B.E.M. Degree

Minimum Requirements for Degree: 120 – 121 credits

The Bachelor of Emergency Management degree program focuses on development of the skill sets required to lead and manage individuals and organizations in an increasingly more complex and integrated emergency management and homeland security environment. The program builds upon an individual's technical capabilities derived from education, training and experience in the fire, law enforcement, military or other related fields. This technical expertise is then combined with a curriculum of business administration and emergency management and homeland security instruction. This focus provides students with the operations management knowledge needed to lead and manage individuals, departments or agencies on a day-to-day basis while simultaneously preparing them to excel and lead during times of crisis at the local, regional, national or international levels. This degree is designed specifically to meet the needs of those who provide administrative oversight, supervisory control or leadership and management within the fields of fire, law, emergency medical services, security and other related fields at the local, state, federal and international levels. The degree also provides responders the opportunity to further their education, increase their competitive advantage for promotion and advance their operational understanding of the highly integrated emergency management and homeland security environment of today.
