PART 1 - GENERAL

1.01  No exposed steel framing for general laboratory spaces unless approved by FS/DDC.

1.02  Finish exposed steel in mechanical spaces, garages, and loading docks, etc under Division 9.

1.03  Consider provision for additional vibration control and future loading.

1.04  Post the following information on main structural beams and columns: UAF Project Number, General Contractor, Grid or Column Line, and Month and Year installed.

1.02  Do not apply primer on structural steel where fire proofing is to be applied.

1.03  Consultant to coordinate Special Inspections with FS/DDC Project Manager

PART 2 - PRODUCTS (NOT USED)

PART 3 - EXECUTION

3.01  Perform required metal finishes touch up prior to covering during construction. Coordinate with other work to ensure that all metal surfaces have required protective coatings.
