

UAF FACILITIES SERVICES

Environmental Chamber Data Form

This form helps Facility Services (FS) provide maintenance and repair services for environmental chambers on campus.

DESCRIPTION OF CHAMBER PREVENTIVE MAINTENANCE (PM) PROGRAM – *Fixed chambers* (walk-ins) are hard-wired into the building power system and receive full maintenance from FS. *Portable chambers* are specialized commercial units that can be moved and are corded (plugged into an outlet). *Residential chambers* (available from retail sources) are also corded. Maintenance on *Portable* and *Residential* chambers is the responsibility of the owner. Portable chambers may be converted to hard-wired at owner expense.

Beginning Fall 2008, FS will pay for one annual PM visit for all corded portable chambers. Effective scheduling is only possible if the owner provides updated information to FS and complies with the requirements of the program. If FS techs can't locate the unit from the information in the database then the PM visit will be canceled and the owner notified. The owner can request the annual PM via the FS EWORF system by providing a new data form and a Fund/Org to fund the requested PM.

INSTRUCTIONS – Fill out the form whenever conditions change and transmit to FS Dispatch via email (uaf-fsdispatch@alaska.edu) or fax (474-5656). Then cut out the table and place in the sleeve on the front of unit. Contact FS Dispatch to arrange inventory visit for new units and/or a sleeve.
