A. CHANGE IN DEGREE REQUIREMENTS: (Brief statement of program/degree changes and objectives)

We are updating Bachelor of Arts, Bachelor of Fine Arts and Minor in Art. This change adds new courses to the program and will allow beginning students to directly enroll in introductory level courses in their area of interest.

Coordinated with this degree change information are additional major and minor course change forms (in addition to last Spring 2013’s approved Minor Change Form in which ART F161’s title was changed to add the term Digital to become “Two-Dimensional Digital Design.”). These changes add a 200-level course, modify the content and name of a 300-level course, and change the name of a 400-level course. These three requests are summarized below:

1) Add New Course: Art F271 – Beginning Computer Art – 3 credits
   (New Course Proposal Form – Format 1)
   This new course takes on some of the content formerly contained in Art F371 – Digital Photography and Pixel Painting – 3 credits.

Consequently, Art F371 will remain and will have a new name:

2) Course Major Change Form – Format 2
   Art F371 name is changed from Digital Photography and Pixel Painting to the new name Art F371 Digital Imaging.

3) Course Minor Change Form – Format 2A
   Art F472 name is changed from Visualization and Animation to the new name Art F472 3D Animation.

The requirements for a BA in Art must now be listed to delete Art F371 and, instead, include Art F271 in catalog section 3C for the Art BA major.

B. CURRENT REQUIREMENTS AS IT APPEARS IN THE CATALOG:

Note: In addition to the program (major) requirements above, BA students will need additional upper division credit, (e.g. from the soc sci / hum requirements and the minor), to equal 39 Upper Division credits total.

D. ESTIMATED IMPACT

WHAT IMPACT, IF ANY, WILL THIS HAVE ON BUDGET, FACILITIES/SPACE, FACULTY, ETC.

We do not foresee any changes in studio and classroom space, budget or faculty workload demands since we are not changing the specific course offerings. The three courses being moved from the required foundation area to the elective area could initially see slight decline in the enrollment, but we estimate the decline will be minimal since they are popular areas of concentration. We also feel that taking the menu approach to most of the lower division credits will serve the students better with a more diverse range of choices while still giving them a broad range of foundation skills. Moving these three courses should substantially increase enrollment in our program as a whole and consequently aid enrollment in both lower division and upper division Art courses.
E. IMPACTS ON PROGRAMS/DEPTS:

What programs/departments will be affected by this proposed action?
Include information on the Programs/Departments contacted (e.g., email, memo)

The photography courses added to the 200 level elective area are cross-listed with the Journalism Department. These courses would likely see enrollment increase because of high interest in the photography area, benefiting both the Journalism and Art Departments.

For the computer art courses (Art F271, F371, and F472) only the Art Department will be impacted. There will be a more logical flow to classes and the computer art classes will confirm to the other studio classes with a 200-level beginner class, followed by a 300, then 400-level class. Currently there is no 200-level class in computer arts.

F. IF MAJOR CHANGE - ASSESSMENT OF THE PROGRAM:

Description of the student learning outcomes assessment process.

The art department tracks the number of BA Art students and their enrollment numbers in Art courses. Qualitative assessment instruments are in place at the 300 and 400 levels of Art courses that should expose any ensuing weaknesses or enhancements resulting from this program change.

JUSTIFICATION FOR ACTION REQUESTED

The purpose of the department and campus-wide curriculum committees is to scrutinize program/degree change applications to make sure that the quality of UAF education is not lowered as a result of the proposed change. Please address this in your response. This section needs to be self-explanatory. If you drop a course, is it because the material is covered elsewhere? Use as much space as needed to fully justify the proposed change and explain what has been done to ensure that the quality of the program is not compromised as a result.

This proposed change has two objectives. First, this program has not been substantially updated for at least 15 years. In that time, the program has grown and now has new major concentration areas in computer art and (soon) photography. The current program does not presently have introductory level courses listed in these areas. The proposed change includes three new courses, Beginning Computer Art, Basic Darkroom Photography and Basic Digital Photography. The second objective is to allow freshmen and sophomores to enroll directly in beginning level courses in their area of interest. The current structure of the program requires them to take nine foundation courses, including two drawing courses, one painting and one sculpture course as well as two basic design courses and the two art history courses. The proposed change moves the Beginning Painting, Beginning Sculpture and Intermediate Drawing courses to the lower division elective area. We believe that the two design courses and one drawing course can cover the foundation skills required for all art majors. This proposed change will allow students to start taking courses in their area of interest earlier in their academic career. These changes are modeled after other state university programs that have gone over to a menu approach to accommodate increasingly diverse disciplines in the arts.

For the three computer arts class changes, there will be a more logical flow for students opting to focus in computer arts should they choose this field as their area of concentration under section 3d) of the BA degree requirements.
