The Alaska Center for Energy and Power Initiative

...BECUSE ENERGY AFFECTS US ALL.

The Alaska Center for Energy and Power provides practical energy solutions for Alaskans and communities around the world. It has outgrown its current location and needs a new home. To create that home, the University of Alaska Fairbanks will raise $6.5 million to complete the fourth floor of the UAF Engineering, Learning and Innovation Facility.

The new home for ACEP will provide state-of-the-art space for researchers and businesses to tackle complex energy challenges facing Alaska, the nation and the world.

ACEP is preparing a new generation of engineers for Alaska whose work will have lasting impacts.

You can help solve energy challenges facing Alaska communities and beyond by investing in ACEP.

You’re invited to become a leadership investor in the Alaska Center for Energy and Power Initiative by making a philanthropic gift. Your support will provide a solid foundation for this innovative center that provides practical energy solutions.

Donors at the $25,000 level or greater will be recognized as founding investors throughout the development of ACEP’s home in the UAF Engineering, Learning and Innovation Facility.

There are a number of naming opportunities within the space, including classrooms, student laboratories and more.

Customized marketing and recognition opportunities based on giving level are available upon request.

Learn how you can become a lead donor to the Alaska Center for Energy and Power initiative by contacting Emily Drygas, Director of UAF Development and Alumni Relations at 907-474-2619 or UAF-giving@alaska.edu.
