainsaw. **Prerequisites:** FIRE F151 or instructor permission. (3+0)  

FIRE F153  Wildland Firefighter III  
2 Credits  
Offered Fall  
Designed to meet the training needs of the advanced wildland firefighter. Course content includes training in use of fireline reference materials, recognition and mitigation of safety issues, and provides a solid foundation of basic leadership skills. This course is based on a number of individual National Wildfire Coordinating Group (NWCG) courses. NWCG courses included: S-131 Wildland Firefighter Type I; S-133 Look Up, Look Down, Look Around; L-280 Followership to Leadership. **Prerequisites:** FIRE F151 or instructor permission. (2+0)  

FIRE F154  Basic Wildland Fire Safety  
1.5 Credits  
Offered Spring  
Designed to meet the training needs of the Advanced Wildland Firefighter. The course includes development of a personal safety program and creating a list of performance standards based on the LCES mnemonic. This course is based on National Wildfire Coordinating Group (NWCG) courses. NWCG courses include: S-134 LCES. **Prerequisites:** FIRE F151 or instructor permission. (1.5+0)  

FIRE F155  Wildland Fire Behavior I  
2 Credits  
Offered Spring Odd-numbered Years  
This course is a classroom-based skills course designed to prepare the prospective fireline supervisor to undertake safe and effective fire management operations. Its serves to develop fire behavior prediction knowledge and skills. Fire environment differences are discussed as necessary; instructor will stress local Alaskan conditions. This course is based on a National Wildfire Coordinating Group (NWCG) course. NWCG courses include: S-290 Intermediate Wildland Fire Behavior. **Prerequisites:** FIRE F151 or permission of instructor. (2+0)  

FIRE F157  Wildland Air Operations  
3 Credits  
Offered Fall Odd-numbered Years  
Introduction to aircraft types and capabilities, aviation policy and safety for flying in and working with agency aircraft, tactical and logistical uses of aircraft, and requirements for helicopter take-off and landing areas. This course is designed to provide student proficiency in all areas of the tactical and logistical use of helicopters to achieve efficiency and standardization. Topics include aviation safety, aircraft capabilities and limitations, aviation life support equipment, aviation mishap reporting, pre-flight checklist and briefing/debriefing, aviation transportation of hazardous materials, crash survival, helicopter operations. Emphasis is on aviation safety. This course is based on National Wildfire Coordinating Group (NWCG) courses: S-270 Basic Air Operations; S-271 Helicopter Crewmember (FIRE F157 will not include Module A-119 which is a required field exercise for S-271. Students will need to complete this field exercise). **Prerequisites:** FIRE F151 or permission of instructor. (3+0)  

FIRE F159  Wildland Fire Urban Interface Operations  
2 Credits  
Offered Fall Odd-numbered Years  
Designed to assist both structural and wildland firefighters who will be making tactical decisions when confronting wildland fire that threatens life, property and improvements in the wildland/urban interface. Instructional units include interface awareness, size-up, initial strategy and incident action plan, structure triage, structure protection tactics, incident action plan assessment and update, follow up and public relations, and firefighter safety in the interface. This course is based on a National Wildland Coordinating Group (NWCG) course. NWCG courses include: S-215 Fire Operations in the Wildland/Urban Interface. **Prerequisites:** FIRE F151 and FIRE F153 or instructor permission. (2+0)  

FIRE F161  Incident Logistics Function  
2 Credits  
Offered Fall Even-numbered Years  
Overview of the support and service branches of the logistics function within the incident command system. Emphasis on entry-level positions of ordering manager, receiving and distribution manager, base camp manager, equipment manager, incident communications manager, security manager and radio operator. This course is based on a number of individual National Wildfire Coordinating Group (NWCG) job aids. NWCG courses include: J-252 Ordering Manager; J-253 Receiving and Distribution Manager; J-254 Base/Camp Manager; J-255 Equipment Manager; J-257 Incident Communications Manager; J-259 Security Manager; J-158 Radio Operator. (2+0)  

FIRE F163  Wildland Fire Dispatch I  
2 Credits  
Offered Spring Odd-numbered Years  
The purpose of this course is to provide students with the skills to perform as a dispatch recorder. Topics include the structure of the expanded dispatch organization, description of resource ordering processes, and the importance of effective communication skills and working relationships. Additionally, the course provides a solid foundation on the use of Resource Ordering Statusing System (ROSS), addressing the functions and capabilities of ROSS that will be used by most dispatchers. This is an interactive course that combines lecture and hands on practice in the application. This course is based on National Wildfire Coordinating Group (NWCG) courses: D-110 Expanded Dispatch Recorder; ROSS Dispatch — Basic. (2+0)  

FIRE F165  ICS and the Incident Planning Function  
2 Credits  
Offered Fall Odd-numbered Years  
An overview of the Incident Command System principles and planning processes, organizational relationships with other functions, use of planning matrix board, resource management, documentation, demobilization, use of technical specialist and components of an incident action plan. This course is based on Federal Emergency Management Agency (FEMA) courses: I-200 Basic ICS: ICS for Single Resources and Initial Action Incidents; I-300 Intermediate ICS: ICS for Supervisors. **Prerequisites:** FIRE F151 or permission of instructor. (2+0)  

FIRE F170  Incident Information  
2 Credits  
Offered As Demand Warrants  
The purpose of this course is to provide students with the skills and knowledge needed to serve as an entry-level public information officer (PIOF) on an incident or event. The course covers establishing and maintaining an incident information operation, communicating with internal and external audiences, working with the news media, handling special situations, and
long term planning and strategy. This course is based on National Wildfire Coordinating Group (NWCG) courses: S-203 Introduction to Incident Information. Prerequisites: FIRE F151 or instructor permission. (2+0)

**FIRE F176**
**Wildland Fire Ignition Operations**
1 Credit
Offered Spring Even-numbered Years
This course introduces the roles and responsibilities of a firing boss (FIBR), common firing devices, and general firing operations and techniques. The course provides students with important information concerning general tasks required to be successful. This course is based on a National Wildfire Coordinating Group (NWCG) course: S-234: Ignition Operations. Prerequisites: FIRE F151 or instructor permission. (1+0)

**FIRE F202**
**Fire Protection Hydraulics and Water Supply**
3 Credits
Offered Spring
Provides a foundation of theoretical knowledge in order to understand the principles of the use of water in fire protection and their application to analyze and solve water supply problems. Prerequisites: DEV 2060 or placement into DEV 205; FIRE 101; or permission of instructor. (3+0)

**FIRE F203**
**Hazardous Materials Chemistry I**
3 Credits
Offered Fall
Basic fire chemistry relating to most categories of hazardous materials including problems of recognition, reactivity and health risks encountered by fire fighters. Prerequisites: Satisfactory demonstration of basic chemistry knowledge (pretest) or permission of instructor. (3+0)

**FIRE F206**
**Building Construction for Fire Protection**
3 Credits
Offered Spring
The components of building construction that relate to fire and life safety. Focuses on fire fighter safety. Includes elements of construction and design of structures shown to be key factors when inspecting buildings, preplanning fire operations and operating emergencies. Prerequisites: FIRE F101 or employment or experience in related field, such as fire protection, insurance, construction architecture, or engineering. (3+0)

**FIRE F207**
**Hazardous Materials Technician**
3 Credits
Offered As Demand Warrants
Advanced information for protection and safety of personnel engaged in response and field cleanup of hazardous materials and substances at the hazardous materials technician level (EPA course #165.15). Special fees apply. Prerequisites: FIRE F205 or permission of instructor. (3+0)

**FIRE F210**
**Fire Administration I**
3 Credits
Offered Fall
Organization and management of a fire department and the relationship of government agencies to the fire service. Emphasis on fire service leadership from the perspective of the company officer. Prerequisites: FIRE F101 or permission of instructor. (3+1)

**FIRE F212**
**Building and Fire Codes**
3 Credits
Offered Spring Even-numbered Years
Introduction to life safety aspects of the uniform building code. Emphasis on uniform fire code for fire inspections on existing buildings, flammable liquids, hazardous materials and special processes. Preparation for the uniform fire code exam administered by the International Conference of Building Officials. Prerequisites: FIRE F101; FIRE F206; or permission of instructor. (3+0)

**FIRE F214**
**Fire Protection Systems**
3 Credits
Offered Fall
Features of design and operation of fire detection and alarm systems, heat and smoke control systems, special protection and sprinkler systems, water supply for fire protection and portable fire extinguishers. Prerequisites: FIRE F101 or permission of instructor. (3+0)

**FIRE F215**
**Advanced Hazardous Materials Technician**
3 Credits
Offered As Demand Warrants
Provides increased hands-on skills for personnel with a hazardous materials technician rating. Emphasis will be placed on task proficiency in spill containment, plugging, patching, diking and valve shut-offs on large commercial transporters. Stabilization of large and small chlorine leaks and decontamination will also be covered. Special fees apply. Prerequisites: FIRE F207 or permission of instructor. (2+2)

**FIRE F216**
**Methods of Instruction for Emergency Services Training**
3 Credits
Offered Spring Odd-numbered Years
Skills necessary to instruct emergency service courses including adult education techniques, classroom setup, use of audiovisual equipment, presentation, and evaluation methods of students and instruction. (3+0)

**FIRE F217**
**Hazardous Materials Technician Refresher**
1 Credit
Offered As Demand Warrants
Information and skills required for protection and safety of personnel engaged in response and field cleanup of hazardous materials and substances at the hazardous materials technician level. Special fees apply. Prerequisites: FIRE F206 or equivalent with certification that may not be expired for more than one calendar year. (1+0)

**FIRE F218**
**Advanced Rescue Practices**
3 Credits
Offered Fall
Provides instruction in four of the most common rescue situations that fire departments encounter in an Interior Alaska rescue: vehicular extrication, rope rescue, confined space rescue and ice/water rescue. Class stresses basic knowledge and hands-on experience. All students are required to wear a complete set of fire department-approved protective clothing (turnout gear). Limited quantities are available for loan through the Emergency Services Program Coordinator. Special fees apply. Prerequisites: EMS F170; FIRE F117; or permission of instructor. (3+0)

**FIRE F219**
**Rapid Intervention Company Operations**
3 Credits
Offered As Demand Warrants
Provides firefighters with the knowledge and skills necessary to work safely and respond appropriately to life-threatening situations. Includes rapid intervention team building skills, self rescue techniques and the knowledge to handle a mayday or high risk/threat situation. Completion of course will qualify students for the state of Alaska certification testing process. All students are required to wear full firefighter personal protective equipment. Limited quantities of PPE are available for loan through the program coordinator. Special fees apply. Prerequisites: FIRE F117, FIRE F131, FIRE F133, FIRE F135 and FIRE F137; or department head approval. (2.5+1)

**FIRE F220**
**Emergency Services Safety, Health and Survival**
3 Credits
Offered Fall
This course introduces the basic principles and history related to the national firefighter life safety initiatives, focusing on the need for cultural and behavior changes throughout the emergency services. This interactive course will examine current and future issues in emergency services including close calls, near misses, line of duty deaths, risk management, mitigation, and personal and organizational accountability. Prerequisites: FIRE F101, FIRE F131, FIRE F133, FIRE F135 and FIRE F137. (3+0)

**FIRE F232**
**Firefighter II**
3 Credits
Offered Summer, As Demand Warrants
Advanced technical study of fire alarms, communications, fire behavior, self-contained breathing apparatus, rescue, safety, ladders, fire hose, nozzles and appliances, fire streams, water supplies, sprinklers, overhaul and inspections. All students are required to wear a complete set of fire department approved protective clothing (turnout gear). Limited quantities are available for loan through the emergency services program coordinator. Special fees apply. Prerequisites: FIRE F131; FIRE F133; FIRE F135; FIRE F137; or permission of instructor. Note: An eight-hour personal protective equipment and self-contained breathing apparatus safety orientation must be completed in order to participate in live fire exercises. (2+2)

**FIRE F244**
**Firefighter Internship, Series 4**
1 Credit
Offered Fall
Practical experience in fire operations and training by arrangement through local fire departments. Prerequisites: FIRE F145 or FIRE F147. (0+2)
<table>

<td>FIRE F246 Firefighter Internship, Series 5 1 Credit Offered Spring Practical experience in fire operations and training by arrangement through local fire departments. <strong>Prerequisites:</strong> FIRE F244. (0+2)</td>
</tr>
<tr>
<td>FIRE F248 Firefighter Internship, Series 6 1 Credit Offered Summer, As Demand Warrants Practical experience in fire operations and training by arrangement through local fire departments. <strong>Prerequisites:</strong> FIRE F246. (0+2)</td>
</tr>
<tr>
<td>FIRE F251 Wildland Firefighter IV 3 Credits Offered Spring This course is intended to meet the training needs of the first line leadership positions in wildland fire suppression. Lessons are designed to produce student proficiency in the performance of duties from initial dispatch through demobilization back to the home unit. Topics include operational leadership, preparation and mobilization, assignment preparation, size up, developing a plan of action, risk management, entrapment avoidance, safety and tactics, offline duties, demobilization, and post incident responsibilities. Portions of the course will be blended learning with some lessons online. This course is based on National Wildlife Coordinating Group (NWCG) courses: S-200 Initial Attack Incident Commander; S-230 Crew Boss (Single Resource). <strong>Prerequisites:</strong> FIRE F151; FIRE F153 and FIRE F155 or permission of the instructor. (3+0)</td>
</tr>
<tr>
<td>FIRE F252 Wildland Fire Prevention I 3 Credits Offered Spring Even-numbered Years Designed to enhance the basic skill and knowledge of personnel assigned responsibilities for wildfire prevention. Additionally, this course will teach sound wildland fire observations and scene of origin protection practices that enable the first responders to identify and preserve evidence of fire cause. An introduction to Alaskan wildland fire prevention statues, regulations and enforcement procedures will be included. This course is based on National Wildfire Coordinating Group (NWCG) courses: P-101 Fire Prevention Education I; FI-110 Wildfire Fire Observation and Origin Protection. <strong>Prerequisites:</strong> FIRE F151 or instructor permission. (3+0)</td>
</tr>
<tr>
<td>FIRE F253 Wildland Fire Investigation I 3 Credits Offered As Demand Warrants Consistent fundamentals and technical knowledge base needed for the wildland fire origin and cause determination investigator (INVF). The concepts taught will include recognizing and conducting origin and cause determination, preservation of evidence and documentation, which will aid an investigator to perform at a professional level on a national basis. This course is based on National Wildfire Coordinating Group (NWCG) course: FI-210 Wildland Fire Origin and Cause Determination. <strong>Prerequisites:</strong> FIRE F151; FIRE F153 and FIRE F155 or permission of the instructor. (3+0)</td>
</tr>
<tr>
<td>FIRE F254 Incident Finance and Administration 1.5 Credits Offered Fall Incident business management objectives, including duties and responsibilities of the Incident Command System (ICS) finance/administration section relating to management practices and programs. Parts of this course are presented in a blended learning format. This course is based on a National Wildfire Coordinating Group (NWCG) course: S-260 Interagency Incident Business Management. (1.5+0)</td>
</tr>
<tr>
<td>FIRE F255 Wildland Fire Behavior II 2 Credits Offered Spring Even-numbered Years This course will give students an understanding of the determinants of fire behavior through studying input datum for fire (weather, slope, fuels and fuel moisture). Operation of fire behavior prediction tools, assessing and selecting proper inputs, interpreting the results in terms of rate of spread, fire line intensity, potential for extreme fire behavior; and documentation processes. This course is based on a National Wildlife Coordinating Group (NWCG) course: S-390 Introduction to Wildland Fire Behavior Calculations. <strong>Prerequisites:</strong> FIRE F155 or permission of the instructor. (2+0)</td>
</tr>
<tr>
<td>FIRE F256 Wildland Fire Planning and Multiple Use Management 3 Credits Offered Fall Odd-numbered Years Fire management and its role in a multiple use resource program. Includes prescribed and wildfire practices, environmental concerns, management goals and objectives, and pre-fire planning. <strong>Prerequisites:</strong> FIRE F151; FIRE F153; FIRE F155; or permission of instructor. (3+0)</td>
</tr>
<tr>
<td>FIRE F257 Wildland Fire Helicopter Management 2 Credits Offered As Demand Warrants A comprehensive examination of interagency government helicopter operations to prepare the student to perform the job of Helicopter Manager. Topics covered include: agency policy, flight manuals, helicopter capabilities and communications, flight following, fueling procedures, contract administration and pay documents, pre and post-use inspections, risk management and required safety procedures, general and specialized helicopter operations such as qualifying landing areas, transportation of passengers and cargo, initial attack operations, and sustained support to incidents. This course is based on a National Wildlife Coordinating Group (NWCG) course: S-372 Helicopter Management. <strong>Prerequisites:</strong> FIRE F157 or permission of the instructor. (2+0)</td>
</tr>
<tr>
<td>FIRE F258 Wildland Fuels Management 3 Credits Offered Spring Even-numbered Years Use of fire as a resource management tool. Natural and prescribed fire planning. Development and procedures to meet management objectives, components for conducting safe, prescribed burning. <strong>Prerequisites:</strong> FIRE F151; FIRE F153; FIRE F155; FIRE F158; FIRE F262; or permission of instructor. (3+0)</td>
</tr>
<tr>
<td>FIRE F262 Wildland Fire Tactical Operations 2 Credits Offered Fall Even-numbered Years This course is intended to produce proficiency in the selection and implementation of wildland fire suppression tactics necessary at the strike team/ task force leader level. Topics include fire line construction, use of hand tools, heavy equipment, water and engines, firing operations and using combinations of resources. This is an advanced level course for trained and experienced wildland firefighters. This course is based on a National Wildland Coordinating Group (NWCG) course: S-336 Tactical Decision Making in Wildland Fire. <strong>Prerequisites:</strong> FIRE F155 and FIRE F251 or permission of the instructor. (2+0)</td>
</tr>
<tr>
<td>FIRE F264 Incident Business Practices 1.5 Credits Offered As Demand Warrants Incident business procedures required in entry level staff positions including financial management of a large complex incident. This course is based on a National Wildlife Coordinating Group (NWCG) course: S-261 Applied Interagency Incident Business Management. <strong>Prerequisites:</strong> FIRE F254. (1.5+0)</td>
</tr>
<tr>
<td>FIRE F270 Wildland Fire Command Function 3 Credits Offered Spring Odd-numbered Years An overview of the command function including use of single and unified command, roles and responsibilities of the incident commander and staff, development and implementation of strategic decisions, providing information to the media, and managing the incident from initial attack of small, non-complex fires to larger, more complex initial attack suppression organizations dealing with escape attack situations. <strong>Prerequisites:</strong> FIRE F151; FIRE F153; FIRE F155; FIRE F252; or permission of instructor. (3+0)</td>
</tr>
<tr>
<td>FIRE F276 Prescribed Fire I 2 Credits Offered As Demand Warrants Provide a thorough familiarization with the Interagency Prescribed Fire Planning and Implementation Procedures Reference Guide. Students will develop the knowledge and skills needed to prepare a prescribed fire plan, in accordance with the guide, ready for technical review and approval. This course is based on a National Wildlife Coordinating Group (NWCG) course: RX-341 Prescribed Fire Burn Plan Preparation. <strong>Prerequisites:</strong> FIRE F255 or permission of the instructor. (2+0)</td>
</tr>
</tbody>
</table>
This course is designed to introduce students to the tools and techniques used to perform in the role of a prescribed fire burn boss. It leads the students through the duties and responsibilities associated with the position including evaluation and implementation of a prescribed fire plan. This course is based on a National Wildlife Coordinating Group (NWCG) course: RX-301 Prescribed Fire Implementation. Prerequisites: FIRE F251; FIRE F255 or permission of the instructor. (2+0)

This course is designed to provide students with the knowledge and skills necessary to recognize and communicate the relationships between basic fire regimes and first order fire effects, the effects of fire treatments on first order fire effects, and to maintain fire treatments to achieve desired first order fire effects. This course is based on a National Wildlife Coordinating Group (NWCG) course: RX-310 Introduction to Fire Effects. Prerequisites: FIRE F255 or permission of the instructor. (2+0)

**FIRST YEAR EXPERIENCE**

**FYE F100**
**First Year Seminar**
1 Credit
Offered Fall and Spring
An introduction, intended for first-year college students, to a current area of scholarly pursuit by faculty. Learn how faculty pursue scholarship in their discipline. An opportunity for first-year students to connect to one another and a faculty member with similar interests in small group-discussion settings and learn about collegiate life. Topics will vary by instructor. Graded Pass/Fail. Special fees apply. (1+0)

**FISHERIES**

**FISH F100**
**Skeleton Articulation as an Introduction to Marine Conservation Biology**
2 Credits
Offered Spring
Course designed for high school students. Graded Pass/Fail. Prerequisites: GPA of 2.5 or higher; offered to high school juniors and seniors with at least 1 biology and 1 math class completed. (2+0)

**FISH F101**
**Introduction to Fisheries**
3 Credits
Offered Fall
This course surveys principles and fields of study that fisheries resource professionals use as a guide in their careers, including basic concepts associated with fish biology and fisheries management and the application of these concepts to solve complex fisheries problems. The course explores contemporary fisheries resource issues within and beyond Alaska’s borders, human values associated with fish management and conservation, and the importance of fish resources for the world’s economies and cultures. (3+0)

**FISH F102**
**Fact or Fishin’: Case Studies in Fisheries**
1 Credit
Offered Fall
This seminar will promote active learning, critical thinking, and problem solving through a series of case studies involving current issues in fisheries conservation and management. Students enrolled in this course will also receive instruction on fundamental skills required to successfully complete a four-year degree at UAF. Attendance is mandatory. Graded Pass/Fail. Prerequisites: This seminar is restricted to first-year students in the undergraduate Fisheries program. Cross-listed with FYE F100. (1+0)

**FISH F103**
**The Harvest of the Sea**
2 Credits
Offered Spring
This course will explore the scientific and popular literature related to the exploitation of global marine fisheries resources. Specific topics of the course will be based on three core themes: (1) early exploitation of marine resources, leading to the need for fisheries management; (2) overexploitation of fish and marine mammal stocks driven largely by technological advancements culminating from the Industrial Revolution; and (3) the current status and future sustainability of marine fisheries resources. This course is largely discussion based; as a result, weekly attendance and preparation is a critical component of the course. Prerequisites: FISH F101, FISH F102 and permission in ENGL F111X. (2+0)

**FISH F261**
**Introduction to Fisheries Utilization**
3 Credits
Offered Fall
Application of harvesting, processing, preservation and marketing of Alaska’s rich fisheries resources. Core course requirement for all BA students completing a minor in fisheries. Serves as an elective for BS fisheries students. Course is offered via videoconference. Prerequisites: BIOL F116X or CHEM F105X or permission of instructor. (3+0)

**FISH F288**
**Fish and Fisheries of Alaska**
3 Credits
Offered Spring
This course will provide mid-level undergraduate students with an introduction to the biology and fisheries of Alaskan fish, shellfish and marine mammals, with important finishes as the main focus of the course. First, we will examine important recreational, subsistence and commercial shellfish and finfish species. Next we will briefly cover fisheries economics and then turn our attention to lesser known freshwater and marine mammal fisheries in Alaska. The amount of coverage of each topic will vary depending on what is known about each group of organisms. Before enrolling students should have a basic understanding of biological and ecological concepts. This course is required of all fisheries students but should appeal to anyone interested in Alaska’s fish and fisheries. Prerequisites: BIOL F116X and FISH F101; or permission of instructor Cross-listed with BIOL F288. (3+0)

**FISH F290**
**Fisheries Internship**
1 Credit
Under the supervision of a fisheries professional, students gain practical, professional experience through employment. Can be repeated up to four times, each for a different type of employment. The primary learning objectives for students are to gain professional experience in fisheries and refine career goals. Graded Pass/Fail. Prerequisites: Permission of the Fisheries Experiential Learning Coordinator/instructor; a student internship agreement form turned into the Experiential Learning Coordinator. Recommended: STAT F200X. (0+0+1-4)

**FISH F301**
**Biology of Fishes**
4 Credits
Offered Fall
A broad overview of the biological diversity of fishes presented from the comparative and organismal perspectives. The course examines the relationship between physical and biological properties of aquatic environments and the anatomy, physiology, behavior and geographical distribution of living fish lineages. Topics include fish evolution, biogeography, classification, gross and fine anatomy, sensory biology, and form-function relationships. Topics are presented to highlight essential concepts generally relevant in biology. Special fees apply. Prerequisites: BIOL F116X or equivalent; junior or senior standing. Recommended: BIOL F317. Cross-listed with BIOL F301. (3+3)

**FISH F315**
**Freshwater Fisheries Techniques**
3 Credits
Offered Maymester Even-numbered Years
Introduction to laboratory and field sampling methods in aquaculture, limnology, and fisheries biology. Emphasis will be placed on the proper care and use of laboratory equipment and field sampling gears, as well as the development of sampling protocols for collecting representative, non-biased fisheries and aquatic sciences data. Special fees apply. Prerequisites: FISH F101; FISH F288; STAT F200X; or permission of instructor. (2+3)

**FISH F336**
**Introduction to Aquaculture**
3 Credits
Offered Spring Odd-numbered Years
Contribution of Alaska’s aquaculture industries including salmon ocean ranching, shellfish and kelp mariculture, contribute to the world’s increasingly important aquaculture production. Survey of worldwide production, introduction to production systems, and familiarization with Alaska
systems. Team taught by SFOS specialists and featuring invited lecturers, laboratory demonstrations and field trips. This course is taught in Juneau. 

**Prerequisites: BIOL F115X. (3+0)**

**FISH F340 Seafood Business**

3 Credits  Offered Fall

Development and management of a successful seafood business from inception to operation. Practical application of business planning, obtaining financing, accounting, permitting, feasibility analysis, marketing, human resource management, and operational aspects of seafood harvesting and processing using case studies and guest lecturers from seafood industry. 

**FISH F261; or permission of instructor. (3+0)**

**FISH F411 Human Dimensions of Environmental Systems**

3 Credits  Offered Fall

Study of human-environment relationships and applications to resource management. Draws on a range of social scientific approaches to the study of environmental systems, including: environmental anthropology, environmental history, historical ecology, political ecology, ethnology, property theory, and environmental justice. 

**Prerequisites: COMM F313X or F411X; ENGL F211X or F213X; F200-level course in cultural anthropology, human geography, sociology, or political science; or permission of instructor. (3+0)**

**FISH F412 Human-Environment Research Methods**

3 Credits  Offered Fall

Overview of qualitative and quantitative social science methods for studying human-environment relationships. Introduction to research ethics, research design, data collection, data analysis and data reporting. Methods and data analysis techniques include interviews, text analysis, surveys, scales, cognitive anthropology and ethnology, social networks, behavioral observation, and visual methods. Provides hands-on training in data collection and data analysis software. 

**Prerequisites: COMM F313X or COMM F411X; ENGL F211X or ENGL F213X; upper level standing; or permission of instructor. Cross-listed with ANTH F412. (3+0)**

**FISH F414 Field Methods in Marine Ecology and Fisheries**

3 Credits  Offered Alternate Maymester

A hands-on introduction to the methods used to study ecological patterns and processes in the marine environment. Class will consist of a series of group field exercises conducted in local marine habitats. These exercises will emphasize a variety of sampling methods for documenting patterns of distribution and abundance, experimental designs for testing hypotheses and statistical interpretation of results. These skills are fundamental to most basic and applied research in marine ecology and fisheries. Thus this course provides an essential foundation for a professional career in these areas. 

**Prerequisites: FISH F101; BIOL F271; or permission of instructor. (13.3+20)**

**FISH F421 Fisheries Population Dynamics**

4 Credits  Offered Spring Even-numbered Years

Review and analysis of the major quantitative techniques available for assessing and predicting the status of fish populations. Demonstration and use of field and laboratory techniques and model verification; examples and case histories. This course is taught in Juneau. 

**Prerequisites: STAT F200X [STAT S273-n]. Recommended: FISH F418. (4+0)**

**FISH F425 Fish Ecology**

3 Credits  Offered Fall

Focus on the relationship of fishes to the physical, chemical, and biological features of their environment and the processes responsible for patterns of fish distribution and abundance. Concepts introduced in lectures will follow a logical progression, starting with the study of individual fish moving towards investigations of populations, metapopulations, and assemblages. 

**Prerequisites: BIOL F115X; BIOL F271; FISH F101; or permission of instructor. Recommended: FISH F288. (3+0)**

**FISH F426 Behavioral Ecology of Fishes**

3 Credits  Offered Spring Even-Numbered Years

This course will provide upper-level undergraduate and graduate students with an advanced understanding of behavioral responses and adaptations of fishes in both freshwater and marine systems to natural and anthropogenic environmental variables. It should provide students another option to fulfill upper-level undergraduate and graduate level elective coursework. Before enrolling, students should have a sound understanding of both ecological and biological concepts relating to fishes. 

**Prerequisites: BIOL F271 or FISH F301 or FISH F427; or permission of instructor. Recommended: FISH F425; FISH F427. (3+0)**

**FISH F427 Ichthyology (n)**

4 Credits  Offered Spring

Major groups of fishes, emphasizing fishes of northwestern North America. Classification structure, evolution, general biology and importance to man. 

**Prerequisites: BIOL F317. Cross-listed with BIOL F427. (3+3)**

**FISH F428 Physiological Ecology of Fishes**

3 Credits  Offered Spring Odd-numbered Years

This course will provide upper-level undergraduate and graduate students with an advanced understanding of physiological responses and adaptations of fishes in both freshwater and marine systems to natural and anthropogenic environmental variables. It should provide students with another option to fulfill upper-level undergraduate and graduate level elective coursework. Before enrolling, students should have a sound understanding of both ecological and biological concepts relating to fish. 

**Prerequisites: FISH F301 or BIOL F310 or FISH/BIOI F427; or permission of the instructor. (3+0)**

**FISH F433 Pacific Salmon Life Histories**

3 Credits  Offered Fall Odd-numbered Years

This course provides an introduction to the life histories of Pacific salmon. We will explore variation in life history traits within and among species, as well as within and among populations, at each stage of the salmon life cycle. Life histories will be understood in evolutionary and ecological contexts. We will also discuss management and conservation of Pacific salmonid species throughout their range, but with focus on Alaska. This course is taught in Juneau. 

**Prerequisites: FISH/BIOI F427 or permission of instructor. Stacked with FISH F633. (3+0)**

**FISH F440 Oceanography for Fisheries**

3 Credits  Offered Fall Even-numbered Years

Students examine how understanding the oceanographic processes that determine the distribution, recruitment, and abundance of marine vertebrates and invertebrates from global to local scales and from evolutionary time scales to daily scales supports the sustainable management of marine fisheries resources. 

**CHEM F105X, PHYS F103X, FISH F288, STAT F200X. Recommended: FISH F425. Cross-listed with MSL F440. (3+0)**

**FISH F450 Practicum in Fisheries: Fisheries Observer Program**

3 Credits  Offered As Demand Warrants

Practical experience as a fisheries biologist onboard an Alaska commercial fishing vessel doing independent work at sea as an agent for the National Marine Fisheries Service or the Alaska Department of Fish and Game. Simultaneous to credit, the student/observer will be under contract and receive reimbursement for deployment. May be repeated for additional credit during different deployments as observer. Graded Pass/Fail. Special fees apply. 

**Prerequisites: STAT F200X or permission of instructor. (0+1-12)**

**FISH F460 Food Science and Technology Internship**

3–6 Credits  Offered As Demand Warrants

A combination of traditional and industrial training opportunities. Assigned required readings and discussion of appropriate topics in food science and technology. Information applied during hands-on experience in a food processing plant. Discussion includes fundamental information and solutions to industrial problems. Faculty mentor assigned to each intern. Required written evaluation of internship. 30 hours in-plant work experience for 12-24 weeks. Note: Course offered only in Kodiak. 

**Prerequisites: 16 credits in natural sciences; MATH F200X or MATH F272X; or permission of instructor. (1+0+3)**
FISH F487 W.O Fisheries Management
3 Credits Offered Spring
Theory and practice of fisheries management, with an emphasis on strategies utilized for the management of freshwater and marine fisheries. Application of quantitative methodologies for the assessment and manipulation of aquatic habitats, sport and commercial fish populations, and stock assessment are considered, as is the setting of appropriate goals and objectives for effective, science-based management. Prerequisites: COMM F131X or COMM F141X; ENGL F414; FISH F288; STAT F200X; or permission of instructor. (3+0)

FISH F490 Experiential Learning — Fisheries Internship
1 Credit
Under the supervision of a faculty member and a fisheries professional, upper-division students gain professional experience through employment. Requirements are decided prior to enrollment based on a 3-way agreement between the employer, student, and faculty member, which contains learning objectives that reflect upper-division credit. Can be repeated up to 4 times, each for a different type of employment. Graded Pass/Fail. Prerequisites: Junior or senior standing plus permission of Faculty Sponsor and the Fisheries Experiential Learning Coordinator/instructor (the Coordinator can be a sponsor as well); signing of a student internship agreement form that contains learning objectives for the internship that reflects upper-division internship credit. Recommended: FISH F315; STAT F200X; STAT F401. (0+0+1-4)

FISH F498 Senior Thesis Proposal
2 Credits
Students will complete the first part of a year-long, self-designed scholarly project that is the capstone of a student’s exemplary academic performance. For this component of senior thesis, the student will develop a proposal that will reflect a thorough understanding of the existing literature, study objectives and testable hypotheses, the methodology by which data will be collected through field and/or laboratory research, including data analyses, and a timeline by which the senior thesis will be completed. The student should also complete the collection of field and/or laboratory data and begin data analysis. Prerequisites: Fisheries major with senior standing; a GPA of 3.2 or higher and permission of a Fisheries Division faculty mentor and the SFOS Internship Coordinator (the coordinator may also be a mentor); STAT F200X and ENGL F414. Recommended: FISH F315; STAT F401 or STAT F402. (0+0)

FISH F499 Fisheries Senior Thesis
2 Credits
Students will complete the second part of a year-long, self-designed scholarly project that is the capstone of a student’s exemplary academic performance. For this component of senior thesis, the student will complete analysis of field and/or laboratory data collected during FISH F498 and develop a research paper/manuscript that will interpret the study results and cast them within the context of the existing literature relevant to the study topic. Students will be expected to work with their senior thesis mentor to submit the manuscript for peer review to a scientific journal and will be required to present their study results as an oral or poster presentation. Prerequisites: Fisheries major with senior standing; a GPA of 3.2 or higher; and permission of a Fisheries Division faculty mentor and the SFOS Internship Coordinator (the coordinator may also be a mentor); FISH F498. Recommended: FISH F315; STAT F401; STAT F402. (0+0+2-4)

FISH F601 Quantitative Fishery Science
3 Credits Offered Spring Even-numbered Years
Graded Pass/Fail. Prerequisites: ENGL F414 or ENGL F614 or permission of instructor. (1+0)

FISH F604 Modern Applied Statistics for Fisheries
4 Credits Offered Odd-numbered Years
Covers general statistical approaches to quantitative problems in marine science and fisheries with guidance on how to collect and organize data, how to select appropriate statistical methods and how to communicate results. A variety of advanced statistical methods for analyzing environmental data sets will be illustrated in theory and practice. Prerequisites: STAT F200X; STAT F401; proficiency in computing with R or permission of instructor. Cross-listed with MSL F604. (3+3)

FISH F611 Human Dimensions of Environmental Systems
3 Credits Offered Fall
Study of human-environment relationships and applications to resource management. Draws on a range of social scientific approaches to the study of environmental systems, including: environmental anthropology, environmental history, historical ecology, political ecology, ethnography, property theory, and environmental justice. Prerequisites: Graduate standing, or permission of instructor. (3+0)

FISH F612 Fish Conservation Biology
4 Credits Offered Fall Odd-numbered Years
Conservation biology is an applied science that deals with maintaining and restoring threatened populations. Includes theoretical foundations of conservation biology and the practical lessons to be gained from studying historical conservation efforts. Emphasis on case studies. Note: This course is taught in Juneau. (3+2)

FISH F613 Human-Environment Research Methods
3 Credits Offered Fall
Overview of qualitative and quantitative social science methods for studying human-environment relationships. Introduction to research ethics, research design, data collection, data analysis and data reporting. Methods and data analysis techniques include interviews, text analysis, surveys, scales, cognitive anthropology and ethnoecology, social networks, behavioral observation, and visual methods. Provides hands-on training in data collection and data analysis software. Prerequisites: Graduate standing or permission of instructor. Cross-listed with ANTH F613. (3+0)

FISH F621 Estimation of Fish Abundance
3 Credits Offered Fall Even-numbered Years
Estimation of abundance of fish and other aquatic populations, using mark-recapture, line-tract, catch-effort and change-in-ratio techniques. Computer lab work and homework from actual and simulated populations. Prerequisites: MATH F201X; STAT F401; familiarity with PCs including word processing and spreadsheets. Recommended: FISH F421; MATH F302; MATH F314. (2+2.5)

FISH F622 Quantitative Fish Population Dynamics
3 Credits Offered Spring Odd-numbered Years
Modeling fish population mortality, recruitment individual growth and fecundity. Models and assessment techniques for age- and length-structured populations. Biological reference points and management strategies derived from population and harvesting parameters. Computer lab work and homework with data from actual and simulated populations. This course is taught in Juneau. Prerequisites: MATH F201X; STAT F401; Familiarity with PCs including word processing and spreadsheets. Recommended: FISH F421; MATH F302; MATH F314. (2+2.5)

FISH F625 Population Dynamics of Vertebrates
4 Credits Offered Spring Odd-numbered Years
Sampling vertebrate populations, modeling their population dynamics and the implications for management. Focus will be on study design, model assumptions, estimation of population parameters, and population projections. State-of-the-art computer applications will be employed in laboratory exercises of actual and simulated data. This course is taught in Juneau. Prerequisites: BIOL F271; STAT F401. Cross-listed with WLF F625. (3+3)
FISH F626  Behavioral Ecology of Fishes
3 Credits  Offered Spring Even-numbered Years
This course will provide upper-level undergraduate and graduate students with an advanced understanding of behavioral responses and adaptations of fishes in both freshwater and marine systems to natural and anthropogenic environmental variables. It should provide students another option to fulfill upper-level undergraduate and graduate level elective coursework. Before enrolling, students should have a sound understanding of both ecological and biological concepts relating to fish. Prerequisites: BIOL F371 or FISH F301 or FISH F427; or permission of instructor. Recommended: FISH F425 or FISH F427. (3+0)

FISH F627  Statistical Computing with R
2 Credits  Offered Fall, As Demand Warrants
Using the free, open-source software R to teach computing, programming, and modeling concepts for the statistical computing of fisheries and biological data. Prepares students for other graduate-level, quantitative fisheries courses and covers exploratory statistical and graphical analyses, as well as computer-intensive methods such as bootstrapping and randomization tests. Prerequisites: STAT F200X or equivalent, STAT F401 or equivalent, and proficiency with Excel; or permission of instructor. Cross-listed with MSL F627. (1+3)

FISH F628  Physiological Ecology of Fishes
3 Credits  Offered Spring Odd-numbered Years
This course will provide upper-level undergraduate and graduate students with an advanced understanding of physiological responses and adaptations of fishes in both freshwater and marine systems to natural and anthropogenic environmental variables. It should provide students with another option to fulfill upper-level undergraduate and graduate level elective coursework. Before enrolling, students should have a sound understanding of both ecological and biological concepts relating to fish. Prerequisites: FISH F301 or BIOL F310, FISH/BIOL F427; or permission of instructor and graduate standing. (3+0)

FISH F630  Natural Resource Modeling
2 Credits  Offered Spring Odd-numbered Years
A hands-on introduction to the techniques and issues involved in modeling natural resources. Students will complete an individual modeling project related to each student’s graduate research. This course is taught in Juneau. Prerequisites: FISH F421 and STAT F401 or equivalents. (1+3)

FISH F631  Data Analysis in Community Ecology
3 Credits  Offered Spring Odd-numbered Years
This course will provide an overview of statistical methods that have been specifically developed to aid our understanding and interpretation of the structure, abundance, and distribution of species and communities in relation to resources and the environment. Prerequisites: STAT F200X; STAT F401 or equivalent; FISH F627 (Statistical Computing with R) or familiarity with R, general ecology, graduate standing in fisheries or permission of instructor. Cross-listed with MSL F631. (3+0)

FISH F633  Pacific Salmon Life Histories
3 Credits  Offered Fall Odd-numbered Years
This course provides an introduction to the life histories of Pacific salmon. We will explore variation in life history traits within and among species, as well as within and among populations, at each stage of the salmon life cycle. Life histories will be understood in evolutionary and ecological contexts. We will also discuss management and conservation of Pacific salmonid species throughout their range, but with focus on Alaska. This course is taught in Juneau. Prerequisites: FISH/BIOL F427 or permission of instructor. Stacked with FISH F433. (3+0)

FISH F640  Management of Renewable Marine Resources
3 Credits  Offered Spring Even-numbered Years
Principles of fisheries management, along with case studies of successes and failures. Topics include management objectives, relationships of fished species to their environment, fishing methods, human dimensions, fishery data acquisition, harvest strategies, ecosystem effects of fishing, aquaculture and alternative management strategies, including ecosystem-based fishery management. Prerequisites: FISH F427. Recommended: FISH F487. (3+0)

FISH F642  Bayesian Decision Theory for Resource Management
4 Credits  Offered Spring Even-numbered Years
Application of decision theory to problems in natural resources management. Students will learn to perform Bayesian calculations and uncomplicated decision analysis themselves. Special fees apply. Prerequisites: FISH F621 or FISH F630 or permission of instructor. Cross-listed with STAT F642. (2+2)

FISH F645  Bioeconomic Modeling and Fisheries Management
3 Credits  Offered Spring Even-numbered Years
An introduction to analytic and computational models of discrete-time representations of bioeconomic systems, including competitive static and optimal control approaches to optimizing unitary and multiple criteria subject to deterministic and stochastic dynamic processes. Particular attention is given to bioeconomic models of optimal management of exploited populations of fish and shellfish. Prerequisites: STAT F401 and MATH F200X, MATH F262X or MATH F272X; graduate standing or permission of instructor. (3+0)

FISH F650  Fish Ecology
3 Credits  Offered Spring Odd-numbered Years
This course will examine the relationship of fishes to the physical, chemical, and biological features of their environment in both perturbed and unper- turbed aquatic ecosystems. An emphasis will be placed on fish diversity in terms of morphology, behavior, feeding, and reproductive strategies as they relate to individual and population adaptation, and community structure in both freshwater and marine environments. Prerequisites: Permission of instructor. (3+0)

FISH F651  Fishery Genetics
4 Credits  Offered Spring Odd-numbered Years
Application of genetics to fisheries. Focus on Alaska fisheries including introduction to the theory of electrophoresis, stock separation, population genetics and quantitative genetics. This course is taught in Juneau. (4+0)

FISH F653J  Zooplankton Ecology
3 Credits  Offered Spring Even-numbered Years
Survey of marine zooplankton including processes and variables which influence their production and dynamics. Emphasis on the northeast Pacific ocean zooplankton community. Field and lab methods for sampling include fixing, preserving, subsampling, identifying and quantifying zooplankton collections. Laboratory techniques for culture of zooplankton include physiological measurements of bioenergetic parameters. Prerequisites: Invertebrate zoology course; MSL F610; or permission of instructor. Cross-listed with MSL F653J. (3+0)

FISH F654J  Benthic Ecology
3 Credits  Offered Spring Odd-numbered Years
Ecology of marine benthos, from subtidal to hadal zone. Methods of collecting, sorting, narcotizing, preserving and analyzing benthic assemblages, including video analytical techniques from subsimmers and ROVs. Hydrothermal vent and cold seep assemblages, including video analytical techniques from submersibles and ROVs. Physiology/energetics of benthic organisms, including animal-sediment relationships, feeding, reproduction and growth. Depth, spatial and latitudinal distribution patterns. Prerequisites: Invertebrate zoology course; marine biology course; or permission of instructor. Cross-listed with MSL F654J. (3+0)

FISH F661  Seafood Processing and Preservation
3 Credits  Offered Spring
Positive and negative aspects of processing and preservation of seafoods are discussed. Practical aspects of preservation are stressed and topics include thermal processing (canning and pasteurization), fish smoking, salting, drying, pickling, freezing, fermentation, natural preservatives and packaging. Aspects of selected processing and preservation techniques to be demonstrated in the FITC pilot plant. Prerequisites: BIOL F342; CHEM F451; or permission of instructor. Recommended: MATH F202X or MATH F272X. (3+0)
FISH F662  Seafood Composition and Analysis  3 Credits  Offered Fall
Major components of foods, their properties, analysis and interactions during processing and preservation, the effect of processing on functional and nutritive value, postmortem microbial and biochemical changes especially proteins, lipids and carbohydrates. Role of minor constituents such as flavors, vitamins, toxins and carcinogens. This course is offered via videoconference. **Prerequisites: BIOL F342; CHEM F451; or permission of instructor.** (3+0)

FISH F665  Aquatic Entomology  2 Credits  Offered Fall Odd-numbered Years
Aquatic invertebrate taxonomy, mostly to the family level, and ecology. Includes field trips to learn collecting techniques and habitats. Special fees apply. **Prerequisites: Graduate standing or permission of instructor; Students must be able to safely wade in streams and wetlands.** Cross-listed with BIOL F665. (1+3)

FISH F670  Quantitative Analysis for Marine Policy Decisions  3 Credits  Offered Spring Odd-numbered Years
An introduction to the practical application of mathematical programming, operations research, simulation, cost-benefit analysis, cost effectiveness analysis, regional impact assessment, economic valuation, risk analysis, adaptive management and other decision theoretic tools in preparation of regulatory documents required for the management of living marine resources and for assessment of environmental damages. **Prerequisites: STAT F401; MATH F200X, MATH F262X or MATH F272X; graduate standing or permission of instructor.** (3+0)

FISH F672  Law and Fisheries  2 Credits  Offered Fall Even-numbered Years
This course introduces students to the key Federal, State and International laws that govern fisheries in Alaska state waters and in the US Exclusive Economic Zone off Alaska. In addition, the course introduces students to seminal court rulings that have helped shape those laws. **Prerequisites: graduate standing or permission of instructor.** (2+0)

FISH F675  Political Ecology  3 Credits  Offered Fall Odd-numbered Years
Introduction to the field of political ecology. Topics include the sociology of scientific knowledge, traditional and local ecological knowledge, politics of resource management, processes of enclosure and privatization, environmental values, conservation, environmental justice, and colonialism and economic development. **Prerequisites: Graduate standing or permission of instructor.** Cross-listed with ANTH F675. (3+0)

FISH F676  Aquatic Food Web Ecology  3 Credits  Offered Fall Even-numbered Years
This course will examine theoretical and applied aspects of aquatic food web ecology, from the ecological processes that give rise to patterns in aquatic communities to the incorporation of trophic interactions into ecosystem-based management. Lectures and discussion will focus on ecological theory and case studies. Lab exercises will introduce empirical and modeling approaches for studying food web interactions. Proficiency with Excel and basic statistics is preferred. **Prerequisites: FISH F425 or permission of instructor.** Cross-listed with MSL F676. (2+3)

FISH F680  Marine Sustainability Internship  2 Credits  Offered Fall
Internship program in marine ecosystem sustainability to broaden students’ interdisciplinary training, develop new research tools, build expertise outside their home discipline, gain exposure to careers, and gain a unique perspective on research problems. Internships are for a minimum of 8 weeks and take place during the summer. In the autumn students report on and meet to discuss their internship experiences. **Prerequisites: MSL F652 or permission of instructor.** Cross-listed with ANTH F680 and MSL F680. (0+0+5-16)

FISH F681  The North Pacific Fishery Management Council: A Case Study  2 Credits  Offered Summer
This 2-week intensive course provides immersion into the scientific and policy basis for fisheries management in Alaska. Students receive two 6-hr 40-min days of classroom instruction, review current management issues, and witness the decision-making process by attending a North Pacific Fishery Management Council Meeting. Learning is enhanced by discussions with diverse stakeholders and field trips. Graded Pass/Fail. **Prerequisites: Permission of the instructor.** (1+0+1)

**FOREIGN LANGUAGES**

FL F200X  World Literature (h)  3 Credits
Introduction to critical reading and appreciation of a wide variety of literary texts from different cultures. Includes exposure to a variety of approaches to myth, poetry, story telling and drama. Students will gain an understanding of cultural differences and universals in texts from American, American minority, Western European and non-Western sources. Specific content to be announced at time of registration. Course may be repeated for credit when content varies. **Prerequisites: ENGL F111X or placement in ENGL F211X/ENGL F213X; sophomore standing; or permission of instructor.** Cross-listed with ENGL F200X. (3+0)

FL F451  Foreign Language Teaching Practicum  4 Credits  Offered Fall
Methodology workshop for the advanced second language student. Includes language acquisition and pedagogy and employment of these techniques in a lower level language classroom under the supervision of a classroom teacher. Enrollment subject to available classroom placement. **Prerequisites: Completion of FREN F302 or SPAN F302 or RUSS F302 language course or permission of instructor.** (3+0+3-5)

**FRENCH**

FREN F101  Elementary French I (h)  5 Credits  Offered Fall
Introduction to the French language and culture. Development of competence and performance in the language through understanding, recognition and use of linguistic structures; increasing emphasis on listening comprehension and speaking; basic vocabulary of approximately 1,000 words; exploration of the cultural dimension, implicitly through language, and explicitly through texts and audiovisual materials. (5+0)

FREN F102  Elementary French II (h)  5 Credits  Offered Spring
Introduction to the French language and culture. Development of competence and performance in the language through understanding, recognition and use of linguistic structures; increasing emphasis on listening comprehension and speaking; basic vocabulary of approximately 1,000 words; exploration of the cultural dimension, implicitly through language, and explicitly through texts and audiovisual materials. **Prerequisites: FREN F101 or equivalent.** (5+0)

FREN F201  Intermediate French I (h)  3 Credits  Offered Fall
Continuation of FREN F102. Increasing emphasis on reading ability and cultural material. Conducted in French. **Prerequisites: FREN F102 or equivalent.** (3+0)

FREN F202  Intermediate French II (h)  3 Credits  Offered Spring
Increasing emphasis on reading ability and cultural material. Conducted in French. **Prerequisites: FREN F201 or equivalent.** (3+0)
GEOG F202  Natural Disasters  
3 Credits  Offered Spring Odd-numbered Years  
Natural disasters are usually the result of the build up and sudden release of energy in the solid earth, atmosphere, or biosphere. Natural "events" typically become disasters when intensive human activity alters the energy dynamics involved, or when the event endangers human life, property, or livelihood. This course examines the natural physical processes that affect the human environment in catastrophic ways. Case studies from around the world, will allow the examination of the complex factors that lead to natural disasters. Prerequisites: ENGL F111X. (3+0)

GEOG F207  Research Methods and Statistics in Geography  
3 Credits  Offered Spring Odd-numbered Years  
Introduction to basic data collection and analysis techniques used in geographic research. Explores a variety of qualitative and quantitative geographic research methods. Includes research design, real-world field-work issues, and hands-on use of tools and computer methods for analysis and visual display of spatial data. Students will gain an appreciation of the wide array of research methods and learn to critically interpret results and conclusions from both quantitative and qualitative perspectives. Prerequisites: Placement in MATH F103X or MATH F107X or permission of instructor. (3+0)

GEOG F222  Fundamentals of Geospatial Sciences  
3 Credits  Offered Fall  
This course is an introduction to the principles and applications of geospatial science (remote sensing, GIS and GPS). Fundamental concepts include electromagnetic radiations, map projections, basic computer science, data formats, map-reading and map-making, etc. Practical exercises include field data collections using GPS, photo-interpretation using image processing and GIS software packages. Special fees apply. Prerequisites: GEOG F111X or GEOS F222 or permission of instructor. Cross-listed with GEOS F222. (2.5+1.5)

GEOG F300  Internship in Natural Resources Management and Geography  
1–3 Credits  Offered As Demand Warrants  
Supervised pre-professional experience in a business or agency (public or private). Open to students majoring or minoring in natural resources management and geography only. Course may be repeated for credit up to a maximum of 6 credits. Prerequisites: NRM F101 for natural resources management majors or GEOG F101 for geography majors; junior standing with 3.0 GPA; permission of instructor; and an approved internship plan. Cross-listed with NRM F300. (0+0-3-10)

GEOG F302  Geography of Alaska  
3 Credits  
Regional, physical and economic geography of Alaska. Special consideration of the state's renewable and nonrenewable resources and of plans for their wise use. Frequent class study of representative maps and visual materials. (3+0)

GEOG F303  Geography of United States and Canada  
3 Credits  Offered Fall Even-numbered Years  
In-depth examination of the natural, political, cultural, and economic characteristics of the U.S. and Canada and their major sub-regions. Explores contrasts in U.S. and Canadian historical, cultural and political geography; sources of national identity; and interactions with aboriginal peoples. Includes economic and political relationships between the two countries, and the role each has played in current and historical world affairs. Prerequisites: An introductory geography course or background in United States or Canadian history, social science, or cultures; or permission of instructor. (3+0)

GEOG F305 W  Geography of Europe  
3 Credits  Offered Spring Even-numbered Years  
In-depth examination of the natural, political, cultural and economic characteristics of Europe and its major sub-regions. Explores current political and economic transformations, historical and contemporary world influences, and issues of nationalism and identity. Prerequisites: ENGL
Course Descriptions

GEOGRAPHY (GEOG)

F111X; ENGL F211X or ENGL F213X; an introductory geography course or background in European history, social science, or culture; or permission of instructor. (3+0)

GEOG F306 Geography of Russia (s) Offered Spring Even-numbered Years
The physical, cultural and historical geography of Russia and the Ukraine, Central Asia, Siberia and parts of Eastern Europe. (3+0)

GEOG F307 Weather and Climate ✦ Offered Spring
Weather systems and climate classification. Emphasis on weather system processes, measuring weather variables and physical processes of the atmosphere. Prerequisites: GEOG F111X; or permission of instructor. (3+0)

GEOG F309 Digital Cartography and Geo-Visualization (s) Offered Spring Odd-numbered Years
The concepts of map design, layout and presentation to effectively visualize and communicate complex spatial data. Special fees apply. Prerequisites: Permission of instructor. (4+0)

GEOG F311 W Geography of Asia (s) Offered Fall
Examines the natural, political, cultural, and economic characteristics of China, Japan, India-Pakistan, Southeast Asia, and the Asiatic countries of the Middle East. Explores historical and current political and economic transformations, historical, and contemporary world influences, and foundations of regional political, economic, and military conflicts. Prerequisites: ENGL F111X; ENGL F211X or ENGL F213X; an introductory geography course or background in Asian history, social science, or culture; or permission of instructor. (3+0)

GEOG F312 People, Places, and Environment: Principles of Human Geography (s) Offered Fall
Examines how human activity manifests itself on the earth’s surface through the geographic lenses of ethnicity, politics, industry, language, religion, and demographics. Explores spatial patterns, relationships and contrasts between places, origin and diffusion of traits, and human interactions with the environment. Prerequisites: GEOG F101 or GEOG F203; or permission of instructor. (3+0)

GEOG F338 Introduction to Geographic Information Systems Offered Fall
Geographic data concepts including mapping systems, data sources, editing data, GIS analysis and computer mapping. Introduction to global positioning systems. GIS applications in natural resources management. Prerequisites: Knowledge of PCs or Unix workstations desirable. Cross-listed with NRM F338. (2+3)

GEOG F339 Maps and Landscape Analysis (n) Offered Spring
Topographic map interpretation for landscape analysis and geographic data acquisition, including topographic features, vegetation patterns, and political and cultural features. Emphasis on topographic maps for remote data acquisition and environmental impact analysis. Special fees apply. Prerequisites: GEOG F111X; GEOS F304 or or permission of instructor. (3+0 or 3)

GEOG F402 Resources and Environment (s) Offered Fall
Interdisciplinary analysis of the Earth as a natural resource base, and the management issues of resource extraction, allocation, development, conservation and preservation. Prerequisites: GEOG F101; GEOG F111X (3+0)

GEOG F405 Political Geography (s) Offered As Demand Warrants
Geographical analysis of the evolution, structure, internal coherence and sources of strength of individual nation states, with emphasis on nations of the Pacific realm and Arctic periphery. Consideration of regional blocs, spheres of influence and potential for international cooperation. Prerequisites: GEOG F101. (3+0)

GEOG F410 Geography of the Pacific Rim 3 Credits Offered Fall Odd-numbered Years
Examines the physical and human geography of the Pacific Rim. Will employ both a global and topical approach and include aspects of environmental, historic, economic, social, and political issues. Regional studies on physical and human geographic attributes of selected countries will be analyzed and compared. Prerequisites: GEOG F101; GEOG F111X; or permission of instructor. (3+0)

GEOG F412 Geography of Climate and Environmental Change ✦ 3 Credits Offered Fall
Serves as a “synthesis” breadth course focusing on the geography of climate and environmental change. The major concepts of global climate processes and climate change will be reviewed on multiple time scales. The impacts of natural and anthropogenic environmental change will be examined through selected case studies and readings (e.g. permafrost, invasive species, sea ice, fire, urbanization). Prerequisites: GEOG F307 or ATM F101X or ATM F401; or permission of instructor. (3+0)

GEOG F418 Biogeography ✦ Offered Fall
This course explores the geography of life by examining linkages between climate, geomorphology, and ecological communities with emphasis on the biogeography of subarctic, polar, and alpine regions. Prerequisites: BIOL F271 or BIOL/NRM F277; junior/senior standing or permission of the instructor. Cross-listed with BIOL F418. Stacked with GEOG F618 and BIOL F618. (3+0)

GEOG F420 Geopolitics of Energy (s) Offered Spring Even-numbered Years
Examines the impacts that energy resource exploration, development, production, and transportation have on the internal politics of various countries in the world, and on international economic and political relationships. Explores the cultural, political, economic, physical, and historical underpinnings of contemporary geopolitical events involving energy resources, and explores possible future scenarios. Prerequisites: Any of the following courses: GEOG F101; GEOG F203; GEOG F312; GEOG F405; NRM F101; NRM F304; PS F201; PS F203; PS F321; PS F323; ECON F235; ECON F335; ECON F349; ECON F463; junior standing; or permission of instructor. Recommended: GEOG F101. (3+0)

GEOG F427 Polar Geography (s) ✦ Offered Spring Odd-numbered Years
Comparative physical, cultural, political and economic geography of the Circumpolar North and Antarctic regions. Special attention to Arctic natural resource development, climate change in both polar regions. Prerequisites: GEOG F101 or GEOG F203 or GEOG F111X; or permission of instructor. (3+0)

GEOG F430 Google Earth and Neogeography 3 Credits Offered Fall
Neogeography is a term used to describe "new" primarily web-based mapping techniques and technologies. This course teaches neogeography through the use of Google Earth, a free computer application often called a “Virtual Globe,” which provides the base imagery, terrain data and viewing functionality. Students will learn to create location-based visualizations of geospatial data in Google Earth using Keyhole Markup Language (KML). The methods and skills learned by the students will be applicable to assignments in many other classes and thesis research projects as a way of producing dynamic visualizations from any dataset with a geospatial component. Prerequisites: junior standing or higher with completed course work in geographic methods (GEOG F338; F339; GEOS F304) or 300-level course work in other natural/social sciences; or permission of instructor. (3+0)

GEOG F435 GIS Analysis 4 Credits Offered Spring
GIS analysis of natural resources including spatial query, attribute query, vector, grid, image, topographic and network analysis techniques. Cross-listed with NRM F435. (3+3)
COURSES

GEOG F454 Comparative Farming and Sustainable Food Systems
3 Credits Offered Fall
Principles of food systems geography and food security. Cross-cultural examination of dietary traditions, poverty, hunger, equity and food access and distribution. Comparison of multiple varieties and scales of agricultural systems in the context of social, ecological and economic sustainability. Considers Alaskan and other high-latitude food systems, including country food, wild game harvest and rural to urban nutrition transition. Junior standing and ENGL F211X or F213X; or permission of instructor. Cross-listed with NRM F454 and CCS F454. (3+0)

GEOG F463 Wilderness Concepts
3 Credits Offered Fall
History and evolution of wilderness thought, the contemporary meaning of wilderness, and survey of economic and noneconomic wilderness values for individuals and society. Cross-listed with NRM F463. (3+0)

GEOG F464 Wilderness Management
3 Credits Offered Spring
Wilderness ecology and land management practices on lands designated as wilderness. Plus, visitor management regimes are analyzed. Both national and international views of wilderness are presented. Prerequisites: A basic course in ecology; resource management; or permission of instructor. Cross-listed with NRM F464 (3+0)

GEOG F475 National Park Concepts
3 Credits Offered Spring Even-numbered Years
History of the national park ideal, the evolution of the National Park Service, and the geography of the national park system. Contemporary national park policy and management case studies, including controversies resulting from competing visions. Prerequisites: Junior standing or permission of instructor. (3+0)

GEOG F483 W Research Design, Writing, and Presentation Methods (W)
3 Credits Offered Fall
Capstone research practicum for Geography and Natural Resources Management majors. Focuses on designing an individual research project or thesis in coordination with a faculty mentor. Designed to integrate the knowledge and skills students have gained through undergraduate course work, and to prepare them for graduate research or professional level projects. Emphasizes scientific method, research design, proposal writing, development of field and analytical methods, scientific writing, and the oral, written, and graphical presentation of data and research results. Prerequisites: ENGL F211X or ENGL F213X; at least one writing intensive course designated (W); junior standing in Geography or Natural Resources Management. Cross-listed with NRM F483. (3+0)

GEOG F488 Geographic Assessment and Prediction of Natural Hazards
3 Credits Offered Fall Even-numbered Years
Integrate aspects of physical geography with the human dimension via the study of the assessment and prediction of natural hazards. Guest speakers, case studies, and applied practical exercises will help students transition from content-based courses to applying their knowledge in “real-world” situations, using geographic tools in remote sensing and GIS. Prerequisites: GEOG F111X or permission of instructor. (3+0)

GEOG F490 W,O Geography Seminar (W, O)
3 Credits Offered Spring
Discussion of geographic thought including past, present and future directions of the discipline. Contributions of geography to science, philosophy and ethics integrated through detailed review of contemporary literature and research. Prerequisites: COMM F131X or F141X; ENGL F111X; ENGL F211X or ENGL F213X; senior Geography major; permission of instructor. (3+0)

GEOG F618 Biogeography
3 Credits Offered Fall
This course explores the geography of life by examining linkages between climate, geomorphology, and ecological communities with emphasis on the biogeography of subarctic, polar and alpine regions. Prerequisites: Graduate standing or permission of instructor. Cross-listed with BIOL F618. Stacked with GEOG F418 and BIOL F418. (3+0)

GEOG F627 Polar Geography
3 Credits Offered Spring Odd-Numbered Years
Comparative physical, human and economic geography of cold regions in the North, especially Canada, Siberia, Greenland and Scandinavia. Special attention to Arctic natural resource development, climate change in both polar regions, and polar geopolitics. Prerequisites: Graduate standing or permission of instructor. Cross-listed with NORS F627. (3+0)

GEOG F656 Sustainable Livelihoods and Community Well-Being
3 Credits Offered Fall
Review the basic principles that govern the sustainability of systems and look at the cultural practices and individual behaviors that enhance or degrade sustainable livelihoods and community well-being. Emphasis is on understanding the historical context of ideas about sustainability, on understanding the nature and magnitude of the social, economic and ecological dimensions of contemporary change, and the “best practices” currently in place for communities to respond effectively to change. Prerequisites: Graduate standing or permission of instructor. Cross-listed with NRM F656 and CCS F656. (3+0)

GEOG F663 Wilderness Concepts
3 Credits Offered Fall
History and evolution of wilderness thought, the contemporary meaning of wilderness, and survey of economic and noneconomic wilderness values for individuals and society. Cross-listed with NRM F663. (3+0)

GEOG F692 Graduate Seminar
1–3 Credits
Topics in natural resources management and geography explored through readings, student presentations, group discussions and guest speakers. Prerequisites: Graduate standing or permission of instructor. Cross-listed with NRM F692. (1-3+0)

GEOG F692P Graduate Seminar
1–3 Credits
Topics in natural resources management and geography explored through readings, student presentations, group discussions and guest speakers. Graded Pass/Fail. Prerequisites: Graduate standing or permission of instructor. Cross-listed with NRM F692. (1-3+0)

GEOLOGICAL ENGINEERING

GE F101 Introduction to Geological Engineering
1 Credit Offered Fall
Multiple aspects of geological engineering as a profession; the area and scope of the field. Graded Pass/Fail. (1+0)

GE F261 General Geology for Engineers
3 Credits Offered Spring
Study of common rocks and minerals, landforms and erosion. Geologic materials and engineering application of geology. Special fees apply. Prerequisites: MATH F107X; MATH F108 or equivalent; Geology, science or engineering majors, or permission of instructor. (2+3)

GE F322 Erosion Mechanics and Conservation
3 Credits Offered Spring or As Demand Warrants
Engineering mechanics of water and wind erosion processes, types of geologic or anthropogenic induced erosion, application of engineering principles for design, management and control of erosion and engineering
analysis of conservation structures. Prerequisites: ES F341 or permission of instructor. (3+0)

</table>

GE F420    Subsurface Hydrology
3 Credits  Offered Fall
Hydrologic, geologic and other factors controlling groundwater flow, occurrence, development, chemistry and contamination. Elementary groundwater flow theory. Interactions between surface-subsurface hydrologic systems. Hydraulic characteristics of earth materials, engineering problems and models related to subsurface fluids, and properties of water. Special fees apply. Prerequisites: GE F365; MATH F302; ES F341; or permission of instructor. Stacked with GE F610. (2+3)

GE F422    Soil Physics
3 Credits  Offered As Demand Warrants
Fundamentals of soil physics, including soil texture, structure, size distribution, and water retention characteristics; flow of water through saturated and unsaturated soil; soil temperature and heat flow; infiltration, runoff, and evaporation. Processes relevant to active layer dynamics and permafrosts are given due consideration. Prerequisites: CHEM F105X, CHEM F106X; or permission of instructor. (2+3)

GE F430    Geomechanical Instrumentation
3 Credits  Offered Spring
Geologic, engineering and economic considerations applied to the design and development of mineral exploration programs. Prerequisites: GEOS F314 or permission of instructor. (3+0)

GE F435    Exploration Design
3 Credits  Offered Fall
Geologic, engineering and economic considerations applied to the design and development of mineral exploration programs. Prerequisites: GEOS F314 or permission of instructor. (3+0)

GE F440    Slope Stability
3 Credits  Offered Fall
Slope design for open pit mining and other excavations. Stability analysis by various methods and on-site measuring and monitoring techniques. Prerequisites: ES F331. (3+0)

GE F441    Geohazard Analysis
3 Credits  Offered Fall
Procedures and techniques to evaluate geological factors for geohazards, such as landslides, earthquakes, volcanoes, flooding, coastal hazards and permafrost-related problems. Prerequisites: GE F365 or equivalent; or permission of instructor. (3+0)

GE F445    Design of Earth Dams and Embankments
3 Credits  As Demand Warrants
Preliminary planning for design and construction of dams, site selection, reservoir assessment, foundation and other building materials, procedure for design of earth dams, design of abutment and spillway, estimation of volume of earthworks and storage capacities, site preparation for construction, excavation, slope stability issues and other geological engineering assessments. Prerequisites: senior standing or permission of instructor. (3+0)

GE F480 W  Senior Design
3 Credits  Offered Fall Odd-numbered Years
Design factors and procedures for the solution of geological engineering problems. A design project is the focus of the course. Prerequisites: ENGL F111X; ENGL F211X or ENGL F213X or permission of instructor; senior standing in the geological engineering program with completion of GE F261; GE F365; GE F371; GE F375; GE F381 or equivalent; GE F382 or equivalent; GE F405; GE F420. (1+6)

GE F610    Subsurface Hydrology
3 Credits  Offered Fall
Hydrologic, geologic and other factors controlling groundwater flow, occurrence, development, chemistry and contamination. Elementary groundwater flow theory. Interactions between surface-subsurface hydrologic systems. Hydraulic characteristics of earth materials, engineering problems and...
models related to subsurface fluids, and properties of water. Special fees apply. Prerequisites: Graduate standing in Engineering or permission of instructor. Stacked with GE F420. (2+3)

GE F620 Advanced Groundwater Hydrology
3 Credits
Offered Fall Odd-numbered Years or As Demand Warrants
Study of groundwater hydrology with emphasis on solute and contaminant transport, chemical reaction and ion exchange, advection and diffusion and computer modeling. Prerequisites: GE F610 or equivalent; graduate standing or permission of instructor. (2+3)

GE F622 Unsaturated Soil Geoenengineering
3 Credits
Offered As Demand Warrants
Fundamentals of soil physical processes, multiphase flow and transport in unsaturated porous media such as soils. Application of principles of unsaturated flow to geoenvironmental and geotechnical systems. Methods for characterization of hydraulic properties in relation to soil physical parameters in the context of geoenengineering problems of flow and stability. Non-isothermal flow in unsaturated soils and its impact on subsurface environment. Biogeochemical processes affecting soil and groundwater contamination. Unsaturated flow and transport modeling including heat transfer relevant to active layer dynamics and permafrost underlain soils in Alaska and other similar cold regions. Prerequisites: GE F620 or equivalent course and Graduate standing in Engineering or permission of instructor. Stacked with GE F422. (3+0)

GE F624 Stochastic Hydrology and Geohydrology
3 Credits
Offered As Demand Warrants
Overview of the stochastic methods used to study and analyze hydrologic and geohydraulic processes. Emphasis on modeling hydrologic processes using statistical methods and stochastic interplay of processes between surface and subsurface hydrology. Prerequisites: GE F620 or equivalent and graduate standing in Engineering; or permission of instructor. (3+0)

GE F626 Thermal Geotechnics
3 Credits
Offered As Demand Warrants
Fundamentals of thermal regimes of soils and rocks. Thermal impact of structures on soils. Thawing of permafrost beneath roads, buildings and around pipelines. Natural and artificial freezing of soils. Engineering means to maintain thermal regime of soils. Thermal design considerations. Cross-listed with GE F626. (3+0)

GE F635 Advanced Geostatistical Applications
3 Credits
Offered Spring
Introduction to the theory and application of geostatistics. Review of classical statistics, continuous and discrete distributions, hypothesis testing and global estimation. Presentation of fundamental geostatistical concepts including: variogram, estimation variance, block variance, kriging, geostatistical simulation. Emphasis on the practical application of geostatistical techniques. Prerequisites: MIN F408 or equivalent; graduate standing or permission of instructor. Cross-listed with MIN F635. (2+3)

GE F665 Advanced Geological Materials Engineering
3 Credits
Offered Spring
In-depth study of geological materials (aggregates — sand, gravel and crushed rock for construction purposes) exploration, evaluation, testing and production. Emphasis placed on geological materials used for construction in arctic and sub-arctic environments, economic analysis of pit and quarry operations and availability of materials in Alaska. Prerequisites: GE F365 or equivalent; permission of instructor. Recommended: MIN F408. (3+0)

GE F666 Advanced Engineering Geology
3 Credits
Offered Fall Odd-numbered Years
The interaction between geology and engineering case histories. Prerequisites: GE F365; GE F372; graduate standing; or permission of instructor. (2+3)

GE F668 Tunneling Geotechniques
3 Credits
Offered Fall Even-numbered Years
Tunnel design, case histories, student report. Prerequisites: Graduate standing or permission of instructor. (3+0)

GE F692 Graduate Seminar
1 Credit
Topics in geological engineering explored through talks, group discussions and guest speakers with a high level of student participation. Prerequisites: Graduate standing or permission of instructor. (1+0)

GE F692P Graduate Seminar
1 Credit
Topics in geological engineering explored through talks, group discussions and guest speakers with a high level of student participation. Graded Pass/Fail. Prerequisites: Graduate standing or permission of instructor. (1+0)

GEOS F100X Introduction to Earth Science (n)
4 Credits
Offered As Demand Warrants
Survey of four main disciplines of earth science: geology, oceanography, meteorology, and astronomy. Lab portion serves as a: vehicle to learn scientific methodology, evidence to support theories presented in lectures. Prerequisites: Placement in ENGL F111X or higher; placement in DEV M F105 or higher; or permission of instructor. (3+3)

GEOS F101X The Dynamic Earth (n)
4 Credits
Physical geology: a study of the Earth, its materials, and the processes that effect changes upon and within it. Laboratory training in use of topographic maps and recognition of common rocks and minerals. Special fees apply. Prerequisites: Placement in ENGL F111X or higher; placement in DEV M F105 or higher; or permission of instructor. (3+3)

GEOS F106X Life in the Age of Dinosaurs (n)
4 Credits
Offered Spring Even-numbered Years
Promote a broader understanding of deep time through an examination of life and environments during the Mesozoic, or “Age of Dinosaurs.” Discussions and exercises will focus on major events and processes that shaped the physical environments of the Mesozoic, such as the formation and break up of continents, global climate, and changing sea levels. Building on this foundation, the course will examine the fossil record to learn what it reveals about the major patterns in the diversity of terrestrial and marine life. Special emphasis will be placed on the origin, extinction, and paleobiology of dinosaurs. Important groups of contemporary vertebrates and invertebrates, including marine reptiles, mammals, flying reptiles, and ammonites will also examined. The rise of flowering plants and the importance of fossil floras in understanding Mesozoic climates will be explored. Labs will provide opportunities to examine and identify fossils and use them to reconstruct ancient environments. Prerequisites: Placement in ENGL F111X or higher; placement in DEV M F105X or higher; or permission of instructor. (3+3)

GEOS F112X The History of Earth and Life (n)
4 Credits
Offered Spring
Historical geologic interpretation, geologic time scale, stratigraphic record and interpretation. Sedimentation and plate tectonics, fossil record and utilization, biostatigraphy, and geologic evolution of the North American continent. Lab examination of fossils, interpretation of geologic maps and stratigraphic columns. Special fees apply. Prerequisites: GEOS F101X; placement in ENGL F111X or higher; placement in DEV M F105 or higher; or permission of instructor. (3+3)
GEOS F101X  Glaciers, Earthquakes, and Volcanoes: Past, Present, and Future (n)

4 Credits
A survey course for the nonspecialist on the causes, effects, measurements and prediction of glaciers, earthquakes and volcanoes. Special fees apply.
Prerequisites: Placement in ENGL F111X or higher; placement in DEV M F105 or higher; or permission of instructor. (3+3)

GEOS F190  The Geology of Wine
2 Credits  Offered Spring
This course explores the relationship between geology, climate, and viticulture. Aspects of geology that influence landscape, soil development and climate are evaluated in reference to their effects on wine-growing regions. The geology, tectonic setting, soil and climate of individual wine-growing areas will be explored through lectures, discussions, class projects/presentations, and lab wine tastings. Graded Pass/Fail. Special fees apply.
Prerequisites: Student must be 21 years of age to enroll. (1.5+0.5)

GEOS F211  Geology of Alaska ★
3 Credits  Offered As Demand Warrants
Modern geologic processes in Alaska as a basis for understanding past geologic evolution of the region. The origin and recovery of Alaska’s petroleum and mineral resources will be discussed. For non-majors. Special fees apply.
Prerequisites: GEOS F101X or permission of instructor. (3+0)

GEOS F213  Mineralogy (n)
4 Credits  Offered Fall
Mineral chemistry, atomic structure, elementary crystallography, optical crystallography and descriptive and determinative mineralogy. Instrumental determinative techniques (x-ray diffraction, petrographic microscope). Special fees apply. Prerequisites or co-requisites: CHEM F105X; GEOS F101X; MATH F107X. (2+6)

GEOS F214  Petrology and Petrography (n)
4 Credits  Offered Spring
Origin, occurrence and classification of igneous and metamorphic rocks. Laboratory work involves hand lens identification and thin section examination of representative rocks. Special fees apply. Prerequisites: GEOS F213. (2+6)

GEOS F215  Fundamentals of Geospatial Science
3 Credits  Offered Fall
This course is an introduction to the principles and applications of geospatial science (remote sensing, GIS and GPS). Fundamental concepts include electromagnetic radiations, map projections, basic computer science, data formats, map-reading and map-making, etc. Practical exercises include field data collections using GPS, photo-interpretation using image processing and GIS software packages. Prerequisites: GEOS F111X or GEOS F101X or permission of instructor. Cross-listed with GEOG F222. (2.5+1.5)

GEOS F225  Field and Computer Methods in Geology
2 Credits
Basic field methods, including field notes, topographic maps, measurement of structural elements, field safety, illustration, field mapping, and the use of GPS for field work are discussed and practiced. Use of computers for processing geologic field data and analytical data, and integration of field data into a simple Geographic Information System. Computers are used for the production of reports and technical illustration. This course will fulfill the department requirement for computer literacy. Special fees apply. Prerequisites: GEOS F101X. (1+3)

GEOS F262  Rocks and Minerals
3 Credits  Offered Fall Even-numbered Years
Physical properties of minerals and rocks, classification, mode of occurrence and economic applications. Labs on recognition and measurement of physical properties. Course may not be used to satisfy degree requirements in geology or geological engineering. Special fees apply. Prerequisites: GEOS F261, GEOS F101X or equivalent. (2+3)

GEOS F304  Geomorphology
3 Credits  Offered Fall
Surface features of the Earth and the processes which create or modify them. Application to Quaternary history, environmental science and related fields. Laboratory examination of topographic maps and aerial photographs, introduction to geomorphic measurements. Special fees apply. Prerequisites: GEOS F101X. (3+0)

GEOS F309  Tectonics
3 Credits  Offered Spring
In-depth exploration of the theory of Plate Tectonics including plate boundary interactions — which trigger volcanoes and earthquakes, form mountain belts and oceans — via geochemistry, sedimentology, geophysics and structure. Understanding the creation and evolution of the lithosphere and mantle, how we detect tectonic processes and how present tectonic environments help reconstruct ancient crustal events. Prerequisites: GEOS F112; GEOS F214 or GEOS F262 (either may be taken concurrently) or permission of instructor. (3+0)

GEOS F314  Structural Geology (n)
4 Credits  Offered Spring
Introductory overview of how rocks are deformed, types of geological structures including folds, faults and penetrative fabrics, and the associations of structures characteristic of different tectonic settings. Provides background in structural geology. Emphasis in the laboratory on examples and techniques that are broadly applicable in geology, especially the interpretation of geologic maps. Special fees apply. Prerequisites: GEOS F322 or concurrent enrollment in GEOS F214; PHYS F103X or PHYS F211X. (3+3)

GEOS F315 W  Paleobiology and Palaeontology (n)
4 Credits  Offered Fall
Survey of the history of life on Earth as represented in the fossil record. Contribution of paleontology to the study of evolution, past environments and paleogeography; biostatigraphically important invertebrate fossil groups and their temporal ranges; evolution of terrestrial flora and fauna; current issues in paleontology. Emphasis on recognition of major fossil groups and paleontological problem solving in labs and assignments. Special fees apply. Prerequisites: BIOL F103X or BIOL F115X or GEOS F112X; ENGL F111X; ENGL F211X or ENGL F213X or permission of instructor. (3+3)

GEOS F317 O  Paleontological Research and Laboratory Methods
2 Credits  Offered Spring Even-numbered Years
Introduction to the research methods in paleontology. This course covers the fundamentals of fossil preparation, digital techniques for imaging and analyzing paleontological data, and discusses the current theory and practice of curation of fossil material in a museum setting. Common techniques for presenting research results to a scientific and public audience are also covered, with an emphasis on oral presentations. Labs emphasize practical experiences in the methods and presentation of research. Prerequisites: GEOS F101 and GEOS F112X or permission of the instructor. (1+3)

GEOS F318  Solid Earth Geophysics
3 Credits  Offered Alternate Fall
Concepts and techniques of geophysics including origin of the Earth, its structure, and large scale dynamic processes responsible for its surface features. Geophysical techniques including seismology, gravity and magnetic methods are discussed along with measurements of the earth’s thermal structure, rotation rates, and tidal effects. Prerequisites: MATH F200X; PHYS F204X; or permission of instructor. (3+0)

GEOS F322  Stratigraphy and Sedimentation (n)
4 Credits  Offered Fall
Analysis and interpretation of sedimentary rocks in stratigraphic successions based on comparison with features found in modern depositional environments. Application of the principles of facies analysis and litho-, bio-, sequence, and chronostratigraphy in surface and subsurface examples. Emphasis in the laboratory on interpretation of depositional environments based on lithofacies, biofacies and sedimentary structures and correlation of stratigraphic sequences using surface and subsurface data. Special fees apply. Prerequisites: GEOS F101X or GEOS F261; GEOS F112X. (3+3)
GEOS F330  The Dynamic Alaskan Coastline
3 Credits  Offered Fall
Mountains, rivers, glaciers, fjords, estuaries, deltas, tidal zones, sediments, nutrients, elements, habitats, fish. This class will provide an interdisciplin- ary perspective on the dynamic Alaskan coastal landscape from Glacier Bay to the Arctic. We will delve into the driving geological, geochemical, and oceanographic processes occurring along Alaska’s coast and linkages to various marine ecosystems. Students will learn the fundamental physical and geochemical processes in the coastal zone using various locations in Alaska as examples. Field trip required. Special fees apply. Prerequisites: Junior standing; MSL F111X or GEOS F101; CHEM F105X; PHYS F103X or PHYS F211X. (3+0)

GEOS F332  Ore Deposits and Structure
3 Credits  Offered Spring
Distribution and characteristics (especially mineralogy, morphology, and structure) of major mineral deposit types with background on structural techniques. Emphasis on application to mineral exploration and development. Laboratory exercises stress recognition of major mineral deposit types, zoning and grade patterns; and use of structural techniques in mineral deposit exploration/development. Special fees apply. Prerequisites: GEOS F262 or permission of instructor. (1+6)

GEOS F351 W  Field Geology (n)
8 Credits  Offered Summer Odd-numbered Years; As Demand Warrants
Practical experience in a variety of field settings collecting and presenting basic geologic field data. Includes field mapping of stratigraphic and structural problems using topographic maps, airborne and satellite images. Students will prepare geologic maps in a variety of tectonic and lithologic settings and develop written reports detailing the geologic history for several study areas. Exercises in collection and use of geophysical data as an aid to geologic mapping. Hiking off trails in a variety of terrains with up to 2,000 vertical feet of elevation gain per day. Course fees cover transportation and subsistence outside of Fairbanks. Entrance by preregistration only; apply through the department. Early registration recommended. Prerequisites: ENGL F111X; ENGL F211X or ENGL F213X; GEOS F214; GEOS F225; GEOS F314; GEOS F322; junior standing; permission of instructor. (8+0)

GEOS F370  Sedimentary and Structural Geology for Petroleum Engineers (n)
4 Credits  Offered Fall Odd-numbered Years
Origin and distribution of sedimentary rocks including depositional environments, stratigraphic relationships and structures. Emphasis on the relationship to petroleum occurrences and petroleum exploration. Laboratory exercises on mapping, structural problems and facies relationships in petroleum exploration. Special fees apply. Prerequisites: GEOS F101X or GE F261. Cross-listed with PETE F370. (3+3)

GEOS F380  Geological Hazards
3 Credits  Offered Spring
Survey of natural hazards and the disasters they cause, with emphasis on geological hazards in Alaska. Investigation of hazardous phenomena, prediction and mitigation. Topics to include: earthquakes, volcanoes, tsunamis, weather/climate and asteroid impacts. Provides a foundation in basic geological hazards related to science, suitable for use in teaching, communications, policy and emergency management careers. Prerequisites: GEOS F101X or GEOS F120X or GEOS F160X or permission of instructor. (3+0)

GEOS F406  Volcanology
3 Credits  Offered Spring Even-numbered Years
Physical processes of volcanism. Topics include physical properties of magmas, eruption mechanisms, deposition mechanism and volcanic hazards. Emphasis on explosive volcanism and its products, pyroclastic rocks. Geochemistry and petrology will not be emphasized in this course. Prerequisites: Permission of instructor. (3+0)

GEOS F408  Photogeology (n)
2 Credits  Offered Spring Even-numbered Years
Use of topographic maps, geologic maps, aerial photographs and satellite imagery in interpretation of geological structures, landscapes, landforms and geomorphic processes. Techniques included are map compilation, photo mapping, statistical treatment of map data and composite mapping for planning. Special fees apply. Prerequisites: GEOS F304 or permission of instructor. (1+3)

GEOS F417  Introduction to Geochemistry
3 Credits  Offered Fall
Application of chemical principles and elemental/isotopic behavior to the study of the Earth. Topics include: aqueous geochemistry, high-temperature mineral-elemental chemistry, isotopic chemistry, kinetics and thermochemistry. Prerequisites: CHEM F106X; GEOS F322 or CHEM F202. Stacked with GEOS F618. (3+0)

GEOS F421  Sedimentology
3 Credits  Offered Spring Odd-numbered Years
Origin, classification, composition, transportation, deposition and diagenesis of sediments. Emphasis on sedimentary processes, sedimentary petrology and interpretation of ancient sedimentary rocks. Laboratory covers identification and description of hand specimens as well as techniques of textural and compositional analysis. Special fees apply. Prerequisites: GEOS F213 or permission of instructor. (2+3)

GEOS F422  Geoscience Applications of Remote Sensing (n)
3 Credits  Offered Fall
Remote sensing and its applications to geologic, environmental and physical sciences. Includes physical principles, digital image processing and hands-on project experience using satellite images for mapping and change detection. Course is not available for audit. Prerequisites: GEOS/GEOG F222 or permission of instructor. (2+3)

GEOS F428  Elementary Scanning Electron Microscopy
1 Credit  Offered Spring
Basic theory and operating procedures for scanning electron microscopy. Includes sample preparation, imaging and qualitative elemental analysis. Biological and nonbiological applications are covered. Graded Pass/Fail. Special fees apply. Prerequisites: Junior standing or permission of instructor. Stacked with GEOS F628. (0.5+1.5)

GEOS F430  Statistics and Data Analysis in Geology
3 Credits  Offered Spring
Computer-supported geologic applications of elementary statistics, Markov chains, time-series analysis, trend-surface analysis, factor analysis, cluster analysis, discriminant analysis, and multiple regression. Prerequisites: GEOS F225; STAT F200X. (3+0)

GEOS F431  Foundations of Geophysics
4 Credits  Offered Fall
Applications of continuum mechanics, heat flow theory, and potential theory to geophysical, geologic and glaciological problems. Topics such as postglacial rebound, non-Newtonian fluid flow, thermal convection, stress-relaxation, rheology of earth materials, gravity, and magnetics will be discussed. Emphasis will be placed on methods and tools for solving a variety of problems in global and regional geophysics and the geophysical interpretation of solutions. Prerequisites: GEOS F318, MATH F302, and MATH F314 or permission of instructor. Stacked with GEOS F631. (3+3)

<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>GEOS F436</td>
<td>Beyond the Mouse: Computer Programming and Automation for Geoscientists</td>
<td>2</td>
<td>Basic concepts of computer programming and effective automation of tasks using a computer, with an emphasis on tools and problems common to the geosciences and other physical sciences. Use of MATLAB, shell scripting and various command line tools for data analysis, making scientific figures, maps, and visualizations. Graded Pass/Fail. Prerequisites: Senior standing or permission of the instructor. Stacked with GEOS F636. (1-3)</td>
</tr>
<tr>
<td>GEOS F438</td>
<td>Basin Analysis</td>
<td>3</td>
<td>Examines sedimentary basins as a record of subsidence. Review and discuss techniques used to image basin stratigraphy as well as the quantitative techniques which can be used to recover basin history. Prerequisites: GEOS F322 or GEOS F370. Recommended: GEOS F314; GEOS F416; GEOS F418. Stacked with GEOS F638. (3+0)</td>
</tr>
<tr>
<td>GEOS F445</td>
<td>Petroleum Geology</td>
<td>3</td>
<td>Examines the origin of petroleum, the geologic controls of its distribution and accumulation and the basic tools used in exploration and exploitation, including subsurface mapping, well logging and exploration geophysics. Prerequisites: GEOS F314 and GEOS F322 or permission of the instructor. Cross-listed with PETE F645. Stacked with GEOS F645. (3+0)</td>
</tr>
<tr>
<td>GEOS F452</td>
<td>Quaternary Seminar</td>
<td>3</td>
<td>Learning about the Quaternary Period (relatively recent past — spanning the past two million years) in order to gain a better understanding of the landscape, biota and climate of the present day. Quaternary studies are concerned with the historical dimension of the natural sciences. This seminar will range widely over diverse interdisciplinary subjects of Quaternary interest, such as paleoecology, paleobiogeography, vertebrate paleontology and sedimentology. Prerequisites: GEOS F304; GEOS F315; GEOS F322. Cross-listed with ANTH F451. (3+0)</td>
</tr>
<tr>
<td>GEOS F453</td>
<td>Palynology and Paleopalynology (n)</td>
<td>4</td>
<td>Survey of the evolutionary record of palynomorphs and their uses in biostratigraphy and paleoecology. Focus on evolution of palynomorphs from Precambrian to the present and concurrent evolutionary developments of producing plants. Use of Quaternary palynofloras in reconstructing global climates. Labs involve collection of herbarium specimens, processing of fossil palynomorphs, study of type slides and a survey of palynofloras from each geologic period. Special fees apply. Prerequisites: BIOL F115X or GEOS F315; senior standing. Stacked with GEOS F653. (3+3)</td>
</tr>
<tr>
<td>GEOS F456</td>
<td>Paleopedology</td>
<td>3</td>
<td>A survey course focusing on the recognition and use of paleosols (fossil soils) as paleoenvironmental indicators, stratigraphic markers and in paleo-geographic reconstructions from Precambrian to Holocene. Examination of theories of soil formation, major soil processes and approaches to soil classification. Review of geochemical, mineralogical, morphological and micromorphological techniques. Use of paleosols for paleolandscapes and soil evolution and basin analysis. Geological, tectonic, archaeological and environmental applications of paleosols are discussed. Prerequisites: GEOS F322 or GEOG F111 or NRM F380 or permission of instructor. Stacked with GEOS F656. (3+0)</td>
</tr>
<tr>
<td>GEOS F458</td>
<td>Geoscience Applications of GPS and GIS (n)</td>
<td>3</td>
<td>Aspects of GPS data collection, including hands-on experience with different GPS units, differential GPS methods, real-time and post processing corrections. Concepts of Geographic Information Systems (GIS). Working with real-world data and software tools such as Excel spreadsheets and ArcGIS, students will learn to organize and integrate multiverse data, analyze spatial relationships and generate maps for digital and print media. Course is not available for audit. Prerequisites: GEOS/GEOG F222 or permission of instructor. Stacked with GEOS F658. (2+3)</td>
</tr>
<tr>
<td>GEOS F463 O</td>
<td>Glacial and Periglacial Geology (n)</td>
<td>4</td>
<td>Glaciers and their geological processes. Emphasizes recognition and understanding of glacial landforms, sediments and stratigraphic relations, and implications for paleoclimatology and paleogeography. Includes non-glacial techniques and methods for interpreting Quaternary sediments. Special fees apply. Prerequisites: COMM F131X or COMM F141X; GEOS F304. Stacked with GEOS F663. (3+3)</td>
</tr>
<tr>
<td>GEOS F475 W</td>
<td>Presentation Techniques in the Geosciences</td>
<td>2</td>
<td>Instruction and practice in oral and written communication skills specifically related to the geosciences. Oral and written presentation of abstracts, resumes, proposals and reports required. Works critically analyzed by instructor(s) and peers for both geoscience content and communication effectiveness. Prerequisites: COMM F131X or COMM F141X; ENGL F111X; ENGL F211X or ENGL F213X or permission of instructor; senior standing. Stacked with GEOS F675. (1+3)</td>
</tr>
<tr>
<td>GEOS F477 O</td>
<td>Ice in the Climate System</td>
<td>3</td>
<td>Earth’s cryosphere includes seasonal snow, permafrost, sea ice, mountain glaciers, and ice sheets. This course will cover the formation of each of these forms of snow and ice and their response to changing environmental conditions. Interdisciplinary perspectives allow study of the role snow and ice plays within the Arctic system (including atmosphere, ocean, and ecosystems), with an emphasis on Alaska. The cryosphere will also be placed in context of the global climate system. Oral intensive will include instructor and peer feedback. Special fees apply. Prerequisites: PHYS F103X or PHYS F211X and MATH F200X or instructor permission. (2+3)</td>
</tr>
<tr>
<td>GEOS F482</td>
<td>Geoscience Seminar</td>
<td>1</td>
<td>A weekly seminar, given by guest speakers, on a topic in geosciences. Students are expected to complete written summaries of the seminars. Stacked with GEOS F682. (1+0)</td>
</tr>
<tr>
<td>GEOS F485</td>
<td>Mass Extinctions, Neocatastrophism and the History of Life</td>
<td>3</td>
<td>In-depth analysis of the literature regarding mass extinction, focusing on evidence for catastrophes and impact on the uniformitarian paradigm. Effects of mass extinctions on the evolutionary history of extant and fossil animals and plants will be explored through readings from classic and current literature in paleontology. The course will emphasize critical reading and application of scientific methods to reconstruction of geologically rapid events in deep time. Prerequisites: GEOS F322 and GEOS F315W, or permission of instructor. (3+0)</td>
</tr>
<tr>
<td>GEOS F486</td>
<td>Vertebrate Paleontology (n)</td>
<td>3</td>
<td>The study of vertebrate evolution through geologic time. Covers the temporal range, diversity and systematics of major vertebrate groups as documented in the fossil record, with an emphasis on current problems in vertebrate evolutionary pattern and process. Labs emphasize comparative morphology and identification of major vertebrate groups. Prerequisites: BIOL F310 or BIOL F317 or GEOS F315 or permission of instructor. Cross-listed with BIOL F486. (2+3)</td>
</tr>
<tr>
<td>GEOS F488</td>
<td>Undergraduate Research</td>
<td>1–3</td>
<td>Advanced research topics from outside the usual undergraduate requirements. Prerequisites: Permission of instructor. Recommended: A substantial level of technical/scientific background. (1-3+0)</td>
</tr>
</tbody>
</table>
**COURSES**

**GEOS F499**  
Geology and Geophysics Senior Thesis  
3 Credits  
This course is intended for talented students to explore geology or geophysics more deeply through research under the mentorship of a faculty member in the department. **Prerequisites:** Geology and Geophysics major with senior standing and a GPA of 3.2 or higher, completion of a minimum of 2 credits of GEOS F488 on a project approved by faculty mentor and department chair, and submission of a proposal approved by faculty mentor and department chair. (3+0)

**GEOS F600**  
Introduction to X-ray Spectrometry  
3 Credits  
Offered Fall  
Theory of X-ray spectrometry, qualitative and quantitative elemental analysis. Mechanics of electron, microprobe and X-ray fluorescence analysis. Applicable to geologic, materials science and biologic samples. Required for use of the microprobe at UAF. Special fees apply. **Prerequisites:** PHYS F212X; STAT F300; GEOS F417; GEOS F422; OR graduate standing. (3+0)

**GEOS F602**  
Geophysical Fields  
3 Credits  
Offered Spring Odd-numbered Years  
Introduction to the application of potential theory and its associated mathematical tools to fields of geophysical interest, namely gravity, magnetics, and heat flow. Emphasis will be placed on methods and tools for solving a variety of problems in global and regional geophysics, and the geophysical interpretation of solutions. **Prerequisites:** MATH F421 and MATH F422. (3+0)

**GEOS F604**  
Seismology  
3 Credits  
Offered Spring Odd-numbered Years  
Sources of ground motion including focal mechanisms, magnitude and propagation of waves within the earth. Measurement of seismic data by analog and digital techniques and subsequent treatment of seismic data by various techniques including inversion. (3+0)

**GEOS F605**  
Geochronology  
3 Credits  
Offered Fall Even-numbered Years  
Application of the most commonly used radiometric dating methods to geologic problems. Fundamentals of the K-Ar, Rb-Sr, fission-track, U-Th-Pb and C methods. Laboratory training in K-Ar and fission-track dating techniques. **Prerequisites:** Graduate standing or permission of instructor. (3+0)

**GEOS F606**  
Volcanology  
3 Credits  
Offered Fall Odd-numbered Years  
Physical processes of volcanism. Topics include physical properties of magmas, eruption mechanisms, deposition mechanism and volcanic hazards. Emphasis on explosive volcanism and its products, pyroclastic rocks. Geochemistry and petrology will not be emphasized in this course. Special fees apply. **Prerequisites:** Graduate standing or permission of instructor. (3+0)

**GEOS F611**  
Advanced Structural Geology and Tectonics  
3 Credits  
Offered Fall Even-numbered Years  
An advanced course providing an in-depth treatment of specific aspects of structural geology and tectonics. Topics to be considered in different semesters include tectonics and sedimentation, mountain belts of the world, structural analysis, structural geology of a specific tectonic setting (such as fold-and-thrust belts or rifts), (E) active tectonics and topography, (F) structural interpretation of seismic reflection data, and (G) other special topics in structural geology or tectonics. **Prerequisites:** GEOS F341; graduate standing; or permission of instructor. Note: Course may be repeated for different topics up to three times for credit. (3+0)

**GEOS F612**  
Geologic Evolution of Alaska  
3 Credits  
Offered Fall Even-numbered Years  
An overview of the geological provinces of Alaska and neighboring continental and oceanic regions. Emphasis will be on the geologic history and tectonic evolution of Alaska. **Prerequisites:** GEOS F314 and GEOS F322; OR graduate standing. (3+0)

**GEOS F613**  
Global Tectonics  
3 Credits  
Offered Fall Odd-numbered Years  
An advanced course dealing with tectonic theory. Emphasis on plate tectonics with discussions of the evidence supporting the plate hypothesis and the interaction of plates both past and present. **Prerequisites:** GEOS F314 and GEOS F322; OR graduate standing. (3+0)

**GEOS F614**  
Ice Physics  
3 Credits  
Offered Spring Even-numbered Years  
A survey of the physics of ice. Topics will include the crystal structure and properties of ice, high pressure phases, hydrogen bonding, mechanical, thermal, electrical and acoustic properties, nucleation and growth, and optical and surface properties (adhesion, friction). **Prerequisites:** MATH F421 and MATH F422 and permission of instructor; OR graduate standing. Cross-listed with PHYS F614. (3+0)

**GEOS F615**  
Sea Ice  
3 Credits  
Offered Fall Even-numbered Years  
A study of sea ice in the natural environment including sea ice properties and processes on the micro-scale and the macro-scale, freezing processes and sea ice growth, ice decay and ice dynamics. Special fees apply. **Prerequisites:** Graduate standing or permission of instructor. (3+0)

**GEOS F616**  
Permafrost  
3 Credits  
Offered Spring Odd-numbered Years  
Study of the occurrence, thickness, environmental problems, and mass and energy transport of permafrost, including soil and ice interaction, freezing and thawing processes, and mechanical and electrical properties and processes. **Prerequisites:** Graduate standing or permission of instructor. (3+0)

**GEOS F617**  
Glaciers  
3 Credits  
Offered Fall Odd-numbered Years  
The mechanisms responsible for the existence, motion and variations of present-day glaciers and ice sheets, the paleoclimate information they contain and their role in engineering hydrology. Special fees apply. **Prerequisites:** Graduate standing or permission of instructor. (3+0)

**GEOS F618**  
Introduction to Geochemistry  
3 Credits  
Offered Fall  
Application of chemical principles and elemental/isotopic behavior to study of the Earth. Topics include: aqueous geochemistry, high-temperature mineral-elemental chemistry, isotopic chemistry, kinetics and thermochemistry. **Prerequisites:** CHEM F106X; GEOS F322 OR CHEM F331 and CHEM F332; graduate standing. Stacked with GEOS F417. (3+0)

**GEOS F619**  
Advanced X-ray Spectroscopy  
2 Credits  
Offered As Demand Warrants  
Advanced X-ray techniques. Topics include preparation of unusual samples, quantification methods, x-ray mapping and classification, and error analysis. Each student will develop a project to explore the limits of x-ray analysis. Note: Course may be repeated three times for credit. Special fees apply. **Prerequisites:** GEOS F600 or permission of instructor. (1+3)

**GEOS F620**  
Geodynamics  
3 Credits  
Offered Fall Even-numbered Years  
Applications of continuum mechanics and heat flow theory to geophysical, geologic and glaciological problems. Topics such as postglacial rebound, non-Newtonian fluid flow, thermal convection, stress-relaxation and the rheology of earth materials will be discussed. **Prerequisites:** MATH F421 and MATH F422 and permission of instructor; OR graduate standing. (3+0)

**GEOS F621**  
Advanced Petrology  
4 Credits  
Offered As Demand Warrants  
A detailed treatment of various aspects of petrology. Specific topics to be considered in different semesters include metamorphic petrology, igneous petrology, and igneous and metamorphic petrography. Each time the course is offered, only one topic will be presented. Special fees apply. **Prerequisites:** Graduate standing; permission of instructor. (3+3)
and microbial processes, involved in the partitioning, transformation and heterogeneous interactions, including dissolution/precipitation, sorption principles involved in the description and modeling of low-temperature processes. Detailed treatment of the thermodynamic, kinetic and structural elements. Prerequisites: MATH F202X and MATH F314 and computational tools such as Matlab. Prerequisites: GEOS F431 or GEOS F631 or permission of instructor. (3+0)

GEOS F627 Inverse Problems and Parameter Estimation
3 Credits
Offered Spring Odd-numbered Years
A forward problem uses a model to make predictions; an inverse problem uses observations to infer properties of an unknown physical model. One example of an inverse problem is how to use seismometer recordings to infer the location of an earthquake. This course covers inverse theory and methods for solving inverse problems, including numerous examples arising in the natural sciences. Topics include linear regression, method of least squares, discrete ill-posed inverse problems, estimation of uncertainties, iterative optimization, and probabilistic (Bayesian) and sampling approaches. Assignments require familiarity with vector calculus, linear algebra, and computational tools such as Matlab. Prerequisites: GEOS F431 or GEOS F631 or permission of instructor. (3+0)

GEOS F628 Elementary Scanning Electron Microscopy
1 Credit
Offered Spring
Basic theory and operating procedures for scanning electron microscopy. Includes sample preparation, imaging and quantitative elemental analysis. Biological and non-biological applications are covered. Graded Pass/Fail. Special fees apply. Prerequisites: Graduate standing or permission of instructor. Stacked with GEOS F428. (0.5+1.5)

GEOS F629 Geologic Hazards and Natural Disasters
3 Credits
Offered Spring Odd-numbered Years
Examination of hazardous geologic processes which produce natural disasters, including volcanism, tectonism, flooding, etc. Includes scientific approaches to evaluating the magnitude and probability of risk from future hazardous events. Special fees apply. Prerequisites: Graduate standing or permission of instructor. (3+0)

GEOS F631 Foundations of Geophysics
4 Credits
Offered Fall
Applications of continuum mechanics, heat flow theory, and potential theory to geophysical, geologic and glaciological problems. Topics such as postglacial rebound, non-Newtonian fluid flow, thermal convection, stress-relaxation, rheology of earth materials, gravity, and magnetism will be discussed. Emphasis will be placed on methods and tools for solving a variety of problems in global and regional geophysics and the geophysical interpretation of solutions. Prerequisites: GEOS F318, MATH F302, and MATH F314 or graduate standing or permission of instructor. Stacked with GEOS F431. (3+3)

GEOS F633 Environmental Geochemistry
3 Credits
Offered Spring Odd-numbered Years
Advanced topics and methods in chemistry of aquatic and soil environments. Detailed treatment of the thermodynamic, kinetic and structural principles involved in the description and modeling of low-temperature aqueous geochemical systems. Particular emphasis will be placed on heterogeneous interactions, including dissolution/precipitation, sorption and microbial processes, involved in the partitioning, transformation and transport of chemical species in the environment. Prerequisites: ENVE F641 or GEOS F618 or permission of instructor. Cross-listed with CHEM F609. (3+0)

GEOS F635 Advanced Economic Geology
1–4 Credits
Offered As Demand Warrants
An advanced course providing an in-depth treatment of various aspects of economic geology. Specific topics will be considered in different semesters. They include ore microscopy, industrial minerals, economics of minerals, geochemistry of ore deposits, modern fossil fuel exploration and detailed study of particular ore deposit type. Each time the course is offered, only one topic will be presented. May be repeated for credit. Special fees apply. Prerequisites: Graduate standing or permission of instructor. (1-4+0-3)

GEOS F636 Beyond the Mouse: Computer Programming and Automation for Geoscientists
2 Credits
Offered Fall
Basic concepts of computer programming and effective automation of tasks using a computer, with an emphasis on tools and problems common to the geosciences and other physical sciences. Use of MATLAB, shell scripting and various command line tools for data analysis, making scientific figures, maps and visualizations. Graded Pass/Fail. Prerequisites: Graduate standing. Stacked with GEOS F436. (1+3)

GEOS F637 Rock-Forming Minerals
4 Credits
Offered Spring Odd-numbered Years
Examination of the rock-forming minerals; their structure and composition. Application of mineral data to problems in geochemistry, petrology and ore deposits. Laboratory involves analysis of minerals by various analytical techniques. Special fees apply. Prerequisites: GEOS F417 and permission of instructor; OR graduate standing. (3+3)

GEOS F638 Basin Analysis
3 Credits
Offered Spring Odd-numbered Years
Examines sedimentary basins as a record of subsidence. Review and discuss techniques used to image basin stratigraphy as well as the quantitative techniques which can be used to recover basin history. Prerequisites: Graduate standing or permission of instructor. Stacked with GEOS F438. (3+0)

GEOS F639 InSar and its Applications
3 Credits
Offered As Demand Warrants
Introduction to the concepts of repeat-pass spaceborne SAR interferometry. Practical use of the technique to derive displacements of the solid earth, glaciers and ice sheets to a precision of a few centimeters and accurate digital elevation models of the earth’s surface. Prerequisites: Basic remote sensing course or permission of instructor. Cross-listed with PHYS F639. (2+2)

GEOS F640 Petrology of Carbonate Rocks
4 Credits
Offered Spring Even-numbered Years
Origin, depositional environments, diagenesis and classification of limestones, dolostones and related rocks. Special fees apply. Prerequisites: Graduate standing or permission of instructor. (3+3)

GEOS F643 Sandstone Depositional Environments
3 Credits
Offered Fall Even-numbered Years
Sedimentary depositional environments treating the hydrodynamics, sediment dispersal patterns and preservation potential of modern terrigenous clastic depositional environments and criteria for recognizing their ancient counterparts in the geologic record. Special fees apply. Prerequisites: GEOS F322 and GEOS F421; OR graduate standing. (3+0)

GEOS F645 Petroleum Geology
3 Credits
Offered Fall Even-numbered Years
Examines the origin of petroleum, the geologic controls of its distribution and accumulation and the basic tools used in exploration and exploitation, including subsurface mapping, well logging and exploration geophysics. Prerequisites: Graduate standing or permission of instructor. Cross-listed with PETE F645. Stacked with GEOS F445. (0+0)

<th>Course Code</th>
<th>Course Name</th>
<th>Credits</th>
<th>Offered</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>GEOS F647</td>
<td>Advanced Sedimentology and Stratigraphy</td>
<td>3</td>
<td>Offered Spring Even-numbered Years</td>
<td>Various topics in sedimentology and stratigraphy. Specific offerings to be presented at various times include sequence stratigraphy and sea-level analysis, sandstone petrology, thermal maturation and geohistory analysis of sediments. <strong>Prerequisites: Graduate standing or permission of instructor.</strong> (3+0)</td>
</tr>
<tr>
<td>GEOS F651</td>
<td>Quaternary Seminar</td>
<td>3</td>
<td>Offered As Demand Warrants</td>
<td>Seminar about the Quaternary Period (relatively recent past — spanning the past two million years) in order to gain a better understanding of the landscape, biota and climate of the present day. Quaternary studies are concerned with the historical dimension of the natural sciences. This seminar will range widely over diverse interdisciplinary subjects of Quaternary interest, such as paleoclimatology, paleobiogeography, vertebrate paleontology and sedimentology. <strong>Prerequisites: Graduate standing or permission of instructor.</strong> Cross-listed with ANTH F651. (3+0)</td>
</tr>
<tr>
<td>GEOS F653</td>
<td>Palynology and Paleopalynology</td>
<td>4</td>
<td>Offered Fall Even-numbered Years</td>
<td>Survey of the evolutionary record of palynomorphs and their uses in biostratigraphy and paleoclimatology. Focus on evolution of palynomorphs from Precambrian to the present and concurrent evolutionary developments of producing plants. Use of Quaternary palynofloras in reconstructing global climates. Labs involve collection of herbarium specimens, processing of fossil palynomorphs, study of type slides and a survey of palynofloras from each geologic period. Special fees apply. <strong>Prerequisites: Graduate standing or permission of instructor.</strong> Stacked with GEOS F453. (3+3)</td>
</tr>
<tr>
<td>GEOS F654</td>
<td>Visible and Infrared Remote Sensing</td>
<td>3</td>
<td>Offered Spring Even-numbered Years</td>
<td>In-depth coverage of the principles, physics, sensor technology, processing and applications of remote sensing in the visible and infrared region, including but not limited to electromagnetic spectrum, radiation laws, spectral signatures, atmospheric interactions, temperature emissivity estimation, analysis and feature extraction from data sets. The laboratory part of the course will provide hands-on experience on special processing techniques, and the possibility of using these techniques for a student-defined term project in areas of geology, volcanology, glaciology, hydrology, environmental sciences, etc. <strong>Prerequisites: GEOS F422 or permission of instructor.</strong> (3+0)</td>
</tr>
<tr>
<td>GEOS F655</td>
<td>Tectonic Geodesy</td>
<td>3</td>
<td>Offered Spring Even-numbered Years</td>
<td>Introduction to modern space geodetic methods and details their application to the study of active earth processes such as plate tectonics, fault mechanics and volcanology. Includes space geodesy methods such as global positioning system, as standard geophysical tools for the study of earthquakes, active tectonics and volcanology. <strong>Prerequisites: MATH F314; MATH F421; MATH F422; graduate standing; or permission of instructor.</strong> (3+0)</td>
</tr>
<tr>
<td>GEOS F656</td>
<td>Paleopedology</td>
<td>3</td>
<td>Offered Fall Even-numbered Years</td>
<td>A survey course focusing on the recognition and use of paleosols (fossil fuels) as paleoenvironmental indicators, stratigraphic markers and in paleo-geographic reconstructions from Precambrian to Holocene. Examination of theories of soil formation, major soil processes and approaches to soil classification. Review of geochemical, mineralogical, morphological and micromorphological techniques. Use of paleosols for paleolandscapes evolution and basin analysis. Geological, tectonic, archaeological and environmental applications of paleosols are discussed. <strong>Prerequisites: Graduate standing or permission of instructor.</strong> Stacked with GEOS F456. (3+0)</td>
</tr>
<tr>
<td>GEOS F657</td>
<td>Microwave Remote Sensing</td>
<td>3</td>
<td>Offered Spring Even-numbered Years</td>
<td>The principles and applications of active and passive microwave remote sensing with emphasis on spaceborne remote sensing of the Earth’s atmosphere, land and oceans. The laboratory section will provide hands-on experience on special processing techniques, and the possibility of using these techniques for a student-defined term project in areas of geology, volcanology, glaciology, hydrology, environmental sciences, etc. <strong>Prerequisites: GEOS F422 or equivalent.</strong> (2+2)</td>
</tr>
<tr>
<td>GEOS F658</td>
<td>Geoscience Applications of GPS and GIS</td>
<td>3</td>
<td>Offered Spring</td>
<td>Aspects of GPS data collection, including hands-on experience with different GPS units, differential GPS methods, real-time and post processing corrections. Concepts of Geographic Information Systems (GIS). Working with real-world data and software tools such as Excel spreadsheets and ArcGIS, students will learn to organize and integrate multisource data, analyze spatial relationships and generate maps for digital and print media. Course is not available for audit. <strong>Prerequisites: GEOS/GEOG F222 or permission of instructor</strong> Stacked with GEOS F458. (2+3)</td>
</tr>
<tr>
<td>GEOS F663</td>
<td>Glacial and Periglacial Geology</td>
<td>4</td>
<td>Offered Fall Odd-numbered Years</td>
<td>Glaciers and their geological processes. Emphasizes recognition and understanding of glacial landforms, sediments and stratigraphic relations, and implications for paleoclimatology and paleogeography. Includes non-glacial techniques and methods for interpreting Quaternary sediments. Special fees apply. <strong>Prerequisites: GEOS F304 or graduate standing.</strong> Stacked with GEOS F463. (3+3)</td>
</tr>
<tr>
<td>GEOS F666</td>
<td>Scientific Teaching</td>
<td>2</td>
<td>Offered Spring Even-numbered Years</td>
<td>This course explores methods for teaching science at the university level. Emphasis is placed on methods of course design, instructional techniques, assessment and course management that have been shown by research to improve student learning. This course is intended for graduate students in the sciences who have an interest in improving their teaching skills. The course format will be a mixture of discussion, workshops and seminars. If the course is over-enrolled, priority will be given to teaching assistants who are assigned to teach large, introductory level (100 or 200 level) courses during the semester they are taking this course. <strong>Prerequisites: Graduate standing or permission of the instructor.</strong> Cross-listed with STO F666, CHEM F666, BIOL F666. (2+0)</td>
</tr>
<tr>
<td>GEOS F670</td>
<td>Selected Topics in Volcanology</td>
<td>1–3</td>
<td>Offered Fall</td>
<td>Survey course in subjects relating to volcanology. Possible subjects include, but are not limited to, eruption dynamics, geophysics of eruptions, volatiles in volcanic systems, modeling volcanic systems. May be repeated for credit. <strong>Prerequisites: GEOS F621 and GEOS F417; OR graduate standing.</strong> (1-3+0)</td>
</tr>
<tr>
<td>GEOS F671</td>
<td>Volcano Seismology</td>
<td>3</td>
<td>Offered Spring Odd-numbered Years</td>
<td>Survey of seismic behavior of volcanoes. Topics include instrumentation, terminology, swarms and their attributes, high-frequency events, volcanic explosions, volcanic tremor, attenuation and velocity structure, cycles of activity, eruption forecasting, detection of magma chambers, case studies and selected topics. Oral and written student presentations will be required. <strong>Prerequisites: Graduate standing or permission of instructor.</strong> (3+0)</td>
</tr>
<tr>
<td>GEOS F675</td>
<td>Presentation Techniques in the Geosciences</td>
<td>2</td>
<td>Offered Spring</td>
<td>Development of oral and written presentation skills in the geological sciences with emphasis on the critical analysis of both peers and the instructor(s). Oral and written presentations of abstracts, resumes, proposals and reports. <strong>Prerequisites: Graduate standing.</strong> Stacked with GEOS F475. (1+3)</td>
</tr>
<tr>
<td>GEOS F676</td>
<td>Remote Sensing of Volcanic Eruptions</td>
<td>3</td>
<td>Offered As Demand Warrants</td>
<td>Focuses on the use of satellite images to detect, monitor and mitigate volcanic hazards, and to understand eruption processes. Thermal anomalies, volcanic clouds and surface morphological features will be discussed in the lecture and test cases analyzed in the laboratory. Satellite data include GOES, AVHRR, MODIS, ASTER, Landsat and SAR. Course may be repeated twice for credit. <strong>Recommended: GEOS F422 or equivalent Remote Sensing Class or permission of instructor.</strong> (2+3)</td>
</tr>
</tbody>
</table>
GER Man  

GER F101 Elementary German I (h)  
5 Credits  
Introduction to the German language and culture: development of competence and performance in the language through understanding, recognition and use of linguistic structures; increasing emphasis on listening comprehension and speaking; basic vocabulary of approximately 1,000 words; exploration of the cultural dimension, implicitly through language, and explicitly through texts and audiovisual materials. (5+0)  

GER F102 Elementary German II (h)  
5 Credits  
Introduction to the German language and culture: development of competence and performance in the language through understanding, recognition and use of linguistic structures; increasing emphasis on listening comprehension and speaking; basic vocabulary of approximately 1,000 words; exploration of the cultural dimension, implicitly through language, and explicitly through texts and audiovisual materials. Prerequisites: GER F101 or equivalent. (5+0)  

GER F201 Intermediate German I (h)  
3 Credits  
Continuation of GER F102. Increasing emphasis on reading ability and cultural material. Conducted in German. Prerequisites: GER F102 or equivalent. (3+0)  

GER F202 Intermediate German II (h)  
3 Credits  
Continuation of GER F201. Increasing emphasis on reading ability and cultural material. Conducted in German. Prerequisites: GER F201 or equivalent. (3+0)  

GER F301 W,O Advanced German (h)  
3 Credits  
Discussions and essays on more difficult subjects or texts. Translations, stylistic exercises and special grammatical problems. Conducted in German. Prerequisites: COMM F131X or COMM F141X; ENGL F111X; ENGL F211X or ENGL F213X or permission of instructor; GER F202 or equivalent. (3+0)  

GER F302 W,O Advanced German (h)  
3 Credits  
Discussions and essays on more difficult subjects or texts. Translations, stylistic exercises and special grammatical problems. Conducted in German. Prerequisites: COMM F131X or COMM F141X; ENGL F111X; ENGL F211X or ENGL F213X or permission of instructor; GER F301 or equivalent. (3+0)  

HLTH F100 Medical Terminology  
3 Credits  
Study of medical terminology including analysis and origin of word roots, prefixes and suffixes. Understanding the word components, students will be able to build, spell and define medical words. Content will be presented by body systems focusing on terms for anatomy, diagnostic, laboratory and medical specialties. Includes use of medical dictionary, word pronunciation and abbreviations. Designed for health care professionals. (3+0)  

HLTH F105 Introduction to Health Careers  
2 Credits  
Introduction to health careers and the psychology of patient care. Roles and responsibilities of different members/functional units of the health care team; information on related job and educational opportunities; needs and roles of health providers in rural and urban Alaska settings. Prerequisites: High school graduation or GED or permission of program coordinator. (2+0)  

HLTH F106 Human Behavior in Health Care (s)  
3 Credits  
Discussion of general concepts in human behavior and the specialized psychological issues when dealing with patients and loved ones in health care settings. Students perform self-evaluation and survey other cultures to allow examination of perceptions, individual biases, beliefs and their impacts on behavior. (3+0)  

HLTH F107 Nurse Aide Training  
9 Credits  
Teaches basic nursing skills necessary to assist the nurse and be an efficient health care team member. Presents positive communication skills while providing care of residents’ physical and emotional needs in a variety of health care settings. Content satisfies the theory and clinical skills needed to take the State of Alaska exam to become a Certified Nurse Aide. Prerequisites: High school graduation or GED; Accuplacer reading score of 65 or permission of instructor. Student must be in good physical condition and have the following immunizations: Chickenpox, Hepatitis B series, two MMRs, a PPD two-step testing process within previous 12 months of the clinical component of class. (5+8)  

HLTH F110 Professional Skills for the Workplace  
2 Credits  
Presents skills to ensure success for the professional secretary, receptionist, medical worker and others. Includes interview skills, business manners, customer service and dressing for success. (2+0)  

HLTH F111 Personal Care Attendant Training  
4 Credits  
Designed to train personal care attendants in basic care necessary to assist nurses and to be efficient health care team members. Course qualifies students for state certificate of completion as personal care attendants.
Eighty-eight (88) hours of class, lab and clinical practice is included. Requires criminal background check. Prerequisites: Documentation of the following vaccines: Hepatitis B series, two MMRs, two chickenpox and a two-step PPD, or proof of immunity to MMR, Chickenpox, Hepatitis A and a two-step PPD, high school graduation or GED or Accuplacer reading comprehension score of 65 or above, or permission of instructor. Students must be in good physical condition. Co-requisites: Health care provider CPR and First Aid card. (2.5+3)

**HLTH F113**  
**Personal Care Attendant to Nursing Assistant Bridge**  
5 Credits  
Offered as Demand Warrants  
Trains personal care attendants to become Certified Nurse Assistants. Students build upon basic PCP skills and experience. Provides the additional classroom, laboratory and clinical hours necessary to sit for the state Certified Nurse Assistant exam. Prerequisites: High school graduation or GED; a 10th grade reading level by exam; HLTH F111 or on the job agency training plus two years experience and instructor approval. Students must be in good physical condition, have current immunizations, and health care provider CPR card. (3+4)

**HLTH F114**  
**Fundamentals of Anatomy and Physiology**  
4 Credits  
Provides a basic understanding of human anatomy and physiology. Recommended for individuals interested in health careers or students desiring an introduction to anatomy and physiology prior to taking in-depth course work in this field. Recommended: HLTH F100; high school biology and chemistry. (4+0)

**HLTH F116**  
**Mathematics in Health Care**  
3 Credits  
Practical application of mathematics in health care, including arithmetic review, percentages, interest, ratio, proportion, dimensional analysis, metric system, medication calculation, graphs, charts and measurement instruments. Prerequisites: DEVM F050 or placement in DEVM F060 or higher. (3+0)

**HLTH F118**  
**Medical Law and Ethics**  
2 Credits  
In-depth coverage of legal and ethical issues encountered in health care settings. Students will gain a practical knowledge of legal and ethical principles and application of these principles in health care settings. (2+0)

**HLTH F122**  
**First Aid and CPR**  
1 Credit  
Provides instruction on emergency first aid theory and techniques. Students acquire knowledge and skills necessary for dealing with emergencies in a medical/dental office and other clinical settings. Includes First Aid Certification and health care provider (adult, child and infant) CPR Certification. Graded Pass/Fail. (0.5+1)

**HLTH F130**  
**Medical Office Technology**  
3 Credits  
Offered Spring  
Introduces current and potential health care workers to computers in the medical office. Will study medical office management software and electronic health record systems. Includes discussion of computer hardware and software, working with operating systems, keyboarding, word processing, spreadsheets, presentation creation and formatting, and database concepts. (3+0)

**HLTH F132**  
**Administrative Procedures I**  
2 Credits  
Administrative responsibilities performed by medical/dental assistants and other health care providers in outpatient facilities. Includes duties of the office assistant, receptionist or secretary. Focus on reception, telephone procedures, public relations and professionalism. Prerequisites: High school graduation or GED or permission of instructor. (2+0)

**HLTH F135**  
**ICD-9 Coding**  
3 Credits  
In-depth study of the International Classification of Diseases (ICD), designed for classification of patient morbidity and mortality information for statistical purposes and for the indexing of health records for the health care profession. Prerequisites: HLTH F112 OR both HLTH F100 and HLTH F114. (3+0)

**HLTH F142**  
**Clinical Procedures I**  
4 Credits  
Introduction to the theoretical basis and performance competencies for the clinical duties performed by medical assistants in outpatient facilities. Includes care of patients in the examining room, use and care of medical instruments and supplies, assisting physicians with clinical procedures, administering medications and introduction to clinical laboratory procedures. Special fees apply. Prerequisites: HLTH F100; HLTH F116; HLTH F122 or current First Aid and CPR. Documentation of positive antibody titer for hepatitis B; current immunizations for measles, mumps, rubella, hepatitis A, varicella and tetanus; negative TB test within the past year and departmental approval. (3+2)

**HLTH F203**  
**Science of Nutrition**  
3 Credits  
Introduction to the principles of nutrition and its relationship to the life cycle. Focus on the importance nutrition plays in personal health and how to objectively evaluate nutritional intake using scientifically sound resources. (3+0)

**HLTH F207**  
**Medication Aide Course**  
6 Credits  
Basic pharmacology and medication administration for certified nurse aides and personal care attendants. Includes drug delivery routes, classifications, effects and side effects. Communication principles, ethics, nursing process, and body structure and function will be reviewed. This course prepares the CNA to assist the RN or LPN to pass medications in health care settings as approved by the Alaska Board of Nursing and to sit for the National Council State Board of Nursing Medication Aide Certification Exam. The CNA student is not required to sit for the NCSBN MA Examination to pass the course. It will prepare the PCA to assist in the delivery of medications in all private homes. Prerequisites: Current license as a CNA or PCA by the State of Alaska, have at least one full year of experience as a CNA/PCA, supply three letters of reference from healthcare professionals, Accuplacer math score of 48 or higher, be 18 years of age or older, be immunized as required by the training site/facility. (4+4)

**HLTH F208**  
**Human Diseases**  
3 Credits  
Offered Fall and Spring  
Introduction to the study of human diseases. Pathogenesis, etiology and predisposing factors will be examined. The most common diseases and disorders of each body system are presented along with a review of the pertinent anatomy and physiology. Includes the effects of aging on the system and the relationship of aging to disease. Prerequisites: HLTH F100 with a C- or higher or permission of instructor. (3+0)

**HLTH F234**  
**Administrative Procedures II**  
4 Credits  
Office management and financial procedures used in medical offices. Includes medical financial recordkeeping systems and computerized office management systems. Includes ICD-9, CPT coding system, patient insurance billing/reimbursement procedures, the demonstration of computational skills in accounts payable/accounts receivable, and office management in the health care setting. Prerequisites: CIOS F150; HLTH F100; HLTH F132; test scores sufficient for placement in ENGL F111X; or permission of instructor. (3+2)

**HLTH F235**  
**Medical Coding**  
4 Credits  
The current procedural terminology (CPT) and the international classification of diseases (ICD) systems used in the medical setting. Examines the medical and legal uses of the CPT and ICD code systems in inpatient and outpatient medical settings, urgent care settings, billing departments and ancillary medical professions. Prepares students to take national certification exams. Recommended: HLTH F100; HLTH F132; HLTH F208; HLTH F234. (4+0)
HLTH F236 Outpatient Health Care Reimbursement
3 Credits
Outpatient reimbursement issues including documentation, insurance carriers, schedules and payment profiles. Collection strategies and legal issues, and the importance of educating the patient to the financial policies of the practice. Prerequisites: HLTH F132; concurrent HLTH F234; or permission of instructor. (3+0)

HLTH F237 Inpatient Health Care Reimbursement
3 Credits
Rules and regulations governing the reimbursement of inpatient and hospital coding. Includes HIPAA regulations, Medicare, Medicaid, third party billing, and the legal and ethical guidelines of inpatient billing. Prerequisites: HLTH F132; HLTH F135; HLTH F234; or permission of instructor. (3+0)

HLTH F244 Clinical Procedures II
4 Credits
Clinical Procedures II
Offered As Demand Warrants
Theoretical basis and practical competencies for the clinical duties performed by medical assistants in outpatient facilities. Includes urinalysis, electrocardiograph, subcutaneous and intramuscular injections, routine laboratory procedures, venipuncture, emergencies and assisting with specialty examinations. Special fees apply. Prerequisites: HLTH F100; HLTH F114 or BIOL F100X; HLTH F116; HLTH F142; HLTH F122 or current First Aid and CPR. Documentation of positive antibody titer for hepatitis B, current immunizations for measles, mumps, rubella, hepatitis A, varicella and tetanus; negative TB test within the past year and departmental approval. (3+2)

HLTH F247 Introduction to Pharmacology
2 Credits
Introduction to the use of therapeutic medications in medical settings. Includes classifications of drugs, clinical use and adverse effects of the 50 most commonly prescribed medications. Prerequisites: HLTH F100; HLTH F114 or BIOL F100X. (2+0)

HLTH F255 Phlebotomy Principles, Methods and Externship
5 Credits
This comprehensive lecture, lab, and externship course is designed to provide information covering phlebotomy technique, anatomy and physiology as it pertains to venipuncture, and lab testing. Quality control, quality assurance, universal precautions, and OSHA regulations will be reviewed. Specimen collection and proper specimen handling is an essential segment of successfully completing this course. This course includes 100 hours of practical experience. Upon completion, the student will have satisfied the educational requirements for national phlebotomy certification by the American Society of Clinical Pathologists. Special fees apply. Prerequisites: HLTH F122 or current First Aid and CPR cards; Accuplacer reading comprehension score of 65 or above; and DEVM F060. Documentation of positive antibody titer for hepatitis B, current immunizations or titers of measles, mumps, rubella, hepatitis A, varicella and tetanus; negative TB test within the past year and departmental approval. (2+1+7)

HLTH F261 Medical/Dental Office Reception Practicum
2 Credits
Offered As Demand Warrants
Provides the student with 80 hours of practicum work in a medical or dental office, with additional time required for meeting with the campus practicum coordinator. Students will be expected to perform any and all duties of a receptionist in a medical/dental care setting. Satisfies practicum experience requirement for Medical/Dental Reception certificate. May be used to partially satisfy practicum experience requirement of Medical Assistant AAS degree certificate. Graded Pass/Fail. Prerequisites: HLTH F122; HLTH F132; HLTH F234; enrollment by special permission only. (0+0+6)

HLTH F267 MedicalAssisting Practicum Completion
2–4 Credits
Provides 100 hours of practicum work in the back office of a medical clinic for medical assisting students. Additional contact time required for meeting with the campus practicum coordinator. HLTH F267 combined with HLTH F261 provides experience equivalent to that in HLTH F268, and satisfies the practicum requirement for the medical assistant certificate and AAS. Graded Pass/Fail. Prerequisites: HLTH F122; HLTH F132; HLTH F234; HLTH F142; HLTH F144; enrollment by special permission only. (0+0+8)

HLTH F268 Medical Assisting Practicum
4 Credits
Provides the student with 180 hours of hands-on practicum work in a medical office, with additional time required for meeting with the campus practicum, coordinator. This is the last course in the Medical Assistant AAS degree and certificate program for students who have not taken any specialized certificates during their course of study. Students will be expected to perform any and all duties of a medical assistant in health care settings. The combination of HLTH F261 and HLTH F267 may be substituted for HLTH F268 to satisfy the degree requirements. Graded Pass/Fail. Prerequisites: HLTH F122, HLTH F132, HLTH F142, HLTH F144; HLTH F234; enrollment by special permission only. (0+0+12)

HIGH LATITUDE RANGE MANAGEMENT

HLRM F120 History of Domesticated Alaskan Ungulates ★
1 Credit
Offered Spring
Review the history of domesticated ungulate populations, free-ranging and fenced systems, in Alaska beginning from the 1890s to present. Emphasis will be placed on traditional activities on the Seward Peninsula. Prerequisites: ENGL F111X or permission of instructor. (1+0)

HLRM F130 Research Field Logistics
2 Credits
Offered Summer
Learn the skills, techniques, and equipment used in remote scientific fieldwork in Alaska. Course includes medical methods for processing and storing animal/plant tissue samples, orienteering, navigation, GPS, wilderness first aid, arctic survival, boat safety, as well as ATV, boat, and snowmachine operation, maintenance and repair. (1+3)

HLRM F140 High Latitude Range Management ★
2 Credits
Offered Fall
Policies and terminology of range and range management specific to Alaska and the Arctic. Review current vegetation inventory techniques used by federal and state agencies. Identify and sample Alaska forage plants. Examine range production systems in Alaska for a variety of species; domesticated and wild. Development of a high latitude range management plan. Prerequisites: BIOL F104X OR (BIOL F104 and BIOL F104L); NRM F101; or permission of instructor. (1.5+0+1.5)

HLRM F150 Alaskan Ungulate Husbandry ★
2 Credits
Offered Summer
Students will be introduced to management skills, facilities design and nutritional needs for domesticated ungulates in Alaska. Provides exposure and examines traditional knowledge combined with contemporary research in herding and husbandry for open range and fenced systems. Field trips to reindeer, elk, bison, and/or cattle operations will demonstrate husbandry techniques and data collection procedures. Prerequisites: HLRM F140 or permission of instructor. (1.5+0+1.5)

HLRM F160 Meat Production
2 Credits
Offered Spring
A study of the meat animal processing sequence. The production of meat-type domesticated ungulates in Alaska and the science and technology of their conversion to food, value-added products and by-products. A review of the current state regulations and methods on proper field slaughtering, and the preparation, handling and storage of meat will be introduced. Prerequisites: HLRM F140 or permission of instructor. (1.5+0+1.5)

HLRM F170 Health Issues in Domesticated Ungulates
2 Credits
Offered Fall
Ruminant anatomy and physiology specific to high latitude ungulates. Overall health issues and problem solving techniques for domesticated...
HISTORY

HIST F100X  Modern World History  (s)
3 Credits
Significant aspects of modern world history, using either a chronological or an issues approach to be announced when offered. The chronological approach will examine major global developments in the twentieth century, while the issues approach will deal with such aspects of the modern world as revolutionary change, the interaction of peoples, ideology and the historical background of significant contemporary events. Prerequisites: Placement in ENGL F111X or higher; or permission of instructor. (3+0)

HIST F101  Western Civilization  (s)
3 Credits
Offered Fall
Origins and major political, economic, social and intellectual developments of western civilization to 1500. (3+0)

HIST F102  Western Civilization  (s)
3 Credits
Offered Spring
Major political, economic, social and intellectual developments of western civilization since 1500. (3+0)

HIST F105  Introduction to the History and Culture of the Seward Peninsula  (s)
1 Credit
Offered As Demand Warrants
Cultural history of the Seward Peninsula peoples for the last 10,000 years using physical anthropology, ethnography, ethnohistory, linguistics, archaeology, social anthropology, ecology and climatology. Eskimo and Euro-American cultures which have existed in western Alaska. Cross-listed with ANTH F105. (1+0)

HIST F110  History of Alaska Natives  (s)
3 Credits
Offered Fall
The history of Alaska Natives from contact to the signing of the Land Claims Settlement Act. Cross-listed with ANS F111. (3+0)

HIST F115  Alaska, Land and Its People  (s)
3 Credits
Offered Spring Even-numbered Years
A survey of Alaska from earliest days to present, its peoples, problems and prospects. (3+0)

HIST F121  East Asian Civilization  (s)
3 Credits
Offered Fall Even-numbered Years
Origin and development of the civilizations of China, Japan and Korea from the beginning to 1800, with emphasis on traditional social, political and cultural institutions. (3+0)

HIST F122  East Asian Civilization  (s)
3 Credits
Offered Spring Odd-numbered Years
East Asia from 1800 to the present with emphasis on patterns of social cohesion, transition and revolutionary change. (3+0)

HIST F124  African Studies: Introduction to Contemporary Sub-Saharan Africa  (s)
3 Credits
Offered As Demand Warrants

HIST F131  History of the U.S.  (s)
3 Credits
Offered Fall
The discovery of America to 1865. Colonial period, revolution, formation of the constitution, western expansion, Civil War. (3+0)

HIST F132  History of the U.S.  (s)
3 Credits
Offered Spring
From the reconstruction to the present. (3+0)

HIST F202  History of Women in America  (s)
3 Credits
Offered Fall Odd-numbered Years
A chronological approach to the history of women in America. Introduction to major issues of concern to historians of women, as well as different approaches utilized in analysis of women’s past; consideration of multiracial backgrounds of American women. Cross-listed with WGS F202. (3+0)

HIST F244  Movies: Mirror of the World  (s)
3 Credits
Offered As Demand Warrants
World history using the medium of film to highlight cultural, economic and political conditions of each country. Films will be from the USA, Mexico, Central America, South America, England, France, Russia, Turkey, India, China, Japan, Australia, Africa and the Arctic. (3+0)

HIST F275  Perspectives on History  (s)
3 Credits
Offered Fall
An introduction to the variety of historical approaches and to the “uses” of history. (Course is required for history majors and should be taken soon after declaring a History major as possible; non-majors are strongly discouraged from taking this course.) (3+0)

HIST F305  Europe: 1789–1850  (s)
3 Credits
Offered Fall Even-numbered Years
The French Revolution, Napoleon, the Industrial Revolution, the Revolutions of 1848, their impact on political, economic, social and intellectual history. Prerequisites: Junior standing or permission of instructor. (3+0)

HIST F445 History of the American West (s) 3 Credits Offered Fall Even-numbered Years
Seminar with emphasis on readings and analysis of primary and secondary sources dealing with the American West to present. Major themes include historiography, expansion, the Federal government, environment, ethnicity and economic development. (3+0)

HIST F446 American Indian History (s) 3 Credits Offered as Demand Warrants
Seminar with emphasis on readings and analysis of primary and secondary sources related to American Indians from the pre-contact era to present. Major themes include historiography, inter-cultural relations, subsistence and environment, federal policy and contemporary issues. (3+0)

HIST F455 Military History (s) 3 Credits Offered Fall Even-numbered Years
Warfare from classical times to the present: the interrelationships of warfare and society, the role of technology and the development of tactics and strategy. Prerequisites: Junior standing or permission of instructor. (3+0)

HIST F461 W History of Alaska (s) 3 Credits Offered Fall
Alaska from prehistoric times to the present, including major themes such as Native Alaska, colonial and military Alaska, statehood, Alaska Native Claims Settlement Act of 1971 and the Alaska National Interest Lands Act of 1980. Prerequisites: ENGL F111X; ENGL F211X or ENGL F213X; HIST F275; or permission of instructor. Stacked with HIST F662; NORS F661. (3+0)

HIST F463 Imperial Russia, 1700–1917 (s) 3 Credits Offered Fall Odd-numbered Years
This course covers Russian history from the reign of Peter the Great (1682-1725) until the collapse of the Tsarist regime in February 1917. Topics will include Russia’s complex relationship with Western Europe, the challenges posed by modernization, and the emergence of the revolutionary movement. Prerequisites: HIST F275 or permission of instructor. Stacked with HIST F663; NORS F663. (3+0)

HIST F464 Soviet and Post-Soviet Russia (s) 3 Credits Offered Fall Even-numbered Years
Russia from the 1917 Revolution to the present. This course examines the attempts to build a socialist utopia in the former Russian empire and its impact on the peoples of that region and the modern world. We will consider the political, economic, social, and cultural nature of the Soviet state. Major themes include cultural transformation, industrialization, Stalinism, the Soviet Union as a multi-national empire, the Cold War, the collapse of the Soviet state, and the new Russia of Yeltsin and Putin. Prerequisites: HIST F275 or permission of instructor. Stacked with HIST F664; NORS F664. (3+0)

HIST F467 W Political Development in Latin America and the Caribbean (s) 3 Credits Offered Fall Odd-numbered Years
Exploration of major issues and concepts in the development and governances of modern Latin America and the Caribbean region, including the legacies of colonialism, revolution, military rule, economic challenges and the quest for democratic stability. Includes a historical overview of the region and cases drawn from the Caribbean, Mexico, Central and South America. Prerequisites: ENGL F111X; ENGL F211X or ENGL F213X; HIST F275; or permission of instructor. Recommended: SPAN F221. Cross-listed with PS F467. (3+0)

HIST F475 W Historiography (s) 3 Credits Offered Fall
Seminar discussions and lectures introduce philosophical approaches to history. Examines various methodological approaches to historical inquiry. Includes the nature of historical evidence, questioning of the role of truth and objectivity in history, an examination of the role of the historian in interpreting historical evidence, and different interpretations of historical events and actions. Designed for history majors and minors, and graduate students seeking to conduct historical research. Prerequisites: ENGL F111X; ENGL F211X or ENGL F213X; HIST F275; history major with senior standing; or permission of instructor. (3+0)

HIST F476 W,O Senior Thesis (s) 3 Credits Offered Spring
Preparation and writing of a senior thesis using primary research materials on a topic of the student’s choosing. Prerequisites: COMM F313X or COMM F414X; ENGL F111X; ENGL F211X or ENGL F213X; HIST F475; permission of instructor. (3+0)

HIST F481 Polar Exploration and its Literature (s) 3 Credits Offered Spring Even-numbered Years
A survey of polar exploration efforts of all Western nations from A.D. 870 to the present and a consideration of the historical sources of this effort. Stacked with HIST F681; NORS F681. (3+0)

HIST F483 W 20th Century Circumpolar History (s) 3 Credits Offered Spring Even-numbered Years
A comparative history of the circumpolar North, including Alaska, Siberia, Scandinavia, Greenland and Canada. Focus on social, economic, political and environmental issues of the 20th century, such as exploration, aboriginal land claims, subsistence, military strategy, transportation, oil development, Arctic haze and scientific research in the Arctic. Prerequisites: ENGL F111X; ENGL F211X or ENGL F213X; HIST F275; or permission of instructor. Stacked with NORS F690. (1+3)

HIST F600 Perspectives on the North 3 Credits Offered Fall
Basic knowledge of the circumpolar North — the social, economic, political and scientific facets of northern life. Consideration of major cultural groups of the north and their histories, the environmental settings and patterns of settlement and development in northern regions and systems of governance in different northern countries. Broad overview of the major policy issues of the North in education, justice, health care, and environmental and wildlife protection. Course is also available online. Cross-listed with NORS F600. (3+0)

HIST F662 History of Alaska 3 Credits Offered Fall
Alaska from prehistoric times to the present, including major themes such as Native Alaska, colonial and military Alaska, statehood, Alaska Native Claims Settlement Act of 1971 and the Alaska National Interest Lands Act of 1980. Cross-listed with NORS F662. (3+0)

HIST F663 Imperial Russia, 1700–1917 (s) 3 Credits Offered Fall Odd-numbered Years
This course covers Russian history from the reign of Peter the Great (1682-1725) until the collapse of the Tsarist regime in February 1917. Topics will include Russia’s complex relationship with Western Europe, the challenges posed by modernization, and the emergence of the revolutionary movement. Prerequisites: HIST F275 or permission of instructor. Stacked with HIST F663; NORS F663. (3+0)

HIST F664 Soviet and Post-Soviet Russia 3 Credits Offered Fall Even-numbered Years
Russia from the 1917 Revolution to the present. This course examines the attempts to build a socialist utopia in the former Russian empire and its impact on the peoples of that region and the modern world. We will consider the political, economic, social, and cultural nature of the Soviet state. Major themes include cultural transformation, industrialization, Stalinism, the Soviet Union as a multi-national empire, the Cold War, the collapse of
HIST F681  Polar Exploration and its Literature 3 Credits
Offered Spring Even-numbered Years
A survey of polar exploration efforts of all Western nations from A.D. 870 to the present and a consideration of historical sources of this effort. Prerequisites: Graduate standing or permission of instructor. Cross-listed with NORS F681. Stacked with HIST F481. (3+0)

HIST F683  20th Century Circumpolar History 3 Credits
A comparative history of the circumpolar north, including Alaska, Siberia, Scandinavia, Greenland and Canada. Focus on social, economic, political and environmental issues of the 20th century, such as exploration, aboriginal land claims, subsistence, military strategy, transportation, oil development, arctic haze, and scientific research in the Arctic. Prerequisites: Graduate standing or permission of instructor. Cross-listed with NORS F683. (3+0)

HOMELAND SECURITY AND EMERGENCY MANAGEMENT

Students enrolling in School of Management courses are expected to have completed the necessary prerequisites for each course.

A per-semester student computing facility user fee will be assessed for students enrolling in one or more School of Management courses (ACCT, AIS, BA, ECON, HSEM, LEAD, or MBA) excluding ECON F100X. This fee is in addition to any material fees.

HSEM F221  Introduction to Homeland Security 3 Credits
Offered As Demand Warrants
This course will introduce students to the vocabulary and important components of Homeland Security. We will discuss the importance of the agencies associated with Homeland Security and their interrelated duties and relationships. Historical events that effect Homeland Security will be examined. State, national and international laws affecting Homeland Security will be explored. The most critical threats confronting Homeland Security will be examined. Prerequisites: ENGL F111X or instructor permission. (3+0)

HSEM F223  Terrorism: A Global Threat 3 Credits
Offered As Demand Warrants
This course will investigate the historical origins of global terrorism, the major contemporary terrorist organizations (foreign and domestic), their ideological motivations and their methodologies for employing terror. It will also explore the threats posed to the United States and the West in terms of national security and the economy. An in-depth examination and evaluation of several case studies of terrorist acts will be made. The primary focus of this course will be on terrorist organizations and their acts of terror. Prerequisites: ENGL F111X or instructor permission. (3+0)

HSEM F225  Intelligence Analysis and Security Management 3 Credits
Offered As Demand Warrants
This course will examine the history of intelligence gathering and espionage in the United States. A succinct study and comparative analysis of intelligence collection methods of other nations will also be made. An in-depth study of key U.S. intelligence agencies, their collection methodologies, and their effect upon national security will be examined. Prerequisites: ENGL F111X or instructor permission. (3+0)

HSEM F227  Transportation and Border Security 3 Credits
Offered As Demand Warrants
This course provides an overview of modern border and transportation security challenges, as well as different methods employed to address these challenges. The time period from post 9-11 to the present is covered. Topics explored include those associated with border and transportation infrastructure security; seaports, ships, aircraft, airports, trains, train stations, trucks, highways, bridges, rail lines, pipelines and buses. The course will include an exploration of technological solutions employed to enhance security of borders and transportation systems. Discussions will include such topics as the legal, economic, political and cultural concerns and impacts associated with transportation and border security. Prerequisites: ENGL F111X or instructor permission. (3+0)

HSEM F301  Principles of Emergency Management and Homeland Security 3 Credits
Offered Spring
The course provides a foundational perspective as to how our present federal emergency management and homeland security structure emerged with emphasis placed on the characteristics, functions, and resources of its integrated systems. This course additionally focuses on the principles and practices of homeland security and emergency management at the local, state and federal levels. Prerequisites: ENGL F103X or MATH F107X or MATH F161X. (3+0)

HSEM F405  Introduction to Emergency Management Exercise Design 3 Credits
Offered As Demand Warrants
This course examines exercise design, evaluation, and development. The course will focus on developing the knowledge and skills that are imperative to implementing a Homeland Security Exercise Evaluation Program (HSEEP) compliant exercise. The class will also design and develop a table top exercise to be executed as a class project at the end of the semester. Lastly, the course will emphasize the importance of incorporating emergency exercise planning to effectively prepare and respond to disasters of all types and magnitudes. Prerequisites: ENGL F211X or F213X; HSEM F301; or permission of instructor. (3+0)

HSEM F406  Comparative Homeland Security 3 credits
Offered As Demand Warrants
This course helps students develop an understanding of the homeland security and counterterrorism methods of other countries. Students will examine several countries and compare the policies and strategies they have developed to protect their citizens from unique global threats. This course will help broaden student understanding of homeland security in today’s global environment. Prerequisites: ENGL F211X or F213X; HSEM F301; or permission of instructor. (3+0)

HSEM F407  Comparative Emergency Management 3 Credits
Offered As Demand Warrants
This course will focus on examining regional and global responses to various types of disasters. Topics covered will include the importance of regional collaboration between nations in disaster preparedness, mitigation, response, and recovery. Additionally, the roles that regional partnerships play in disaster mitigation will be examined, as well as issues concerning the requirements to sustain collaborative efforts between nations in the 21st century. Prerequisites: ENGL F211X or F213X; HSEM F301; or permission of instructor. (3+0)

HSEM F408  Homeland Defense and Security 3 credits
Offered As Demand Warrants
This course gives students an overview of the categories of military operations other than war that require homeland defense and security. The U.S. will be compared with other countries that use their respective militaries for smaller-scale contingencies both internal and external to their borders. Prerequisites: ENGL F211X or F213X; HSEM F301; or permission of instructor. (3+0)

HSEM F412  Emergency Planning and Preparedness 3 Credits
Offered Fall or Spring
This course will examine the concepts of developing and writing an emergency operations plan and the elements necessary for inclusion in the plan (all-hazards risk analysis). Students will transition through the process of identifying hazards, creating plans and developing a program which specifically addresses planning and preparedness objectives. Prerequisites: HSEM F301; or permission of instructor. (3+0)
HSEMS F423  Disaster Response Operations and Management
3 Credits  Offered As Demand Warrants
The purpose of this course is to develop an understanding of the principles that promote effective disaster response and recovery operations after disasters. To achieve this goal, the course will examine the nature of disasters as well as the roles and responsibilities of various actors involved in emergency management and homeland security. Various problems associated with response and recovery operations will be identified and discussed with special emphasis on the role of technology and communications coordination. Prerequisites: HSEM F301 or permission of instructor. (3+0)

HSEMS F434  All Hazards Risk Analysis
3 Credits  Offered Fall
This course covers risk analysis and assessment from an All-Hazards emergency management and homeland security perspective. Students will explore vulnerability and risk assessment methodologies for natural, man-made as well as technological disasters/events and develop an understanding of the processes used in identifying and quantifying vulnerabilities in a system (e.g., a physical facility such as a chemical plant, or an infrastructure component such as a power plant). Prerequisites: HSEM F301 or permission of instructor. (3+0)

HSEMS F445 W/O/2  Business Continuity and Crisis Management
3 Credits  Offered As Demand Warrants
The course serves as introduction to crisis management and organizational continuity from a private sector business crisis and continuity management partnership perspective. The topics include comprehensive emergency management, public and private roles and partnerships for emergency and crisis management, the risk management process, strategic crisis management, contingency planning, training and exercises, emergency response, business continuity and recovery, the role of the crisis management team, and crisis communication. Prerequisites: ENGL F111X or ENGL F211X or F213X; COMM F131X or F141X; HSEM F301 or AIS F310 or F316 or BA F360 or permission of instructor. (3+0)

HSEMS F456 W  Leadership in Dangerous Contexts
3 Credits  Offered As Demand Warrants
This course focuses on the challenges faced by those who serve as leaders during crisis and emergency circumstances. During emergency circumstances, leadership, ability to influence and motivate them during crisis is critical. Topics include leadership and followership, crisis decision making, fear and emotion and the unique circumstances of an emergency manager/homeless security professional are examined. Prerequisites: HSEM F301; ENGL F111X or ENGL F211X or ENGL F213X; or permission of instructor. Cross-listed with LEAD F456. (3+0)

HUMAN SERVICES

HUMS F101  Introduction to Human Services
3 Credits  Offered As Demand Warrants
Provides an overview and orientation for individuals who have either started or are exploring human service careers. Designed for entry level behavioral health providers with an emphasis in understanding social service systems in rural and frontier Alaska. Learners will consider the theoretical foundations of the helping process both personal and external-driven while setting a career path that builds on individual strengths. Students should come away knowing their current worker competencies and those yet to be developed. Recommended: Should be taken within the first academic year when possible. Strongly encourage students to be accepted into the Human Services Degree Program. (3+0)

HUMS F102  Standards of Practice
2 Credits  Offered As Demand Warrants
Designed to provide an integrative approach for ongoing development of critical thinking skills, best practices evaluation, and application of skills based competencies. Students will be challenged to integrate their learning from any previous human service or related training and education, past and present work settings as well as life experiences. This process will be facilitated through the development of a professional portfolio, collaborative group learning, class discussions and the use of blended learning approaches. Recommended: This course should be taken as soon as possible upon acceptance into the Human Services Program. (2+0)

COURSES

HUMAN SERVICES (HUMS) — HUMANITIES (HUM)

HUMS F265 Substance Abuse and the Family
1–2 Credits Offered As Demand Warrants
Basic understanding of family dynamics and roles related to addictions. 
Prerequisites: HUMS F125 or permission of instructor. (1-2+0)

HUMS F266 Co-occurring Disorders
1–2 Credits Offered As Demand Warrants
Theories and skills related to counseling the mentally ill substance abuser.
Includes diagnosis, treatment planning and approaches, and special considerations.
Prerequisites: HUMS F125. (1-2+0)

HUMS F270 Adolescent Issues and Therapeutic Interventions
3 Credits Offered As Demand Warrants
Basic knowledge of adolescent development and culture for the human services residential care worker. Includes communication and intervention strategies, and life skills assessment with case planning. Prerequisites: HUMS F170 or permission of instructor. (3+0)

HUMS F272 Attachment, Separation, and Loss
1 Credit Offered As Demand Warrants
Understanding of the components of the attachment cycle and effects on children when the cycle is disrupted by abuse, neglect, separation and placement. Includes strategies to deal with the losses. Prerequisites: HUMS F170. (1+0)

HUMS F280 Prevention and Community Development
3 Credits Offered Fall
Examine the historical evaluation, conceptual framework, practical realities of community development and prevention in rural Alaska. Surveys various approaches to addressing community needs, with examples from developing countries and the lower-48 as well as offers a multiplicity of approaches which can be considered in designing and implementing effective and culturally sound community projects. Collecting data to ascertain which needs exist, skills on how to build community consensus as well as exposure to the community readiness model are also covered in this course. Evaluation of efforts in terms of their success and effectiveness will also be introduced. Prerequisite: HUMS F101; HUMS F102; or departmental approval. (3+0)

HUMS F290 Case Management
3 Credits Offered Fall
Challenge and broaden students' understanding, thinking and conceptualizing of case management. Investigate the case management model emphasizing its useful application to various client groups with an emphasis on Alaska and rural communities. The different roles and aspects of effective case management will be explored and students will practice case management skills both at the individual level and as part of an interdisciplinary team. The role of the community in supporting such efforts as well in providing resources such as natural supports will be emphasized. Use of and knowledge of local, regional and statewide and national resources will be highlighted. Several specific functions of case management will be specifically emphasized, including that of advocate and broker. Prerequisite: HUMS F101; HUMS F102; or departmental approval. (3+0)

HUMS F301 Ethics in Human Service
3 Credits Offered Spring
Professional and ethical issues related to the helping professions. Ethical concerns in multicultural and rural human service delivery. Ethics and legal issues related to substance abuse counseling in Alaska. Prerequisites: PSY F101 or SOC F100X. (3+0)

HUMS F305 Substance Abuse Counseling
3 Credits Offered Spring
Introduction to the basic principles of substance abuse counseling. Application of counseling modalities to intervention and treatment of individuals, families and groups experiencing alcohol and drug abuse or dependence. Cross-cultural issues addressed. Prerequisites: HUMS F125. (3+0)

HUMAN SERVICES

HMSV F340 Peer Advisor Training
1 Credit Offered Spring
Emphasis on developing skills needed to assist exploratory/undecided students with their academic planning and decision making. Topics include resource referral, communication/active listening, academic and career planning, time and stress management, group dynamics, and values clarification. Graded Pass/Fail. Prerequisites: Sophomore standing; application. (1+0)

HMSV F342 Peer Advising Practicum
1–3 Credits
Supervised peer advising experience (both individually and paired with faculty member) in the Academic Advising Center or appropriate department, allowing for application of theory and skills gained in HMSV F340. Course may be repeated once for credit. Graded Pass/Fail. Prerequisites: HMSV F340. (0+0)

HUMANITIES

HUM F101 The Humanities: A Cultural Perspective (h)
3 Credits Offered As Demand Warrants
Examination of humanities using a non-Yup’ik culture and the Yup’ik culture as bases. Introduction of fundamental principles of Yup’ik and non-Yup’ik performing and visual arts, ideas and cultural developments that have stirred and enriched civilization, and aspects of Yup’ik and non-Yup’ik culture to help students develop greater awareness of forces that affect them. Offered only at the Kuskokwim campus. (3+0)

HUM F201X Unity in the Arts (h)
3 Credits Offered Fall Even-numbered Years
Concentration on the interdependence of the visual arts, the performing arts, and literature, as set against a specific social, political and cultural background of selected eras. Prerequisites: Placement in ENGL F111X or higher; sophomore standing; or permission of instructor. (3+0)

HUM F469 W Architecture: Art, Design, Technology and Social Impact (h)
3 Credits Offered Fall Even-numbered Years
Concepts of environmental, urban and industrial design. Relationship of human and natural environment is stressed in this history of architecture with special attention given to contemporary conditions in urban areas and effects of industrialization and mechanization on human living and working spaces, artistic design and aesthetics. Prerequisites: ART F261 and ART F262 OR HUM F201X; ENGL F111X; ENGL F211X or ENGL F213X; or permission of instructor. Cross-listed with ART F469. (3+0)

HUM F492 Senior Seminar (h)
3 Credits Offered Fall Even-numbered Years
Consideration of the humanities at the University of Alaska and on alternate approaches elsewhere. Student project paper required with oral presentation and defense. Prerequisites: Open requirements or permission of instructor. (3+0)

HUM F492P Senior Seminar
3 Credits Offered Fall Even-numbered Years
Consideration of the humanities at the University of Alaska and on alternate approaches elsewhere. Student project paper required with oral presentation and defense. Graded Pass/Fail. Prerequisites: Open requirements or permission of instructor. (3+0)

JAPANESE (JPN) — JOURNALISM (JRN)

F111X; ENGL/FL F200X; ENGL F211X or F213X or permission of instructor; Recommended: HIST F121 or HIST F122 or HIST F331. Cross-listed with WGS F331. (3+0)

JPN F332 Japanese Cultural Traditions and Arts (h)
3 Credits
Offered Fall Even-numbered Years
A study of Japanese cultural traditions and arts as influenced by the religious and philosophical systems of Shinto, Buddhism, Confucianism and Taoism. Lectures will cover a wide range of Japanese traditional arts such as tea ceremony, calligraphy, martial arts, Noh, Bunraku, and Kabuki. Course is taught in English. Prerequisites: Junior standing or permission of instructor. (3+0)

JPN F333 Twentieth Century Japanese Prose Fiction (h)
3 Credits
Offered Spring Odd-numbered Years
A study of selected novels, short stories and film scripts in translation representative of styles and themes which characterize twentieth century Japanese literature. Analysis of each work in terms of characterization, themes, structure, style and as an expression of social problems or intellectual issues in modern Japanese society. Course is taught in English. Note: Course may be repeated for credit when topic varies. Prerequisites: Junior standing or permission of instructor. (3+0)

JPN F431 Studies in Japanese Culture (h)
3 Credits
Offered Fall
Further study of advanced written and spoken Japanese through essays, newspaper and journal articles, and television documentaries dealing with topics in Japanese culture. Note: Course may be repeated for credit when topic varies. Prerequisites: JPN F302 or permission of instructor. (3+0)

JPN F432 Studies in Japanese Language (h)
3 Credits
Offered Spring
In-depth study of Japanese language or literature. Course may be repeated for credit when topics vary. Prerequisites: JPN F302 or permission of instructor. (3+0)

JPN F475 Seminar on Contemporary Japan (h)
3 Credits
Offered As Demand Warrants
Ties together various threads of the Japanese studies program and gives students an opportunity to apply their knowledge to contemporary issues in Japan. Provides a forum for student presentations of research papers begun in Japan. Prerequisites: Upper-division semester in Japan at pre-approved program. (3+0)

JOURNALISM

JRN F101 Media and Culture (h)
3 Credits
Offered Fall and Spring
History and principles of mass communications and the role of information media in American society. Introduction to professional aspects of mass communications, including print and broadcast. (3+0)

JRN F102 Introduction to Broadcasting (h)
3 Credits
Offered As Demand Warrants
Principles of broadcasting as they relate to the people of the United States, including history, government involvement and social effects. Available via eLearning and Distance Education only. (3+0)

JRN F105 History of the Cinema (h)
3 Credits
History and development of the medium of film in the United States and abroad during the last 100 years. Content will vary each semester. Notes: Available via eLearning and Distance Education only. Cross-listed with FLM F105. (3+0)

JRN F202 News Writing for the Media (h)
3 Credits
Identifying and focusing news stories, writing the lead, developing story structure, writing on deadline, editing copy, writing headlines and captions, writing styles for print, broadcast and online news presentations. Special fees apply. Prerequisites: ENGL F111X; ENGL F211X or ENGL F213X; or permission of instructor. (3+0)

JRN F203 Basic Darkroom Photography (h)
3 Credits
Photography fundamentals, including use of an adjustable camera, film and exposure techniques, filters and flash techniques, and an introduction to color. Darkroom procedures including black and white film processing and printing, photograph design and composition. Students must have use of an adjustable camera. Special fees apply. Cross-listed with ART F283. (2+3)

JRN F204 Basic Digital Photography (h)
3 Credits
Offered Spring
Introduction to the technical and aesthetic aspects of basic digital photography via digital SLR cameras and editing through digital photo suites such as Adobe Photoshop. Students are expected to have intermediate computer knowledge. Topics include controlling digital SLRs on manual settings, photographing creatively, basic and advanced editing techniques, negative scanning and digital printing. Special fees apply. Cross-listed with ART F284. (3+0)

JRN F215 Radio Production (h)
3 Credits
Offered Fall
Sound production techniques for radio and television. Emphasis on writing, recording, control room techniques and editing. Special fees apply. (2+3)

JRN F217 Introduction to the Study of Film (h)
3 Credits
Offered Spring
An appreciation course designed to introduce the student to the various forms of cinematic art with special emphasis on humanistic and artistic aspects. Prerequisites: ENGL F111X. Cross-listed with ENGL F217; FLM F217. (2+2)

JRN F220 Adobe Photoshop (h)
3 Credits
Offered Fall
Create images that go beyond traditional photo editing and into the realm of painting with depth color manipulation. Includes use of a computer, scanner, analog images and digital camera. Includes ethical and copyright issues of photography manipulation. Prerequisites: JRN F250. Recommended: Advanced knowledge of Macintosh operating system. (3+0)

JRN F240 Foreign Corresponding (h)
3 Credits
Offered Spring
The U.S. tradition of “objective” journalism holds sway in very few countries. How did these varying approaches develop, and what do they mean for how Americans report overseas and how foreign journalists report about us? (3+0)

JRN F250 Web Site Design (h)
3 Credits
Offered Fall
Create website projects. Includes the Internet, design, multimedia and the incorporation of text, sound, images, animation and video. Special fees apply. Prerequisites: Familiarity with the World Wide Web, Internet browsers, the Macintosh operating systems, and image editing software; or permission of instructor. (3+0)

JRN F251 Introduction to Video Production (h)
4 Credits
Offered Fall
An introduction to video production with an emphasis on television studio production. Special fees apply. Cross-listed with FLM F251. (2+5)

JRN F280 Video Storytelling (h)
3 Credits
Offered Fall
Basics of digital video production technology, composition, audio, lighting and editing as it relates to primarily nonfiction filmmaking. Students will conclude the course by producing their own short videos. Special fees apply. Cross-listed with FLM F280. (3+0)
JRN F290 Digital Video Editing
3 Credits
Introduction to the technical and aesthetic aspects of non-linear digital video editing. Students will go from little or no experience in non-linear editing to being comfortable with some of the advanced editing techniques. Address motion picture editing theories that are not bound to time or specific editing technology. Special fees apply. Cross-listed with FLM F290. (3+0)

JRN F300 Internship
1–3 Credits
Prerequisites: JRN F202 or permission of instructor. Practical experience working with campus media, individual media-related projects for business or media, or in a professional media environment. Course may be repeated for credit. Special fees apply. (3+0)

JRN F302 W Reporting
3 Credits
News reporting basics: covering beats, including police, sports, local government, science and the military. Cultivating sources, interviewing and reporting through public records. Working with numbers, segments on print, video and online reporting methods and style conventions. Special fees apply. Prerequisites: JRN F101; JRN F202; JRN F251; ENGL F111X; ENGL F211X or ENGL F213X or permission of instructor. (3+0)

JRN F305 Snedden Chair Lectures
3 Credits
Rotating series of lectures and seminars with America’s leading journalists on topics ranging from war reporting to covering sports. Please contact Department of Journalism for current topic and instructor. Course may be repeated for credit. Special fees apply. Prerequisites: Junior standing or permission of instructor. (3+0)

JRN F308 Film Criticism (h)
3 Credits
Theoretical approaches to viewing, analyzing and evaluating film and television program content. Note: Available via eLearning and Distance Education only. Cross-listed with FLM F308. (3+0)

JRN F311 W Magazine Article Writing (h)
3 Credits
Learn to identify great article ideas, turn them into finished products and pitch them to magazine editors. Workshops and extensive instructor feedback. Students repeating the course limited to six credits. Special fees apply. Prerequisites: ENGL F111X; ENGL F211X or ENGL F213X; JRN F202; or permission of instructor. (3+0)

JRN F323 Editing for Journalists
3 Credits
Tricks of the trade, including copyediting; writing headlines and captions; basic page design using computers; and thinking like the editor-in-chief. Special fees apply. Prerequisites: JRN F202 or permission of instructor; junior standing. (3+0)

JRN F324 Typography and Publication Design
3 Credits
Typography, layout and design, coupled with a study of the methods of printing production. Special fees apply. Prerequisites: Permission of instructor. (2+2)

JRN F368 Topics in American Film History (s)
3 Credits
American film and how it shapes and warps popular perceptions of America’s past. A historical contrast according to Hollywood with the views and interpretations of historians. Content will vary depending on the specific genre or period of focus, such as World War II, the Vietnam War, the Great Depression, the Cold War and development of the west, etc. Course may be repeated for credit when content varies. Available via eLearning and Distance Education only. Prerequisites: HIST F131 or HIST F132; JRN F217 or JRN F308; or permission of instructor. Cross-listed with HIST F368 and FLM F368. (3+0)

JRN F371 O Digital Imaging (h)
3 Credits
Prerequisites: ART F161 or ART F271 or ART F284/JRN F204 or FLM/JRN F290; COMM F131X or COMM F141X. This course focuses on creating and manipulating digital images, including digital painting and photography. The varied ethical issues engendered by this expertise will be addressed in depth. Skills and knowledge useful for digital photography, digital video compositing and digital painting will be covered. Special fees apply. Prerequisites: ART F161 or ART F271 or ART F284/JRN F204 or FLM/JRN F290; COMM F131X or COMM F141X; junior standing. Cross-listed with ART F371; FLM F371. (1+4)

JRN F380 O Women, Minorities and the Media (h)
3 Credits
Prerequisites: JRN F202 or permission of instructor. Examination of how women and minorities are portrayed in the mass media, the employment of women and minorities in the media, as well as how accurately the media reflects our society demographically. Presented from a feminist, multi-cultural perspective using a broad feminist analysis encompassing issues of gender as well as class, race, age and sexual orientation. Prerequisites: COMM F131X or COMM F141X; junior standing. Cross-listed with WGS F380. (3+0)

JRN F390 New Media Toolkit (h)
3 Credits
Prerequisites: ENGL F111X or ENGL F213X or permission of instructor. Focus on the content and technology needed in today’s newsrooms. Students will explore blogging and its place in journalism, basic audio production, digital photography, multimedia package production, and the latest Web 2.0 technologies. History of “new media” and its place in the changing journalism landscape will also be discussed. Special fees apply. Prerequisites: ENGL F111X or ENGL F213X; JRN F202; or permission of instructor. (2.5+0.5)

JRN F400 Professional Media Internship
1–3 Credits
Prerequisites: JRN F401; JRN F402; JRN F404; JRN F405; JRN F406; JRN F407; JRN F408; JRN F409. Professional training in a supervised, professional media environment. Participation at an approved publication, TV or radio station, or other media-related business or non-profit organization is required. Prerequisites: Senior standing or permission of instructor. (1+6)

JRN F401 Beat Reporting
3 Credits
Prerequisites: JRN F203 or ART F283 or instructor permission. Intensive training in developing and covering a news beat (chosen by the student) and the basics of common news beats: police, courts and government. Includes cultivating sources, explaining complicated stories, reporting trends, improving interviewing techniques, and employing advanced writing skills. Writing for publication encouraged. Special fees apply. Prerequisites: JRN F202. (2+2)

JRN F402 Advanced Photography (h)
3 Credits
Prerequisites: ART F161 or ART F271 or ART F284/JRN F204 or FLM/JRN F290; COMM F131X or COMM F141X. Continuation of JRN F203/ART F283. Emphasis on continuing development of photographic skills by application of basic technical skills to a variety of areas of photography. Special fees apply. Prerequisites: JRN F203 or ART F283 or instructor permission. Cross-listed with ART F483. (2+3)

JRN F404 Photjournalism I (h)
3 Credits
Prerequisites: JRN F401; JRN F402; JRN F404; JRN F405; JRN F406; JRN F407; JRN F408; JRN F409. Fundamentals of visual communication through photography; issues and techniques of modern photjournalism; news, features, sports, and photo essay assignments as encountered at a daily newspaper; preparation of photographs for publication. Students must have basic 35mm camera equipment. Special fees apply. Prerequisites: JRN F203 or ART F283 or permission of instructor. (2+3)

JRN F405 Advanced Photography Seminar
3 Credits
Prerequisites: JRN F401; JRN F402; JRN F404; or permission of instructor. Advanced discussion of photojournalism and photographic topics. Topics range from the photographic essay to the history of photography and working in series. Weekly classroom meetings supplemented by field, studio and darkroom sessions. Special fees apply. Prerequisites: JRN F402; JRN F404; or permission of instructor. Stacked with ART F665 and JRN F665. Cross-listed with ART F465. (2+3)

### JUSTICE

| JUST F110 | Introduction to Justice (s) | 3 Credits | |}

| JUSTICE | | | Course Descriptions | 383 |

3 Credits
Survey of the structure and process of the agencies of criminal justice. Includes introduction to criminology, criminal law, police, courts and corrections. (3+0)
JUST F125  Introduction to Addictive Processes  
3 Credits  
Focus on gaining knowledge of the psycho-social aspects of addiction. Historic and behavioral approaches, disease concept and current trends relating to addiction presented. Twelve step and self-help approaches explored. Cross-listed with HUMS F125. (3+0)

JUST F201  Dispute Resolution and Restorative Practices  
3 Credits  
Offered Fall and Spring  
This course surveys the basic practical and theoretical foundations of conflict, conflict resolution and restorative practices. It introduces students to the basic theories and practices of conflict resolution and peace-making, providing students with grounding in theories, applications and dynamics of conflict and key conflict resolution processes. Prerequisites: ENGL F111X; COMM F131X or COMM F141X; PS/ECON F100X or JUST F110. (3+0)

JUST F222  Research Methods  
3 Credits  
Offered Fall  
Application of social science research methods to solving scientific and nonscientific questions arising in justice or political science. Basic methods include statistical analysis, survey research, and Internet applications. Prerequisites: JUST F110. (3+0)

JUST F251  Criminology  
3 Credits  
Offered Spring  
The study of the major areas of deviant behavior and its relationship to society, law and law enforcement, including the theories of crime causation. Prerequisites: JUST F110. (3+0)

JUST F300X  Ethics and Justice  
3 Credits  
An examination of ethical and moral concepts, and their relationship to criminal justice issues. Applies ethics theories to the criminal justice institutions of police, courts and corrections. Examines ethical and moral dilemmas which confront crime control policy makers. Prerequisites: Junior standing. (3+0)

JUST F302  Dispute Systems Design  
3 Credits  
Offered Summer and Fall  
This course examines the hidden sources of conflicts that are often embedded in social, legal, political, and organizational structures and systems. This course will be focused on all aspects of structural, systemic conflict, and introduces ways to harness conflict for positive organizational outcomes. Prerequisites: JUST F201; ENGL F211X or ENGL F213X; or permission of the instructor. (3+0)

JUST F310  Principles of Corrections  
3 Credits  
Offered Fall  
An introduction to adult institutions, community-based programs, and theories of incarceration. Correctional programs are examined. Prerequisites: JUST F110; junior standing. (3+0)

JUST F315  Correctional Counseling and Rehabilitation  
3 Credits  
Offered Spring  
A study of various treatment and rehabilitative/restorative methods utilized in correctional settings. Topics include the roles of correctional personnel, the assessment and treatment of juveniles and adults, casework in correctional settings, crisis intervention, and the assessment and treatment of special populations in the correctional setting. Prerequisites: Junior standing; JUST F310; ENGL F211X or ENGL F213X or permission of the instructor. (3+0)

JUST F335 W  Gender and Crime  
3 Credits  
Offered Spring  
An exploration of gender and crime including the extent of female crime, victimization, masculinity and violence, and women professionals in the justice system. Prerequisites: JUST F110; ENGL F111X; ENGL F211X or ENGL F213X or permission of instructor; junior standing. Cross-listed with WGS F335. (3+0)

JUST F340  Rural Justice in Alaska  
3 Credits  
Offered Fall  
Application of the western justice system to remote northern Native villages including issues arising from cultural conflicts, difficulties associated with a centralized justice system serving distant roadless communities, the federal/Indian relationship, and a description of crime occurring in the villages. Prerequisites: JUST F110; junior standing. (3+0)

JUST F345 W  Police Problems  
3 Credits  
Offered Fall  
Analysis of the nature of coercive power and the special problems faced by people who assume the responsibility of coercing others; how coercive power affects personality and how personality affects the way different types of people respond to the challenge and responsibilities of using coercive means; conditions that discourage excessive use of coercive means and encourage police officers to develop in morally and politically mature ways. Prerequisites: ENGL F111X; ENGL F211X or ENGL F213X or permission of instructor; JUST F110; junior standing. (3+0)

JUST F352  Criminal Law  
3 Credits  
Offered Fall  
A study of elements, purposes and functions of the substantive criminal law with emphasis upon historical and philosophical concepts. Prerequisites: JUST F110; junior standing. (3+0)

JUST F354  Procedural Law  
3 Credits  
Offered Fall  
The legal limitations of the police and the right of the people to be secure from the government under the protections of the Constitution and the Rules of Evidence. Prerequisites: ENGL F111X; JUST F110; junior standing. (3+0)

JUST F358  Juvenile Delinquency  
3 Credits  
Offered Fall  
Theories of delinquency; the extent of delinquency, the historical development of juvenile justice, the juvenile system, and how it impacts on youth in relation to police, courts, institutions and community programs. Includes youth violence, gangs, gender, race and class. Prerequisites: JUST F110; JUST F251; or permission of instructor. (3+0)

JUST F401  Cross-cultural Conflict Analysis and Intervention  
3 Credits  
Offered Spring  
Students will learn key concepts and skills that will help them respond to cross-cultural and human rights conflicts in a productive manner. Students will learn basic conflict analysis for cross-cultural and human rights disputes, including those occurring in rural Alaska. By the end of the course students will understand the theoretical assumptions that drive these conflicts and will learn tools to resolve them. Prerequisites: JUST F302; ENGL F211X or ENGL F213X; or permission of the instructor. (3+0)

JUST F403  Law and Science of Arbitration  
3 Credits  
Offered Spring  
This course covers the law, social science, policy and practices relating to arbitration as it is utilized in both the private and public sector. Students will learn the history of arbitration, its applications, its rules of evidence, administering institutions and their rules, arbitral remedies and awards, grounds for judicial review, and its hybrid use with other processes including mediation, fact-finding, and early neutral evaluation. Prerequisites: JUST F302; ENGL F211X or ENGL F213X; or permission of the instructor. (3+0)

JUST F405  Clinic in Mediation, Conferencing and Circle Practices  
3 Credits  
Offered Spring  
This course engages students in both theory and practice in mediation, conferencing and circle practices. The course emphasizes training and professional practice in a series of theory-to-practice applications. Students work through a series of cases in which they are encouraged to solve ethical dilemmas and conduct issues. In this course, students gain mediation practice skills and integral approached to mediation. Prerequisites: JUST F302; ENGL F211X or ENGL F213X; or permission of the instructor. (3+0)
JUST F453 O  Comparative Criminology (s)  3 Credits  Offered Fall.
The Justice program focuses on the American justice system with an emphasis in restorative processes, alternative dispute resolution, and Alaskan justice. This course examines the development of philosophy and law; and the historical and modern practice of justice throughout the world. Prerequisites: COMM F131X or COMM F141X; JUST F110; JUST F251 or permission of instructor. (3+0)

JUST F454 W  Advanced Problems in Procedural Law  3 Credits  Offered Spring
Advanced study of the elements of criminal procedural law. Emphasis on the legal limitations of the police and the right of people to be secure from the government under protections of the U.S. Constitution and “rules of evidence.” Prerequisites: ENGL F111X; ENGL F211X or ENGL F213X; JUST F110; JUST F354; junior standing; or permission of instructor. (3+0)

JUST F460 O  American Crime Control (s)  3 Credits  Offered Fall
Major concepts of the structure and process of criminal justice revisited with emphasis on current issues. Prerequisites: COMM F131X or COMM F141X; JUST F110; JUST F222; JUST F251; senior standing; Justice major. (3+0)

JUST F475  Internship  3–9 Credits
Supervised work experience in criminal justice agencies. Prerequisites: Permission of director of intern program. Note: Department approval required for 9 credits. (3-9+0)

JUST F492  Seminar  1–6 Credits
Various topics of current interest and importance to the justice major will be presented. Topics will be announced prior to each offering. Prerequisites: JUST F110; junior standing; permission of instructor. (1-6+0)

JUST F605  Administration and Management of Criminal Justice Organizations  3 Credits  Offered Fall
A comprehensive overview of management and administration of criminal justice agencies with an emphasis on organizational behavior. Included is the study of management theories, leadership roles, and the development of human resources within the organizational context. This course will be offered over the Internet. Note: Offered via the Internet. Prerequisites: Admission to the MA degree program in Justice. Recommended: BA or BS in relevant area. (3+0+6)

JUST F610  Ethics in Criminal Justice Management  3 Credits  Offered as Demand Warrants
Confronting ethical situations that may arise in the management of criminal justice organizations. Examination of the ethical and moral foundations of our current criminal justice system to help make decisions in keeping with the goals of justice. Note: Offered via the Internet. Prerequisites: Admission to the MA degree program in Justice. Recommended: BA or BS in relevant area. (3+0+6)

JUST F615  Justice Program Planning/ Evaluation and Grant Writing  3 Credits  Offered Spring
Program planning and evaluation. Includes grant proposal writing with emphasis on federal sources of grant funding. Note: Offered via the Internet. Prerequisites: Admission to MA in Justice program. Recommended: BA or BS in relevant area. (3+0+6)

JUST F620  Personnel Management in Criminal Justice  3 Credits  Offered as Demand Warrants
Foundation for effective management of personnel in criminal justice by supervisors. Includes recruiting, selection, training, on-site supervision, termination and replacement of subordinates. Note: Offered via the Internet. Prerequisites: Admission to MA in Justice program. Recommended: BA or BS degree in relevant area. (3+0+6)

JUST F625  Legal Aspect of Criminal Justice Management  3 Credits  Offered Spring
A basic understanding of legal issues faced by criminal justice managers and administrators. Included is a study of the legal considerations surrounding recruitment and hiring practices, sexual harassment, the Age Discrimination in Employment Act, the Americans with Disabilities Act and the Fair Labor Standards Act. The course will be offered via the Internet. Prerequisites: Admissions to the MA in Justice program. Recommended: BA or BS in relevant area. (3+0+6)

JUST F630  Media Relations and Public Relations  3 Credits  Offered As Demand Warrants
Understanding the role of the media in modern society and how to effectively represent an organization to the media. Includes First Amendment and Freedom of Information Act case law and administrative decisions involving the broadcast media. The primary focus is upon preparing justice administrators to effectively meet their legal obligations with regard to dissemination of information to the media and the public. Note: Offered via the Internet. Prerequisites: Admission to MA in Justice program. Recommended: BA or BS in relevant area. (3+0+6)

JUST F640  Community/Restorative Justice  3 Credits  Offered Fall
Using community resources to address public safety concerns. Includes recent developments and an emerging awareness that public safety solutions can be achieved efficiently by cooperative efforts between justice agencies and community resources. Note: Offered via the Internet. Prerequisites: Admission to MA in Justice program. Recommended: BA or BS in relevant area. (3+0+6)

JUST F670  Seminar in the Administration of Juvenile Justice  3 Credits  Offered Spring
Legal and administrative aspects of the juvenile justice system. Emphasis will be placed on developing an applied knowledge regarding the administration of juvenile justice within the legal framework. Includes hypothetical situations in an effort to enhance the ability to apply theoretical concepts to real life situations. Note: Offered via the Internet. Prerequisites: JUST F605; admission to MA in Justice program. (3+0+6)

JUST F690  Seminar in Critical Issues and Criminal Justice Policy  3 Credits  Offered As Demand Warrants
This seminar will be the only course actually requiring a student to attend on the UAF Campus. The Seminar will last for one week and the student will be required to attend sessions 8 hours a day. Topics of current interest. Candidates in standing for the MA degree in Justice will make presentations. Attendance is required on the UAF campus. Prerequisites: Admissions to MA in Justice program. Recommended: BA or BS in relevant area. (3+0+6)

LATIN

LAT F101  Beginning Latin I (h)  3 Credits
Introduction to ancient Latin language and Roman culture, development of competence through reading original authors with emphasis on vocabulary, recognition and correct use of grammar. Does not satisfy core curriculum requirement. Note: Offered via eLearning and Distance Education only. (3+0)

LAT F102  Beginning Latin II (h)  3 Credits
Continuation of the introduction to ancient Latin language and Roman culture, development of competence through reading original authors with emphasis on vocabulary, recognition and correct use of grammar. Does not satisfy core curriculum requirement. Note: Offered via eLearning and Distance Education only. Prerequisites: LAT F101. (3+0)
LEAD F280  Sports Leadership
3 Credits Offered As Demand Warrants
Provides leadership theory and develop leadership skills for application internal and external to their sport. Focus on the identification and development of leadership skills/abilities and application within the classroom, a sport and for an on-campus project. This course is cross-listed with BA F280. (3+0)

LEAD F305  Leadership Alaska: Making a Difference (s,h)
4 Credits Offered Spring
A leadership seminar and practicum which will involve building community, developing networks, learning leadership theories, understanding civic responsibility, and creating an action through which the student becomes a leader. Prerequisites: Either be an Alaska Scholar; an Honors student; a member of the National Society of Collegiate Scholars; have a 3.25 GPA; or permission of instructor. (4+0)

LEAD F456 W  Leadership and Influence During Crisis
3 Credits Offered As Demand Warrants
This course focuses on the challenges faced by those who serve as leaders during crisis and emergency circumstances. During emergency circumstances, leading others, being able to influence and motivate them during crisis is critical. Topics including leadership and followership, crisis decision making, fear and emotion and the unique circumstances of an emergency manager/homeland security professional are examined. Prerequisites: HSEM F310; ENGL F111x or ENGL F112x or ENGL F113x; or permission of instructor. Cross-listed with HSEM F456. (3+0)

LEAD F470  Leadership Theory and Development
3 Credits Offered Alternate Spring
A guide for interpreting leadership theory and research as well as practical advice on how to be a better leader. The course acts as a review of all functional leadership theories, how the theories relate to one another, and how students can apply the leadership theories to their own personal development. Prerequisites: ENGL F111x; ENGL F211x or ENGL F213x; COMM F131x or COMM F141x and BA F390 or permission of the instructor. (3+0)

LEAD F472  Leading Change
3 Credits Offered Alternate Fall
The course is designed to explore some of the technologies for intervening in organizations to develop their capability and to achieve change. We explore the way in which change agents deal with their conflicting demands. The thrust of the text is how to become a leading change agent within an organization and extend your understanding and application of key concepts and theories. Prerequisites: ENGL F211x or ENGL F213x; COMM F131x or COMM F141x; BA F390 or permission of instructor. (3+0)

LIBERAL ARTS AND SCIENCE

LAS F410 W,O/2  Scientific Research
3 Credits Offered As Demand Warrants
Formulation and testing of hypotheses using field observation and experimentation. Includes collection of data, analysis using spreadsheets and statistical software, and oral/written presentation. Focus on individual and group participation in ongoing field or laboratory projects in the natural sciences. Prerequisites: ENGL F111x; ENGL F211x or ENGL F213x; junior or senior standing as a major in the BAS degree program. (2+3)
LAS F601 Responsible Conduct of Research
2 Credits
Maintaining the public trust and respect of fellow scientists requires a clear understanding of the basic principles under which research is conducted and reported. Introduces students to the basic principles and expectations that form the foundation of research integrity. Students will learn to recognize and address ethical dilemmas in research scenarios, thus preparing them for situations that will invariably arise during their career. This course fulfills National Science Foundation and National Institutes of Health requirements. Prerequisites: Senior undergraduate or graduate student standing. Interested post-doctoral fellows and other with terminal degrees are also invited to enroll with permission of instructor. (2+0)

LIBRARY SCIENCE

LS F100X Library and Information Strategies
1 Credit Offered Fall
Principles of information organization and how libraries can provide access to information and scholarly resources. Emphasis on use of a library via distance delivery methods. For students who do not have direct physical access to the Rasmuson Library. (1+0)

LS F101X Library Information and Research
1 Credit
Introduction to effective library research methods and principles of information organization and retrieval. Emphasis on applied experience with finding and evaluating information, especially through use of library catalogs, journal indexes and Internet resources. Some sections may emphasize selected academic areas. (1+0)

LINGUISTICS

LING F100 Language, Education, Linguistics (h)
3 Credits Offered Spring
Introduction to the field of linguistics as it pertains to the field of education. Includes discussions of language structure, acquisition and bilingualism, and variation and public policy. The course does not satisfy requirements for the BA in Linguistics. Cross-listed with ED F100. (3+0)

LING F101 Nature of Language (h)
3 Credits Offered Fall
The study of language: systematic analysis of human language and description of its grammatical structure, distribution and diversity. (3+0)

LING F216 Languages of the World (h)
3 Credits Offered As Demand Warrants
A comprehensive survey of the world’s languages — past and present. Topics include genetic relationships among languages, linguistic change, language universals, language classification and language families, as well as the interaction of culture and language. (3+0)

LING F223 Sociolinguistics: Language and Social Inequality
3 Credits Offered Spring
An introduction to the concepts and methods of linguistic anthropology and sociolinguistics. It draws from these disciplines to investigate the role of language variation in social inequality. It covers concepts including language varieties, speech styles, language ideologies, the creation of standard languages and portrayals of ethnolinguistic groups in the media. Prerequisites: ANTH F100X or LING F101. Cross-listed with ANTH F223. (3+0)

LING F303 W,O Language Acquisition
3 Credits Offered As Demand Warrants
Theories of the acquisition and development of first and second languages, including consideration of biological and sociocultural factors. Survey of traditional and contemporary theories, and implications for pedagogy and public policy. Prerequisites: COMM F131X or COMM F141X; ENGL F111X; ENGL F211X or ENGL F213X or permission of instructor. Recommended: LING F101. Cross-listed with ED F303. (3+0)

LING F308 W,O Language and Gender (s)
3 Credits Offered Fall Odd-numbered Years
Examination of relationships between language and gender, drawing on both ethnographic and linguistic sources. Topics include power, socialization and sexism. Prerequisites: COMM F131X or COMM F414X; ENGL F111X; ENGL F211X or ENGL F213X or permission of instructor. Cross-listed with ANTH F308; WGS F308. (3+0)

LING F318 Introduction to Phonetics and Phonology (h)
3 Credits Offered Spring
Scientific study of human sound speech, mechanism of their production, and sound systems of languages. Prerequisites: Upper-division standing or permission of instructor. (3+0)

LING F320 Introduction to Morphology (h)
3 Credits Offered Fall
Study of principles and processes of word construction in language. Morphological structure of Alaska Native languages and other non-Indo-European languages. Prerequisites: LING F318 or permission of instructor. (3+0)

LING F402 Second Language Acquisition
3 Credits Offered As Demand Warrants
Central issues in second language acquisition research. Includes a critical review of SLA theories and research. Prerequisites: LING F101 or permission of instructor. (3+0)

LING F410 O Theory and Methods of Second Language Teaching
3 Credits Offered Fall Even-numbered Years
Theory and methods of teaching a second language, including various pedagogical approaches, overview of second language acquisition theory, discussion of materials and testing. Prerequisites: COMM F131X or COMM F141X. (3+0)

LING F420 Semantics (h)
3 Credits Offered Spring Even-numbered Years
A systematic exploration of the nature of meaning in human language. Focus is on historical and contemporary approaches to understanding problems of reference, categorization and lexical relationships in meaningful contexts. Prerequisites: LING F101 or permission of instructor. Stacked with LING F620. (3+0)

LING F430 Historical Linguistics (h)
3 Credits Offered Fall Even-numbered Years
Introduction to comparative and historical linguistics: methods of linguistic reconstruction, historical change, genetic relationships, dialectology. Includes Indo-European and Alaskan languages. Prerequisites: LING F318. Stacked with LING F630. (3+0)

LING F431 Field Methods in Descriptive Linguistics I
3 Credits Offered Fall Odd-numbered Years
Introduction to general issues in language field work and to issues specific to working with little studied and/or endangered languages in particular. Focus on introduction to writing systems, making recordings, computers and transcriptions, planning consultant sessions, working with consultants, interviewing and ethics in the field. Projects include making transcriptions of familiar language, and later, working on an unfamiliar language with a language consultant, selecting and carrying out a well-defined project, resulting in a term paper. Prerequisites: LING F318; LING F320; or permission of instructor. Cross-listed with ANTH F432. (3+0)

LING F434 Field Methods in Descriptive Linguistics II
3 Credits Offered Spring Even-numbered Years
Second semester of Field Methods sequence. Plan linguistic field project, including field trip, caring for equipment, data handling, community contacts, intellectual property, and repatriation. Course work includes lectures and group elicitation with a speaker of a non-Indo-European language.
## COURSES

### LINGUISTICS (LING)

Projects may involve either the traditional field work involving finding and working with a consultant, or work involving research of archival materials on languages no longer spoken. **Prerequisites:** ANTH F432 or LING F431. Cross-listed with ANTH F434. (3+0)

**LING F440 W**  
**Aspects of Bilingualism (h)**  
3 Credits  
Offered As Demand Warrants  
Cognitive, linguistic, sociopolitical and educational aspects of bilingualism at both the individual and societal levels, including factors contributing to language maintenance and language shift. **Prerequisites:** ENGL F111X; ENGL F211X or ENGL F213X; LING F101; or permission of instructor. (3+0)

**LING F441**  
**Topics in Linguistics**  
3 Credits  
An elective course in linguistics for majors. Content will vary from year to year and may be drawn from many areas of linguistics to include current research and methodologies. Course may be repeated two times for credit when content varies. **Prerequisites:** LING F101, LING F318 and LING F320 or permission of instructor. (3+0)

**LING F450 O**  
**Language Policy and Planning (s)**  
3 Credits  
Offered Fall Odd-numbered Years  
Consideration of minority languages, including Alaskan Native Languages, in light of their histories, current status and factors affecting future maintenance. **Prerequisites:** COMM F131X or COMM F414X. Stacked with LING F650. (3+0)

**LING F482**  
**Seminar in Linguistics**  
3 Credits  
Offered Spring  
Current issues in various subfields of linguistics including semantics and pragmatics, discourse analysis, bilingualism, lexicography, language philosophy and issues within a particular language or language group, e.g. Eskimo phonology, Athabascan morphology. May be repeated once. **Prerequisites:** LING F101; LING F318; LING F320; or permission of instructor. (3+0)

**LING F600**  
**Research Methods for Applied Linguistics**  
3 Credits  
Offered Spring  
Review of quantitative and qualitative research paradigms, data gathering techniques and analytical tools (questionnaires, surveys, observations, testing) used in the study of applied linguistics. Topics will include ethical issues in human subjects research, how to conduct a literature review, how to conduct classroom-based research. **Prerequisites:** Graduate standing. (3+0)

**LING F601**  
**Principles of Linguistic Analysis**  
3 Credits  
Offered Fall  
Provides experience in working with various languages to determine systematic principles of transcribing and organizing sounds; isolating morphemes; categorizing words into semantic categories; and understanding narrative and other rhetorical structures. For students whose specialty is other than linguistics who could benefit from a graduate-level introduction to linguistic methods. (3+0)

**LING F602**  
**Second Language Acquisition**  
3 Credits  
Offered Fall  
Central issues in second language acquisition research. Includes a critical review of SLA theories and research. **Prerequisites:** LING F101 or LING F601; graduate standing; or permission of instructor. (3+0)

**LING F603**  
**Phonetics and Phonology**  
3 Credits  
Offered Spring  
Scientific approach to the study of human speech sounds and the mechanism of their production (phonetics), as well as the exploration of the fundamental concepts of the sound systems of languages (phonology) and theories which allow for the analysis of real language data. **Prerequisites:** LING F101 or LING F601; graduate standing; or permission of instructor. (3+0)

**LING F604**  
**Morphology and Syntax**  
3 Credits  
Offered Fall  
The study of how meaning is encoded in words in languages of the world. Morphological and morphophonemic processes, lexical categories, derivation and inflection, productivity, tense, aspect, mode, case, concord, valence changes, morphological typologies. Similarities and differences among languages in the grammatical devices used to signal relations between nouns and verbs, negation, comparison, attribution. **Prerequisites:** LING F101 or LING F601; graduate standing; or permission of instructor. (3+0)

**LING F610**  
**Theory and Methods of Second Language Teaching**  
3 Credits  
Offered Spring  
Theory and practice of teaching a second language, including methodological approaches, second language acquisition theory, materials, and testing. **Prerequisites:** LING F602. (3+0)

**LING F611**  
**Second Language Curriculum and Materials Development**  
3 Credits  
Offered Fall Even-numbered Years  
Exploration/discussion of theoretical perspectives in Second Language curriculum and materials development. Emphasis on the interconnectivity of materials, syllabus, curriculum and learning. As a result of this course, students will be able to choose, adapt and construct a variety of language teaching materials and understand the ramifications of syllabus and curriculum design. **Prerequisites:** LING F602; LING F610. Recommended: LING F601. (3+0)

**LING F612**  
**Assessment for the Second Language Classroom**  
3 Credits  
Offered Spring Odd-numbered Years  
A systematic exploration of the nature of meaning in human language. Focus is on historical and contemporary approaches to understanding problems of reference, categorization and lexical relationships in meaningful contexts. **Prerequisites:** Graduate standing or permission of instructor. Stacked with LING F420. (3+0)

**LING F621**  
**Cultural Aspects of Language Acquisition**  
3 Credits  
Offered As Demand Warrants  
An expanded view of the ways in which individuals become socialized into particular patterns of first and second language and literacy. The ongoing acquisition of both oral and written language(s) from early childhood through adult life. Topics will include the cultural dimensions of language development, the relationship between communication and culture, bilingualism and the role of language in the transmission of sociocultural knowledge. Cross-listed with ED F621. (3+0)

**LING F627**  
**Introduction to Linguistic Description and Documentation**  
3 Credits  
Offered Spring Odd-numbered Years  
General introduction to lexicography, field phonetics, grammatical documentation, investigation of narrative, other levels of linguistic documentation, the distinction between description and documentation, and differences in structure and method between pedagogical and academic materials resulting from field work. **Prerequisites:** LING F601 or equivalent; demonstrated background in phonology and morphology; or permission of instructor. (3+0)

**LING F630**  
**Historical Linguistics**  
3 Credits  
Offered Fall Even-numbered Years  
Introduction to comparative and historical linguistics: methods of linguistic reconstruction, historical change, genetic relationships, dialectology. Includes Indo-European and Alaskan languages. **Prerequisites:** LING F318. Stacked with LING F430. (3+0)
LING F631  Field Methods in Descriptive Linguistics I  3 Credits  Offered Fall Odd-numbered Years
Introduction to general issues in language field work and to issues specific to working with little studied and/or endangered languages in particular. Focus on introduction to writing systems, making recordings, computers and transcriptions, planning consultant sessions, working with consultants, interviewing, and ethics in the field. Projects include making transcriptions of familiar language, and later, working on an unfamiliar language with a language consultant, selecting and carrying out a well-defined project, resulting in a term paper. Prerequisites: LING F627 or permission of instructor. Cross-listed with ANTH F632. (3+0)

LING F634  Field Methods in Descriptive Linguistics II  3 Credits  Offered Spring Even-numbered Years
Second semester of Field Methods sequence. Plan linguistic field project, including field trip, caring for equipment, data handling, community contacts, intellectual property and repatriation. Course work includes lectures and group elicitation with a speaker of a non-Indo-European language. Projects may involve either traditional field work involving finding and working with a consultant, or work involving research of archival materials on languages no longer spoken. Prerequisites: ANTH F632 or LING F631. Cross-listed with ANTH F634. (3+0)

LING F650  Language Policy and Planning  3 Credits  Offered Fall Odd-numbered Years
Consideration of minority languages, including Alaska Native Languages, in light of their histories, current status, and factors affecting future maintenance. Stacked with LING F450. (3+0)

LING F651  Topics in Athabascan Linguistics  3 Credits  Offered Fall Odd-numbered Years
Graduate level introduction to important topics in Athabascan linguistics, including both foundational literature and current research. Topics may include laryngeal features; tonogenesis; syntax-morphology interface; argument structure; lexical semantics; and discourse. Course may be repeated once. Prerequisites: LING F601 or equivalent; graduate standing. Recommended: LING F603; LING F604. Cross-listed with ANL F651 (3+0)

LING F652  Linguistics Applications  3 Credits  Offered As Demand Warrants
In-depth investigation of linguistic problems in selected languages. Includes phonological, morphological, syntactic and semantic issues. Students will produce a grammatical sketch of a chosen language. Prerequisites: LING F318; LING F320; LING F601; or relevant course work. (3+0)

LING F660  Internship  3 Credits  Offered As Demand Warrants
Student works as an apprentice to a language teacher or a linguist doing fieldwork. Maintain a log and a portfolio of work. If teaching, goal would be to develop appropriate lesson plans and do mentored teaching. If doing fieldwork, goal would be to develop appropriate materials for teaching. Prerequisites: LING F603; LING F604; ANTH F632 or LING F610. (3+0)

MSL F211  Introduction to Marine Science I  3 Credits  Offered Fall
This is the first part of a two semester sequence in Marine Science: MSL F211, F212, F213 (Lab). This course introduces students to the geology, chemistry and physics of the ocean as well as related topics in the cryosphere and climate. Students will gain a basic understanding of the interconnections between the ocean and atmosphere, and the oceans and the solid earth (the continents and sea floor). Prerequisites: Math F107. May be taken concurrently. (3+0)

MSL F212  Introduction to Marine Science II  3 Credits  Offered Spring
This course explores the diversity of marine life, from microbes to mammals, and the interactions of marine organisms with each other and with their environment. Topics include primary productivity, marine food webs, physiological adaptations, and ecology of marine habitats from coastal to deep-sea systems. Students will also be introduced to current topics in marine and fisheries research. Prerequisites: MSL F211 (3+0)

MSL F213L  Marine Science Laboratory  1 Credit  Offered spring
Introductory laboratory course designed to accompany MSL F211–F212 series. Laboratory activities will provide students with hands-on experience to cement topics covered in lectures (MSL F211–F212). Activities include exploration of physical and chemical properties of seawater; geologic and biological classification and introduction to tools for oceanographic data visualization. Special fees apply. Prerequisites: MSL F212 or concurrent enrollment (0+3)

MSL F220  Scientific Diving  2 Credits  Offered Spring
Introduction to cold water diving and SCUBA techniques used in the research community. Includes familiarization with Alaska subtidal flora and fauna. Opportunity to work underwater and assist with diving projects conducted by MSL F421 students at the Kasitsna Bay Marine Lab during spring break. Completion of this course will allow students to be eligible to join the UAF (AAUS) dive program and to dive on the UAF sanctioned diving projects and have reciprocity to dive with other universities and other government agencies. Through this course, students also can be certified with a Research Diver Specialty (PADI) and a Dry Suit Specialty (PADI). CPR, First Aid (Red Cross), and Emergency Oxygen Administration (DAN) are offered through this course. Graded Pass/Fail. Special fees apply. Prerequisites: Basic biology/ecology courses, SCUBA (open water) certification. Special Conditions: Must have current SCUBA physical approval (1+1+8)

MSL F317  Introduction to Marine Mammal Biology  3 Credits  Offered Spring Even-numbered years
The course will introduce students to the biology and diversity of cetaceans, pinnipeds, sirenians, and other marine mammals. Topics will include evolution, ecology, reproduction, and behavior of marine mammals, their special adaptations, such as diving, osmo- and thermoregulation, and will explore some current conservation and management issues. The course will be structured in a lecture format. Prerequisites: BIOL F116 or MSL F212 or instructor permission. (3+0)

MSL F330  The Dynamic Alaskan Coastline  3 Credits  Offered Fall
Mountains, rivers, glaciers, fjords, estuaries, deltas, tidal zones, sediments, nutrients, elements, habitats, fish. This class will provide an interdisciplinary perspective on the dynamic Alaskan coastal landscape from Glacier Bay to the Arctic. We will delve into the driving geological, geochemical, and oceanographic processes occurring along Alaska’s coast and linkages to various marine ecosystems. Students will learn the fundamental physical and geochemical processes in the coastal zone using various locations in Alaska as examples. Field trip required. Special fees apply. Prerequisites: Junior standing; MSL F111X or GEOS F101; CHEM F105X; PHYS F103X or PHYS F211X. (3+0)

**Fisheries Resources:** CHEM F105X, PHYS F103X, FISH F288, STAT F200X.

**Recommended:** FISH F425. Cross-listed with FISH F440. (3+0)

- **MSL F449 Biological Oceanography**
  - Survey of biological processes emphasizing organic matter synthesis
  - Transfer including topics essential to a basic understanding of contemporary biological oceanography.
  - Prerequisites: MSL F212, STAT F200X or permission of instructor.
  - 3 Credits Offered Fall

- **MSL F450 Marine Biology and Ecology Field Course**
  - Advanced understanding of marine organisms in an ecological and evolutionary context through field and laboratory work at the Casitsma Bay Marine Lab.
  - Prerequisites: MSL F212, F213L series; or permission of instructor.
  - 4 Credits Offered Summer Odd-numbered Years; As Demand Warrants

- **MSL F461 Chemical Oceanography**
  - An integrated study of the chemical, biological, geological and physical processes that determine the distribution of chemical variables in the sea.
  - Topics include biogeochemical cycles and the use of tracers to follow these complex cycles.
  - Prerequisites: MSL F111; or graduate standing.
  - 3 Credits Offered Spring

- **MSL F463 Chemical Coastal Processes**
  - A study of chemical processes in the coastal ocean.
  - Prerequisites: Upper-division standing, CHEM F106X, BOL F116X, or MSL F111X or MSL F211, F212, F213L series; or permission of instructor.
  - 3 Credits Offered Spring Even-numbered Years or As Demand Warrants
MSL F467  Introduction to Marine Macroalgae (n)  3 Credits  Offered As Demand Warrants
Introduction to marine macroalgae. Algal structure, function and ecology, basic knowledge of the major phyla, key and press algae, and local Alaska flora. Includes a four to five day field trip to Kasitsna Bay Marine Laboratory. Special fees apply. Prerequisites: Upper-division standing in a natural science for undergraduates or graduate standing. Stacked with MSL F667. (2+3)

MSL F601  Professional Development  1 Credit  Offered Fall
Improve ability to make oral and poster presentations and to write resumes and cover letters. Includes lectures, discussions, and four individual projects. Students are encouraged to use their thesis/dissertation material for the posters and oral presentations. Feedback on all projects will be given by both instructor and students. Recommended: Graduate status. (1+0)

MSL F602  Proposal Writing  1 Credit  Offered Fall; As Demand Warrants
Familiarize students with the proposal writing process. Writing proposals is a common requirement during graduate school and will be continuing during the career as a scientists and researcher. This class aims to cover some common rules about good proposal writing. Students will be required to write a proposal and to give feedback to 1-2 proposals of classmates. Graded Pass/Fail. Recommended: Graduate status. (1+0)

MSL F604  Modern Applied Statistics for Fisheries  4 Credits  Offered Odd-numbered Years
Covers general statistical approaches to quantitative problems in marine science and fisheries with guidance on how to collect and organize data, how to select appropriate statistical methods and how to communicate results. A variety of advanced statistical methods for analyzing environmental data sets will be illustrated in theory and practice. Prerequisites: STAT F200X; STAT F401; proficiency in computing with R or permission of instructor. Cross-listed with FISH F604. (3+3)

MSL F605  Controversies in Marine Science  1 Credit  Offered Spring Even-Numbered Years
Introduction to the idea that science is fluid and controversies and disagreements occur. These disagreements are often published in the primary literature. This course will be a discussion/debate of various controversial topics in marine science. Graded Pass/Fail. Recommended: Graduate status. (1+0)

MSL F610  Marine Biology  3 Credits  Offered Spring
Biological of the major plant and animal groups in the sea and their roles in pelagic and benthic systems. Physical, chemical and geological features affecting marine organisms and the role of bacteria in the sea. The basic biology and adaptations of selected species of zooplankton and nekton. The benthos-shore biota, shelf and deep-sea organisms: basic biology, trophic roles and adaptations of selected species. Prerequisites: Degree in biology or permission of instructor. Recommended: Courses in invertebrate zoology, ichthyology, and vertebrate zoology. (3+0)

MSL F620  Physical Oceanography  4 Credits  Offered Fall
Physical description of the sea, physical properties of seawater, methods and measurements, boundary processes, currents, tides and waves, and regional oceanography. Prerequisites: Math F202X; PHYS F103X or PHYS F211X; science or engineering degree; or permission of instructor. (3+3)

MSL F621  Polar Marine Science  3 Credits  Offered Fall Even-numbered Years
Physical, biological, chemical and geological oceanography of the polar oceans with emphasis on comparing and contrasting the Arctic and Antarctic. Prerequisites: MSL F620; or graduate standing. (3+0)

MSL F622  Tides — Their Nature and Impact  3 Credits  Offered Spring Even-numbered Years
This course will provide students in marine sciences with in-depth knowledge of tides and the role of tides in the physical, biological, chemical and geological processes in the oceans. We will investigate the importance of tides for the coastal regions of the Bering Sea and North Pacific. We will also cover associated aspects such as tidal currents and their role in transport of sediments, zooplankton and fish larvae, harnessing the tidal power for the generation of electricity, and impact of tides on climate. Prerequisites: MSL F620; MATH F201X; bacculaureate degree in physics, engineering, mathematics or equivalent. (3+0)

MSL F623  Field Course in Subtidal Studies  2 Credits  Offered Spring
Students will propose a hypothesis and experimentally test it during a one-week field trip to the Kasitsna Bay Lab. Prior to field trip, students will develop a proposal, dive plan and materials list in relation to their project. Undergraduates will present their findings in an oral presentation to the class while graduate students will present theirs in a public seminar and produce a conference-ready poster. Special fees apply. Prerequisites: MSL F420; basic biology/ecology courses; SCUBA (open water) certification. Special Conditions: Must have a current SCUBA physical approved. Stacked with MSL F421. (1+1+8)

MSL F624  Oceanic-Atmospheric Gravity Waves  3 Credits  Offered Spring; As Demand Warrants
Introduction to the dynamics of surface and internal gravity waves in non-rotating and rotating fluids including, derivation/solutions of the wave equation, approximations to the governing equations, particle motions and wave energetics, dispersion relationships, phase and group velocities, normal mode and WKB theory, refraction, reflection, critical layer absorption, wave instabilities. Prerequisites: MSL F620; MATH F302; or permission of instructor. Cross-listed with ATM F624. (3+0)

MSL F625  Shipboard Techniques  3 Credits  Offered As Demand Warrants
Introduction to modern oceanographic shipboard sampling and analysis techniques. (2+3)

MSL F626  Continental Shelf Dynamics  3 Credits  Offered As Demand Warrants
Geophysical fluid dynamic fundamentals appropriate to continental shelf circulation. Steady and time-dependent wind and buoyancy-forced flows in the presence of stratification and bathymetry. Prerequisites: MSL F620; MATH F421. (3+0)

MSL F627  Statistical Computing with R  2 Credits  Offered Fall, As Demand Warrants
Using the free, open-source software R to teach computing, programming, and modeling concepts for the statistical computing of fisheries and
biological data. Prepares students for other graduate-level, quantitative fisheries courses and covers exploratory statistical and graphical analyses, as well as computer-intensive methods such as bootstrapping and randomization tests. Prerequisites: STAT F200X or equivalent, STAT F401 or equivalent, and proficiency with Excel; or permission of instructor. Cross-listed with FISH F627. (1-3)

MSL F628 \*Sea Ice Ecology \* 1 Credit Offered As Demand Warrants

Provides students with an introduction into the physics, chemistry and biology of Arctic and Antarctic sea ice. Topics will include seasonality of sea ice extent, ice microstructure, diversity and activity of biological communities and impacts of climate change on the ice biota. Recommended: MSL F650. (1+0)

MSL F629 \*Methods of Numerical Simulation in Geophysical Fluid Dynamics \* 4 Credits Offered Fall Odd-numbered Years

Fundamentals of computer simulation, including time and spatial differencing and stability theory applied to partial differential equations describing dynamic processes in the ocean and atmosphere. Numerical approximation schemes for geophysical fluid dynamics will be analyzed through equations of motion, continuity and transport. Special consideration given to description of frictional processes in turbulent flow and transport/diffusion phenomena. Includes laboratory practice. Prerequisites: MATH F310; MATH F421; MATH F422 or equivalent; baccalaureate degree in physics, engineering, mathematics or equivalent; experience with FORTRAN. (3+3)

MSL F630 \*Geological Oceanography \* 3 Credits Offered Spring

Topography and structure of the ocean floor. Theory of plate tectonics. Major sediment types and distributions. Sediment transport and deposition. Interaction between seawater, rock, and sediment. Paleooceanography. Prerequisites: Graduate standing or permission of instructor. Upper-division standing are invited to contact the instructor. (3+0)

MSL F631 \*Data Analysis in Community Ecology \* 3 Credits Offered Spring Odd-numbered years

This course will provide an overview of statistical methods that have been specifically developed to aid our understanding and interpretation of the structure, abundance, and distribution of species and communities in relation to resources and the environment. Prerequisites: STAT F200X; STAT F401 or equivalent; FISH F627 (Statistical Computing with R) or familiarity with R, general ecology, graduate standing in fisheries or permission of instructor. Cross-listed with FISH F631. (3+0)

MSL F632 \*Oceanographic Data Analysis and Visualization \* 3 Credits Offered Alternate Springs

This course introduces students to data analysis and visualization techniques commonly applied to oceanographic datasets. Students will gain a theoretical and practical understanding of propagation of errors, linear least squares regression, and time series analyses such as correlation, coherence and spectral estimation. The course will also cover Empirical Orthogonal Function (EOF) analysis. A significant portion of the class will be a project that will give students an opportunity to learn a data analysis technique suited to their research. Matlab will be used throughout. Prerequisites: Graduate standing; MATH F202X; MATH F314 or permission of the instructor. (3+0)

MSL F640 \*Fisheries Oceanography \* 4 Credits Offered Fall Odd-numbered Years

Oceanography of marine processes affecting commercially important fisheries (finfish and shellfish) and species that affect them. Interactions between fisheries resources and physical, biological, geological and chemical oceanography, as well as climatological and meteorological conditions. Topics include recruitment, transport, natural mortality, predator-prey relationships, competition, distribution and abundance. El Niño/La Niña, regime shifts, and climate change. Emphasis on early life history of fishes. Examples from fisheries and ecosystems worldwide are used. Prerequisites: MSL F620; MSL F650; or permission of instructor. Recommended: FISH F400. (4+0)

MSL F650 \*Biological Oceanography \* 3 Credits Offered Fall

Survey of biological processes emphasizing organic matter synthesis and transfer including topics essential to a basic understanding of contemporary biological oceanography. Primary and secondary production, standing stocks, distribution, and structure and dynamics of phytoplankton and zooplankton populations. The transfer of organic matter to higher trophic levels and food webs. Nutrient cycling, especially but not exclusively nitrogen, phosphorus and silicon, microbiological processes relevant to nutrient cycling. Heterotrophic production, benthic communities coastal ecosystems, the influence of organisms on the composition of seawater, particularly with reference to oxygen and carbon dioxide regimes. Aspects of regional oceanography. Prerequisites: Upper-division standing in a science major. (3+0)

MSL F651 \*Marine Biology and Ecology Field Course \* 4 Credits Offered Summer Odd-numbered Years; As Demand Warrants

Advanced understanding of marine organisms in an ecological and evolutionary context through field and laboratory work at the Kasitsna Bay Marine Lab (Kachemak Bay). Includes collection of marine macroalgae, invertebrates and plankton and relating their anatomical organization to habitat, lifestyle and ecology. Emphasis will be on familiarization with Alaska's nearshore flora and fauna, the ecological function of organisms and ecosystem dynamics. Students will employ different field sampling techniques and experimental designs in various habitats found around the Kasitsna Bay Marine Lab, e.g. rocky intertidal, open water, mudflats, seagrass beds, and salt marshes. Graduate students will perform a research project related to the course subject matter. Prerequisites: One year of biology; graduate standing; permission of instructor. Recommended: Basic courses in ecology and invertebrate zoology. Stacked with MSL F450. (3+0)

MSL F652 \*Marine Ecosystems \* 3 Credits Offered Fall Even-numbered Years

Understanding ecosystems of the sea in the context of evaluating the impact of human activities. Focus on current concepts, trends and perspectives. Prerequisites: BIOL F472; MSL F620; MSL F650; or permission of instructor. (3+0)

MSL F653J \*Zooplankton Ecology \* 3 Credits Offered Fall Odd-numbered Years

Survey of marine zooplankton including processes and variables which influence their production and dynamics. Emphasis on the northeast Pacific ocean zooplankton community. Field and lab methods for sampling include fixing, preserving, subsampling, identifying and quantifying zooplankton collections. Laboratory techniques for culture of zooplankton include physiological measurements of bioenergetic parameters. Course is taught in Juneau. Prerequisites: Invertebrate zoology course, MSL F610, or permission of instructor. Cross-listed with FISH F653J. (3+0)

MSL F654 \*Benthic Ecology \* 3 Credits Offered Spring Odd-numbered Years

Ecology of marine benthos, from subtidal to hadal zone. Methods of collecting, sorting, narcotizing, preserving and analyzing benthic assemblages, including video analytical techniques from submersibles and ROVs. Hydrothermal vent and cold seep assemblages. Physiology/energetics of benthic organisms, including animal-sediment relationships, feeding, reproduction and growth. Depth, spatial and latitudinal distribution patterns. Prerequisites: Invertebrate zoology course, marine biology course, or permission of instructor. (3+0)

MSL F655 \*Phytoplankton Ecology, from Form to Function \* 2 Credits Offered Spring Even-numbered Years

Introduction to the diversity and functioning of aquatic (marine and limnic) phytoplankton taxa in a wide sense. Topics will include various adaptations to the environment (life cycles, physiology). Four lab sessions will intensify the understanding of the covered topics and give students hands-on experience in analyzing phytoplankton samples on algal diversity and activity.
using modern techniques (fluorescence microscopy, flow cytometry, PAM fluorometry). Recommended: Biological oceanography and/or graduate courses in algal ecology and aquatic ecosystems. (1+2)

**MSL F656** Kelp Forest Ecology
3 Credits Offered Summer Even-numbered Years As Demand Warrants
Introduction to knowledge, hypotheses and disputes regarding components of nearshore tidal communities and the ecological interactions that influence their structure and dynamics. Includes primary published literature in marine subtidal ecology, and local Alaska subtidal flora and fauna. Work underwater conducting ecological research. Includes formulating questions, collecting and analyzing ecological data, report writing and feedback. Special fees apply. Prerequisites: UAF Science Diver certification. Stacked with MSL F456. (28+35)

**MSL F660** Chemical Oceanography
3 Credits Offered Spring
An integrated study of the chemical, biological, geological and physical processes that determine the distribution of chemical variables in the sea. Topics include biogeochemical cycles and the use of tracers to follow these complex chemical cycles. The chemistry of carbon is considered in detail. Interactions with the atmosphere and lithosphere (including implications of the mid-ocean ridge vent system to ocean chemistry) are examined. Prerequisites: Graduate standing. Cross-listed with CHEM F660. Stacked with MSL F461. (3+0)

**MSL F661** Stable Isotope Techniques in Environmental Research
3 Credits Offered Spring Even-numbered Years
An examination of the use of added or naturally occurring isotope tracers in ecological studies. Demonstration of equipment and modern techniques. Prerequisites: MSL F660 or permission of instructor. (3+0)

**MSL F663** Chemical Coastal Processes
3 Credits Offered Spring Even-numbered Years or As Demand Warrants
A study of chemical processes in the coastal ocean. This course will examine chemical interactions at different boundaries, and explore physical and biological controls on the chemistry of coastal environments. Some of the topics to be covered include: The role of suspended particles; coastal acidification, photochemical processes; controls on coastal productivity; future challenges in coastal management. This course is intended for students with a background in general chemistry and marine science. Prerequisites: Graduate standing. Stacked with MSL F463. (3+0)

**MSL F667** Introduction to Marine Macroalgae
3 Credits Offered As Demand Warrants
Introduction to marine macroalgae. Includes algal structure, function and ecology, basic knowledge of the major phyla, key and press algae and local Alaska flora. Includes a four to five day field trip to Kasitsna Bay Marine Laboratory. Special fees apply. Prerequisites: Upper-division standing in a natural science for undergraduates or graduate standing. Stacked with MSL F467. (2+3)

**MSL F670** Nutrient Dynamics
2 Credits Offered Fall Odd-numbered Years
The dynamics of nitrogen, phosphorus and silicon cycles of the world oceans and the specific processes which transfer nutrients between ecosystems compartments. Analytical techniques employed in measurement of nutrient transfer rates. Prerequisites: MSL F650 or MSL F660 or permission of instructor. (2+0)

**MSL F676** Aquatic Food Web Ecology
3 Credits Offered Fall Even-numbered Years
This course will examine theoretical and applied aspects of aquatic food web ecology, from the ecological processes that give rise to patterns in aquatic communities to the incorporation of trophic interactions into ecosystem-based management. Lectures and discussion will focus on ecological theory and case studies. Lab exercises will introduce empirical and modeling approaches for studying food web interactions. Proficiency with Excel and basic statistics is preferred. Prerequisites: FISH F425 or permission of instructor. Cross-listed with FISH F676. (2+3)

**MSL F680** Marine Sustainability Internship
2 Credits Offered Fall
Internship program in marine ecosystem sustainability to broaden students’ interdisciplinary training, develop new research tools, build expertise outside their home discipline, gain exposure to careers, and gain a unique perspective on research problems. Internships are for a minimum of 8 weeks and take place during the summer. In the autumn students report on and meet to discuss their internship experiences. Prerequisites: MSL F652 or permission of instructor. Cross-listed with FISH F680 and ANTH F680. (0+0+5-16)

**MBA**

**MBA F602** Accounting for Managers
3 Credits Offered Fall or Spring
A complete and balanced treatment of the concepts, procedures and uses of financial accounting. Coverage includes the accounting cycle, accounting principles, mass processing of transactions, internal control, inventories and merchandising operations, long-lived assets and liabilities, corporate accounting and reporting, partnership accounting, financial statements, funds flow analysis, cost systems for manufacturing operations, and managerial accounting. Note: This course is NOT an approved elective for MBA students. Prerequisites: Graduate standing; or approval of the MBA director. (3+0)

**MBA F605** Contemporary Topics in Accounting
3 Credits Offered Fall or Spring, As Demand Warrants
An advanced seminar designed to meet the accounting needs of managers. These topics can range from taxes to management control systems. May be taken twice for credit when topic changes. Prerequisites: MBA F602; graduate standing; or permission of the MBA director. (3+0)

**MBA F607** Human Resources Management
3 Credits Offered Spring
The study of the effective management of human resources in organizations to include employee planning and recruiting, selection and orientation, training and career development, performance evaluation, compensation, EEO, occupational safety and health, and labor relations. Prerequisites: Admission to the MBA program; or permission of the MBA director. (3+0)

**MBA F617** Organizational Theory for Managers
3 Credits Offered Spring
Overview of the history, concepts, literature and applications in organizational theory. Emphasis on applications and cases applying organizational theory concepts to management. Prerequisites: Admission to the MBA program; or permission of the MBA director. (3+0)

**MBA F620** Portfolio Theory and Asset Pricing
3 Credits Offered As Demand Warrants
Examination of modern normative portfolio theory and asset pricing. Includes mathematics of portfolio analysis, single-period risk and return measures, and the process of optimal portfolio selection. Prerequisites: Admission to the MBA program; MBA F680; or permission of the MBA Director. (3+0)

<tr>
<td>Analysis of demand and supply under various market forms, cost and theory of production, factor pricing and theory of distribution and survey of welfare economics. This course is NOT an approved elective for MBA students. <strong>Prerequisites:</strong> Graduate standing or permission of MBA director. (3+0)</td>
<td>Description of capital markets, development of the major financial theories that explain how to value financial instruments, and examination of how these theories can be used by corporations to evaluate real investments. How firms choose among the various instruments available to them for financing operations and how these instruments help firms manage risks. These corporate financial decisions are viewed as part of the overall corporate strategy of firms, affecting investment and operating strategies, product market strategies, and the ways in which executives are compensated. <strong>Prerequisites:</strong> Admission to the MBA program; MBA F602; MBA F675; or permission of MBA director. (3+0)</td>
</tr>
<tr>
<td><strong>MBA F624</strong></td>
<td>Controllship</td>
</tr>
<tr>
<td>3 credits</td>
<td>Offered As Demand Warrants</td>
</tr>
<tr>
<td>An advanced course to meet the accounting needs of managers. Topics of study include evaluating the design and implementation of management control systems and making recommendations for efficiency and effectiveness; recognizing the ethical, environmental, legal and regulatory, political, and social issues embedded within the design; and evaluation and effective implementation of management control systems. <strong>Prerequisites:</strong> MBA F602 or equivalent; must be admitted to MBA program; or permission of MBA director. (3+0)</td>
<td>Fixed income securities and markets including treasury, agency, mortgage-backed and corporate securities, municipal bonds and derivatives. Introduces technical issues relating to duration, convexity and bond-portfolio management. <strong>Prerequisites:</strong> Admission to the MBA program; MBA F630; or permission of MBA director. (3+0)</td>
</tr>
<tr>
<td><strong>MBA F628</strong></td>
<td>Analytical Methods for Economics and Business</td>
</tr>
<tr>
<td>3 Credits</td>
<td>Offered Spring</td>
</tr>
<tr>
<td>Covers the important analytical management tools and techniques and their application to business problems. In particular, we will cover both mathematical and statistical techniques that have direct applications in a variety of management situations. This course is NOT an approved elective for MBA students. <strong>Prerequisites:</strong> Graduate standing or permission of MBA director. (3+0)</td>
<td>How to comprehend and critically evaluate financial statements. Building on topics introduced in a first-year course in financial accounting, analyze additional disclosures typically included in financial statements. These activities will be useful in tasks related to valuation, credit decisions, competitor assessment and bankruptcy predictions. <strong>Prerequisites:</strong> Admission to the MBA program; MBA F602 or equivalent; or permission of MBA director. (3+0)</td>
</tr>
<tr>
<td><strong>MBA F630</strong></td>
<td>Derivative Securities</td>
</tr>
<tr>
<td>3 Credits</td>
<td>Offered As Demand Warrants</td>

**DEVM F051**  
**Math Skills Review**  
1 Credit  
Offered As Demand Warrants  
Develops and reviews basic mathematical terminology, theory and operations as outlined by the Alaska State Mathematics Standards. Mathematics topics focus on reviewing the six basic “strands” of mathematical content: numeration, measurement, estimation and computation, function and relationships, geometry, and statistics and probability. Approaches to problem solving will emphasize the process of mathematical thinking, communication and reasoning. It is an appropriate course for those preparing for the High School Qualifying Exam in Alaska or those needing a review of basic math skills in preparation for a math placement test at UAF. May be repeated for a total of three credits. Graded Pass/Fail. (1+0)

**DEVM F056**  
**Math Fast Track: Prealgebra/Elementary Algebra Review**  
1 Credit  
Offered 3 times per year: Augustmester, Wintermester, Maymester  
A 20-hour intensive review of math concepts offered prior to each semester. Covers prealgebra and elementary algebra topics to prepare qualified students to potentially improve their math course placement. Students should have a history of being successful in equivalent levels of math, although they may not recall enough information to place well on the placement test. Students who are successful in this class have the possibility of advancing through one or two semesters of development math. Graded Pass/Fail.  
**Prerequisites:** Placement into DEVM F050 or DEVM F060. (1+0)

**DEVM F060**  
**Elementary Algebra**  
3 Credits  
First year high school algebra. Evaluating and simplifying algebraic expressions, solving first degree equations and inequalities, integer exponents, polynomials, factoring, rational expressions, equations and graphs of lines. Special fees apply. **Prerequisites:** Grade of C- or better in DEVM F050; or ABUS F155; or appropriate placement test scores. Prerequisite courses and/or placement exams must be taken within one calendar year prior to commencement of the course. (3+0)

**DEVM F061**  
**Review of Elementary Algebra**  
1 Credit  
Designed to assist students in reviewing material covered by DEVM F060. Individuals who have not previously taken an elementary algebra course are recommended to enroll in DEVM F060. Available via e-learning and Distance Education only. (1+0)

**DEVM F062**  
**Alternative Approaches to Math: Elementary Algebra**  
3 Credits  
Algebraic topics. Includes operations with polynomial expressions, first- and second-degree equations, graphing, integral and relational exponents, and radicals using alternative teaching styles. **Prerequisites:** Grade of C- or better in DEVM F050; or ABUS F155; or appropriate placement test scores. Prerequisite courses and/or placement exams must be taken within one calendar year prior to commencement of the course. (3+0)

**DEVM F065**  
**Mathematics Skills**  
1–3 Credits  
Designed to assist students in reviewing and reinforcing course concepts covered by DEVM F050, DEVM F060, DEVM F062, DEVM F105 and DEVM F106. Consists of instruction which may include lab instruction, individual student work or group work. May be repeated. Recommended for students who need more time and help to master the material in Developmental Math courses. (1-3+0)

**DEVM F066**  
**Advanced Math Fast Track: Elementary/Intermediate Algebra Review**  
1 Credit  
Offered 3 times per year: Augustmester, Wintermester, Maymester  
A 20-hour intensive review of math concepts offered prior to each semester. Covers elementary and intermediate algebra topics to prepare qualified students to potentially improve their math course placement. Students should have a history of being successful in equivalent levels of math, although they may not recall enough information to place well on the placement test. Students who are successful in this class have the possibility of advancing through one or two semesters of development math. Graded Pass/Fail.  
**Prerequisites:** Placement into DEVM F060 or DEVM F105 or DEVM F106. (1+0)

**DEVM F071**  
**Review of Intermediate Algebra**  
1 Credit  
Course reviews material covered by DEVM F105. Individuals who have not taken an intermediate algebra course on the high-school level are recommended to enroll in DEVM F105. Available via eLearning and Distance Education only. (1+0)

**DEVM F094D**  
**Modularized Mastery Math: Elementary Algebra Module D**  
1 Credit  
Offered Fall and Spring  
This course covers one credit of the DEVM F060 Elementary Algebra course and includes the following topics: simplifying algebraic expressions, solving linear equations in one variable, solving linear and compound inequalities in one variable, applications of linear equations, and solving formulas. A modularized, mastery learning approach is used with computers. **Prerequisites:** Grade of B or better in DEVM F050; or ABUS F155; or appropriate placement test scores. Prerequisite courses and/or placement exams must be taken within one calendar year; permission of instructor also required. (3+0)

**DEVM F094E**  
**Modularized Mastery Math: Elementary Algebra Module E**  
1 Credit  
Offered Fall and Spring  
This course covers one credit of the DEVM F060 Elementary Algebra course and includes the following topics: linear equations in two variables, graphing linear equations, finding the slope of linear equations, writing equations of lines, exponent rules, and operations and polynomials. A modularized mastery learning approach is used with computers. **Prerequisites:** Grade of B or better in DEVM F094D taken within one calendar year; permission of instructor also required. (3+0)

**DEVM F094F**  
**Modularized Mastery Math: Elementary Algebra Module F**  
1 Credit  
Offered Fall and Spring  
This course covers one credit of the DEVM F060 Elementary Algebra course and includes the following topics: factoring polynomials, solving quadratic equations by factoring, simplifying rational expressions, operations with rational expressions, complex fractions, solving rational equations, and applications of quadratic and rational equations. A modularized, mastery learning approach is used with computers. **Prerequisites:** Grade of B or better in DEVM F094E taken within one calendar year; permission of instructor also required. (3+0)

**DEVM F105**  
**Intermediate Algebra**  
3 Credits  
Second year high school algebra. Operations with rational expressions, radicals, rational exponents, logarithms, inequalities, quadratic equations, linear systems, functions, Cartesian coordinate system and graphing. To matriculate to MATH F107X from DEVM F105 a grade of B or higher is required. Special fees apply. **Prerequisites:** Grade of C- or better in DEVM F060; or DEVM F062; or appropriate placement test scores. Prerequisite courses and/or placement exams must be taken within one calendar year prior to commencement of the course. (3+0)

**DEVM F106**  
**Intensive Intermediate Algebra**  
4 Credits  
Algebraic topics. Includes exponents, radicals, graphing, systems of equations, quadratic equations and inequalities, logarithms and exponentials, and complex numbers using alternative teaching styles. Note: This course satisfies elective credit only. Special fees apply. **Prerequisites:** Grade of C- or better in DEVM F060; or DEVM F062; or DEVM F105; or appropriate placement test scores. Prerequisite courses and/or placement exams must be taken within one calendar year prior to commencement of the courses. (4+0)
DEVM F194G  Modularized Mastery Math: Intermediate Algebra Module G
1 Credit  Offered Fall and Spring
This course covers one credit of the DEVM F105 Intermediate Algebra course and includes the following topics: solving systems of equations and applications, simplifying radicals and expressions with rational exponents, performing operations on radical expressions, solving radical equations, and performing operations on complex numbers. A modularized, mastery learning approach is used with computers. Prerequisites: Grade of B or better in DEVM F106; or DEVM F094G; or appropriate placement scores. Prerequisite courses or placement exams must be taken within one calendar year; instructor permission is also required. (1+0)

DEVM F194H  Modularized Mastery Math: Intermediate Algebra Module II
1 Credit  Offered Fall and Spring
This course covers one credit of the DEVM F105 Intermediate Algebra course and includes the following topics: review of solving quadratic equations by factoring, solving quadratic equations that are not factorable, absolute value equations, and inequalities; solving absolute value equations and inequalities, solving linear and compound linear inequalities, solving quadratic and rational inequalities, inverse functions, exponential and logarithmic equations. A modularized, mastery learning approach is used with computers. Prerequisites: Grade of B or better in DEVM F106; or DEVM F094H; or appropriate placement scores. Prerequisite courses or placement exams must be taken within one calendar year; instructor permission is also required. (1+0)

DEVM F194J  Modularized Mastery Math: Intermediate Algebra Module J
1 Credit  Offered Fall and Spring
This course covers one credit of the DEVM F105 Intermediate Algebra course and includes the following topics: solving absolute value equations and inequalities, solving linear and compound linear inequalities, solving quadratic and rational inequalities, inverse functions, exponential functions, logarithmic functions, properties of logarithms, and solving exponential and logarithmic equations. A modularized, mastery learning approach is used with computers. Prerequisites: Grade of B or better in DEVM F194H taken within one calendar year; and instructor permission. (1+0)

Mathematics

MATH F103X  Concepts and Contemporary Applications of Mathematics (m)
3 Credits
Applications of mathematics in modern society; Topics include voting systems, probability and statistics and applications of graph theory in management science; uses of probability and statistics in industry, government and science; and applications of geometry to engineering and astronomy. Problem solving emphasized. Prerequisites: DEVM F105 or DEVM F106 or placement; or high school geometry and algebra II. (3+0)

MATH F107X  Functions for Calculus (m)
4 Credits
A study of algebraic, logarithmic and exponential functions; sequences and series; conic sections; and as time allows, systems of equations, matrices and counting methods. A brief review of basic algebra in the first week prepares students for the rigor expected. The primary purpose of this course, in conjunction with MATH F108, is to prepare students for calculus. Note: Credit may be earned for taking MATH F107X or MATH F161X, but not for both. Prerequisites: DEV F105 or DEV F106 with a grade of B (3.0) or higher; or two years of high school algebra and MATH F107X placement or higher. (4.5+0)

MATH F108  Trigonometry (m)
2–3 Credits
A study of the trigonometric functions. Prerequisites: MATH F107X or placement or concurrent enrollment in MATH F107X. (2–3+0)

MATH F161X  Algebra for Business and Economics (m)
3 Credits
Functions of one and several variables with attention to linear, polynomial, rational, logarithmic and exponential relationships. Geometric progressions as applied to compound interest and present value. Linear systems of equations and inequalities. Note: Credit may be earned for taking MATH F107X or MATH F161X, but not for both. Prerequisites: DEV F105 or DEV F106 or higher or two years of high school algebra and MATH F161X placement or higher. (3+0)

MATH F200X  Calculus I (m)
4 Credits
Limits, including those with indeterminate form, continuity, tangents, derivatives of polynomial, exponential, logarithmic and trigonometric functions, including product, quotient and chain rules, and the mean value theorem. Applications of derivatives including graphing functions and rates of change. Antiderivatives, Newton’s method, definite and indefinite integrals, methods for substitution in integrals and the fundamental theorem of calculus. Applications of integrals include areas, distances, and volumes. Note: No credit may be earned for more than one of MATH F200X, MATH F262X or MATH F272X. Prerequisites: MATH F107X and MATH F108 or placement in MATH F200X. (4+1)

MATH F201X  Calculus II (m)
4 Credits
Techniques and applications of integration. Integration of trigonometric functions, volumes including those using slicing, arc-length, integration by parts, trigonometric substitutions, partial fractions, hyperbolic functions, and improper integrals. Numeric integration including Simpson’s rule, first order differential equations with applications to population dynamics and rates of decay; sequences, series, tests for convergence including comparison and alternating series tests, conditional convergence, power series, Taylor series, polar coordinates including tangent lines and areas, and conic sections. Prerequisites: MATH F200X or placement in MATH F201X. (4+0)

MATH F202X  Calculus III (m)
4 Credits
Partial derivatives and multiple integrals (double and triple). Vectors, parametric curves, motion in three dimensions, limits, continuity, chain rule, tangent planes, directional derivatives, optimization, Lagrange multipliers, integrals in polar coordinates, parametric surfaces, Jacobians, line integrals, Green’s Theorem, surface integrals and Stokes’ Theorem. Prerequisites: MATH F201X. (4+0)

MATH F205  Mathematics for Elementary School Teachers I (m)
3 Credits  Offered Fall
Elementary set theory, numeration systems, and algorithms of arithmetic, divisors, multiples, integers and introduction to rational numbers. Emphasis on classroom methods. Prerequisites: MATH F107X, MATH F161X or placement. Restricted to BAS and BA Elementary Education degree students; others by permission of instructor. (3+1)

MATH F206  Mathematics for Elementary School Teachers II (m)
3 Credits  Offered Spring
A continuation of MATH F205. Real number systems and subsystems, logic, informal geometry, metric system, probability and statistics. Emphasis on classroom methods. Prerequisites: MATH F205. (3+1)

MATH F215  Introduction to Mathematical Proofs (m)
3 Credits  Offered Spring
Emphasis on proof techniques with topics including logic, sets, cardinality, relations, functions, equivalence, induction, number theory, congruence classes and elementary counting. In addition, a rigorous treatment of topics from calculus or a selection of additional topics from discrete mathematics may be included. Prerequisites: MATH F200X, MATH F201X or concurrent with MATH F201X or permission of instructor. (3+0)
MATH F262X  Calculus for Business and Economics (m)
4 Credits
Ordinary and partial derivatives. Maxima and minima problems, including the use of Lagrange multipliers. Introduction to the integral of a function of one variable. Applications include marginal cost, productivity, revenue, point elasticity of demand, competitive/complementary products, consumer’s surplus, etc. Note: No credit may be earned for more than one of MATH F200X, MATH F262X or MATH F272X. Prerequisites: MATH F107X and MATH F108 or placement. (4+0)

MATH F272X  Calculus for Life Sciences (m)
3 Credits
Offered Fall
Differentiation and integration with applications to the life sciences. Note: No credit may be earned for more than one of MATH F200X, MATH F262X or MATH F272X. Prerequisites: MATH F107X and MATH F108 or placement. (4+0)

MATH F301  Topics in Mathematics
3 Credits
Offered Spring
An elective course in mathematics for majors. Topics will vary from year to year and may be drawn from mathematical biology, numerical linear algebra, graph theory, Geloix theory, logic or other areas of mathematics. May be repeated with permission of instructor for a total of nine credits. Prerequisites: MATH F215 or permission of instructor. (0+0)

MATH F302  Differential Equations
3 Credits
Nature and origin of differential equations, first order equations and solutions, linear differential equations with constant coefficients, systems of equations, power series solutions, operational methods, and applications. Prerequisites: MATH F202X. (3+0)

MATH F305  Geometry
3 Credits
Offered Spring Even-numbered Years
Topics selected from such fields as Euclidean and non-Euclidean plane geometry, affine geometry, projective geometry, and topology. Prerequisites: MATH F314 and MATH F215 or permission of instructor. Recommended: MATH F202X. (3+0)

MATH F306  Introduction to the History and Philosophy of Mathematics
3 Credits
Offered Spring Odd-numbered Years
Important periods of history as exemplified by such thinkers as Plato, B. Russell, D. Hilbert, L.E. J. Brouwer and K. Godel. For students of mathematics, science, history and philosophy. Prerequisites: MATH F202X or permission of instructor. (3+0)

MATH F307  Discrete Mathematics
3 Credits
Logic, counting, sets and functions, recurrence relations, graphs and trees. Additional topics chosen from probability theory. Prerequisites: MATH F201X or permission of instructor. Cross-listed with CS F307. (3+0)

MATH F310  Numerical Analysis
3 Credits
Offered Fall
Direct and iterative solutions of systems of equations, interpolation, numerical differentiation and integration, numerical solutions of ordinary differential equations, and error analysis. Prerequisites: MATH F302 or MATH F314 or permission of instructor. Recommended: Knowledge of programming. (3+0)

MATH F314  Linear Algebra
3 Credits
Linear equations, finite dimensional vector spaces, matrices, determinants, linear transformations and characteristic values. Inner product spaces. Prerequisites: MATH F201X. (3+0)

MATH F320  Topics in Combinatorics
3 Credits
Offered Fall Odd-numbered Years
Introduction to some fundamental ideas of combinatorics. Topics selected from such fields as enumerative combinatorics, generating functions, set systems, recurrence relations, directed graphs, matchings, Hamiltonian and Eulerian graphs, trees and graph colorings. Prerequisites: MATH F215 or permission of instructor. (3+0)

MATH F321  Number Theory
3 Credits
Offered Fall Even-numbered Years
The theory of numbers is concerned with the properties of the integers, one of the most basic of mathematical sets. Seemingly naive questions of number theory stimulated much of the development of modern mathematics and still provide rich opportunities for investigation. Topics studied include classical ones such as primality, congruences, quadratic reciprocity and Diophantine equations, as well as more recent applications to cryptography. Additional topics such as continued fractions, elliptical curves or an introduction to analytic methods may be included. Prerequisites: MATH F215 or permission of instructor. (3+0)

MATH F371  Probability
3 Credits
Offered Fall Odd-numbered Years
Probability spaces, conditional probability, random variables, continuous and discrete distributions, expectation, moments, moment generating functions, and characteristic functions. Prerequisites: MATH F202X. (3+0)

MATH F401 W  Introduction to Real Analysis
3 Credits
Offered Fall
Completeness of the real numbers and its consequences convergence of sequences and series, limits and continuity, differentiation, the Riemann integral. Prerequisites: ENGL F111X; ENGL F211X or ENGL F213X or permission of instructor; MATH F202X; MATH F215. (3+0)

MATH F404  Topology
3 Credits
Offered Fall Even-numbered Years
Introduction to topology, set theory, open sets, connectedness, product spaces, metric spaces and continua. Prerequisites: MATH F202X; MATH F215. Recommended: MATH F314 and/or MATH F405. (3+0)

MATH F405 W  Abstract Algebra
3 Credits
Offered Spring
Theory of groups, rings and fields. Prerequisites: ENGL F111X; ENGL F211X or ENGL F213X; MATH F215; or permission of instructor. Recommended: MATH F307 and/or MATH F314. (3+0)

MATH F408  Mathematical Statistics
3 Credits
Offered Spring Even-numbered Years
Distribution of random variables and functions of random variables, interval estimation, point estimation, sufficient statistics, order statistics, and test of hypotheses including various criteria for tests. Prerequisites: MATH F371; STAT F200X. (3+0)

MATH F412  Differential Geometry
3 Credits
Offered Spring Odd-numbered Years
Introduction to the differential geometry of curves, surfaces, and Riemannian manifolds. Basic concepts covered include the Frenet-Serret apparatus, surfaces, first and second fundamental forms, geodesics, Gauss curvature and the Gauss-Bonnet Theorem. Time permitting, topics such as minimal surfaces, theory of hypersurfaces and/or tensor analysis may be included. Prerequisites: MATH F314 and MATH F401; or permission of instructor. (3+0)

MATH F421  Applied Analysis
4 Credits
Offered Fall
Vector calculus, including gradient, divergence, and curl in orthogonal curvilinear coordinates, ordinary and partial differential equations and boundary value problems, and Fourier series and integrals. Prerequisites: MATH F302. (4+0)

MATH F422  Introduction to Complex Analysis
3 Credits
Offered Spring
Complex functions including series, integrals, residues, conformal mapping and applications. May be taken independently of MATH F421. Prerequisites: MATH F302. (3+0)
MATH F430  Topics in Mathematics
3 Credits  Offered Spring
An elective course in mathematics for majors. Topics will vary from year to year and may be drawn from mathematical biology, numerical linear algebra, graph theory, logic, or other areas of mathematics. May be repeated with permission of instructor for a total of nine credits. Prerequisites: MATH F215 or permission of instructor. (3+0)

MATH F460  Mathematical Modeling
3 Credits  Offered Fall Odd-numbered Years
Introduction to mathematical modeling using differential or difference equations. Emphasis is on formulating models and interpreting qualitative behavior such models predict. Examples will be taken from a variety of fields, depending on the interest of the instructor. Students develop a modeling project. Prerequisites: COMM F131X or COMM F141X; ENGL F111X; ENGL F211X or ENGL F213X; MATH F201X; or permission of instructor. Recommended: One or more of MATH F302; MATH F310; MATH F314; MATH F401; STAT F300; some programming experience. (3+0)

MATH F490 O  Senior Seminar
2 Credits  Offered Spring
Advanced topics selected from areas outside the usual undergraduate offerings. A substantial level of mathematical maturity is assumed. Prerequisites: COMM F131X or COMM F141X, at least one of MATH F401 or MATH F405, senior standing. (2+0)

MATH F600  Teaching Seminar
1 Credit
Fundamentals of teaching mathematics in a university setting. Topics may include any aspect of teaching: university regulations, class and lecture organization, testing, book selection, teaching evaluations, etc. Specific topics will vary on the basis of student and instructor interest. Individual classroom visits will also be used for class discussion. May be repeated for credit. Graded Pass/Fail. Prerequisites: Graduate standing. (1+0)

MATH F611  Mathematical Physics
3 Credits  Offered Fall
Mathematical tools and theory for classical and modern physics. Core topics: Linear algebra including eigenvalues, eigenvectors and inner products in finite dimensional spaces. Infinite series. Hilbert spaces and generalized functions. Complex analysis, including Laurent series and contour methods. Applications to problems arising in physics. Selected additional topics, which may include operator and spectral theory, groups, tensor fields, hypercomplex numbers. Prerequisites: MATH F302; MATH F314; MATH F421; MATH F422; or permission of instructor. Cross-listed with PHYS F611. (3+0)

MATH F612  Mathematical Physics
3 Credits  Offered Spring
Continuation of Mathematical Physics I; mathematical tools and theory for classical and modern physics. Core topics: classical solutions to the principal linear partial differential equations of electromagnetism, classical and quantum mechanics. Boundary value problems and Sturm-Liouville theory. Green's functions and eigenfunction expansions. Integral transforms. Orthogonal polynomials and special functions. Applications to problems arising in physics. Selected additional topics, which may include integral equations and Hilbert-Schmidt theory, perturbation methods, probability theory. Prerequisites: PHYS/MATH F611 or equivalent; or permission of instructor. Cross-listed with PHYS F612. (3+0)

MATH F614  Numerical Linear Algebra
3 Credits  Offered Alternate Fall
Algorithms and theory for stable and accurate computation using matrices and vectors on computers. Matrix factorizations, direct and iterative methods for solving linear systems, least squares, eigenvalue and singular value decompositions. Practical implementation and application of algorithms. Prerequisites: MATH F314 or equivalent or permission of the instructor. Recommended: MATH F421 or MATH F401. (3+0)

MATH F615  Numerical Analysis of Differential Equations
3 Credits  Offered Alternate Spring
Review of numerical differentiation and integration, and the numerical solution of ordinary differential equations. Main topics to include the numerical solution of partial differential equations, curve fitting, splines, and the approximation of functions. Supplementary topics such as the numerical method of lines, the fast Fourier transform, and finite elements may be included as time permits and interest warrants. Prerequisites: CS F201, MATH F310, MATH F314, MATH F421, MATH F422 or permission of instructor. (3+0)

MATH F617  Functional Analysis
3 Credits  Offered Spring Even-numbered Years
Study of Banach and Hilbert spaces, and continuous linear maps between them. Linear functionals and the Hahn-Banach theorem. Applications of the Baire Category theorem. Compact operators, self adjoint operators, and their spectral properties. Weak topology and its applications. Prerequisites: MATH F314; MATH F401 or equivalent. Recommended: MATH F422; MATH F641 or equivalent. (3+0)

MATH F631  Algebra I
4 Credits  Offered Fall Odd-numbered Years
Rigorous development of groups, rings and fields. Prerequisites: MATH F405 or permission of instructor. (4+0)

MATH F632  Algebra II
3 Credits  Offered Spring Even-numbered Years
Advanced topics which may be chosen from group theory, Galois theory, commutative or non-commutative algebra, algebraic geometry, homological algebra or other areas. Prerequisites: MATH F631 or instructor permission. (3+0)

MATH F641  Real Analysis
4 Credits  Offered Fall Odd-numbered Years
General theory of Lebesgue measure and Lebesgue integration on the real line. Convergence properties of the integral. Introduction to the general theory of measures and integration. Differentiation, the product measures and an introduction to LP spaces. Prerequisites: MATH F401–F402 or permission of instructor. (4+0)

MATH F645  Complex Analysis
4 Credits  Offered Spring Even-numbered Years
Analytic functions, power series, Cauchy integral theory, residue theorem. Basic topology of the complex plane and the structure theory of analytic functions. The Riemann mapping theorem. Infinite products. Prerequisites: MATH F641 or permission of instructor. (4+0)

MATH F651  Topology
4 Credits  Offered Spring Odd-numbered Years
Treatment of the fundamental topics of point-set topology. Separation axioms, product and quotient spaces, convergence via nets and filters, compactness and compactifications, paracompactness, metrization theorems, countability properties, and connectedness. Set theory as needed for examples and proof techniques. Prerequisites: MATH F401–F402 or MATH F404 or permission of instructor. (4+0)

MATH F660  Advanced Mathematical Modeling
3 Credits  Offered Spring Even-numbered Years
The mathematical formulation and analysis of problems arising in the physical, biological, or social sciences. The focus area of the course may vary, but emphasis will be given to modeling assumptions, derivation of model equations, methods of analysis, and interpretation of results for the particular applications. Examples include heat conduction problems, random walk processes, molecular evolution, perturbation theory. Students will develop a modeling project as part of the course requirements. Prerequisites: Permission of instructor. (3+0)

MATH F661  Optimization
3 Credits  Offered Fall Even-numbered Years
Linear and nonlinear programming, simplex method, duality and dual simplex method, post-optimal analysis, constrained and unconstrained
nonlinear programming, Kuhn-Tucker conditions. Applications to management, physical and life sciences. Computational work with the computer. **Prerequisites:** Knowledge of calculus, linear algebra, and computer programming. Cross-listed with CS F661. (3+0)

**MATH F663**  
**Graph Theory**  
3 Credits  
Offered Fall Odd-numbered Years  
A survey of modern techniques in graph theory; topics may include graphs and digraphs, trees, spanning trees, matchings, graph connectivity, graph coloring, planarity, cycles, and extremal problems. **Prerequisites:** **MATH F314; MATH F320 or instructor permission.** (3+0)

**MATH F665**  
**Topics in Graduate Mathematics**  
3 Credits  
Offered As Demand Warrants  
Elective courses in graduate mathematics offered by faculty on a rotating basis. Topics may include, but are not limited to, graph theory, glaciology modeling, general relativity, mathematical biology, Galois theory and numerical linear algebra. May be repeated for credit with permission of instructor. (3+0)

---

**MECHANICAL ENGINEERING**

A per-semester fee for computing facilities will be assessed for one or more CEM courses. This fee is in addition to any materials fees.

**ME F302**  
**Dynamics of Machinery**  
4 Credits  
Offered Fall  
Kinematics and dynamics of mechanisms. Analysis of displacements, velocities, accelerations, and forces in linkages, cams and gear systems by analytical, experimental and computer methods. Design applications. **Prerequisites:** **ES F210. Prerequisite or Co-requisite: ES F301.** (3+3)

**ME F308**  
**Measurement and Instrumentation**  
3 Credits  
Offered Spring  
Measurement theory and concepts. Includes sensors, transducers and complete measurement systems; input, output and processing of engineering parameters; telemetry, data acquisition and logging, and virtual instrument systems. Special fees apply. **Prerequisites:** **ES F331.** (2+3)

**ME F313**  
**Mechanical Engineering Thermodynamics**  
3 Credits  
Offered Spring  
Continuation of ES F346 including power and refrigeration cycles (Rankine, Brayton, Otto, and Diesel), compressible flow (isentropic, shock waves, and flow in ducts with friction), combustion and gas vapor mixtures. **Prerequisites:** **ES F346.** (3+0)

**ME F321**  
**Industrial Processes**  
3 Credits  
Offered Fall  
Manufacturing processes used in modern industry. Primary and secondary manufacturing processes, casting, hot and cold forming, machining, welding and mass and efficient product design. Special fees apply. (2+3)

**ME F334**  
**Elements of Material Science/Engineering**  
3 Credits  
Offered Spring  
Properties of engineering materials. Crystal structure, defect structure, structure and properties, aspects of metal processing, heat treatment, joining, testing and failure analysis for engineering applications and design. Special fees apply. **Prerequisites:** **CHEM F106X and PHYS F212X.** (2+3)

**ME F402**  
**Advanced Mechanical System Design**  
3 Credits  
Offered As Demand Warrants  
Advanced analysis of two- and three-dimensional multi-body mechanical systems. Rigid body system formulation and deformable body system formulation. Application of CAE software for rigid body and large deformable body systems. **Prerequisites:** **ME F302; ME F408; or permission of instructor.** Stacked with ME F602. (3+0)

**ME F403**  
**Machine Design**  
3 Credits  
Offered Spring  
Analysis and design of machine components using failure theories. Strength, life, and reliability analysis. Study of design principles and selection procedures for standard machine components. Design project. **Prerequisites:** **ES F331.** (3+0)

**ME F405**  
**Computer Aided Design**  
3 Credits  
Offered Every Other Fall  
Introduction to principles of computer aided design and engineering. Applications of software and hardware in solid modeling, design analysis, motion analysis, rapid prototyping, and interface between computer aided design and computer aided manufacturing. Special fees apply. **Prerequisites:** **Senior standing or permission of instructor.** (1.5+4.5)

**ME F406**  
**Computer Aided Manufacturing**  
3 Credits  
Offered Every Other Spring  
Introduction to computer aided manufacturing (CAM). This includes the principles of computer aided process planning (CAPP) and an introduction to computer numerical control (CNC) tools used in manufacturing. Emphasis will be on methodology with hands-on applications of computer software and specific machine tools. **Prerequisites:** **ME F321; senior standing or instructor permission.** (1.5+4.5)

**ME F408**  
**Mechanical Vibrations**  
3 Credits  
Offered Fall  
Response of mechanical systems to internal and external forces. Free and forced vibration, random vibration. Discrete and continuous systems. Vibration parameter measurements and stability criteria. **Prerequisites:** **ES F201, ES F210, ES F301.** (2+2)

**ME F409**  
**Controls**  
3 Credits  
Offered Fall  
Analysis and design of control systems. Block diagrams, transfer functions and frequency analysis. Closed loop systems and system stability. Industrial controllers and system compensation. **Prerequisites:** **ES F201; ES F301.** (2+2)

**ME F414**  
**Heating, Ventilating and Air Conditioning Systems**  
3 Credits  
Offered Fall  
Introduction to the design of space conditioning systems. Moist air properties, building heating and cooling load, ventilating, air conditioning calculations. Fluids, pumps and piping designs. Fans and building air distribution. **Prerequisites:** **ES F341; ES F346.** (3+0)

**ME F415 W**  
**Thermal Systems Laboratory**  
3 Credits  
Offered Spring  
Testing and evaluation of components and energy systems such as pumps, fans, engines, heat exchangers, refrigerators and heating/power plants. Special fees apply. **Prerequisites:** **ENGL F111X; ES F341; ME F313; ME F441. Prerequisite or co-requisite: ME F308.** (1.5+4.5)

**ME F416**  
**Design of Mechanical Equipment for the Petroleum Industry®**  
3 Credits  
Offered Fall  
Design, selection and operation of equipment used in production and processing of crude oil and gas. Instrumentation and control systems used with mechanical equipment. **Prerequisites:** **ES F341; ES F346.** (3+0)

**ME F440**  
**Introduction to Microfluidics**  
3 Credits  
Offered Spring Odd-numbered Years  
Overview of basic concepts and principles of fluids at the micron scale; introduction to the design and fabrication of microfluidic devices. **Prerequisites:** **ES F341; PHYS F103X (for Math and non-Physics science major); PHYS F211X (for Engineering, Math and Physics major); junior standing or permission of instructor.** Stacked with ME F640. (3+0)

**ME F441**  
**Heat and Mass Transfer**  
3 Credits  
Offered Fall  
Fundamental concepts of heat and mass transfer including steady state and transient conduction, laminar and turbulent free and forced convection,
### ME 441
**Fluid Mechanics and Heat Transfer Characteristics of Nanofluids**

3 Credits  
Offered As Demand Warrants

**Prerequisites:** ES F301; ES F341; ES F346. (3+0)

### ME 442
**Theory of Flight**

3 Credits  
Offered Fall Even-numbered Years

Airfoil theory in subsonic flow. Performance, stability and control of aircraft. Aircraft design.  
**Prerequisites:** ES F341; ME F441; senior standing or permission of instructor. Stacked with ME F643. (3+0)

### ME 450
**Aerodynamics**

3 Credits  
Offered Spring Odd-numbered Years

Aerodynamics of non-lifting and lifting airfoils in incompressible irrotational flow, wings of finite span. The Navier-Stokes equations, boundary layers, numerical methods, supersonic and transonic flow past airfoils, rocket aerodynamics, rocket drag.  
**Prerequisites:** ES F301, ES F341, ES F346.  
**Prerequisite or co-requisite:** ME F313. (3+0)

### ME 451
**Propulsion Systems**

3 Credits  
Offered Spring Even-numbered Years

**Prerequisites:** ES F208 or ES F210; and MATH F302. (3+0)

### ME 452
**Introduction to Astrodynamics**

3 Credits  
Offered Fall Odd-numbered Years

Geometry of the solar system, detailed analysis of two-body dynamics and introduction to artificial satellite orbits; Hohmann transfer and patched conics for lunar and interplanetary trajectories. Elements of orbit determination.  
**Prerequisites:** ES F208 or ES F210; and MATH F302. (3+0)

### ME 453
**Energy and the Environment**

3 Credits  
Offered Fall Odd-numbered Years

Overview of basic concepts of energy supply, demand, production of heat and power impacts of energy use on the environment. Extensive discussion of mitigation technologies and strategies for meeting energy needs while preserving environmental quality.  
**Prerequisites:** CHEM F106X; ES F346 or equivalent; MATH F201X; PHYS F211X. Cross-listed with ENGL F458. (3+0)

### ME 454
**Corrosion Engineering**

3 Credits  
Offered Spring

Principles and forms of corrosion and factors that affect it. Methods of testing, measurement, control and prevention are examined.  
**Prerequisites:** ME F334. (3+0)

### ME 457
**Senior Design**

1 Credit  
Offered Fall

The course is focused on pursuing the design of a real or simulated project which is selected jointly by students, project advisors and/or the instructor. Emphasis will be on the design of practical engineering systems and/or components which integrate engineering knowledge and skills that students have acquired. The principles of design process will be introduced in lecture. Each design team is to generate design concepts, select the best concept and work towards completing a design.  
**Prerequisites:** COMM F131X or COMM F211X; senior standing. Prerequisite or co-requisite: ME F441; ME F403; or permission of instructor. (1+0)

### ME 458
**Design Project**

3 Credits  
Offered Spring

A real or simulated engineering design project selected jointly by student and instructor. Emphasis on design of practical mechanical engineering systems and/or components which integrate students’ engineering knowledge and skills.  
**Prerequisites:** COMM F131X or COMM F414X; ENGL F111X; ENGL F211X or ENGL F213X or permission of instructor; ME F441; ME F486; senior standing. Prerequisite or co-requisite: ME F403. (3+0)

### ME 461
**Finite Element Analysis in Engineering**

3 Credits  
Offered Every Third Semester

Formulation of the finite element method. Applications to problems of engineering in solid mechanics, fluid mechanics and heat transfer. Use and development of codes for computer solution of problems.  
**Prerequisites:** Graduate standing in engineering; ES F201; MATH F302 or equivalent. (3+0)

### ME 462
**Advanced Mechanical System Design**

3 Credits  
Offered As Demand Warrants

Advanced analysis of two- and three-dimensional multi-body mechanical systems. Rigid body system formulation and deformable body system formulation. Application of CAE software for rigid body and large deformable body systems.  
**Prerequisites:** ME F302; ME F408; or permission of instructor. Stacked with ME F402. (3+0)

### ME 463
**Advanced Mechanics of Materials**

3 Credits  
Offered Every Third Semester

Kinematics and kinetics of rigid bodies, introduction to analytical mechanics, Lagrange’s equations and Hamiltonian mechanics. Applications to engineering problems.  
**Prerequisites:** ES F210; MATH F302 or equivalent; graduate standing in engineering. (3+0)

### ME 464
**Advanced Vibrations**

3 Credits  
Offered Every Third Semester

Analysis of discrete and continuous vibrations via energy methods, free and forced response of linear systems, stability criteria, and introduction to random and nonlinear vibration. Applications to engineering problems.  
**Prerequisites:** MATH F302 or equivalent; ME F408; graduate standing in engineering. (3+0)

### ME 465
**Power Analysis**

3 Credits  
Offered As Demand Warrants

Fundamentals of power generation including piping, pumps and combustion, steam generators, condensers, deaerators, evaporators, feedwater treatment and heating, regeneration, fuel handling, heat balance, equipment, economics, and plant layout.  
**Prerequisites:** ME F313. (3+0)

### ME 466
**Advanced Materials Engineering**

3 Credits  
Offered Every Third Semester

Theories of elasticity and plasticity for small and large deformations. Applications to engineering problems.  
**Prerequisites:** ES F331 or equivalent; graduate standing in engineering. (3+0)

### ME 467
**Advanced Materials Engineering**

3 Credits  
Offered Every Third Semester

**Prerequisites:** ES F341.  
**Prerequisite or co-requisite:** ME F313. (3+0)

### ME 468
**Introduction to Microfluidics**

3 Credits  
Offered Spring Odd-numbered Years

Overview of basic concepts and principles of fluids at the micron scale; introduction to the design and fabrication of microfluidic devices.  
**Prerequisites:** ES F341; PHYS F103X (for Math and non-Physics science major); PHYS F211X (for Engineering, Math and Physics major); graduate standing or permission of instructor. Stacked with ME F440. (3+0)
### MECHANICAL ENGINEERING (ME) — MECHANICS-DIESEL/HEAVY EQUIPMENT (MECN)

<th>Course Code</th>
<th>Title</th>
<th>Credits</th>
<th>Prerequisites/Notes</th>
</tr>
</thead>
<tbody>
<tr>
<td>ME F641</td>
<td>Advanced Fluid Mechanics</td>
<td>3</td>
<td>Offered Every Third Semester. Introduction to viscous flows, laminar boundary layers, turbulent boundary layers, turbulent jets and wakes, applications to heat transfer and drag. Prerequisites: ES F341 or equivalent; graduate standing in engineering. (3+0)</td>
</tr>
<tr>
<td>ME F642</td>
<td>Advanced Heat Transfer</td>
<td>3</td>
<td>Offered Every Third Semester. Heat conduction in two and three dimensions under steady and transient conditions. Free and forced convection in internal and external flows. Radiation from black and gray surfaces and gas-filled enclosures. Both analytical and numerical methods are covered. Prerequisites: ME F441 or equivalent; graduate standing in engineering. (3+0)</td>
</tr>
<tr>
<td>ME F656</td>
<td>Space Systems Engineering</td>
<td>3</td>
<td>Offered As Demand Warrants. A multidisciplinary team of students will perform a preliminary design study of a major space system. Design considerations will include requirements for project management, spacecraft design, power, attitude control, thermal control, communications, computer control and data handling. The students will present their final design in a written report and a public seminar. Prerequisites: Graduate standing or permission of instructor. Cross-listed with EE F656. (3+0)</td>
</tr>
<tr>
<td>ME F658</td>
<td>Energy and the Environment</td>
<td>3</td>
<td>Offered Fall Odd-numbered Years. Basic concepts of energy supply, demand, production of heat and power impacts of energy use on the environment. Extensive discussion of mitigation technologies and strategies for meeting energy needs while preserving environmental quality. Recommended: CHEM F106X; ES F346 or equivalent; MATH F201X; PHYS F211X; graduate standing. Cross-listed with ENVE F658. (3+0)</td>
</tr>
<tr>
<td>ME F685</td>
<td>Arctic Heat and Mass Transfer</td>
<td>3</td>
<td>Offered As Demand Warrants. An introduction to the principles of heat and mass transfer with special emphasis on application to problems encountered in the Arctic such as ice and frost formation, permafrost, condensation and heat loss in structures. Prerequisites: graduate standing or permission of instructor. (3+0)</td>
</tr>
<tr>
<td>ME F687</td>
<td>Arctic Materials Engineering</td>
<td>3</td>
<td>Offered As Demand Warrants. A study of engineering material performance at low temperatures. Prerequisites: Graduate standing or permission of instructor. (3+0)</td>
</tr>
<tr>
<td>MECN F104</td>
<td>Mobile Equipment Maintenance</td>
<td>1</td>
<td>Technical, financial and legal aspects of mobile equipment maintenance. Students will work in groups to perform a maintenance operation and create maintenance records on a variety of vehicle types. (0.5+1)</td>
</tr>
<tr>
<td>MECN F112</td>
<td>Basic Auto Maintenance</td>
<td>1</td>
<td>Covers basic automobile system functions, owner maintenance of electrical, cooling and fuel systems, auto lubricants and fluids, tires and wheels, tune-ups, and cold weather maintenance and operation. For the person without mechanical experience. (1+0)</td>
</tr>
<tr>
<td>MECN F159</td>
<td>Manual Transmissions and Clutches</td>
<td>2</td>
<td>Two major areas of automotive maintenance and repair: inspection and replacement of common clutch types; and maintenance, inspection and overhaul of automotive manual transmissions. (1+2)</td>
</tr>
<tr>
<td>MECN F201</td>
<td>Advanced Automobile Equipment Electronics</td>
<td>2</td>
<td>Troubleshooting and repairing a wide range of electronic systems found in both light and heavy equipment including, but not limited to, load moment limiting, motor speed control, electronic control of hydraulic systems and electronic governors for power generation. (1+2)</td>
</tr>
<tr>
<td>MECN F202</td>
<td>Principles of Electric Drive Vehicles</td>
<td>2</td>
<td>In-depth study of batteries: design, construction, testing and charging, currents and maintenance. Knowledge applied to DC motors, electronic controls and electronic traction motor controls. The in-shop training discusses environmental impacts of electric drive vehicles. (2+0)</td>
</tr>
<tr>
<td>MECN F203</td>
<td>Basic Power Generations</td>
<td>3</td>
<td>Portable and stationary electric power generators and the relationship of magnetism, AC/DC currents, motors, generators, transformers and electrical distribution. Special fees apply. Recommended: AUTO F110. (2+2)</td>
</tr>
<tr>
<td>MECN F204</td>
<td>Basic Alternating Current Electrician Skills</td>
<td>2</td>
<td>Basic residential and commercial electrician skills; current theory and applications; electrical measurement and circuitry. (1+2)</td>
</tr>
<tr>
<td>MECN F205</td>
<td>Uninterruptible Power Supplies</td>
<td>1</td>
<td>Residential and commercial power supplies; troubleshooting batteries; electronic components; reading UPS schematics. (0.5+1)</td>
</tr>
<tr>
<td>MECN F206</td>
<td>Emergency Backup Power Generation</td>
<td>1</td>
<td>Language and fundamentals of electricity; circuitry; conductor types and sizes; writing methods; system requirements of power generation. (0.5+1)</td>
</tr>
<tr>
<td>MECN F207</td>
<td>Power Generation Governors</td>
<td>2</td>
<td>Mechanically and electrically controlled engines with emphasis on what is a governor and what is its function in power generation will be covered in the hands-on diagnostic training. (1+2)</td>
</tr>
<tr>
<td>MECN F208</td>
<td>Alternative Fuels</td>
<td>2</td>
<td>History of fuels with emphasis on the known alternative fuels: natural gas, methanol, ethanol and propane. A research project is required. (1+2)</td>
</tr>
<tr>
<td>MECN F210</td>
<td>Hydraulics</td>
<td>3</td>
<td>Offered Spring. Theory of fluid power and the components that make up a hydraulic system found on heavy equipment. Identification and description of hydraulic cylinders, motors, directional valves commonly found on heavy equipment. Includes testing of equipment and performing hydraulic pressure and flow tests. Special fees apply. Prerequisites: DSLT F101; DSLT F103; DSLT F105. (1+4)</td>

MILITARY SCIENCE (MILS) — MINERAL PREPARATION ENGINEERING (MPR)

COURSES

A per-semester fee for clothing, equipment and other safety items required to participate in mandatory Military Science labs. Lab fees apply only to the primary Military Science classes (MILS F101, F102, F201, F202, F301, F302, F401 and F402).

MILS F101 Foundations of Officership
2 Credits
Issues and competencies central to a commissioned officer's responsibilities. Presents a framework for understanding officership leadership and Army values. Addresses life skills including fitness and time management. Designed to encourage insight into the Army as a profession and the officer's role within the Army. (1+2)

MILS F102 Basic Leadership
2 Credits
Continuation of MILS F101. Focus on communications, leadership and problem solving. Life skills lessons include: problem solving, goal setting, interpersonal communication, and assertiveness. Lessons yield immediately useful skills. Provides accurate information about life in the Army, including the organization of the Army, employment benefits and work experiences of junior officers. (1+2)

MILS F201 Individual Leadership Studies (s)
3 Credits
Communication and leadership theory and application. Focus on critical life skills. Emphasis on relevance of life skills to future success in the Army. Includes a major leadership and problem solving case study which draws on virtually all of the instruction in MILS F101 and MILS F102. (2+2)

MILS F202 Leadership and Teamwork
3 Credits
Focus on officer leadership providing an extensive examination of the unique purpose, roles and obligations of commissioned officers. Includes a detailed look at the origin of our institutional values and their practical application in decision-making and leadership. Core focus is a capstone case study in officer leadership that traces the Army's successes and failures as it evolved from the Vietnam War to present, placing previous lessons on leadership and officer leadership in a real-world context that directly affects the future of cadets. Draws the various components of values, communications, decision-making, and leadership together to focus on a career as a commissioned officer. (2+2)

MILS F250 Leaders Training Course
3 Credits
A four-week camp in basic military skills and leadership experience in preparation for entrance into the advanced course. For students who did not take the basic course. Prerequisites: At least two years of schooling remaining upon completion of camp; admission by arrangement with professor of military science. (3+0)

MILS F301 W Leadership and Problem Solving
4 Credits
Challenges cadets to study, practice and evaluate adaptive leadership skills as they are presented with the demands of preparing for the ROTC Leadership Development Assessment Course (LDAC). Challenging scenarios related to small unit tactical operations are used to develop self-awareness and critical thinking skills. Cadets receive systematic and specific feedback on their leadership abilities. Cadets at the MSL III level begin to analyze and evaluate their own leadership values, attributes, skills and actions. Primary attention is given to preparation for LDAC and the development of leadership abilities. Prerequisites: ENGL F111X; ENGL F211X or ENGL F213X; junior standing in MILS; permission of instructor. (3+2)

MILS F302 O Leadership and Ethics
4 Credits
Offered Spring
Interdisciplinary study of effective leadership techniques and preparation for attendance in MILS F350. Laboratory sessions offer practical application of concepts taught in classroom sessions. Prerequisites: COMM F131X or COMM F141X; junior standing in MILS; permission of instructor. (3+2)

MILS F350 Leadership Development Assessment Course
3 Credits
Five-week course structured to assess and develop the leadership capabilities of the cadet by using a variety of situations in a military environment. Prerequisites: MILS F301; MILS F302; must be enrolled as an advanced course cadet; and have the recommendation of the Department Head. (3+0)

MILS F351 Cadet Troop Leadership Training
2 Credits
Three- to five-week full-time leadership training and development, serving in leadership positions with the active Army. Application of leadership and management principles in real life junior officer situations/positions. Prerequisites: MILS F101; MILS F350; must be enrolled as an advanced course cadet. (0+0)

MILS F401 Developmental Leadership (s)
4 Credits
Develops student proficiency in planning, executing and assessing complex operations, functioning as a member of a staff and providing leadership-performance feedback to subordinates. Students are given situational opportunities to assess risk, make ethical decisions and provide coaching to fellow ROTC students. MSL IV cadets are measured by their ability both to give and receive systematic and specific feedback on leadership abilities. Cadets at the MSL IV level analyze and evaluate the leadership values, attributes, skills and actions of MSL III cadets while simultaneously considering their own leadership skills. Attention is given to preparation for BOLC II and the development of leadership abilities. Prerequisites: Senior standing in MILS and permission of instructor. (3+2)

MILS F402 Officership
4 Credits
Continuation of MILS F401. Includes study of military ethics and law. Student role in laboratory sessions is to plan instruction and assess performance of MILS F100–F300-level students. Prerequisites: Senior standing in MILS and permission of instructor. (4+0)

MILS F442 History of the American Military (s)
3 Credits
The military's place in American life and society from the Colonial era to the present. Role of the military institution in shaping the nature of American society while reflecting the character of the society it serves. Prerequisites: Sophomore standing or permission of instructor. Cross-listed with HIST F442. (3+0)

MINERAL PREPARATION ENGINEERING

A per-semester student computing facility user fee is assessed for CEM engineering courses. This fee is in addition to any lab/material fees.

MPR F601 Froth Flotation
3 Credits
Offered Fall
Theory and application of bulk and differential froth flotation to metallic minerals, nonmetallic minerals and coal. Prerequisites: Admission by arrangement. (2+3)

MPR F606 Plant Design
3 Credits
Offered Fall Odd-numbered Years
Selection and design of equipment for the operation of mineral and coal beneficiation plants for specific custom and milling problems. Prerequisites: Admission by arrangement. (1+6)

MPR F611 Hydrometallurgy
3 Credits
Study of the theoretical and engineering aspects of the processes to recover metals from different types of ores and/or scrap, in which aqueous solutions play the predominat role. Prerequisites: MATH F202X; CHEM F331; or permission of instructor. (3+0)
MINERAL PREPARATION ENGINEERING (MPR) — MINING ENGINEERING (MIN)

MPR F612  Solution Concentration and Purification  3 Credits
The physical chemistry of reaction encountered in solution concentration and purification processes. The types of reaction discussed are cementation, solvent extraction, ion exchange and carbon absorption which are studied in terms of solution chemistry, reaction kinetics and mass transfer effects. Prerequisite: MATH F202X; CHEM F331; or permission of instructor. (3+0)

MPF F613  Waste Problems and Treatments  3 Credits
Waste problems and treatments encountered in mineral processing and metallurgical industries. Includes waste problems and treatments in gold, copper, zinc, iron and steelmaking, aluminum and non-metal industries as well as in electronic and electroplating industries. Prerequisite: Graduate standing or permission of instructor. (3+0)

MPR F684  Mineral Preparation Research  3 Credits
Basic research and its needs in the field of mineral beneficiation, including magnetic susceptibility, dielectric constants and electrical conductivity of minerals; chemical theory and mechanism of bubble contact in flotation; and the effect of ultrasonic vibration in unit processes. Prerequisite: Admission by arrangement. (1+6)

MPF F688  Graduate Seminar I  1 Credit
Preparation and presentation of research outlines by graduate students and participation in regularly organized mineral engineering department seminars. Prerequisite: Admission to graduate program. Cross-listed with MIN F688. (1+0)

MINING ENGINEERING

A per-semester student computing facility user fee is assessed for CEM engineering courses. This fee is in addition to any lab/material fees.

MIN F101  Minerals, Man and the Environment  3 Credits
A general survey of the impact of the mineral industries on man's economic, political and environmental systems. (3+0)

MIN F103  Introduction to Mining Engineering  1 Credit
Concepts and methods utilized in mining engineering and mining unit operations. (1+0)

MIN F104  Mining Safety and Operations Laboratory  1 Credit
Practical training at the Silver Fox Mine in mining operations and safety. Course complies with Mine Safety and Health Administration (MSHA) 40 hour new miner training. Special fees apply. (0+3)

MIN F202  Mine Surveying  3 Credits
Offered Fall
Surveying principles for surface and underground control of mining properties. Field and office procedures for preparation of maps and engineering data. Special fees apply. Prerequisites: MATH F107X, MATH F108 or equivalent. (2+3)

MIN F225  Quantitative Methods in Mining Engineering  2 Credits
Offered Fall
Introduction to ore reserve estimation, classical estimation methods and techniques, error in estimations and pitfalls, introduction to classical statistics, introduction to geostatistics, ordinary kriging, block kriging, modeling the sample variogram, co-kriging and global estimation. Prerequisite: MATH F200X or equivalent; or permission of instructor. (2+0)

MIN F226  Mine Development  2 Credits
Offered Spring
Review of pre-mining activities. Access to mining property, haul road location and design. Access to ore body; shaft, slope and ramp locations; shape, sizing and development. Development of access in frozen ground environments. Layout of development mains, cross-cuts, raises and winzes for ventilation, transport and optimum extraction of ore body. Level intervals, size and location of ore passes, design and optimization. Prerequisite: MIN F103; MIN F225; or permission of instructor. Recommended: MATH F200X. (2+0)

MIN F301  Mine Plant Design  3 Credits
Quantitative study and design of various systems and equipment used in haulage, hoisting, drainage, pumping and power (compressed air and electricity). Importance of the natural conditions and production level in the equipment selection procedure emphasized. Prerequisite: ES F208 and ES F307. Recommended: ES F341. (3+0)

MIN F302  Underground Mine Environmental Engineering  3 Credits
Analysis of underground mine ventilation systems, ventilation planning, design and engineering control, mine ventilation network. Special fees apply. Prerequisite: MIN F103; MIN F226; ES F341 (2+3)

MIN F313  Introduction to Mineral Preparation  3 Credits
Offered Fall Odd-numbered Years
Elementary theory and principles of unit processes of liberation, concentration and solid-fluid separation as applied to mineral beneficiations. Special fees apply. Prerequisite: Junior standing or permission of instructor. (2+3)

MIN F370  Rock Mechanics  3 Credits
Physical and mechanical properties of rock; rock mass classification systems; stress distribution in the vicinity of mining openings, design criteria and support for structures in rock mass, instrumentation and monitoring of opening's stability as well as strata control and surface subsidence. Special fees apply. Co-requisite: ES F331. (2+3)

MIN F380  Computer Aided Orebody Modeling  1 Credit
Offered Fall
Develops a orebody model from drillhole data in a computer aided design environment. The data is converted into a drillhole database, following which, a 3D visual model is developed. Basic tools covered include concepts of computer aided design, database error checking and triangulation. Prerequisite: GEOS F332; or permission of instructor. (2+3)

MIN F401  Mine Site Field Trips  1 Credit
Field trips to active surface and underground mines to gain perceptual knowledge of modern mining systems by observation. Includes a systematic summarization and analysis of the mine after each visit to gain an in-depth understanding of mining engineering principles. Graded Pass/Fail. Prerequisites: MIN F202; MIN F301; MIN F302; MIN F370. (0.5+3)

MIN F407 W  Mine Reclamation and Environmental Management  3 Credits
Offered Fall Even-numbered Years
Principles and practices of mine reclamation and waste disposal. Pre-mining assessments and plans. Design of settling and tailing ponds and waste impoundments. Stream bed restoration and revegetation. Prerequisite: CHEM F106X; ENGL F111X; ENGL F211X or ENGL F213X or permission of instructor. Recommended: ES F341. (3+0)

MIN F408 O  Mineral Valuation and Economics  3 Credits
Introduction to engineering economics, ore sampling and reserve calculations, and mine feasibility studies. Prerequisite: COMM F131X or COMM F141X; GE F375 or MIN F301. (3+0)
MIN F409 - Operations Research and Computer Applications in Mineral Industry  
3 Credits  
Fundamental concepts of probability and statistics and the use of operations research and computer techniques for understanding, analysis, forecasting and optimization of mining operations and systems. Prerequisites: MIN F225; MIN F454 or equivalent; or permission of instructor. (3+0)

MIN F415 - Coal Preparation  
3 Credits  
Unit operations, flowsheets, washability characteristics and control by sink-float methods for coal preparation plants. Market requirements and economics of preparation. Prerequisites: MIN F313 or graduate standing. (2+3)

MIN F443 - Principles and Applications of Industrial Explosives  
3 Credits  
Types and properties of industrial explosives; systems of initiation; theories of blasting; designs of open pit bench blasting; designs of underground blasting/rounds; applications in mining, civil construction and other fields; blasting vibration, structural damage and their control; overbreak control; safe practices; safety regulations; blast hole drilling and drilling equipment. Prerequisites: MIN F370 or permission of instructor. (3+0)

MIN F454 - Underground Mining Methods  
3 Credits  
Underground mining methods for coal and non-coal deposits. Includes design parameters, selection of mining methods, mine planning process, auxiliary operations and various underground mining methods. Prerequisites: MIN F301; MIN F302; MIN F370. (3+0)

MIN F482 - Computer-Aided Mine Design — VULCAN  
3 Credits  
Offered Fall  
Familiarization with VULCAN mine design software to store, manage, model and display exploration data. Estimate volume, tonnage and quality of reserve, design declines and development drives in underground and surface coal and hardrock mines, design underground and surface coal mine plans and design of underground stopes, perform underground and surface grade control. Prerequisites: Junior, senior or graduate standing in Mining Engineering, Geological Engineering, or permission of instructor. Stacked with MIN F682. (2+3)

MIN F484 - Surface Mining Methods  
2 Credits  
Offered Spring Even-numbered Years  
Modern methods of surface mine design. Strip and open pit optimization techniques. Production planning and scheduling. Use of mine design software. Prerequisites: MIN F225; MIN F226; Junior or senior standing in mining engineering or permission of instructor. (2+0)

MIN F485 - Mining Engineering Exit Exam  
0 Credits  
An Exit interview will be conducted to obtain feedback on the program. Graded Pass/Fail. Prerequisites: Senior standing in mining engineering. (0+0)

MIN F489 - Mining Design Project I  
1 Credit  
Offered Fall  
This course is a pre-cursor to MIN F490. The student is expected to meet with the instructor to finalize the senior design project topic, lay out a project plan, gather data and prepare as necessary for the successful execution of the project in MIN F490. Note: Both MIN F489 and MIN F490 must be completed to fulfill the writing intensive requirement. Prerequisites: ENGL F111X; ENGL F211X or ENGL F213X or permission of instructor; MIN F301; MIN F302; MIN F370. (1+0)

MIN F490 W - Mining Design Project II  
2 Credits  
Offered Spring  
Design of mine layout including extraction and beneficiation, and economic evaluation of a mining project. A comprehensive written report of the design and analysis is required. Note: Both MIN F489 and MIN F490 must be completed to fulfill the writing intensive requirement. Prerequisites: ENGL F111X; ENGL F211X or ENGL F213X or permission of instructor; MIN F301; MIN F302; MIN F370; MIN F443; MIN F454; MIN F489. (1+4)

MIN F601 - Application of Artificial Neural Networks  
3 Credits  
Basic neural network architectures, including rules, training methods and practical applications. Training and application issues typical of earth sciences problems. Some topics require mathematical analysis. Genetic algorithms and use of network ensembles will be briefly presented. Prerequisites: Graduate standing in engineering; programming ability; knowledge of MATLAB, a plus. Recommended: MATH F202X, MATH F314; MIN F408; MIN F635. (3+0)

MIN F621 - Advanced Mineral Economics  
3 Credits  
Introduction to options valuation of mineral projects; uncertainty and risk in mineral valuations; stochastic price models; dynamic programming and investment analysis; real options techniques. Prerequisites: Admission by arrangement. (3+0)

MIN F631 - Research Methods in Mineral Engineering  
4 Credits  
Research methods including problem definition and statement, designing experiments, collecting and interpreting data. Methods of theoretical and experimental analysis will be reviewed and examples given. Prerequisites: Graduate standing or permission of instructor. (3+3)

MIN F635 - Geostatistical Ore Reserve Estimation  
3 Credits  
Offered Spring  
Introduction to the theory and application of geostatistics. Review of classical statistics, continuous and discrete distributions, hypothesis testing and global estimation. Presentation of fundamental geostatistical concepts including: variogram, estimation variance, block variance, kriging, geostatistical simulation. Emphasis on the practical application of geostatistical techniques. Prerequisites: MIN F408 or equivalent; graduate standing; or permission of instructor. Cross-listed with GE F635. (2+3)

MIN F637 - Mine Systems Simulation  
3 Credits  
Application of computer simulation to the analysis of static and dynamic mine systems and the development of useful programs for mine operators. Design of simulation experiments in mining engineering. Prerequisites: MIN F409 or equivalent; graduate standing. (2+3)

MIN F652 - Numerical Methods in Mine Ventilation  
3 Credits  
Offered Fall  
Differencing schemes for the partial differential equations of flow in mine networks, typical boundary conditions for mine ventilation systems, computer-aided solution techniques. Application to flow of fluids through porous media is covered. Prerequisites: MIN F302 or equivalent; graduate standing. (2+3)

MIN F673 - Advanced Rock Mechanics  
3 Credits  
The study of theoretical and experimental methods in rock mechanics. State of stress and potential failure zone around two- and three-dimensional structures in rock based on theoretical, numerical and experimental techniques and failure criteria are presented. Prerequisites: MIN F370 or equivalent or graduate standing. (2+3)

MIN F674 - Advanced Ground Control  
3 Credits  
A study of current rock mechanic problems related to advances in mining and construction technologies. Particular emphasis on the importance of rock and frozen ground properties and stress evaluation in designing and monitoring stability of structures for gas, oil and radioactive materials storage, geothermal energy recovery, solution mining, and those exposed to rock outbursts and earthquakes. Rock and frozen ground properties related to other dynamic loading conditions, such as in blasting, are also discussed. Prerequisites: MIN F370 or equivalent or permission of instructor. (0+0)
**MUSEUM RESEARCH APPRENTICESHIP PROGRAM**

MRAP F288  Museum Research Apprentice I  1–2 Credits  Offered Fall and Spring
Provides opportunities for undergraduate student research or scholarship in museum-based subjects not available in typical undergraduate courses. Students are required to perform research tasks associated with specimens or objects and their associated data and to turn in a final report. Opportunities range across several museum-based disciplines (archaeology, botany, earth science, entomology, ethnology and history, film, fine art, ichthyology, mammalogy, informal science education, and ornithology). Course may be repeated. Graded Pass/Fail. Prerequisite: Instructor permission. Student must contact a potential mentor before enrolling to determine whether matching opportunities exist. (0-1+0+3-6)

MRAP F488  Museum Research Apprentice II  1–2 Credits  Offered Fall and Spring
Provides opportunities for advanced undergraduate student research or scholarship in museum-based subjects not available in typical undergraduate courses, building upon prior experience. Students are required to perform tasks associated with specimens, objects, and associated data and to turn in a final report. Opportunities range across several museum-based disciplines (archaeology, botany, earth science, entomology, ethnology and history, film, fine art, ichthyology, mammalogy, informal science education, and ornithology). Course repeatable to a maximum of 12 credits. Graded Pass/Fail. Prerequisite: Permission of instructor. Student must contact potential mentor before enrolling to determine whether experience is sufficient and matching opportunities exist. (0-1+0+3-6)

**MUSIC**

MUS F101  University Chorus (h)
1 Credit  A chorus serving both beginning and skilled singers presenting concerts each semester of popular and classic choral literature. (0+3)

MUS F103  Music Fundamentals (h)
3 Credits  An introductory study of the language of music. Includes basic notation, melodic and rhythmic writing, scales, bass and treble clefs, and basic harmony. (3+0)

MUS F105  UAF Steel Drum Ensemble (h)
1 Credit  Performance class designed to prepare performances of soca, calypso, and reggae music from the Caribbean Islands, as well as Latin style music. Ensemble includes percussion and a few other supporting instruments. May be repeated for credit. Prerequisites: Ability to sight-read music; permission of instructor. Recommended: MUS F103. (0+3)

MUS F117  Northern Lights String Orchestra (h)
1 Credit  Explore literature written primarily for string orchestra. Periodically, winds and percussion will join for performances of literature requiring additional instruments. Works studied vary from semester to semester depending on the instrumentation of those enrolled in the course. May be repeated for credit. Prerequisites: Previous instruction on a bowed string instrument; permission of instructor. (0+3)

MUS F122  History of Popular Music (h)
3 Credits  The development of American popular music from ragtime to rock to rap: its styles, artists, cultural origins, social symbolism and influence worldwide. How popular music in each decade reflects the social ethos of the times, expresses youth attitudes and mirrors lifestyle. An examination of music’s function in society. (3+0)

MUS F124  Music in World Cultures (h)
3 Credits  A survey of traditional and folk music around the world, with an emphasis on Oriental and African music. Examines different uses of music in various societies, and includes demonstration of ethnic musical instruments. (3+0)

MUS F125  Enjoying Jazz (h)
2 Credits  An overview of the jazz idiom. Learning about the performers, styles and the music by using records, CDs, cassettes and video tapes. A listening intensive course that should provide students with a better understanding of this art form and the significant styles and artists in it. (2+0)

MUS F131  Basic Music Theory I (h)
3 Credits  Offered Fall
Intensive training in aspects of tonal harmony. Emphasis on acquiring skills in identification and notation of pitch, rhythm, scale, key, with introduction to principles of chord functions and techniques of harmonization. Prerequisites: Music majors must be concurrently enrolled in MUS F133. (3+0)

MUS F132  Basic Music Theory II (h)
3 Credits  Offered Spring
Emphasis on developing skills in voice leading, part writing and acquiring techniques for analysis of tonal harmony and musical form. Prerequisites: MUS F131 or equivalent. Music majors must be concurrently enrolled in MUS F134. (3+0)

MUS F133  Basic Ear Training I (h)
2 Credits  Offered Fall
This course is an intensive training in aural skills acquisition, including an introduction to solfège, sight reading, and rhythmic and melodic dictation. Includes computer-assisted instruction. Prerequisites: Music majors must be concurrently enrolled in or have completed MUS F131. (2+0)

MUS F134  Basic Ear Training II (h)
2 Credits  Offered Spring
This course emphasizes aural skills acquisition, with further development of skills in sight reading rhythmic, melodic and harmonic dictation. Includes computer-assisted instruction. Prerequisites: MUS F133 or equivalent; music majors must be concurrently enrolled in or have completed MUS F132. (2+0)

MUS F151  Class Lesson (h)
1 Credit  Class instruction in piano, voice, orchestral instrument or guitar. May be repeated for credit. Course may not be audited. Special fees apply. (0+3)
MUSIC (MUS)

MUS F152  Functional Piano I (h) 1 Credit
Offered Fall
Emphasis on beginning keyboard performance skills, sight-reading, harmonization and transposition. Course may not be audited. Special fees apply. Prerequisites: MUS F131 or equivalent, or concurrent enrollment. For music majors only with permission of instructor required. (1+0)

MUS F153  Functional Piano II (h) 1 Credit
Offered Fall
Emphasis on intermediate keyboard performance skills, sight-reading, harmonization and transposition. Course may not be audited. Special fees apply. Prerequisites: MUS F152; for music majors only; permission of instructor required. (1+0)

MUS F154  Functional Piano III (h) 1 Credit
Offered Fall
Emphasis on upper-intermediate keyboard performance skills, sight-reading, harmonization and transposition. Course may not be audited. Special fees apply. Prerequisites: MUS F153; for music majors only; permission of instructor required. (1+0)

MUS F161  Private Lessons (h) 2 Credits
Private instruction in piano, organ, voice, guitar, orchestral and band instruments. Private instruction shall consist of one private lesson per week. Music performance majors must enroll for 4 credits for MUS F361–F462 levels of study. All other students will normally enroll for 2 credits, except where special permission is granted. Special fees apply. Prerequisites: Admission by audition. Special permission required. Note: Course may not be audited. Credit-No Credit grading not permitted. Concurrent enrollment in MUS F190: Recital Attendance required. (2+0)

MUS F162  Private Lessons (h) 2 Credits
Private instruction in piano, organ, voice, guitar, orchestral and band instruments. Private instruction shall consist of one private lesson per week. Music performance majors must enroll for 4 credits for MUS F361–F462 levels of study. All other students will normally enroll for 2 credits, except where special permission is granted. Special fees apply. Prerequisites: Admission by audition. Special permission required. Note: Course may not be audited. Credit-No Credit grading not permitted. Concurrent enrollment in MUS F190: Recital Attendance required. (2+0)

MUS F190  Recital Attendance 0 Credits
Recital and concert attendance. Graded Pass/Fail. (1+0)

MUS F200X  Aesthetic Appreciation: Interrelation of Art, Drama, and Music (h) 3 Credits
Understanding and appreciation of art, drama, and music through an exploration of their relationship. Topics include the creative process, structure, cultural application and diversity, the role of the artist in society, and popular movements and trends. Prerequisites: Placement in ENGL F111X or higher; sophomore standing; or permission of instructor. Cross-listed with ART F200X; THR F200X. (3+0)

MUS F203  Fairbanks Symphony Orchestra (h) 1 Credit
May be repeated for credit. Prerequisites: Admission by audition. (0+3)

MUS F205  Wind Ensemble (h) 1 Credit
May be repeated for credit. Prerequisites: Admission by audition. (0+3)

MUS F207  UAF Jazz Band (h) 1 Credit
A performance ensemble that performs a feature concert each semester and tours frequently within the state and occasionally outside the state. May be repeated for credit. Prerequisites: Audition and permission of instructor. Course may not be audited. (0+3)

MUS F211  Choir of the North (h) 1 Credit
A mixed choir serving more advanced singers presenting concerts of more advanced choral music literature. May be repeated for credit. Prerequisites: Admission by audition. (0+3)

MUS F221  History of Music (h) 3 Credits
Music before 1750. Prerequisites: MUS F131; MUS F132; or permission of instructor. (3+0)

MUS F222  History of Music (h) 3 Credits
Music since 1750. Prerequisites: MUS F131; MUS F132; or permission of instructor. (3+0)

MUS F223  Alaska Native Music (h) 3 Credits
Emphasis on the sound, effect and purpose unique to each and the collection methods, analysis and the development of a broad musical perspective. Cross-listed with ANS F223. (3+0)

MUS F231  Advanced Music Theory I (h) 2 Credits
Offered Fall
This course is an intensive study of chromatic harmony and its functions in tonal music, with an introduction to musical form. The course emphasizes analytical techniques and score study. Prerequisites: MUS F132 or equivalent; music majors must be concurrently enrolled or have completed MUS F233. (2+0)

MUS F232  Advanced Music Theory II (h) 2 Credits
Offered Spring
This course has an emphasis on chromatic harmony and its functions in music of the late 19th and early 20th centuries. Includes an introduction to techniques and concepts in post-tonal music. Prerequisites: MUS F231 or equivalent; music majors must be concurrently enrolled in or have completed MUS F234. (2+0)

MUS F233  Advanced Ear Training I 1 Credit
Offered Fall
This course emphasizes aural skills acquisition with advanced techniques in aural perception, sight reading, dictation and chromatic materials. Includes computer-assisted instruction. Prerequisites: MUS F134; music majors must be concurrently enrolled in or have completed MUS F231. (1+0)

MUS F234  Advanced Ear Training II 1 Credit
Offered Spring
This course emphasizes aural skills acquisition, with further development of advanced techniques involving chromaticism, rhythms, modality, sight reading and dictation. Includes computer-assisted instruction. Prerequisites: MUS F233; music majors must be concurrently enrolled in or have completed MUS F232. (1+0)

MUS F245  Singer’s Diction I: English and Italian (h) 2 Credits
A systematic approach for singers through use of the International Phonetic Alphabet for the transcription and pronunciation of song texts in English and Italian. A singer’s diction course would be valuable to radio announcers or anyone needing rules of pronunciation for names, titles, phrases, etc. in foreign languages. Recommended: One year of private voice lessons. (2+0)

MUS F246  Singer’s Diction II: French and German (h) 2 Credits
A systematic approach for singers through use of the International Phonetic Alphabet for the transcription and pronunciation of song texts in French and German. A singer’s diction course would be valuable to radio announcers or anyone needing rules of pronunciation for names, titles, phrases, etc. in foreign languages. Recommended: One year of private voice lessons. (2+0)
MUS F253  Piano Proficiency
0 Credits
Final phase of piano proficiency examination. Graded Pass/Fail. Prerequisites: MUS F153; music major; permission of instructor. (0+1)

MUS F261  Private Lessons (h)
2 Credits
Private instruction in piano, organ, voice, guitar, orchestral and band instruments. Private instruction shall consist of one private lesson per week. Music performance majors must enroll for 4 credits for MUS F361–F462 levels of study. All other students will normally enroll for 2 credits, except where special permission is granted. Special fees apply. Prerequisites: Admission by audition. Special permission required. Note: Course may not be audited. Credit-No Credit grading not permitted. Concurrent enrollment in MUS F190: Recital Attendance required. (2+0)

MUS F262  Private Lessons (h)
2 Credits
Private instruction in piano, organ, voice, guitar, orchestral and band instruments. Private instruction shall consist of one private lesson per week. Music performance majors must enroll for 4 credits for MUS F361–F462 levels of study. All other students will normally enroll for 2 credits, except where special permission is granted. Special fees apply. Prerequisites: Admission by audition. Special permission required. Note: Course may not be audited. Credit-No Credit grading not permitted. Concurrent enrollment in MUS F190: Recital Attendance required. (2+0)

MUS F307  Chamber Music (h)
1 Credit
String, brass or woodwind chamber music; piano chamber music and accompanying; stage band; and Alaska Camerata. Note: Course may not be audited. Prerequisites: Permission of instructor. (0+3)

MUS F313  Opera Workshop (h)
1–3 Credits
(0+3–9)

MUS F317  Arctic Chamber Orchestra (h)
1 Credit
The touring group of the Fairbanks Symphony Orchestra. Must be a member of the Fairbanks Symphony Orchestra. (MUS F203-EV1). Prerequisites: By audition only. (0+3)

MUS F331  Form and Analysis (h)
3 Credits
Offered Spring, As Demand Warrants
This course emphasizes score study, analytical techniques and critical listening skills as applied to small and large forms in works from various musical genres and style periods. Prerequisites: MUS F232 or permission of instructor. (3+0)

MUS F332  Introduction to Computer-based Music Technology (h)
3 Credits
An introduction to personal computer-based software and music synthesis hardware to enable the student to print music scores and/or develop MIDI format sequencer files. May be repeated for credit. Prerequisites: MUS F232 or equivalent or permission of instructor. Recommended: MUS F432. (3+0)

MUS F351 O  Conducting (h)
3 Credits
Principles of conducting; interpretation of vocal and instrumental ensemble music. Prerequisites: COMM F131X or COMM F141X; MUS F232. (3+0)

MUS F361  Private Lessons (h)
2 or 4 Credits
Private instruction in piano, organ, voice, guitar, orchestral and band instruments. Private instruction shall consist of one private lesson per week. Music performance majors must enroll for 4 credits for MUS F361–F462 levels of study. All other students will normally enroll for 2 credits, except where special permission is granted. Special fees apply. Prerequisites: Admission by audition. Special permission required. Note: Course may not be audited. Credit-No Credit grading not permitted. Concurrent enrollment in MUS F190: Recital Attendance required. (2 or 4+0)

MUS F362  Private Lessons (h)
2 or 4 Credits
Private instruction in piano, organ, voice, guitar, orchestral and band instruments. Private instruction shall consist of one private lesson per week. Music performance majors must enroll for 4 credits for MUS F361–F462 levels of study. All other students will normally enroll for 2 credits, except where special permission is granted. Special fees apply. Prerequisites: Admission by audition. Special permission required. Note: Course may not be audited. Credit-No Credit grading not permitted. Concurrent enrollment in MUS F190: Recital Attendance required. (2 or 4+0)

MUS F390  Junior Recital
0 Credits
Half-length solo music performance recital. Graded Pass/Fail. Prerequisites: MUS F262 or equivalent; music major; junior standing in music study; permission of instructor. (0+0)

MUS F410 W  Women in Music History (h)
3 Credits
Lives and works of female musicians, composers and performers will be traced from the earliest days of the ancient and mythological periods through the medieval, Baroque, Classical and Romantic periods with special emphasis on composers of the 20th-century. Prerequisites: ENGL F111X; ENGL F211X or ENGL F213X; junior standing; or permission of instructor. Cross-listed with SGS F410. (3+0)

MUS F421 W  Music before 1620 (h)
3 Credits
Music from its origins in Greek antiquity through the Middle Ages and the Renaissance up to and including the emergence of opera at the turn of the 17th-century. Includes study of prominent composers, early musical forms, original sources in translation, development of musical notation and development of early musical instruments. Prerequisites: ENGL F111X; ENGL F211X or ENGL F213X; MUS F221; MUS F222; or permission of instructor. (3+0)

MUS F422 W  Music in the 17th and 18th Centuries (h)
3 Credits
Style and performance practices of opera, oratorio, cantata, sonata and concerto, as well as chamber music. Development of keyboard instruments as well as other instrumental genres: strings, winds and brasses. Style study of representative works from early Baroque composers through Bach, Handel, Bach’s sons, Haydn, Mozart, Beethoven and others. Musical developments in Italy, England, France, Germany, Austria and cross-cultural influences. Prerequisites: ENGL F111X; ENGL F211X or ENGL F213X; MUS F221; MUS F222; or permission of instructor. (3+0)

MUS F423 W  Music of the 19th Century (h)
3 Credits
Musical trends in the 19th century. Romanticism, nationalism, Italian opera and Wagnerian music drama, as exemplified by representative works, chosen from the music of Weber, Berlioz, Mendelssohn, Schumann, Brahms, Wagner, Chopin, Tchaikovsky and others. Related readings in other aspects of the Romantic movement. Prerequisites: ENGL F111X; ENGL F211X or ENGL F213X; MUS F221 or MUS F222; or permission of instructor. (3+0)

MUS F424 W  Music since 1900 (h)
3 Credits
Study of significant works of the modern repertoire, beginning with the later works of Strauss and continuing to the music of Stravinsky, the Expressionists, the Neoclassicists, Bartók, the Minimalists, and more recent developments. Prerequisites: ENGL F111X; ENGL F211X or ENGL F213X; MUS F221 or MUS F222; or permission of instructor. (3+0)

MUS F426  Music Literature (h)
2 Credits
Music literature of brass, strings, keyboard, voice or winds, on a rotating basis as announced for the semester of offering. Course may be repeated
four times for a total of 10 credits. Prerequisites: MUS F261 or equivalent; or permission of instructor. Recommended: MUS F221; MUS F222, and one course from the MUS F421–F424 Period Music History course sequence. (2+0)

MUS F431 Counterpoint (h) 3 Credits Offered Fall, As Demand Warrants This course emphasizes score study, composition exercises and techniques for the analysis of contrapuntal practices prevalent in music of the late baroque era. Prerequisite: MUS F232 or permission of instructor. (3+0)

MUS F432 Orchestration and Arranging (h) 3 Credits Offered Fall, As Demand Warrants This course has an emphasis on acquisition of techniques used in arranging and orchestrating music for a variety of instrumental and vocal ensembles. Includes score study, listening exercises and composition exercises. Prerequisite: MUS F232 or permission of instructor. Recommended: MUS F390; graduate standing; and permission of instructor. (1+0)

MUS F433 Seminar in Musical Composition (h) 2–3 Credits Development of compositional skills based upon the works of predominantly 20th-century composers. May be repeated for credit. Prerequisites: MUS F232 or equivalent; permission of instructor. (2-3+0)

MUS F434 Advanced Harmonic Analysis (h) 3 Credits This course emphasizes advanced score study analytical techniques in the study of tonal music from the baroque, classical, romantic and early 20th-century periods. Prerequisites: MUS F232 or permission of instructor. (3+0)

MUS F435 Private Lessons in Music Composition (h) 2–4 Credits Offered As Demand Warrants Private instruction in advanced music composition consisting of one private lesson per week. Repeatable for credit. Prerequisites: MUS F433 or equivalent; permission of instructor. Course may not be audited. (1-2+3)

MUS F461 Private Lessons (h) 2 or 4 Credits Private instruction in piano, organ, voice, guitar, orchestral and band instruments. Private instruction shall consist of one private lesson per week. Music performance majors must enroll for 4 credits for MUS F361–F462 levels of study. All other students will normally enroll for 2 credits, except where special permission is granted. See accompanying box for private lesson fees. Special fees apply. Prerequisite: Admission by audition. Special permission required. Note: Course may not be audited. Credit-No Credit grading not permitted. Concurrent enrollment in MUS F190: Recital Attendance required. (2 or 4+0)

MUS F462 Private Lessons (h) 2 or 4 Credits Private instruction in piano, organ, voice, guitar, orchestral and band instruments. Private instruction shall consist of one private lesson per week. Music performance majors must enroll for 4 credits for MUS F361–F462 levels of study. All other students will normally enroll for 2 credits, except where special permission is granted. Special fees apply. Prerequisite: Admission by audition. Special permission required. Note: Course may not be audited. Credit-No Credit grading not permitted. Concurrent enrollment in MUS F190: Recital Attendance required. (2 or 4+0)

MUS F490 Senior Recital 0 Credits Full length music solo recital. Graded Pass/Fail. Prerequisites: MUS F362 or equivalent; MUS F390 or equivalent; music major; senior standing in music study; permission of instructor. (0+0)

MUS F601 Introduction to Graduate Study 2 Credits Offered Spring Students will gain experience with materials, techniques bibliographic sources and procedures for conducting scholarly research and writing music. Prerequisites: Graduate standing and permission of the instructor. (2+0)

MUS F606 Advanced Chamber Music 1 Credit Offered Fall and Spring Emphasizing advanced performance skills and experience in ensemble settings, including string, woodwind, brass, vocal chamber music, piano chamber music and accompanying. Course may not be audited. Prerequisites: MUS F307; graduate standing; and permission of instructor. (1+0)

MUS F625 Topics in Music History 3 Credits Detailed study of selected topics in music history and/or literature. Specific topic to be announced in advance of course offering. (3+0)

MUS F626 Advanced Music Literature 2 Credits Advanced music literature of brass, strings, keyboard, voice or winds, on a rotating basis as announced each semester. Course may be repeated up to four times for a total of 10 credits. Prerequisites: MUS F461 or equivalent, or permission of instructor. Recommended: MUS F221; MUS F222; and/or courses from the MUS F421–F424 sequence. (2+0)

MUS F631 Seminar in Music Theory: History and Pedagogy 3 Credits Historical development of music theory and music theory pedagogy (current teaching practices and survey of available teaching materials). Prerequisites: Permission of instructor. (3+0)

MUS F632 Topics in Music Theory 3 Credits Offered Spring A detailed study of selected topics in music theory, including aspects of common-practice harmony, musical form, techniques for analysis, and historical perspectives on the evolution of theory concepts and constructs. Prerequisites: Graduate standing and permission of the instructor. (3+0)

MUS F635 Graduate Private Lessons in Composition 2–4 Credits Private instruction in advanced music composition consisting of one private lesson per week. Repeatable for credit. Prerequisites: Graduate standing; MUS F433 or equivalent; audition; permission of instructor. Course may not be audited. Recommended: Familiarity with computer-assisted music score preparation software. (1-2+3)

MUS F661 Advanced Private Lessons 2 or 4 Credits Private instruction in piano, voice, or orchestral instruments consisting of one private lesson per week. Repeatable for credit. Course may not be audited. Special fees apply. Prerequisites: Special permission required. Graduate standing; MUS F462 or equivalent; audition. (2 or 4+0)

MUS F690 Graduate Recital 0 Credits Full length solo performance recital. Graded Pass/Fail. Prerequisites: MUS F490 or equivalent; graduate standing in applied music study; permission of instructor. (0+0)

MUSIC EDUCATION

MUED F110 Becoming a Music Teacher in the 21st Century 2 Credits Introduction and exploration of the profession of music education. Focus on national educational policies and practices in education and music education. Opportunities for interaction with Alaska teachers, student teachers and students in the music education program. Prerequisites: ENGL F111X. (2+0)

MUED F201 Introduction to Music Education 2 Credits Introduction to professional education with special emphasis on music education as practiced at the elementary, middle school and high school levels.
NATURAL RESOURCES MANAGEMENT

NRM F101 Natural Resources Conservation and Policy 3 Credits Offered Fall Conservation of natural resources including history, ecological and social foundations. Examines principles of sustained yield, carrying capacity, supply and demand, and world population growth as applied to agriculture, range, forest, wildlife, fisheries, recreation, minerals and energy management. A wide range of perspectives is presented to help students develop a personal philosophy toward natural resources. Prepare a multiple resource observation plan for an undeveloped area on campus. Optional all-day field trips take place the first two Saturdays of the semester. Prerequisites: Placement in ENGL F111X. (3+0)

NRM F102 Practicum in Natural Resources Management 1–2 Credits Practical experience in natural resources management. Supervised individual study on a farm, in a greenhouse, managed forest, agency or business, or another approved location. Graded Pass/Fail. Prerequisites: Natural Resource Management majors only and permission of instructor. (1-2+0)

NRM F106 Orientation to Natural Resource Management 1 Credit Offered Spring Overview of career opportunities in natural resources. Includes discussions with research faculty and upper class students involved in various aspects of resource management issues. Graded Pass/Fail. (1+0)

NRM F111 Introduction to Sustainability Science 3 Credits Offered Spring Sustaining the health, wellbeing, and productivity of social-ecological systems requires integrated assessments of social, economic, and ecological sustainability challenges. Meeting these challenges often requires action plans that move from understanding theory to the implementation of new policies and facilitation of behavioral change. This course introduces the principles that form the basis of sustainability science, with an emphasis on natural resource management issues. Prerequisite: NRM F101; placement in ENGL F111X. (3+0)

NRM F150 Plant Propagation I: Seeds and Seed Germination 1 Credit Prerequisites: ENGL F111X; ENGL F211X or ENGL F213X; permission of instructor. (2+3)

NRM F151 Plant Propagation II: Vegetative Propagation 1 Credit Prerequisites: High school course in biology. (1+0)

NRM F152 Plant Propagation Practicum 1 Credit Methods of plant propagation useful in horticulture, botany, forestry, agronomy, revegetation and land reclamation projects and plant research. The practicum will emphasize hands on applications of propagation methods for commercial, educational and research applications. Emphasis will include horticultural seed production, landscape seeding and restoration practices, intermittent mist propagation systems, spore propagation and commercial micro-propagation (tissue culture). Prerequisites: NRM F150 and F151. (0+0+3)

NRM F161 Wilderness Leadership Education 3 Credits Offered Summer As Demand Warrants Introduction to outdoor education. Includes both theoretical and practical exposure to quality judgment and decision-making, environmental education techniques and leadership development in the wilderness setting. Provides detailed exposure to the Wilderness Education Association’s 18 essential components of wilderness leadership and backcountry safety. The field portion of the course includes detailed instruction in and mentored experience with modern backcountry travel techniques. Successful completion earns certification in the Wilderness Stewardship Program. Field program requires travel through rough un-trailed terrain with heavy packs and average strength and stamina. No use of alcohol, tobacco, illegal drugs or firearms. Special fees apply. Prerequisites: Permission of instructor. Recommended: BIOL F104X, NRM F101 and physical geography. (3+0)

NRM F204 Public Lands Law and Policy 3 Credits Offered Fairbanks: Spring; Offered Palmer: Background on selected federal lands management legislation and agency policies affecting resources conservation, development and preservation. Prerequisites: Sophomore class standing. (3+0)
NATURAL RESOURCES MANAGEMENT (NRM)

NRM F210 Principles of Sustainable Agriculture (3 Credits)
Offered Fall
Development of a basic understanding of sustainable agriculture concepts including exposure to economic, social, and environmental principles and ideas of sustainable agricultural practices. Agroecology is introduced as a backdrop for the development of sustainable techniques for soil, plant, and animal agriculture. Throughout the semester, sustainable agriculture concepts and principles will be related to current issues such as population growth, resource use and availability, and changing social structures and preferences. Prerequisites: BIOL F101X, BIOL F103X, BIOL F104X, BIOL F115X, BIOLS F116X, or BIOL F120X. (3+0)

NRM F211 Introduction to Applied Plant Science (3 Credits)
Offered Fall
Basic principles and requirements for plant growth and development with special attention to the production and management of field and greenhouse grown crops. (2+3)

NRM F212 Greenhouse Management (3 Credits)
Offered Spring
The greenhouse as a controlled environment for research, education and commercial production of plants; the physical environment; environmental controls and monitors; plant cultivation techniques and crop scheduling useful in plant science and commercial production. (3+0)

NRM F240 Natural Resources Measurement and Inventory (3 Credits)
Offered Fall
Techniques and instrumentation used to measure and inventory natural resources, including land, timber, range, wildlife, water and recreation resources. Prerequisites: MATH F107X. (2+3)

NRM F251 Silvics and Dendrology (4 Credits)
Offered Spring
Ecological requirements and characteristics of tree species of the Northern forest and western North American forest. Silvical characteristics including range, climate, soils, shade tolerance, growth and principal enemies. Family and species characteristics for identification on sight or with a key. Field trips required. Prerequisites: BIOL F115X; BIOL F116X; BIOL F371; or permission of instructor. (3+3)

NRM F277 Introduction to Conservation Biology (3 Credits)
Offered Spring
Introduction to the basic ecological, genetic, management, legal and historical developments in conservation biology and focused efforts to manage biological diversity resources, with a status review of important habitats and endangered species. Prerequisites: BIOL F115X; BIOL F116X. Cross-listed with BIOL F277. (3+0)

NRM F290 Resource Management Issues at High Latitudes (2 Credits)
Broad perspective of high latitude resource management issues. On-site analyses of resource management needs, opportunities and/or conflicts in agriculture, forestry, mining, seafood, petroleum, recreation and tourism. Includes 10 day field trip at the end of spring semester. Students must provide own sleeping gear, rain gear and hiking boots. Students must be able to hike forest trails and camp under conditions of inclement weather. May be repeated for credit with instructor’s permission. Special fees apply. Prerequisite: Permission of instructor. (2+0)

NRM F300 Internship in Natural Resources Management and Geography (1–3 Credits)
Offered As Demand Warrants
Supervised pre-professional experience in a business or agency (public or private). Open to students majoring or minoring in natural resources management and geography only. Course may be repeated for credit up to a maximum of 6 credits. Prerequisites: NRM F101 for natural resources management majors or GEOG F101 for geography majors; junior standing with 3.0 GPA; permission of instructor and an approved internship plan. Cross-listed with GEOG F300. (0+0+3-10)

NRM F303X Environmental Ethics and Actions (h) (3 Credits)
Offered Spring
Exploration of the history of modern Western views of the relationship between people and nature, alternative foundations for an environmental ethic (utilitarianism, spiritual activity, rights-based and respect-based ethics) and practices of such ethics in business, profession and general lifestyle today. Prerequisites: Junior standing; placement in ENGL F111X or higher; or permission of instructor. (3+0)

NRM F312 Introduction to Range Management (3 Credits)
Offered Fall Even-numbered Years
Applied ecological treatment of soil, plant and grazing animal relationships on uncultivated lands. Origin of the discipline, management practices and important rangelands of North America; emphasis on Alaska’s rangelands and grazers. Prerequisites: BIOL F115X; BIOL F116X; BIOL F239; or permission of instructor. Recommended: NRM F320; NRM F321. (3+0)

NRM F313 Introduction to Plant Pathology (4 Credits)
Offered Spring Odd-numbered Years
Plant pathology; non-parasitic and parasitic causes of plant diseases; methods of plant infestation and mechanism of plant defenses; epidemiology and disease control. Prerequisites: BIOL F115X; BIOL F116X. Recommended: BIOL F239. (3+3)

NRM F320 Animal Science (3 Credits)
Offered Fall Even-numbered Years
Introduction to the various disciplines that form the study of animal science. Topics include animal nutrition, physiology of reproduction and lactation, genetics and animal breeding, animal behavior, environmental physiology, animal health and welfare. Information is presented as it applies to traditional and non-traditional livestock species with emphasis on applications pertinent to Alaska. Prerequisites: BIOL F115X; BIOL F116X. (2+3)

NRM F338 Introduction to Geographic Information Systems (3 Credits)
Offered Fall
Geographic data concepts including mapping systems, data sources, editing data, GIS analysis and computer mapping. Introduction to global positioning systems. GIS applications in natural resources management. Prerequisites: Knowledge of PCs or Unix workstations desired. Cross-listed with GEOG F338. (2+3)

NRM F361 Advanced Wilderness Leadership Education (3 Credits)
Offered Summer, As Demand Warrants
The natural environment, concentrating on outdoor leadership, environmental ethics, minimum impact camping, forest and arctic natural history, and adaptable judgment and decision-making. Includes hiking through boreal forest and along tundra ridges, river crossing, glacier ascent, and skills to do these activities safely. Other mediums of travel could include sea kayaks, canoes or rock climbing. Three lecture sessions will preview a demanding educational field program of 5-15 days requires travel through rough un-trailed terrain with heavy packs or boats and average strength and stamina. No use of alcohol, tobacco, illegal drugs or firearms. Prerequisites: NRM F101 or equivalent; NRM F161 or equivalent; permission of instructor. Recommended: NRM/GEOG F463 and NRM F465. (3+0)

NRM F365 Principles of Outdoor Recreation Management (3 Credits)
Offered Fall Even-numbered Years
Theories, practices, economics and problems fundamental to the use of land and related natural resources for recreation. The course focuses on human dimension related issues faced by recreation managers and research to address those issues. Prerequisites: NRM F101; STAT F200X; junior standing. (3+0)

NRM F366 Survey Research in Natural Resources Management (3 Credits)
Offered Spring
Research methods to support research and planning in recreation and human dimensions of natural resources management. Course topics include quantitative theories and concepts that have been applied to study human dimensions of natural resource management, study design, survey development and administration, sampling and data analysis. Prerequisites: NRM F101; STAT F200X. (3+0)
NRM F369  GIS and Remote Sensing for Natural Resources
3 Credits  Offered Spring Even-Numbered Years
Introduces the principles and terminology of natural resources, ecosystem management and landscape ecology while developing analytical skills using spatial technologies consisting of geographic information systems, remote sensing, and global positioning systems. Prerequisites: NRM F338
Recommended: NRM F312 (1.5+1.5)

NRM F370  Introduction to Watershed Management
3 Credits  Offered Fall
The hydrologic cycle and the influence of land management techniques on water quantity, quality and timing. Water yield, soil erosion and non-point pollution, snowpack management, and land use alternatives. Prerequisites: NRM F101 and GEOS F101X or permission of instructor. (2+3)

NRM F375  Natural Resource Ecology
3 Credits  Offered Fall
Basic ecology concepts, including physical (wind, temperature, water, etc.), biotic (population and community dynamics), genetic successional and landscape dynamics will be covered. Basic physiological characteristics of trees, succession, vegetation classification, and related concepts. Stand structure, diversity, competition, growth, forest-soil interactions, biomass, nutrient distribution and dynamics, energy relations, ecology of disturbances. How this basic information can be used in development of wise management plans. Prerequisites: NRM F240. (3+0)

NRM F380 W  Soils and the Environment
3 Credits  Offered Fall
Soil development and classification; physical and chemical properties; biological activity; water movement and nutrient cycling in natural and manipulated ecosystems. Prerequisites: CHEM F105X; ENGL F111X; ENGL F211X or ENGL F213X or permission of instructor. (2+3)

NRM F403 W,O  Environmental Decision Making
3 Credits  Offered Fall
Analysis of philosophical/ethical, economic, scientific and political foundations of diverse natural resource management perspectives. Prerequisites: COMM F313X or COMM F413X; NRM F101; junior standing; or permission of instructor. (2+3)

NRM F405 W  Senior Thesis in Natural Resources Management I
2 Credits
Problem-solving with emphasis on writing and analysis. Individual project under the guidance of faculty sponsor involving formulation of a question in natural resources management and preparation of a formal, comprehensive written report. Thesis proposal, presentation and research. Prerequisites: ENGL F111X; ENGL F211X or ENGL F213X; NRM core; junior standing. (2+0)

NRM F407  Environmental Law
3 Credits  Offered Spring Odd-numbered Years
The role of common law theory in regulatory, statutory and constitutional interpretation in the field of environmental protection, including air and water pollution, toxic/hazardous substances and land-use regulation. Prerequisites: Junior or senior class standing or permission of instructor. (3+0)

NRM F410  Numerical Methods for Natural Resources Management
4 Credits  Offered Fall
Teaches the most up-to-date numerical methods for natural resources managers and researchers. Labs cover important computer skills to help students excel in modern natural resources management. Recommended: MATH F314 (3+3)

NRM F430  Resource Management Planning
3 Credits  Offered Spring
Application of planning and conflict resolution principles to natural resources management. Examines plans prepared in response to current Alaska resource disputes, including wolf, brown bear, boreal forest and recreation river plans. Includes public involvement, consensus building, the basic steps in the planning process and resource dispute simulations. Review resource management plans and develop plans for a local resource management issue. Prerequisites: Senior standing or permission of instructor. Stacked with NRM F630. (3+0)

NRM F435  GIS Analysis
4 Credits  Offered Spring
GIS analysis of natural resources including spatial query, attribute query, vector, grid, image, topographic and network analysis techniques. Cross-listed with GEOG F435. (3+3)

NRM F440  Silviculture
3 Credits  Offered Fall Even-numbered Years
Provides an understanding of the science and art of forest stand management. Silviculture is the theory and practice of controlling forest establishment, composition, structure and growth of forests. For persons in land management, including timber, woodlot, wildlife habitat, streamside and aesthetics. Prerequisites: BIOL F271; NRM F251; junior standing; or permission of instructor. (2+3)

NRM F450  Forest Management
3 Credits  Offered Spring Odd-numbered Years
Forest land management for production of goods and services; relation of timber production to other forest land uses. Sustained yield, allowable cut, information needs, valuation and decision making. Prerequisites: ECON F235; NRM F251; NRM F240; Junior standing. (3+0)

NRM F452  Forest Health and Protection
3 Credits  Offered Spring Even-numbered Years
Principles and practical management systems for protecting forests from fire, insects and diseases. Factors in managing forest ecosystems and problems and techniques important in high latitude forests, especially in Alaska. Prerequisites: BIOL F115X; BIOL F116X; BIOL F239; BIOL F271; NRM F251; or permission of instructor. (3+0)

NRM F453  Harvesting and Utilization of Forest Products
3 Credits  Offered Fall Odd-numbered Years
Manual and mechanized timber harvesting systems including timber cutting, yarding and transport processes. Technology of processing wood into various products including lumber, plywood, veneer, pulp and energy. Introduction to supply and demand of forest products from a world, state and local perspective. Labs include visits to local forest products companies, chainsaw safety and wood identification. Prerequisites: NRM F101 or permission of instructor. (2+3)

NRM F454  Comparative Farming and Sustainable Food Systems
3 Credits  Offered Fall
Principles of food systems geography and food security. Cross-cultural examination of dietary traditions, poverty, hunger, equity and food access and distribution. Comparison of multiple varieties and scales of agricultural systems in the context of social, ecological and economic sustainability. Considers Alaskan and other high-latitude food systems, including country food, wild game harvest and rural to urban nutrition transition. Junior standing and ENGL F211X or F213X; or permission of instructor. Cross-listed with GEOG F454 and CCS F454. (3+0)

NRM F461  Interpretive Services
3 Credits  Offered As Demand Warrants
Naturalist and other visitor programs in outdoor recreation areas: philosophy, planning and development of interpretive programs; resources, agencies, users, interpretive media and program evaluation. Prerequisites: Junior standing or permission of instructor. (3+0)

NRM F463  Wilderness Concepts
3 Credits  Offered Fall
Discovery of wilderness concepts, including the history and evolution of wilderness thought, the contemporary meaning of wilderness and survey of economic and noneconomic wilderness values for individuals and society. Cross-listed with GEOG F463. (3+0)

<tbody>
<tr>
<td>NRM F464</td>
<td>Wilderness Management</td>
<td>3</td>
<td>Offered Spring</td>
<td>Wilderness ecology and land management practices on lands designated as wilderness. Analysis of visitor management regimes. Both national and international views of wilderness are presented. Prequisites: A basic course in ecology, resource management, or permission of instructor. Cross-listed with GEOG F464. (3+0)</td>
</tr>
<tr>
<td>NRM F466</td>
<td>Environmental Soil Chemistry</td>
<td>3</td>
<td>Offered Spring Odd-numbered Years</td>
<td>Basic principles of soil chemical processes. Covers soil solution chemistry; precipitation/dissolution and soil colloids; soil solid phase; soil acidity/alkalinity; adsorption and ion exchange; reduction/oxidation reactions; and kinetics of soil chemical processes. In the lab students will operate equipment for soil chemical analysis, experience computer simulation models for soil chemistry and become familiar with the terms and approaches for writing technical reports. Prequisites: CHEM F105X; CHEM F106X; NRM F380. (2+3)</td>
</tr>
<tr>
<td>NRM F470</td>
<td>Terrestrial Carbon Management</td>
<td>3</td>
<td>Offered Spring</td>
<td>Climate change and its relationship to carbon dynamics have become elements of natural resource management options for land owners within the state and across the country and the globe. The course will present a broad scale description of the direction for forest carbon management and proposed methods for inventorying and documenting carbon dynamics attached to industry and down to the landowner. Prequisites: BIOL F271 or NRM F375 or permission of instructor. (3+0)</td>
</tr>
<tr>
<td>NRM F480</td>
<td>Soil Management for Quality and Conservation</td>
<td>3</td>
<td>Offered Fall Odd-numbered Years</td>
<td>Managing soil in disturbed and natural ecosystems to reduce soil losses and maintain or improve soil quality. Methods for maintaining soil quality, preserving soil against loss from erosion, remediating contaminated soil and reclaiming degraded soils. Prequisites: NRM F380. (3+0)</td>
</tr>
<tr>
<td>NRM F483 W</td>
<td>Research Design, Writing, and Presentation Methods</td>
<td>3</td>
<td>Offered Fall</td>
<td>Capstone research practicum for Geography and Natural Resources Management majors. Focuses on designing an individual research project or thesis in coordination with a faculty mentor. Designed to integrate the knowledge and skills students have gained through undergraduate course work, and to prepare them for graduate research or professional level projects. Emphasizes scientific method, research design, proposal writing, development of field and analytical methods, scientific writing, and the oral, written, and graphical presentation of data and research results. Prequisites: ENGL F211X or ENGL F213X; at least one writing intensive course designated (W); junior standing in Geography or Natural Resources Management. Cross-listed with GEOG F483. (3+0)</td>
</tr>
<tr>
<td>NRM F484 W</td>
<td>Senior Thesis in Natural Resources Management II</td>
<td>2</td>
<td>Offered Fall</td>
<td>Problem-solving with emphasis on writing and analysis. Individual project under the guidance of faculty sponsor involving formulation of a question in natural resources management and preparation of a formal, comprehensive written report. Final thesis and presentation. Prequisites: NRM F483 and permission of instructor. (2+0)</td>
</tr>
<tr>
<td>NRM F485</td>
<td>Soil Biology</td>
<td>3</td>
<td>Offered Spring Even-numbered Years</td>
<td>Major groups of organisms in the soil and their interrelationships; the major biological processes which take place in the soil and their significance to soil productivity, plant growth and environmental quality; and methodology for studying soil organisms and soil biological processes. Prequisites: A course in biology or microbiology and a course in soils or permission of instructor. (3+0)</td>
</tr>
<tr>
<td>NRM F488</td>
<td>Land Management of Ecosystems</td>
<td>3</td>
<td>Offered Spring As Demand Warrants</td>
<td>Natural resource topics related to the management of the terrestrial environment in regions such as the Pacific Northwest, Hawaii and the circumpolar North. A basic understanding of the ecology of a specific region is presented prior to a spring break field trip designed to give the student a broad understanding of important topics affecting the management of important natural resources in the selected region. Special fees apply. Prequisites: NRM F211; NRM F277 or BIOL F277; NRM F375 or BIOL F271. Stacked with NRM F688. (3+0+40)</td>
</tr>
<tr>
<td>NRM F489</td>
<td>Alaska Soil Geography Field Trip</td>
<td>1</td>
<td>Offered Summer As Demand Warrants</td>
<td>Soil geography along ecological transect in selected areas of Alaska. Hands-on experiences on soil morphology and exposure of the relationships between soil genesis and other ecological factors including vegetation, geology, landform, climate and hydrology. Includes discussion of soil classification and land use interpretations. Student must provide their own camp gear, be able to walk on uneven or rocky ground and be physically fit for field work. Graded Pass/Fail. Special fees apply. Prequisites: NRM F386, or a course in soils, or permission of instructor. Stacked with NRM F689. (1+0)</td>
</tr>
<tr>
<td>NRM F601</td>
<td>Research Methods in Natural Resources Management</td>
<td>2</td>
<td>Offered Fall</td>
<td>Introduction for graduate students to the research methods employed in the various fields of resource management, including agriculture, forestry, ecology and social sciences. Designed to acquaint students with the relationship between theory and research, the nature of scientific inquiry, approaches to research, the sequence of steps involved in scientific investigation and the presentation of research results. Prequisites: Graduate standing or permission of instructor. (2+0)</td>
</tr>
<tr>
<td>NRM F613</td>
<td>Resilience Internship</td>
<td>2</td>
<td>Offered Fall</td>
<td>Students of the Resilience and Adaptation Program participate in internships to broaden their interdisciplinary training, develop new research tools and build expertise outside their home disciplines. Internships are for eight to ten weeks of full-time commitment and take place during the student’s first summer in the program. In the autumn students meet to discuss their internship experiences and make public presentations. Prequisites: ANTH/BIOL/ECON/NRM F667; or ANTH/BIOL/ECON/NRM F668; or permission of instructor. Cross-listed with ANTH F617; BIOL F613; ECON F613. (2+0)</td>
</tr>
<tr>
<td>NRM F616</td>
<td>Ecological Background for Resilience and Adaptation</td>
<td>1</td>
<td>Offered Fall</td>
<td>Provides the ecological background that is necessary for understanding the role of ecology in complex systems involving interactions among biological, economic, and social processes. Designed for incoming students of the Resilience and Adaptation Program (RAP), who have not received training in ecology. Prequisites: Graduate student enrollment or permission of instructor. Cross-listed with BIOL F616. (1+0)</td>
</tr>
<tr>
<td>NRM F630</td>
<td>Resource Management Planning</td>
<td>3</td>
<td>Offered Spring</td>
<td>Application of planning and conflict resolution principles to natural resources management. Examines plans prepared in response to current Alaska resource disputes, including wolf, brown bear, boreal forest and recreation river plans. Includes public involvement, consensus building, the basic steps in the planning process, and resource dispute simulations. Prequisites: Graduate standing or permission of instructor. Stacked with NRM F430. (3+0)</td>
</tr>
<tr>
<td>NRM F637</td>
<td>Evolution of Conservation Concepts and Policy</td>
<td>3</td>
<td>Offered Fall Even-numbered Years</td>
<td>Resource policy issues development and implementation including forestry, mining, fisheries, oil, wildlife and other topics as demand warrants.</td>
</tr>
</tbody>
</table>
Focus on policy issues involved in management of Alaska’s resources. 

**Prerequisites:** Graduate standing or permission of instructor. Cross-listed with ECON F637. (3+0)

**Resilience Seminar II**

1 Credit  
Offered Fall  
Provides a forum for new students of the Resilience and Adaptation graduate program to explore issues of interdisciplinary research that are relevant to sustainability. The seminar provides support to each student planning his/her summer internship and preparing and presenting a thesis research prospectus. Graded Pass/Fail. 

**Prerequisites:** Graduate standing in a natural science, social science, humanities or interdisciplinary program at UAF; and permission of instructor. Cross-listed with ANTH F647; BIOL F647; ECON F647. (3+0)

### Interdisciplinary Modeling of High Latitude Global Change

4 Credits  
Offered Fall Even-numbered Years  
Introduces students to approaches to modeling how regional and global environmental change influences biological and social systems in high latitudes and how the responses of these systems influence the regional and global functioning of the earth system. 

**Prerequisites:** STAT F200X or equivalent; graduate standing; or permission of instructor. Cross-listed with BIOL F676. (3+3)
NATURAL RESOURCES MANAGEMENT (NRM) — NORTHERN STUDIES (NORS)

NRM F685 Soil Microbiology and Biochemistry
3 Credits
Offered As Demand Warrants
Current topics in soil microbiology and biochemistry. Based on readings from the primary literature and discussions in class. Each student will be expected to lead at least one discussion, write a research proposal and present the proposal to class. Prerequisite: At least one course in soil science; one course in microbiology; or permission of instructor. (3+0)

NRM F688 Land Management of Ecosystems
3 Credits
Offered Spring, As Demand Warrants
Natural resource topics related to management of the terrestrial environment in regions such as the Pacific Northwest, Hawaii and the circumpolar North. A basic understanding of the ecology of a specific region is presented prior to a spring break field trip designed to give the student a broad understanding of important topics affecting the management of important natural resources in the selected region. Special fees apply. Prerequisite: NRM F211; NRM F277 or BIOL F277; NRM F375 or BIOL F271. Stacked with NRM F488. (3+0+40)

NRM F689 Alaska Soil Geography Field Trip
1 Credit
Offered Summer As Demand Warrants
Soil geography among an ecological transect in selected areas of Alaska. Hands-on experiences with soil morphology and exploration of the relationships between soil genesis and other ecological factors including vegetation, geology, landform, climate and hydrology. Includes discussion of soil classification and land use interpretations. Students must provide their own camp gear, be able to walk on uneven or rocky ground and be physically fit for field work. Graded Pass/Fail. Special fees apply. Prerequisite: NRM F380, or a course in soils, or permission of instructor. Stacked with NRM F489. (1+0)

NRM F692 Graduate Seminar
1–3 Credits
Topics in natural resources management and geography explored through readings, student presentations, group discussions and guest speakers. Prerequisite: Graduate standing or permission of instructor. Cross-listed with GEOG F692. (1-3+0)

NRM F692P Graduate Seminar
1–3 Credits
Topics in natural resources management and geography explored through readings, student presentations, group discussions and guest speakers. Graded Pass/Fail. Prerequisite: Graduate standing or permission of instructor. Cross-listed with GEOG F692. (1-3+0)

NORTHERN STUDIES

For information on studying at McGill University, Montreal, Canada; the University of Copenhagen, Denmark; or opportunity for study in Russia, see Study Abroad.

NORS F201 The Circumpolar North: An Introductory Overview
3 Credits
Offered Every Fall
This course will introduce students to the human experience in the circumpolar north by exploring such themes in the social sciences and humanities as: a) the differences and commonalities between indigenous and non-indigenous visions, assumptions and experiences; b) the emphasis on nature and wilderness in popular culture and nature’s inherent value to human physical and spiritual well being; c) political issues such as alienation from core political-economic and population centers and tension between pro-development and pro-conservationist forces; and d) how northern literature reflects these and other aspects of human experience in the north. Course is taught online. (3+0)

NORS F205 Leadership, Citizenship and Choice
3 Credits
History of democratic principles in America and how people can contribute to political and community life in the local, state and national arenas as leaders and citizens. Examines ethical dilemmas of leadership, and political and social issues facing Alaska and American societies. Course includes an experiential learning component. Cross-listed with PS F205. (3+0)

NORS F425 W Visual Images of the North
3 Credits
Examination of the imagery of the people and landscapes of the polar regions, centering on such issues as depiction of arctic peoples and customs by Europeans, documentary versus artistic goals, translations from original sketches to published images, relationship of polar imagery to prevailing historical styles and the influence of changing world views on modes of polar representation between the 16th and 20th centuries. Prerequisites: ENGL F111X; ENGL F211X or ENGL F213X or permission of instructor. Cross-listed with ART F425. (3+0)

NORS F427 Polar Geography
3 Credits
Offered Spring Odd-numbered Years
Comparative physical, cultural, political and economic geography of the Circumpolar North and Antarctic regions. Special attention to Arctic natural resource development, climate change in both polar regions. Prerequisites: GEOG F101 or GEOG F203 or GEOG F211X; or permission of instructor. (3+0)

NORS F470 Oral Sources: Issues in Documentation
3 Credits
Offered Alternate Fall
Preparation for recording and use of oral resources. Examines how meaning is conveyed through oral traditions and personal narratives and the issues involved with recording and reproducing narratives. Includes management of oral recordings, ethical and legal considerations, issues of interpretation and censorship, and the use of new technologies to access and deliver recordings. Prerequisite: At least one undergraduate ANTH course and one undergraduate HIST course, or permission of instructor. Cross-listed with ANTH F470. (3+0)

NORS F476 Russian Culture and Society in the 21st Century
3 Credits
Offered Spring Even-numbered Years
Study of contemporary Russian culture and society through selected literary texts and media representations; examination of the idea of the “Russian North” and its place in Russian culture; consideration of Russian political and current events. Students will gain knowledge about present-day Russia and its peoples from a variety of perspectives, sources and media. Prerequisite: ENGL F111X; ENGL F211X or ENGL F213X; COMM F131X or COMM F141X; junior standing or permission of the instructor. Russian Studies majors must complete RUSS F202 and Northern Studies majors must complete 2 NORS courses. Cross-listed with RUSS F476. (3+0)

NORS F484 W,O Seminar in Northern Studies
3 Credits
Offered Fall
An interdisciplinary seminar focusing on topics relating to the North with emphasis on the physical sciences, the peoples, and the socioeconomic and political aspects of the area. Specialists in the various fields will assign readings and conduct discussions. Prerequisites: ENGL F111X; ENGL F211X or ENGL F213X; junior standing or permission of the instructor. (3+0)

NORS F600 Perspectives on the North
3 Credits
Basic knowledge of the circumpolar North — the social, economic, political and scientific facets of northern life. Consideration of major cultural groups of the North and their histories, the environmental settings and patterns of settlement and development in northern regions and systems of governance in different northern countries. Broad overview of the major policy issues of the North in education, justice, health care, and environmental and wildlife protection. Course is also available online. Cross-listed with HIST F600. (3+0)

NORS F601 Research Methods and Sources in the North
3 Credits
Development of students’ research skills so they can engage in their own research on northern issues. Includes techniques of interviewing, conducting surveys, and sampling; qualitative and quantitative methods of research design; and familiarity with library sources and archival records. Each student will develop a research project. Course is also available online. (3+0)
NORS F603  Public Policy 3 Credits
The processes of policy development, implementation and change are analyzed along with major policy frameworks and models used in contemporary political science. These frameworks and models will be applied to environmental sustainability and other social policy issues. Students will develop expertise in a specific policy area and skills in research design preparing them to analyze public policy. Prerequisites: Graduate Standing. Cross-listed with PS F603. (3+0)

NORS F610  Northern Indigenous People and Contemporary Issues 3 Credits
Comparative examination of issues affecting northern indigenous people from Alaska, Canada, Greenland and Russia. Issues include the impact of the alienation of land on which these people depend; the relationships between their small, rural microeconomies and the larger agroindustrial market economies of which they are a part; education, language loss and cultural transmission; alternative governmental policies toward indigenous peoples and contrasting world views. Prerequisites: Graduate standing or upper-division standing with permission of instructor. Cross-listed with ANTH F610. (3+0)

NORS F611  Environmental History 3 Credits
Discussion of significant works of environmental history. Cultural history of the landscape in world civilization with emphasis on Western Europe and North America. Discussion of interdisciplinary approaches to the history of environment and cooperative work across disciplines. Prerequisites: Graduate standing or permission of instructor. Stacked with HIST F411. (3+0)

NORS F620  Images of the North 3 Credits
Emphasis on the variety of images created about the people and environment of the circumpolar North. Examination and interpretation of conceptualizations of the North as expressed in such different media as film, art, literature, travel journals and oral traditions. Cross-listed with ENGL F620. (3+0)

NORS F624  Field Artists of the North 3 Credits
Study of field artists and their work, from the explorer artists of yesteryear to today’s field artists using a variety of traditional and contemporary media in their creations. Students will conceive and conduct their own study projects, producing a body of work that will demonstrate the principles and practice of a field artist. Prerequisites: ART F105; studio art course (ART F161, ART F162, ART F163, ART F205, ART F211, ART F213 or JRN F203.) Cross-listed with ART F624. (3+0)

NORS F625  Visual Images of the North 3 Credits
Examination of the two-dimensional imagery of the people and landscapes of the polar regions, centering on such issues as depiction of arctic peoples and customs by Europeans, documentary vs. artistic goals, translations from original sketches to published images, relationship of polar imagery to prevailing historical styles, and the influence of changing world views on modes of polar representation between the 16th and 20th centuries. Cross-listed with ART F625. (3+0)

NORS F627  Polar Geography 3 Credits
Comparative physical, cultural, political and economic geography of the Circumpolar North and Antarctic regions. Special attention given to Arctic natural resource and climate change in both polar regions, and polar geopolitics. Prerequisites: Graduate standing or permission of instructor. Cross-listed with GEOG F627. (3+0)

NORS F640  Ethics and Reporting in the Far North 3 Credits
Historical overview of media coverage of the Northern frontier with focus on journalistic ethics. A comparison is made to the media climate in Third World countries. Cross-listed with JRN F640. (3+0)

NORS F647  U.S. Environmental Politics 3 Credits
Offered Spring
U.S. political institutions as they relate to making policies for protecting the quality of the natural environment. The politics of nuclear waste, endangered species, air and water pollution, and wilderness preservation. Analysis of the National Environmental Policy Act, sustainable development, limits to growth and other topics. Course is also available online. Prerequisites: Graduate Standing or permission of instructor. Cross-listed with PS F647. (3+0)

NORS F648  Environmental Politics of the Circumpolar North 3 Credits
Offered As Demand Warrants
Overview of how environmental politics and policy as a field of study relates to the Arctic region. Analysis of various threats to the northern environment, focusing on the policy making institutions at selected Arctic Rim nations, as well as strategies to deal with environmental problems in an international context. Course is also available online. Prerequisites: Graduate standing or permission of instructor. Cross-listed with PS F648. (3+0)

NORS F652  International Relations of the North 3 Credits
Examination of the international strategies of circumpolar states. Consideration of theoretical and practical elements of strategy formation in major issue areas such as national security, the political economy, human rights and scientific exchange. Prerequisites: Graduate standing or permission of instructor. Cross-listed with PS F652. (3+0)

NORS F654  International Law and the Environment 3 Credits
International environmental law. Includes international case law regulating the sea, airspace, outer space and the polar regions; comprehensive international legal and legal instruments to protect the environment (e.g. the U.N. Framework Convention on Climate Change); and the doctrines, principles, and rules of international law that are basic to an understanding of international legal regimes and the environment. Course is also available online. Prerequisites: Graduate standing or permission of instructor. Recommended: Undergraduate course in international law, organization or politics. Cross-listed with PS F654. (3+0)

NORS F655  Political Economy of the Global Environment 3 Credits
Interactions between basic aspects of the global economy (international trade, investment and development) and the natural environment. Topics include the economic impact of global environmental agreements and the environmental impact of global markets, transnational corporations and development assistance by organizations such as the World Bank. Prerequisites: Graduate standing and permission of instructor. Cross-listed with PS F655. (3+0)

NORS F656  Science, Technology, and Politics 3 Credits
Relationship of science, technology and politics. Connections among scientific knowledge, technological innovation, political and power, gender roles and the influence of western science. Both historical and comparative aspects are included. Course is also available online. Prerequisites: Graduate standing or permission of instructor. Recommended: PS F101. Cross-listed with PS F656. (3+0)

NORS F658  Comparative Environmental Politics 3 Credits
Offered Fall Odd-numbered Years
Enduring issues of the field of comparative politics and their relation to global environmental problems. Biodiversity, transboundary pollution capacity, political processes and organizations, and international...
commitments all potentially shape the nature and dynamics of global environmental politics and vice versa. Course is also available online. **Prerequisites:** Graduate standing or permission of instructor. **Recommended:** PS F201 or equivalent comparative politics course. Cross-listed with PS F658. (3+0)

**NORS F660**  
Government and Politics of Canada  
3 Credits  
Offered Spring Odd-numbered Years  
The Canadian political system, covering the Canadian constitution, federal structure, parliamentary government and public policy, as well as contemporary issues concerning Native rights and the Canadian North. Students will complete a major research paper on specific policy areas. **Prerequisites:** Graduate standing or permission of instructor. Cross-listed with PS F660. (3+0)

**NORS F661**  
History of Alaska  
3 Credits  
Offered Fall  
Alaska from prehistoric times to the present, including major themes such as Native Alaska, colonial and military Alaska, statehood, Alaska Native Claims Settlement Act of 1971 and the Alaska National Interest Lands Act of 1980. Cross-listed with HIST F662. (3+0)

**NORS F662**  
Alaska Government and Politics  
3 Credits  
Offered Spring Odd-numbered Years  
Alaska's government and politics, in the context of American state and local government, and politics and governments of circumpolar northern nations. Topics include political history, constitution, political parties, interest groups, elections, public opinion, governor, legislature, judiciary, administration and local governments. Compares Alaska to the contiguous 48 states and subnational governments of the circumpolar North; examines how government institutions and processes respond to social, environmental and political changes of northern communities. **Prerequisites:** Graduate standing or permission of instructor. Cross-listed with PS F662. (3+0)

**NORS F663**  
Imperial Russia, 1700–1917  
3 Credits  
Offered Fall Odd-numbered Years  
This course covers Russian history from the reign of Peter the Great (1682–1725) until the collapse of the Tsarist regime in February 1917. Topics will include Russia's complex relationship with Western Europe, the challenges posed by modernization, the Russian Empire as a multi-national state, and the emergence of the revolutionary movement. **Prerequisites:** Graduate standing or permission of instructor. Cross-listed with HIST F463. Stacked with HIST F663. (3+0)

**NORS F664**  
Soviet and Post-Soviet Russia  
3 Credits  
Offered Fall Even-numbered Years  
Russia from the 1917 Revolution to the present. This course examines the attempts to build a socialist utopia in the former Russian empire and its impact on the peoples of that region and the modern world. We will consider the political, economic, social and cultural nature of the Soviet state. Major themes include cultural transformation, industrialization, Stalinism, the Soviet Union as a multi-national empire, the Cold War, the collapse of the Soviet state, and the new Russia of Yeltsin and Putin. **Prerequisites:** Graduate standing or permission of instructor. Cross-listed with HIST F664. Stacked with HIST F464. (3+0)

**NORS F665**  
Government and Politics of Russia  
3 Credits  
Offered Spring Odd-numbered Years  
Current developments in Russia from a number of perspectives. The effect of history and geography on political change; the nature of Russian government and society; the legacies of Lenin, Stalin, Gorbachev, and the ideological nature of regimes and leadership. Economic forces and the political struggle in governance; revolution, democracy and reform; and the international role of Russia, particularly in relation to the former Soviet republics, Eastern Europe and other border areas. **Prerequisites:** PS F201; graduate standing or permission of instructor. Cross-listed with PS F668. (3+0)

**NORS F667**  
Government and Politics of Eastern Europe  
3 Credits  
Offered Spring Odd-numbered Years  
The Canadian political system, covering the Canadian constitution, federal structure, parliamentary government and public policy, as well as contemporary issues concerning Native rights and the Canadian North. Students will complete a major research paper on specific policy areas. **Prerequisites:** Graduate standing or permission of instructor. Cross-listed with PS F667. (3+0)

**NORS F668**  
Graduate Seminar in Russian Area Studies  
3 Credits  
Offered Spring Odd-numbered Years  
Graduate seminar on a theme related to the history, politics, economy, culture or society of a given region. Prerequisites: permission of instructor. Cross-listed with PS F668. (3+0)

**NORS F669**  
Alaska Environment  
3 Credits  
Offered Spring Odd-numbered Years  
A study of Alaska's environment, the natural history of the state, and the current and future status of the environment. Prerequisites: permission of instructor. Cross-listed with PS F669. (3+0)

**OCCUPATIONAL SAFETY AND HEALTH**

A per-semester fee for upgrade of equipment, instructional aids and supplies will be assessed for one or more OSH classes.

**OSH F108**  
Injury Prevention and Risk Management  
4 Credits  
Offered Fall  
Course identifies safety, health management and incident prevention in the workplace. Emphasis on materials handling, electrical and machine safety, first response to fire and medical emergencies, safety and health hazards, and accident prevention. Special fees apply. (3+2)

**OSH F110**  
Program Assessments, Development and Implementation  
4 Credits  
Offered Fall  
Examines the role of a safety program in the workplace. Emphasis on program assessment, design, development, implementation and evaluation of safety programs. Special fees apply. (4+0)

**OSH F120**  
Safety Program Management and Recordkeeping  
3 Credits  
Offered Spring  
The role of safety in the business community. Emphasis on philosophy of safety and health efforts by management. Examines the role of the safety manager and the types of and need for accurate recordkeeping. Special fees apply. **Prerequisites:** OSH F110. (3+0)

PETROLEUM ENGINEERING

A per-semester student computing facility user fee is assessed for CEM engineering courses. This fee is in addition to any lab/material fees.

PETE F101  Fundamentals of Petroleum, Drilling and Production
3 Credits
Offered Fall and Spring
Fundamental principles of origin, migration, accumulation and exploration of petroleum. Principles of drilling, drilling practices, and drilling fluids. Overview of production practices, surface production equipment. Influence of rock and fluid properties on the principles of petroleum recovery, petroleum transportation. Overview of Alaska unconventional hydrocarbon resources, opportunities and impact on the state economy. Prerequisites: Freshman standing in Petroleum Engineering program or permission of the instructor. (3+0)

PETE F301  Reservoir Rock and Fluid Properties
4 Credits
Offered Fall
Fundamental concepts of reservoir rock and fluid properties including porosity, permeability, fluid saturations, capillary pressure, relative permeabilities, classification of petroleum reservoirs by fluid phase contents, oil, gas and water properties, fluid sampling, and PVT analysis. Prerequisites: MATH F201X; GEOS F101X or GE F261. Prerequisite or Co-requisite: ES F346. (4+0)

PETE F302  Well Logging
3 Credits
Offered Spring
Comprehensive treatment of modern well logging methods including formation and production logging tools, and techniques and basic concepts of log interpretation. Prerequisites: PETE F301; or permission of instructor. (3+0)

PETE F303 W  Reservoir Rock and Fluid Properties Laboratory
1 Credit
Offered Spring
Measurement of properties of reservoir rock and reservoir fluids. Determination of porosity, permeability, fluid saturations, capillary pressures, specific gravity density, viscosity, surface tension, PVT properties and interpretation of PVT reports for reservoir fluid samples. Special fees apply. Prerequisites: ENGL F111X; ENGL F211X or ENGL F213X or permission of instructor; PETE F301. (0+3)

PETE F370  Sedimentology and Structural Geology for Petroleum Engineers (n)
4 Credits
Offered Fall Odd-numbered Years
Origin and distribution of sedimentary rocks including depositional environments, stratigraphic relationships and structures. Emphasis on the relationship to petroleum occurrences and petroleum exploration. Laboratory exercises on mapping, structural problems and facies relationships in petroleum exploration. Prerequisites: GEOS F101X or GE F261. Cross-listed with GEOS F370. (3+3)

PETE F407  Petroleum Production Engineering
3 Credits
Offered Fall
Production system analysis, inflow performance analysis, gas lift design, sucker rod pumping and production decline analysis. Prerequisites: PETE F476; ES F341 and ES F346. (3+0)

PETE F411 W  Drilling Fluids Laboratory
1 Credit
Offered Spring
Design, composition and measurement of drilling fluid properties, evaluation of mud activities and chemical treatment of contaminated drilling fluid. Special fees apply. Prerequisites: ENGL F111X; ENGL F211X or ENGL F213X or permission of instructor; concurrent enrollment in PETE F426. (0+3)

PETE F421  Reservoir Characterization
3 Credits
Offered Spring
Reservoir rock properties and their spatial variations; estimation of reserves; introduction to theory and application of geostatistics to reservoir characterization; presentation of fundamental geostatistical concepts including: variogram analysis, estimation variance, kriging and stochastic simulations. Impact of geologic structure on oil recovery methods. Prerequisites: PETE F301; PETE F302; GEOS F370. Stacked with PETE F621. (3+0)

PETE F426  Drilling Engineering
3 Credits
Offered Spring
Principles of drilling, drilling fluids and rheology, drilling problems, drilling hydraulics, well control techniques and casing seat selection. Prerequisites: ES F331; ES F341. (3+0)

PETE F431  Natural Gas Engineering
2 Credits
Offered Fall
Natural gas production and condensate reservoirs. Design of processing, transportation, distribution and flow measurement systems. Prerequisites: PETE F301. (2+0)

PETE F456  Petroleum Evaluation and Economic Decisions
3 Credits
Offered Spring
Economic appraisal methods for oil field developmental project evaluations including risk analysis, probability and statistics in decision making and evaluations. Case studies. Prerequisites: MATH F202X and PETE F476. (3+0)

PETE F458  Petroleum Engineering Internship
1 Credit
Offered As Demand Warrants
Practical experience in a supervised petroleum engineering environment. Participation in professional petroleum operations including drilling, production, formation evaluation, reservoir engineering, petroleum property evaluation, management and economics. Written and oral presentation of technical report describing experience is required. Course may be repeated for up to 4 credits. Prerequisites: Junior standing or permission of instructor. (0+0)

PETE F466  Petroleum Recovery Methods
3 Credits
Offered Fall
Flow and physicochemical principles of oil recovery by water, chemical, thermal and miscible floods. Prediction of recovery for each of these methods. Prerequisites: PETE F301 and PETE F476. (3+0)

PETE F476  Petroleum Reservoir Engineering
3 Credits
Offered Spring
Quantitative study and prediction of the behavior of oil and gas reservoirs under primary, secondary and tertiary recovery mechanisms. Prerequisites: PETE F301. (3+0)

PETE F478  Well Test Analysis
2 Credits
Offered Spring
Transient flow of fluids through porous media, application of solutions of the diffusivity equation to pressure buildup, drawdown, interference testing and log-log type curve analysis and effect of reservoir heterogeneities on pressure behavior. Prerequisites: PETE F407; PETE F476; MATH F302. (2+0)

PETE F481 W  Well Completions and Stimulation Design
3 Credits
Offered Fall
Design of casing programs, cementing, open-hole and set-through completions, well stimulation; completion and workover fluids; and evaluation of sand control and workover operations. Prerequisites: ENGL F111X; ENGL F211X or ENGL F213X or permission of instructor; ES F341; PETE F426. (2+3)
PETE F487A Petroleum Project Design
1 Credit Offered Fall
Two-semester course with emphasis on design and analysis of petroleum exploration, production and reservoir engineering systems by analytical, experimental and computer methods. Identification of requirements, conceptual and detailed project design and cost analysis. Completion of an engineering project. Note: Oral communication intensive and writing intensive credits are earned upon successful completion of PETE F487B. Special fees apply. Prerequisites: Senior standing. (2+0)

PETE F487B W,O Petroleum Project Design
1 Credit Offered Spring
Two-semester course with emphasis on design and analysis of petroleum exploration, production and reservoir engineering systems by analytical, experimental and computer methods. Identification of requirements, conceptual and detailed project design and cost analysis. Completion of an engineering project. Special fees apply. Prerequisites: COMM F131X or COMM F414X; ENGL F111X; ENGL F211X or ENGL F213X or permission of instructor; senior standing. (2+0)

PETE F489 Reservoir Simulation
2 Credits Offered Spring
The theory and use of computer reservoir simulation in petroleum reservoir and production engineering. Special fees apply. Prerequisites: PETE F476; MATH F310 or ES F301. (2+0)

PETE F607 Advanced Production Engineering
3 Credits Offered As Demand Warrants
Production system analysis, production optimization, downhole equipment design, surface facilities design, oil and gas processing, gas and oil treating systems, disposal well systems, project organization and field development. Special fees apply. Prerequisites: Graduate standing, PETE F407 or equivalent; or permission of instructor. (3+0)

PETE F608 Flow Assurance in the Petroleum Industry
3 Credits Offered As Demand Warrants
Study of the thermodynamics of gas hydrates; paraffin waxes; asphaltenates; scale and chemistry of corrosion and erosion processes. Study of chemical and physical methods used for mitigation of solid phase formation. Experimental analysis and modeling of solid phase formation envelopes. Analysis of flow regimes resulting from the presence of solid phases in oil and gas flow lines. Special fees apply. Prerequisites: Permission of the instructor. (3+0)

PETE F610 Advanced Reservoir Engineering
3 Credits Offered As Demand Warrants
Concepts and tools for solving petroleum reservoir engineering problems; advances in petroleum reservoir engineering. Emphasis on material balance methods and their application to estimate reserves and calculate water influx; diversity equations and solutions; gas and water coning; streamline tracking; and decline curve analysis, productivity index and well performance models for vertical, horizontal and multilateral wells. Special fees apply. Prerequisites: PETE F476 or permission of instructor. (3+0)

PETE F621 Applied Reservoir Characterization
3 Credits Offered As Demand Warrants
Review of reservoir rock properties and their spatial variations; estimation of reserves; introduction to theory and application of geostatistics to reservoir characterization; presentation of fundamental geostatistical concepts including variogram analysis, estimation variance, kriging and stochastic simulations. Impact of geologic structure on oil recovery. Use of computer software for reservoir characterization and class project. Special fees apply. Prerequisites: Graduate standing in Petroleum Engineering; or permission of instructor. Stacked with PETE F421. (3+0)

PETE F630 Water Flooding
3 Credits Offered As Demand Warrants
A study of the fundamental concepts and procedures for the design of waterflooding processes in petroleum reservoirs. Special fees apply. Prerequisites: PETE F301; PETE F476; or permission of instructor. (3+0)

PETE F645 Petroleum Geology
3 Credits Offered Alternate Fall Even-numbered Years
Examines the origin of petroleum, the geologic controls on its distribution and accumulation and the basic tools used for exploration and exploitation, including subsurface mapping, well logging, and exploration geophysics. Special fees apply. Prerequisites: Graduate standing or permission of the instructor. Cross-listed with GEOS F645. (3+0)

PETE F656 Advanced Petroleum Economic Analysis
3 Credits Offered As Demand Warrants
Economic analysis of petroleum production leading towards increasing cost efficiency in the petroleum and related industries. Qualitative and quantitative description of production forecasts and reserve estimation; oil and gas pricing; cash flow analysis; risk and uncertainty of operation of oil and gas production (financing, debt/equity ratio, depreciation and taxation). Special fees apply. Prerequisites: PETE F407, PETE F456; or permission of instructor. (3+0)

PETE F661 Applied Well Testing
3 Credits Offered As Demand Warrants
Equations for transient flow of single phase fluids through porous media, extension to sample multiphase flow, isolated and developed multiwell flow, conventional drawdown and buildup analysis, log-log type curve analysis, interference testing, fractured wells, pulse tests, and drill stem tests. Special fees apply. Prerequisites: PETE F476; PETE F610; or permission of instructor. (3+0)

PETE F662 Enhanced Oil Recovery
3 Credits Offered As Demand Warrants
Secondary and tertiary oil recovery processes, including waterflooding and chemical and thermal recovery methods. Special fees apply. Prerequisites: PETE F476 or PETE F610 or permission of instructor. (3+0)

PETE F663 Applied Reservoir Simulation
3 Credits Offered As Demand Warrants
Mathematical description of the reservoir, organization of reservoir simulation study, history matching and prediction for several published case studies of reservoir simulations. Special fees apply. Prerequisites: Reservoir Engineering course, e.g. PETE F476 or PETE F610, or permission of instructor. (3+0)

PETE F665 Advanced Phase Behavior
3 Credits Offered As Demand Warrants
The development and application of phase equilibrium simulators to predict fluid properties for reservoir fluids. Special fees apply. Prerequisites: PETE F301 or permission of instructor. (3+0)

PETE F666 Drilling Optimization
3 Credits Offered As Demand Warrants
Principles of drilling optimization: drilling cost analysis and control; rheological properties of drilling fluid for optimum hole cleaning; planning an optimum mud program for vertical, directional and horizontal wells; optimizing bit hydraulics. Use of software packages in optimized hydraulics. Special fees apply. Prerequisites: Graduate standing in engineering discipline or permission of instructor. (3+0)

PETE F670 Fluid Flow Through Porous Media
3 Credits Offered As Demand Warrants
The study of transport phenomena in porous media and application to petroleum engineering. Special fees apply. Prerequisites: PETE F301; PETE F476; or permission of instructor. (3+0)

PETE F680 Horizontal Well Technology
3 Credits Offered As Demand Warrants
Review of the state of the art of horizontal well technology covering recent advances in drilling and completion of horizontal wells. Emphasis on field practices, reservoir engineering aspects including well testing and well performance estimation, application of horizontal wells to gas and water coning problems as well as enhanced oil recovery. Special fees apply. Prerequisites: PETE F426; PETE F476; or permission of instructor. (3+0)
PETE F683 Natural Gas Processing and Engineering
3 Credits Offered As Demand Warrants
Natural gas reservoir engineering and gas production practices. Transient flow of real gases, gas field development, gas well testing, transportation and gas storage reservoirs. Special fees apply. Prerequisites: PETE F431; PETE F476; or permission of instructor. (3+0)

PETE F685 Non-Newtonian Fluid Mechanics
3 Credits Offered As Demand Warrants
Characteristics of stress in fluids, flow models of non-Newtonian fluids (Bingham plastic fluids, fluids without yield stress), couette flow analysis of non-Newtonian fluids, surge and swab pressure models for plugged and open-end pipes. Special fees apply. Prerequisites: ES F341; PETE F426 or permission of instructor. (3+0)

PETE F689 Multiphase Flow in Pipes
3 Credits Offered As Demand Warrants
Multiphase flow in pipes, modeling of fluid flow of complex mixtures in pipes, empirical correlations developed in the literature, and calculation of pressure gradients and flow rates during the flow of multiphase fluids through vertical, inclined and horizontal pipes. Special fees apply. Prerequisites: ES F341; MATH F310 or ES F301; PETE F407; or permission of instructor. (3+0)

PHILOSOPHY

PHIL F102 Introduction to Philosophy (h)
3 Credits
Survey of philosophers and problems in the Western tradition beginning with the ancient Greeks (Plato, Aristotle) and continuing with medieval (Anselm, Augustine, Aquinas) and modern European thinkers (Descartes, Hume, Kant, Nietzsche). Themes and topics may vary. (3+0)

PHIL F104 Logic and Reasoning (h)
3 Credits Offered Fall
Principles of deductive and inductive logic and application of the principles to critical thinking in logic and its application. (3+0)

PHIL F108 Critical Thinking (h)
3 Credits Offered As Demand Warrants
Examines the difference between science and pseudoscience, making use of the tools of critical thinking to understand what counts as knowledge. Examples are drawn from evolutionary theory, creationism, astronomy, astrology, history, race theory and Holocaust revisionism. Prerequisites: PHIL F102 or permission of instructor. (3+0)

PHIL F202 Introduction to Eastern Philosophy (h)
3 Credits Offered Spring
Basic assumptions, problems and systems of the major philosophical traditions of the Far East. Prerequisites: PHIL F102 or permission of instructor. (3+0)

PHIL F322X Ethics (h)
3 Credits
“Ethic,” — from the Greek “ethos” meaning character, custom, usage — is the study of value distinctions. Examination of the nature of value judgments — their historical origins and philosophical assumptions — and exploration of the application of value distinctions to contemporary social, religious and scientific/technical Prerequisites: Placement in ENGL F111X or higher; junior standing; or permission of instructor. Recommended but not required: Two courses in the Perspectives on the Human Condition baccalaureate core. (3+0)

PHIL F341 O Theories of Knowledge (h)
3 Credits Offered Fall Even-numbered Years
The nature of knowledge, truth and certainty. Prerequisites: COMM F131X or COMM F141X; PHIL F102. (3+0)

PHIL F342 Theories of Reality (h)
3 Credits Offered Spring Even-numbered Years
Theories of reality and their relationship to science, philosophy and religion. Prerequisites: PHIL F102. (3+0)

PHIL F351 History of Ancient Greek Philosophy (h)
3 Credits Offered Fall
Review of the philosophy of Plato and Aristotle; minor attention to Presocratics. Prerequisites: PHIL F102 or its equivalent. (3+0)

PHIL F352 History of Modern Philosophy: Descartes to Kant (h)
3 Credits Offered Spring
Review of continental rationalist and British empiricist thought, 17th–19th centuries. Prerequisites: PHIL F102 or its equivalent. Recommended: PHIL F351 strongly recommended. (3+0)

PHIL F353 Survey of Buddhist Thought (h)
3 Credits Offered As Demand Warrants
Survey of the major themes and schools of Buddhist thought. Emphasis on the interactions with surrounding cultures and competing philosophical systems. Includes modern developments in India, China, Japan, Tibet and other parts of Asia. Prerequisites: Upper class standing or permission of instructor. (3+0)

PHIL F361 Philosophy in Literature (h)
3 Credits Offered As Demand Warrants
Examination of philosophical issues in literary works. Topics include the nature of free will, the effects of choice in building a character, the desirable (and undesirable) ways of confronting morality, and the nature of evil. Topics and readings vary. (3+0)

PHIL F363 W Philosophy of Religion (h)
3 Credits Offered As Demand Warrants
Introduction to topics such as arguments for the existence and nature of God, the problem of evil, the relation of faith and reason, religious language and the connection of religion to the meaning of life. Prerequisites: ENGL F111X; ENGL F211X or ENGL F213X or permission of instructor. Recommended: PHIL F102 and upper-division status. (3+0)

PHIL F381 Topics in Logics (h)
3 Credits Offered As Demand Warrants
An advanced explanation of problems, philosophies and approaches in logics, including classical, symbolic and comparative logics. Prerequisites: PHIL F104 or its equivalent and permission of instructor. (3+0)

PHIL F402 W Biomedical and Research Ethics (h)
3 Credits Offered Fall
Issues in biomedical ethics. Topics will vary but include discussion of moral principles and problems of research ethics and medical practices, such as: animal and human experimentation; data management; informed consent; therapeutic and non-therapeutic research; physician/patient relationship; autonomy; assisted reproductive technologies; euthanasia; organ transplantation; and allocation of scarce medical resources. Prerequisites: ENGL F111X; ENGL F211X or ENGL F213X; junior or senior standing; a course in philosophy, science or nursing; permission of instructor. Recommended: A course in philosophy, science or nursing. Cross-listed with BIOL F402. (3+0)

PHIL F411 W,O Classical Political Theory (h)
3 Credits Offered Fall Odd-numbered Years
Political ideas from ancient Greece, Rome, and the Judeo-Christian tradition. Theories of Plato, Aristotle, Cicero, Augustine and Aquinas. Prerequisites: COMM F131X or COMM F141X; ENGL F111X or ENGL F211X or ENGL F213X; PHIL F102; PS F101; or permission of instructor. Cross-listed with PS F411. (3+0)

PHIL F412 W Modern Political Theory (s)
3 Credits Offered Spring Even-numbered Years
Political ideas from the Renaissance to the modern world. Theories of Machiavelli, Hobbes, Locke, Rousseau, Burke, Marx and Lenin. Prerequisites: ENGL F111X; ENGL F211X or ENGL F213X; PHIL F102; PS F101; or permission of instructor. Cross-listed with PS F412. (3+0)
PHIL F414  Contemporary Political Philosophy
3 credits  Offered Spring Even-numbered Years
This course takes stock of recent currents in contemporary political thought, including readings from Carl Schmitt, Hannah Arendt, Frantz Fanon, John Rawls, Leo Strauss, Michel Foucault and Theodor Adorno. We ask how these canonical thinkers influence feminist, environmental, postcolonial, anti-essentialist, democratic and post-human political theory today. **Prerequisites:** PS F101, upper division standing or permission of instructor. Cross-listed with PS F414. (3+0)

PHIL F421  Aesthetics (h)
3 Credits  Offered Fall Odd-numbered Years
The nature of aesthetic experience in poetry, music, painting, sculpture, architecture and other arts; studies in relation to artistic production and the role of art in society. **Prerequisites:** Junior/senior standing or permission of instructor. Recommended: PHIL F102 or HUM F201X. (3+0)

PHIL F436  Ethical Theory (h)
3 Credits  Offered Spring Odd-numbered Years
Major ethical theories. Includes virtue theory, social contract theory, deontology and utilitarianism with major arguments for and against. **Prerequisites:** Junior standing or permission of instructor. (3+0)

PHIL F471  Contemporary Philosophical Problems (h)
3 Credits  Offered Fall Even-numbered Years
Ideological issues facing the modern world. **Prerequisites:** PHIL F351; PHIL F352; or permission of instructor. (3+0)

PHIL F472  Ethics in International Affairs (h)
3 Credits  Offered Spring Odd-numbered Years
Examination of questions including: What is in the interest of the nation-state according to the logic of statecraft? How does the national interest relate to broader human interest? How does morality relate to the international legal order? Examination is through theory and case studies. **Prerequisites:** PHIL F322X or equivalent or PS F321; or permission of instructor. Cross-listed with PS F472. (3+0)

PHIL F481  Philosophy of Science (h)
3 Credits  Offered As Demand Warrants
Comparison and discussion of various contemporary methodological positions. **Prerequisites:** Junior standing. (3+0)

PHIL F487  Conceptual Issues in Evolutionary Biology
3 Credits  Offered Spring Odd-numbered Years
Analysis of some of the main models which explain evolutionary change, followed by consideration of the practical implications these models have on the study of biological phenomena in general. Cross-listed with BIOL F487. (3+0)

PHIL F499 W  BA Thesis in Philosophy (h)
3 Credits  Offered As Demand Warrants
Writing the senior thesis in philosophy. **Prerequisites:** ENGL F111X; ENGL F211X or ENGL F213X; or permission of instructor. (1+2)

PHIL F687  Conceptual Issues in Evolutionary Biology
3 Credits  Offered Spring Odd-numbered Years
Analysis of some of the main models which explain evolutionary change, followed by consideration of the practical implications these models have on the study of biological phenomena in general. Cross-listed with BIOL F687. (3+0)

**PHYSICS**

PHYS F102X  Energy and Society (n)
4 Credits  Offered Spring
Exploring the concept of energy. Investigation of the sources, conversion, distribution and ultimate dispersion of energy, as well as the consequences of its use in the development and maintenance of modern society. May be used to fulfill part of the natural science requirement. Designed for non-science majors. Special fees apply. **Prerequisites:** Placement in ENGL F111X or higher; placement in DEV F105 or higher; or permission of instructor. (3+3)

PHYS F103X  College Physics (n)
4 Credits  Offered Fall
Classical physics including vectors, kinematics, Newton’s Laws, momentum, work, energy, rotational motion, oscillations, waves, gravity, fluids, heat, temperature, laws of thermodynamics and kinetic theory. For mathematics, science and liberal arts majors. Special fees apply. **Prerequisites:** High school algebra, trigonometry and geometry; placement in ENGL F111X or higher; placement in DEV F105 or higher; or permission of instructor. (3+3)

PHYS F104X  College Physics (n)
4 Credits  Offered Spring
Coulomb’s Law, electrical potential, capacitance, Kirchhoff’s Laws, magnetic fields, Faraday’s Law, electromagnetic waves, physical and geometrical optics, waves and particles, atomic and nuclear physics. For mathematics, science and liberal arts majors. Special fees apply. **Prerequisites:** PHYS F103X; placement in ENGL F111X or higher; placement in DEV F105 or higher; or permission of instructor. (3+3)

PHYS F115X  Physical Sciences (n)
4 Credits  Offered Spring
Basic concepts and general overview in physics. Presents interrelatedness and interdependence within this scientific field. Special fees apply. **Prerequisites:** Placement in ENGL F111X or higher; placement in DEV F105 or higher; or permission of instructor. Recommended: DEV F105. (3+3)

PHYS F175X  Introduction to Astronomy (n)
4 Credits  Offered Fall
Examination of the science of astronomy and its social consequences, with an emphasis on the interrelationships between astronomy and other sciences. Topics covered: astronomical concepts and tools, the solar system, stellar astronomy and cosmology. Designed for non-science majors. Special fees apply. **Prerequisites:** Placement in ENGL F111X or higher; placement in DEV F105 or higher; or permission of instructor. Recommended: One year of high school physics. (3+3)

PHYS F211X  General Physics (n)
4 Credits  Offered Spring
Vectors, kinematics, Newton’s Laws, momentum, work, energy, rotational motion, oscillations, waves, gravity and fluids. For engineering, mathematics and physical science majors. Special fees apply. **Prerequisites:** Concurrent enrollment in MATH F201X; placement in ENGL F111X or higher; or permission of instructor. Recommended: One year of high school physics. (3+3)

PHYS F212X  General Physics (n)
4 Credits  Offered Fall
Heat, temperature, laws of thermodynamics, Coulomb’s Law, electrical potential, capacitance, Kirchhoff’s Laws, Biot-Savart Law, Faraday’s Law, and electromagnetic waves. For engineering, mathematics and physical science majors. Special fees apply. **Prerequisites:** Concurrent enrollment in MATH F202X; PHYS F211X or ES F208 or concurrent enrollment in ES F210; placement in ENGL F111X or higher; or permission of instructor. (3+3)

PHYS F213X  Elementary Modern Physics (n)
4 Credits  Offered Fall
Geometrical and physical optics, elementary-level modern physics including special relativity, atomic physics, nuclear physics, solid-state physics, elementary particles, simple transport theory, kinetic theory and concepts of wave mechanics. Special fees apply. **Prerequisites:** Placement in ENGL
PHYSICS (PHYS)

F111X or higher; C- or better in MATH F201X and MATH F202X; PHYS F211X; PHYS F212X; or permission of instructor. (3+3)

PHYS F220 Introduction to Computational Physics
4 Credits Offered Spring
Introduction to computational techniques for solving physics problems. The computer is used as a tool to provide insight into physical systems and their behavior in all areas of physics. Special fees apply. Prerequisites: MATH F202X; PHYS F211X; PHYS F212X; PHYS F213X; PHYS F301; or permission of instructor. (3+3)

PHYS F301 Introduction to Mathematical Physics
4 Credits Offered Spring
Introduction to theoretical foundations of classical and modern physics. Includes calculus of vector fields, linear algebra and elementary tensor theory, complex analysis, ordinary linear differential equations, linear partial differential equations, Fourier analysis and probability. Physical applications include planetary motion, rotating bodies and inertia tensor, damped and driven harmonic oscillator, wave equation, Schrödinger’s equation and diffusion systems. Prerequisites: PHYS F211X; PHYS F212X; PHYS F213X; MATH F202X; or permission of instructor. (4+0)

PHYS F313 Thermodynamics and Statistical Physics
4 Credits Offered Spring
Thermodynamic systems, equations of state, the laws of thermodynamics, changes of phase, thermodynamics of reactions, kinetic theory and introduction to statistical mechanics. Prerequisites: PHYS F212X; concurrent enrollment in PHYS F301; or permission of instructor. (4+0)

PHYS F341 Classical Physics I: Particle Mechanics
4 Credits Offered Fall
Newtonian mechanics, conserved mechanical quantities, motion of systems of particles, rigid body statics and dynamics, moving and accelerated coordinate systems, rigid body rotations and Lagrangian mechanics. Prerequisites: PHYS F211X; PHYS F212X; PHYS F220; PHYS F301; or permission of instructor. (4+0)

PHYS F342 Classical Physics II: Electricity and Magnetism
4 Credits Offered Spring
Statics and dynamics of electric and magnetic fields in vacuum and in the presence of materials. Lorentz force law. Maxwell’s equations. Prerequisites: PHYS F341 or permission of instructor. (4+0)

PHYS F343 Classical Physics III: Vibration and Waves
4 Credits Offered Fall
Normal modes and small vibrations, continuum systems, wave mechanics, electromagnetic waves and radiation. Relativistic mechanics and electromagnetism. Prerequisites: PHYS F342 or permission of instructor. (4+0)

PHYS F351 Thermal Physics
2 Credits Offered Spring
Classical macroscopic thermodynamics; systems and states, equations of state, the first and second laws of thermodynamics and their consequences, entropy, enthalpy, Helmholtz and Gibbs functions, equilibrium, Maxwell’s relations. Prerequisites: PHYS F212X, PHYS F220, PHYS F301, PHYS F341; or permission of instructor. (2+0)

PHYS F381 W, O Physics Laboratory (n)
3 Credits Offered Fall
Laboratory experiments in classical and modern physics. Special fees apply. Prerequisites: COMM F131X or COMM F141X; ENGL F111X; ENGL F211X or ENGL F213X; PHYS F213X; PHYS F213X; PHYS F381; or permission of instructor. (1+6)

PHYS F382 W Physics Laboratory (n)
3 Credits Offered Spring
Laboratory experiments in classical and modern physics. Special fees apply. Prerequisites: ENGL F111X; ENGL F211X or ENGL F213X; PHYS F381; or permission of instructor. (1+6)

PHYS F413 Atmospheric Radiation
3 Credits Offered Fall Odd-numbered Years
Atmospheric radiation including the fundamentals of blackbody radiation theory and radiative properties of atmospheric constituents. Discussion of gaseous absorption including line absorption, broadening effects and radiative transfer. Includes scattering, radiative properties of clouds and radiation climatology. Prerequisites/Co-requisites: ATM F401. Cross-listed with ATM F413. Stacked with PHYS F613 and ATM F613. (3+0)

PHYS F421 Quantum Mechanics
4 Credits Offered Fall
Schrödinger’s equation, Born interpretation, operator formalism, measurement and projection, stationary states, one-dimensional systems, hydrogen atom, states of definite angular momentum, perturbation theory. Prerequisites: PHYS F213X; PHYS F220; PHYS F301; or permission of instructor. (4+0)

PHYS F451 Statistical Physics
2 Credits Offered Spring
The canonical ensemble; maximizing entropy, the partition function and Helmholtz free energy, the harmonic oscillator, Einstein and Debye solids, classical systems and the ideal gas, diatomic molecules, equipartition theorem, the photon gas and the blackbody spectrum, the grand canonical ensemble, quantum statistics, Fermion and Boson systems. Prerequisites: PHYS F342, F351, F421; or permission of instructor. (2+0)

PHYS F462 Geometrical and Physical Optics (n)
4 Credits Offered Spring
Geometrical optics, interference and diffraction theory, nonlinear optics, Fourier optics, and coherent wave theory. Special fees apply. Prerequisites: PHYS F211X, PHYS F301; or permission of instructor. (3+3)

PHYS F471A Advanced Topics in Physics I: Condensed Matter Physics I
1 Credit
Emphasis topics provide increased breadth in basic physics. Three topics are offered within the fall and spring semesters of each academic year as compressed 14-lecture, one-credit courses. Prerequisites: PHYS F220; PHYS F301; or permission of instructor. (1+0)

PHYS F471B Advanced Topics in Physics I: Condensed Matter Physics II
1 Credit
Emphasis topics provide increased breadth in basic physics. Three topics are offered within the fall and spring semesters of each academic year as compressed 14-lecture, one-credit courses. Prerequisites: PHYS F220; PHYS F301; or permission of instructor. (1+0)

PHYS F471C Advanced Topics in Physics I: Space and Auroral Physics
1 Credit
Emphasis topics provide increased breadth in basic physics. Three topics are offered within the fall and spring semesters of each academic year as compressed 14-lecture, one-credit courses. Prerequisites: PHYS F220; PHYS F301; or permission of instructor. (1+0)

PHYS F471D Advanced Topics in Physics I: Nonlinear Dynamics
1 Credit
Emphasis topics provide increased breadth in basic physics. Three topics are offered within the fall and spring semesters of each academic year as compressed 14-lecture, one-credit courses. Prerequisites: PHYS F220; PHYS F301; or permission of instructor. (1+0)

PHYS F471E Advanced Topics in Physics I: Biophysics
1 Credit
Emphasis topics provide increased breadth in basic physics. Three topics are offered within the fall and spring semesters of each academic year as compressed 14-lecture, one-credit courses. Prerequisites: PHYS F220; PHYS F301; or permission of instructor. (1+0)
PHYS F471F  Advanced Topics in Physics I: Nuclear and Particle Physics  
1 Credit  
Emphasis topics provide increased breadth in basic physics. Three topics are offered within the fall and spring semesters of each academic year as compressed 14-lecture, one-credit courses. Prerequisites: PHYS F220; PHYS F301; or permission of instructor. (1+0)

PHYS F471G  Advanced Topics in Physics I: General Relativity  
1 Credit  
Emphasis topics provide increased breadth in basic physics. Three topics are offered within the fall and spring semesters of each academic year as compressed 14-lecture, one-credit courses. Prerequisites: PHYS F220; PHYS F301; or permission of instructor. (1+0)

PHYS F471H  Advanced Topics in Physics I: Astrophysics  
1 Credit  
Emphasis topics provide increased breadth in basic physics. Three topics are offered within the fall and spring semesters of each academic year as compressed 14-lecture, one-credit courses. Prerequisites: PHYS F220; PHYS F301; or permission of instructor. (1+0)

PHYS F471I  Advanced Topics in Physics I: Topics in Modern Mathematical Physics  
1 Credit  
Offered Fall and Spring  
By avoiding mathematical complexity, order-of-magnitude techniques increase our physical understanding and allow us to study difficult or intractable problems. Students will learn how to do so and apply these techniques to problems in fluid mechanics, biophysics, astrophysics, and/or other applications. Prerequisites: PHYS F220; PHYS F301; or permission of the instructor. Recommended: PHYS F341; PHYS F342 (1+0)

PHYS F472A  Advanced Topics in Physics II: Planetary Atmospheres  
1 Credit  
Application topics provide expanded exposure to subjects in physics. Three topics are offered within the fall and spring semesters of each academic year as compressed 14-lecture, one-credit courses. Prerequisites: PHYS F220; PHYS F301; or permission of instructor. (1+0)

PHYS F472B  Advanced Topics in Physics II: Fluid Dynamics  
1 Credit  
Application topics provide expanded exposure to subjects in physics. Three topics are offered within the fall and spring semesters of each academic year as compressed 14-lecture, one-credit courses. Prerequisites: PHYS F220; PHYS F301; or permission of instructor. (1+0)

PHYS F472C  Advanced Topics in Physics II: Plasma Physics  
1 Credit  
Application topics provide expanded exposure to subjects in physics. Three topics are offered within the fall and spring semesters of each academic year as compressed 14-lecture, one-credit courses. Prerequisites: PHYS F220; PHYS F301; or permission of instructor. (1+0)

PHYS F472D  Advanced Topics in Physics II: Hamiltonian Mechanics  
1 Credit  
Application topics provide expanded exposure to subjects in physics. Three topics are offered within the fall and spring semesters of each academic year as compressed 14-lecture, one-credit courses. Prerequisites: PHYS F220; PHYS F301; or permission of instructor. (1+0)

PHYS F472E  Advanced Topics in Physics II: Physics of Glaciers  
1 Credit  
Application topics provide expanded exposure to subjects in physics. Three topics are offered within the fall and spring semesters of each academic year as compressed 14-lecture, one-credit courses. Prerequisites: PHYS F220; PHYS F301; or permission of instructor. (1+0)

PHYS F472F  Advanced Topics in Physics II: Remote Sensing  
1 Credit  
Application topics provide expanded exposure to subjects in physics. Three topics are offered within the fall and spring semesters of each academic year as compressed 14-lecture, one-credit courses. Prerequisites: PHYS F220; PHYS F301; or permission of instructor. (1+0)

PHYS F472G  Advanced Topics in Physics II: Solar Physics  
1 Credit  
Application topics provide expanded exposure to subjects in physics. Three topics are offered within the fall and spring semesters of each academic year as compressed 14-lecture, one-credit courses. Prerequisites: PHYS F220; PHYS F301; or permission of instructor. (1+0)

PHYS F472H  Advanced Topics in Physics II: Advanced Laboratory  
1 Credit  
Application topics provide expanded exposure to subjects in physics. Three topics are offered within the fall and spring semesters of each academic year as compressed 14-lecture, one-credit courses. Prerequisites: PHYS F220; PHYS F301; or permission of instructor. (1+0)

PHYS F472I  Advanced Topics in Physics II: Spectroscopy  
1 Credit  
Application topics provide expanded exposure to subjects in physics. Three topics are offered within the fall and spring semesters of each academic year as compressed 14-lecture, one-credit courses. Prerequisites: PHYS F220; PHYS F301; or permission of instructor. (1+0)

PHYS F472J  Advanced Topics in Physics II: Cosmology  
1 Credit  
Application topics provide expanded exposure to subjects in physics. Three topics are offered within the fall and spring semesters of each academic year as compressed 14-lecture, one-credit courses. Prerequisites: PHYS F220; PHYS F301; or permission of instructor. (1+0)

PHYS F472K  Advanced Topics in Physics II: Quantum Computation  
1 Credit  
Application topics provide expanded exposure to subjects in physics. Three topics are offered within the fall and spring semesters of each academic year as compressed 14-lecture, one-credit courses. Prerequisites: PHYS F220; PHYS F301; or permission of instructor. (1+0)

PHYS F472L  Advanced Topics in Physics II: Covariant Kinematics/Dynamics  
1 Credit  
Application topics provide expanded exposure to subjects in physics. Three topics are offered within the fall and spring semesters of each academic year as compressed 14-lecture, one-credit courses. Prerequisites: PHYS F220; PHYS F301; or permission of instructor. (1+0)

PHYS F488  Undergraduate Research  
1–3 Credits  
Advanced research topics from outside the usual undergraduate requirements. Prerequisites: Permission of instructor. Recommended: A substantial level of technical/scientific background. (0+0)

PHYS F605  Physics Teaching Seminar/Practicum  
1 Credit  
Offered Fall and Spring  
This course will give science graduate students both lectures and hands-on training in dealing with all aspects of teaching, focused on but not exclusive to the Teaching Assistant level. Course topics include teaching pedagogy, preparation strategies, student management, time management and learning assessment. Graded Pass/Fail. Prerequisites: Graduate standing in a science discipline; or permission of the instructor. (1+0+1)
### PHYS (PHYS)

**PHYS F608**  Core Skills for Computational Sciences  
3 credits  
This course introduces students to the basic skills required to operate in the high-performance computing (HPC) environment at the Arctic Region Supercomputing Center. Topics include an introduction to HPC, basic Unix/batch/scripting skills, performance programming, shared and distributed memory parallelism, code validation and debugging, data storage and management, and data visualization. Each of these topics will be presented in lecture form. To provide additional applied knowledge, either a thorough case study by a guest speaker and/or a hands-on lab session will be given in support of each. *Prerequisites: Graduate standing in the physical sciences, experience with FORTRAN or C programming language, or permission of instructor.* (3+0)

**PHYS F611**  Mathematical Physics  
3 Credits  
Offered Fall  
Mathematical tools and theory for classical and modern physics. Core topics: linear algebra including eigenvalues, eigenvectors and inner products in finite dimensional spaces. Infinite series. Hilbert spaces and generalized functions. Complex analysis, including Laurent series and contour methods. Applications to problems arising in physics. Selected additional topics, which may include operator and spectral theory, groups, tensor fields and hypercomplex numbers. *Prerequisites: MATH F302; MATH F314; MATH F421; MATH F422; or permission of instructor.* Cross-listed with MATH F611. (3+0)

**PHYS F612**  Mathematical Physics  
3 Credits  
Offered Spring  
Continuation of Mathematical Physics I; mathematical tools and theory for classical and modern physics. Core topics: classical solutions to the principal linear partial differential equations of electromagnetism, classical and quantum mechanics. Boundary value problems and Sturm-Liouville theory. Green's functions and eigenfunction expansions. Integral transforms. Orthogonal polynomials and special functions. Applications to problems arising in physics. Selected additional topics, which may include integral equations and Hilbert-Schmidt theory, perturbation methods and probability theory. *Prerequisites: PHYS/MATH F611 or equivalent; or permission of instructor.* Cross-listed with MATH F612. (3+0)

**PHYS F613**  Atmospheric Radiation  
3 Credits  
Offered Fall Odd-numbered Years  
Fundamentals of blackbody radiation theory and radiative properties of atmospheric constituents. Discussion of gaseous absorption including line absorption, broadening effects and radiative transfer. Includes scattering, radiative properties of clouds, and radiation climatology. *Prerequisites/co-requirements: ATM F601; graduate standing.* Cross-listed with ATM F613. Stacked with PHYS F413 and ATM F413. (3+0)

**PHYS F614**  Ice Physics  
3 Credits  
Offered Spring Even-numbered Years  
A survey of the physics of ice, including the crystal structure and properties of ice, high pressure phases, hydrogen bonding, mechanical properties, thermal properties and surface properties (adhesion, friction). *Prerequisites: MATH F421; MATH F422; graduate standing; or permission of instructor.* Cross-listed with GEOS F614. (3+0)

**PHYS F621**  Classical Mechanics  
3 Credits  
Offered Fall Odd-numbered Years  
Lagrange's equations, two-body problem, rigid body motion, special relativity, canonical equations, transformation theory, and Hamilton-Jacobi method. *Prerequisites: Graduate standing or permission of instructor.* (3+0)

**PHYS F622**  Statistical Mechanics  
3 Credits  
Offered Spring Even-numbered Years  
Classical and quantum statistics of independent particles, ensemble theory and applications. *Prerequisites: PHYS F621; graduate standing; or permission of instructor.* (3+0)

**PHYS F626**  Fundamentals of Plasma Physics  
3 Credits  
Offered Fall  
Single charge particle motion in the electromagnetic fields, plasma kinetic theory, Vlasov equations for collisionless plasmas, magnetohydrodynamic equations, linear plasma waves and instabilities, nonlinear plasma waves and instabilities. *Prerequisites: Graduate standing; or permission of instructor.* (3+0)

**PHYS F628**  Digital Time Series Analysis  
3 Credits  
Offered Spring Even-numbered Years  
Applied time series analysis, including correlation, convolution, filtering and spectral estimation of multivariate data. The statistical properties of estimators; signal detection; and array processing. *Prerequisites: MATH F401 or equivalent; familiarity with a programming language such as C or Fortran; graduate standing; or permission of instructor.* (3+0)

**PHYS F629**  Methods of Numerical Simulation in Fluids and Plasma  
3 Credits  
Offered Spring Odd-numbered Years  
The fundamentals of computer simulation for fluids and multi-particle systems. Topics include methods for the discretization of numerical solutions, and boundary and initial conditions. Methods will be applied to convection, diffusion, and steady states in fluids and plasmas. *Prerequisites: Experience in programming; graduate standing; or permission of instructor.* (3+0)

**PHYS F631**  Electromagnetic Theory  
3 Credits  
Offered Fall Odd-numbered Years  
Electrostatics, magnetostatics, Maxwell's equations, and potentials. Lorentz equations, field energy, gauge conditions, retarded potentials, waves, radiation and tensor formulations. *Prerequisites: Graduate standing or permission of instructor.* (3+0)

**PHYS F632**  Electromagnetic Theory  
3 Credits  
Offered Spring Odd-numbered Years  
Electrostatics, magnetostatics, Maxwell's equations and potentials. Lorentz equations, field energy, gauge conditions, retarded potentials, waves, radiation and tensor formulations. *Prerequisites: PHYS F631 or the equivalent; graduate standing; or permission of instructor.* (3+0)

**PHYS F639**  InSar and its Applications  
3 Credits  
Offered As Demand Warrants  
Introduction to the concepts of repeat-pass spaceborne SAR interferometry and practical use of the technique to derive displacements of the solid Earth, glaciers, and ice sheets to a precision of a few centimeters and accurate digital elevation models of the Earth's surface. *Prerequisites: Basic remote sensing course or permission of instructor.* Cross-listed with GEOS F639. (2+2)

**PHYS F640**  Auroral Physics  
3 Credits  
Offered Spring Odd-numbered Years  
Survey of auroral phenomena, the associated physical processes, and techniques used to investigate the aurora. Includes electron and proton impact spectra; physical processes that accelerate and precipitate electrons and protons; auroral currents; ionospheric effects of auroral activity; and principles for ground-based satellite spectroscopy and imaging and the measurements of magnetic and electric fields. *Prerequisites: Graduate standing or permission of instructor.* (3+0)

**PHYS F647**  Fundamentals of Geophysical Fluid Dynamics  
3 Credits  
Offered Fall Odd-numbered Years  
Introduction to the mechanics of fluid systems, the fundamental processes, Navier-Stokes’ equations in rotating and stratified fluids, kinematics, conservation laws, vortex motion, irrotational flow, laminar flow, boundary layer phenomena, waves, instabilities, turbulent flows and mixing. *Prerequisites: Graduate standing or permission of instructor.* Cross-listed with ATM F647. (3+0)

**PHYS F648**  Nonlinear Dynamics  
3 Credits  
Offered Spring Even-numbered Years  
Introduction into the dynamics of nonlinear systems. Continuous and discrete dynamical systems, stability analysis, bifurcations, limit cycle,
chaos and strange attractors, fractals and dimension algorithms, controlling chaos, synchronization processes, and stochastic dynamical systems.  

**Prerequisites: Synchronization of instructor.** (3+0)  

**PHYS F650**  
**Aeronomy**  
3 Credits  
Offered Fall Even-numbered Years  
The physical and chemical processes that govern the response of planetary atmospheres to solar radiation and energetic particles. Formation of and characteristic processes in the layers within the ionosphere and basic magneto-ionic theory. Includes principles of remote sensing by lidar and radar techniques. **Prerequisites: Graduate standing or permission of instructor.** (3+0)  

**PHYS F651**  
**Quantum Mechanics**  
3 Credits  
Offered Fall Even-numbered Years  
Schrödinger's equations, operator formalism, correspondence principle, central force problems, perturbation theory, quantum statistical mechanics, and applications of quantum mechanics to collision problems, radiation and spectroscopy. **Prerequisites: PHYS F651 or the equivalent; graduate standing or permission of instructor.** (3+0)  

**PHYS F652**  
**Quantum Mechanics**  
3 Credits  
Offered Spring Odd-numbered Years  
Schrödinger's equations, operator formalism, correspondence principle, central force problems, perturbation theory, quantum statistical mechanics, and applications of quantum mechanics to collision problems, radiation and spectroscopy. **Prerequisites: PHYS F651 or the equivalent; graduate standing or permission of instructor.** (3+0)  

**PHYS F653**  
**Space Physics**  
3 Credits  
Offered Alternate Fall Odd-numbered Years  
The physics and dynamics of Earth’s magnetosphere. Discusses the magnetosphere as a test bed for microscopic plasma processes equilibrium configurations, plasma instabilities, highly nonlinear eruptive plasma processes, and global dynamics which involve the interaction of various regions of the magnetosphere. Introduction to various aspects of magnetospheric physics with a systematic discussion of the various elements of the magnetosphere, their structure and dynamics, and a discussion of the relevant plasma physics. **Prerequisites: PHYS F651; graduate standing or permission of instructor.** (3+0)  

**PHYS F673**  
**Magnetospheric Physics**  
3 Credits  
Offered Spring Even-numbered Years  
The physics and dynamics of Earth’s magnetosphere. Discusses the magnetosphere as a test bed for microscopic plasma processes equilibrium configurations, plasma instabilities, highly nonlinear eruptive plasma processes, and global dynamics which involve the interaction of various regions of the magnetosphere. Introduction to various aspects of magnetospheric physics with a systematic discussion of the various elements of the magnetosphere, their structure and dynamics, and a discussion of the relevant plasma physics. **Prerequisites: PHYS F651; graduate standing or permission of instructor.** (3+0)  

POLITICAL SCIENCE  

**PS F100X**  
**Political Economy (s)**  
3 Credits  
Evolution and operation of the American domestic political economy with consideration of market failures and government responses. Review of major issues in political economy such as inflation, poverty and budget deficits. Exploration of linkages between American and global systems. **Prerequisites: Placement in ENGL F111X or higher; junior standing or permission of instructor. Cross-listed with ECON F100X.** (3+0)  

**PS F101**  
**Introduction to American Government and Politics (s)**  
3 Credits  
Principles, institutions and practices of American national government; the Constitution, federalism, interest groups, parties, public opinion and elections. (3+0)
litigations as a policy making device, changes in the nature and scope of judicial power, governmental attorneys, the legal bureaucracy, and judicial agenda setting. **Prerequisites:** PS F101 or permission of instructor. (3+0)

**PS F314 W** Political Ideologies (s)
3 Credits Offered Fall Even-numbered Years
An examination of the purpose of ideology as an orienting set of political ideas with mass appeal. Analysis of 20th century ideologies, including anarchism, communism, liberalism, socialism, environmentalism and feminism. **Prerequisites:** ENGL F111X; ENGL F211X or ENGL F213X; PS F101; or permission of instructor. (3+0)

**PS F315** American Political Thought (s)
3 Credits Offered Spring Odd-numbered Years
Political ideas in the U.S. from colonial times to the present: Puritanism, revolutionary ideas, Constitutionalism, nature of the Union, Progressive movement and pragmatism. **Prerequisites:** PS F101 or permission of instructor. Recommended: HIST F131 and HIST F132 strongly recommended. (3+0)

**PS F321** International Politics (s)
3 Credits Offered Fall
Introduction to the problems, literature and terminology of international relations. Provides a basis for understanding current international affairs. Examines relations between nations, regions and groups, as well as ideas of conflict, security, trade, technology, negotiation, cooperation, revolution, modernization and community. (3+0)

**PS F322 O** International Law and Organization (s)
3 Credits Offered Spring Odd-numbered Years
Case studies in international law (rights and duties of states, jurisdiction and sovereignty, treaties, use of force and adjudication processes); development of regional organizations and integration; the United Nations. **Prerequisites:** COMM F131X or COMM F141X; PS F321; or permission of instructor. (3+0)

**PS F323** International Political Economy (s)
3 Credits Offered Alternate Spring Odd-numbered Years
Exploration of the manner in which political and economic forces interact to affect international flows of goods, money, investments and technology. International political economic relations are examined in several contexts. **Prerequisites:** PS F100X or permission of instructor. (3+0)

**PS F325** Native Self-Government (s)
3 Credits Offered Spring Odd-numbered Years
Indigenous political systems, customary law and justice in Alaska emphasizing the organization of Native governance, federal Indian Law and Alaska state chartered local government. Comparisons between Alaska Native political development and those of tribes in the contiguous 48 states and northern hemisphere tribal people. **Prerequisites:** One or more of the following: HIST F110, PS F263, TM F201 or permission of instructor. Cross-listed with ANS F325. (3+0)

**PS F340** Women and Politics (s)
3 Credits Offered Spring Odd-numbered Years
In-depth examination of the relevance of gender in political thought and action. Topics will vary and may include: an historical perspective of political ideas on the nature and status of women; women's involvement in national and/or international political movements and organizations; feminist approaches to the social sciences; feminism as a political ideology. **Prerequisites:** One political science course or permission of instructor. Recommended: WGS F201. Cross-listed with WGS F340. (3+0)

**PS F401 W** Political Behavior (s)
3 Credits Offered Spring Even-numbered Years
Attitudes, opinions and beliefs of the American electorate and the impact of these factors on political behavior; role of political organizations (parties and interest groups) in modern American politics. **Prerequisites:** ENGL F111X; ENGL F211X or ENGL F213X or permission of instructor. (3+0)

**PS F403 W,O** Public Policy (s)
3 Credits Offered Spring Even-numbered Years
The processes of policy development, implementation, and change are analyzed with major policy frameworks and models used in contemporary political science. These frameworks and models will be applied to environmental sustainability and other social policy issues. Students will develop expertise in a specific policy area and complete oral presentations related to their policy interests. **Prerequisites:** PS F101, upper division standing, or permission of instructor. Stacked with PS F603. (3+0)

**PS F411 W,O** Classical Political Theory (h)
3 Credits Offered Fall Odd-numbered Years
Political ideas from ancient Greece, Rome and the Judeo-Christian tradition. Theories of Plato, Aristotle, Cicero, Augustine, and Aquinas. **Prerequisites:** COMM F131X or COMM F141X; ENGL F111X; ENGL F211X or ENGL F213X; PHIL F102; PS F101; or permission of instructor. Cross-listed with PHIL F411. (3+0)

**PS F412 W** Modern Political Theory (s)
3 Credits Offered Spring Even-numbered Years
Political ideas from the Renaissance to the modern world. Theories of Machiavelli, Hobbes, Locke, Rousseau, Burke, Marx and Lenin. **Prerequisites:** ENGL F111X; ENGL F211X or ENGL F213X; PHIL F102; PS F101; or permission of instructor. Cross-listed with PHIL F412. (3+0)

**PS F414** Contemporary Political Philosophy 3 credits Offered Spring Even-numbered Years
This course takes stock of recent currents in contemporary political thought, including readings from Carl Schmitt, Hannah Arendt, Frantz Fanon, John Rawls, Leo Strauss, Michel Foucault and Theodor Adorno. We ask how these canonical thinkers influence feminist, environmental, postcolonial, anti-essentialist, democratic and post-human political theory today. **Prerequisites:** PS F101, upper-division standing or permission of instructor. Cross-listed with PHIL F414. (3+0)

**PS F425** Federal Indian Law and Alaska Natives (s)
3 Credits Offered Fall
The “special relationship” between the federal government and Native Americans based on land transactions and recognition of tribal sovereignty. Federal Indian law and policy evolving from this relationship. Legal rights and status of Alaska Natives. **Prerequisites:** any one or more of the following: PS F101; TM F112; TM F201; HIST F110 or permission of the instructor. Recommended: PS F263. Cross-listed with ANS F425. (3+0)

**PS F435 W** Constitutional Law I: Federalism (s)
3 Credits Offered Spring Odd-numbered Years
Constitutional doctrines and historical evolution of federalism and the separation of powers in the United States. Emphasis on the court’s role in arbitrating intergovernmental and interbranch disputes, the constitutional status of the administrative bureaucracy, and the control of war power and foreign policy. **Prerequisites:** ENGL F111X; ENGL F211X or ENGL F213X; PS F101; or permission of instructor. (3+0)

**PS F436 W** Constitutional Law II: Civil Rights and Liberties (s)
3 Credits Offered Spring Even-numbered Years
Origin and development of civil rights and civil liberties in the U.S. Emphasis on the social, political and philosophical justifications of rights as expressed in judicial decision and constitutional doctrine. **Prerequisites:** ENGL F111X; ENGL F211X or F213X; PS F101; or permission of instructor. Recommended: PS F303. (3+0)

**PS F437** United States Foreign Policy (s)
3 Credits Offered Spring Even-numbered Years
U.S. foreign policy in the postwar and post cold war period, including development of policy (domestic and foreign influences), administration of political, economic and military policies, and evaluation of policy effectiveness. Analyzes the historical background of the U.S. role in the world today and leading personalities and events that are a part of it. **Prerequisites:** PS F321; or permission of instructor. (3+0)
PS F447  U.S. Environmental Politics (s)  3 Credits
Offered Spring
Examination of U.S. political institutions as they relate to making policies for protecting the quality of the natural environment. The politics of nuclear waste, endangered species, air and water pollution, and wilderness preservation. Analysis of the National Environmental Policy Act, sustainable development, limits to growth and other topics. Course is also available online. Prerequisites: Upper-division standing or permission of instructor. Recommended: PS F101. Stacked with NORS F647; PS F647. (3+0)

PS F450  Comparative Indigenous Rights and Policies (s)  3 Credits
Offered As Demand Warrants
Comparative approach to analyzing Indigenous rights and policies in different nation-state systems. Multiple countries and specific policy developments examined for factors promoting or limiting self-determination. Prerequisites: Upper-division standing or permission of instructor. Recommended: PS F201 or equivalent comparative politics course. (3+0)

PS F451  Political Economy of the Global Environment (s)  3 Credits
Offered Spring Odd-numbered Years
Examination of the international strategies of circumpolar states. Consideration of theoretical and practical elements of strategy formation in major issue areas such as national security, the political economy, human rights and scientific exchange. Prerequisites: Upper-division standing or permission of instructor. Stacked with NORS F651; PS F651. (3+0)

PS F452  International Relations of the North (s)  3 Credits
Offered Spring Odd-numbered Years
Examination of the international strategies of circumpolar states. Consideration of theoretical and practical elements of strategy formation in major issue areas such as national security, the political economy, human rights and scientific exchange. Prerequisites: Upper-division standing or permission of instructor. Stacked with NORS F652; PS F652. (3+0)

PS F453  International Law and the Environment (s)  3 Credits
International environmental law. Includes international case law regulating the sea, airspace, outer space and the polar regions; comprehensive international regulatory and legal instruments to protect the environment (e.g. the U.N. Framework Convention on Climate Change); and the doctrines, principles, and rules of international law that are basic to an understanding of international legal regimes and the environment. Course is also available online. Prerequisites: Upper-division standing or permission of instructor. Recommended: Undergraduate course in international law, organization, or politics. Stacked with NORS F653; PS F653. (3+0)

PS F455 O  Political Economy of the Global Environment (s)  3 Credits
Offered Fall Even-numbered Years
Interaction between basic aspects of the global economy (international trade, investment and development) and the natural environment. Topics include the economic impact of global environmental agreements and the environmental impact of global markets, transnational corporations, and development assistance by organizations such as the World Bank. Prerequisites: COMM F131X or COMM F411X; upper-division standing or permission of instructor. Stacked with NORS F655; PS F655. (3+0)

PS F456 O  Science, Technology, and Politics (s)  3 Credits
Offered Spring Odd-numbered Years
Relationship of science, technology and politics. Connections among scientific knowledge, technology, technological innovations, politics and power. Gender roles and the influence of western science. Both historical and comparative aspects are included. Course is also available online. Prerequisites: COMM F131X or COMM F411X; upper-division standing or permission of instructor. Recommended: PS F101. Stacked with NORS F656; PS F656. (3+0)

PS F457  Comparative Environmental Politics (s)  3 Credits
Offered Fall Odd-numbered Years
Enduring issues of the field of comparative politics and their relation to global environmental problems. Biodiversity, transboundary pollution, and climate warming. Explores how state-society relations, political institutions, national political capacity, political processes and organizations, and international commitments potentially shape the nature and dynamics of global environmental politics and vice versa. Course is also available online. Prerequisites: Upper-division standing or permission of instructor. Recommended: PS F201 or equivalent comparative politics course. Stacked with NORS F658; PS F658. (3+0)

PS F460 W  Government and Politics of Canada (s)  3 Credits
Offered Spring Odd-numbered Years
The Canadian political system, covering the Canadian constitution, federal structure, parliamentary government and public policy, as well as contemporary issues concerning Native rights and the Canadian North. Students will complete a major research paper on specific policy areas (language, education, health care, environment, natural resources, foreign relations). Prerequisites: ENGL F111X; ENGL F211X or ENGL F213X; PS F201; upper-division standing or permission of instructor. Stacked with NORS F660; PS F660. (3+0)

PS F462  Alaska Government and Politics (s)  3 Credits
Alaska's government and politics, in the context of American state and local government, and politics and governments of circumpolar northern nations. Topics include political history, constitution, political parties, interest groups, elections, public opinion, governor, legislature, judiciary, administration and local governments. Compares Alaska to the contiguous 48 states and subnational governments of the circumpolar North; examines how government institutions and processes respond to social, environmental and political changes of Northern communities. Prerequisites: Upper-division standing or permission of instructor. Stacked-with: NORS F662; PS F662. (3+0)

PS F464 W  East Asian Governments and Politics (s)  3 Credits
Offered Fall Even-numbered Years
Modern East Asia (including China, Taiwan, Japan, North and South Korea) politics and society, including governmental institutions, political processes and regional and global foreign relations. Prerequisites: ENGL F111X; ENGL F211X or ENGL F213X; PS F201 or HIST F102; or permission of instructor. (3+0)

PS F467 W  Political Development in Latin America and the Caribbean (s)  3 Credits
Offered Fall Odd-numbered Years
Exploration of major issues and concepts in the development and governances of modern Latin America and the Caribbean region, including the legacies of colonialism, revolution, military rule, economic challenges and the quest for democratic stability. Includes a historical overview of the region and cases drawn from the Caribbean, Mexico, Central and South America. Prerequisites: ENGL F111X; ENGL F211X or ENGL F213X; PS F201 or HIST F102; or permission of instructor. Recommended: SPAN F221. Cross-listed with HIST F467. (3+0)

PS F468 W  Government and Politics of Russia (s)  3 Credits
Offered Spring Odd-numbered Years
Current developments in Russia from a number of perspectives. The effect of history and geography on political change; the nature of Russian government and society; the legacies of Lenin, Stalin, Gorbachev and the ideological nature of regimes and leadership. Economic forces and the political struggle in governance; revolution, democracy and reform; and the international role of Russia, particularly in relation to the former Soviet republics, Eastern Europe and other border areas. Prerequisites: ENGL F111X; ENGL F211X or ENGL F213X; PS F201 or HIST F102; or permission of instructor. Stacked with NORS F668; PS F668. (3+0)

PS F472  Ethics in International Affairs (h)  3 Credits
Offered Spring Odd-numbered Years
Examination of questions including: What is in the interest of the nation-state according to the logic of statecraft? How does the national interest relate to the broader human interest? How does morality relate to the international legal order? Examination is through theory and case studies. Prerequisites: PHIL F322X or equivalent or PS F321; or permission of instructor. Cross-listed with PHIL F472. (3+0)

PS F475  Internship in Public Affairs (s)  3 Credits
Study of public agencies or organizations through actual experience. May be repeated for credit for a maximum of 12 credits. Prerequisites: Upper-division standing or permission of instructor. Credit/division standing or permission of instructor. (0+0+10)
PS F492P  Senior Seminar in Political Science  
1–6 Credits 
Provides scope and depth to the study of political science. Exploration of new literature in the field and interdisciplinary perspectives. Requirements include a major research paper. Graded Pass/Fail. Prerequisites: ENGL F111X; ENGL F211X or F213X (or permission of instructor); junior standing. (1.5–6+0)

PS F499 W  Senior Thesis  
3 Credits 
Thesis will draw from the literature in at least two sub-fields of political science (U.S. government/politics, political theory, public law, comparative politics, international relations) in its analysis. Prerequisites: ENGL F111X; ENGL F211X or ENGL F213X; PS F101; PS F222; senior standing; permission of instructor. (1.5+0+7.5)

PS F603  Public Policy  
3 Credits 
The processes of policy development, implementation, and change are analyzed along with major policy frameworks and models used in contemporary political science. These frameworks and models will be applied to environmental sustainability and other social policy issues. Students will develop expertise in a specific policy area and skills in research design preparing them to analyze public policy. Prerequisites: Graduate standing. Cross-listed with NORS F603. (3+0)

PS F647  U.S. Environmental Politics  
3 Credits 
U.S. political institutions as they relate to making policies for protecting the quality of the natural environment. The politics of nuclear waste, endangered species, air and water pollution, and wilderness preservation. Analysis of the National Environmental Policy Act, sustainable development, limits to growth and other topics. Course is also available online. Prerequisites: Graduate standing or permission of instructor. Cross-listed with NORS F647. (3+0)

PS F650  Comparative Indigenous Rights and Policies  
3 Credits 
Offered As Demand Warrants 
Comparative approach to analyzing Indigenous rights and policies in different nation-state systems. Multiple countries and specific policy developments examined for factors promoting or limiting self-determination. Prerequisites: Graduate standing. Stacked with PS F450; ANS F450. (3+0)

PS F654  International Law and the Environment  
3 Credits 
Offered Fall Odd-numbered Years 
International environmental law. Includes international case law regulating the sea, airspace, outer space and the polar regions; comprehensive international legal and legal instruments to protect the environment (e.g., the U.N. Framework Convention on Climate Change); and the doctrines, principles, and rules of international law that are basic to an understanding of international legal regimes and the environment. Course is also available online. Prerequisites: Graduate standing or permission of instructor. Recommended: Undergraduate course in international law, organization, or politics. Cross-listed with NORS F654. (3+0)

PS F655  Political Economy of the Global Environment  
3 Credits 
Offered Fall Odd-numbered Years 
Interactions between basic aspects of the global economy (international trade, investment and development) and the natural environment. Topics include the economic impact of global environmental agreements and the environmental impact of global markets, transnational corporations, and development assistance by organizations such as the World Bank. Prerequisites: Graduate standing or permission of instructor. Cross-listed with NORS F655. (3+0)

PS F656  Science, Technology, and Politics  
3 Credits 
Relationship of science, technology and politics. Connections among scientific knowledge, technology, technological innovations, politics and power. Both historical and comparative aspects are included. Course is also available online. Prerequisites: Graduate standing or permission of instructor. Recommended: PS F101. Cross-listed with NORS F656. (3+0)

PS F658  Comparative Environmental Politics  
3 Credits 
Offered Fall Odd-numbered Years 
Enduring issues of the field of comparative politics and their relation to global environmental problems. Biodiversity, transboundary pollution and climate warming. Explores how state-society relations, political institutions, national political capacity, political processes and organizations, and international commitments potentially shape the nature and dynamics of global environmental politics and vice versa. Course is also available online. Prerequisites: Graduate standing or permission of instructor. Recommended: PS F201 or equivalent comparative politics course. Cross-listed with NORS F658. (3+0)

PS F660  Government and Politics of Canada  
3 Credits 
Offered Spring Odd-numbered Years 
The Canadian political system, covering the Canadian constitution, federal structure, parliamentary government and public policy, as well as contemporary issues concerning Native rights and the Canadian North. Students will complete a major research paper on specific policy areas (language, education, health care, environment, natural resources, foreign relations). Prerequisites: PS F201; graduate standing; or permission of instructor. Cross-listed with NORS F660. (3+0)

PS F662  Alaska Government and Politics  
3 Credits 
Offered Spring Odd-numbered Years 
Alaska's government and politics, in the context of American state and local government, and politics and governments of circumpolar northern nations. Topics include political history, constitution, political parties, interest groups, elections, public opinion, governor, legislature, judiciary, administration and local governments. Compares Alaska to the contiguous 48 states and subnational governments of the circumpolar North; examines how government institutions and processes respond to social, environmental and political changes of Northern communities. Prerequisites: Graduate standing or permission of instructor. Cross-listed with NORS F662. (3+0)

PS F668  Government and Politics of Russia  
3 Credits 
Offered Spring Odd-numbered Years 
Current developments in Russia from a number of perspectives. The effect of history and geography on political change; the nature of Russian government and society; the legacies of Lenin, Stalin, Gorbachev, and the ideological nature of regimes and leadership. Economic forces and the political struggle in governance; revolution, democracy and reform; and the international role of Russia, particularly in relation to the former Soviet republics, Eastern Europe and other border areas. Prerequisites: PS F201; graduate standing; or permission of instructor. Cross-listed with NORS F668. (3+0)

PS F669  Arctic Politics and Governance  
3 Credits 
Offered Fall 
This course traces current developments in Arctic politics and governance from multiple perspectives: exploring, interests, processes, and behaviors of Arctic state- and non-state actors, individually and collectively. The course surveys the formal and informal institutions that govern resource development, pollution, shipping, state-indigenous relations, and security. Prerequisites: PS F450, PS F452 or PS F454 or equivalent; graduate standing; or permission of instructor. A background in comparative politics and/or international relations is also recommended. (3+0)

PS F692  Graduate Seminar  
1–6 Credits 
Offered As Demand Warrants 
Intensive study of selected topics in the discipline. (1-6+0)

PS F692P  Graduate Seminar  
1–6 Credits 
Offered As Demand Warrants 
Intensive study of selected topics in the discipline. Graded Pass/Fail. (1-6+0)
POWER GENERATION

PGEN F101 Introduction to Power Generation, Distribution and Alternative Energy
3 Credits
Designed for those interested in gaining knowledge of the modern methods of commercial power generation and its distribution. Provides an overview of current trends toward the development of stable, sustainable, alternative energy, production method(s) and terminology/concepts relative to modern industrial power generation. Recommended: ENGL F111X; any 100-level MATH. (3+0)

PGEN F102 Basic Electricity for Power Generation Operators
4 Credits
Introduction to basic electrical theory and to hands-on training for basic electricity. Introduction to basic electrical equipment, systems, and instrumentation utilized in the production and control of commercial electrical power generation. Recommended: ENGL F111X; any F100-level MATH. (3+2)

PGEN F103 Introduction to Power Generation: Maintenance
4 Credits
Designed for those interested in advancing their knowledge of maintenance relative to the commercial power industry. Provides overview of power generation equipment and the routine maintenance required to keep the equipment. Also provides an overview of safe working practices, tools, procedures, drawings, Piping and Instrumentation (P&IDs) and Process Safety Management (PSM). Prerequisites: PGEN F101; PGEN F102; or permission of instructor. Recommended: Computation course. (3+2)

PGEN F104 Gas and Steam Turbines: Cogeneration and Combined Cycle Technologies
4 Credits
Introduces basic information associated with modern gas and steam turbines, and the systems in which they are used to produce electrical power and/or steam for heating. Prerequisites: PGEN F101; PGEN F102; PGEN F103; or permission of instructor. Recommended: Computation course. (4+0)

PROCESS TECHNOLOGY

PRT F101 Introduction to Process Technology
3 Credits
Introduction to process operations in industry. Non-mathematical overview of general information, processes, procedures and equipment a process operator would be expected to know and use. (3+0)

PRT F110 Introduction to Occupational Safety, Health and Environmental Awareness
3 Credits
Overview of the field of safety, health and environment within the process industry. Covers plant hazards, safety, and environmental systems and equipment, and applicable government regulations and industry standards. (3+0)

PRT F117 Drafting for Technicians
3 Credits
Offered As Demand Warrants
Skills and techniques needed to produce process piping and instrumentation drawings. Special fees apply. (2+2)

PRT F120 Water Quality Management for Process Industries
4 Credits
Offered As Demand Warrants
Overview of the chemistry, biology, hydraulics and hydrology related to water management in industries. Water distribution systems, water processing, operation of water works, wastewater processing, advanced wastewater treatment and water reuse. (3+3)

PRT F130 Process Technology I: Equipment
4 Credits
Selected process equipment including rotating machinery and process units. Emphasis on equipment components, construction, preventative maintenance and safety. Includes hands-on experience. Prerequisites: PRT F101. (3+2)

PRT F135 Stationary Equipment
4 Credits
Offered Fall
A detailed hands-on lecture/lab course covering stationary equipment used in a variety of process industries. Piping, valves, vessels, tanks, exchangers, heaters, boilers, mineral processing, mill equipment and distillation equipment are covered. (3+2)

PRT F140 Industrial Process Instrumentation I
3 Credits
Physics of pressure, temperature, level and flow measurement; mechanical and electrical aspects of instruments used to control dynamics of processes. Dynamics of automatic control including proportional control, automatic reset, derivative action and integral timing. Prerequisites: DEV M F105 or higher or permission of instructor. (2+2)

PRT F144 Industrial Process Instrumentation II
3 Credits
Continuation of PRT F140. Emphasis on repair, maintenance and calibration, including hands-on physical training on a wide variety of process instruments. Prerequisites: PRT F140. (2+2)

PRT F160 Oil and Gas Exploration and Production I
3 Credits
Surveys oil and gas exploration and production issues including marketing, geology, reservoir economics, legal aspects of resource ownership, drilling and production technologies, product separation, safety and environmental issues. Course may not be audited. Prerequisites: Must be enrolled in the PRT program or permission of Program Chair. (3+0)

PRT F230 Process Technology II: Systems
4 Credits
Integration of equipment concepts to show how the individual components interact as part of a system and how each system works within an entire processing facility. Emphasis on the common systems found in each Alaska process industry. Systems topics include upstream oil and gas productions, petrochemicals and refinery processes, refrigeration, power generation, milling, boilers and heaters, coolers and heat exchangers. Prerequisites: PRT F130. (3+2)

PRT F231 Process Technology III: Operations
4 Credits
Duties and responsibilities of the process operator on the job. Includes the details of normal operation, upset conditions, emergency action plans, start-ups, shutdowns, operating modes, turnarounds and routing maintenance activity. Prerequisites: PRT F230. (3+2)

PRT F240 Industrial Process Instrumentation III
3 Credits
Offered As Demand Warrants
A study of digital and analog industrial measurement and control instrumentation, including continuous analog control loops, relay logic and programmable logic controllers. Emphasis is on commonly used process measurement devices, control methods and strategies, and the proper selection, identification, design, installation and operation of instrumentation. Prerequisites: PRT F140; PRT F144; or permission of instructor. Recommended: MATH F103X or higher. (2+2)

PRT F248 Valve Maintenance and Instrumentation
3 Credits
Offered As Demand Warrants
Specific advanced subjects of industrial process valve maintenance and instrumentation. Includes calibration, configuration, troubleshooting, and use of valves with instrumentation. Concepts of contemporary plant control systems, commonly used industrial process measurement, control communication protocols and topologies related to valve control will be discussed. Covers maintenance and operation of gate, globe, ball, plug, check and
special-purpose valves. Details of actuators and various accessories related to valve maintenance and control will be explained and related to valve selection based on application. Recommended: PRT F130. (3+1)

PRT F250  Process Troubleshooting  3 Credits
Troubleshooting process operations and problems. Using indicators, variables and controllers along with a formalized process troubleshooting. Troubleshooting examples will reflect current needs of industry. Prerequisites: PRT F230 (3+0)

PRT F255  Quality Concepts for the Process Industry  1 Credit
Introduction to current quality concepts applied to role of process technician. Includes quality concepts with respect to the client and the role of statistical processes used by the operator in achieving quality. (1+0)

PRT F275  Process Technology Internship  1–9 Credits
Offered As Demand Warrants
Working experience in and exposure to various stages and settings within the process industry. Endorsed and promoted by Alaska Process Industry Careers Consortium, the internship is an intensive exposure to the various duties and responsibilities of the process operator in Alaska. A maximum of 9 credits may be earned. Prerequisites: Permission of instructor. Recommended: PRT F101, PRT F110, PRT F140. (0+5–45)

---

**PSYCHOLOGY**

PSY F101  Introduction to Psychology (s)  3 Credits
Principles of general psychology emphasizing natural science and social science orientation. Cultural, environment, heredity and psychological basis for integrated behavior; visual, audition and the other senses; motivation and emotion; basic processes in learning, problem solving, and thinking; personality; psychological disorders — their prevention and treatment, and therapeutic strategies. (3+0)

PSY F201  Culture and Psychology (s)  3 Credits
Offered Fall and Spring
This course presents a survey of both historic and contemporary psychological research and theory on culture. Includes discussion on cross-cultural, multicultural, and cultural perspectives in psychology. Also introduces students to diversity-based clinical and community applications of psychological research. Prerequisites: PSY F101. (3+0)

PSY F240  Psychology of Development (s)  3 Credits
Offered Fall and Spring
The psychology of human development from conception to death. Critical emphasis on theory and research within the field of developmental psychology with the role of culture as an influencing factor. Prerequisites: PSY F101 or permission of the instructor. (3+0)

PSY F245  Child Development (s)  3 Credits
Physical, cultural, emotional, cognitive and social aspects of a child’s development from the prenatal period through early adolescence. Focus on developmental theories including Erikson, Gardner, Gilligan, Kagen, Sternberg, Vygotsky and other contemporary theories of child and adolescent development. Prerequisites: ENGL F111X or permission of instructor. Cross-listed with ED F245 (3+0)

PSY F250  Introductory Statistics for Social Sciences  3 Credits
Offered Spring
Statistics applied to social scientific topics. Includes descriptive statistics, frequency distributions, sampling distributions, elementary probability, estimation of population parameters, hypothesis testing (one- and two-sample problems), correlation, simple linear regression and one-way analysis of variance. Prerequisites: MATH F100X or MATH F107X or MATH F200X and PSY F101 or SOC F100X or SOC F201 or permission of instructor. Cross-listed with SOC F250. (3+0)

PSY F275  Introduction to Social Science Research Methods (s)  3 Credits
Offered Fall and Spring
Introduction to research methods in psychology. Includes the scientific process, developing research ideas, experimental and non-experimental designs, sampling, surveys and data analysis. Prerequisites: PSY F101 or permission of instructor. (3+0)

PSY F304  Personality (s)  3 Credits
Offered Spring Even-numbered Years
Psychological and social/cultural determinants of personality formation including appropriate theories in both areas. Prerequisites: PSY F101 and PSY F275 or permission of instructor. (3+0)

PSY F320  History and Systems of Psychology (s)  3 Credits
Offered As Demand Warrants
The history of present psychology from associationism to humanism with attention to both the philosophical and physiological foundations of psychology, the most important theorists and movements, and paradigmatic shifts in the evolution of contemporary psychological systems. Prerequisites: PSY F101. Recommended: previous or current enrollment in PSY F275. (3+0)

PSY F330  Social Psychology (s)  3 Credits
Offered Alternate Fall Odd-numbered Years
Analysis of intergroup relationships in terms of process and value orientation, their influences on the personality, and aspects of collective behavior on group and person. Aspects of social interaction that have cultural and intercultural variation. Also offered through eLearning and Distance Education some semesters (depending on availability of instructor). Prerequisites: PSY F101 or SOC F100X; PSY F275 or SOC F373. Cross-listed with SOC F330. (3+0)

PSY F333  Human Sexualities Across Cultures (s)  3 Credits
Offered Spring Odd-numbered Years
Exploration of how people in a variety of cultures, both contemporary and historical, construct the meaning and experience of sexuality, and express themselves as sexual beings. Interdisciplinary study includes psychology, sociology, anthropology, gender studies, and related fields, with particular focus determined by which department is offering the course. Prerequisites: SOC F100X; or SOC F201 or PSY F101 or WGS F201; or permission of instructor. Recommended: PSY F275 or SOC F373. Cross-listed with SOC F333 and WGS F332. (3+0)

PSY F335 O/2  Brain and Behavior  3 Credits
Offered Alternate Fall Odd-numbered Years
Study of the biological bases of human behavior. Emphasis on functional anatomy of the nervous system to understand normal behavior and behavioral disorders in terms of their psychology, development, evolution and function. Meets one-half of core upper division oral communication intensive requirement. Prerequisites: COMM F131X or COMM F141X; PSY F101 plus previous or concurrent enrollment in PSY F275; or permission of instructor. Recommended: BIOL F112X or BIOL F116X (3+0)

PSY F337 W  Sport Psychology  3 Credits
Offered As Demand Warrants
Theoretical and practical applications of psychological issues related to participation in physical activities, including exercise adherence, performance enhancement, group dynamics, leadership and coaching behaviors, arousal/anxiety, intervention strategies and lifespan participation. Prerequisites: ENGL F111X; ENGL F211X or ENGL F213X; PSY F101; or permission of instructor. (3+0)

PSY F345  Abnormal Psychology (s)  3 Credits
Offered Fall
A study of abnormal behavior, its causes, treatment and social impact. The major classifications of disorders are presented. Also available through eLearning and Distance Education some semesters (depending on availability of instructor). Prerequisites: PSY F101 or permission of instructor. (3+0)
Major theories, research and empirical data which describes the psychology of women as a discrete field, philosophical values of feminism and history of women's roles in society. The impact of culture on women interpersonally and intrapsychically examined across cultures. Prerequisites: COMM F131X or COMM F141X; PSY F101 or WGS F201; or permission of instructor. Recommended: PSY F275 or SOC F373. Cross-listed with WGS F360. (3+0)

Explores the effects of licit, illicit, therapeutic, and non-therapeutic drugs on behaviors, physiology, emotions, and thought processes. Includes introduction to factors impacting these effects, such as cultural, environmental, and societal influences. Topics covered also include alcoholism, law enforcement and legal aspects of drug use and abuse, drug education alternatives, and treatment and rehabilitation of drug users. Prerequisites: PSY F101 or permission of instructor. Recommended: PSY F275. (3+0)

Application of psychological principles, theories and methods to issues related to work processes and work organizations. Includes employee selection, motivation, performance appraisal, decision-making, group dynamics, power and leadership, job design, and organizational change and development. Prerequisites: COMM F131X or COMM F141X; ENGL F111X; ENGL F211X or ENGL F213X; PSY F101; PSY F250 or equivalent; PSY F275 or equivalent or permission of the instructor. (3+0)

Theory and research on the fundamentals of learning. Topics include information processing, attention and consciousness, learning processes, memory structures, retrieval, and the biological and cultural considerations relevant to each. Prerequisites: PSY F101; PSY F275; nine credits of psychology courses with a grade of C- or higher; or permission of instructor. (3+0)

Survey of principles and applications of community psychology, emphasizing person-environment interactions and societal and cultural impacts upon individual and community functioning. Attention given to interventions which facilitate psychological competence and empowerment, prevent disorder, and promote social change. Prerequisites: ENGL F111X; ENGL F211X or ENGL F213X; PSY F101; PSY F275; 9 credits of psychology courses with grade of C- or higher; or permission of instructor. (3+0)

Survey of clinical psychology methods and approaches with consideration of psychological assessment and treatment. Topics include specific counseling strategies, such as psychoanalysis, behavior therapy, crisis intervention, rational-emotive and humanistic approaches, along with ethics in clinical practice and issues in cross-cultural counseling and psychological assessment and treatment. A clinical lab will allow students to apply their classroom learning and acquire hands-on experience in clinical skills. Prerequisites: Nine credit hours of PSY courses to include PSY F101 and PSY F345; or permission of the instructor. (2+3)

Scientific study of behaviors that relate to health enhancement, disease and injury prevention, safety and rehabilitation. While mental health is included, the emphasis is on physical health. Prerequisites: PSY F101; PSY F275; and junior standing. (3+0)

An integrated physiological and psychological approach to sensation, including the fundamental mechanisms of vision, hearing, taste, smell and movement. Emphasis will include theoretical models and systems of perception, and how they are influenced by cultural, developmental, hereditary, physiological, psychological and social factors. Meets core upper division writing and oral intensive requirements. Prerequisites: ENGL F111X; ENGL F211X or ENGL F213X; COMM F131X or COMM F141X; nine credit hours of PSY courses (which must include PSY F101 and PSY F275); or permission of instructor. (3+0)

An integrated approach to the study of research design and analysis in psychology. Emphasis on research methodologies and techniques. Design, execution and analysis of social science research. Prerequisites: ENGL F111X; ENGL F211X or ENGL F213X; PSY F101; PSY/SOC F250 or STAT F200X; PSY F275; permission of instructor. (2+3)

Introduction to classical and contemporary research within the qualitative (or interpretive) paradigm of social science. Discusses the theoretical frameworks, historical traditions, epistemological and ethical issues of qualitative approaches. Uses hands-on experience in the practicalities and excitement of a variety of methods for gathering qualitative data and conducting qualitative analyses. Prerequisites: ENGL F111X; ENGL F211X or ENGL F213X; one lower-division social science research methods course; or permission of instructor. Cross-listed with SOC F480. (3+0)

Synthesis and integration of knowledge and skills developed by psychology majors. Includes a general knowledge of psychology, a basic knowledge of the research process and methods, insights into the way culture, gender, ethnicity, social class, and other diversity issues influence research and practice in psychology. Prerequisites: PSY F275; Psychology major with senior standing. (3+0)

Individual practice and training to work in a setting or experience the work of a psychologist. Faculty supervision on campus or on site. Requires 50 clock hours per credit hour. Placement must be arranged during the prior semester before registering for this course. Graded Pass/Fail. Prerequisites: Permission of instructor; PSY F101; Psychology major with junior or senior standing; with minimum 12 credits of psychology. Recommended: PSY F275. (1+0)

Introduces current trends in community, clinical and indigenous psychology. Students are encouraged to explore how these three fields complement each other to bring about positive change in community and clinical settings. Special emphasis on ways to conceptualize mental health and community issues in culturally appropriate ways. Course will be video-conferenced between UAA and UAF campuses. The course will make use of Blackboard and E-res to support distance delivery. Prerequisites: Graduate standing in Psychology or permission of instructor. (1+0)

Covers the appropriate and valid ways of describing and explaining human behavior by using the social context, culture and history of indigenous groups. Includes indigenous approaches to values, health, the interconnection of family and community; the nature of spirituality and indigenous healing; and the importance of elders and spiritual healers. Course will be video-conferenced between UAA and UAF campuses. The course will make use of Blackboard and E-res to support distance delivery. Prerequisites: Admittance to the Psychology Ph.D. program or permission of instructor. (3+0)
PSY F603  Alaska and Rural Psychology 3 Credits  Offered Spring
Introduces rural community psychology, including the diversity of rural communities, with emphasis on Alaska and the rural circumpolar North. Provides an introduction to rural health promotion, prevention and behavioral health care, and a basis for understanding many of the issues of services planning and delivery in rural areas. Course will be video-conferenced between UAA and UAF campuses. The course will make use of Blackboard and E-res to support distance delivery. Prerequisites: PSY F632; graduate standing in Psychology; or permission of instructor. (3+0)

PSY F604  Biological and Pharmacological Bases of Behavior 3 Credits  Offered Fall
Biological underpinnings of behavior and the basic principles of pharmacology. Deals with physiological causes and contributors to psychopathology and the medical sequelae of psychiatric disorders. Topics will include issues such as differential diagnosis, referral for medical or psychiatric evaluation and the functional and structural characteristics of relevant physiological systems. Course will be video-conferenced between UAA and UAF campuses. The course will make use of Blackboard and E-res to support distance delivery. Prerequisites: PSY F632; graduate standing in Psychology; or permission of instructor. (3+0)

PSY F605  History and Systems of Psychology 1 Credit  Offered Fall
A brief philosophically oriented overview of the history of psychology. Compares Western psychology in the 19th and 20th centuries and selected indigenous psychologies of Asia and North America. Special attention is given to systems of thought that have emerged since the founding of psychology as an empirical science. Course will be video-conferenced between UAA and UAF campuses. The course will make use of Blackboard and E-res to support distance delivery. Prerequisites: Graduate standing in Psychology or permission of instructor. (1+0)

PSY F606  Native Ways of Healing 3 Credits  Offered Fall
Explores healing from a variety of Native perspectives, particularly from an Alaska Native perspective. Emphasizes the preparation and education of healers, their roles and work and integration within the community. Students will have the opportunity to examine the possible integration of clinical and community psychology with indigenous approaches to healing. Course will be video-conferenced between UAA and UAF campuses. The course will make use of Blackboard and E-res to support distance delivery. Prerequisites: Graduate standing in Psychology or permission of instructor. (3+0)

PSY F607  Cognition, Affect and Culture 3 Credits  Offered Spring
Presents an overview of attention, memory, appraisal and emotion with applications to clinical psychology in a cultural context. Cultural influences on emotional experience and cognition are explored. The etiology and treatment of psychological disorders with significant cognitive and affective disturbance are explored. Course will be video-conferenced between UAA and UAF campuses. The course will make use of Blackboard and E-res to support distance delivery. Prerequisites: Graduate standing in Psychology or permission of instructor. (3+0)

PSY F611  Ethics and Professional Practice 3 Credits  Offered Spring
Comprehensive overview of ethical principles and legal statutes involved in clinical and community practice and research. Designed as a forum for discussion of ethical issues and other concerns relevant to professionals in psychology, with particular emphasis given to ethical issues in cross cultural and rural contexts in Alaska. Course will be video-conferenced between UAA and UAF campuses. The course will make use of Blackboard and E-res to support distance delivery. Prerequisites: Admittance to the Psychology Ph.D. program or permission of instructor. (3+0)

PSY F612  Human Development in a Cultural Context 3 Credits  Offered Spring
Study of development theory, research and substantive applied issues across the life span. Particular emphasis on understanding how culture and sociocultural context impact the interplay of biology and environment in development of essential qualities and characteristics of individuals. Course will be video-conferenced between UAA and UAF campuses. The course will make use of Blackboard and E-res to support distance delivery. Prerequisites: Graduate standing in Psychology or permission of instructor. (3+0)

PSY F616  Program Evaluation and Community Consultation I 3 Credits  Offered Fall
The first in a two-course series, providing an overview of theories, methods and applications of program evaluation and community consultation as tools for facilitating systemic and programmatic changes in community and clinical settings. Seminar covers techniques of entry into various settings and designing program evaluations in collaboration with various community organizations. Course will be video-conferenced between UAA and UAF campuses. The course will make use of Blackboard and E-res to support distance delivery. Prerequisites: PSY F639; graduate standing in Psychology; or permission of instructor. (3+0)

PSY F617  Program Evaluation and Community Consultation II 3 Credits  Offered Spring
The second in a two-course series, introducing the principles and dynamics involved in various types of consultative relationships in community and clinical settings, with a focus on cross-cultural and ethical issues. Covers methods of program evaluation implementation and use of program evaluation findings for consulting with relevant stakeholders. Course will be video-conferenced between UAA and UAF campuses. The course will make use of Blackboard and E-res to support distance delivery. Prerequisites: PSY F616; graduate standing in Psychology or permission of instructor. (3+0)

PSY F622  Multicultural Psychopathology 3 Credits  Offered Fall
An overview of contemporary views on child and adult psychopathology from a multicultural perspective. The fundamentals of clinical interviewing and diagnostics. Includes training in the DSM-IV diagnostic system. The role of culture, ethnicity, gender and social class in symptom formation and the experience of psychological disorders will be examined. Course will be video-conferenced between UAA and UAF campuses. The course will make use of Blackboard and E-res to support distance delivery. Prerequisites: PSY F616; graduate standing in Psychology or permission of instructor. (3+0)

PSY F623  Intervention I 3 Credits  Offered Fall
Increases knowledge and skills related to traditional and nontraditional therapeutic interventions. Students are provided with a range of theoretical perspectives, a conceptual understanding of and an opportunity to practice a wide range of culturally relevant and appropriate techniques that are applicable in traditional and non-traditional community mental health settings. Course will be video-conferenced between UAA and UAF campuses. The course will make use of Blackboard and E-res to support distance delivery. Prerequisites: Graduate standing in Psychology or permission of instructor. (3+0)

PSY F629  Intervention II 3 Credits  Offered Spring
Deepens understanding of the variety and application of intervention techniques in diverse settings. Directs students to explore the efficacy of specific interventions in a range of settings and with a variety of populations. Shapes critical thinking and basic intervention evaluation skills. Course will be video-conferenced between UAA and UAF campuses. The course will make use of Blackboard and E-res to support distance delivery. Prerequisites: PSY F623; admittance to Psychology Ph.D. program or permission of instructor. (3+0)
PSY F62 Community Psychology Across Cultures
3 Credits  Offered Fall
An overview of theory, research and practice of community psychology with particular emphasis on cross-cultural themes, design and evaluation of interventions in remote and rural community settings, prevention and health promotion, and social change. Particular emphasis will be on issues relevant to Alaska Native communities. Course will be video-conferenced between UAA and UAF campuses. The course will make use of Blackboard and E-res to support distance delivery. Prerequisites: Graduate standing in Psychology or permission of instructor. (3+0)

PSY F63 Tests and Measurement in Multi-Cultural Context
3 Credits  Offered Fall
Principles of construction, analysis and evaluation of psychological tests in a multicultural context. Emphasizes culturally sensitive application of psychological tests and measurements. Focuses on the history, theory and methods of psychological testing by examining intelligence, personality and vocation. Discusses widely-used intelligence and personality tests and procedures. Course will be video-conferenced between UAA and UAF campuses. The course will make use of Blackboard and E-res to support distance delivery. Prerequisites: Graduate standing in Psychology or permission of instructor. (3+0)

PSY F64 Research Methods
3 Credits  Offered Spring
Methods used for research in community, clinical and cross-cultural settings. Introduces epistemologies and ethics relevant to research with rural and indigenous people. Includes a variety of designs and data-gathering methods to improve understanding of behavior in social settings. Quantitative, qualitative and mixed method approaches will be presented. Course will be video-conferenced between UAA and UAF campuses. The course will make use of Blackboard and E-res to support distance delivery. Prerequisites: Admittance to Psychology PhD program or permission of instructor. (3+0)

PSY F65 School Counseling
3 Credits  Offered Fall
Topics related to the role of the school counselor such as consultation, career guidance, and culturally appropriate assessment. Prerequisites: COUN F623; admittance to Counseling program or School Counseling Certification program or permission of the instructor. Cross-listed with COUN F646. (3+3)

PSY F66 Professional Ethics
3 Credits  Offered Fall
The ethical standards of the American Psychological Association and American Counseling Association will be examined, discussed and compared. Students will be provided with opportunities to apply these general principles to specific cases. Students will be expected to demonstrate a knowledge of the principles of these three ethical codes and an ability to apply them. Prerequisites: Admittance to Master's program in Psychology or Counseling, or permission of instructor. (3+0)

PSY F67 Cross-Cultural Psychopathology
3 Credits  Offered Fall
An overview of contemporary perspectives on child and adult psychological disorders from the perspective of cultural psychology. Fundamentals of therapeutic interviewing. Training in use of the DSM-IV diagnostic system. Examination of the role of culture, ethnicity, gender, and social class in symptom formation and the experience of illness, and critical examination of these issues in clinical application of the DSM-IV. Training in DSM-IV cultural formulation. Prerequisites: PSY F345 or equivalent; admittance to Counseling program; or School Counseling Certification program; or permission of instructor. Cross-listed with COUN F660. (3+0)

PSY F68 Practicum Placement — Clinical I
1–3 Credits  Offered Fall
Supervised clinical practicum experience in psychological interviewing, diagnosis and psychotherapy. Applied techniques focusing on delivery of clinical services in traditional or non-traditional clinical settings. Cultural factors are considered in each of these areas. May be repeated for a maximum of 9 credits. Special fees apply. Prerequisites: PSY F611; PSY F622; PSY F623; PSY F645; admittance to the Psychology PhD program; or permission of instructor. May be repeated for a maximum of 9 credits. (1-3+0-7-20)

PSY F69 Practicum Placement — Clinical II
1–3 Credits  Offered Spring
Advanced clinical practicum experience designed to provide increased depth in applying theory to the practice and improving skills as a clinician. Covers application of psychological assessment principles. Impact of cultural factors continues as a major aspect of the practicum experience. May be repeated for a maximum of 9 credits. Prerequisites: PSY F652; admittance to Psychology PhD program; or permission of instructor. (1-3+0)

PSY F70 Quantitative Analysis
3 Credits  Offered Fall
The underlying principles of statistics, including the logic of statistical inference, probability, power, effect size, and type one and two errors. Uses statistics for designs including the description of groups (data reduction), correlation, predictive models (regression), inferential statistics, analysis of mixed- method designs, and common nonparametric techniques. Course will be video-conferenced between UAA and UAF campuses. The course will make use of Blackboard and E-res to support distance delivery. Prerequisites: PSY F639; admittance to Psychology PhD program; or permission of instructor. (3+0)

PSY F71 Qualitative Analysis
3 Credits  Offered Fall
Introduction to the theory of qualitative inquiry, qualitative methodologies and basic techniques of qualitative research. Enables the student to use qualitative methods in research. Course will be video-conferenced between UAA and UAF campuses. The course will make use of Blackboard and E-res to support distance delivery. Prerequisites: PSY F639; graduate standing in Psychology or permission of instructor. (3+0)

PSY F72 Multivariate Statistics
3 Credits  Offered As Demand Warrants
Provides a conceptual discussion of and statistical software training in advanced statistical analysis, including multivariate regression, canonical correlation, discriminant analysis, multivariate analysis of variance, principle component analysis, factor analysis, logistic regression, and cluster analysis. Course will be video-conferenced between UAA and UAF campuses. The course will make use of Blackboard and E-res to support distance delivery. Prerequisites: PSY F639; PSY F657; admittance to Psychology PhD program; or permission of instructor. (3+0)

PSY F73 Counseling Theories and Applications I
3 Credits  Offered As Demand Warrants
A survey of the major theoretical systems of counseling and psychotherapy combined with a laboratory experience focused on building microskills in counseling. Specific application of theoretical principles will be investigated, analyzed and described. Prerequisites: Admittance to Counseling Program or School Counseling Certification program or permission of instructor. Cross-listed with COUN F623. (3+2)

PSY F74 Cross-Cultural Counseling
3 Credits  Offered Spring; As Demand Warrants
An examination of cultural and ethnic variables in human nature and their effect on the counseling process. Specific focus will be placed on the nature and function of culture, cultural variables in the context of the human experience, universal and culture-specific aspects of the counseling process, barriers to effective cross-cultural counseling, specific ethnic and cultural considerations, and methods of intellectual training with special emphasis on Alaskan applications. Prerequisites: Admittance to the Counseling Program; or School Counseling Certification program; or permission of instructor. Cross-listed with COUN F660. (3+0)
PSY F666  Family and Network Therapy
3 Credits  Offered Spring
Survey of concepts and theories of function and dysfunction in the area of couples and families as social networks. Introduction to the skills necessary for intervention in these systems. Prerequisites: COUN F623; admittance to the Counseling program; or School Counseling Certification program; or permission of instructor. Cross-listed with COUN F666. (3+0)

PSY F669  Health Psychology
3 Credits  Offered Fall
Scientific study of behaviors relating to health enhancement, disease and injury prevention, safety and rehabilitation. While mental health is included, the emphasis is on physical health. Prerequisites: Graduate standing or permission of instructor. (3+0)

PSY F672  Practicum Placement — Community I
3 Credits  Offered Fall
Community practicum experience designed to provide increased depth in applying theory to practice and improving skills as a community psychologist. Impact of cultural factors will be a major aspect of the practicum experience. Course will be video-conferenced between UAA and UAF campuses. The course will make use of Blackboard and E-res to support distance delivery. Students will also be under close supervision with a community organization. May be repeated for a maximum of 9 credits. Special fees apply. Prerequisites: Graduate standing in Psychology or permission of instructor. (3+0)

PSY F673  Practicum Placement — Community II
3 Credits  Offered Spring
An advanced community practicum experience designed to provide increased depth in applying theory to practice and improving skills as a community psychologist. Impact of cultural factors will be a major aspect of the practicum experience. Course will be video-conferenced between UAA and UAF campuses. The course will make use of Blackboard and E-res to support distance delivery. Students will also be under close supervision with a community organization. Second phase of PSY F672. Prerequisites: PSY F672; graduate standing in Psychology; or permission of instructor. (3+0)

PSY F674  Group Counseling
3 Credits  Offered Summer Even-numbered Years
Kinds and types of groups with emphasis on methods, problems and skills needed in working with groups in a counseling situation. Prerequisites: COUN F623; Admittance to the Counseling program; or School Counseling Certification program; or permission of instructor. Cross-listed with COUN F674. (3+0)

PSY F679  Multicultural Psychological Assessment I
3 Credits  Offered Spring
Introduces administration, scoring and interpretation of various intellectual and objective personality assessment instruments, as well as their psychometric properties, for children and adults. Emphasis on the meaningful integration of test results into a culturally sensitive assessment report. Highlights professional and ethical issues related to multicultural assessment practices emphasizing Alaska Natives. Course will be video-conferenced between UAA and UAF campuses. The course will make use of Blackboard and E-res to support distance delivery. Special fees apply. Prerequisites: PSY F673; admittance to the Psychology PhD program; or permission of instructor. (3+0)

PSY F681  Substances of Abuse in Alaska
1 Credit  Offered Fall
Overview of the most prevalent substances of abuse in Alaska including physical, psychological, social and medical consequences of use and abuse. Prerequisites: Admittance into the Psychology PhD program or permission of instructor. First in the sequence PSY F681, PSY F682, and PSY F683. For doctoral students in the program. In exceptional cases to students not in the doctoral program, but with appropriate background and training will be given special permission to take the course. (1+0)

PSY F682  Substance Abuse Assessment and Treatment Planning
1 Credit  Offered Fall
Specialized tests, measurement and treatment planning for substance abuse. Emphasis on integrating results into culturally relevant treatment plans following the American Society for Addiction Medicine dimensional criteria. Course will be video-conferenced between UAA and UAF campuses. The course will make use of Blackboard and E-res to support distance delivery. Prerequisites: Admittance to Psychology PhD program or permission of instructor. PSY F682 is the second in a continuing series that includes PSY F681 and PSY F683. For doctoral students in the program, it is to be taken as a series. In exceptional cases, students not in the doctoral program but with the appropriate background and training will be given special permission to take the course. (1+0)

PSY F683  Clinical Interventions in Substance Abuse
1 Credit  Offered Fall
Conceptualizing substance abuse as a continuum from intervention to after-care. Relevant evidence-based interventions and therapeutic communities are addressed within the context of rural Alaska Native communities. Course will be video-conferenced between UAA and UAF campuses. The course will make use of Blackboard and E-res to support distance delivery. PSY F683 is the third in a continuing series that includes PSY F681 and PSY F682. For doctoral students in the program, it is to be taken as a series. In exceptional cases, students not in the doctoral program but with the appropriate background and training will be given special permission to take the course. Prerequisites: Admittance to the Psychology PhD program or permission of instructor. (1+0)

PSY F684  Clinical Supervision
3 Credits
The clinical, ethical and cultural issues involved in supervision. Contemporary, empirically supported information regarding various approaches to supervision will be examined. Covers both the relationship inherent in clinical supervision and training in leadership and supervision of employees in other work settings. Course will be video-conferenced between UAA and UAF campuses. The course will make use of Blackboard and E-res to support distance delivery. Prerequisites: PSY F673; admittance to Psychology PhD program; or permission of instructor. (3+0)

PSY F686  Predoctoral Internship
6 Credits
Understanding and application of assessment and intervention techniques in diverse settings. Students are placed in clinical or community settings for 40 hours per week to apply and sharpen skills. Students work under a local supervisor who manages student caseloads and assignments in collaboration with the course instructor. Graded Pass/Fail. Approval contingent upon approval of Dissertation proposal and of DCTs (Directors of Clinical Training). (6+0)

PSY F687  Multicultural Psychological Assessment II
3 Credits
Advanced psychological assessment tools including interviews, projective techniques and neurocognitive assessment. Emphasis on the integration of cognitive personality and other test results derived from an assessment battery into a meaningful and culturally sensitive psychological assessment report. Course will be video-conference between UAA and UAF campuses. The course will make use of Blackboard and E-res to support distance delivery. Special fees apply. Prerequisites: PSY F679; admittance to Psychology PhD program or permission of instructor. (3+0)
RECREATION

RECR courses are available to all UAF students who meet stated prerequisites. Students with disabilities are encouraged to participate. Any students requiring special accommodations are asked to contact the department office as soon as possible.

RECR F100–F170 courses include instruction, practice, and activity in physical activities, sports and dance. Courses may be taken for credit once. Courses are graded Pass/Fail.

RECR F110A  Beginning Swimming
1 Credit Offered As Demand Warrants
Beginning level swimming skills, proper breathing techniques and beginning strokes. Emphasizes personal water safety. Graded Pass/Fail. (0+3)

RECR F110B  Intermediate Swimming
1 Credit Offered As Demand Warrants
Intermediate-level swimming skills, proper breathing techniques and beginning strokes. Emphasizes personal water safety. Graded Pass/Fail. (0+3)

RECR F110C  Advanced Swimming
1 Credit Offered As Demand Warrants
Advanced-level swimming skills, proper breathing techniques and beginning strokes. Emphasizes personal water safety. Graded Pass/Fail. (0+3)

RECR F110D  Conditioning Swimming
1 Credit Offered As Demand Warrants
Covers proper warm-up and warm-down techniques, lap swim etiquette, and proper use of workout equipment. Graded Pass/Fail. (0+3)

RECR F110E  Beginning Scuba
1 Credit Offered As Demand Warrants
Instruction and practice in beginning underwater aquatic activities. Graded Pass/Fail. (0+3)

RECR F110J  Fundamentals of Competitive Water Polo
1 Credit Offered As Demand Warrants
Introduction to the game of water polo. Students will learn techniques used in water polo, as well as the basic rules and regulations of the sport. Graded Pass/Fail. Prerequisites: RECR F110D or instructor permission. (0+3)

RECR F120A  Aerobics
1 Credit Offered As Demand Warrants
Moderate to high impact dance routines set to music designed to increase cardiovascular strength, promote coordination, and increase overall body strength and flexibility. Graded Pass/Fail. (0+3)

RECR F120C  Beginning Yoga
1 Credit Offered As Demand Warrants
Beginning concepts and philosophy of yoga, breathing, postures, mediation, Sanskrit names of exercises, increased muscle tone and flexibility. Graded Pass/Fail. (0+3)

RECR F120D  Intermediate Yoga
1 Credit Offered As Demand Warrants
Intermediate concepts and philosophy of yoga, breathing, postures, meditation, Sanskrit names of exercises, increased muscle tone and flexibility. Graded Pass/Fail. (0+3)

RECR F120F  Exercise And Fitness
1 Credit Offered As Demand Warrants
Instruction and practice in activities at beginning through advanced levels including (but not limited to) multi-fitness conditioning, recreational fitness activities, running, cycling, walking, weight training, aerobics, power lifting, tai chi chuan and yoga. Graded Pass/Fail. (0+3)

RECR F120G  Military Fitness Training
1 Credit Offered As Demand Warrants
Instruction and practice in fitness activities concentrating on flexibility, strength, and muscular and cardiovascular endurance. Graded Pass/Fail. (0+3)

RECR F120H  Multi Fitness Conditioning
1 Credit Offered As Demand Warrants
An overview of medium to high intensity aerobic exercise and muscle strengthening, conditioning and toning. Graded Pass/Fail. (0+3)

RECR F120J  Weight Training
1 Credit Offered As Demand Warrants
Design and perform strength training routines using resistance to achieve overall fitness. Graded Pass/Fail. (0+3)

RECR F120K  Advanced Weight Training
1 Credit Offered As Demand Warrants
Design and perform strength training routines using resistance to achieve overall fitness. Graded Pass/Fail. (0+3)

RECR F120L  Zumba Fitness
1 Credit Offered As Demand Warrants
Introduction to basic Zumba Fitness/Latin dance steps from salsa, merengue, cumbia, reggaeton, and belly dance along with other international rhythms. Students will learn to identify the music, as well as a brief history of the dance. Graded Pass/Fail. (0+3)

RECR F130A  Beginning Jazz Dance
1 Credit Offered As Demand Warrants
Develop a repertoire of jazz dance movement and terminology including plies, isolations, stretches, traveling steps, battements, pas de bourre, jazz slides and turns. History of jazz dance. Graded Pass/Fail. Cross-listed with THR F130A. (0+3)

RECR F130B  Intermediate Jazz Dance
1 Credit Offered As Demand Warrants
Develop a repertoire of jazz dance movement and terminology including plies, isolations, stretches, traveling steps, battements, pas de bourre, jazz slides and turns. History of jazz dance. Graded Pass/Fail. Cross-listed with THR F130B. (0+3)

RECR F130C  Advanced Jazz Dance
1 Credit Offered As Demand Warrants
Develop a repertoire of a jazz dance movement and terminology including plies, isolations, stretches, traveling steps, battements, pas de bourre, jazz slides and turns. History of jazz dance. Graded Pass/Fail. Cross-listed with THR F130C. (0+3)

RECR F130D  Modern Dance
1 Credit Offered As Demand Warrants
Develop a repertoire of modern dance movement and terminology including contraction and release, swings, triplets, fall and recovery, rolls and improvisations. Graded Pass/Fail. Cross-listed with THR F130D. (0+3)

RECR F130E  Beginning Ballroom Dance
1 Credit Offered As Demand Warrants
Students with little or no background in social dance. Our aim is to have a good time and build a strong foundation for future learning. Dances covered include waltz, foxtrot, single-count swing, east coast swing, salsa, cha cha, merengue and, time permitting, polka. Graded Pass/Fail. Cross-listed with THR F130E. (0+3)

RECR F130F  Intermediate Ballroom Dance
1 Credit Offered As Demand Warrants
Dances covered include waltz, foxtrot, single-count swing, east coast swing, salsa, cha cha, merengue and, time permitting, polka. Our aim is to have a good time and build a strong foundation for future learning. This course is for students with a beginning background in social dance. Graded Pass/Fail. Cross-listed with THR F130F. (0+3)

RECR F130G  Advanced Ballroom Dance
1 Credit Offered As Demand Warrants
Dances covered include waltz, foxtrot, single-count swing, east coast swing, salsa, cha cha, merengue and, time permitting, polka. Our aim is to have a good time and build an even stronger foundation for future learning. This course is for students with an intermediate background in social dance. Graded Pass/Fail. Cross-listed with THR F130G. (0+3)

RELIGION (RELG) — RURAL DEVELOPMENT (RD)

From where and whom did they acquire their knowledge? This course also considers the ramifications (historical and contemporary) of scriptural traditions between Islam, Christianity, and Judaism. (1+0)

RELG F115 End of Days — Apocalypse Across the Ages (h)
1 Credit Offered As Demand Warrants
A study into the origins and interpretive history of Abrahamic religious traditions dealing with the end-time. What were the ancient sociocultural circumstances out of which Jewish, Christian, and Muslim apocalypticism developed? In what manners do nonscriptural end-time narratives and images compare/contrast with those found in the Bible and the Quran? How and why have Biblical and Quranic apocalyptic traditions been (mis)appropriated during later eras, including our own? (1+0)

RELG F205 Introduction to the Bible (b)
3 Credits Offered As Demand Warrants
A study of the Bible as literature of ancient Israel and the early Christian church. (3+0)

RELG F221 Religions of the World (h)
3 Credits Offered As Demand Warrants
A survey of the development of major religions of the Eastern and Western world including contemporary world religions. (3+0)

RELG F231 Prophecy, Shamanism and Scripture (h)
3 Credits Offered As Demand Warrants
An introductory exploration into the phenomena of prophecy and shamanism as they are conceived and manifested within the textual and cultural traditions of Judaism and Christianity. Comparative evidence is considered from ancient Near Eastern and Mediterranean sources, and modern insights from cultural anthropology and cognitive psychology are brought to bear upon the Biblical materials, in efforts to situate their prophetic and/or shamanistic features within social scientific models of culture and mind. (3+0)

RURAL DEVELOPMENT

RD F100 The University Experience (h)
3 Credits Offered As Demand Warrants
Designed to serve as an academic, cultural, and social transition to the UAF campus. Through learner-centered education and emphasis on positive self-concept theories, RD F100 will provide an opportunity to build on personal strengths and skills, as well as learning to take advantage of those resources and support programs which will serve rural and Alaska Native students and aid in a successful transition to college life. (3+0)

RD F110 Alaska Native Claims Settlement Act: Land Claims in the 21st Century (s)
1 Credit Offered As Demand Warrants
Familiarize students with the land claims process and important Alaska Native Claims Settlement Act content, with focus on contemporary situations and explanation of land claims processes ongoing or recently completed in locations outside Alaska. (1+0)

RD F200 Rural Development in the North (s)
3 Credits Offered Fall
Examines sustainable community development efforts in Alaska and the circumpolar North. Provides an overview of community development processes and case studies with an emphasis on indigenous communities and peoples. (3+0)

RD F245 Fisheries and Marine Wildlife Development in Rural Alaska (s)
3 Credits Offered Fall Uneven Numbered Years
Introduction to fisheries development issues in rural Alaska communities, including basic concepts, strategies and contemporary cases. Topics include management of salmon and other fisheries, community development quotas and sustainable development efforts. Emphasis on environmental and cultural impacts of fisheries development and how management in marine waters affects inland fisheries. Prerequisites: ENGL F111X. (3+0)

RD F250 Grant Writing for Community Development (h)
1–3 Credits Offered As Demand Warrants
Basic elements of grant proposals and processes of preparing proposals for governmental and private funding sources. Emphasis on applied skills through preparation of actual grant proposals. Graded Pass/Fail. Prerequisite: ENGL F111X or permission of instructor. (1-3+0)

RD F255 Rural Alaska Land Issues (s)
3 Credits Offered As Demand Warrants
Introduction to land and resource management issues affecting rural Alaska. Provides a history of aboriginal use and occupancy of land and an overview of land provisions in the Alaska Native Claims Settlement Act (ANCSA) and the Alaska National Interest Lands Conservation Act (ANILCA). Topics include using maps and land records, Native allotments, navigability, trespass and management of Native lands. (3+0)

RD F265 Perspectives on Subsistence in Alaska (s)
3 Credits Offered As Demand Warrants
The socioeconomic, cultural, legal and political dimensions of subsistence in Alaska. (3+0)

RD F268 Rural Tourism: Planning and Principles (s)
1–3 Credits Offered As Demand Warrants
Introduction to rural tourism planning and principles. Students evaluate rural tourism attractions and trends, tourism planning and policy formation, quality standards, and cultural and environmental impacts of tourism. Cross-listed with ABUS F268. (1-3+0)

RD F280 Resource Management Research Techniques (s)
3 Credits Offered As Demand Warrants
Overview of standard methods of field-based scientific research conducted by resource management agencies in rural Alaska including elementary statistical concepts, survey techniques and tools used in land and renewable resources research. Prerequisites: NRM F101 and BIOL F104X. (3+0)

RD F300 W Rural Development in a Global Perspective (s)
3 Credits Offered Fall
Relationship between rural communities and the global economy, with an emphasis on sustainable development. Highlights the multiple meanings of “development” and issues of population growth, environmental change, gender and indigenous peoples as they relate to rural development. Includes an introduction to the basic concepts and theories of development. Prerequisites: ENGL F111X; ENGL F211X or ENGL F213X; junior standing; or permission of instructor. (3+0)

RD F315 Tribal People and Development (s)
3 Credits Offered Spring Odd-numbered Years
Comparative examination of socioeconomic development processes on tribal peoples in third and fourth world societies. Attention to implications of these processes for Alaska Native people. Prerequisites: Junior standing or permission of instructor. Cross-listed with ANS F315. (3+0)

RD F325 Community Development Strategies (s)
3 Credits Offered Fall
Principles and strategies of asset-based development in rural communities throughout the world. Explores the history of community development ideas and case studies of specific strategies in Alaska and beyond. Topics include community healing, economic renewal and collaborative decision-making approaches. (3+0)

RD F350 O Community Research in Indigenous Contexts (s)
3 Credits Offered Fall
Community research approaches and techniques. Emphasis on the role and need for community-based research and ethical issues associated with it. Students use a hands-on approach to learn about oral history documentation, surveys of community assets and needs, and basic community survey techniques. Prerequisites: COMM F131X or COMM F141X. (3+0)
RD F351 Strategic Planning for Rural Communities ©
3 Credits
Offered Spring
Examination of the major components of planning and grant writing processes as they relate to community land use, business and social service projects. Prerequisite: Junior standing or permission of instructor. (3+0)

RD F352 Rural Business Planning and Proposal Development ©
3 Credits
Offered Spring
Provides undergraduate students with an understanding of the principles and processes involved in strategic planning, business planning and proposal development with the focus on applications in rural Alaska. Focus is on meeting the unique planning needs of rural Alaska communities and organizations. (3+0)

RD F400 Rural Development Internship ©
3 Credits
Structured experience in an appropriate agency or corporate setting. Student and instructor work collaboratively to identify appropriate internship. Designed primarily for students with limited managerial experience. Approved project required. Enrollment only by prior arrangement with the instructor. (3+0)

RD F401 Cultural Knowledge of Native Elders (h)©
3 Credits
Offered Fall
Study with prominent Native tradition-bearers in Native philosophies, values and oral traditions. Traditional knowledge elicited through the cultural heritage documentation process. Analysis of existing interactions between cultural traditions and contemporary American life as experienced by Native elders. Cross-listed with ANS F401. (3+0)

RD F425 Cultural Resource Issues (s)©
3 Credits
Offered As Demand Warrants
An examination of the potential impacts of development projects on cultural systems. Explores data gathering, analytical techniques and use of impact data. Prerequisites: Junior standing or permission of instructor. (3+0)

RD F427 Tribal Contracting and Compacting ©
3 Credits
Offered As Demand Warrants
Examines the history of federal Indian policy that led to self-determination tribal contracting and compacting. Public Law 93-638 will be studied and analyzed. Challenging issues that hampered tribal contracting will be identified. Case studies involving both tribal organizations and tribal governments will be studied. Current issues, such as the proposed regionalization of tribes for the purpose of contracting and compacting, will be examined. (3+0)

RD F430 Indigenous Economic Development and Entrepreneurship ©
3 Credits
Offered As Demand Warrants
An understanding of the principles, strategies and practices of economic development and entrepreneurship with a focus on indigenous Alaska communities. Focus is on those sustainable economics, through culturally appropriate practices. (3+0)

RD F450 Managing Rural Projects and Programs ©
3 Credits
Offered Fall
Examines appropriate management and accountability approaches for community-based programs and projects, particularly those found in rural and/or cross-cultural contexts. Prerequisites: RD F350 and RD F351 or permission of instructor. (3+0)

RD F451 Human Resource Management for Indigenous Communities ©
3 Credits
Offered Fall
Provides an understanding of the principles and processes involved in human resource management especially as they apply within indigenous communities. Focus is on the relevance of human resource management in every unit, project or team, and on the unique human resource management needs of rural Alaska communities and organizations and how they can be met. (3+0)

RD F460 Women and Development ©
3 Credits
Offered As Demand Warrants
The effect of modernization and development processes on the role of women in a variety of Third World and tribal world contexts as well as the increasingly important “new” role women play in these complex processes. Cross-listed with WGS F460. (3+0)

RD F462 Rural Health and Human Service Systems ©
3 Credits
Offered As Demand Warrants
Examines U.S. federal and state rural health and human service systems with specific emphasis on the tribal system in Alaska. The history, organization, work force, service delivery and financing of the U.S. and Canadian and Alaska systems are examined. Circumpolar challenges and policy issues in rural health and human service systems are explored. (3+0)

RD F465 Community Healing and Wellness ©
3 Credits
Offered Fall
The history of education and the impact of religion and assimilation policies on the emotional and physical health of Alaska Natives and their communities. Traditional wellness issues and systems will also be researched from a global perspective. Prerequisite: Junior standing or permission of instructor. (3+0)

RD F470 The Alaska Native Claims Settlement Act: Pre-1971 to present ©
3 Credits
Offered Fall
Overview and analysis of the Alaska Native Claims Settlement Act. An in-depth examination of the land claims movement of the 1960s and resulting legislative process. Firsthand accounts from Native leaders will be featured. Case studies describing challenges of individual Native villages and regions. Contemporary issues facing ANCSA corporations will be examined. Prerequisites: Junior standing or permission of instructor. (3+0)

RD F475 W Circumpolar Indigenous Leadership Symposium ©
1–3 Credits
Offered Fall
Various topics of current interest and importance to the rural development majors. Topics announced prior to each offering. Topics may include: indigenous peoples leadership, legislative process, cultural documentation, National Park Service policies, climate change, and/or co-management of natural resources. Students may take up to three Rural Development seminars on different topics for credit with prior approval. Enrollment priority given to rural development majors. (1-3+0)

RD F600 Circumpolar Indigenous Leadership Symposium ©
3 Credits
Offered Fall
Intensive face-to-face graduate seminar over a week-long period. Held every fall either in Fairbanks or Anchorage. This is a cornerstone course for all M.A. students in the program. The content focuses on indigenous leadership and includes presentations by practitioners from throughout Alaska and the circumpolar North. It also presents an orientation in depth to the graduate program. This course may be repeated once for elective credit. Prerequisites: Graduate standing or permission of instructor. Note: RD F600 is required of all graduate students in the Rural Development program. May be repeated once for credit. (3+0)

RD F601 Political Economy of the Circumpolar North ©
3 Credits
Offered Fall
Interrelationships among rural communities in the circumpolar North and global socioeconomic, political and ecological systems. Includes major theoretical advances in our understanding of development in the 20th century. Uses a comparative case study approach to understand rapid socioeconomically and cultural change in the north. Prerequisites: Graduate standing or permission of instructor. (3+0)
A comparative survey and analysis of the epistemological properties, world views and modes of transmission associated with various indigenous knowledge systems. Emphasis on knowledge systems practiced in Alaska. Prerequisites: Graduate standing or approval of instructor. Cross-listed with CCS F608; ED F608; ANL F608. (3+0)

Examine the acquisition and utilization of knowledge associated with long-term inhabitation of particular ecological systems and adaptations that arise from the accumulation of such knowledge. Attention will be given to the contemporary significance of traditional ecological knowledge as a complement to academic fields of study. Prerequisites: Graduate standing or approval of instructor. Cross-listed with CCS F612. (3+0)

Provides graduate students with a detailed overview of principles and strategies of community development in rural Alaska and throughout the circumpolar North. Through in-depth case studies, it expands on materials and topics covered in Rural Development undergraduate courses on community development to explore how rural communities in diverse cultural, political and economic setting can build on local assets, skills and capacities to improve the lives of indigenous and other Northern residents. Prerequisites: Graduate standing or approval of instructor. (3+0)

This graduate course provides students with opportunities for advanced exploration of community-based research principles and practices. In the course, emphasis is placed on developing a thorough understanding of the community research process from conceptualization to implementation and evaluation. It includes skill development of skills applicable to both quantitative and qualitative research. Prerequisites: Graduate standing or permission of instructor. (3+0)

Provides an overview of the management by change and development within indigenous communities in the Circumpolar North. Looks closely at recent management strategies implemented in Alaska such as co-management of renewable resources, land management of Alaska Native corporations, cultural resource management, and the management of Alaska Native tribal governments, corporations and other organizations. Uses comparative case studies and effects of cultural and traditional values on management practices in different northern socio-cultural environments. Prerequisites: Graduate standing or permission of instructor. (3+0)

Purpose, structure and methods of management of particularly Northern indigenous organizations. The management of Alaska Native organizations will be compared with formal organizations established by indigenous peoples in other regions of the Circumpolar North. The concept of “indigenous management” will be reviewed, as will perceptions of differences between leadership and management in both western and indigenous settings. Prerequisites: Graduate standing or permission of instructor. (3+0)

Provides a comprehensive overview of major circumpolar health issues affecting Northern residents. Includes an analysis of health and traditional healing practices prior to contact. Examines the emergence of chronic diseases, problems of alcohol abuse and violence, efforts to combine traditional healing practices and Western medicine. Includes environmental health issues, including water, sewer, and food contamination. Overview of health care systems and public health infrastructure in the North. Prerequisites: Graduate standing or permission of instructor. (3+0)

Overview and analysis of the Alaska Native Claims Settlement Act. An in-depth examination of the land claims movement of the 1960s and resulting legislative process. Firsthand accounts from Native leaders will be featured. Case studies describing challenges of individual Native villages and regions. Contemporary issues facing ANCSA corporations will be examined. Prerequisite: Graduate standing or permission of instructor. Stacked with RD F470. (3+0)

Investigation of current issues in cross-cultural contexts. Opportunity for students to synthesize their prior graduate studies and research. Seminar is taken near the terminus of a graduate program. Prerequisites: Advancement to candidacy and permission of student's graduate committee. Cross-listed with CCS F690; ED F690; ANL F690. (3+0)

Issues and impacts relevant to effective cross-cultural communication. Understanding barriers to effective cross-cultural communication in rural settings and development of effective cross-cultural communication skills from a Native perspective. Development of bridging and networking skills that integrate Native values and principles. Student must spend one week in intensive study at selected delivery site. (1+0)

Dynamics and impacts of personal development issues relevant to the delivery of rural human services focusing on understanding types, application and processes of personal development. Facilitating personal development through processes that integrate or reflect Native values and principles. Student must spend one week in intensive study at selected delivery site. (2+1)

Survey of historical forces that exerted influence on Alaska Native families, the impacts of those forces and discussion of their contemporary effects from a Native perspective. Focus on developing options and strategies for developing healthy Native families as the foundation for healthy Native communities. Emphasis on developing the understanding and skills necessary to facilitate development and maintenance of healthy families through healthy individuals. Student must spend one week in intensive study at selected delivery site. (2+1)

Contemporary foundations of rural social development and relevant issues from a Native perspective. Developing the understanding and skills necessary for facilitating positive individual, family and community development based on an ecological systems approach. Emphasis on developing the skills necessary to identify, develop and mobilize individual, family and community resources in rural Native communities. Student must spend one week in intensive study at selected delivery site. (2+1)

Traditional Native values and principles, their applicability to today’s world and issues relevant to their integration into today’s lifestyles. Developing understanding and skills necessary for facilitating formulation of positive
world views within Native individuals, families and communities. Explores the role of spirituality in a variety of Alaska Native cultures. Student must spend three days in intensive study at selected delivery site. (1+0)

RHS F150 Introduction to Rural Counseling ✪ 2 Credits
Identification and examination of issues relevant to the delivery of rural counseling services focusing on developing the understanding and skills necessary for the effective delivery of rural counseling services. Opportunities for development of basic rural counseling skills with emphasis on integration of Native values and principles and exploring strategies that facilitate positive individual, family, and community growth and development through enhancement of healthy lifestyles in rural Native communities. Student must spend one week in intensive study at selected delivery site. (2+1)

RHS F220 Family Systems II ✪ 2 Credits
The dynamics and issues relevant to personal healing and recovery from a Native perspective focusing on developing the understanding and skills necessary to healing and recovery Native individuals, families and communities. Emphasis on achieving healthy lifestyles through self-understanding based on truth, grieving and positive repositioning. Student must spend one week in intensive study at selected delivery site. (2+1)

RHS F250 Rural Counseling II ✪ 2 Credits
Differences and similarities between Native and Western counseling skills. Issues relevant to the development and delivery of basic rural counseling skills and services. Focuses on identifying and building on individual, family and community strengths as the foundation for development of intervention strategies. Addresses the importance of integrating Native traditional values and principles into intervention strategies and service delivery. Emphasis on developing and enhancing basic rural counseling skills and short- and long-term intervention strategies. Student must spend one week in intensive study at selected delivery site. (2+1)

RHS F260 Addictions: Intervention and Treatment ✪ 2 Credits
Dynamics, issues, impacts, treatment options and intervention strategies relevant to behavioral and chemical addictions. Understanding addictive processes and developing treatment options and intervention strategies from a Native perspective. Emphasis on development of treatment options and intervention strategies that integrate Native values and principles. Student must spend one week in intensive study at selected delivery site. (2+1)

RHS F265 Interpersonal Violence ✪ 2 Credits
Types, causes and impacts of interpersonal violence focusing on developing an understanding of interpersonal violence and development of treatment options and intervention strategies from a Native perspective. Emphasis on development of treatment options and intervention strategies that integrate Native values and principles. Student must spend one week in intensive study at selected delivery site. (2+1)

RHS F275 Introduction to Recovery and Mental Illness ✪ 2 Credits
Overview of mental illness and recovery issues. Emphasis on issues for practitioners in small, rural communities in Alaska. Prerequisites: RHS F150 or instructor permission. Recommended: RHS F250, RHS F115. (2+1)

RHS F285 Case Management ✪ 2 Credits
Identification and discussion of issues, components, procedures, responsibilities, skills and processes for case management in rural settings with diverse populations. Emphasis on case management processes unique to rural and village Alaska and to the fields of mental health, addictions and interpersonal violence. Oral and written communication skills essential to effective case management explored. Student must be willing and able to work independently outside the classroom and in the community. (2+1)

RHS F287 Rural Human Services Practicum ✪ 4 Credits
Personal and professional development, self-analysis and growth. Emphasis on developing the understanding and skills necessary to integrate Native healing theory and problem solving into the delivery of rural human services. Student must be willing and able to work independently outside the classroom and in the community. Taken as part of the final sequence of courses in the Rural Human Services certificate program, practicum provides students with 100 hours of supervised learning experience in an approved rural human service organization/agency. (4+0)

RHS F290 Grief and Healing ✪ 2 Credits
Offered As Demand Warrants
Exploration of the dynamics of grief and healing from an Alaska Native perspective. Special emphasis on Native values and principles focused on developing culturally relevant, understandings, awarenesses and professional skills. (2+1)

RUSS

RUSS F100A Elementary Russian 1A (h) 3 Credits
Offered Fall
An introductory course in the Russian language and culture with an emphasis on the spoken and written language. Does not meet Perspectives on the Human Condition requirements, or Foreign Language major or minor requirements. (3+0)

RUSS F100B Elementary Russian 1B (h) 3 Credits
Offered Spring
An introductory course in the Russian language and culture with an emphasis on the spoken and written language. Does not meet Perspectives on the Human Condition requirements, or Foreign Language major or minor requirements. Prerequisites: RUSS F100A; or permission of instructor. (3+0)

RUSS F101 Elementary Russian I (h) 5 Credits
Offered Fall
Introduction to language and culture: development of competence and performance in the language through understanding, recognition and use of linguistic structures; increasing emphasis on listening comprehension and speaking; basic vocabulary of approximately 750 words; exploration of the cultural dimension, implicitly through language, and explicitly through texts and audiovisual materials. (5+0)

RUSS F102 Elementary Russian II (h) 5 Credits
Offered Spring
Introduction to language and culture: development of competence and performance in the language through understanding, recognition and use of linguistic structures; increasing emphasis on listening comprehension and speaking; basic vocabulary of approximately 750 words; exploration of the cultural dimension, implicitly through language, and explicitly through texts and audiovisual materials. Prerequisites: RUSS F101 or equivalent. (5+0)

RUSS F103 Conversational Russian I (h) 3 Credits
Offered Spring Odd-numbered Years
Verbal skills improvement. Vocabulary is presented to improve speaking on specific topics. Note: Does not satisfy core curriculum or foreign language major requirements. Graded Pass/Fail. Prerequisites: RUSS F101 and RUSS F102 or above or permission of instructor. (3+0)

RUSS F201 Intermediate Russian I (h) 4 Credits
Offered Fall
Continuation of RUSS F102. Increasing emphasis on reading ability and cultural materials. Conducted in Russian. Prerequisites: RUSS F102 or equivalent. (4+0)
RUSS F202 Intermediate Russian II (h) 4 Credits
Continuation of RUSS F102. Increasing emphasis on reading ability and cultural materials. Conducted in Russian. Prerequisites: RUSS F201 or equivalent. (4+0)

RUSS F203 Conversational Russian II (h) 3 Credits
Oral skills improvement. Vocabulary is presented to improve speaking on specific topics. Graded Pass/Fail. Prerequisites: RUSS F102 or above or permission of instructor. Does not satisfy core curriculum or foreign language major requirements. (3+0)

RUSS F301 W,O Advanced Russian (h) 3 Credits
Discussions and essays on more difficult subjects or texts. Translations, stylistic exercises and special grammatical problems. Conducted in Russian. Prerequisites: COMM F131X or COMM F141X; ENGL F111X; ENGL F211X or ENGL F213X; RUSS F202; or instructor permission. (3+0)

RUSS F302 W,O Advanced Russian (h) 3 Credits
Discussions and essays on more difficult subjects or texts. Translations, stylistic exercises and special grammatical problems. Conducted in Russian. Prerequisites: COMM F131X or COMM F141X; ENGL F111X; ENGL F211X or ENGL F213X; RUSS F301 or equivalent; or permission of instructor. (3+0)

RUSS F431 Studies in Russian Culture (h) 3 Credits
Study of the cultures of the Russian-speaking world. May be repeated for credit if topic varies. Prerequisites: RUSS F301 or equivalent; junior standing or permission of instructor. (3+0)

RUSS F432 Studies of Russian Literature (h) 3 Credits
Intensive study of authors, literary texts, movements, genres, themes and/or critical approaches. May be repeated for credit when topics vary. Prerequisites: RUSS F302 or equivalent; at least junior standing, or permission of instructor. (3+0)

RUSS F476 Russian Culture and Society in the 21st Century (h) 3 Credits
Study of contemporary Russian culture and society through selected literary texts and media representations; examination of the idea of the "Russian North" and its place in Russian culture; consideration of Russian politics and current events. Students will gain knowledge about present-day Russia and its peoples from a variety of perspectives, sources and media. Prerequisites: ENGL F111X; ENGL F211X or ENGL F213X; COMM F131X or COMM F141X; junior standing or permission of the instructor. Russian Studies majors must complete RUSS F202 and Northern Studies majors must complete 2 NORS courses. Cross-listed with NORS F476. (3+0)

RUSS F482 Selected Topics in Russian Literature (h) 3 Credits
Intensive course in literature focusing on nineteenth-century writers. Conducted in English. Note: Course may be repeated for credit if topic varies. Prerequisites: Junior standing, or permission of instructor. (3+0)

RUSS F484 Russian and Soviet Cinema (h) 3 Credits
Study of Russian culture and society through the medium of film, focusing on the history of Russian cinema and genres. Films by award-winning directors. Designed to familiarize students with Russian history and culture from 1900s to the present, and present topics in film theory. Readings and topics discussed reflect issues of current interest. Prerequisites: Junior standing, or permission of instructor. Cross-listed with FLM F484. (3+0)

RUSS F488 Individual Study: Senior Project (h) 3 Credits
Analysis and presentation, in the language, of a problem chosen by the student in consultation with the department. The student must apply for senior project and submit a project outline by the end of the sixth week of the semester preceding the semester of graduation. Conducted in Russian. Prerequisites: At least 10 credits in upper division Russian or permission of instructor. (3+0)

SCIENCE APPLICATIONS

SCIA F105 Field Biology 2 Credits
Offered Summer
Students will learn some of the techniques that are employed by wildlife biologists to study plants, fish and animals in the field and establish use of the scientific method through a student research project. (20+20)

SCIA F150 Subarctic Horticulture 1 Credit
Offered As Demand Warrants
Soils, plant propagation, disease and insect control, variety selection, fertilization, greenhouse construction and care and gardening techniques. Emphasis on development and care of greenhouses and gardens in the Nome area. (0+3)

SCIA F157 Alaska Plants 1 Credit
Offered As Demand Warrants
Introduction to the topics of plant taxonomy and identification with specific reference to common Alaskan plants and vegetation types. (1+0)

SCIA F161 Birds of Alaska 1 Credit
Offered As Demand Warrants
Biology of birds including behavior, anatomy, physiology, systematics and field identification. (1+0)

SCIA F162 Mammals of Alaska 1 Credit
Offered As Demand Warrants
Introduction to the mammals of Alaska and their importance to the local ecology and economy from a scientific research standpoint. Emphasis on important and/or common species for study of classification, habitat, life cycle and economic importance. Prerequisites: Background or interest in general science or natural history or permission of instructor. (1+0)

SCIENCE TEACHING AND OUTREACH

STO F601 Communicating Science 2 Credits
Offered Spring
This highly interactive course allows students to gain hands-on experience with teaching and communicating science to public audiences. Over the course of the semester, students will lead programs in K-12 school settings, develop a presentation and present their own science to peers. Students will also explore pedagogical theory, and learn how to use active and inquiry-based teaching strategies. Prerequisites: Graduate standing or instructor permission. (2+0)

STO F602 Mentoring in the Sciences 2 Credits
Offered Fall
This course provides a forum for graduate students to develop their mentoring philosophy and build effective mentoring skills. Effective mentoring can be learned, but not taught. Good mentors are normally produced through years of practice, successes and failures, and no two mentoring situations are alike. This course seeks to provide a discussion and learning environment for accelerating the process of learning to be a mentor. Through discussion of case studies, activities and readings provided in course materials, students will consider mentoring philosophy, articulate it, anticipate challenges and effective solutions to a variety of mentoring issues. Graded Pass/Fail. Prerequisites: Graduate Standing. (2+0)
STO F603  Instructional Design  
1 Credit  Offered Spring  
This graduate seminar course will address important components of course planning and instructional design that reflect best practices in science teaching. This course focuses on the overall design of courses, the integration of the various components of a course, the development and implementation of summative assessments and syllabus construction. The course format will consist of reading and discussion, seminars and workshops. **Prerequisites:** Graduate standing. (1+0)

STO F604  Science Teaching and Outreach Internship  
4 Credits  
Under the supervision of a faculty member, students gain professional experience in science teaching or outreach by choosing one of the following strands: 1) higher education, 2) formal K–12 education, or 3) informal education. An internship strand is planned prior to enrollment and agreed upon by the instructor of record, faculty mentor or K–12 teacher mentor, and student. Graded Pass/Fail. **Prerequisites:** STO F666 for higher education strand or STO F601 for formal K–12 education or informal education strand or permission of instructor. (0+0+12)

STO F666  Scientific Teaching  
2 Credits  Offered Spring Even-numbered Years  
This course explores methods for teaching science at the university level. Emphasis is placed on methods of course design, instructional techniques, assessment and course management that have been shown by research to improve student learning. This course is intended for graduate students in the sciences who have an interest in improving their teaching skills. The course format will be a mixture of discussion, workshops and seminars. If the course is over-enrolled, priority will be given to teaching assistants who are assigned to teach large, introductory level (100 or 200 level) courses during the semester they are taking this course. **Prerequisites:** Graduate standing or permission of the instructor. Cross-listed with BIOL F666, CHEM F666, GEOS F666 (2+0)

STO F692  Current Topics in Scientific Teaching  
1 Credit  Offered Alternate Fall  
This graduate seminar course explores current trends in science education at the pre-college and college levels. Topics may include diversity, technology, active learning, and others. The course will rely on readings from primary literature and discussion. **Recommended:** STO F666 or STO F601. **Prerequisites:** Graduate standing. (1+0)

STO F692P  Current Topics in Scientific Teaching  
1 Credit  Offered Alternate Fall  
This graduate seminar course explores current trends in science education at the pre-college and college levels. Topics may include diversity, technology, active learning, and others. The course will rely on readings from primary literature and discussion. Graded Pass/Fail. **Recommended:** STO F666 or STO F601. **Prerequisites:** Graduate standing. (1+0)

### SOCIAL WORK

SWK F103  Introduction to Social Work  
3 Credits  
Introduction to the profession of social work and the human services delivery system. Examines historical development of social work focusing on the knowledge, values and skills that characterize the social worker. Orientation to the context for social work, including the diversity of human needs, human services, social policy and legislation. Services, programs, and career opportunities within rural and urban Alaska, as well as nationally, are discussed. (3+0)

SWK F220  Ethics, Values and Social Work Practice  
3 Credits  
The professional nature and meaning of generalist social work practice. Examines the NASW code of ethics. Introduces interpersonal communication and interviewing. Assists students in making decisions about social work or other helping professions. **Prerequisites:** SWK F103 or permission of instructor. (3+0)

SWK F305  Social Welfare History  
3 Credits  Offered Fall  
Analysis of social inequality and the U.S. social welfare system by tracing the historical development of government response to social inequality and exploring historical and persisting dilemmas in the provision of social welfare services. **Prerequisites:** COMM F131X or COMM F141X; SWK F103 or SOC/ANTH F100X. (3+0)

SWK F306  Social Welfare: Policies and Issues  
3 Credits  Offered Spring  
Social policies and how they effect the delivery of social services. Factors influencing development of the current social service system. Analysis of dilemmas which develop in a welfare system attempting to deal with rapid social change. Alternative approaches to the solution of social problems and possible future developments. **Prerequisites:** ANTH F100X or SOC F100X or SWK F103. (3+0)

SWK F320  Rural Social Work  
3 Credits  Offered Spring  
Preparation for practice in rural areas characterized by the need for multiple delivery systems, unique local customs and inadequate resources. Emphasis on preparation for practice nationally with unique features of Alaska incorporated at key points. **Prerequisites:** ENGL F111X; ENGL F211X or ENGL F213X or permission of instructor; SWK F103. (3+0)

SWK F330  Seminar in International Social Work  
3 Credits  Offered Fall  
International issues related to social work practice and social welfare policy. The focus of the seminar will be on global and international issues related to social and economic justice, distributive justice, and human and civil rights. Specific content is announced at registration. Course may be repeated once for credit when content varies. **Prerequisites:** SWK F103 or permission of instructor. (3+0)

SWK F341  Human Behavior in the Social Environment I  
3 Credits  Offered Fall  
Theoretical frameworks for understanding social behavior and the organization of groups and communities. An emphasis is placed on the bio-psycho-social perspective of human development from birth through adolescence. **Prerequisites:** PSY F101; SOC/ANTH F100X; SWK F103. (3+0)

SWK F342  Human Behavior in the Social Environment II  
3 Credits  Offered Spring  
Theoretical frameworks for understanding social behavior and the organization of groups and communities. An emphasis is placed on the bio-psycho-social of human development young adulthood through later life. **Prerequisites:** PSY F101; SOC/ANTH F100X; SWK F103; social work major. (3+0)

3 Credits  
Examination of theories and research concerning women's issues in the field of social work and in the social welfare system, with particular emphasis on women in poverty and women of color. Contemporary policy issues and strategies of empowerment will be covered. **Prerequisites:** ENGL F111X; ENGL F211X or ENGL F213X; SWK F103 or SOC F100X; or permission of instructor. Cross-listed with WGS F350. (3+0)

SWK F360  Child Abuse and Neglect  
3 Credits  Offered Spring  
Dynamics, implications and treatments of child abuse and neglect for individuals and families in rural and urban Alaska. **Prerequisites:** Sophomore standing or permission of instructor. (3+0)

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
<th>Description</th>
<th>Prerequisites</th>
<th>Offered</th>
</tr>
</thead>
<tbody>
<tr>
<td>SWK 370</td>
<td>Services and Support for an Aging Society</td>
<td>3</td>
<td>An examination of the aging process, theories, political processes, social work generalist intervention and strategies and agency support for the aging population. The rapidly changing social and health issues of older adults are addressed in a multi-disciplinary and multi-cultural approach.</td>
<td>SWK 370 is offered As Demand Warrants</td>
<td>As Demand Warrants</td>
</tr>
<tr>
<td>SWK 375 W</td>
<td>Research Methods in Social Work</td>
<td>3</td>
<td>Course has a two-fold objective: to help students become critical consumers of research in the social sciences and to allow students to carry out beginning research studies. Course sequentially covers phases of the research process, whether quantitative or qualitative.</td>
<td>Prerequisites: ENGL F111X; ENGL F211X or ENGL F213X; SWK F103; or permission of instructor.</td>
<td>Offered Fall</td>
</tr>
<tr>
<td>SWK 440</td>
<td>Social Work Practice with Military Families</td>
<td>3</td>
<td>Explores the history and roles of social work with military families. Ethical concerns that emerge from social work practice with military families are addressed. Military social workers’ roles in mental health programs, family advocacy, program administration, and policy making are examined. Addresses the issues that affect military families during times of deployment.</td>
<td>Prerequisites: SWK F220; or permission of instructor.</td>
<td>Offered Fall</td>
</tr>
<tr>
<td>SWK 460</td>
<td>Social Work Practice I</td>
<td>3</td>
<td>Development of beginning skills in interviewing and helping processes with individuals, families and groups. Application of intervention strategies and techniques made to case materials, primarily in family and child welfare services. Contracting, case management and social brokerage.</td>
<td>Prerequisites: Concurrent enrollment in SWK F461; Social Work major; senior standing.</td>
<td>Offered Fall</td>
</tr>
<tr>
<td>SWK 461</td>
<td>Practicum in Social Work I</td>
<td>3 or 6</td>
<td>Individual training and practice in a social service agency. Students signing up for 3 credits complete 100 hours; students signing up for 6 credits complete 200 hours of direct practice in an approved agency under the supervision of a field instructor.</td>
<td>Prerequisites: Social Work major; senior standing; approval from practicum coordinator.</td>
<td>Offered Fall</td>
</tr>
<tr>
<td>SWK 463</td>
<td>Social Work Practice II</td>
<td>3</td>
<td>Further development of student’s knowledge of direct practice with clients and development of beginning skills in community work including social planning. Emphasis on aspects of rural practice such as use of community associations and the informal helping network. Taken concurrently with SWK F464.</td>
<td>Prerequisites: Social work major, senior standing, and concurrent enrollment in SWK F464.</td>
<td>Offered Spring</td>
</tr>
<tr>
<td>SWK 464</td>
<td>Practicum in Social Work II</td>
<td>3 or 6</td>
<td>Continuation of SWK F461; further direct practice experience in an agency. Students signing up for 3 credits complete 100 hours; students signing up for 6 credits complete 200 hours of practice in an approved agency under the supervision of a field instructor.</td>
<td>Prerequisites: SWK F460; SWK F461; Social Work major; senior standing. (1+7 or 15)</td>
<td>Offered Spring</td>
</tr>
<tr>
<td>SWK 466</td>
<td>Practicum in Social Work II</td>
<td>3 or 6</td>
<td>Further direct practice experience in an approved agency under the supervision of a field instructor. Students enrolled in 3 credits must complete 100 hours of practicum. Students enrolled in 6 credits must complete 200 hours of practicum.</td>
<td>Prerequisites: SWK F460; SWK F461; SWK F463; SWK F464; Social Work major; senior standing. (0+7 or 15)</td>
<td>Offered Spring</td>
</tr>
<tr>
<td>SWK 470</td>
<td>Substance Abuse Theories and Treatment</td>
<td>3</td>
<td>Examination of research and theories of chemical dependency from a social work, systems/ecological framework. Critically examines current theory and practice in terms of effectiveness, cultural appropriateness and validity with vulnerable populations.</td>
<td>Prerequisites: SWK F103 or permission of instructor.</td>
<td>Offered As Demand Warrants</td>
</tr>
<tr>
<td>SWK 484</td>
<td>Seminar in Social Work Practice Areas</td>
<td>3</td>
<td>Problem areas in social work. Topics vary in different semesters, content announced in class schedule prior to each semester. Course may be repeated for credit when topic varies.</td>
<td>Prerequisites: SWK F103 or permission of instructor.</td>
<td>Offered As Demand Warrants</td>
</tr>

</tr>
<tr>
<td>SOC 263</td>
<td>Social Inequality and Stratification</td>
<td>3</td>
<td>Comprehensive analysis of current sociological debates and diverse theoretical approaches used to address social stratification and inequality. Examines the various dimensions of inequality, including those related to race, class and gender at the local, national and global levels.</td>
<td>Prerequisites: SOC F100X and SOC F201 or permission of instructor.</td>
<td>Offered Spring</td>
</tr>
</tbody>
</table>
SOC F301 Rural Sociology (s) 3 Credits Offered As Demand Warrants
Analysis of sociological issues using rural communities and rurality as examples. Emphasis on issues of social justice and inequality. Part of focus is on rural communities of Alaska and the North. Prerequisites: One lower division social science course. (3+0)

SOC F303 Early Sociological Thought (s) 3 Credits Offered Spring
The major sociological theories of the classical period (19th and early 20th centuries) that have influenced contemporary sociology. Prerequisites: SOC F100X; SOC F201; SOC F263. (3+0)

SOC F308 Race and Ethnic Relations (s) 3 Credits Offered Fall
A sociological analysis of the principles and processes that shape relationships among racial and ethnic groups in Alaska, the U.S. and elsewhere in the world. Focus on the relations among dominant and subordinate groups in these societies, using sociological theory to understand the structural factors that shape intergroup relations. Prerequisites: SOC F100X; SOC F201; SOC F263. (3+0)

SOC F310 Sociology of Aging (s) 3 Credits
A sociological analysis of the process of aging in the U.S., Alaska and globally, with special attention on structural inequality and social justice issues. Prerequisites: SOC F100X; junior standing or permission of instructor. (3+0)

SOC F320 Sociology of Gender (s) 3 Credits
Comprehensive survey of sociological inquiry and feminist revisions for studying gender in U.S. society and culture. Interrogates the meanings of gender and the interactional, cultural, organizational and institutional arrangements that underlie the social construction of gender and gender inequality. Prerequisites: One lower-division social science course; WGS F201; or permission of instructor. Cross-listed with WGS F320. (3+0)

SOC F330 Social Psychology (s) 3 Credits Offered Spring Odd-numbered Years
Analysis of intergroup relationships in terms of process and value orientation, their influences on the personality, and aspects of collective behavior on group and person. Aspects of social interaction that have cultural and intercultural variation. Also offered through Aslo offered through eLearning and Distance Education some semesters (depending on availability of instructor). Prerequisites: PSY F101 or SOC F100X; SOC F373 or PSY F245. Cross-listed with PSY F330. (3+0)

SOC F333 Human Sexualities Across Cultures (s) 3 Credits Offered Alternate Fall Odd-numbered Years
Exploration of how people in a variety of cultures, both contemporary and historical, construct the meaning and experience of sexuality, and express themselves as sexual beings. Interdisciplinary study includes psychology, sociology, anthropology, gender studies, and related fields, with particular focus determined by which department is offering the course. Prerequisites: SOC F100X or SOC F201 or PSY F101 or WGS F201 or permission of instructor. Recommended: PSY F275 or SOC F373 or PSY F245. Cross-listed with PSY F333; WGS F333. (3+0)

SOC F335 Deviance and Social Control (s) 3 Credits Offered Fall Odd-numbered Years
Analysis of classical and contemporary theoretical perspectives used to understand, explain and control criminal and non-criminal forms of deviance. Emphasis on the social dimensions of the creation of deviant categories and persons, the consequence of societal reactions to selected forms of deviance, and implications for social policy (prevention) and social control (corrections). Prerequisites: SOC F100X; SOC F201; or permission of instructor. (3+0)

SOC F345 Sociology of Education (s) 3 Credits Offered Fall Odd-numbered Years
Theoretical perspectives on various dimensions of the relationship between education and society, including the institutional context of schooling, the impact of schooling on social stratification, and social organization within the school and classroom. Special attention is given to issues of equity and contemporary educational reform efforts. Prerequisites: SOC F100X or permission of instructor. Cross-listed with ED F345. (3+0)

SOC F350 W Sociology of Childhood (s) 3 Credits Offered Fall Even-numbered Years
Concepts, theories and empirical research in the sociology of childhood. Broad themes include social structure and its consequences for children’s lives, children’s agencies, and the diversity of childhood experiences. Includes an overview of the problems children face, and recommendations for solutions. Prerequisites: ENGL F111X; ENGL F211X or ENGL F213X or permission of instructor. (3+0)

SOC F373 W Research Methods in the Social Sciences (s) 3 Credits Offered Fall
Course helps students become critical consumers of research in the social sciences and enables them to develop research proposals. The course covers phases of the research process, which comprises problem formulation, research designs, conceptualization, sampling and ethical issues. Prerequisites: ENGL F111X; ENGL F211X or ENGL F213X or permission of instructor; SOC F100X; SOC F201; SOC F263. (3+0)

SOC F405 O Social Movements and Social Change (s) 3 Credits
Focus on collective behavior, social change and social movements at the local, national and global levels. Analysis will include historical, technological and legal implications of large-scale social change. Prerequisites: COMM F131X or COMM F141X; SOC F100X; SOC F201; SOC F263 and 3 credits of SOC at the F300-level; or permission of instructor. (3+0)

SOC F407 O Work and Occupations (s) 3 Credits Offered As Demand Warrants
The sociology of work and occupations. Local, regional, national and global industries, work sites and workers will be examined, using sociological theories and concepts. Analysis includes structural issues of inequality in employment practices and work sites. Prerequisite: COMM F313X or COMM F314X; SOC F100X; SOC F201; SOC F263; 3 credits in SOC at the F300-level. (3+0)

SOC F435 Sociology of Law (s) 3 Credits
Addresses the social nature of legal decision-making, the social context of law and the reciprocal relations between law, society and justice. Explores how race, class and gender are implicated in the law, and the role of law in social control, in social change and in our everyday lives. Prerequisites: SOC F100X; junior standing; or permission of instructor. Recommended: SOC F303. (3+0)

SOC F440 O Environmental Sociology (s) 3 Credits
Course considers how political, social and economic factors have come to shape human patterns of interaction with the natural environment. Provides a sociological perspective on environmental problems such as environment and health, disaster, environmental policy, environmental risk, sustainability, human and animal interactions, environmental justice and social movements. Prerequisites: COMM F131X or COMM F141X; SOC F100X; SOC F201; SOC F263; 3 credits in SOC at the F300-level; or permission of instructor. (3+0)

SOC F460 Global Issues in Sociological Perspective (s) 3 Credits
A sociological analysis of global issues, with different overarching themes depending on world events and the research interests of the instructor. Issues of global social justice and inequality are explored, and sociological and other theories are applied. Prerequisites: One lower social science course; junior standing or permission of instructor. (3+0)
Sociology (SOC) — Spanish (SPAN)

SOC F480 W  Qualitative Social Science Research (s) 3 Credits
Offered Spring Odd-numbered Years
Introduction to classical and contemporary research within the qualitative (or interpretive) paradigm of social science. Discusses the theoretical framework, historical traditions, epistemological and ethical issues of qualitative approaches. Uses hands-on experience in the practicalities and excitement of a variety of methods for gathering qualitative data and conducting qualitative analysis. Prerequisites: ENGL F111X; ENGL F211X or ENGL F213X; one lower-division social science research methods course; or permission of instructor. Cross-listed with PSY F480. (3+0)

SPAN F490  Capstone Seminar (s) 3 Credits
Offered Spring
Review of the discipline of sociology with a focus on the theoretical perspectives and methodological tools of the discipline, key substantive issues in the field and the role of sociology in contemporary society. Prerequisites: SOC F303; SOC F373; Sociology major with senior standing; or permission of instructor. (3+0)

SPAN

SPAN F100A  Elementary Spanish 1A (h) 3 Credits
Offered As Demand Warrants
Spanish language and culture with an emphasis on spoken and written language. Does not meet Perspectives on the Human Condition requirements, or Foreign Language major or minor requirements. (3+0)

SPAN F100B  Elementary Spanish 1B (h) 3 Credits
Offered As Demand Warrants
Spanish language and culture with an emphasis on spoken and written language. Does not meet Perspectives on the Human Condition requirements, or Foreign Language major or minor requirements. Prerequisites: SPAN F100A or permission of instructor. (3+0)

SPAN F101  Elementary Spanish I (h) 5 Credits
Offered Fall
Introduction to the language and culture: development of competence and performance in the language through understanding, recognition and use of linguistic structures; increasing emphasis on listening comprehension and speaking; basic vocabulary of approximately 1,000 words; exploration of the cultural dimension, implicitly through language and explicitly through texts and audiovisual materials. (5+0)

SPAN F102  Elementary Spanish II (h) 5 Credits
Offered Spring
Introduction to the language and culture: development of competence and performance in the language through understanding, recognition and use of linguistic structures; increasing emphasis on listening comprehension and speaking; basic vocabulary of approximately 1,000 words; exploration of the cultural dimension, implicitly through language and explicitly through texts and audiovisual materials. Prerequisites: SPAN F101; or SPAN F100A and SPAN F100B; or the equivalent. (5+0)

SPAN F103  Conversational Spanish I (h) 3 Credits
Offered Fall, Summer, As Demand Warrants
Verbal skills improvement. Includes role playing, problem solving and situational conversation. Conducted entirely in Spanish. Note: Does not satisfy core curriculum or foreign language major requirements. Graded Pass/Fail. Prerequisites: SPAN F100A and SPAN F100B; or SPAN F101; or permission of instructor. (3+0)

SPAN F201  Intermediate Spanish I (h) 3 Credits
Offered Fall
Continuation of SPAN F102. Increasing emphasis on reading, writing and oral ability. Conducted in Spanish. Prerequisites: SPAN F102 or equivalent; or permission of instructor. (3+0)

SPAN F202  Intermediate Spanish II (h) 3 Credits
Offered Spring
Continuation of SPAN F201. Increasing emphasis on reading, writing and oral ability. Conducted in Spanish. Prerequisites: SPAN F201 or equivalent; or permission of instructor. (3+0)

SPAN F203  SI SI! (Summer Intensive Spanish Immersion) (h) 3 Credits
Offered Summer As Demand Warrants
Intensive two week language immersion. Verbal skills improvement. Includes role playing, problem solving and situational conversation. Conducted entirely in Spanish. Note: Does not satisfy core curriculum. Prerequisites: SPAN F201; F202 or equivalent; or permission of instructor. (3+0)

SPAN F221  Cultures and Civilizations of Latin America 3 Credits
Offered Spring Odd-numbered Years
Designed to provide students of Spanish language and others interested in Hispanic culture with background in the geography, history, religions, cultures and politics of Latin America. We will also explore the changes and challenges facing contemporary Latin American society. Conducted in English. Recommended: SPAN F102. (3+0)

SPAN F222  Cultures and Civilizations of Spain (h) 3 Credits
Offered Spring Even-numbered Years
Designed to provide students of Spanish language and others interested in Hispanic culture with background in the geography, history, religions, cultures, and politics of Spain. Explores the changes and challenges facing contemporary Spanish society. Conducted in English. Recommended SPAN F102. (3+0)

SPAN F301 O  Advanced Comprehension and Conversation (h) 3 Credits
Offered Fall
Focus on increasing writing and listening comprehension. Discussions, presentations and exercises to enhance verbal competence. Conducted in Spanish. Note: Course may be repeated for credit if topic varies. Prerequisites: COMM F131X or COMM F141X; SPAN F202 or equivalent; or instructor permission. (3+0)

SPAN F302 W  Introduction to Literary Comprehension (h) 3 Credits
Offered Spring
An introduction to the understanding and analysis of Hispanic literature, with particular emphasis on the forms of written Spanish. Conducted in Spanish. Prerequisites: ENGL F111X; ENGL F211X or ENGL F213X; SPAN F202 or equivalent; or permission of instructor. (3+0)

SPAN F311  Advanced Spanish Composition (h) 3 Credits
Practice of formal and informal writing styles in Spanish. Focus on vocabulary and stylistic issues. Course offered via distance learning. Prerequisites: SPAN F202. Recommended: ENGL F111. (3+0)

SPAN F317  Advanced Spanish Grammar (h) 3 Credits
Grammar concepts in Spanish. Focus on more difficult grammatical structures. Course offered via distance learning. Prerequisites: SPAN F202 or equivalent or permission of instructor. (3+0)

SPAN F431 O  Senior Seminar (h) 3 Credits
Offered Fall
Topics may include literature, arts and cultures of the Spanish-speaking world. Conducted in Spanish. Students may repeat course for credit if topic varies. Prerequisites: COMM F131X or COMM F141X; SPAN F302 or equivalent; senior standing; or permission of instructor. (3+0)

SPAN F432 W  Studies of Hispanic Literature (h) 3 Credits
Offered Spring
Intensive study of authors, literary texts, movements, genres, themes and/or critical approaches. Note: Course may be repeated for credit if topic varies. Prerequisites: ENGL F111X; ENGL F211X or ENGL F213X; SPAN F302 or equivalent; junior standing; or permission of instructor. (3+0)
SPANISH (SPAN) — STATISTICS (STAT)

SPAN F482
Selected Topics in Spanish (h)
3 Credits
Offered As Demand Warrants
Intensive course focusing on topics not covered in SPAN F431 or SPAN F432.
Note: Course may be repeated for credit if topic varies. Prerequisites: SPAN F302 or equivalent; junior standing, or permission of instructor. (3+0)

SPAN F488
Individual Study: Senior Project (h)
3 Credits
Offered As Demand Warrants
Analysis and presentation, in Spanish, of a problem chosen by the student in consultation with the department. The student must apply for senior project and submit a project outline by the end of the sixth week of the semester preceding the semester of graduation. Offered normally in the semester preceding the student’s graduation. Conducted in Spanish. Prerequisites: At least 10 credits in upper-division Spanish or permission of instructor. (3+0)

STATISTICS

STAT F200X
Elementary Probability and Statistics (m)
3 Credits
Descriptive statistics, frequency distributions, sampling distributions, elementary probability, estimation of population parameters, hypothesis testing (one and two sample problems), correlation, simple linear regression, and one-way analysis of variance. Parametric methods. Prerequisites: MATH F107X or MATH F161X or permission of instructor. (3+0)

STAT F300
Statistics (m)
3 Credits
Offered Spring; Fall Odd-numbered Years
A calculus-based course emphasizing applications. Topics include probability, joint and conditional probability, expectation and variance including maximum likelihood, one and two sample hypothesis tests including likelihood ratio tests, simple linear regression, and one-way analysis of variance. A student may not use STAT F200X and STAT F300 to meet the requirement of a year’s sequence course in statistics. Prerequisites: MATH F200X or MATH F262X or MATH F272X or permission of instructor. (3+0)

STAT F401
Regression and Analysis of Variance (m)
4 Credits
Thorough study of multiple regression including multiple and partial correlation, the extra sum of squares principle, indicator variables, polynomial models, model selection techniques and assessment of underlying assumptions. Analysis of variance and covariance for multifactor studies in completely random and randomized complete block designs, multiple comparisons and orthogonal contrasts. Matrix concepts for linear models are taught as needed. Also offered in Juneau as demand warrants. Prerequisites: STAT F200X [STAT S273-J] or STAT F300 or permission of instructor. (3+3)

STAT F402
Scientific Sampling (m)
3 Credits
Offered Fall
Sampling methods, including simple random, stratified and systematic and one- and two-stage cluster sampling; estimation procedures, including ratio and regression methods; special area and point sampling procedures; optimum allocation. Adaptive and probability sampling; bootstrapping and basic mark-and-recapture. Prerequisites: STAT F200X or STAT F300 or permission of instructor. (3+0)

STAT F454
Statistical Consulting Seminar
1 Credit
Offered Spring
Introduction to statistical consulting and data analysis. Emphasis on interaction with researchers and identification of scientific and statistical issues relevant to the research problem. Includes regular class meetings as well as supervised meetings with researchers. Designed to combine mathematical statistics with applications from a variety of fields. Students from any field of study with strong quantitative skills are encouraged to enroll. May be repeated for a total of three credits. Graded Pass/Fail. Prerequisites: STAT F200X or STAT F300; STAT F401; and completion or concurrent enrollment in MATH F408; or permission of instructor. Stacked with STAT F654. (1+0)

STAT F461
Applied Multivariate Statistics (m)
3 Credits
Offered Spring Even-numbered Years
Estimation and hypothesis testing, multivariate normality and its assessment, multivariate one and two sample tests, confidence regions, multivariate analysis of variance, discrimination and classification, principal components, factor analysis, clustering techniques and graphical presentation. Statistical computing packages utilized in assignments. Prerequisites: STAT F401 or permission of instructor. (3+0)

STAT F602
Experimental Design
3 Credits
Offered Fall Even-numbered Years
Conducting and analyzing designs for experimental investigations; completely randomized, randomized block and Latin-square designs, split-plot design, incomplete block design, confounded factorial designs, nested designs, treatment of missing data, comparison of designs. Prerequisites: STAT F401 or permission of instructor. (3+0)

STAT F605
Spatial Statistics
3 Credits
Offered Spring Even-numbered Years
Stochastic processes and variograms. Geostatistics including kriging and spatial design of experiments. Point processes including model selection and K-functions. Lattice process models and image analysis. Computer-intensive statistical methods. Prerequisites: STAT F401; MATH F200X-F202X or equivalent; or permission of instructor. (3+0)

STAT F607
Time Series
3 Credits
Offered Spring Odd-numbered Years
An applied course in time series and repeated measure analysis. Autoregression and moving average models. Estimation of parameters and tests. Prediction. Spectral analysis. Analysis of repeated measures data. Prerequisites: STAT F401 or permission of instructor. (3+0)

STAT F621
Distribution-Free Statistics
3 Credits
Offered Fall Odd-numbered Years
Methods for distribution-free (nonparametric) statistical estimation and testing. These methods apply to many practical situations including small samples and non-Gaussian error structures. Univariate, bivariate, and multivariate tests will be presented and illustrated using a variety of applications and data sets. Prerequisites: STAT F200X [STAT S273-J]. (3+0)

STAT F631
Categorical Data Analysis
3 Credits
Offered Fall Odd-numbered Years
Statistical methods designed for count and categorical data. Contingency tables. Logistic and related models. Loglinear models. Repeated categorical responses. Survival data. Prerequisites: STAT F401 or permission of instructor. (3+0)

STAT F641
Bayesian Statistics
3 Credits
Offered Fall Even-numbered Years
Bayes’ Rule, univariate Bayesian models, conjugate models and noninformative priors. Multiparameter models. Hierarchical models, general linear model and mixed models. Study of posterior simulation techniques including Markov Chain Monte Carlo and the Gibbs Sampler. Will involve analysis of data sets using WinBUGS and R. Prerequisites: MATH F201X; MATH F371–F408 or STAT F651; or permission of instructor. (3+0)

STAT F642
Bayesian Decision Theory for Resource Management
4 Credits
Offered Spring Even-numbered Years
Application of decision theory to problems in natural resources management. Students will learn to perform Bayesian calculations and uncomplicated decision analysis themselves. Prerequisites: FISH F621 or FISH F630; or permission of instructor. Cross-listed with FISH F642. (2+2)

STAT F651
Statistical Theory I
3 Credits
Offered Fall
Probability and distribution of random variables. Conditional probability and stochastic independence. Distributions of functions of random variables. Expected values. Limiting distributions. Distributions derived from the normal distribution. Designed to combine mathematical statistics with applications from a variety of fields. Students from any field of study with
theater and acting courses:

**THEATRE**

**THR F101** Theatre Practicum (h) 1–3 Credits Participation in drama workshop or lab production as performer or technical staff member. Credit in this course may not be applied to a major program in Theatre. (0+0)

**THR F121** Fundamentals of Acting (h) 3 Credits This class introduces basic stage acting techniques for people with little or no prior acting experience. The course will emphasize physical, emotional, and imaginative awareness and will include monologue and scene work, character analysis and improvisation. (3+0)

**THR F130A** Beginning Jazz Dance 1 Credit Develop a repertoire of jazz dance movement and terminology including plies, isolations, stretches, traveling steps, battements, pas de burres, jazz slides and turns. History of jazz dance. Graded Pass/Fail. Cross-listed with RECR F130A. (0+3)

**THR F130B** Intermediate Jazz Dance 1 Credit Develop a repertoire of a jazz dance movement and terminology including plies, isolations, stretches, traveling steps, battements, pas de burres, jazz slides and turns. History of jazz dance. Graded Pass/Fail. Cross-listed with RECR F130B. (0+3)

**THR F130C** Advanced Jazz Dance 1 Credit Develop a repertoire of jazz dance movement and terminology including plies, isolations, stretches, traveling steps, battements, pas de burres, jazz slides and turns. History of jazz dance. Graded Pass/Fail. Cross-listed with RECR F130C. (0+3)

**THR F130D** Modern Dance 1 Credit Develop a repertoire of modern dance movement and terminology including contraction and release, swings, triplets, fall and recovery, rolls and improvisations. Graded Pass/Fail. Cross-listed with RECR F130D. (0+3)

**THR F130E** Beginning Ballroom Dance 1 Credit Students with little or no background in social dance. Our aim is to have a good time and build a strong foundation for future learning. Dances covered include waltz, foxtrot, single-count swing, east coast swing, salsa, cha cha, merengue and, time permitting, polka. Graded Pass/Fail. Cross-listed with RECR F130E. (0+3)

**THR F130F** Intermediate Ballroom Dance 1 Credit Dances covered include waltz, foxtrot, single-count swing, east coast swing, salsa, cha cha, merengue and, time permitting, polka. Our aim is to have a good time and build a strong foundation for future learning. This course is for students with a beginning background in social dance. Graded Pass/Fail. Cross-listed with RECR F130F. (0+3)

**THR F130G** Advanced Ballroom Dance 1 Credit Dances covered include waltz, foxtrot, single-count swing, east coast swing, salsa, cha cha, merengue and, time permitting, polka. Our aim is to have a good time and build an even stronger foundation for future learning. This course is for students with an intermediate background in social dance. Graded Pass/Fail. Cross-listed with RECR F130G. (0+3)

**THR F130H** Beginning Ballet 1 Credit Instruction and practice in ballet at beginning levels. Graded Pass/Fail. Cross-listed with RECR F130H. (0+3)

**THR F130J** Intermediate Ballet 1 Credit Instruction and practice in ballet at intermediate levels. Graded Pass/Fail. Cross-listed with RECR F130J. (0+3)

**THR F130K** Advanced Ballet 1 Credit Instruction and practice in ballet at advanced levels. Graded Pass/Fail. Cross-listed with RECR F130K. (0+3)

**THR F130L** Square Dance 1 Credit Instruction and practice in square dance. Graded Pass/Fail. Cross-listed with RECR F130L. (0+3)

**THR F130M** Round Dance 1 Credit Instruction and practice in round dances. Graded Pass/Fail. Cross-listed with RECR F130M. (0+3)

</tbody>
</table>
THR F271  Let’s Make a Movie!  3 Credits  Offered Fall
Produce a short dramatic video including concept and script development, basic camera and shooting techniques, working with actors, directing fundamentals, location scouting, production schedule development, basic non-linear editing techniques, and DVD authoring. Students do not need previous experience making movies to take this class. Special fees apply. 
Recommended: THR F211; THR F241. Cross-listed with FLM F271. (3+0)

THR F280  Modern Dance (h)  2 Credits
Introduction to dance combines elements of modern, jazz and improvisational styles. Includes warm-up, stretches, locomotor movements (walking, running and leaping), set dance combinations, and improvisational activities. Specific readings, individual journals and informal dance presentations required. Open to all experience levels. (1.5+1.5)

THR F290  Audition or Portfolio Review Participation II  0 Credits
Theatre majors are required to participate in auditions and/or portfolio reviews every semester. Theatre majors are also expected to attend all Theatre UAF productions (tickets are provided free) and to attend all theatre department “town” meetings. Graded Pass/Fail. (0+0)

THR F291  Audition or Portfolio Review Participation II  0 Credits
Theatre majors are required to participate in auditions and/or portfolio reviews every semester. Theatre majors are also expected to attend all Theatre UAF productions (tickets are provided free) and to attend all theatre department “town” meetings. Graded Pass/Fail. (0+0)

THR F301  Theatre Practicum (h)  1–3 Credits
Participation in drama workshop or lab production as performer or technical staff member. Credit in this course may not be applied to a major program in Theatre. (0+0)

THR F310  Acting for the Camera (h)  3 Credits
Students will apply skills introduced in Fundamentals of Acting, to acting for the camera. By acting in numerous on-camera exercises, television and film scenes, the class will expand each performer’s expressiveness for the camera. May be repeated twice for credit. Special fees apply. 
Prerequisites: THR F211. Recommended prerequisite: THR F221. Cross-listed with FLM F310. (3+0)

THR F320  Voice and Speech for the Actor  3 Credits  Offered Alternate Years
Vocal training for actors through introduction to Fitzmaurice and Linklater techniques. Course will include basic vocal anatomy, introduction to the International Phonetic Alphabet and monologue performance.  
Prerequisites: THR F211 or permission of instructor. (3+0)

THR F321  Acting III (h)  3 Credits  Offered Alternate Years
This course introduces the principles of stage movement and period acting. The class will include introduction to movement dynamics, contact improvisation, stage combat, physical character development, and period scene study. Special fees apply. 
Prerequisites: THR F221 and THR F320. (3+0)

THR F331  Directing Film / Video (h)  3 Credits  Offered Fall Odd-numbered Years
Introduction to the history, theory and basic concepts of film stage direction. Includes interpretative script analysis, creative visualization, conceptualization, use of space, working with actors and designers, and direction of short scenes and videos. Special fees apply. 
Prerequisites: FLM/THR F271; FLM/THR F273; FLM/ENGL F290 or permission of instructor. 
Recommended: FLM/ENGL F217; THR F211; THR F215. Cross-listed with FLM F331. (1+4)

THR F334 W  Movies and Films: Watching and Analyzing (h)  3 Credits
Rotating thematic topics in the art of classic cinema (films) and the popular mass media (movies). Comparative analysis of classics and recent motion pictures is used to present elements of film language, analysis and criticism in this writing intensive course. Prerequisites: ENGL F111X; ENGL F211X or ENGL F211X or permission of instructor. Cross-listed with FLM F334. (3+0)

THR F335  The Collaborative Process (h)  3 Credits  Offered Alternate Years
Interactive role-based course providing insight, practice and theory in the process of collaboration across specialties when forging a theatrical production. Hierarchical and consensus-based models for artistic collaboration will be introduced and discussed in light of artistic concept, resource allocation, production budgets and individual personalities and temperaments inherent in the field of theatrical production, with an emphasis on a best-practice approach in the field. Students will incur additional expenses of $50–$100 for supplies and theatre tickets. 
Prerequisites: THR F215. (3+0)

THR F341  Intermediate Stagecraft (h)  3 Credits
An examination of the less common scenic materials with methods and techniques for their use. Students will spend approximately $40 for materials. Special fees apply. 
Prerequisites: THR F241 or permission of instructor.  
Recommended: THR F246. (2+2)

THR F343  Scene Design (h)  3 Credits
Principles and techniques of theatrical scene design. Includes designing projects directed at solving particular scenic problems or in a specific scenic style with specific physical limitations. Students will spend approximately $40 for materials. Prerequisites: THR F241 or permission of instructor. (3+0)

THR F347 O  Lighting Design (h)  3 Credits
Principles and techniques of theatrical lighting design. The student will conduct practical experiments and design projects applying the experience gained from the experiments. Students will spend approximately $40 for materials. Prerequisites: COMM F131X or COMM F141X. 
Recommended: THR F241; THR F247. Cross-listed with ART F347. (3+0)

THR F348  Sound Design for the Entertainment Industry (h)  3 Credits  Offered Spring Odd-numbered Years
Exploration and application of the elements of design as they relate to sound for theatre, dance, film, video, and other art forms, and life in American and other cultures. Production work is required. Special fees apply. 
Recommended: THR F241; THR F247. (2+2)

THR F351  Makeup for Theatre (h)  3 Credits  Offered Spring
Theatrical makeup for actors, teachers, directors and other theatre workers; makeup materials and use, age and character makeup, injuries and horror, Kabuki, cross-gender, animal, illusory and plastic relief, crepe hair buds, and influence of lighting. Students will spend approximately $85 for materials and book. Special fees apply. (1+4)

THR F354  Intermediate Costume Construction (h)  3 Credits
This course is intended to improve students’ sewing and patterning skills through a series of exercises and advanced projects. Students will be asked to construct costumes and mockups, create and alter basic patterns, manipulate sloper patterns and alter existing costumes. The final project will be designed and constructed by the student. Special fees apply. Prerequisites: THR F254 or demonstrated sewing experience and instructor permission. 
Recommended: Theatre Practicum or Work Study in the Costume Shop. (2+3)

<thead>
<tr>
<th>COURSES</th>
<th>THEATRE (THR)</th>
</tr>
</thead>
<tbody>
<tr>
<td>THR F355</td>
<td>History of Fashion and Dress</td>
</tr>
<tr>
<td></td>
<td>Social history of costume in Western civilization, from Ancient Greece to the present time. Includes instruction in the methods of research used to find visual source material and assignments that exercise these research skills. <strong>Recommended: HIST F101 or HIST F102.</strong> (3+0)</td>
</tr>
<tr>
<td>THR F356</td>
<td>Costume Design</td>
</tr>
<tr>
<td></td>
<td>Through a series of projects, play readings and drawing exercises, students learn how to successfully analyze text, communicate production concepts and express costume ideas using sketching, rendering and collage. Projects also introduce students to the practical skills needed to realize a costume design within the limits of a theatre's resources and needs. <strong>Prerequisites: ART F104 or ART F105 or permission of instructor.</strong> (3+0)</td>
</tr>
<tr>
<td>THR F361</td>
<td>Advanced Alaska Native Performance</td>
</tr>
<tr>
<td></td>
<td>In-depth study of Alaska Native theatre techniques and tradition, including traditional dance, song and drumming techniques, mask characterizations and performance application and presentation of a workshop production developed by the students during the semester. <strong>Prerequisites: ANS/THR F161.</strong> Cross-listed with ANS F361. (2+3)</td>
</tr>
<tr>
<td>THR F411 W</td>
<td>Theatre History</td>
</tr>
<tr>
<td></td>
<td>Students will explore the ways in which theatre developed through history by studying performance, practice and literature from Ancient Greece to the present. Course focuses on the setting and manner in which plays were produced, historical context, and popular themes. <strong>Prerequisites: ENGL F111X; ENGL F211X or ENGL F213X; junior standing; or permission of instructor.</strong> (3+0)</td>
</tr>
<tr>
<td>THR F413 W</td>
<td>Playscript Analysis</td>
</tr>
<tr>
<td></td>
<td>Investigation of the structure of playscripts designed to develop skills in analysis and interpretation for performance. <strong>Prerequisites: ENGL F111X; ENGL F211X or ENGL F213X; junior standing; or permission of instructor.</strong> (3+0)</td>
</tr>
<tr>
<td>THR F416 W</td>
<td>Performance Studies Abroad</td>
</tr>
<tr>
<td></td>
<td>Intensive course for actors, directors, designers, technicians and playwrights interested in script development/training with the participation of international theatre professionals. Develop new scripts and performances in a multicultural environment under the supervision of a theatre faculty member. Previous faculty and student work abroad includes: Russia, Zambia, South Africa and Scandinavia. Course requirements vary according to the project. <strong>Prerequisites: ENGL F111X; ENGL F211X or ENGL F213X; permission of instructor.</strong> Stacked with NORS F616. (3+9)</td>
</tr>
<tr>
<td>THR F417</td>
<td>Internship in Theatre Practice</td>
</tr>
<tr>
<td></td>
<td>Supervised practical work experience to provide application of course work in a professional, semi-professional or community theatre environment. Internships can be in direction, acting, design, management and technical theatre. Internships have included Perseverance Theatre, Fairbanks Shakespeare Theatre, Fairbanks Drama Association, and Out North Theatre. Course may be repeated twice for a maximum of 12 credits. <strong>Prerequisites: Completed at least 18 THR credits; upper-division standing; permission of instructor. Recommended: Previous THR credits should be in the student's concentration area: direction, design, etc.</strong> (0+0)</td>
</tr>
<tr>
<td>THR F423</td>
<td>Acting IV</td>
</tr>
<tr>
<td></td>
<td>This course will focus on the refinement of physical, vocal, emotional, and imaginative awareness. This is a scene study class which will include audition technique, acting for the camera skills, and preparation for the professional world of acting. <strong>Prerequisites: THR F121, THR F125, THR F221 THR F320 and THR F321; or permission of instructor.</strong> (3+0)</td>
</tr>
<tr>
<td>THR F431</td>
<td>Advanced Film Production</td>
</tr>
<tr>
<td></td>
<td>In depth investigation into the history, theory and concepts of film and video direction. Script preparation, storyboard and animatics, blocking actors and staging the camera, sound design, special effects, and editing techniques will be explored. Each student will produce their own capstone film project. <strong>Prerequisites: FLM F273, FLM F331, FLM/JRN F290.</strong> Recommended: FLM F271, FLM F334. Cross-listed with FLM F431 (3+0)</td>
</tr>
<tr>
<td>THR F432</td>
<td>Stage Directing II</td>
</tr>
<tr>
<td></td>
<td>In seminar and practicum form, the practice, discussion and analysis of the myriad responsibilities of the Stage Director. Aspects of Stage Direction that can be practiced within a class context will be given a practical frame for experimental learning. Other aspects will either be simulated or engaged in theoretically. Business practices and ethics will be addressed. An attempt will be made to accommodate the specific aesthetic and artistic goals of the participating students. <strong>Prerequisites: THR F332 and at least one of the following: THR F321, THR F343, THR F447, THR F431 or THR F356.</strong> (3+0)</td>
</tr>
<tr>
<td>THR F447</td>
<td>Lighting Design II</td>
</tr>
<tr>
<td></td>
<td>Further exploration and application of elements of design (color, texture, intensity, line, composition) as they relate to lighting for theatre, dance, other art forms and life. Production work required. <strong>Prerequisites: THR F347 or permission of instructor.</strong> (2+2)</td>
</tr>
<tr>
<td>THR F456</td>
<td>Advanced Topics in Costume Design and Construction</td>
</tr>
<tr>
<td></td>
<td>Rotating thematic topics in advanced methods and materials used in the design and construction of costumes for the theatre. Topics may include projects in design, advanced sewing and pattern drafting, millinery, masks, corsetry, or painting and dyeing, as demand warrants. May be repeated twice for credit. Special fees apply. <strong>Prerequisites: THR F254 or permission of instructor.</strong> (3+0)</td>
</tr>
<tr>
<td>THR F470</td>
<td>Advanced Film and Video Directing</td>
</tr>
<tr>
<td></td>
<td>In depth investigation into the history, theory, basic concepts of film and video direction, script preparation, story board, blocking actors and staging the camera and sound, editing. Projects include directing and shooting short videos. Special fees apply. <strong>Recommended: THR/FLM F331.</strong> Cross-listed with FLM F470. (1+6)</td>
</tr>
<tr>
<td>THR F482</td>
<td>Dance Performance</td>
</tr>
<tr>
<td></td>
<td>Exploration and performance of expressive dance and movement. Includes development of an original choreography for public performance. Course is for advanced dance, acting and directing students with varying experience. <strong>Prerequisites: THR F280 or movement performance experience.</strong> (1.5+1.5)</td>
</tr>
<tr>
<td>THR F488 W</td>
<td>Dramatic Writing</td>
</tr>
<tr>
<td></td>
<td>Introduction to the craft of dramatic writing for theater and film, with an emphasis on dramatic storytelling. Course will focus on giving students a practical understanding of the uses of story structure, setting, character, plot and dialog, and how these elements work together to create compelling drama. <strong>Prerequisites: ENGL F111X; ENGL F211X or ENGL F213X; or permission of instructor.</strong> Cross-listed with ENGL F488; FLM F488. (3+0)</td>
</tr>
<tr>
<td>THR F499</td>
<td>Thesis Project</td>
</tr>
<tr>
<td></td>
<td>Final step in acting/directing/design or playwright training which involves performing a leading role on main stage, or a one-person show, or a directing/designing/writing project for the UAF season. <strong>Prerequisites: Permission of instructor.</strong> (1+4)</td>
</tr>

452 Course Descriptions 2014-2015 CATALOG
TRAVES AND TECHNOLOGY

TTCH F099 Practicum
1-3 Credits
Individual work and development of skills learned in prior courses. (0+0)

TTCH F101 Machine Woodworking I
2 Credits
Introduction to woodworking power machines (circular saw, jointer, radial arm saw), joints, fasteners, and different stains and finishes used on wood. (2+0)

TTCH F105 Basic Electrical Wiring
1 Credit
Fundamental skills and career opportunities in electrical wiring. (1+0)

TTCH F110 Basic Safety Training for Building Maintenance and Repair
2 Credits
How to care for tools and use them safely, properly and efficiently using HILTI standards, follow OSHA standards to maintain a safe workplace and identify unsafe workplace situations. These standards ensure safety in construction operations. Upon passing the HILTI and OSHA testing standards, certification will be given. (2+0)

TTCH F113 Basic Plumbing
3 Credits
Introduction to methods and materials used in household plumbing. Topics includes pipe fittings and valves, pipe hangers and brackets, copper and plastic pipe fitting and plumbing fixtures. (3+0)

TTCH F117A Four-Cycle Engine Repair
1 Credit
Four-cycle engine theory and principles of operation. Classroom activities include step-by-step disassembly, inspection and assembly of a four-cycle engine. Graded Pass/Fail. (1+0)

TTCH F117B Two-Cycle Engine Repair
1 Credit
Two-cycle engine theory and principles of operation. Classroom activities include step-by-step disassembly, inspection and assembly as well as familiarization with tools used in small engine repair. Graded Pass/Fail. (1+0)

TTCH F120 Refrigeration and Air Conditioning
4 Credits
Fundamentals of refrigeration and air conditioning theory in preparation for further study. Topics include compressors, condensers, evaporators, metering devices and related components. Assumes no previous knowledge. (4+0)

TTCH F125 Introduction to Carpentry for Building Maintenance and Repair
3 Credits
Uses of lumber, commonly used hardware fasteners, types of tools and their uses, how to care for tools and use them safely, properly and efficiently. Building projects are completed which apply what was learned in the classroom. These skills are needed in maintenance positions in private businesses, schools and hospitals and in residential construction and renovation. (2+2)

TTCH F130 Blueprint and Schematic Reading
3 Credits
Basic blueprint and schematic reading skills used by building maintenance personnel. Introduction to machine drawings, building drawings, hydraulic and pneumatic drawings, electrical schematics and symbols, air conditioning and refrigeration drawings, welding and joining symbols. (3+0)

TTCH F131 Mathematics for the Trades
3 Credits
Practical application of mathematics for industry and preparation for union apprenticeship programs, including arithmetic review, ratios and proportion, powers and roots, algebra, geometry and trigonometry. Mathematical applications of basic physics with reference to units of measurement, use of precision measuring tools, measurement of forces, temperature, fluids and electricity. (3+0)

TTCH F132 Building Maintenance Materials
3 Credits
Basic properties, processes and uses of metals and non-metals in tools, machines and building materials. Practical application to building maintenance situations will be emphasized. (3+0)

TTCH F133 Basic Hand and Power Tools
3 Credits
Uses, care and maintenance of hand and power tools. Familiarity and skill development with these tools through construction of shop projects. (3+0)

TTCH F134 Maintenance Safety
1 Credit
Industrial safety including recognizing safety hazards, working safely, handling materials safely, using machinery safely, personal protective equipment, electrical safety, fire protection and government safety regulations. (1+0)

TTCH F138 Introduction to Electricity for Building Maintenance and Repair
2 Credits
Offered As Demand Warrants
Commonly used materials in the electrical trade. Provides basic understanding of the National Electrical Code, local codes and schematic drawings. Stresses safe installation and correct tool usage. Familiarity and skills are cultivated through projects. (1.5+2)

TTCH F140 Introduction to Plumbing for Building Maintenance and Repair
2 Credits
Basic plumbing materials that may be used in any plumbing system, how to use plumbing tools and completing selected projects. Includes using drawings to identify types of plumbing branches and bends, pipe fittings, correct plumbing layout aids, and installation applications. (1.5+2)

TTCH F146 Burner Maintenance and Repair
1 Credit
Instruction in troubleshooting 10 common problems, reading manuals, changing parts, setting electrodes, changing nozzles, understanding controls and ordering replacement parts. (1+2)

TTCH F147 Heating Systems for Building Maintenance and Repair
2 Credits
Comprehensive instruction for people employed in installation and maintenance of heating systems. Installation and maintenance applications of fuel transfer, theories of combustion, nozzles, combustion chambers, heat exchangers, draft regulators, stacks, controls and sizing of systems. Recommended: TTCH F138. (1.5+2)

TTCH F150 Introduction to Painting for Building Maintenance and Repair
2 Credits
Surfaces and surface protection, sealants and fillers, paint categories and application tools. Hands-on projects are completed which apply skills learned in the classroom. These skills are needed in facility maintenance positions in businesses such as schools and hospitals, and in residential construction and renovation. (1+1.5)

TTCH F151 Hazardous Paint Certification
1 Credit
Potential health hazards and information on safety practices will be addressed. (1+0)
TRIBAL MANAGEMENT (TM)

TM F101  Introduction to Tribal Government ◆
3 Credits
Comprehensive study of tribal government and politics in rural Alaska. Explores the differences and relationships among tribal, state and federal government. Presents key concepts for building and enhancing tribal government for building program and institutional development. Prerequisites: Must be familiar with computer and related word processing and spreadsheet programs. (3+0)

TM F105  Introduction to Tribal Finance Applications ◆
3 Credits
Tools and methods for the management and oversight of tribal government programs and organizations in rural Alaska. Student evaluation includes how well the student affects changes in tribal operations and tribal management. Prerequisites: Must be familiar with computer and related word processing and spreadsheet programs. (3+0)

TM F110  Tribal Court Development for Alaska Tribes ◆
1 Credit
An introduction to tribal court development in Alaska. Will focus on a practical understanding of key concepts for developing a tribal court process in rural Alaska. Will explore the differences and relationships between tribal, state, and federal justice systems, including concepts of jurisdiction and due process. Graded Pass/Fail. (1+0)

TM F111  Children's Topics in Tribal Justice ◆
1 Credit
Offered As Demand Warrants
Overview of children's cases in tribal justice. Preparation for informed participation in the tribal justice system as it affects children and families. Topics such as the Indian Child Welfare Act, child protection, child custody and tribal adoptions will be addressed. Graded Pass/Fail. Recommended: TM F110. (1+0)

TM F112  Federal Indian Law for Alaska Tribes ◆
1 Credit
Offered As Demand Warrants
Introduction to federal Indian law, focusing on the impacts to modern Alaskan tribal governments. Particular attention will be given to the relationship between federal Indian law and tribal justice systems in Alaska. Graded Pass/Fail. Recommended: TM F110. (1+0)

TM F114  Tribal Justice Responses to Community and Domestic Violence ◆
1 Credit
Offered As Demand Warrants
Focuses on role of the tribal justice system in responding to community and domestic violence, including the use of tribal protective orders under the federal Violence Against Women Act (VAWA). Graded Pass/Fail. Recommended: TM F110. (1+0)

TM F115  Tribal Court Administration ◆
1 Credit
Offered As Demand Warrants
Focuses on the administration of tribal courts in Alaska and the role of the tribal court clerk. Key concepts and strategies related to the effective administration and operation of tribal justice systems in Alaska will be discussed. Graded Pass/Fail. Recommended: TM F110. (1+0)

TM F116  Juvenile Justice in Tribal Court ◆
1 Credit
Offered As Demand Warrants
Focuses on concepts and strategies impacting juveniles in tribal justice systems. Special focus will be given to issues of juvenile delinquency, strategies in sentencing and community monitoring, as well as, youth courts and community justice theories. Graded Pass/Fail. Recommended: TM F110. (1+0)

TM F117  Tribal Court Enforcement of Decisions ◆
1 Credit
Offered As Demand Warrants
Focuses on role of the tribal government and justice system in enforcement of tribal court decisions in rural Alaska, including monitoring of offenders. Key concepts and strategies related to enforcement of tribal court decisions, including writing effective orders and monitoring of offenders, will be discussed. Graded Pass/Fail. Recommended: TM F110. (1+0)
TM F118  Tribal Community and Restorative Justice
1 Credit
Foucses on concepts and strategies in community justice, restorative justice, tribal peacemaking and other prominent judicial theories impacting modern Alaskan tribal jurisprudence. Graded Pass/Fail. Recommended: TM F110. (1+0)

TM F120  Introduction to Tribal Natural Resource Management
3 Credits
Introduction to natural resource management, including tribal natural resource management. Examines the basic goals and principles of tribal natural resource management, including the roles of traditional knowledge and scientific research in supporting management activities. (3+0)

TM F130  Introduction to Utility Management
2 Credits
Principles and practices involved in managing small water and wastewater facilities in rural Alaskan communities, including basic terms, key concepts and an overview of five management functions: organizational, financial, personnel, planning and operational management. Graded Pass/Fail. (2+0)

TM F131  Organizational Management for Utilities
2 Credits
Organizational principles and practices involved in managing small water and wastewater facilities in rural Alaskan communities, including an overview of responsibilities, governance authority and accountability. Graded Pass/Fail. (2+0)

TM F132  Operations Management for Utilities
2 Credits
Focus is on specific skills and knowledge that a rural utility manager needs to efficiently oversee a rural utility. Includes understanding what the operator’s duties are and how much time is needed to perform them, as well as related knowledge and skills about safety, scheduling, data collection, public relations, inventory control and contingency planning. Graded Pass/Fail. Recommended: TM F130. (2+0)

TM F134  Financial Management for Utilities
2 Credits
The components of financial management needed to successfully oversee a rural utility. Basic procedures and process will be covered, including materials on financial reporting, fund accounting, budgeting, collections, risk management and financial audits. Graded Pass/Fail. Recommended: TM F130. (2+0)

TM F136  Personnel Management for Utilities
2 Credits
Tools a rural utility manager needs to keep the work force performing to its fullest. Topics include: personnel policies and procedures; safety policy and programs; selecting and hiring staff; orientation and training; regulations and the law; people, communications and conflict; motivation and management. Graded Pass/Fail. Recommended: TM F130. (2+0)

TM F138  Planning for Utilities
2 Credits
Leads the student through the whole planning process as it applies to managing small water and wastewater facilities in rural Alaska communities. Includes why it is important to get the public involved, how to develop water/sewer alternatives and evaluate them, and how to get a construction project started. Graded Pass/Fail. Recommended: TM F130. (2+0)

TM F140  Introduction to Geospatial Data
1 Credit
An introductory survey of tools for the gathering and mapping of both qualitative and quantitative geospatial data for the natural and social sciences. Students will get direct experience with basic tools and techniques for gathering geospatial data, and will incorporate their data into an existing geospatial database. Prerequisites: Basic computer literacy equivalent to CIOS F100 or permission of instructor. (1+0)

TM F141  Practical GIS for Rural Alaska
2 Credits
A practical and place-based introduction to the development of maps using Geographic Information System (GIS) software. Covers the basic tools and skills necessary for creating community maps using existing geospatial data as well as data gathered using Global Positioning System (GPS) technology. Class exercises emphasize map development for applications pertinent to rural Alaska. Prerequisites: TM F140 or permission of the instructor. (2+0)

TM F142  Practical GIS Project Design
2 Credits
How to design and implement basic Geographic Information System (GIS) projects. Class exercises emphasize GIS project planning, data collection, and practical map development to meet common needs for communities in rural Alaska. Prerequisites: TM F141 or permission of the instructor. (2+0)

TM F170  Fundamentals of Rural Transportation
4 Credits
Offered As Demand Warrants
Provides an introduction to managing the unique multi-modal transportation system in rural Alaska. Course is designed for entry-level transportation managers or those new to rural transportation issues. Graded Pass/Fail. (4+0)

TM F171  Introduction to the Indian Reservation Roads Program
1 Credit
Offered As Demand Warrants
Introduction to the federal Indian Reservation Roads (IRR) program. The course will cover the history of the program, including recent program changes and their applicability to and effect on Alaska Native Tribes and communities in rural Alaska. The fundamentals of implementing a tribal IRR program will be presented. Graded Pass/Fail. (1+0)

TM F172  Conducting a Rural Transportation Inventory
1 Credit
Offered As Demand Warrants
Provides students with hands-on experience in conducting a field inventory of transportation facilities. Emphasis on meeting the inventory requirements for the Indian Reservation Roads program. Graded Pass/Fail. Recommended: TM F171. (1+0)

TM F173  Traffic Monitoring for Rural Transportation
1 Credit
Offered As Demand Warrants
Provides students with the basic tools to conduct a traffic monitoring program in rural Alaska. Topics covered include: the purpose of traffic monitoring; terms, definitions and acronyms commonly used in traffic monitoring; deciding where and when to monitor; required and optional data; data collection tools and techniques; adjustment factors and adjusted average daily traffic (ADT) calculations and data reporting. Emphasis is placed on meeting the ADT requirements of the Indian Reservation Roads program. Graded Pass/Fail. Recommended: TM F171; TM F172. (0.5+1)

TM F174  Basics of a Good Gravel Road
1 Credit
Offered As Demand Warrants
Provides students with a basic understanding of what makes a good gravel road. This course is designed for entry-level transportation managers as well as transportation maintenance and operations staff. Graded Pass/Fail. Recommended: TM F171; TM F172; TM F173. (0.5+1)

TM F182  Introduction to NEPA for Rural Transportation
1 Credit
Offered As Demand Warrants
An introduction to the federal National Environmental Policy Act (NEPA) and its applicability to rural transportation projects in Alaska. The course will cover the history of NEPA, including recent policy changes affecting Alaska Native Tribes. The course will present an overview of the NEPA process, the categories of NEPA documents, the NEPA requirements for different types of transportation projects, and how to effectively participate in agency-led NEPA processes. Graded Pass/Fail. (1+0)
COURSES

TRIBAL MANAGEMENT (TM) — UNDERGRADUATE RESEARCH AND SCHOLARLY ACTIVITY (URSA)

TM F199 Tribal Management Practicum I 3 Credits
Professional and personal development while working in a rural service organization. Emphasis on developing the understanding and skills necessary for delivery of rural services. Course is guided by an academic advisor. Student must be willing and able to work independently outside the classroom and in the community. Prerequisites: Must be familiar with computer and related word processing and spreadsheet programs. (3+0)

TM F201 Advanced Tribal Government 3 Credits
Offered Spring
Comprehensive study of tribal government and politics in rural Alaska. Explores the differences and relationships among tribal, state and federal government. Presents key concepts for building and enhancing tribal government for building program and institutional development. Prerequisites: Must be familiar with computer and related word processing and spreadsheet programs. (3+0)

TM F205 Advanced Tribal Finance Applications 3 Credits
Offered As Demand Warrants
Advanced tools and methods for the management and oversight of tribal government programs and organizations in rural Alaska. Student evaluation includes how well the student affects changes in tribal operations and tribal management. Prerequisites: TM F105 and must be familiar with computer and related word processing and spreadsheet programs. (3+0)

TM F225 Cross Connections: Adapting and Integrating Principles of Management and Conservation 3 Credits
Offered As Demand Warrants
Skills, abilities and knowledge needed to adapt traditional Western science and management principles to indigenous resource concepts and values are crucial when dealing with contemporary natural resource, land and environmental management issues in rural Alaska. To prepare students and provide tools and methods for considering cross-cultural concepts and values in resource management and conservation decisions. (3+0)

TM F250 Current Topics in Tribal Government 1 Credit
Offered As Demand Warrants
Various topics of current interest to Tribal Governments and Tribal Management students. Topics announced prior to each offering and course may be repeated for credit. (1+0)

TM F271 Rural Transportation Planning 1 Credit
Offered As Demand Warrants
Prerequisites: TM F170 or TM F171; TM F172; TM F173; TM F174 or permission of instructor.
Provides an introduction to the planning requirements of rural transportation programs, with emphasis on the Indian Reservation Roads (IRR) program. This course gives an overview of a transportation planning cycle, from grounding and visioning through plan development, implementation, evaluation and re-visioning. The planning elements that can be included under the IRR program regulations will be reviewed and discussed. Graded Pass/Fail. Prerequisites: TM F171; or permission of instructor. (1+0)

TM F272 Finance Applications for Rural Transportation 1 Credit
Offered As Demand Warrants
Prerequisites: TM F170 or TM F171; TM F172; TM F173; TM F174 or permission of instructor.
Prepares students and provides financial tools and methods for the management and oversight of rural government transportation programs. Familiarity with rural transportation issues and basic finance applications recommended. Prerequisites: TM F171. Recommended: TM F105. (1+0)

TM F273 Transportation Improvement Programs and Control Schedules 1 Credit
Offered As Demand Warrants
Prerequisites: TM F272. (1+0)

TM F274 Road Inventory Field Data System 1 Credit
Offered As Demand Warrants
Prerequisites: Must be familiar with computer and related word processing and spreadsheet programs. (1+0)

TM F276 Project Management for Rural Transportation 4 Credits
Offered As Demand Warrants
Prerequisites: TM F170 or TM F171; TM F172; TM F173; TM F174 or permission of instructor. (4+0)

TM F299 Tribal Management Practicum II 3 Credits
Offered As Demand Warrants
Professional and personal development while working in a rural service organization. Emphasis on developing the understanding and skills necessary for delivery of rural services. Course is guided by an academic advisor. Student must be willing and able to work independently outside the classroom and in the community. Prerequisites: Must be familiar with computer and related word processing and spreadsheet programs. (3+0)

UNDERGRADUATE RESEARCH AND SCHOLARLY ACTIVITY

URSA F192 Introduction to UAF Research and Creative Scholarship 1 Credit
Offered Fall and Spring
This course provides an overview of the diversity of research at UAF and the opportunities for undergraduate student participation in research and creative scholarship. Students will gain a broad understanding of the significance, process and impact of research as a creative scholarship as conducted across the wide range of disciplines represented on all the UAF campuses. Graded Pass/Fail. (1+0)

URSA F388 Undergraduate Research and Creative Scholarship I 2–6 Credits
Offered Fall and Spring
Prerequisites: Must be familiar with computer and related word processing and spreadsheet programs. (1+0)

URSA F488 Undergraduate Research and Creative Scholarship II 2–6 Credits
Offered Fall and Spring
Prerequisites: Must be familiar with computer and related word processing and spreadsheet programs. (1+0)

456 Course Descriptions 2014–2015 CATALOG
UNIVERSITY OF ALASKA FAIRBANKS

URSA F492  Undergraduate Research and Creative Scholarship Seminar
1 Credit  Offered Fall and Spring
Course provides students a venue for presenting their research and learning about peer research at UAF. Students will have the opportunity to gain and develop oral presentation skills and will gain a broad understanding of the significance, process and impact of research as conducted across the width of scholarly disciplines at UAF campuses. Graded Pass/Fail. (1+0)

WELDING AND MATERIALS TECHNOLOGY

WMT F101  Introduction to Welding
4 Credits  Offered As Demand Warrants
Introduction and orientation to the processes and procedures involved in the welding field including safe operational procedures for shielded metal arc welding (SMAW) (Stick), mixed inert gas (MIG), tungsten inert gas (TIG) and oxy-acetylene welding; in addition to the appropriate personal protective equipment (PPE) and terminology related to the welding industry. Special fees apply. (2+4)

WMT F102  Intermediate Welding
3 Credits
Continuation of WMT F101. Prerequisites: WMT F101. (2+2)

WMT F103  Welding I
3 Credits
Entry-level course in basic oxyacetylene, arc welding and flame cutting. Attendance at first two classes is mandatory. Special fees apply. (3+0)

WMT F105  Welding II
3 Credits
Arc welding techniques and basic MIG and TIG welding. Attendance at first two classes is mandatory. Special fees apply. Prerequisites: WMT F103 or permission of instructor. (3+0)

WMT F106  Heat Treating/Metal Finishing/Knife Making I
3 Credits
Heat treating, metal finishing. Build two knives, heat treat and finish. Special Conditions: Must have excellent hand-eye coordination. Attendance at first class is mandatory. Special fees apply. Recommended: WMT F117; WMT F241. (2+3)

WMT F117  Oxy-Acetylene Welding and Cutting
3 Credits
Safe oxyacetylene welding techniques and procedures of common metals. Welding of these metals in flat, horizontal, vertical and overhead positions. Attendance at first two class meetings is mandatory. Special fees apply. (2+5)

WMT F130  Shielded Metal Arc Welding
1–3 Credits
All positions for multiple pass fillet welds. Study in shielded metal arc (SMAW) focused on vertical, horizontal, and overhead positions with multiple passes using different techniques. Prerequisites: WMT F103; WMT F105. (1.3+0)

WMT F140  Metal Fabrication
1–3 Credits  Offered As Demand Warrants
Metal fabrication done by hand and with the aid of equipment is the focus of this class. Plan, layout, bend, form raw metal and fabricate metal projects. Attendance at first two classes is mandatory. Special fees apply. Prerequisites: WMT F103; WMT F105; WMT F160 or WMT F130. (1.5+5.5)

WMT F150  Gas Tungsten Arc Welding
1–3 Credits
Use of tungsten and argon gas for aluminum and stainless steel gas welding (formerly called Heliarc or TIG. This is an entry level gas tungsten arc welding class concentrating on aluminum. Materials will be welded in all four welding positions. Special fees apply. (1.5+5.5)

WMT F160  Gas Metal Arc Welding
1–3 Credits  Offered As Demand Warrants
Prepares student to work with wire-feed processes. Gas metal arc welding focuses on ferrous and nonferrous metals welded in all positions. Attendance at first two classes is mandatory. Special fees apply. (1.5+5.5)

WMT F206  Heat Treating/Metal Finishing/Knife Making II
3 Credits
Second level of knife making and heat treating using more complex metals and additional equipment. Must have excellent hand-eye coordination. Attendance at first class is mandatory. Special fees apply. Recommended: WMT F106; WMT F117; WMT F241. (2+2)

WMT F210  Pipe Welding
3 Credits
Prepare and weld pipe in an uphill or downhill position. Special fees apply. Prerequisites: Permission of instructor. (2+3.5)

WMT F241  Gas Tungsten Arc and Gas Metal Arc Welding
3 Credits
Entry-level gas tungsten arc welding concentrating on aluminum. Materials will be welded in all positions. Gas metal arc welding focuses on ferrous and nonferrous metals welded in all positions. Attendance at first two class meetings is mandatory. Special fees apply. (1.5+5.5)

WMT F290  Welding Proficiency Maintenance
3 Credits
Maintenance of a high degree of welding proficiency through practice of previously-learned processes. Review of safety procedures. Special fees apply. Prerequisites: WMT F130; WMT F140; WMT F160; or permission of instructor. (2+4.5)

WILDLIFE

WLF F101  Survey of Wildlife Science
1.5 Credits  Offered Fall
An introduction to wildlife biology for conservation and management. Lectures will describe the research of local wildlife biologists and the programs of management agencies. Weekend field trips will be used to introduce practical problems and approaches in wildlife science. Special fees apply. (1+0+1.5)

WLF F301  Design of Wildlife Studies
3 Credits  Offered Spring
Design of wildlife studies. Study designs for wildlife populations and their habitats. Probability theory, finite population sampling, capture-mark-recapture sampling and research design will be examined through lectures, labs and a term project. Special fees apply. Prerequisites or Co-requisites: WLF F101, MATH F107X or MATH F161X, or permission of the instructor. Recommended: STAT F200X or F300. (2+3)

WLF F304  Wildlife Internships
1–3 Credits
Practical experience in wildlife management in public or private agencies. Projects are approved by faculty member and supervised by professional agency staff. May not be substituted for courses required for major. Special fees apply. Prerequisites: Permission of instructor. (1-3+0)

WLF F305  Wildlife Diseases
3 Credits  Offered Spring Odd-numbered Years
Basic concepts of parasitic, infectious, environmental and nutritional diseases. Specific study of Alaska wildlife diseases. Basic necropsy technique and chemical immobilization. Special fees apply. Prerequisites: BIOL F115X and BIOL F116X or equivalent; or permission of instructor. Recommended: BIOL F310; BIOL F317. (2+3)

UNIVERSITY OF ALASKA FAIRBANKS

Course Descriptions 457
WLF F322 W  Principles and Techniques of Wildlife Management 3 Credits  Offered Spring
This course applies ecology to the study and management of animals and their habitats. We will discuss management for consumptive and non-consumptive uses of birds, mammals, reptiles and amphibians. Special fees apply. Prerequisites: BIOL F371; WLF F101; ENGL F111X; ENGL F211X or ENGL F213X. (2+3)

WLF F410  Wildlife Populations and Their Management 3 Credits  Offered Fall
Characteristics and ecology of wildlife populations and the knowledge necessary for their wise management. Measures of abundance, dispersal, fecundity and mortality, population modeling, competition and predation, and the management of rare species and their habitats. Special fees apply. Prerequisites: BIOL F371; calculus course; introductory STAT course; BIOL F471. (2+3)

WLF F421  Ecology and Management of Large Mammals 3 Credits  Offered Fall Even-numbered Years
Identification, taxonomy, distribution, life history and ecology of North American large mammals. Exploration of roles of reproduction, predation, nutrition, habitat alteration and competition in population dynamics of large mammals, and management practices designed for conservation of populations and special fees apply. Prerequisites: BIOL F371; WLF F322 or permission of instructor. (3+0)

WLF F425 O  Ecology and Management of Birds 3 Credits  Offered Spring Even-numbered Years
Ecology of avian populations with a focus on harvest and habitat management for North American birds. Distributions, life-history, population dynamics, and monitoring and research techniques will be considered. Special fees apply. Prerequisites: BIOL F371; COMM F131X or COMM F141X; WLF F322; WLF F322O; or permission of instructor. (3+0)

WLF F433  Conservation Genetics 3 Credits  Offered Spring
Concepts of population genetics, phylogenetics, pedigree analysis, systematics and taxonomy as they apply to conservation of species. Evaluating the impact of small population size, population fragmentation, inbreeding, hybridization, taxonomic uncertainties and other factors on viability and management of species. Special fees apply. Prerequisites: BIOL F371; COMM F131X or COMM F141X; WLF F322O; or permission of instructor. Recommended: BIOL/NRM F277. Cross-listed with BIOL F433. (3+0)

WLF F460 O/2  Wildlife Nutrition 4 Credits  Offered Fall
The energy nutrient requirements of vertebrate animals in relation to the ecology, physiology and life history. Concepts and techniques used by wildlife biologists to understand relationships between wild animals and their habitats. Techniques for constructing energy and nutrient budgets of wild animals and applications of these budgets to population level processes and habitat management. Special fees apply. Prerequisites: COMM F131X or COMM F141X; BIOL F271; BIOL F310; or permission of instructor. Cross-listed with BIOL F459. (3+3)

WLF F460 O  Landscape Ecology and Wildlife Habitat 3 Credits  Offered As Demand Warrants
A problem-based learning and critical thinking approach to modern methods in landscape ecology, including geographic information systems, remote sensing, modeling, software and the Internet. Graduate students are expected to help undergraduates with problems and questions. Special fees apply. Prerequisites: BIOL F371 or equivalent; COMM F131X or COMM F141X; Cross-listed with BIOL F469. (2+3)

WLF F485 W  Global Change Biology (a) 3 Credits  Offered Fall
Causes of climate change, the climate record, and the effects of past and forecast climate change on biophysical systems. Consideration of impacts on plants, animals, ice, and people with an emphasis on Alaska and the Arctic. Special fees apply. Prerequisites: BIOL F371; CHEM F105X; CHEM F106X; ENGL F111X; ENGL F211X or ENGL F213X or permission of instructor. Cross-listed with BIOL F485. (3+0)
WLF F669  Landscape Ecology and Wildlife Habitat  3 Credits  Offered As Demand Warrants  A problem-based learning and critical thinking approach to modern methods in landscape ecology, including geographic information systems, remote sensing, modeling, software, and the Internet. Graduate students are expected to help undergraduates with problems and questions. Special fees apply. Prerequisites: Graduate standing. Cross-listed with BIOL F669. (2+3)

WLF F680  Data Analysis in Biology  3 Credits  Offered Fall  Biological applications of nonparametric statistics, including tests based on binomial and Poisson distributions, analysis of two-way and multi-way contingency tables, and tests based on ranks; multivariate statistics, including principal component analysis, ordination techniques, cluster and discriminate analysis; and time-series analyses. Introduction to the use of the computer and use of statistical packages. Each student will analyze a data set appropriate to the student's research interests. Special fees apply. Prerequisites: STAT F200X, STAT F401; graduate standing in a biologically oriented field; or permission of instructor. (2+3)

WLF F692  Graduate Seminar  1–6 Credits  Topics in fish and wildlife management explored through readings, talks, group discussions and guest speakers with a high level of student participation. Prerequisites: Graduate standing or permission of instructor. (0+0+1–6)

WLF F692P  Graduate Seminar  1–6 Credits  Topics in fish and wildlife management explored through readings, talks, group discussions and guest speakers with a high level of student participation. Graded Pass/Fail. Prerequisites: Graduate standing or permission of instructor. (0+0+1–6)

WOMEN’S AND GENDER STUDIES

WGS F201  Introduction to Women’s and Gender Studies  3 Credits  An interdisciplinary introduction to the field of women’s and gender studies, exploring its development, subject matter and methodologies. Readings from studies that have become classic examples of the importance of gender in research in many disciplines are examined. (3+0)

WGS F202  History of Women in America  3 Credits  Offered Fall Odd-numbered Years  A chronological approach to the history of women in America. Introduction to major issues of concern to historians of women, as well as different approaches used in analysis of women's past. Consideration of multiracial backgrounds of American women. Cross-listed with HIST F202. (3+0)

Includes issues of political, economic and social solutions as employed by women in a large multi-ethnic nation-state. Prerequisites: ANS F101; ANTH F100X; ENGL F111X; ENGL F211X or ENGL F213X; SOC F100X; or permission of instructor. Cross-listed with ANS F348. (3+0)
WGS F350 W  Women’s Issues in Social Welfare and Social Work (s)
3 Credits
Examination of theories and research concerning women’s issues in the field of social work and in the social welfare system, with particular emphasis on women in poverty and women of color. Contemporary policy issues and strategies of empowerment will be covered. Prerequisites: ENGL F111X; ENGL F211X or ENGL F213X; SWK F103 or SOC F106X; or permission of instructor. Cross-listed with SWK F350. (3+0)

WGS F351  Gender and Communication (s)
3 Credits
Offered Fall
Basic socialization differences exist in the communication practices of women and men in every culture, resulting in differing cultural constructions of male and female gender. Those differences are addressed in interpersonal, organizational and cultural contexts. Explores cultural female/male dichotomy as well as individual similarities. Prerequisites: Any lower-division communication course or permission of instructor. Cross-listed with COMM F351. (3+0)

WGS F360 O  Psychology of Women Across Cultures (s)
3 Credits
Offered As Demand Warrants
Major theories, research and empirical data which describes the psychology of women as a discrete field, philosophical values of feminism and history of women’s roles in society. The impact of culture on women interpersonally and intrapsychically examined across cultures. Prerequisites: COMM F131X or COMM F141X; PSY F101 or WGS F201; or permission of instructor. Cross-listed with PSY F360. (3+0)

WGS F362  Feminist Philosophy (h)
3 Credits
Offered As Demand Warrants
Examination of contemporary feminist philosophical positions. Emphasis on feminist ethics, social and political philosophy, and epistemology. Cross-listed with PHIL F362. (3+0)

WGS F380 O  Women, Minorities and the Media (h)
3 Credits
Offered Fall
Examination of how women and minorities are portrayed in the mass media, the employment of women and minorities in the media, and how accurately the media reflects our society demographically. Presented from a feminist, multi-culturalist perspective using a broad feminist analysis encompassing issues of gender as well as class, race, age and sexual orientation. Prerequisites: COMM F131X or COMM F141X; junior standing. Cross-listed with JRN F380. (3+0)

WGS F403  Theories in Women’s and Gender Studies (s)
3 Credits
Offered Fall Odd-numbered Years
This class will explore the intellectual history of women’s and gender studies. We will start our exploration in the late 18th century, and follow feminist theoretical ideas about women and gender through to the present. Although we will mostly focus on western theoretical work, we will also delve into non-western ideas, especially as these critique western ideas about women and gender. Prerequisites: WGS F201 or permission of instructor. (3+0)

WGS F410 W  Women in Music History (h)
3 Credits
Lives and works of female musicians, composers and performers will be traced from the earliest days of the ancient and mythological through the medieval, Baroque Classical, and Romantic periods with special emphasis on composers of the 20th-century. Prerequisites: ENGL F111X; ENGL F211X or ENGL F213X; junior standing or permission of instructor. Cross-listed with MUS F410. (3+0)

WGS F414  Women and Gender in East Asian History (s)
3 Credits
Offered As Demand Warrants
Seminar on the history of East Asia with special emphasis on the experiences of women and the issue of gender. This seminar will focus on the modern period and on China and Japan especially, though other regions of East Asia may also be considered. Prerequisites: HIST F100X; ENGL F211X or ENGL F213X; or permission of instructor. Recommended: HIST F122 and/or HIST F275. Cross-listed with HIST F414. (3+0)

WGS F424  Topics in Women’s History (s)
3 Credits
Offered As Demand Warrants
An in-depth seminar on a specific topic of current interest. Topics may change and may cover the history of European or American women from the 18th century to the present. Course may be repeated for credit when content varies. Prerequisites: A lower-division history course; junior standing; or permission of instructor. Cross-listed with HIST F424. (3+0)

WGS F440  Gender and Education (s)
3 Credits
Offered Alternate Spring Even-numbered Years
Educational practices and processes and their relation to the changing situation of women in society. Examination of schools as sites of pervasive gender socialization and discrimination as well as offering new possibilities for liberation. Topics include social construction of gender; patterns of access and achievements; gender as an organizing principle in schools and classrooms; and feminist agendas and strategies for change. Prerequisites: Junior standing or permission of instructor. Cross-listed with ED F440. (3+0)

WGS F445  Gender in Cross-Cultural Perspective (s)
3 Credits
Offered Spring Even-numbered Years
Gender as cultural construction and social relationship is examined through readings in comparative ethnographies portraying gender roles in a broad variety of societies, from hunter-gatherer to industrial. New theoretical and methodological approaches in anthropology for exploring and understanding women’s and men’s experiences in their cultural variety are presented. Prerequisites: ANTH F215 or WGS F201 or permission of instructor. Cross-listed with ANTH F445. (3+0)

WGS F460  Women and Development (s)
3 Credits
Explores interrelationships over time of women, gender roles and development in the dynamic global economy, including issues in Alaska and the circumpolar north. Examines the historical marginalization of women in developmental processes, special issues affecting women in indigenous communities, and changing socio-economic and cultural gender roles of women and men in community development. Examines life histories of women that illustrate emerging principles and strategies for individual and community empowerment. Cross-listed with RD F460. (3+0)
