The sewer line will be constructed in phases to minimize impact to the local residents and facilities such as Chandalar Drive homes, Walsh Hall, Stewart Hall, Bunnell House, Fire Station, Police Station, and Health Clinic.

Construction will begin on May 27. Yukon Drive will be closed from the intersection of Kobuk Avenue to the intersection of North Chandalar Dr. The intersections will remain open other than limited closures that will be announced and signed.

Phase 1 & 2 will be constructed from May 27 to June 30. This will close down Yukon Drive from the intersection of Kobuk Avenue to just before the intersection of North Chandalar Drive as stated above.

Phase 3 & 4 will be constructed June 30 to July 10. This will close down North Chandalar from the intersection of Yukon Drive to the intersection of Colville Avenue. Yukon Drive will remain closed for a portion of this work and open up when the route becomes available.

During phase 4 site specific coordination for emergency vehicles and access to Walsh Hall and Bunnell House will be made as the construction progress dictates.

Phase 5 will be constructed from July 10 to August 10. This will close down North Chandalar Drive from the Colville intersection to 716 Chandalar. Traffic flow and coordination will be provided closer to that time.

Please direct any questions or concerns to the UAF Customer Service Center at 474-7000.
