D. ESTIMATED IMPACT

WHAT IMPACT, IF ANY, WILL THIS HAVE ON BUDGET, FACILITIES/SPACE, FACULTY, ETC.

No impact

E. IMPACTS ON PROGRAMS/DEPTS:

What programs/departments will be affected by this proposed action?  
include information on the Programs/Departments contacted (e.g., email, memo)

The only positive impact is to students who will have more time to practice and complete their senior design project.

F. IF MAJOR CHANGE - ASSESSMENT OF THE PROGRAM:

Description of the student learning outcomes assessment process.)
JUSTIFICATION FOR ACTION REQUESTED

The purpose of the department and campus-wide curriculum committees is to scrutinize program/degree change applications to make sure that the quality of UAF education is not lowered as a result of the proposed change. Please address this in your response. This section needs to be self-explanatory. If you drop a course, is it because the material is covered elsewhere? Use as much space as needed to fully justify the proposed change and explain what has been done to ensure that the quality of the program is not compromised as a result.

- For the capstone design course (senior design), the past experience shows that it needs longer time than one semester for many students to complete a comprehensive design process, which includes project definition, specification, concept design, development, fabrication and test.
- ME department once had a meeting in Nov. 2010 dedicated to discussing this issue, and a consensus was reached: this course needs to be dropped and two new courses (senior design I and II) should be formed to replace it, so as to allow students to have two semesters to conduct a comprehensive senior design.
- This proposal is for the dropping of current senior design course, so as to initiate and implement two new proposed courses.
