Student Learning Outcomes Assessment Summary

Associate of Arts Degree

UAF Community and Technical College

AY 2013-2014

1. Assessment information collected

The program director evaluated information provided on the Provost’s website on assessment for the core curriculum and consulted with representative faculty from the communication, computation and social science departments, and the library. No survey was completed this year. Number of students who obtained an AA degree over the past three years and went on to obtain further educations was collected.

2. Conclusions drawn from the information summarized above

The conclusions for each of the core program areas are listed on the Provost’s website. Approximately one-third of the graduates with an AA degree continue on for further education at UAF. It is impossible to accurately determine how many go to other institutions.

3. Curricular changes resulting from conclusions drawn above

Curricular changes are implemented by individual program in the core curriculum as described in the Provost’s website under core curriculum assessment.

4. Identify and assist the faculty members involved in reaching the conclusions drawn above in implementing any resulting changes.

Dr. Mahla Strohmaier, UAF Community and Technical College
