Choose the Location
The background should be clean and professional. Choose a quiet place with good lighting. Career Services has rooms for video interviews and you can also reserve a room in the library or other campus building.

Test!
Make sure your webcam and microphone are working. Always do a test run of the software you will be using for the interview by calling a family member or friend. Be sure that the lighting in the room is bright enough so that it does not make an odd shadow on your face.

Follow the Interview Steps
Continue preparation by going through the steps listed above for a face to face interview.
