Submit originals (including syllabus) and one copy and electronic copy to the Faculty Senate Office. See http://www.uaf.edu/uafgov/faculty-senate/curriculum/course-degree-procedures/ for a complete description of the governing curriculum & course changes.

CHANGE COURSE (MAJOR) and DROP COURSE PROPOSAL
Attach a syllabus, except if dropping a course.

SUBMITTED BY:
Department: Biology and Wildlife
Prepared by: Pauline Thomas
Email: pthomas10@alaska.edu

College/School: CNSM
Phone: 474-6294
Faculty Contact: Kristin O'Brien
Email: knobrien@alaska.edu

1. COURSE IDENTIFICATION: As the course now exists.
Dept: BIOL
Course #: F466
No. of Credits: 3

COURSE TITLE: Advanced Cell and Molecular Biology Laboratory

2. ACTION DESIRED: \( x \) Check the changes to be made to the existing course.
Change Course: \( x \) If Change, indicate below what is changing
Drop Course: 

NUMBER
PREREQUISITES* 
TITLE
DESCRIPTION

*Prerequisites will be required before a student is allowed to enroll in the course.

FREQUENCY OF OFFERING

CREDITS (including credit distribution)

ADD A STACKED LEVEL
(400/600)
Include syllabi.

How will the two course levels differ from each other? How will each be taught at the appropriate level?

Stacked course applications are reviewed by the (Undergraduate) Curricular Review Committee and by the Graduate Academic and Advising Committee. Creating two different syllabi—undergraduate and graduate versions—will help emphasize the different qualities of what are supposed to be two different courses. The committees will determine: 1) whether the two versions are sufficiently different (i.e., is there undergraduate and graduate level content being offered?); 2) are undergraduates being overtaxed?; 3) are graduate students being undertaxed? In this context, the committees are looking out for the interests of the students taking the course. Typically, if either committee has qualms, they both do. More info online — see URL at top of this page.

ADD NEW CROSS-LISTING

STOP EXISTING CROSS-LISTING

OTHER (specify)

3. COURSE FORMAT
NOTE: Course hours may not be compressed into fewer than three days per credit. Any course compressed into fewer than six weeks must be approved by the college or school's curriculum council and the appropriate Faculty Senate curriculum committee. Furthermore, any core course compressed to less than six weeks must be approved by the Core Review Committee.

COURSE FORMAT:
(check all that apply)

OTHER FORMAT (specify all that apply)
Mode of delivery (specify lecture, field trips, labs, etc.)

4. COURSE CLASSIFICATIONS: (undergraduate courses only. Use approved criteria found in Chapter 12 of the curriculum manual. If justification is needed, attach separate sheet.)

H = Humanities
S = Social Sciences

Will this course be used to fulfill a requirement for the baccalaureate core?
YES \( x \) NO

IF YES, check which core requirements it could be used to fulfill:
O = Oral Intensive, *Format 8 also submitted
W = Writing Intensive, *Format 7 submitted
X = Baccalaureate Core
4. A. Is course content related to northern, arctic or circumpolar studies? If yes, a "snowflake" symbol will be added in the printed Catalog, and flagged in Banner.

| YES | NO | X |

5. COURSE REPEATABILITY:

| Is this course repeatable for credit? | YES | NO | X |

Justification: Indicate why the course can be repeated (for example, the course follows a different theme each time).

How many times may the course be repeated for credit? 

If the course can be repeated with variable credit, what is the maximum number of credit hours that may be earned for this course?

6. COMPLETE CATALOG DESCRIPTION including dept., number, title, credits, credit distribution, cross-listings and/or stacking, clearly showing the changes you want made. (Underline new wording and strike through old wording and use complete catalog format including dept., number, title, credits and cross-listed and stacked.)

Example of a complete description:

**PS F460 Comparative Aboriginal Indigenous Rights and Policies (s)**

3 Credits
Offered As Demand Warrants

Case study: Comparative approach in assessing Aboriginal to analyzing Indigenous rights and policies in different nation-state systems. Seven Aboriginal situations: multiple countries and specific policy developments examined for factors promoting or limiting self-determination. Prerequisites: Upper division standing or permission of instructor. (Cross-listed with ANS F460) (3+0)

**BIOL F466 Advanced Cell and Molecular Laboratory**

3 Credits
Offered Spring

An advanced laboratory in cell and molecular biology. Modern molecular biological techniques including protein and nucleic acid gel electrophoresis, western blotting, cell fractionation, cellular respiration, enzymology and fluorescence microscopy. Lectures will be supplemented with reading from the primary literature. Special fees apply. Prerequisites: BIOL F360, may be taken concurrent; or permission of instructor. (2+4)

7. COMPLETE CATALOG DESCRIPTION AS IT SHOULD APPEAR AFTER ALL CHANGES ARE MADE.

**BIOL F466 Advanced Cell and Molecular Laboratory**

3 Credits
Offered Spring

An advanced laboratory in cell and molecular biology. Modern molecular biological techniques including protein and nucleic acid gel electrophoresis, western blotting, cell fractionation, cellular respiration, enzymology and fluorescence microscopy. Lectures will be supplemented with reading from the primary literature. Student projects in this course may satisfy the capstone project requirements of the biological science degree. Special fees apply. Prerequisites: BIOL F360, may be taken concurrent; or permission of instructor. (1.5+4.5+4)

8. GRADING SYSTEM: Specify only one.

| LETTER: | PASS/FAIL: |

9. ESTIMATED IMPACT

*WHAT IMPACT, IF ANY, WILL THIS HAVE ON BUDGET, FACILITIES/SPACE, FACULTY, ETC.*

No impacts on budget, facilities, or space.
10. LIBRARY COLLECTIONS
Have you contacted the library collection development officer (bjansen@alaska.edu, 474-6683) with regard to the adequacy of library/media collections, equipment, and services available for the proposed course? If so, give date of contact and resolution. If not, explain why not.

No [X] Yes [ ] Electronic access to literature provided by library is sufficient

11. IMPACTS ON PROGRAMS/DEPTS:
What programs/departments will be affected by this proposed action?
Include information on the Programs/Departments contacted (e.g., email, memo)

Biological Sciences BA and BS programs will be impacted.

12. POSITIVE AND NEGATIVE IMPACTS
Please specify positive and negative impacts on other courses, programs and departments resulting from the proposed action.

The change will be strongly positive for students with cell biology/biomedical interests because they will have a second course available in which to complete their capstone requirement.

13. JUSTIFICATION FOR ACTION REQUESTED
The purpose of the department and campus-wide curriculum committees is to scrutinize course change and new course applications to make sure that the quality of UAF education is not lowered as a result of the proposed change. Please address this in your response. This section needs to be self-explanatory. If you ask for a change in # of credits, explain why; are you increasing the amount of material covered in the class? If you drop a prerequisite, is it because the material is covered elsewhere? If course is changing to stacked (400/600), explain higher level of effort and performance required on part of students earning graduate credit. Use as much space as needed to fully justify the proposed change and explain what has been done to ensure that the quality of the course is not compromised as a result.

The capstone requirement in the biological sciences major, which takes the form of a research project, can be completed within designated classes. Making this course a “capstone course” will provide an additional class in which students can complete their capstone projects.
The change in credit hour distribution is an attempt to make the class easier to schedule for students, which we hope will increase enrollment.

APPROVALS: (Forms with missing signatures will be returned. Additional signature blocks may be added as necessary.)

(Diane Wagner) Date 2/29/16
Signature, Chair, Program/Department of: Biology + Wildlife

Signature, Chair, College/School Curriculum Council for: CNSM Date 5-11-16

Signature, Dean, College/School of: CNSM Date 5/11/16

Offerings above the level of approved programs must be approved in advance by the Provost (e.g., non-graduate level program offering of a 600-level course):

Signature of Provost (if applicable)

ALL SIGNATURES MUST BE OBTAINED PRIOR TO SUBMISSION TO THE GOVERNANCE OFFICE.

Signature, Chair
Faculty Senate Review Committee: __Curriculum Review  __GAAC

__Core Review  __SADAC
ADDITIONAL SIGNATURES: (As needed for cross-listing and/or stacking; add more blocks as necessary.)

Signature, Chair, Program/Department of: ___________________________ Date ____________

Signature, Chair, College/School Curriculum Council for: ___________________________ Date ____________

Signature, Dean, College/School of: ___________________________ Date ____________

Note: If removing a cross-listing, you may attach copy of email or memo to indicate mutual agreement of this action by the affected department(s).

If degree programs are affected, a Format 5 program change form must also be submitted.
ATTACH COMPLETE SYLLABUS (as part of this application). This list is online at:
http://www.uaf.edu/uafgov/faculty-senate/curriculum/course-degree-procedures-uaf-syllabus-requirements/
The Faculty Senate curriculum committees will review the syllabus to ensure that each of
the items listed below are included. If items are missing or unclear, the proposed course
(or changes to it) may be denied.

SYLLABUS CHECKLIST FOR ALL UAF COURSES
During the first week of class, instructors will distribute a course syllabus. Although modifications may be made throughout
the semester, this document will contain the following information (as applicable to the discipline):

1. Course information:
   - Title, number, credits, prerequisites, location, meeting time
   (make sure that contact hours are in line with credits).

2. Instructor (and if applicable, Teaching Assistant) information:
   - Name, office location, office hours, telephone, email address.

3. Course readings/materials:
   - Course textbook title, author, edition/publisher.
   - Supplementary readings (indicate whether required or recommended) and
   - any supplies required.

4. Course description:
   - Content of the course and how it fits into the broader curriculum;
   - Expected proficiencies required to undertake the course, if applicable.
   - Inclusion of catalog description is strongly recommended, and
   - Description in syllabus must be consistent with catalog course description.

5. Course Goals (general), and (see #6)

6. Student Learning Outcomes (more specific)

7. Instructional methods:
   - Describe the teaching techniques (eg: lecture, case study, small group discussion, private instruction, studio instruction,
   values clarification, games, journal writing, use of Blackboard, audio/video conferencing, etc.).

8. Course calendar:
   - A schedule of class topics and assignments must be included. Be specific so that it is clear that the instructor has thought
   this through and will not be making it up on the fly (e.g. it is not adequate to say “lab”. Instead, give each lab a title that
   describes its content). You may call the outline Tentative or Work in Progress to allow for modifications during the semester.

9. Course policies:
   - Specify course rules, including your policies on attendance, tardiness, class participation, make-up exams, and
   plagiarism/academic integrity.

10. Evaluation:
    - Specify how students will be evaluated, what factors will be included, their relative value, and how they will be
    tabulated into grades (on a curve, absolute scores, etc.) Publicize UAF regulations with regard to the grades of “C” and
    below as applicable to this course. (Not required in the syllabus, but is a convenient way to publicize this.) Link to PDF
    summary of grading policy for “C”:

11. Support Services:
    - Describe the student support services such as tutoring (local and/or regional) appropriate for the course.

12. Disabilities Services: Note that the phone# and location have been updated. http://www.uaf.edu/disability/ The Office of
Disability Services implements the Americans with Disabilities Act (ADA), and ensures that UAF students have equal access
    to the campus and course materials.

    - State that you will work with the Office of Disabilities Services (208 WHITAKER BLDG, 474-5655) to provide
    reasonable accommodation to students with disabilities.

5/21/2013
BIOL/CHEM 466 Advanced Laboratory in Cell and Molecular Biology
3 Credits

Dr. Kristin O'Brien  
kmobrien@alaska.edu; 474-5311  
323E Margaret Murie Building  
office hrs: TH 2-3 pm, F 2-3 pm, and by appointment

Dr. Andrej Podlutsky  
apopdlutsky@alaska.edu; 474-6759  
AHRB 2W04  
office hrs: TBA

Days, time: M,F 1-2 pm, W 1-5 pm

Pre-requisite: BIOL/CHEM 360 Cell and Molecular Biology (or equivalent; may be taken concurrently)

Course description: An advanced laboratory in cell and molecular biology. Students will learn modern molecular biological techniques including, protein and nucleic acid gel electrophoresis, western blotting, cell fractionation, cellular respiration, enzymology and fluorescence microscopy. Lectures will be supplemented with reading from the primary literature.

Course goals: Students will master lab techniques commonly used in cell and molecular biology, learn how to write a scientific paper, sharpen critical thinking skills, and practice working with others to solve problems. A central goal of this course is to prepare students for working independently in a cell, molecular biology or biochemistry laboratory.

Student learning outcomes: Students will design and conduct experiments to determine the impacts of exercise on cellular metabolism and oxidative stress. Students will become proficient in quantifying protein concentration, measuring maximal activity of key metabolic enzymes, quantifying DNA damage caused by oxidative stress, and measuring mitochondrial respiration rates. Students will become proficient in writing a scientific paper. Students will also become proficient in searching, reading and discussing primary literature.

Instructional methods: This course will be taught through a combination of lectures, laboratories, and discussions of the primary literature. The laboratories this semester will be centered around understanding how tissues are remodeled in response to exercise in rats. We will examine how protein expression changes, how mitochondrial function changes, and how parameters of oxidative stress change in response to exercise. The first 2 months of class will be spent learning laboratory techniques using the control rats while our experimental animals exercise on their running wheels. During the last month, each lab group will choose one set of experiments to conduct on the exercising rats. For example, you might choose to measure mitochondrial function or DNA oxidation. Your final lab report will be focused on this topic.
Prior to each laboratory, we will read and discuss 1-2 articles from the scientific literature in which similar techniques have been used to address similar questions. You are expected to come to class prepared to discuss the papers.

**Capstone requirement:** This course meets the requirement for a capstone project. You must also enroll in BIOL 400 to receive capstone credit. To receive credit, you must not only pass the course, but also receive a passing grade for the capstone project.

**Policies:** Students are expected to attend class and complete reading assignments prior to coming to class in preparation for group discussions and/or activities.

Lab assignments are due at the start of each lab period. No late assignments will be accepted unless you have a medical excuse and a doctor’s note, explaining your illness. You must attend the lab to earn credit for the assignment. There will be no make-up labs.

**Exams:** Exams will be based on material covered in both the lecture and lab. If you anticipate missing an exam for family or work commitments, please let us know in advance so that we can make other arrangements. If you must miss an exam because of unexpected, extenuating circumstances (i.e., family death, medical excuse) then you must call and/or email both of the instructors before the exam.

**Blackboard:** Blackboard will be used to post grades, announcements, lab materials, and reading assignments. Please check the Blackboard site on a regular basis. If you have a smartphone, you can download the Blackboard App, which will notify you immediately when new announcements have been posted.

**Email etiquette:** We will use UAF email accounts to contact students. Please check your UAF account on a regular basis. If you use an alternate account, please have your UAF email forwarded to that account. We will do our best to respond to your email inquiries within 24 hrs. Please be considerate in your letters and use proper English grammar. Think before you send and never write anything you would feel uncomfortable saying to us (or anyone else!) in person. Please use a greeting and sign your letter; addresses don't always reveal the identity of the writer.

**Disabilities:** Please let us know if you have a disability. We will work with the Office of Disabilities Service (203 WHIT, 474-7043) to provide accommodations in both the classroom and laboratory to provide equal access to all materials in this course to all students.

**Support services:** Writing Center 801 Gruening

**Grading:** Your final grades will be based on the following:

1. **Exams (200 pts):** There will be two exams during the semester (a mid-term and final), each worth 100 points. The purpose of these exams is to assess your understanding of
the material, interpret data from the primary literature, and to develop your written communication and critical thinking skills. The exams will cover material from lectures and labs. They will be a combination of short answer and multiple choice questions.

2. Laboratory assignments (425 points):

   a. **Short assignments (140 pts)**. A short assignment, worth 10-25 points (140 points total), will be given following each laboratory. Some of the questions will cover material in the lab for the following week. **It is extremely important for you to read the lab before coming to lab.** Many of the labs we will do are complex. You will enjoy the lab more, understand it better, and are more likely to obtain good results if you come prepared. Please answer your homework questions using complete sentences and neat handwriting. Points will be deducted for incomplete sentences, misspellings, poor grammar and illegible writing.

   b. **Lab notebook (60 pts)**. Each student will maintain a lab notebook. These will be checked 3 times during the semester for completeness. The first notebook check will be work 10 pts, the second, 20 pts, and the third, 30 pts (60 pts total). Requirements for the lab notebook will be explained during the first lab.

   c. **Lab reports (200 pts)**. The labs in this course build upon one another to assess how muscle becomes remodeled in response to exercise. You will write one complete lab report, detailing the results from all experiments that will be due at the end of the semester. Following each set of labs (ie; cellular respiration, enzymology, etc.), you will write a mini-lab report that will include figures, figure legends and a summary of the results and appropriate statistical analyses. Each of these mini-lab reports will be worth 25 pts (100 pts total). Your final lab report, which will include all figures, figure legends, results, a title, abstract, introduction and discussion, will be worth 100 pts.

3. **Class discussions (75 pts)**. You will be tasked with leading the discussion on a scientific paper at least once during the semester and will be required to participate in discussions.

In summary your grade will be based on the following:

<table>
<thead>
<tr>
<th>ASSIGNMENT</th>
<th>POINTS</th>
</tr>
</thead>
<tbody>
<tr>
<td>Exams:</td>
<td>2 X 100 = 200</td>
</tr>
<tr>
<td>Short lab assignments</td>
