Series 2025**

Dueling Over Dual Use Infrastructure

MAY 6TH - 7TH ON ZOOM

8:30 AM - 12:30 PM AKT | 12:30 PM - 4:30 PM ET

Dual use infrastructure is infrastructure that meets both civilian and military needs. For Alaska, planning for dual use electrical infrastructure is one option to achieve economies of scale and help ensure electrical resiliency and reliability for both the public as well as the military. The workshop will cover the basics of dual use, ways that dual use planning is already happening and how Alaska can take fuller advantage of dual use. In many ways, the "Dueling Over Dual Use Infrastructure" workshop builds on the themes of "Building Alaska's Future: Insights from Iceland."

This event is a part of a series of four virtual workshops held this spring as two half-day Zoom sessions, free of charge, leading up to the Alaska Sustainable Energy Conference:

June 3rd-5th at the Dena'ina Center in Anchorage, Alaska
