Practical Energy Solutions is installing a light monitor (see picture) as part of a large ongoing energy study. These devices will remain in place for about two weeks, at which point a PES employee will remove them.

These devices ARE NOT invasive recording devices, such as cameras or microphones.

Please, do not attempt to remove these devices. If one of these devices should accidentally fall, please return it to your facility manager or call 1 (877) 276 - 1312. Thank you for your cooperation.
