### Expanded Statement of Institutional Purpose

**MISSION STATEMENT:** To provide high quality preparation for early childhood professionals who wish to advance their professional development within the field.

**GOAL STATEMENT:** To be the most highly recognized Child Development and Family Studies cross-regionally delivered BA program that is valued as a high-quality educational program within the state of Alaska and beyond.

### Intended Objectives/Outcomes

1. **Communication:**
   - **1.a. Written:** Students should be able to display effective written communication skills for use in the EC environment using standardized formatting of APA.
   - **1.b. Oral:** Students should be able to share information through oral presentation with supportive visuals; example of supportive visual could be a Powerpoint.

   **Instrument:**
   - **Writing Assessments:** Rubric: The writing rubric covers 6 components.
   - **Oral Presentations:** Rubric: The oral rubric covers 5 components.

   **Min. Standard:** 80% of students to meet or exceed expectations.

   **Implementation:** Writing Samples are collected from all “W” designated courses within the CDFS BA. These courses are ECE 445W, ECE 304W, ECE 306W and ECE 420W.

   Samples of completed rubrics used for grading are collected from the “O” designated course within the CDFS BA; ECE 342 O.

   Data collected every semester and assessed bi-annually by CDFS Faculty.

2. **National Standards**

   Successful CDFS students will demonstrate the ability to apply knowledge, analyze, synthesize and evaluate in each of the following NAEYC initial licensure standards.

   There are six core standards. Each standard describes in a

   **An assortment of assessments will be used throughout the CDFS course work.**

   **Instrument:** Field experiences “lab”
   **Rubric:** Rubrics to match all Field Experiences will be

   **Implementation:** Samples of all assessments will be collected each fall and spring semester from all delivered courses.
### Standard 1: Promoting child development and learning.

Students are grounded in a child development knowledge base. They use their understanding of young children’s characteristics and needs and of the multiple interacting influences on children’s development and learning to create environments that are healthy, respectful, supportive and challenging for each child. (NAEYC.2010.p)

### Standard 2: Building family and community relationships.

Students understand that successful early childhood education depends on partnerships with children’s families and communities. They know about, understand, and value the importance and complex characteristics of children’s families and communities. They use this understanding to create respectful, reciprocal relationships that support and empower families and

| Standard 6: Becoming a professional | Students are prepared to use their knowledge of academic disciplines to design, implement, and evaluate experiences that promote positive development and learning for each and every young child. Students will understand the importance of developmental domains and academic (or content) disciplines in early childhood curricula. They know the essential concepts, inquiry tools, and structure of content areas, including academic subjects, and can identify resources to deepen their understanding. Students use their own knowledge and other resources to design, implement, and evaluate meaningful, challenging curricula that promote comprehensive developmental and learning outcomes for each child. | will be aligned with the passing capstone clinical practice. Students identify and conduct themselves as members of the early childhood profession. They know and use ethical guidelines and other professional standards related to early childhood practice. They are continuous, collaborative learners who demonstrate knowledgeable, reflective, and critical perspectives on their work, making informed decisions that integrate knowledge from a variety of sources. They |
are informed advocates for sound educational practices and policies.

**Standard 7: Field or Clinical Practice**

Field experiences and clinical practice are planned so that candidates develop the knowledge, skills and professional dispositions necessary to promote the development and learning of young children across the entire developmental period of early childhood – In at least two of the three early childhood age groups (birth – age 3, 3 through 5, 5 – 8 years) and in the variety of settings that offer early education (early school grades, child care centers and homes, Head Start programs).

Sample Rubrics that are used throughout program are attached on next pages.
