Discussion on cross-listed courses:

1. Intended to be the same, but evolved differently (e.g. ANTH 100x and SOC 100x).
   a. Should be uncross-listed so that students can take them as different social sciences to meet UA regulations.
2. Are the same course regardless of designator.
   a. Should ensure that students can only take one designator that counts in ss category.
3. Cross-listed, but only taught under one department.
