Please specify positive and negative impacts on other courses, programs and departments resulting from the proposed action.

Positive impact: Will streamline the contents and the program offerings and the new course that is proposed will better prepare the students for successive junior/senior level courses.
JUSTIFICATION FOR ACTION REQUESTED

The purpose of the department and campus-wide curriculum committees is to scrutinize course change and new course applications to make sure that the quality of UAF education is not lowered as a result of the proposed change. Please address this in your response. This section needs to be self-explanatory. If you ask for a change in # of credits, explain why; are you increasing the amount of material covered in the class? If you drop a prerequisite, is it because the material is covered elsewhere? If course is changing to stacked (400/600), explain higher level of effort and performance required on part of students earning graduate credit. Use as much space as needed to fully justify the proposed change and explain what has been done to ensure that the quality of the course is not compromised as a result.

Most of the content will be covered in other mining courses, such as MIN226(new) and MIN407. Dropping the course will clear up the catalog and streamline the program offering.
