**TRIAL COURSE OR NEW COURSE PROPOSAL**

1. **ACTION DESIRED**
   - Trial Course
   - New Course
   *(CHECK ONE)*

2. **COURSE IDENTIFICATION**
   - Dept: CHEM
   - Course #: F671
   - No. of Credits: 3
   - Course will consist of 3h or lecture/week. Students will be asked to apply concepts introduced in upper division biochemistry courses to derive and apply theoretical models used in receptor pharmacology.

3. **PROPOSED COURSE TITLE**: Receptor Pharmacology

4. **To be CROSS-LISTED?**
   - No

5. **To be STACKED?**
   - No

6. **FREQUENCY OF OFFERING**: Spring Odd-numbered Years

7. **SEMESTER & YEAR OF FIRST OFFERING (if approved)**: Spring 2013

8. **COURSE FORMAT**: Lecture
   - Mode of delivery (specify lecture, field trips, labs, etc)
   - OTHER FORMAT (specify)

9. **CONTACT HOURS PER WEEK**:
   - 3 LECTURE hours/week
   - 0 LAB hours/week
   - 0 PRACTICUM hours/week
   - Note: # of credits are based on contact hours. 800 minutes of lecture=1 credit. 2400 minutes of lab in a science course=1 credit. 1600 minutes in non-science lab=1 credit. 2400-4800 minutes of practicum=1 credit. 2400-8000 minutes of internship=1 credit. This must match with the syllabus. See http://www.uaf.edu/uafgov/faculty/cd/credits.html for more information on number of credits.

10. **COMPLETE CATALOG DESCRIPTION including dept., number, title and credits (50 words or less, if possible)**:
    - CHEM F671: Receptor Pharmacology
    - Offered Spring Odd-numbered Years
    - 3 credits
    - Covers basic drug/receptor theory to train students to a) assess affinity and efficacy of receptor ligands b) work with and interpret functional assays and binding results c) critically evaluate original research regarding receptor pharmacology with an emphasis on ligand-gated ion channels and G-protein coupled receptors and c) identify testable hypotheses and design experiments to test these hypotheses. Prerequisites: Upper division or graduate biochemistry or neurochemistry course or permission of instructor. BIO 417 Neurobiology is recommended. (3+0)
11. COURSE CLASSIFICATIONS: (undergraduate courses only. Use approved criteria found on Page 10 & 17 of the manual. If justification is needed, attach on separate sheet.)

<table>
<thead>
<tr>
<th>H = Humanities</th>
<th>S = Social Sciences</th>
</tr>
</thead>
</table>

Will this course be used to fulfill a requirement for the baccalaureate core? YES [ ] NO [ ]

IF YES, check which core requirements it could be used to fulfill:

- O = Oral Intensive, Format 6 [ ]
- W = Writing Intensive, Format 7 [ ]
- Natural Science, Format 8 [ ]

12. COURSE REPEATABILITY:

Is this course repeatable for credit? YES [ ] NO [ ]

Justification: Indicate why the course can be repeated (for example, the course follows a different theme each time). N/A

How many times may the course be repeated for credit? 1 TIMES

If the course can be repeated with variable credit, what is the maximum number of credit hours that may be earned for this course? 3 CREDITS

13. GRADING SYSTEM: Specify only one.

<table>
<thead>
<tr>
<th>LETTER:</th>
<th>XX</th>

<tbody>
<tr>
<td>PASS/FAIL:</td>
<td>[ ]</td>
</tr>
</tbody>
</table>

RESTRICTIONS ON ENROLLMENT (if any)

14. PREREQUISITES

Upper division or graduate biochemistry or neurochemistry course or permission of instructor. BIO 417 Neurobiology is recommended

These will be required before the student is allowed to enroll in the course.

15. SPECIAL RESTRICTIONS, CONDITIONS N/A

16. PROPOSED COURSE FEES

$0

Has a memo been submitted through your dean to the Provost & VCAS for fee approval? Yes/No N/A

17. PREVIOUS HISTORY

Has the course been offered as special topics or trial course previously? Yes/No

If yes, give semester, year, course #, etc.: Chem F693 Receptor Pharmacology, Spring 2011

18. ESTIMATED IMPACT

WHAT IMPACT, IF ANY, WILL THIS HAVE ON BUDGET, FACILITIES/SPACE, FACULTY, ETC.

The need for this course was identified by the graduate faculty of the Biochemistry and Molecular Biology Program, and thus it was offered as a special topic in Spring 2011. We are now applying to make this an alternate-year graduate course.

19. LIBRARY COLLECTIONS

Have you contacted the library collection development officer (kljensen@alaska.edu, 474-6695) with regard to the adequacy of library/media collections, equipment, and services available for the proposed course? If so, give date of contact and resolution. If not, explain why not.

| No | No | Yes | Original articles available online or via e-mail requests will suffice |

20. IMPACTS ON PROGRAMS/DEPARTMENTS

What programs/departments will be affected by this proposed action? Include information on the Programs/Departments contacted (e.g., email, memo)

Students from Biology and Wildlife could take this course to enhance their knowledge, so there is positive impact there. We will advertise the course so as to get as many students as possible.

21. POSITIVE AND NEGATIVE IMPACTS

Please specify positive and negative impacts on other courses, programs and departments resulting from the proposed action.

Positive: Graduate students need training in Receptor Pharmacology, particularly for students interested in Biomedical Area and/or Pharmacology. Therefore, the Biochemistry and Molecular Biology Program
will be strengthened.

Negative: The offering of this course will restrict what other graduate courses we can offer; however, the need for teaching it outweighs the negative impact on other courses.

JUSTIFICATION FOR ACTION REQUESTED
The purpose of the department and campus-wide curriculum committees is to scrutinize course change and new course applications to make sure that the quality of UAF education is not lowered as a result of the proposed change. Please address this in your response. This section needs to be self-explanatory. Use as much space as needed to fully justify the proposed course.

Receptor pharmacology is a high demand area for students trained in biochemistry and is fundamental to all of the neuroscience research at UAF and in particular research within the biochemistry and molecular biology program. Student and faculty demand for this course suggested that it should be offered in place of topics in neurochemistry.

APPROVALS:

[Signature, Chair, Program/Department of: Chemistry and Biochemistry] Date 9 Feb 2011

[Signature, Chair, College/School Curriculum Council for: CNSM] Date 24 Feb 2011

[Signature, Dean, College/School of: CPSM] Date 25 Feb 2011

Signature of Provost (if applicable)
Offerings above the level of approved programs must be approved in advance by the Provost.

ALL Signatures MUST BE OBTAINED PRIOR TO SUBMISSION TO THE GOVERNANCE OFFICE

[Signature, Chair, UAF Faculty Senate Curriculum Review Committee] Date

ADDITIONAL SIGNATURES: (As needed for cross-listing and/or stacking)

[Signature, Chair, Program/Department of: ] Date

[Signature, Chair, College/School Curriculum Council for: ] Date

[Signature, Dean, College/School of: ] Date
ATTACH COMPLETE SYLLABUS (as part of this application).
Note: The guidelines are online: http://www.uaf.edu/uafgov/faculty/cd/syllabus.html
The department and campus wide curriculum committees will review the syllabus to ensure that each of the items listed below are included. If items are missing or unclear, the proposed course change will be denied.

SYLLABUS CHECKLIST FOR ALL UAF COURSES
During the first week of class, instructors will distribute a course syllabus. Although modifications may be made throughout the semester, this document will contain the following information (as applicable to the discipline):

1. Course information:
   - Title, □ number, □ credits, □ prerequisites, □ location, □ meeting time
     (make sure that contact hours are in line with credits).

2. Instructor (and if applicable, Teaching Assistant) information:
   - □ Name, □ office location, □ office hours, □ telephone, □ email address.

3. Course readings/materials:
   - □ Course textbook title, □ author, □ edition/publisher.
   - □ Supplementary readings (indicate whether □ required or □ recommended) and
     □ any supplies required.

4. Course description:
   - □ Content of the course and how it fits into the broader curriculum;
   - □ Expected proficiencies required to undertake the course, if applicable.
   - □ Inclusion of catalog description is strongly recommended, and
   - □ Description in syllabus must be consistent with catalog course description.

5. □ Course Goals (general), and (see #6)

6. □ Student Learning Outcomes (more specific)

7. Instructional methods:
   - □ Describe the teaching techniques (e.g. lecture, case study, small group discussion, private instruction, studio instruction, values clarification, games, journal writing, use of Blackboard, audio/video conferencing, etc.).

8. Course calendar:
   - □ A schedule of class topics and assignments must be included. Be specific so that it is clear that the
     instructor has thought this through and will not be making it up on the fly (e.g. it is not adequate to say
     “lab”. Instead, give each lab a title that describes its content). You may call the outline Tentative or
     Work in Progress to allow for modifications during the semester.

9. Course policies:
   - □ Specify course rules, including your policies on attendance, tardiness, class participation, make-up
     exams, and plagiarism/academic integrity.

10. Evaluation:
    - □ Specify how students will be evaluated, □ what factors will be included, □ their relative value, and
      □ how they will be tabulated into grades (on a curve, absolute scores, etc.)

11. Support Services:
    - □ Describe the student support services such as tutoring (local and/or regional) appropriate for the
      course.

12. Disabilities Services:
    - The Office of Disability Services implements the Americans with Disabilities Act (ADA), and insures that
      UAF students have equal access to the campus and course materials.
    - □ State that you will work with the Office of Disabilities Services (208 WHIT, 474-5655) to provide
      reasonable accommodation to students with disabilities.”
**Chemistry 671: Receptor Pharmacology**

**Instructor:** Dr. Kelly Drew  
**Office/office hrs:** Irving I, room 104A 10:00am-4:00pm, stop by or call for an appointment  
**Telephone:** 474 - 7190  
**e-mail:** kdrew@alaska.edu  
**Lecture:**  
**Time:** Tuesday and Thursday 3:40-5:10  
**Location:** TBA

**Homework:**  
Due at the end of class when indicated. Late HW is not accepted.

**CRN#**  
***** CHEM F671 F01 Receptor Pharmacology

**Blackboard Access**  
All Powerpoint slides used in class as well as reading material will be posted on UAF Blackboard at https://classes.uaf.edu  
UAA and UAS students who register for the class will be assigned a username and password to login to UAF Blackboard. Contact our computer help desk at helpdesk@alaska.edu, 800-478-8226 or 907-450-8300 to ask about your user ID and password.

**Course Description:**  
This course will teach students to: 1) understand basic drug receptor theory; 2) be familiar with assays to assess affinity and efficacy of receptor ligands 3) work with and interpret functional assays and radioligand binding results 4) to critically evaluate original research regarding receptor pharmacology with an emphasis on ligand-gated ion channels and G-protein coupled receptors; 5) identify testable hypotheses and design experiments to test these hypotheses.

Prerequisite: Upper division or graduate biochemistry or neurochemistry course or permission of instructor. BIO 417 Neurobiologyis recommended.

**Course objectives**  
1. Students will derive the classical models of receptor function and receptor antagonism  
2. Students will fit data sets provided by the instructor using GraphPad software and generate simulated results based on equations derived from theoretical models  
3. Students will be guided by the instructor through critical evaluation of peer-reviewed papers collected by students pertaining to receptor pharmacology. Guided instruction will address the following objectives:  
   - Know how to critically evaluate experimental design, protocols and interpretation of data.  
   - Know how to prepare a peer-review of a submitted manuscript when invited by a journal’s editor.

**Required Reading:**  
A Pharmacology Primer, Third Edition: Theory, Application and Methods  
Terry Kenakin, ISBN 978-0-12-374585-9

Original research and review articles to be assigned

**Homework, and Grading:**  
Homework (70%) will consist of take home assignments described under course objectives  
Final exam (30%) will consist of a selection of modified homework assignments

See schedule for when homework is due. Permission to hand-in HW via e-mail may be arranged in advance and will not be accepted without prior arrangements. Late homework will not be accepted unless arrangements are made before the homework is late. The letter grades assigned will be based on the overall performance of the class but will usually be in the range 90-100=A, 80-90=B, 70-79=C, 60-69=D, and below 60 is failing.

**Disabilities:**  
Students with a physical or learning disability are required to identify themselves to Mary Matthews (x 7043) in the Disability Services office, located in the Center for Health and Counseling. The student must provide documentation of the disability. Disability Services will then notify Prof. Drew of special arrangements for taking tests, working homework assignments, and doing lab work.
