</table>

A. DESCRIPTION OF THE PROPOSED MINOR. Include reasons justifying its creation; objectives of the minor and relationship of the required courses to those objectives.

Formalizing a minor in Aerospace Engineering leverages the interest by students and the community in aeronautics and space systems engineering, including very popular unmanned aircraft systems (UAS) efforts seen in the news. In addition, this program leverages the new UAS joint position between CEM and the GI’s Remote Sensing Directorate/Alaska Center for UAS Integration (ACUASI), Dr Michael Hatfield/ECE. This minor will provide increased ability for UAF engineers to highlight their work in a critical engineering field, and will elevate the status of UAF by the aerospace community and potential students. The program will ensure a constant and growing stream of students for academics and research affiliated with UAF aerospace efforts, such as Alaska Space Grant Program (ASGP) and ACUASI. As a point of reference, this semester, a graduate course in UAS design was offered in ECE (EE493/693), which already has 10 students enrolled—a very solid turnout given the size of the ECE graduate program.

B. PROPOSED MINOR REQUIREMENTS AS THEY WILL APPEAR IN THE CATALOG:

See samples provided on page 3 of this form.

1. Complete the following:*  
   ME451, Aerodynamics—3 credits  
   ME452, Introduction to Astrodynamics—3 credits  
2. Complete three of the following:*  
   ME450, Theory of Flight—3 credits  
   ME453, Propulsion Systems—3 credits  
   ME408, Mechanical Vibrations—3 credits  
   EE434, Instrumentation Systems—4 credits  
   EE444, Embedded Systems Design—4 credits  
   EE471, Fundamentals of Automatic Control or ME409, Controls—3 credits  
   GEOS422, Geoscience Applications of Remote Sensing—3 credits  
3. Minimum credits required—15 credits  

Note: This minor may require substantial additional courses for non-ME and non-EE majors.

*These courses have prerequisites that need to be taken into consideration. Students must earn a C-grade or better in each course.
C. **ESTIMATED IMPACT**

**WHAT IMPACT, IF ANY, WILL THIS HAVE ON BUDGET, FACILITIES/SPACE, FACULTY, ETC.**

No impact, no new courses involved.

D. **IMPACTS ON PROGRAMS/DEPTS:**

What programs/departments will be affected by this proposed action? Include information on the Programs/Departments contacted (e.g., email, memo)

No impact, no new courses involved.

F. **PERSONNEL DIRECTLY INVOLVED WITH THE MINOR:**

List faculty currently teaching the required and elective (if any) courses, with a brief statement of duties and qualifications.

- **ME408, Mechanical Vibrations**—Dr. Lin Chuen-Sen, Professor
- **ME409, Controls**—Dr. Chen Cheng-fu, Professor
- **ME450, Theory of Flight**—Dr. Ed Bargar, Assistant Professor
- **ME451, Aerodynamics**—Dr. Ed Bargar, Assistant Professor
- **ME452, Introduction to Astrodynamics**—Dr. Chen Cheng-fu, Professor
- **ME453, Propulsion Systems**—Dr. Deben Das, Professor
- **EE434, Instrumentation Systems**—Mr. Steve Stevens, Instructor
- **EE444, Embedded Systems Design**—Dr. Dejan Raskovic, Associate Professor
- **EE471, Fundamentals of Automatic Controls**—Dr. Seta Bogosyan, Professor
- **GEOS422, Geoscience Applications of Remote Sensing**—Dr. Anupma Prakash, Professor

G. **RELATIONSHIP OF THE PROPOSED MINOR’S OBJECTIVES TO THE “PURPOSES OF THE UNIVERSITY”**.

Include additional justifying information to support creation of the minor such as projected and present enrollments; need or public demand for the minor; support of other programs by the minor’s creation, etc.

This minor will provide increased ability for UAF engineers to highlight their work in a critical engineering field, and will elevate the status of UAF by the aerospace community and potential students. The program will ensure a constant and growing stream of students for academics and research affiliated with UAF aerospace efforts, such as Alaska Space Grant Program (ASGP) and the Alaska Center for Unmanned Aircraft Systems Integration (ACUASI).

This minor supports the desires of UA President, and efforts of local and state leaders to develop a robust aerospace industry in Alaska. Complementary efforts include UAF’s ACUASI program and its role as lead entity in the FAA’s Pan Pacific UAS Test Range Complex (PPUTRC), as well as the ASGP, Kodiak Space Launch Facility, Poker Flat Research Range (PFRR), and the proposed Alaska UAS Technical Park being coordinated through the state & borough. These activities represent a significant number of highly skilled jobs for Alaska’s economy and increasing focus on UAF programs.

Minor program will be overseen by the College of Engineering & Mines. Dr. Michael Hatfield will act as minor coordinator. Dr. Hatfield has previous experience in administering space systems engineering degree at the US Air Force Academy.

**APPROVALS:**

<table>
<thead>
<tr>
<th>Signature, Chair, Program/Department of:</th>
<th>Date</th>
</tr>

</table>
Final approval will be at the level of the Chancellor or Chancellor’s Designee, following vote of approval by the Faculty Senate.
Course Prerequisites/Co-requisites

ME408, Mechanical Vibrations
   ES201
   ES210
   ES301

ME209, Controls
   ES201
   ES301

ME450, Theory of Flight
   ES346

ME451, Aerodynamics
   ES301
   ES341
   ES346
   ME313(c)

ME452, Introduction to Astrodynamics
   ES208 or ES210
   Math302

ME453, Propulsion Systems
   ES341
   ME313(c)

EE434, Instrumentation Systems
   COMM131X or COMM141X
   EE334
   EE343
   EE354
   ENGL111X
   ENG211X or ENGL 213X

EE444, Embedded Systems Design
   COMM131X or COMM141X
   EE343 or EE341
   EE354
   EE443
   ENGL111X
   ENG211X or ENGL 213X

EE471, Fundamentals of Automatic Controls
   EE353
   Math302
