

In preparation for this new technology offering, we would like anyone planning to use Elluminate Live to test your computer for capability before the training date. To do so, please follow the instructions below.

1) Visit the following website at: <http://www.illuminate.com/support/>

2) You will see a "First Time Users" section. If your computer has the required software, you will see a green box with a check-mark inside and the message, "Congratulations, you appear to have the required software to launch Elluminate Live!" See the icon below for a visual.

3) Move to Step #2 "Complete your setup" and click the link to "Configuration Room." When you click on this link, it will take you to a test-site where you can view the interface and become familiar with what Elluminate Live looks like. At that point you can then Exit. Keep in mind that this is not the link to our particular Program Code training, it is simply a test-site.

If, for some reason, you do not have the required software, please check with your computer support office for further instructions.
