

Dentistry

Pre-Professional Advising
907-474-6396

Dentistry is concerned with the prevention, diagnosis and treatment of oral disease and disorders. Professional dental study typically involves a four-year program of graduate classroom instruction, lab work and hands-on patient treatment. Students who want to specialize within the field may pursue advanced training at the post-doctoral level. Specialists and general dentists must be licensed by the state before practicing.

While a definite pre-dentistry curriculum is not required for admission to dental school, students planning to apply should include specific courses in their undergraduate studies. At UAF, these are biology (BIOL F115X and F116X), chemistry (CHEM F103X and F104X, or F105X and F106X), organic chemistry with lab (CHEM F321, F322, and F324), and physics (PHYS F103X and F104X). Some schools suggest additional science course work in areas such as anatomy and physiology (BIOL F111X and F112X).

Dental schools expect students to have a broad general background in the social sciences and humanities. Some dental schools accept applicants after their third year of undergraduate work, but the majority of students entering dental school have completed a bachelor's degree. A strong undergraduate academic record and high scores on the Dental Admission Test (DAT) are desirable for admission.

Students who are considering dentistry as a career should contact the Academic Advising Center. An academic advisor will help students plan an appropriate undergraduate program and explore professional schools, licensing requirements and financial aid. See www.uaf.edu/advising/degree/preprof/dentistry.html for detailed information on preparing for dental school while at UAF.
