I called Anita after receiving the following information regarding CTT 250 from Mario Gho (program head for CTT):

Because our courses have a large hands-on components, how about a guideline that at least one-third of the credits will come from the lab portion.  
So our breakdown would be Lecture 1-3, Lab 0.5-1.5, or (1-3, 0.5-1.5).

Anita says that will work, and each course would specify the exact numbers as the section is created.
