Daydreaming about Summer? Plan to take:

Introduction to Ethnobotany

EBOT 100, CRN 51514

In Bethel, 7-15 July, 2016

Summer Course, 3 credits of EBOT 100 counts towards the Certificate Program in Ethnobotany

Online Course: mid May-6 July

Join students from all over Alaska to learn about Ethnobotany: the uses of plants as food, medicine, and in art.

- Take daily fieldtrips out to the tundra to learn the names of our local plants
- Learn from Elders about uses of plants for food and medicine
- Collect, prepare, and eat native wild plant foods & learn how to make fireweed jam
- Create your own grass basket to take home
- Make medicinal plant salves, soap, and natural plant dyes.
- Scholarships are available to students enrolled in the certificate program to cover tuition, transportation to and from Bethel, lodging in Sackett hall, food, and course books and materials.
