Graduates in geology have broad backgrounds in the earth sciences and firm foundations in mathematics, physics and chemistry. There are many concentrations available in the geological sciences, and the suggested curricula are intended to be flexible enough to allow students to pursue their own emphasis. The MS program is tailored to the special research and study interest of the student.

There are about 40 professional geoscientists in residence on campus and graduate students normally participate in the ongoing research of these professionals. Teaching and research assistantships are available to graduate students in many of these areas.

**MS Degree**

**Concentrations:** Economic Geology, General Geology, Petroleum Geology, Quaternary Geology, Remote Sensing and Volcanology

1. Complete the following admission requirements:
   a. Submit GRE scores.
   b. Complete a background at least to the level of a BS concentration in geology, geophysics or earth science.
2. Complete the general university requirements (page 200).
3. Complete the master's degree requirements (page 204).
   b. Complete any deficiencies concurrently with this degree.
4. Submit a written thesis proposal; and pass a written or oral comprehensive examination.
6. Complete one of the following concentrations:
   - **Economic Geology**
     Complete GEOS F675, GEOS F618 or equivalent; GEOS F418 or equivalent; 9 credits in applied geoscience; and at least one course in mineral economics or engineering management, as approved by the graduate advisory committee.
   - **General Geology**
     Complete 12 credits at the F600 level as approved by the graduate advisory committee.
   - **Petroleum Geology**
     Complete 12 credits of course work at the F600 level from courses in the following disciplines: structural geology, stratigraphy, sedimentology, geophysics and/or petroleum engineering, as approved by the graduate advisory committee.
   - **Quaternary Geology**
     Complete 9 credits in Quaternary geology and at least one course in another area of Quaternary studies, as approved by the graduate advisory committee.
   - **Remote Sensing**
     Complete GEOS F654 or GEOS F657 and 10 credits in remote sensing-related courses, as approved by the graduate advisory committee.
   - **Volcanology**
     Complete 12 credits at the F600 level in volcanology-related courses, as approved by the graduate advisory committee.

7. Minimum credits required ...................................................................30

**PhD Degree**

1. Complete the following admission requirement:
   a. Submit GRE scores.
2. Complete the general university requirements (page 200).
3. Complete the course work requirements for the appropriate MS concentration.
4. Complete the PhD degree requirements (page 205).
5. As part of the PhD degree requirements, complete the following:
   a. Complete and pass a written and oral comprehensive examination.
   b. Complete and submit a written thesis proposal for approval.
   c. Complete a research program as arranged with the graduate advisory committee.
6. Minimum credits required ...............................................................18

**Note:** In addition to courses listed under the geology and geophysics program, students should check the course listings under the College of Engineering and Mines and the marine science program.

**Note:** In addition to the facilities available directly through the instructional program, UAF has active research laboratories in the fields of seismology, volcanology, paleomagnetism, isotope geochronology, glaciology and ice physics in the Geophysical Institute (see Geophysical Institute under Research). These laboratories can frequently provide topics for MS and PhD theses. Other laboratories are also available in other divisions on campus, as listed under Research Institutes and Centers, page 16.
