Course Description:

This course provides an overview of modern border and transportation security challenges, as well as different methods employed to address these challenges. The course covers a time period from post 9-11 to the present. The course explores topics associated with border security and security for transportation infrastructure, to include: seaports, ships, aircraft, airports, trains, train stations, trucks, highways, bridges, rail lines, pipelines, and buses. The course will include an exploration of technological solutions employed to enhance security of borders and transportation systems. Students will be required to discuss the legal, economic, political, and cultural concerns and impacts associated with transportation and border security. The course provides students with a knowledge level understanding of the variety of challenges inherent in transportation and border security.

Course Objectives:

- Outline primary federal and state/local agencies in the US who are affiliated with Border Security and Transportation Security.
- Construct an historical timeline reflecting significant transportation related terrorist threats and events in the United States and globally.
- General understanding of the modes of transportation and their industries as it may impact security.
- Identify general vulnerabilities and risks in transportation systems and border security systems.
- Demonstrate knowledge of the impact of technology on countering threats to transportation systems and border security.
- Discuss differences in dealing with security threats for passenger versus freight/cargo transportation systems including the impact on supply chain logistics.
- Classify the roles, functions, and interdependency between local, federal, and international law enforcement and military agencies to foster border security.
- Solve problems as an individual and in a coordinated team setting.
- Demonstrate basic verbal and communication skills, and write clear, concise and accurate reports to provide factual information, accurate data analysis, and logical recommendations.
- Discuss the supply chain logistics and modes of transportation.
Required Textbook:

Description of Instructional Methods:

The course will be delivered through an in-class (resident) and distance virtual classroom utilizing both blackboard and BigBlueButton. The hybrid class will utilize facilitated discussions, assignments, case studies and independent research. A mid-term and final exam will be provided. Additionally, each student will be required to write a research paper and develop an intelligence related case study relevant to this course of study. Students are also responsible for the listed reading assignments.

Recommended preparation: 2 hours weekly beyond class instruction

Technical Requirements:

This course requires a computer with internet access. Activating a Voice Thread account will also be a requirement (as a presentation tool) for multiple projects throughout the semester. Lastly, students should ensure they have access to their UA email accounts and a Power Point viewer.

Evaluation:

There will be a mid-term and a final exam given during this course. Additionally, each student will be required to submit a written project that critiques a chosen transportation/border infrastructure and recommends viable solutions. The project will be due during week 13—NO EXCEPTIONS!

Students are also responsible for the listed reading assignments and taking good notes in class. Most of the study material will come from classroom lectures.

Students are required to attend all classes. If absences become unavoidable due to employment requirements or other reasons, please notify the instructor prior to class. Class participation is mandatory and will be graded.

Course Policies:

Students are expected to remain up to date with the scheduled lesson plans on a weekly basis. Students will be penalized for the late submission of class assignments or should they fall behind by more than two weeks (outside of emergency or mutually agreed upon circumstances). Students are expected to observe academic honesty. Dishonest practices including giving or receiving assistance in any manner or form during an examination, unauthorized possession of exam questions, and plagiarism (willfully presenting another person’s writings, opinions or thoughts as one’s own, without proper credit and documentation) will not be tolerated. Violations of the UAF Student Code of Conduct will be referred to the appropriate authority for possible disciplinary actions including removal of violator from this course.

Support Services:

Students are encouraged to utilize the UAF Writing Center in 801 Gruening (Phone # 474-5314) as needed to assist in the development and refinement of their written products. Please contact me as required should you need to contact other subject matter support services relevant to the development of your leadership or class projects/topics.

Students with Disabilities:

Students with learning or other disabilities who may need classroom accommodations are encouraged to make an appointment with the Office of Disability Services (Phone # 474-7043). Please inform me of your needs and if I need to meet with the Office of Disability Services to provide the appropriate accommodations and supports to assist you in meeting the goals of the course.
