University of Alaska

CATALOG 1966 - 1967
Our cover shows the central academic core of the University of Alaska main campus. Color photograph by Larry Crackel.
Catalog

University of Alaska
1966-67

College, Alaska
Second Series, No. 32
Buildings

(1) BROOKS BUILDING — Classrooms, laboratories, offices for College of Earth Sciences and Mineral Industry
(2) BUNNELL BUILDING — General Administrative offices, classrooms, library, Schaible Lecture Hall, Computer Center, offices of College of Arts and Letters and College of Biological Sciences and Renewable Resources.
(3) CONSTITUTION HALL (Student Union) — Student activities offices, snack bar, alumni services, bookstore
(4) DUCKERING BUILDING — Classrooms, laboratories, offices of College of Mathematics, Physical Sciences and Engineering, College of Business, Economics, and Government, Institute of Marine Science, Institute of Arctic Biology
(5) EIELSON BUILDING — Classrooms, laboratories, offices of College of Behavioral Sciences and Education
(6) FACULTY HOUSING
(7) FOREST RESEARCH LABORATORY
(8) GEOPHYSICAL INSTITUTE
(9) HEALTH SERVICE CENTER
(10) HESS HALL, HARRIET — Dormitory
(11) ICE RINK
(12) LATHROP HALL, AUSTIN E. — Dormitory
(13) MARRIED STUDENTS APARTMENTS (New)
(14) McINTOSH HALL, JOHN E. — Dormitory
(15) MEMORIAL PLAZA
(16) MUSEUM — Upper floor houses music facilities
(17) NEEDLAND HALL, ANDREW — Dormitory
(18) PATTY BUILDING — Gymnasium, pool, ROTC, Rifle Range
(19) POWER PLANT
(20) PRESIDENT'S RESIDENCE
(21) SERVICES BUILDING
(22) STATEWIDE SERVICES BUILDING — Administrative offices
(23) STEVENS HALL, MORTON — Dormitory
(24) STUART HALL — Faculty apartments
(25) U.S. COAST AND GEOETIC SURVEY—Observatory houses seismograph installation for the continuous registration of earth tremors
(26) UNIVERSITY COMMONS — Dining facility for all dormitory residents
(27) WALSH HALL — Married students apartments
(28) WICKERSHAM HALL — Dormitory
(29) WOMEN'S DORMITORY (New)
University Calendar

1966 Summer Session

Short Session ........................................ June 6-June 24, 1966
Regular Session ........................................ June 27-August 5, 1966
Post Session Workshop ................................ August 8-August 12, 1966

Proposed 1966-67 Academic Year Calendar

Labor Day .................................................. Mon., Sept. 5
Dormitory Rooms Open .................................. Noon Sat., Sept. 3
Orientation and Guidance Testing for New Students ............... 8:00 a.m. Tues., Sept. 6
through Sunday, Sept. 11
General Faculty Convocation ................................ 10:00 a.m. Thurs., Sept. 1
Faculty Meetings (Academic Colleges) .......................... 2:30 p.m. Thurs., Sept. 1
Faculty Meetings (Departmental) ............................ 9:30 a.m. Friday, Sept. 2
Counselling of Students by Advisers ......................... Noon Thurs., Sept. 8
through 5:00 p.m. Fri., Sept. 9

Registration
New Students ........................................ 8:00 a.m. to 5:00 p.m. Sat., Sept. 10
Returning Students .................................. 8:00 a.m. to 5:00 p.m. Mon., Sept. 12
(meal tickets effective Dinner Monday, Sept. 12)

Instruction Begins .................................. 8:00 a.m. Tues., Sept. 13
Registration Closes .................................... 5:00 p.m. Mon., Sept. 26
Last Day to Withdraw without Grade ......................... 5:00 p.m. Mon., Sept. 26
Last Day for Making Up Incompletes ......................... 5:00 p.m. Mon., Oct. 24
Six Week Grade Reports .................................. Wed., Oct. 26
Thanksgiving Recess .................................... Begins 5:00 p.m. Wed., Nov. 23
to 8:00 a.m. Mon., Nov. 28
Christmas Recess ....................................... Begins 5:00 p.m. Sat., Dec. 17, 1966
to 8:00 a.m. Mon., Jan. 2, 1967
Last Day for Student-Initiated Withdrawals .................. Tues., Dec. 20
Semester Examinations .................................. 8:00 a.m. Thurs., Jan. 12
to Noon Wed., Jan. 18
Final Grades on File with Registrar ....................... Noon Thurs., Jan. 19
End of Fall Semester .................................. 5:00 p.m. Fri., Jan. 20

1966-67 Spring Semester

Dormitory Rooms Available ................................ Noon Wed., Jan. 18
Orientation and Guidance Testing for New Students .......... 9:00 a.m. Thurs., Jan. 19
to 5:00 p.m. Fri., Jan. 20
Counselling of Students by Advisers ....................... Noon Thurs., Jan. 19
to 5:00 p.m. Fri., Jan. 20
Registration .......................................... 8:00 a.m. to 5:00 p.m. Mon., Jan. 23
Instruction Begins .................................... 8:00 a.m. Tues., Jan. 24
Registration Closes .................................... 5:00 p.m. Mon., Feb. 6
Last Day to Withdraw Without Grade ......................... 5:00 p.m. Mon., Feb. 6
Last Day for Making Up Incompletes ......................... 5:00 p.m. Mon., Mar. 6
Six Week Grade Reports .................................. Wed., Mar. 8
Spring Recess .......................................... Begins 5:00 p.m. Wed., Mar. 16
to 8:00 a.m. Mon., Mar. 21
Last Day for Student-Initiated Withdrawals ................. Wed., Apr. 19
Last Day to Submit Graduate Thesis ........................ 5:00 p.m. Thurs., Apr. 27
Campus Day ............................................ Sat., April 30
Governor’s Day ........................................ Sat., May 6
Examination Study Period (No Classes) ...................... 8:00 a.m. Thurs., May 11
to Noon Thurs., May 18
Semester Examinations .................................. 8:00 a.m. Fri., May 12
Final Senior Grades on File with Registrar ................. 9:00 a.m. Fri., May 19
End of Spring Semester ................................ 5:00 p.m. Fri., May 19
Final Grades on File with Registrar ....................... 5:00 p.m. Fri., May 19
Baccalaureate ........................................... Sun., May 21
Commencement .......................................... Mon., May 22

1967 Summer Session (Tentative)

Short Session ........................................ June 5-June 23, 1967
Regular Session ........................................ June 26-August 4, 1967
Post Session Workshop ................................ August 7-August 11, 1967

### TRANSPORTATION TO THE UNIVERSITY

The University of Alaska is located at College, Alaska, five miles from Fairbanks. Bus service is available a number of times each day between Fairbanks and College. Taxi service is also available.

Fairbanks is served by major airlines from all main points in Alaska and from Seattle. It is the northern terminus of the Alaska Railroad running from Anchorage. It is possible to travel by bus or automobile over the Alaska Highway.
On a hill, the campus is reached from many directions. This approach is called by some, "78 steps to knowledge."
General Information

HISTORY

The University dates from 1915, when on July 4 the Hon. James Wickersham, delegate to Congress from Alaska, laid the cornerstone on land set aside by Congress, on March 14, for the support of a Territorial College and School of Mines. The Territorial Legislature by its Acts of May 3, 1917, accepted the land grant and created a corporation, "The Alaska Agricultural College and School of Mines," defining its duties and providing for a Board of Trustees consisting of eight members.

The College opened for instruction on September 18, 1922, with the Hon. Charles E. Bunnell as president. The college became the University of Alaska by Act of the Territorial Legislature, July 1, 1935; the Board of Trustees became the Board of Regents. The University offered its first summer session in 1947. In 1949, Dr. Terris Moore succeeded the late President Bunnell, who became President Emeritus.

Dr. Ernest N. Patty, member of the first faculty of the Alaska Agricultural College and School of Mines and former Dean of the College, was inaugurated as the third president of the University in 1953 and named President Emeritus upon his retirement in 1960, when Dr. William R. Wood became the fourth president.

OBJECTIVES OF THE UNIVERSITY

Truly unique among institutions of higher learning in the United States, the University of Alaska serves, within the scope of its resources, all of the public educational needs, beyond high school, of an entire state.

When the Legislature established Alaska’s state university, it joined with the national government to make it also a land-grant university with a fivefold function:

To instruct youth and adults seeking higher learning in the liberal arts, the sciences and the professions;

To increase and apply, through research, knowledge of value to mankind, and particularly to the residents of the State;

To serve the people throughout the 586,400 square miles of Alaska as an intellectual, scientific, and cultural resource;

To provide and to develop competent leadership for the people of Alaska in their continued improvement of the State as a good region in which to live;

To strive above all, to develop in its students, at all levels, those qualities of mind and body which are necessary for life as a worthy human being in a democratic society.
ACCREDITATION

The University is accredited as an institution of higher learning by the Northwest Association of Secondary and Higher Schools; belongs to the Association of American Colleges, the Association of State Universities and Land-Grant Colleges, and the National Commission of Accrediting; and has institutional membership in the American Council of Education, the American Association of Colleges for Teacher Education and the Western Interstate Commission for Higher Education.

The four-year curriculums in Civil Engineering, Mining Engineering, Electrical Engineering and Geological Engineering are accredited by the Engineers' Council for Professional Development. The Council represents the principal engineering societies and examining boards of the United States and Canada.

The University is approved by the Federal Office of Vocational Education for teacher-training in Vocational Home Economics. It is also on the approved list of colleges and universities of the American Association of University Women.

CARNegie CORPORATION GRANT

The Carnegie Corporation of New York has awarded the University a grant of $150,000 for the purpose of bringing to the University outstanding visiting professors in the humanities and social sciences. This is the sixth year of the grant. The visiting professors will be specialists in such subjects as music, art, linguistics, English, philosophy, psychology, history, economics, and political science.

CAMPUS BUILDINGS AND FACILITIES AT COLLEGE, ALASKA

Administrative and Classroom Buildings—The Bunnell Memorial Building, dedicated to the late Charles E. Bunnell, first president of the University, consists of general administrative offices, classrooms, the Computer Center, laboratories, a large lecture hall, and the library. It also includes offices of the College of Arts and Letters.

The Brooks Memorial Mines Building provides space for classrooms, laboratories, and offices of the College of Earth Sciences and Mineral Industry; the Alaska State Division of Mines; the United States Geological Survey, and the United States Bureau of Mines. The four-story structure is dedicated to the late Dr. Alfred H. Brooks, chief Alaskan Geologist of the U.S. Geological Survey from 1903 to 1924.

The Biological Sciences Building, completed in the winter of 1966, provides offices, research facilities and laboratories for upper division classes of the College of Biological Sciences and Renewable Resources. It also houses the Institute of Arctic Biology.
The *Eielson Memorial Building* contains general classrooms, laboratories and offices of the College of Behavioral Sciences and Education and the offices of the Division of Statewide Services.

The *William E. Duckering Building* houses offices, classrooms and laboratories of the College of Mathematics, Physical Sciences and Engineering, the College of Business, Economics and Government, the Institute of Marine Science, and laboratories of the State Highway Materials Division.

The *Ernest N. Patty Building*, dedicated to President-Emeritus Ernest N. Patty, includes a gymnasium, swimming pool, rifle range, classrooms and office facilities for the Department of Health, Physical Education and Recreation and the Department of Military Science.

The *Museum* exhibits more than 100,000 catalogued specimens of Eskimo and other artifacts in mineral, anthropological, ethnological, palaeontological, botanical, and natural history fields.

The *Geophysical Institute* is a three-story structure containing facilities for research in arctic and sub-arctic natural phenomena and for graduate instruction in geophysics.

The *University Library*—A variety of resources and services are available in the University Library. In addition to a good basic book collection, the library subscribes currently to approximately 1500 journals and a selection of newspapers—from Alaska, the other states and foreign countries.

Microforms, including microfilm, micro-card, and microfiche, and microform readers are housed in a separate room on the lower level of the library. Significant among the microform holdings are such items as the microfilm edition of *The New York Times* and the Records of the Russian-American Company, 1802-1867, and the microfiche edition of the Human Relations Area File.

Tables are also available on this level for individual listening to the non-circulating collection of phonograph records which the library maintains.

The University Library is a depository for publications of the United States Government and the Atomic Energy Commission. This extensive document collection is located on the library mezzanine.

The main floor of the library contains the special Skinner Collection of Alaskana and most of the reference collection, including important indexes.

A smoking area on this floor permits students to study or relax in comfortable, informal surroundings.

Books for which faculty may make special assignments are shelved in the Reserve Book Section which is also located on the main floor.

Interlibrary loan service for graduate students and faculty is handled from the administrative office of the library.
A subject library in the area of Geophysics, on the second floor of the Geophysical Institute Building, is open to those who have a need for such material.

The fountain in Memorial Plaza is a popular place for students to relax in summer, fall and spring.
Division of Statewide Services

The Division of Statewide Services makes available to residents of the State University courses, educational programs, and special services.

Community Colleges—The University of Alaska serves Alaska through six community colleges as well as the main campus at College.

The 1953 Legislature authorized the University to cooperate with qualified school districts in the establishment of community colleges. The first institution, Anchorage Community College, began operation February 8, 1953. The second college at Ketchikan began operation in the fall of 1954, the third at Juneau-Douglas in the fall of 1956, the fourth at Palmer in the fall of 1961, the fifth at Sitka in the fall of 1962, and a sixth at Kenai in 1964.

Through these colleges the University offers collegiate courses for academic credit. The courses and instructors are approved and supervised by the University. All University courses carry residence credit. In addition, each community college offers vocational and interest courses under the sponsorship of the local school district. These courses do not carry University credit.

For detailed information write to the Resident Director of the Community College in which you are interested.

Evening Classes and Correspondence Study—The Department offers residence credit courses on the main campus during the evening, at military installations, and in other locations throughout the state not served by a community college. A special catalog of the Department activities is available by writing to the Department of Evening Classes and Correspondence Study.

The Department also coordinates the grading of the United States Armed Forces Institute Correspondence Course Lessons submitted by military personnel in Alaska, and approves instructors for the Air Force Study Program.

A limited number of correspondence courses are offered. For information and a catalog write to the Department of Evening Classes and Correspondence Study.

Summer Sessions, Conferences and Short Courses—The University holds three- and six-week summer sessions on the campus at College and at most of the Community Colleges. A wide range of courses are offered for both graduate and undergraduate credit. Courses of study are open to both men and women who are (1) candidates for graduate or undergraduate degrees, or (2) unclassified students wishing to take special courses or desiring intellectual enrichment without reference to a degree. A maximum of seven hours of credit may be earned during the six-week session and three hours of credit may be earned during the three-week session.

Of special interest are various workshops, institutes, conferences and lectures conducted by specialists, with Alaskan aspects of the subjects presented when possible. A post-session Workshop on Alaska includes anthropology, education, history, literature, art, agriculture, and wildlife, consisting of lectures by authorities, demonstrations, and field trips.
Special workshops and institutes open to high school age students are also presented. These include the Music Camp, Creative Arts Camp, a Science Institute, and a Youth Leadership Conference.

The summer sessions faculty is composed of members of the regular University teaching staff, supplemented by outstanding visiting professors.

An extensive recreation program is planned for summer sessions students at College. Typical recreational activities include trips to Eskimo and Indian villages, gold-panning expeditions, hiking, dances, movies, and a riverboat excursion.

The Summer Sessions Catalog, which includes a listing of courses to be offered, is available after March 1 of each year from the Department of Summer Sessions, Conferences and Short Courses.

The University, through this Department, also conducts educational conferences and short courses throughout the State.

Summer Institutes—Proposals are prepared by University faculty members and submitted each year to various governmental agencies and private foundations which provide funds for special summer institutes. Under a grant from the National Science Foundation, an institute for teachers of science and mathematics and a summer training program for secondary school students has been held on campus each summer for several years. More recently, summer institutes for teachers of French and history were financed by the National Defense Education Act.

Summer Institutes are usually conducted for an eight-week term, and participants may ordinarily earn eight hours of credit. Institutes are usually open to both residents and non-residents of the state of Alaska.

Mining Extension Program—The Mining Extension Program, supported by state appropriations, consists of two short courses: a four-week or five-week basic prospecting course which emphasizes the various methods of prospecting; and a two-week geochemical prospecting course which emphasizes the use of chemical analysis in prospecting. These courses are offered each year in various communities in Alaska and are open to all persons without regard to previous training or academic qualifications.

The Mining Extension Courses are designed to give basic training in various phases of the mineral industry and to enable prospectors to find and explore ore deposits. An appropriate certificate is awarded to students who satisfactorily complete the respective course of study.

For additional information, contact the Department of Summer Sessions, Conferences and Short Courses, University of Alaska, College, Alaska.

Fisheries Extension Program—Fisheries Short Courses, covering various aspects of commercial fishing, are held in commercial fishing centers throughout the state. These courses present information on fishing gear and materials, fisheries technology, hydrology, biology and pollution. Courses taught in remote areas of the state include lectures and demonstrations on fisheries biology, fish spoilage, proper care of fish, netting materials used by fishermen, and maintenance of equipment. An appropriate certificate is awarded to students who satisfactorily complete the course.

For information contact the Department of Summer Sessions, Conferences and Short Courses, University of Alaska, College, Alaska.
Cooperative Extension Service in Agriculture and Home Economics—The program is a cooperative educational service of the University and the United States Department of Agriculture. District offices and field staff are located in Fairbanks, Palmer, Juneau, Homer, Anchorage and Nome. University Extension specialists and district Extension agents extend the results of research by the University and USDA to the public. They help local people to identify and solve problems, and to apply the results of scientific research to the improvement of farms, homes and communities.

Extension's traditional audience has been rural people. Today, with no sharp dividing lines between rural and urban interests, Extension agents also serve consumer, marketing, and agri-business groups. They help citizens of the state to plan rural civil defense programs and to organize for broader economic and social development. Their teaching is carried out informally through television, radio, newspaper and newsletter media, publications, farm and home visits, special interest meetings, and short courses.

Audio-Visual Communications—The Department of Audio-Visual Communications is an all-University and State service which supports instruction.

The Department has a large collection of educational films, filmstrips, tapes and slides that are available to the University faculty, groups, and schools throughout the State.

Requests for the film catalog should be mailed to the Department of Audio-Visual Communications, University of Alaska, College, Alaska.
Much graduate work and research centers on searching for new knowledge of the Arctic and Polar regions of the world.
Research and Advanced Study

The research programs of the University of Alaska take advantage of its unique location in the sub-arctic of interior Alaska, but with easy accessibility to the oceans from the Pacific to the Arctic; its accessibility to glaciers and permafrost areas; and its location near the auroral zone, the region in which maximum effects are seen from the bombardment of the earth by charged particles from the sun.

In addition to research which is carried out in the academic departments, the University has several institutes and associated activities.

Alaska Agricultural Experiment Station—With the United States Department of Agriculture the University conducts a joint agricultural research program in the State. A joint Director administers the program from the Experiment Station headquarters at Palmer in the Matanuska valley.

Field research is concentrated at the Matanuska Experiment Farm seven miles west of Palmer and at the Fairbanks Experiment Farm a mile west of the University. A fur experiment farm is also operated near Petersburg in southeastern Alaska. Because of varied environments found in Alaska, many plant and soil studies are scattered throughout the potential farming area, where the work is accomplished in cooperation with farmers and homesteaders.

Alaska Cooperative Wildlife Research Unit—The Unit is one of several located at land grant colleges and universities. The Alaska Unit is jointly sponsored and financed by the University of Alaska, the Alaska Department of Fish and Game, the U.S. Fish and Wildlife Service, and the Wildlife Management Institute. The Unit provides technical and professional training in wildlife management, research, education, and administration. The research program of the Unit includes ecological and management investigations of big game, waterfowl, furbearers, and upland game species.

Graduate work leading to the advanced degrees in wildlife management may be performed at the Unit in co-operation with the Department of Wildlife Management.

Geophysical Institute—The Institute was opened on July 1, 1949, as a department of the University. The 79th Congress of the United States had established the Institute, and the 80th Congress appropriated funds for the construction of the present laboratory and associated houses. The Geophysical Institute has grown from a modest program of auroral observations commenced in 1929 to its present activities embracing many fields of arctic and sub-arctic research.

The Institute's purpose is to advance knowledge of the earth and its environment in space. Emphasis is placed on studies of the upper atmosphere and the solar-terrestrial relationship using a network of ground
stations and rocket-borne instruments. Programs are also established in meteorology, glaciology, seismology, vulcanology and tectonic physics. In addition to the main office building located on the campus, the Institute operates a number of field sites in Alaska and elsewhere, and participates in Antarctic research. The present staff numbers approximately 180, including some 30 graduate students who obtain their research training at the Institute. Financial support is obtained mainly through Federal grants and contracts.

The Director of the Geophysical Institute is chosen by the Board of Regents upon the recommendation of the president of the University, subject to approval by the president of the National Academy of Sciences.

Institute of Arctic Biology—Pursuing recommendations as to its prospective national value by a committee of eminent biologists, the Institute was established by the Alaska Legislature in 1963 for studies of life in the extreme climatic changes of arctic and sub-arctic regions. The Laboratory of Zoophysiology, the first component, began operation in 1962 and is now staffed by some 25 persons. It is located in the new Biosciences Building with appropriate services and facilities for field and laboratory investigations on Alaskan animals. Facilities are in preparation for studies of man (human ecology) and plant (plant physiology) of arctic and sub-arctic environments. Visiting scientists are received in the laboratories to which their investigations pertain. Opportunities for pre- and post-doctoral studies are provided.

Institute of Marine Science—The Institute was authorized in 1960 by the State Legislature. Its purpose is the advancement of knowledge of the sea, with particular emphasis on problems of the northern regions. A program of education and research in biological, physical and chemical oceanography are all included within this broad scope. Sea-going and laboratory facilities are available at the Douglas Marine Station, situated some five miles from Juneau. Campus activities are centered in a new laboratory, completed in January, 1963. The Institute operates the 80-foot Research Vessel ACONA. Scientists are invited to request permission to work in residence.

Institute of Social, Economic and Government Research—The Institute was authorized by the State Legislature in 1961. Its purpose is to contribute to an advancement of knowledge in the fields of business, economics, and government with particular emphasis on conditions in Alaska and the northern part of North America.

Institute of Water Resources—The Institute was established in May, 1965, and is the youngest of the research institutes at the University.

The Institute has no building or laboratory facility as such but it administers and coordinates many of the water resources research projects which are carried out throughout the campus. The Institute staff works very closely with the other four institutes in addition to the departments of Chemistry, Geology, Environmental Engineering, Wildlife Management, etc.

Mineral Industry Research Laboratory—The 1963 Alaska State Legislature authorized the establishment of a mineral industry research program at the University of Alaska. The purpose of the Laboratory is to conduct
appropriate applied and basic research in various areas of the mineral industry that will aid in the further utilization of Alaska's mineral resources. Research is conducted in facilities of the College and co-ordinated with graduate student academic programs.

**Arctic Research Laboratory, Point Barrow**—Under contract with the Office of Naval Research the University operates the Arctic Research Laboratory. Laboratory facilities are maintained, and scientific teams from other universities and organizations carry on arctic research problems there.

More than 300 scientists from many of the leading universities of the world made use of the extensive facilities of the Arctic Research Laboratory last year.

**STATE AND FEDERAL AGENCIES ON CAMPUS—ASSOCIATED WITH THE UNIVERSITY OF ALASKA**

**Alaskan Geology Branch of the U.S. Geological Survey**—This branch conducts a program of geological exploration and research in Alaska. Some of the functions are areal geologic mapping; studies and evaluation of metallic, nonmetallic, coal, and oil deposits; regional studies of structure and stratigraphy; detailed studies of selected type-areas; application of geology to engineering and related problems; and research in the use of new geologic methods. The Alaskan Geology Branch office has a complete file of Alaskan maps and geological reports available to the public for use in the Office.

**Alaska Department of Fish and Game**—The purpose of the Alaska Department of Fish and Game is to assist in fish and game protection, research, restoration, propagation, and increase in the State of Alaska.

Until recently several biologists of the Department were stationed on the campus and it is hoped that suitable facilities will again be available for their use as a result of the current building program.

There is close collaboration between the University and the Department both in research and teaching (see Alaska Cooperative Wildlife Research Unit).

**State Highway Testing Laboratory**—The Alaska State Division of Highways operates a road materials laboratory in conjunction with the Department of Civil Engineering. The State provides equipment and personnel for routine testing of highway materials and for highway research.

**U.S. Coast and Geodetic Survey**—The College Magnetic and Seismological Observatory is operated by the United States Coast and Geodetic Survey, with the main facility on the west ridge of the University campus and an outpost facility on Grenache Road. Originally constructed in 1947, the Observatory has grown to 19 buildings and operates 28 instruments that continuously gather data for studies in the fields of geomagnetism and seismology.

The Observatory monitors seismic activity 24 hours a day and is part of the Pacific Seismic Sea Way Warning System with headquarters in Honolulu, Hawaii. It plays a great part in keeping the people of Alaska informed of current earthquake activity and informing scientific organizations of the occurrence of major world wide magnetic events.
During the last several years the Observatory has been participating in cooperative research projects with University scientists, (principally of the Geophysical Institute).

The Observatory is also responsible for overseeing the operation of the Barrow Magnetic Observatory at Point Barrow in cooperation with the University’s Arctic Research Laboratory.

United States Forest Service—The Northern Forest Experiment Station has established a branch laboratory on the campus. A growing research staff is conducting investigations on forest management, fire, entomology, and other aspects of subarctic forest ecology. This laboratory is to be the center for the Station’s activities in interior and northern Alaska; although field work is conducted throughout the region, many investigations will be centered on the Bonanza Creek Experimental Forest about 35 miles from campus.

The overall purpose of the research conducted by the Forest Experiment Stations is to supply the land manager with the most efficient means of growing, protecting and harvesting timber crops in a manner most compatible with other land uses.

Alaska Water Laboratory—This new 2.5 million dollar facility is a regional laboratory of the recently established Federal Water Pollution Control Administration (DHEW).

Research and technical assistance on water pollution problems of particular concern to Alaska are being investigated. The effect of wastes discharged by communities, rural families, native villages, fisheries, lumber, mining, and paper and pulp industries on humans and aquatic life are problems being considered by the professional staff. This laboratory is a part of the growing Arctic Research Center on the campus of the University of Alaska.

Arctic Health Research Center—Being built by the U.S. Public Health Service in the University’s Arctic Research Center, this building is scheduled for completion in the fall of 1966.

All semester charges are payable each semester upon registration.

Students normally will pay approximately the sums above at semester registration time. However, those taking less than 7 semester credit hours pay no tuition and pay $15.00 per credit hour in lieu of the University Fee, and are not eligible for dormitory occupancy.

Other expenses at registration time may require extra funds for less predictable amounts, including personal and social expenses, textbooks, meals needed before meal tickets become effective, bus fare, and athletic equipment, musical instruments and other specialized classroom supplies which certain students may need.

TUITION

Residents—Tuition is free to Alaska residents—persons 19 years or older who have established residence in the State for at least a year prior to the date set for registration for any semester. The legal residence of those under 19 years old is the residence of the parents or legal guardian. The residence of all military personnel is Washington, D.C., with the exception of those whose parents are legal residents of the State or those who were inducted into the Armed Forces through a State Induction Center while they were legal residents of the State. Children of military personnel who have been stationed in Alaska for more than one year are granted residence status. Students from the Yukon Territory may register on the same basis as Alaskan students.
Non-residents—Tuition shall be charged non-resident students carrying seven or more semester credit hours, at $150.00 per semester.

University Fee—Students registering for seven or more semester credit hours shall be charged a fee of $82.50 per semester. (No course fees or deposits shall be charged, except for individual instruction in music.) Residents and non-residents alike shall pay this fee.

Students registering for less than seven semester credit hours shall be charged a fee of $15.00 per credit hour.

Fee rates apply to students auditing any course in the same manner as for those taking it for credit.

MISCELLANEOUS FEES

Application Fee—A fee of $10 shall be paid at the time the application for admission is submitted.

Late Registration Penalty—Students registering later than the day designated for that purpose shall pay a late registration fine of $5.00 for the first day, plus $2.00 for each succeeding day allowed for late registration (excluding Saturday and Sunday).

Change of Registration—A penalty fee of $1.00 shall be paid for each course added or dropped after the third day following the scheduled date for registration. Changes necessitated by University cancellation or rescheduling of classes are not subject to penalty.

Examination Fee—A minimum charge of $3.00 shall be made for each examination required for removal of an incomplete, clearance of an entrance deficiency or credit by examination, plus an additional $1.00 for each credit over three.

Late Placement and Guidance Test—A charge of $5.00 shall be made for a placement and guidance test taken at a time other than the scheduled time.

Transcript Fees—One certified transcript is issued free. A charge of $1.00 shall be made for each additional transcript.

Graduate Placement Fee—The University charges $10.00 for filing of credentials and one year of service. Thereafter, $5.00 is charged for each year the file is used. There is no filing fee for students who file before graduation.

Program Plan—The Registrar’s Office will provide without charge one plan for a schedule of courses leading to a degree. A fee of $5.00 will be charged for each subsequent alternate plan.

Music Course Fees—All music fees shall be waived for students enrolled for seven or more credit hours and taking a major or minor in Music or Music Education, as certified by the department chairman.

Mining Short Course Fee—A single fee of $5.00 per non-credit unit shall be charged for registration in the mining short course.

CAMPUS ACTIVITY FEES

Undergraduate students carrying twelve (12) or more semester credit hours or the equivalent, under twenty-six (26) years of age, shall be charged the Campus Activity Fees totalling $21.00 per semester.* Each student paying such fees receives an identification card entitling him to privileges in the following programs:

* (Other students may pay this fee voluntarily to receive all benefits except voting and holding student offices.)
Recreation — Athletics Program — This fee is assessed and collected by the University. The specific use of this fee and the responsibility for the recreation athletics program lies with the director of Health, Physical Education and Recreation.

Associated Students Program — The fee for student social activities and publications is set by the Associated Students of the University of Alaska, the duly recognized and established student government and is assessed and collected by the University. Student publications, social and student government activities and the budget for these activities are the responsibility of the elected and appointed student officials of the ASUA. These include activities such as social events, student self-government administration, yearbook and student paper.

A deposit of $2.00 will be required once each year of all students paying the campus activity fee. This sum will be refunded at the time of taking the student's picture for the yearbook.

STUDENT HEALTH SERVICE FEE

Undergraduate students under twenty-six (26) years of age, carrying twelve (12) or more semester credit hours or equivalent shall be charged a Student Health Service Fee of $15.00 per semester.** Such students, if in military service or military dependents, shall be exempt from payment of this fee upon presentation of satisfactory evidence that adjacent military hospital and medical facilities are available to them and will be utilized by them.

The student health program is administered by the Health Center under the direction of the Director of Student Affairs and the University Nurse. Hospital and medical treatment for common illnesses and injuries are provided, upon the authorization by the University Nurse, under limits of coverage set forth in the Student Health Plan. Each student will be supplied with a set of regulations outlining this plan.

Married students may secure additional coverage for spouse and children if desired. Rates for such coverage will be quoted at registration time.

DORMITORY AND DINING HALL CHARGES

Contracts for board and room are written for the period of registration to the end of the academic year.

Dormitory Deposits — A $35.00 non-refundable dormitory application and reservation deposit is required with the student application blank. This is applied to the rent only in the semester for which the room reservation was made.

Dormitory Rent —
On Double Room: $195.00 per semester
On Single Room: $225.00 per semester

This rental covers all lounge, recreation room, storage room, laundry room and telephone privileges. Toll calls may not be made over floor phones in dormitories.

**(Other students, under 35 years of age, may pay this fee voluntarily.)
Meal Tickets—When registering, each dormitory occupant is required to buy a semester meal ticket for cafeteria meals. The rate is $95.00 per full month:

<table>
<thead>
<tr>
<th>Meal Ticket</th>
<th>Rate</th>
</tr>
</thead>
<tbody>
<tr>
<td>First Semester</td>
<td>$350.00</td>
</tr>
<tr>
<td>Second Semester</td>
<td>$354.00</td>
</tr>
</tbody>
</table>

Meal tickets become effective at dinner, September 12 and dinner, January 23. Refunds are granted only with approval of the Director of Student Affairs upon formal withdrawal, for absence on University activities, or for extreme personal emergencies.

Semester meal tickets do not include vacation periods. Special meal tickets may be purchased before specified dates for:

<table>
<thead>
<tr>

</tr>
<tr>
<td>Semester “Break”</td>
<td>11.00</td>
</tr>
<tr>
<td>Spring Recess</td>
<td>16.00</td>
</tr>
</tbody>
</table>

Those not possessing Special Meal Tickets may buy meals during vacation periods at à la carte prices.

PAYMENT OF FEES

All charges, deposits, rent and meals for the semester are payable in full on the second day following registration. Late settlement of fees is subject to a fine of $2.00 for each day following the date on which they first become payable. An installment contract may be arranged under which a 25 per cent payment is due upon registration and additional installments are payable for up to three (3) months following the date of registration. The installment contract service fee is $2.00 for the contract and $2.00 for each additional payment. Delinquent payment of installments is subject to a $2.00 fine for each occurrence.

Refundable Charges—Refunds of the University fee, tuition fee, music course fees and campus activities fee, shall be made to withdrawing students upon formal withdrawal by or for the student, according to the following schedule:

- Withdrawal within the first week—90 percent refund
- Withdrawal within the first 1/3 of term—50 percent refund
- Withdrawal after first 1/3 of term or semester—no refund

Health service and miscellaneous fees shall not be subject to refund.

Board—The unused portion of a meal ticket, less a service charge equal to five days' meals, shall be refunded upon formal withdrawal.

Rent—Room rent is refundable, upon recommendation of the Director of the Office of Student Affairs, only in emergency cases. The amount of refund shall be determined by application of a charge equivalent to 10% of the semester rent times the number of weeks of occupancy completed.

Financial Obligations—The University withholds delinquent students' diplomas pending their final payment of debts owed to the University. The Registrar also withholds grade reports and transcripts until debts to the University have been paid. No student owing the University money can receive honorable dismissal.
TRANSPORTATION TO THE UNIVERSITY

The Alaska Railroad gives qualified University students a round-trip ticket for the price of a one-way ticket. This applies to Summer Sessions and Home Economics Short Course students, as well as those attending regular sessions. The return ticket may be used only after completion of one semester's work or after full attendance at the Summer Sessions or Home Economics Short Course. The student must request the special rate when purchasing his first ticket. Upon arrival at the University, he should deposit the proper ticket receipts with the Registrar for safekeeping and certification.
Study areas in the University Library overlook the Alaska Range and Mount McKinley.
Academic Regulations

Each student will be held responsible for the regulations of the University as they apply to him.

Orientation and Placement Testing—All entering undergraduate students are required to participate in the orientation program conducted just before fall and spring semester registration. The purpose of this program is to acquaint the new student with the history, the customs, and the campus of the University of Alaska, and to aid him in the planning of a profitable college career.

Many entering freshmen will have taken the examination of the American College Testing Program during their senior year in high school. Those entering freshmen for whom the University has received ACT scores will not be required (or permitted) to repeat the examination during Orientation Week. However, all new students who are entering the University with fewer than 30 hours of acceptable transfer credit and for whom the University has not received ACT scores will be required to take the test during orientation week and to pay a $5.00 testing fee. The ACT and other placement and guidance tests must be taken before a new student with less than sophomore standing may complete his registration. On the basis of test scores, a student whose background of training appears to be deficient in areas such as English and mathematics may be required to take English A or Math A or both. In such cases, the student will be unable to complete the requirements of most curriculums in the minimum time.

An additional fee of $5.00 will be charged to students who take the placement and guidance tests at other than the scheduled times during orientation week.

 Although transfer students are required to participate in the orientation program, they are not required to take the placement and guidance tests if they have at least sophomore standing. However, for the assistance which test scores may give the transfer student and his advisers in planning his educational program, it is recommended that he take the placement and guidance tests at the time they are administered to entering freshmen.

Attendance—Regular attendance is expected in all classes. Unexcused absences may result in a student's being dropped from the course with a failing grade. It is the responsibility of the student to establish to the instructor's satisfaction the validity of an excuse for absence and to work out with the instructor acceptable arrangements for making up missed work.
Class Standing—Class standing is determined on the basis of total credits earned.

Students are classified as:

- Freshmen: 0-29 credits
- Sophomore: 30-59 credits
- Junior: 60-94 credits
- Senior: 95 credits

Transfer students will be given class standing on the basis of the number of credits accepted by the University. Special students are registered without class standing.

Study Load—Students normally may register for 18 semester hours of credit; for 19-20 semester hours with the approval of the dean of the college; for 21 or more semester hours provided the student’s grade point average with a full time study load for the past two semesters is at least 2.75 and a petition to carry this maximum load is approved by the Council of Academic Deans.

For the purpose of computing study loads, non-credit courses are rated the same as credit courses.

No student who has failed in any work may register for more than the number of credits tabulated in his curriculum until he has carried that number successfully for one semester.

A full-time student is one who enrolls for 12 or more semester hours of credit. Any student who qualifies for entrance and registers for fewer than 12 will be classified as “part-time” regardless of his previous standing.

Any student registered in 12 or more credits must fulfill the requirements in military science or physical education.

Any student who does not follow a prescribed course of study or curriculum leading to a specific degree will be enrolled as “interim,” whether he be a full-time or a part-time student.

All “special” students are considered to be “interim” without class standing.

Credit by Examination—An enrolled student is eligible to petition for permission to receive credit by examination if he can provide evidence of sufficient experience or previous study pertaining to the course in question. When permission is granted, the student is required to register immediately and pay the fees of the course which has been officially approved. A course in which a student has been registered as an auditor may not be completed for credit by examination.

Change of Curriculum—A student desiring to change his curriculum may do so only at the beginning of a semester, and must obtain the written consent of the heads of the departments concerned.

Change of Registration—A student is expected to complete the courses in which he is enrolled. He may, if circumstances warrant, withdraw without penalty during the first two weeks of the course; after that time a grade of “WP” is given only if he is doing passing work and a grade of “WF” is given if he is doing failing work. After the first month of the course, a student who wishes to withdraw must submit his request by petition, which shall include the reason for the request. Student initiated withdrawals are not permitted during the last month of the semester.
Elective and non-sequence courses should be dropped first; withdrawals from deficiency courses or English 101-102 may be made only upon petition. The fee for student initiated course changes is $1.00 per course. A Change of Registration card must be obtained from the Registrar.

**Grading System**—Only letter grades appear on the student’s record and transcript. Attention is called to the following analysis:

A—An honor grade; indicates originality and independent work, a thorough mastery of the subject, and the satisfactory completion of more work than is regularly required.

B—Indicates outstanding ability, and a performance definitely above the average.

C—Indicates a satisfactory and average response to assignments.

D—The lowest passing grade; indicates work of poor quality and does not entitle the student to the recommendation of the University.

P—Indicates passing work and carries no grade points.

F—Indicates failure.

S—Indicates satisfactory completion, is used only for graduate theses, and carries no grade points.

I—Given only in cases where additional work is necessary for the satisfactory completion of the course; not given unless the work already performed in Grade C or better; may be given for unavoidable absence.

The grade for work that is incomplete (I) becomes a failure (F) if the work is not completed by the end of the sixth week following the student’s next registration. At the option of the instructor and head of the department offering the course, the removal of the incomplete may be postponed until the next semester in which the course is regularly given.

Def—Indicates that for good cause, as determined by the instructor, the grade in certain courses, such as thesis, may be withheld, without penalty, until the requirements of the course are met within an approved time.

WP—Given when a student makes a regular withdrawal from a course while doing passing work.

WF—Given when a student makes a regular withdrawal from a course while doing failing work. It indicates failure and is so computed in the grade point average.

**Grade Points**—For the computation of grade points, each credit is multiplied by a grade factor: Grade A by 4, grade B by 3, grade C by 2, grade D by 1, and grade F or WF by 0. The record and transcript of the student show all grades received, together with all rulings on special petitions or authorized substitutions. A grade point average of 2.00 is required for good scholastic standing.

**Probation and Academic Disqualification**—At the end of any semester of attendance a student failing to earn or maintain a grade point average of 2.00 may be placed on academic probation. Students who fail to raise their scholastic average after being placed on probation may be academically disqualified and not permitted to re-enroll at any units of the University for one or more semesters. A disqualified student will be readmitted only upon his presentation of evidence indicating a high probability that he can do satisfactory college level work. The most obvious
evidence is the completion of two or more college level courses with a grade of C or higher at another accredited institution or by correspondence.

**Dismissal**—A student may be dismissed for cause at any time by the President of the University.

**Honor Rolls**—Students who earn at least a 3.5 semester grade point average for no less than 12 credit hours are listed by the Academic Vice President on the University's Honor Roll.

**Graduation**—The responsibility for meeting all requirements for graduation rests upon the student.

**Graduation with Honors**—Students who obtain a grade point average of 3.5 will be graduated *cum laude*; 3.8 *magna cum laude*; and 4.0 *summa cum laude*, provided they meet the honors as well as the general residence requirements.

In order to graduate with honors, students transferring from institutions must have been in attendance at the University of Alaska for at least four semesters with a minimum of twelve credits each semester.

**AWARDS**

Listed below are awards which have been established for students who demonstrate outstanding achievement in various fields and activities. Information concerning awards may be obtained from the Office of Student Affairs, from the Department of Military Science, or from the Department of Health, Physical Education and Recreation.

American Institute of Mining and Metallurgical Engineers, Alaska Section

American Society of Civil Engineers, Fairbanks Sub-Section of the Alaska Section

Athletic Letters and Awards

Marion Frances Boswell Memorial Award

Chemistry Department Outstanding Freshman

Druska Carr Schaible Memorial Award

Fairbanks Garden Club Conservation Award

Fairbanks Weavers Guild

George M. McLaughlin Memorial

Archie W. Shiel's Prize

Sigma Xi Club, University of Alaska

General James Steese Prize

Joel Wiegert Award

**R.O.T.C. Awards**

Alaska Sons of American Revolution Award

Armed Forces Communications and Electronics Association Gold Medal Award

Association of the United States Army Medal

Best Basic Cadet Ribbon

Charles J. Keim Freshman Marksmanship Award

Dorman H. Baker Gold Medal Award

Gold Rifle, Marksmanship Award

Governor's R.O.T.C. Gold Medal

Honor Cadet Medal (Military Order of World Wars)

Legion of Valor

NRA Marksmanship Awards

Rifle Team Participation Ribbons

Tanana Valley Rifle and Pistol Club Marksmanship Award

United States Army Superior Cadet Ribbon

University President's Award Medal

Veterans of Foreign Wars Silver Medal
Office of Student Affairs

GENERAL RESPONSIBILITIES

The University provides services intended to assist students in making their educational careers more profitable and meaningful. While the principal function of the University is to foster the intellectual growth of the student, it is recognized that the social, moral, physical and spiritual development of the individual also are of prime importance. Mindful of its obligation to assist the total development of the student, the University continues to expand its student personnel facilities to meet the need for individualization in the educational process.

The Office of Student Affairs is responsible for coordinating and extending personnel services such as: a) orientation activities to help new students adjust to the privileges and responsibilities of membership in the University community; b) psychological testing to help students find out more about their academic and vocational potentialities and capabilities; c) counseling with students relative to their personal or educational problems; d) financial assistance for students through the administration of scholarships, loans and part-time jobs; e) medical attention for students with health problems; f) the assignment to, and the supervision of, student residence halls; g) the guidance of student co-curricular activities and organizations; and h) the promotion of high standards of student conduct.

COUNSELING AND TESTING

The Office provides professional counseling services and specialized testing services for all regularly enrolled students.

Educational Counseling.—Each student who has declared a major is assigned a faculty adviser who assumes special responsibility for the student’s welfare and helps him plan his academic program. The student who is uncertain of his choice of an academic major is assigned an interim adviser until a definite academic goal is chosen. Students who wish information or help with regard to the selection of a major academic field should avail themselves of the counseling and testing services offered by the University.

The Department of Counseling and Testing assists students who fail to meet the scholarship standards of the University, who need help to discover academic weaknesses, and who may need help in planning remedial programs.

Vocational Counseling.—The counseling and testing staff assists students in self-appraisal of their unique interests and aptitudes and in their search for a vocational goal. Psychological and vocational interest tests are used as needed. A library of vocational information is maintained and each academic department has additional information pertinent to its field.

Personal Counseling.—The student may meet with professionally trained and experienced counselors individually and in groups to discuss adjustment problems of a personal nature. All interviews are private and the discussions are kept confidential. The student may apply in person for these services. Student contacts with the counseling service are usually voluntary, although individuals may be referred to the office by faculty and other University personnel.
Testing—Some tests are required of all new students with less than sophomore standing. The required tests include the test battery prepared by the American College Testing Program, the English and Mathematics placement tests, the library skills test and the reading survey tests.

To assist students in self-appraisal, a number of other testing instruments are provided. Vocational interest inventories, scholastic aptitude tests, achievement tests, and personality inventories are available with interpretation given by members of the counseling staff.

In addition to the above services, special nationwide testing programs are administered by the Department of Counseling and Testing. Students who intend to proceed with advanced study and who are required to take the Graduate Record Examination, the Law Schools Admission Test, the Medical Schools Admission Test or similar tests may arrange for these tests in the Office of Student Affairs.

STUDENT HOUSING AND FOOD SERVICE

Because the physical environment of the student during his college years is an important part of his educational experience, the University takes pride in providing the student with carefully planned and supervised modern facilities which help promote maximum educational and social development.

Each Residence Hall is staffed with a Resident Counselor and several Student Advisers. These key people in the residential living environment help create and sustain productive and creative experiences through which students can realize a maximum amount of educational, social, and cultural values. The Resident Counselor is a full-time member of the University staff, responsible for the administration, programming, and counseling within a residence hall. All staff members have had considerable experience in group living and group activities. The Student Advisers are full-time students who are selected to work with the Resident Counselor in planning and administering an interesting and valuable social, governmental, and recreational program.

All student rooms are trim, light and of ample size. Each student has his own bed, desk, chair, mirror, and drawer and closet space; it is his responsibility to provide all other furnishings, including bedding, pillow, and towels. Sleeping bags may not be used in residence halls.

The residence halls have attractive social rooms and recreational facilities. Regular maid service is provided in common areas such as corridors, lounges, and bathrooms. The student is responsible for keeping his own room clean and orderly.

All women students must live on campus unless they are 21 years old, or married, or live at home. All single men who are less than 21 and who do not live at home must live in a University residence hall during their freshman year. Exceptions to these regulations may be approved for good reason by the Office of Student Affairs before the beginning of any semester. Men students of sophomore standing or higher may live in one of the halls if space permits. Full-time students will be given preference over part-time students in the assignment of hall accommodations. Upperclassmen are given preference over new students in the assignment
of single rooms. Room assignments in general are made on a first come
first serve basis provided that application and deposit requirements are
complete.

All residents are required to contract for their meals by the year
at the University Commons. Breakfast, luncheon and dinner are served
daily throughout the school year. Although meal service continues during
the Thanksgiving, Christmas and spring recesses for the benefit of those
students who remain on the campus at those times, the cost of meals dur-
ing such periods is not included in the board contract.

In order to provide students with meals of high quality at minimum
cost, it is essential that the staff be able to plan its food purchases and
preparations for relatively constant numbers. Therefore, it is not possible
to provide special diets or to give refunds for meals missed. If, for reasons
such as illness, a student who has contracted for meals is unable to report
for them for more than five consecutive days, a refund for the sixth and
subsequent days may be recommended by the Office of Student Affairs.
Refunds are also granted to students participating in authorized University
functions where meals are not provided.

*Harriet Hess Hall*, constructed in 1938, provides single and double
room accommodations for single faculty members, graduate students, and
upperclassmen with approved G.P.A.'s. The residence is named for the
late Harriet Hess, secretary of the Board of Regents for many years.

*Andrew Nerland Hall* houses 98 men in double and single rooms on
its four floors. First occupied in 1953, Nerland Hall is named for a
pioneer Fairbanks merchant, long-time member of the Board of Regents,
and president of the Board from 1935 until his death in 1956.

*John E. McIntosh Hall*, completed in 1956, has double and single
rooms for 98 men. This four-story building is named for a former presi-
dent of the Board of Regents.

*Wickersham Hall*, completed in 1957, is a three-story residence for
99 women. It has 19 single rooms and 20 suites. Four women share each
suite, which consists of two sleeping rooms, a study room, and a lavatory.
It is named for the late Judge and Mrs. James Wickersham. Judge Wick-
ersham introduced the bill into Congress that created the University of
Alaska, and Mrs. Wickersham served on the Board of Regents.

*Morton Stevens Hall*, completed in the fall of 1958, is a four-story
structure with accommodations for 102 men in double and single rooms.
It is named for Morton Stevens, who was president of the Board of
Regents from 1921 until 1932.

*Austin E. Lathrop Hall* houses 144 men in double and single rooms
on its five floors. The building is named for a prominent Fairbanks busi-
nessman whose interests throughout Alaska were many and varied. Mr.
Lathrop served as a member and later as vice-president of the Board of
Regents during the period from 1932 until his death in 1950.
Ivar Skarland Hall, completed in the fall of 1964, provides double and single room accommodations for 138 women. The study-bedrooms are located around a central core area containing lounge, sewing rooms, ironing rooms, T.V. lounge, and shower facilities. The hall is named for Ivar Skarland, long time professor of Anthropology at the University.

The newest residence hall to the campus is an eight story building containing both single and double rooms. Capacity of the building is 322 students. Facilities in this hall are similar to those of its companion, Skarland Hall. These two units comprise to date a living center on the hill for men and women to the west of the President’s residence overlooking the Tanana Valley.

Married student housing is provided in several areas. Walsh Hall, completed in 1959, has accommodations for couples with no more than one child. This spacious building contains 12 furnished apartments consisting of a living room-kitchen, bedroom, and bath. The building is named for the late Michael Walsh of Nome who was a long-time member of the Board of Regents.

Completed in the spring of 1964 is Harwood Hall, named for the late Boyd Harwood, former member of the Board of Regents, which houses an additional 38 married student couples or families. All apartments are furnished except for personal items such as dishes, utensils and bedding. Two two-bedroom apartments are available for families with two or three children. One-bedroom apartments similar to those at Walsh Hall are assigned to couples without children, or with not more than one child. Still other quarters, without a separate bedroom, are assigned to couples without children.

Application Procedures—Applications for student housing will be mailed to all students with their notification of acceptance from the Registrar’s office. Student rooms can not be reserved until the student is accepted by the University, through notification from the Registrar’s office. Continuing students may reserve rooms during the Spring semester for the Fall semester or during the Fall semester for the next Spring semester providing that they have not been disqualified for scholastic or disciplinary reasons by the University. After being accepted and in order to secure student housing, the student should complete the Housing-Board contract and mail it immediately to the DIRECTOR OF HOUSING, UNIVERSITY OF ALASKA, COLLEGE, ALASKA, with a $35.00 room advance. Confirmation for student housing is not assured until the student receives his copy of the contract with a receipt for his advance. Specific room assignments will be available after August 1st. Spring semester assignments are made as space becomes available. The contract for single student housing in undergraduate residence halls is for room and board. The contract for married student housing does not include board.
center informed. Students are expected to pay for all meals during the summer unless otherwise notified. If a meal ticket is not used, it will be cancelled and the space assigned to a waiting list. The Housing Board contracts with the University Dining Services for food preparation and function dining. Students are required to sign the Housing Board contract from the University Dining Services. The advance is non-refundable unless written notification of the cancellation is received by the Housing Director from a student for whom space is arranged. Students not enrolled at the University after the housing board cancellations due to the summer classes will be notified of the same by the Housing Board. The University reserves the right to assign the housing to another student in the event of a housing board cancellation. The advance is non-refundable unless written notification of the cancellation is received by the Housing Director from a student for whom space is reserved.
In addition, the Nurse reviews mandatory health examinations for new students, keeps records up to date on all students, does follow-up on medical conditions as needed, provides out-patient service during the day and advice for emergencies at night.

Full-time students receive special rates for mandatory health insurance which provides hospital, medical and surgical benefits. The coverage is extensive, inexpensive and compulsory for all students carrying 12 or more hours and under 26 years of age. For all others it is optional up to the age of 35. It is designed to supplement, but not to replace Health Service care. Brochures containing details of the policy are available at the Health Service.

FINANCIAL AIDS

Three types of financial aid are available at the University of Alaska:

1) Grants (Scholarships)
2) Loan funds
3) Part-time student employment

1) Grants (Scholarships). At the present time grants are awarded only to Alaska high school seniors and to currently-enrolled University of Alaska students. Non-residents must successfully complete at least one semester of academic work at the University of Alaska before they become eligible to apply for scholarship assistance. Students who are enrolled at any of the University's Community Colleges and who plan to continue their study on the main campus at College during a forthcoming semester are invited to apply.

Applications from currently-enrolled students are accepted twice each year before March 1 and November 1. Applications from Alaska high school seniors are accepted once each year before March 1 and are reviewed only after the applicant’s admission to the University has been approved and after his American College Test scores have been forwarded to the Office of Student Affairs. Requests coming in after these deadlines will not be considered. No grants are available for the summer session.

These awards are based primarily on need. The amount of the grant is based upon information supplied on the College Scholarship Service Parents' Confidential Statement form. Entering students seeking financial assistance are required to submit a copy of the Parents' Confidential Statement (PCS) form to the College Scholarship Service, designating the University of Alaska as one of the recipients by March 1 or November 1. The PCS form may be obtained from the University, secondary schools or the College Scholarship Service, P.O. Box 176, Princeton, New Jersey 08540 or P.O. Box 1025, Berkeley, California 94704.

Although need is the primary basis upon which these grants are given, demonstration of academic competence, personal characteristics, and contributions to the University community are evaluated.

Recipients at the University of Alaska forfeit entire grants which are to become effective in a forthcoming semester if they earn below a 2.0 grade point average in the current semester. Grants are automatically forfeited by recipients who do not enroll during a semester in which it is in effect, who enroll for less than a full-time program of studies without
special arrangement with the scholarship program coordinator, who are placed on disciplinary probation or who are suspended from the University for disciplinary reasons.

Questions concerning application forms, specific grants, or selection procedures should be directed to the Office of Student Affairs.

Although numerous grants are awarded annually to students at the University of Alaska by various individuals and organizations, the list below includes only those which were administered by the University’s Financial Aid Committee during the 1965-66 school year:

2) **Student Loan Fund.** There are three different types of loan programs:

*Emergency loans* are available to all regularly enrolled full-time students whose financial need is modest and temporary. Although emergency loans require no co-signer, they are limited to $100 for not more than 30 days and interest is in the form of a flat service charge of $2.00 per loan or 50c if repayment is made within 10 days of the date of borrowing.

The **University Loan Fund** is available to regularly enrolled students who have successfully completed one semester as a full-time student. Loans are limited to $500 and are payable prior to the forthcoming September 1. The interest rate on the money borrowed from the University loan fund is 4% per annum. The loan requires a co-signer (not a faculty member or fellow student), and will be made for University expenses only such as room, board, fees, and books.

The University Loan Fund represents the pooled resources of several separate loan funds given to the University over a period of many years:

- Anchorage Women's Club (1926)
- American Military Engineer Revolving Loan Fund
- Lawrence C. Phipps (1930)
- Fairbanks High School Alumni (1932)
- First National Bank (1945)
- Phi Tau Gamma (1953)
- Palmer Community (1953)
- Glenn Carrington (1953)
- Larry Doheny (1953)
- Pioneer Women of Alaska (1954)
- Women's Auxiliary #4, Pioneers of Alaska (1957)
- Dave M. Dishaw (1958)
- Anchorage High School (1958)
- Anchorage High School PTA (1959)
- Sheils-Timson (1936)
- Leopold F. Schmidt (1938)
- Palmer Associated Students (1941)
- Frank Slaven (1944)
- Mr. & Mrs. Walter G. Culver (1959)
- Verne E. Roberts Memorial (1960)
- James Stanley Rodebaugh Memorial (1960)
- James E. Nankervis Memorial (1961)
- Herman Turner Memorial (1961)
- Rotary Club of Fairbanks (1963)
- Southern California Alumni (1963)
- Arthur A. and Anne Shonbeck Memorial (1964)
- Marianne Casson Memorial Fund (1965)
The National Defense Education Act loans are available to a limited number of qualified students. Undergraduate students may borrow up to $1,000 a year or $500 maximum per semester, graduate students $1500 per year. Total funds available to a student for his undergraduate work are limited to $5,000. These loans are repayable nine months after a student discontinues or completes his education or finishes his military obligation or service with the Peace Corps. For those who become teachers, one-tenth of the amount borrowed is canceled each year for five years, representing as much as 50% of the original loan. Interest rate is 3% per annum. Loans must be paid within ten years.

The Seward Business and Professional Women’s Club has a $500 loan fund on deposit with the University of Alaska for the use of Seward High School graduates who have completed satisfactorily at least one semester’s work at the University of Alaska.

The Clarence J. Rhode Memorial Scholarship Loan Fund was initiated by the Territorial Sportsmen, Inc. of Juneau. Junior, senior and graduate students in Wildlife Management are eligible for loans up to $300.00, under terms similar to those of the Student Loan Fund. The head of the Department of Wildlife Management administers these funds.

Mr. Ralph R. Stefano, Consulting Engineer of Fairbanks, has established The Stefano Loan Fund for the purpose of furthering instruction in Mechanical Engineering. Loans may be made from this money to deserving students in Mechanical Engineering. The Dean of the College of Mathematics, Physical Sciences and Engineering administers these student loans.

3) Part-time Employment. Two types of work opportunities are available:

   a) Listings are available in the Office of Student Affairs for both on-campus and off-campus jobs. Students interested may apply at the office for information but must apply for the position themselves. The University does not contract work for students although it may make recommendations to employers.

   b) The University actively participates in the Work-Study program of the Economic Opportunities Act. This program is designed to provide work opportunities for students with acute financial problems. The University determines student eligibility for this program on the basis of family income. Under this program students may work up to fifteen hours a week during the school term and forty hours per week in the summer. Most of the work opportunities are on-campus and can be related to a student’s professional or vocational interest. A student may inquire about this program at the Office of Student Affairs, Room 18, Bunnell Building.

In most cases financial aids are combined so that a student’s financial need may be met from several sources: for example, \( \frac{1}{4} \) from a grant or scholarship, \( \frac{1}{2} \) from loans or savings, and \( \frac{1}{2} \) from work.
The Society of American Military Engineers Revolving Loan Fund enables students in Engineering, Science and Mathematics to borrow money to continue their education under terms similar to those of the University Loan Fund. Application is made through the Office of Student Affairs.

CO-CURRICULAR ACTIVITIES

All students are encouraged to participate in at least some of a wide range of co-curricular activities. Many of them, such as the student government, the choral groups, band, dramatics, student newspaper, yearbook, radio station, and intercollegiate and intramural athletics are open to academically qualified students regardless of their field of study. Others are activities or organizations in which participation is dependent upon enrollment in a particular curriculum. All may make meaningful contributions to the student’s educational experience.

To encourage students to maintain proper balance between their curricular and co-curricular activities, and to protect the best interests of the University, the following code which determines eligibility for participation in all co-curricular activities and organizations has been adopted:

1. All members of University organizations must be students who are enrolled for twelve or more semester hours of credit.
2. Students who participate in co-curricular activities must maintain a cumulative grade point average of 2.00 or higher and must not be on disciplinary probation.
3. Additional eligibility requirements for members and officers in University organizations and co-curricular departmental activities may be established by the organization or department. Copies of these regulations shall be kept on file with the Office of Student Activities. The responsibility for enforcing eligibility regulations shall rest with the organization or department.
4. The Academic Vice President and the Director of Student Affairs shall review special cases or unusual circumstances regarding eligibility regulations and, with the approval of the President of the University, may make exceptions to the above rules.

Student Union Building—Dining, recreational, and co-curricular facilities are contained in Constitution Hall, the official name of the Student Union Building, which was completed in 1955. It was the site of the convention of Territorial delegates which drafted the Constitution for the State of Alaska. This modern, well-equipped building provides facilities for a variety of student services and activities. On the ground and main floors are a book store, game room, barber shop, coat room, and a lounge with television. The Snack Bar, which serves all members of the University community, occupies the entire second floor of Constitution Hall. Located on the third floor are offices of the student government, the student publications, the director of student activities, the speech, radio and drama facilities, and the alumni and graduate placement office.

STUDENT BEHAVIOR STANDARDS

Education at the University is conceived as training for citizenship as well as for personal self improvement and development. When a student enrolls he acquires a special status and prestige and assumes com-
mensurate responsibility as a citizen in the University community. As long as he remains a student, he represents the University—whether on or off the campus.

It is the University’s policy to provide its students as much freedom of individual expression and action as is consistent with their maximum growth and with the welfare of the University. Students are expected, individually and collectively, to maintain this freedom by the exercise of that self-discipline which is imposed by a sense of social responsibility. Most students find it relatively easy to adjust to the privileges and responsibilities of the University citizenship. For those who find this process more difficult, the University attempts to provide such counsel as the student needs to gain insight and confidence in adjusting to his new environment. In some cases, when a student is unable or unwilling to assume his social responsibilities as a citizen in the University community, the institution may terminate his enrollment.

In order that new students become fully informed on the University’s expectations, specific rules and regulations will be announced during the orientation sessions preceding registration for each semester. Printed copies of these rules and regulations are available for the guidance of students in the Office of Student Affairs. To those who live in University residence halls, manuals containing housing regulations will be distributed at the time rooms are occupied.

University regulations are designed to help the student work efficiently in his courses and develop a high standard of character and citizenship. They are not designed to ignore individuality, but rather encourage students to formulate rules for their own guidance and develop methods of enforcing the rules.

**ALUMNI SERVICES**

The University of Alaska Alumni Association promotes interest in the University and acquaintanceship among former students of the University to encourage continuing education among alumni; to advance the scholastic standing and the physical plant of the institution; and to preserve its history and traditions. There are branch chapters in Juneau, Seward, Anchorage, Fairbanks, the Matanuska Valley, California and Washington. The Association has an office on campus to which all correspondence should be addressed: Executive Secretary, University of Alaska Alumni Association, College, Alaska.

Former students who have taken credit courses at the University of Alaska, including any of its Community Colleges or other Centers, are eligible to belong to the Association. The Association publishes the “Alaska Alumnus” quarterly.

*Graduate Placement Service* is a division of the Office of Alumni Services. The essential aims of the office are to bring together in the most efficient manner employers and qualified applicants and to give the student encouragement and guidance in job selection and analysis.

All graduates of the University are eligible for graduate placement services. Seniors and graduate students who expect to complete work for degrees during the academic year are urged to visit the Placement Service and obtain registration forms at least one semester prior to graduation. Refer to Graduate Placement Fee for cost of placement services.
Student residents of Ivar Skarland Hall practice before starting an annual evening of Caroling during Christmas week.
Admissions

REQUIREMENTS FOR ADMISSION

Admission as a Freshman

1. High School Graduates—Baccalaureate Programs

Residents—An Alaskan high school graduate with an academic average of "C", or higher, is eligible for admission. An Alaskan whose high school grades averaged less than "C" will be considered for admission to the University only if his performance on a qualifying test demonstrates that he has the capacity to undertake successfully college academic work. The test required in such cases is prepared by the American College Testing Program. The ACT test is administered at testing centers throughout the country in November, February, April and June of each year. Most Alaska high schools serve as ACT testing centers in November and/or February. Arrangements for taking the ACT test may be made through each high school's principal or guidance officer. The cost of the test to the student is $4.00.

Non-Residents—A non-resident high school graduate with an academic average of "B", or higher, is eligible for admission. A non-resident whose high school grades averaged less than "B" will be considered for admission to the University only if his performance on a qualifying test demonstrates that he has the capacity to undertake successfully college academic work. The test required in such cases is prepared by the American College Testing Program. Information concerning ACT testing centers and dates may be obtained from most high schools throughout the nation and from the American College Testing Program, Post Office Box 168, Iowa City, Iowa.

High School Subject Requirements
A high school graduate offering the following pattern of studies will have no deficiencies in any program that he enters.

</tbody>
</table>

* Plane Geometry required of Education students who intend to select teaching majors and/or minors in mathematics, chemistry, and/or physics.

** Students who offer 2 units of a high school foreign language will enroll in second year language, and no credit will be allowed for first-year college courses in the same language.

† 1 year of algebra and 1 year of geometry will be acceptable for students in Agriculture and Biological Sciences not wishing to continue with advanced studies, such as graduate work, medicine, etc.

‡ Two years of French, German, or Russian language highly recommended. See departmental curricula.

Entering freshmen whose background of training in English and mathematics appears to be deficient when measured by placements tests may be required to take English 1 or Math A or both. Achievement of a certain level of excellence in these subjects is essential to success in other areas of study. These basic English and mathematics courses are especially designed to assist the student in achieving these competencies.

Courses completed at the junior high school level and certified on the official high school transcript by secondary school officials as being equivalent to courses normally offered at the high school level will be accepted as meeting college entrance requirements.

When a student is deficient in specific subjects, but offers a satisfactory general record, he may enter with an entrance deficiency. The student must remove deficiencies during the freshman year. All courses taken to remove deficiencies must satisfy the department head concerned, and must be in the subject in which the student is deficient.
2. Non-High School Graduates—Baccalaureate Programs
Mature students, at least 21 years of age, residing in Alaska, who have not graduated from high school, or been awarded a high school diploma on the basis of GED military tests, or have not completed any previous college level work, may be admitted. Such students may be converted to “regular” student status and become baccalaureate degree candidates after completion of not less than 30 collegiate semester hours of credit with at least a “C” average (2.00).

3. High School Graduates—Associate Programs
Any high school graduate is eligible for admission to all associate degree programs except electronics technology (see page 103).

Admission of a Transfer Student
Transfer students from other accredited institutions are considered for admission provided they have a 2.00 grade point average and honorable dismissal. The University will transfer credits from other accredited institutions when the grades of courses completed are “C” or above. Transfer credits are evaluated and equated by the Registrar and approved by the department head after a student is admitted to the University. The University reserves the right to reject work of doubtful quality or to require an examination before credit is allowed.

Transfer students with less than thirty acceptable credits are required to take the tests prepared by the American College Testing Program. Information concerning ACT testing centers and dates may be obtained from most high schools throughout the nation and from the American College Testing Program, Post Office Box 168, Iowa City, Iowa.

Members of the Armed Forces who have taken USAFI courses may, upon presentation of credentials to the University’s Head of Evening Classes and Correspondence Study, receive credits as recommended in the Evaluation of Educational Experiences of the Armed Forces. College credit will not be allowed for the General Educational Development Tests.

Credit for military service may be substituted for the ROTC and/or physical education requirements.

Admission of Post Graduate and Graduate Students
Post Graduate—Students who hold a bachelor’s degree but who have not defined their graduate program or declared the subject in which they wish to pursue their studies toward a higher degree may be admitted as “Post Graduates.” Registering as a post graduate is satisfactory for those who hold a bachelor’s degree and who have the following or similar purposes:

1. Students who plan to take “interest” courses.
2. Students completing work for a teaching certificate.
3. Students completing a second undergraduate major and/or a second bachelor’s degree.
4. Students strengthening their preparation in order to be admitted to graduate study.
5. Transient students expecting to be at the University only briefly.
6. Students awaiting action on applications for graduate status.

Graduate—See page 51.
Admission of Others

*Special Students*—Mature students, at least 21 years of age, who have graduated from high school and/or attended college previously may be admitted without filing transcripts of high school or college work completed. Such students are limited to enrollment in two classes unless special permission is obtained. Special students are subject to the academic regulations of the University, but are not considered degree candidates until regular admission requirements are met and transcripts filed.

*Auditors*—Auditors are students who enroll for informational instruction only. They do not receive academic credit, have laboratory privileges or submit papers for correction and grading. They must apply for admission, register formally on the designated registration dates, obtain approval of class instructors and pay the required fees.

A course in which a student registered as an auditor may not be completed for credit by examination at a later date.

*High School Students*—To facilitate the transition and adjustment from high school to college the University has made special provisions for students of varied background and ability. Qualified Alaskan high school seniors of advanced academic standing and ability are permitted to enroll, while attending high school, in certain University of Alaska classes taught by University faculty and to enroll in college courses which may be offered at authorized high schools. To qualify for admission to college classes while still attending high school, a high school senior must have the recommendation of his high school principal, the approval of his parents, and a satisfactory score on the usual testing program required for entering students. Credits earned in such college classes may not be applied to high school graduation, but will apply toward graduation from the University and may be transferred to other universities following graduation from high school, provided the grades earned are satisfactory. Seniors who are interested in participating in this program should contact their high school principal.

After enrollment at the University, a student may receive credit in CEEB Advanced Placement Tests, or the equivalent, when test scores warrant it and may receive course credit by examination upon presentation of adequate justification.

APPLYING FOR ADMISSION

When to Apply

Seniors in high school should make application for admission during the last semester of their senior year, if they plan to enroll at the University during the next fall semester. Transfer students should apply after the completion of a semester or school year, so that a complete transcript can be sent. Graduate students should make application during their senior year of college. Applications for admission should be presented no later than August first for the fall semester and December 15th for the spring semester. Applications received after these closing dates may be considered for the following semester.
How to Apply—Read Carefully.

Application forms may be obtained from the Office of the Director of Admissions and Registrar. Applications for admission will be considered only when the following credentials have been received by the Office of the Director of Admissions and Registrar:

1. *Application for Admission.* The $10 application fee must accompany the completed application for admission form.

2. *Scholastic records.* A secondary school record form completed by the high school where the applicant finished his high school work should be mailed by the high school. Applicants are required to submit complete official transcripts of all high school and college credits. If the work has been taken at two or more collegiate institutions, an original transcript from each college attended is required. These transcripts should be sent directly from the registrar of the college where the work was taken to the Director of Admissions and Registrar at the University of Alaska. The applicant is responsible for securing these scholastic records. An application for admission is not processed until all such records are on file. Any person who willfully refrains from transferring all of his scholastic records or giving full information concerning previous attendance at other institutions will not knowingly be accepted or retained as a student.

3. *Letters of recommendation* (graduate applicants only).

After receiving and processing the above materials, the Registrar’s office will mail to the student a statement of acceptance or non-acceptance. After the acceptance statement is received, the following items, where applicable, should be completed and mailed to the proper offices within the time limits suggested.

1. *College catalogs* (transfer students only). Transfer students are responsible for having catalogs of colleges previously attended sent to the Director of Admissions and Registrar at least two months prior to the expected date of enrollment.

2. *Medical and Physical Examination.* Registration at the University is dependent upon the applicant’s having completed a recent physical examination which will confirm that his health is sufficient to enable him to undertake successfully the course of study for which he is applying. This requirement applies to all new students enrolling in 7 credits or more, any students enrolling in 7 or more hours for the first time, and to former students returning to the University after an absence of two or more semesters enrolling in 7 or more credits. The physical examination is to be completed by the physician of the applicant’s choice, and recorded on the University physical examination form, no earlier than five months before registration and no later than two weeks be-
fore registration. Evidence of smallpox vaccination within three years and results of a Tuberculin Test within the year (also of chest x-ray within the year if the test is positive) must be included. These must all be received by the University Nurse before registration may be completed.

3. **Residence Hall-Board contract and deposit.** All accepted single students will receive a residence hall-board contract with their acceptance notice from the Registrar's Office. In order to secure a room in the residence hall, this form should be completed immediately and mailed to the Director of Housing, University of Alaska, with a $35.00 room deposit. For additional information on single student housing and/or married student housing, see the appropriate sections in this catalog.

4. **ACT results.** Entering freshmen and transfer students with less than 30 semester hours of transferrable credit who have taken the American College Testing Program should have their test results sent to the University prior to registration. If the University of Alaska was not indicated as an institution to receive the results when the candidate took the test, he should write to the American College Testing Program and have the results forwarded to the University. The request should be addressed to the American College Testing Program, Box 168, Iowa City, Iowa.

**Conditional and Final Acceptance**

Qualified applicants can be accepted for admission while currently enrolled in their last semester of high school or at another college. However, the acceptance is conditional upon receipt of an official transcript indicating the satisfactory completion of the work in progress at the time of acceptance and in the case of high school seniors and graduate applicants, the completion of graduation requirements.

Final acceptance to the University for the purpose of earning scholastic credit becomes complete only when all credentials have been received and accepted.
Degrees

DEGREES OFFERED

The University offers programs leading to the following:

Undergraduate Degrees

Associate of Arts, A.A.
Associate of Business Administration, A.B.A.
Associate of Engineering, A.E.
Associate of Science, A.S.
Bachelor of Arts, B.A.
Bachelor of Business Administration, B.B.A.
Bachelor of Education, B.Ed.
Bachelor of Engineering, B.E. (5 years)
Bachelor of Science, B.S.

Professional Degrees

Engineer of Mines, E.M.

Graduate Degrees

Master of Arts, M.A.
Master of Education, M.Ed.
Master of Fine Arts, M.F.A.
Master of Science, M.S.
Doctor of Philosophy, Ph.D.

GENERAL REQUIREMENTS FOR UNDERGRADUATE DEGREES

To receive a degree from the University, a student must have earned the required number of credits as well as satisfied the special requirements of his curriculum. He must attain an average grade of 2.00 (C) in all work, as well as in the major field and minor fields; transfer students must maintain a 2.00 (C) average in all work at the University of Alaska.

BACHELOR'S DEGREES

All regularly enrolled, physically fit male students without military training who are citizens of the United States, under 24 years, must complete the Basic Course, R.O.T.C. (See under Military Science).

All physically qualified women students under 24 years and all physically qualified men students under 24 years who are exempt from military training, entering the University for the first time, must enroll in physical education. Such students must complete two years of physical education, preferable during the first two years of attendance at the University.

Transfer students must meet the requirements of the University with respect to military science or physical education, unless they have completed the requirements of the schools previously attended.

Students must earn in residence at the University of Alaska at least 24 credits in upper division courses and at least 30 of the last 36 credits for the degree.
An upper division student showing a marked English deficiency may have to pass a remedial course in English.

A maximum of 32 semester hours of work completed by correspondence may be accepted toward a degree.

A student enrolled in a bachelor's degree program may elect to graduate under the requirements of the general catalog in effect during the year of graduation or in effect at the time he originally enrolled, providing there has not been a time elapse of more than seven years.

**GENERAL REQUIREMENTS FOR A B.A. DEGREE**

English Composition and Literature, including Engl. 101-2 ................................ 12 credits

Foreign Language—Two years of collegiate work in one language. 12-16

Students offering 2 units of one language from a secondary school will enter the second year or begin a new language. 12 credits fulfill the requirement if all are above the 100 level.

Social Science, including Hist. 117-8 and work in two other fields ........................................ 15

Mathematics and/or Natural Science, Math. 106-200 or Math. 121-122 or a year sequence in a laboratory science plus enough credits to total 12.

Major Specialty—(See Departmental Sections for specific requirements) 23-26

If the major specialty is a natural or social science, electives in English or foreign languages may be substituted for the general degree requirements, if the program includes a major and at least one minor in these areas.

Minor Specialties—2 of 12-18 credits each, or a second major to be approved 23-24 by petition.

Physical Education or Military Science .......................................................... 4-6

Electives—To bring total credit to 130 credits.

**MAJOR SPECIALTIES AVAILABLE FOR B.A. DEGREE—Anthropology, Art, Biological Sciences, Botany, Chemistry, Economics, English, French, Geography, Geology, German, History, Linguistics, Mathematics, Music, Physics, Philosophy, Political Science, Psychology, Russian, Spanish, Speech, Sociology, Zoology.**

**MINOR SPECIALTIES AVAILABLE FOR B.A. DEGREE—Anthropology, Art, Biological Sciences, Botany, Chemistry, Economics, Secondary Education, English, French, Geography, Geology, German, Home Economics, History, Journalism, Linguistics, Mathematics, Military Science, Music, Philosophy, Physics, Political Science, Psychology, Russian, Sociology, Spanish, Speech, Zoology.**

**GENERAL REQUIREMENTS FOR A B.B.A. DEGREE**

English Composition and Literature, including Engl. 101-2, 213, 328 or 336 and 3 credits in another Literature Course. 15 credits

Behavioral Science—All in Psychology or All in Sociology/Anthropology 9

History and Political Science, including Hist. 131-2, P.S. 101-2 15

Economics, including Econ. 121-2, 232, 321, 324, 350, 429 21

Mathematics, including Math. 121, 122, and 204 14

Biological Science 105-106 or Chemistry 101-102 or Physics 103-104 8

Military Science/PE 4-6

General Requirements, including:

Acc. 215-216—Principles of Accounting 6

B.A. 331-332—Business Law 6

Major Specialty (See Departmental Sections for Specific Requirements) 12-18

Approved Electives (8-20 credits) to total 130 credits.

**GENERAL REQUIREMENTS FOR A B.Ed. DEGREE**

For requirements for a B.Ed. in Elementary Education, see page 78.

For requirements for a B.Ed. in Secondary Education, see page 79.

**GENERAL REQUIREMENTS FOR A B.S. DEGREE (ENGINEERING SCIENCE)**

English Composition and Literature, including Engl. 101, 102, 313 12 credits

Social Science, including Econ. 121 9

Engineering Science, including E.E. 101, 102, 111, 112, 207, 208, 331, 341, 346 27

Mathematics, including Math. 106, 200, 202, 302, 312 23

Chemistry, including Chem. 201, 202 8

Physics, including Phys. 211, 212 8

Military Science or Physical Education 6-4

Departmental requirements and Electives to bring total credits to 130.

**MAJOR SPECIALTIES AVAILABLE FOR B.S. (ENGINEERING SCIENCE) DEGREE—Chemical Engineering, Civil Engineering, Electrical Engineering, Mechanical Engineering.**
GENERAL REQUIREMENTS FOR A B.S. DEGREE

English Composition and Literature, including Engl. 101-2 ........................................ 12 credits
Foreign Language—A first year (101-102) or a second year (201-202) of a
Language approved by the Department Head. Students with two or three
years of study of an approved language may petition to have this
requirement removed by examination.
Social Science .................................................................................................................. 9
Mathematics .................................................................................................................. 9
Physics ............................................................................................................................ 8
Chemistry or Biology ..................................................................................................... 8
Major Specialty (See Departmental Sections for specific requirements) .................
Physical Education or Military Science ........................................................................ 4-6

Departmental Requirements, Minor Specialties, and/or Electives—To bring
total to 130 credits.

MAJOR SPECIALTIES AVAILABLE FOR A B.S. DEGREE—Anthropology, Biological Sciences, Bot-
any, Chemistry, Fisheries Biology, General Science, Geography, Geology, Geological
Engineering, Home Economics, Mathematics, Medical Technology, Mining Engineering,
Physics, Wildlife Management, Zoology.

MINOR SPECIALTIES AVAILABLE FOR A B.S. DEGREE—Refer to Departmental Section since
some B.S. degree programs do not require minor specialties.

ASSOCIATE DEGREES

The associate degree is awarded upon the successful completion of a two-year technical
or general program. The degree has its own integrity and for many people it will be their
most advanced formal educational experience. For others, it will be the first undergraduate
degree and a stepping stone to a baccalaureate program.

GENERAL REQUIREMENTS FOR AN ASSOCIATE DEGREE

English ............................................................................................................................ 6 credits
American Government or American History ................................................................. 6
At least 6 credits each in any three of the following areas:
(a) humanities, (b) social studies, (c) natural science, (d) mathematics,
(e) other.
Major specialty (See Department Sections for specific requirements) ................. 20-30
Electives—To bring total credits to 60.

GENERAL REQUIREMENTS FOR GRADUATE STUDY

Graduate study seeks to prepare the student for creative work—for
all work that extends the bounds of knowledge, that cherishes and trans-
mits knowledge, and that applies knowledge for the benefit of man. It
seeks to give the student deeper insights and better understandings of
fundamental principles. The graduate program is shaped to the needs of
the individual student and is developed in terms of his experience, aca-
demic background, and aspirations. Earning an advanced degree entails
more than the satisfactory completion of specified courses; the student
must show promise and performance in productive scholarship.

MASTER'S DEGREES

As will be seen under departmental listings, programs leading to
master's degrees are offered in the areas of botany, chemistry, civil en-
gineering, creative writing, education, engineering management, English,
fisheries, biology, general science, geology, geophysics, mathematics, min-
eral industry management, mineral preparation engineering, physics, wild-
life management, and zoology. Students wishing to enroll for graduate
study in any of these fields should obtain an application form from the
Director of Admissions and Registrar's Office. The completed form and
official transcripts of all previous college or university work should be
returned to that office.
However, programs leading to master's degrees may be arranged on request in certain aspects of other subjects; for example, anthropology, business, economics, history, linguistics, etc. Students interested in pursuing studies in one of these or any other discipline not listed should write directly to the Vice President for Research and Advanced Study.

In general, a student may be admitted if he has a bachelor's degree from an accredited institution with at least a "B" average in his major and if his major is deemed suitable for continuation of studies in the field of his choice.

Department heads in fields of interest will determine the adequacy of the student's preparation and whether or not departmental facilities are sufficient for the student's aims. Applications from students whose projected programs do not fall within a department will be reviewed by a Committee for Admissions. Departmental or Committee recommendations will be transmitted to the student by the Director of Admissions.

As soon as the student is accepted, an Advisory Committee of not fewer than three faculty members will be set up to assist the student in planning and carrying out his program.

The requirement for a master's degree is a minimum of thirty semester credits, of which a maximum of twelve may be devoted to the thesis. At least nine semester credits, in addition to those earned for the thesis, must be at the 600 level. No lower division courses (100 or 200) are applicable. A maximum of nine semester credits from another institution may be transferred to the University of Alaska and applied toward a degree if approved by the Student's advisory committee and by the dean of the college in which the student is enrolled.

B is a minimum passing grade in courses not primarily for graduate students (300 or 400); C will be accepted in courses primarily for graduate students (600) provided a B average is obtained in graduate courses. Such standards are requisite for continuing study towards a master's degree.

A student may be admitted to candidacy for a specific master's degree after he has satisfied all the following requirements: 1) completed at least 8 credits of graduate study at the University of Alaska; 2) demonstrated a reading ability of a foreign language, if required; 3) received approval by the dean, if he is enrolled in a college, or by the Vice President for Research and Advanced Study, if not, of the provisional title of his thesis, if a thesis is required, and of his program of studies.

The candidate must pass a final examination, either written or oral; if a thesis is required, the examination will include a defense of the thesis. The Examining Committee shall consist of a candidate's Advisory Committee and one member of the faculty from a different college appointed by the Vice President for Research and Advanced Study.

All work toward the fulfillment of the requirements of a master's degree must be completed within seven years.
DOCTOR OF PHILOSOPHY DEGREE

No restrictions are placed on the disciplines that may be studied by students seeking doctoral degrees. There are established doctoral programs in certain aspects of geology, geophysics, oceanography, physics, and zoophysiology.

Prospective candidates in these, or other topics, should write to the Vice President for Research and Advanced Study outlining in some detail their previous training and interests for future study. Each application is reviewed by an Admissions Committee both in light of the applicant's qualifications and the faculty and facilities available on the campus relevant to the field of projected study.

The degree of Doctor of Philosophy is granted for proven ability and scholarly attainment. There are no fixed credit requirements for this degree at the University of Alaska. It is not the policy to confer this degree upon anyone whose entire academic experience has been at this University.

The student chooses a major line of study and, with the advice of his Advisory Committee, such lines of study in related fields as are necessary for achievement of a thorough and scholarly knowledge of his subject. With approval of his Advisory Committee, the student prepares a program for the degree, which, including applicable and acceptable work transferred from other institutions, shall represent approximately three full years of study beyond the bachelor's degree.

A grade average of B must be maintained in graduate course work.

Reading ability in two foreign languages is required for the doctorate. German, French, or Russian are usually taken, but alternatives may be substituted upon petition.

Admission to graduate study does not imply admission to candidacy for a degree. The student should seek admission to candidacy approximately one year before he, in consultation with his Advisory Committee, deems that he will have completed the requirements for his doctorate. A student may be accepted as a candidate by his Advisory Committee after 1) completing the equivalent of two academic years of graduate study, 2) completing at least one semester in residence at the University or Alaska, 3) meeting his foreign language requirement, 4) obtaining approval by his Advisory Committee of the title and synopsis of his dissertation, and 5) passing a qualifying examination set by his Advisory Committee.

The dissertation, which is expected to represent the equivalent of at least one full academic year's work at the University of Alaska, must be a contribution to knowledge.

After submitting the dissertation, the candidate must pass an oral examination supporting his dissertation. The examining committee will consist of a minimum of five members: the candidate's Advisory Committee supplemented by additional members appointed by the dean, when the student is enrolled in a college, and by the Vice President for Research and Advanced Study.

All work toward the fulfillment of a doctor's degree must be completed within ten years.
THESES AND DISSERTATIONS

Two copies of the thesis or dissertation, typed and bound (original and first carbon), must be filed in the University Library. Departments may require additional copies. All records of work done in connection with the preparation of theses and dissertations are the property of the University and can be released with the permission of the head of the department and the Vice President for Research and Advanced Study after having been reproduced by the University.

EXTENDED REGISTRATION FOR GRADUATE STUDENTS

A student who is working towards a higher degree must be registered. A student whose only remaining requirement is the removal of a deferred grade in Thesis or Special Topics must request the Registrar to allow him Extended Registration, at no cost, at the beginning of each semester until the deferred grade is removed. With the request, the student must state the approximate time at which he expects to complete the work. Upon receipt of such a request, the Registrar refers the request to the Chairman of the Student's Advisory Committee. With his approval, the student is considered as enrolled in the current semester.
Colleges of the University

Arts and Letters

Behavioral Sciences and Education

Biological Sciences and Renewable Resources

Business, Economics and Government

Earth Sciences and Mineral Industry

Mathematics, Physical Sciences and Engineering
Language students "dial-a-lesson" in the modern, electronic language laboratory.
College of 
Arts and Letters

CHARLES J. KEIM—DEAN

The Humanities diversify the quest for knowledge in an era of specialization. Examining what men have thought and expressed, they keep knowledge current, expanding and general. Technique distinguishes them from subjects primarily using the empirical method of science, for there are truths which transcend verification. The study of languages breaks cultural barriers, directed reading builds appreciation, exposure to the fine arts quickens sensibility; and all, language, literature, and the arts, collaborate to make knowledge prevail and discovery imminent.

UNDERGRADUATE DEGREES—The College of Arts and Letters offers a Bachelor of Arts degree with majors in Art, English, French, German, Linguistics, Music, Philosophy, Russian, Spanish, and Speech (options in Public Address, Drama, and Broadcasting). The College offers minors for the Bachelor of Arts in these subjects and in Journalism. A major in Journalism is being planned for fall, 1966.

GRADUATE DEGREES—The College of Arts and Letters offers a Master of Arts degree in English and Master of Fine Arts degree in Creative Writing. Students also may earn both degrees in other fields through an interdisciplinary program.

ART DEPARTMENT

HELMUT G. VAN FLEIN—DEPARTMENT HEAD

DEGREE—BACHELOR OF ARTS

MINIMUM REQUIREMENTS FOR DEGREE—130 CREDITS

The program of the Art Department recognizes the responsibility of the Fine Arts within the Humanities. Courses in Art further and encourage independent, original and creative thinking. The language of art is universal and through it man’s creative and intellectual endeavors become more meaningful.

REQUIREMENTS FOR A B.A. DEGREE WITH AN ART MAJOR

1. Complete general requirements for a B.A. degree as listed on page 50.
2. Complete a minimum of 37 hours of credit in Art courses. A maximum of 54 hours of credit in Art courses may be counted toward the degree.
3. Complete the following courses in Art:
   - Art 105-106—Freehand Drawing ........................................ 4 credits
   - Art 207-208—Beginning Printmaking ................................... 4
   - Art 211-212—Beginning Sculpture ....................................... 6
   - Art 213-214—Beginning Oil Painting .................................... 6
   - Art 261-262—History of World Art ..................................... 6
   - Art 307—Intermediate Printmaking .................................... 2
   - Art 311—Intermediate Sculpture ....................................... 3
   - Art 313—Intermediate Oil Painting
     and
   - Art 407-408—Advanced Printmaking ................................... 4
   or
   - Art 411-412—Advanced Sculpture ..................................... 6
   or
   - Art 413-414—Advanced Oil Painting ................................... 4
4. Transfer students who are candidates for the B.A. Degree with a major in Art must complete a minimum of 18 hours of credits in Art courses while in residence.
5. The Department of Art advises Art students to use French or German to meet their foreign language requirements.

A minor in Art requires 12 hours of approved Art courses.
ART PROGRAM FOR TEACHERS

Students who are preparing to teach Art must complete the requirements for an Education minor as required by the Department of Education.

For course descriptions, see page 109.

ENGLISH DEPARTMENT

JOSEPH W. MEEKER—DEPARTMENT HEAD

DEGREES—BACHELOR OF ARTS, MASTER OF ARTS, MASTER OF FINE ARTS

MINIMUM REQUIREMENTS FOR DEGREE: B.A.—130 CREDITS

M.A.—30 ADDITIONAL CREDITS

Writing and reading distribute ideas and make them available to all. Courses in the writing of English perfect expression, encourage creativity; the study of literature both delights and builds a regard for scholarship. Through its writing courses, its courses in language and literature, the department offers much to developing minds.

REQUIREMENTS FOR A B.A. DEGREE WITH AN ENGLISH MAJOR

1. Complete general requirements for a B.A. degree as listed on page 65.
2. Complete 33 credits in English beyond English 101 and 102, including:
   Engl. 239—Form and Technique of Poetry ........................................... 3 credits
   or
   Engl. 240—Form and Technique of Fiction ........................................... 3 credits
   Not required of Junior and Senior transfer majors
   Engl. 423—Elizabethan Drama ......................................................... 3 credits
   or
   Engl. 424—Shakespeare ..................................................................... 3 credits
   Engl. 421—Chaucer ........................................................................... 3 credits
   Engl. 472—History of the English Language ........................................ 3 credits

A minor in English requires 18 credits beyond English 101 and 102, including:
   Engl. 421—Chaucer ........................................................................... 3 credits
   or
   Engl. 472—History of the English Language ........................................ 3 credits
   Engl. 423—Elizabethan Drama ......................................................... 3 credits
   or
   Engl. 424—Shakespeare ..................................................................... 3 credits

For course description, see page 126.

REQUIREMENTS FOR A M.A. DEGREE IN ENGLISH

1. A minimum of 30 credits of approved courses including English 697-698, Thesis 6 credits.
2. Completion of the general graduate degree requirements listed on page 51.

For course descriptions, see page 126.

REQUIREMENTS FOR M.F.A. DEGREE IN CREATIVE WRITING

1. Graduate creative writing courses ......................................................... 12 credits
2. English electives .............................................................................. 15 credits
3. Interdisciplinary electives ................................................................. 12 credits
4. Thesis ............................................................................................... 9 credits

JOURNALISM DEPARTMENT

JIMMY BEDFORD—DEPARTMENT HEAD

The complex world of today demands a tremendous corps of people with diverse backgrounds to write the material which appears in the rapidly expanding media of communication. Such writers inform, interpret, entertain and guide. The students may select courses which will enable them to communicate more effectively with the written word.

A major in Journalism is being planned for fall, 1966, but details were not available when the catalog went to press. For latest information write the department head. A Journalism minor is also offered.

For course descriptions, see page 135.
LINGUISTICS AND FOREIGN LANGUAGES DEPARTMENT

BRUCE R. GORDON—DEPARTMENT HEAD

DEGREE—BACHELOR OF ARTS

MINIMUM REQUIREMENTS FOR DEGREE—130 CREDITS

In a shrinking world Americans increasingly need to communicate directly with other peoples in order to achieve mutual understanding. Whether it be Eskimo or English, the language of a people embodies its unique culture and way of thinking and feeling. Therefore, to know only one language is to think in only one way.

Linguistics is the science of language. The study of linguistics and of foreign languages and literatures liberates the student from the confines of his own culture and also makes his own culture more meaningful to him.

REQUIREMENTS FOR A B.A. DEGREE WITH A FOREIGN LANGUAGE OR
LINGUISTICS MAJOR OR MINOR

Majors are offered in French, German, Linguistics, Russian, and Spanish.
1. Complete general requirements for a B.A. degree as listed on page 50, including foreign language requirement.
2. Complete 26 credits beyond first year in the major language.
3. Complete 3 credits in a Linguistics course.
   A minor in a foreign language requires four semesters (12 credits) of study in that language beyond the 102 level.

For a major in Linguistics:
1. Complete general requirements for a B.A. degree as listed on page 50, including foreign language requirement.
2. Complete 4 semesters (12-16 credits) in language other than that offered as fulfillment of foreign language requirements towards the B.A. degree. Both languages must be chosen from French (or Latin or Spanish), Greek, German, or Russian.
3. Complete 15 credits in Linguistics courses.
   A minor in Linguistics requires 12 credits in Linguistics.

Audio-lingual practice in the Language Laboratory is an integral part of all elementary and intermediate language courses.

MUSIC DEPARTMENT

CHARLES W. DAVIS—DEPARTMENT HEAD

DEGREE—BACHELOR OF ARTS

MINIMUM REQUIREMENTS FOR DEGREE—130 CREDITS

The curricula are designed to satisfy two principal objectives:

Culturally, to teach musical skills, knowledges, appreciations, and attitudes that in combination with the other arts and humanities contribute to an enriched life.

Professionally, to prepare teachers and musicians who, in addition to the above, are proficient in professional leadership. In the teaching of students as public school music teachers, the necessary specialization in the fields of music and education is adequately provided for in the curricula leading to the B.A. degree.

The various music organizations maintained by the department offer participation experiences for students in all colleges of the University.

For course descriptions, see page 142.

REQUIREMENTS FOR A B.A. DEGREE WITH A MAJOR IN MUSIC
OR MUSIC EDUCATION

For a major in Music:
1. Complete general requirements for a B.A. degree listed on page 50.
2. Complete 40 credits in Music including:
   Music 131-132—Basic Theory .............................................. 6 credits
   Music 231-232—Advanced Theory .......................................... 6
   Music 321-322—History of Music ......................................... 4
   Music 331-332—Form and Analysis ...................................... 2
   Applied Music, to include 8 credits of private lessons
   and 8 credits of ensemble participation ................................ 16
3. Prior to graduation, satisfy an examination in piano proficiency.

For a major in Music Education:
1. Complete general requirements for a B.A. degree listed on page 50.
2. Complete 40 credits in Music including:
   Music 131-132—Basic Theory .......................... 6 credits
   Music 231-232—Advanced Theory ...................... 6
   Music 321-322—Music History .......................... 6
   At least 6 credits from:
   Music 315-316—Instrumental Methods .................. 4
   Music 415-416—Instrumental Methods .................. 4
   Applied Music, to include 6 credits of private lessons and 10 credits of
   ensemble participation, to include 2 semesters of a vocal ensemble. 16
3. Complete a minor in Education, including either Music 343 or Music 344.
4. Prior to graduation, satisfy an examination in piano proficiency.
   A minor in Music requires 12 credits in Music beyond Freshman courses.

Elective (2nd Minor) .............. 2  
Elective (Social Science) .......... 3  

*Although the Music Department does not require that students include both Music 343 and 344 in the curriculum, both are recommended.

PHILOSOPHY DEPARTMENT

RUDOLPH W. KREJCI—DEPARTMENT HEAD

The courses in Philosophy are designed to confront the student with the fundamental problems of Western philosophical heritage and introduce him to independent reflection on them, thus broadening his perspectives for the various areas of specialization in science, the social sciences and humanities.

REQUIREMENTS FOR A B.A. DEGREE WITH A PHILOSOPHY

MAJOR OR MINOR

1. Complete general requirements for a B.A. degree.
2. Complete a year sequence in mathematics.
3. Complete 30 credits in Philosophy, including
   Phil. 201—Introduction to Philosophy .......... 3 credits
   Phil. 204—Introduction to Logic .......... 3
Choose 2 courses out of the following:
- Phil. 21—Aesthetics .................................................. 3 credits
- Phil. 332—Ethics ...................................................... 3
- Phil. 341—Epistemology ............................................. 3
- Phil. 342—Metaphysics ................................................ 3
- Complete Phil. 351-352—History of Philosophy ............. 6
- Complete Phil. 471—Contemporary Philosophical Problems 3

Choose two of the following:
- Phil. 481—Philosophy of Science .................................. 3
- Phil. 482—Comparative Religion .................................. 3
- Phil. 484—Philosophy of History ................................... 3
- Complete one course Phil. 493 or 494—Special Topics ...... 3

4. A minor in Philosophy requires 15 credits of approved Philosophy courses.
   For course descriptions, see page 145.

SPEECH, DRAMA, AND RADIO DEPARTMENT

LEE H. SALISBURY—DEPARTMENT HEAD

DEGREE—BACHELOR OF ARTS

MINIMUM REQUIREMENTS FOR DEGREE—130 CREDITS

Throughout the ages man has made his thoughts and feelings known to others through the spoken word. At this time, perhaps more than ever before, it is recognized that if man is to take an active part in his society he must express himself clearly and effectively. The course offerings in Public Speaking are a means to this end.

The media of Theater and Broadcasting provide a more dramatic framework through which ideas and feelings may be expressed. Performance is the central means of study; individual development takes place within the framework of group activity.

The Speech, Drama, and Radio Department offers elective courses leading to a major or minor in Speech with options in Public Address, Drama, and Broadcasting.

REQUIREMENTS FOR A B.A. DEGREE WITH A SPEECH MAJOR

1. Complete general requirements for B.A. degree listed on page 50.
2. Complete 24 credits in Speech beyond Speech 211, including:
   - Speech 221—Introduction to Theater .......................... 3 credits
   - Speech 231—Introduction to Broadcasting ..................... 3
   - Speech 315—Phonetics ............................................ 2
   - Speech 316—Voice and Diction .................................. 2

3. A Speech major may elect to take an option in Public Address by adding the following courses to those specifically required in 2. (Above)
   - Speech 212—Public Speaking I .................................. 2
   - Speech 313—Argumentation and Debate .......................... 2
   - Speech 314—Discussion .......................................... 2
   - Speech 317—Oral Interpretation .................................. 3

4. A Speech major may elect to take an option in Drama by adding the following courses to those specifically required in 2. (Above)
   - Speech 223—Acting I .............................................. 3
   - Speech 325—Theater Production .................................. 3
   - Speech 327—Makeup for Theater .................................. 3
   - Speech 425—Directing or
   - Speech 323—Acting II ............................................ 3
   - Psychology 101—Introduction to Psychology ..................... 3

5. A Speech major may elect to take an option in Broadcasting by adding the following courses to those specifically required in 2. (Above)
   - Speech 237—Announcing ......................................... 2
   - Speech 333—Writing for Radio and Television .................. 3
   - Speech 334—Radio-Television Advertising or
   - Speech 431—Radio-Television News ............................. 3
   - Speech 335—Broadcast Production .............................. 3

6. A minor in Speech requires 12 credits of approved Speech electives.
   For course descriptions, see page 155.
COLLEGE OF BEHAVIORAL SCIENCES AND EDUCATION

CHARLES K. RAY—DEAN

The College of Behavioral Sciences and Education provides students an opportunity to develop an understanding of man in relation to his social, psychological and cultural background. Such knowledge serves to broaden the student's concept of life and conditions of society and to provide a foundation for service in specific professional fields.

UNDERGRADUATE DEGREES—The College has programs that lead to Bachelor of Arts degrees in Anthropology, Geography, Psychology, and Sociology. The Bachelor of Education degree is awarded to students majoring in Education.

GRADUATE DEGREES—A program leading to the Master of Education degree is offered to qualified students.

ANTHROPOLOGY AND GEOGRAPHY DEPARTMENT

DEGREES—BACHELOR OF ARTS AND BACHELOR OF SCIENCE

GRADUATE STUDY

See page 51.

MINIMUM REQUIREMENTS FOR DEGREE—130 CREDITS

The Department offers undergraduate level courses in Anthropology and Geography, and opportunities for research. A major can be obtained in both fields. Anthropology and Geography contribute to an understanding of the complex problems of human behavior; cultural and social organization and the relationship of man to the various environments. Archaeological and human ecological research carried out in the field and library provides information about past and present modes of living and of origins and distribution of peoples and cultures.

REQUIREMENTS FOR A B.A. DEGREE OR A B.S. DEGREE

WITH AN ANTHROPOLOGY MAJOR

1. Complete general requirements for a B.A. or B.S. degree as listed on page 50.
2. Complete 20 credits beyond Anthropology 101 and 212, including:
   Anth. 304—Africa .................................................. 3 credits
   Anth. 312—North American Archaeology .................................. 3
   Anth. 331—Primitive Religion ......................................... 3
   Anth. 335—North American Ethnology .................................. 3
   Anth. 336—Ethnology of Central and South America .................... 3
   Anth. 342—Alaska Natives ............................................. 3
   Anth. 423—Social Anthropology ...................................... 3

3. Complete the following:
   Soc. 101—Introduction to Sociology .................................. 3
   Psy. 101—Introduction to Psychology .................................. 3
   Geog. 201—Elements of Physical Geography ............................. 3
   Geog. 316—Pleistocene Environment .................................. 3
   Geog. 402—Man and Nature ........................................... 3

A minor in Anthropology requires 12 hours of approved Anthropology courses.

For course descriptions, see page 108.
REQUIREMENTS FOR A B.A. DEGREE OR B.S. DEGREE WITH A GEOGRAPHY MAJOR

1. Complete general requirements for a B.A. or B.S. degree as listed on page

2. Complete 20 credits in geography beyond Geography 101, including:
   - Geog. 201—Elements of Physical Geography 3
   - Geog. 316—Pleistocene Environment 3
   - Geog. 327—Cold Lands 3
   - Geog. 401—Weather and Climate 3
   - Geog. 402—Man and Nature 3
   - Geog. 491—Seminar 3

3. Complete the following:
   - Land Res. 101—Conservation of Natural Resources 2
   - Biol. 303—Principles of Ecology 3
   - Geol. 101—General Geology 4
   - Geol. 102—Historical Geology 4
   - Anth. 101—The Study of Man 3
   - Anth. 212—Human Origins 3

A minor in Geography requires 12 hours of approved Geography courses.

For course descriptions, see page 129.

EDUCATION DEPARTMENT

CHESTER E. YOUNGBLOOD—DEPARTMENT HEAD

DEGREES—BACHELOR OF EDUCATION AND MASTER OF EDUCATION

MINIMUM REQUIREMENTS FOR DEGREE: B.Ed.—130 CREDITS

M.Ed.—30 ADDITIONAL CREDITS

The Education Department offers curricula designed to prepare personnel for teaching in elementary and secondary schools. Students are introduced to fundamental problems of education in the contemporary world through courses designed to develop perspective and understanding of the relations of education to society. Courses provide information and practice in the development of instructional materials and the understanding of methods of instruction. Students are formally admitted to the program of teacher education on the basis of multiple criteria of their ability to make a positive contribution to the educational profession.

CERTIFICATION—Students may qualify for teaching certificates in various states only by planning their programs to meet specific requirements. Certificates are issued by the appropriate state department of education. In Alaska, certificates are granted by the Alaska Department of Education in Juneau. Students who obtain the B.Ed. degree will meet the current academic requirements for Alaskan certification. Any student minorin in Education must meet the Alaska certification requirements. Students seeking a minor in Education should consult with the Head of the Education Department during their freshman year to obtain specific requirements.

ADMISSION TO TEACHER EDUCATION—Any student wishing to prepare for teaching through the University of Alaska must formally apply for admission to teacher education. Students should consult with the Head of the Education Department at the beginning of his sophomore year to secure procedure for formal application for admission to the Teacher Education Program. Enrollment in education courses in no way implies admission to the Program of Teacher Education.

REQUIREMENTS FOR THE B.Ed. DEGREE WITH AN ELEMENTARY EDUCATION MAJOR

1. Military Science or Physical Education (2 years) 6-4 credits

2. Humanities (Art, English, Languages, Linguistics, Music, Philosophy, Speech) 20
   a. Required Courses:
      - English 101 and 102—Composition & Modes of Literature 6
   b. Recommended Courses:
      - English 213—Advanced Exposition 3
      - Music 243—Music for the Classroom Teacher 3
      - Philosophy 201—Introduction to Philosophy 3
      - Speech 211—Public Speaking I OR Speech 316—Voice and Diction 2

3. Social Sciences (Anthropology, Economics, Geography, History, Home Economics 236, Political Science, Psychology, Sociology) 24
   a. Required Courses:
      - History 117-118—European History OR History 131-132—History of the U.S. 6
      - Political Science 101-102—American Government 6
      - Psychology 101—Introduction to Psychology 3
      - Psychology 305—Child Development (formerly Psy. 251 and Psy. 301) 5
b. Recommended Courses:
  Auth. 101—The Study of Man
  Anth. 342—Alaska Natives
  Economics 121-122—Principles of Economics
  Geography 101—Introduction to Geography
  History 341—History of Alaska
  Sociology 101-102—Introduction to Sociology

4. Mathematics

The two following courses:
  *Math 121—Introduction to Modern Algebra and Analysis
  Math 205—Mathematics for Teachers
  *Math 115—Foundations of Mathematics acceptable if completed previously.

5. Natural Sciences (Anthropology 302, Biological Sciences, Chemistry, Geography 201 & 401, Geology, Physics)

6. Education (students must maintain a 2.00 average in all education courses)

a. Required Courses:
  Ed. 313—Educational Psychology
  Ed. 332—Tests and Measurements
  Ed. 459—The Teaching of Reading
  *Ed. 452—Student Teaching
  *Candidates who have taught successfully three years in the public elementary schools may petition to be excused from Ed. 452.

b. Nine credits from the following courses:
  Ed. 301—Social Studies for Elementary Teachers
  Ed. 302—Language Arts for Elementary Teachers
  Ed. 304—Literature for Children
  Ed. 306—Teaching of Science in Elementary Schools
  Ed. 307—Teaching of Arithmetic (formerly Ed. 206)
  Ed. 311—Audio-Visual Methods and Materials (formerly Ed. 202)
  Ed. 323—Small Schools

3. Six credits from the following courses:
  *Ed. 121—Introduction to Education
  Ed. 345—Sociology of Education
  Ed. 348—History of Education in the U. S.
  Ed. 422—Philosophy of Education
  Ed. 426—Principles and Practices of Guidance
  **Ed. 441—School Law
  Ed. 446—Public School Organization, Control & Support
  *Ed. 121 and 441, if completed previously, are applicable to the above 6 credits.

7. A total of 36 credits (including 12 upper division credits) in any two of the following fields, with a minimum of 12 credits in either field:

Anthropology
Art
Biological Sciences
Chemistry
*Classics
Economics
English
French
Geography
Geology
German
History
Linguistics
Mathematics
Music
Philosophy
Physics
Political Science
Psychology
Russian
Spanish
Speech
Sociology

**Course has been eliminated.

8. Forty-eight credits of upper division courses, twenty-four of which must be completed at the University of Alaska.

9. Sufficient free electives to total 130 credits.

REQUIREMENTS FOR THE B.ED. DEGREE WITH A SECONDARY EDUCATION MAJOR

1. Military Science or Physical Education (2 years) — 6-4 credits
2. Humanities (Art, English, Languages, Linguistics, Music, Philosophy, Speech) — 20
   a. Required Courses:
      English 101 and 102—Composition & Modes of Literature
   b. Recommended Courses:
      English 213—Advanced Exposition
      Philosophy 201—Introduction to Philosophy
      Speech 211—Public Speaking 1 OR Speech 316—Voice and Diction

6-4 credits
3. Social Sciences (Anthropology, Economics, Geography, History, Home Economics 236, Political Science, Psychology, Sociology) 24
   a. Required Courses:
      History 117-118—European History OR History 131-132—History of the U.S. 6
      Political Science 101 and 102—American Government 6
      Psychology 101—Introduction to Psychology 3
      Psychology 252—Psychology of Adolescence (formerly Psy. 302) 3
   b. Recommended Courses:
      Anth. 101—The Study of Man 3
      Anth. 342—Alaska Natives 3
      Economics 121 and 122—Principles of Economics 6
      History 341—History of Alaska 3
      Sociology 101 and 102—Introduction to Sociology 6
4. Mathematics and Natural Sciences (Anthropology 302, Biological Sciences, Chemistry, Geography 201 & 401, Geology, Physics) 8
5. Education (students must maintain at least a 2.00 average in all education courses) 24
   a. Required Courses:
      Ed. 313—Educational Psychology 3
      Ed. 332—Tests and Measurements 3
      Ed. 402 or 406 or 407 or 408—Methods 3
      *Ed. 452—Student Teaching 6
   *Candidates who have taught successfully three years in the public secondary schools may petition to be excused from Ed. 452.
   b. Six credits from the following courses:
      *Ed. 121—Introduction to Education 2
      Ed. 345—Sociology of Education 3
      Ed. 348—History of Education in the U.S. 3
      Ed. 421—Secondary Education (formerly Ed. 321) 3
      Ed. 422—Philosophy of Education 3
      Ed. 446—Public School Organization, Control, and Support 3
      *Students who took Ed. 121 before it was eliminated need only three other credits from (b) above.
   c. Three units of education electives selected from the following:
      Ed. 311—Audio Visual Methods and Materials (formerly Ed. 202) 3
      Ed. 323—Small Schools 2
      Ed. 426—Principles and Practices of Guidance 3
      *Ed. 431—Curriculum Development 3
      *Ed. 441—School Law 2
   *These courses have been eliminated but are applicable if completed previously.
6. Teaching Majors and Minors (students must maintain at least a 2.00 average in their teaching majors).
   Option A:
   Complete a teaching major of 24 to 36 approved credits and a teaching minor of 12 to 24 approved credits for a total of 48 credits of which at least 18 must be upper division. See advisor.
   Option B:
   Complete an integrated teaching major-minor of 48 approved credits. See advisor.

MAJOR OR MINOR (Option A)

Art
Biological Sciences
Business Education
Chemistry
English
**Foreign Language
History
Home Economics
Mathematics
Music
***Physical Education
Physics
Speech

*Approved for History Major only.
**Confer with Head of the Department of Education.
***See page 50 for requirements for B.Ed. Degree with a major in Physical Education.
****No longer offered by the University.
*****Approved for History and Business Education Teaching Majors only.

MINOR ONLY (Option A)

****Classics
*****Economics
*Geography
Journalism
*Political Science
*Sociology

INTEGRATED MAJOR-MINOR
(Option B)

General Science
Social Science
Earth Sciences
Credits earned in fulfillment of (2), (3), and (4) above may be applied toward the teaching major and teaching minor. The student is responsible for obtaining and keeping current his copy of the courses required for his teaching major and minor. Any deviations from the specified courses must be approved by written petition to the Head of the Education Department.

7. Forty-eight credits of upper division courses, twenty-four of which must be completed at the University of Alaska.

8. Sufficient free electives to total 130 credits.

SECONDARY TEACHING CERTIFICATES FOR MAJORS IN OTHER DEPARTMENTS

All majors in other departments who wish to obtain an Alaskan secondary teaching certificate should confer with the Head of the Education Department in their freshman year to obtain course requirements and application procedure for admission to teacher education. It is essential that the student have the necessary prerequisites and admission to teacher education for placement in student teaching in the public schools. The following courses should be taken at the indicated times:

<table>

</table>

*Students must maintain a 2.00 average in these courses.

REQUIREMENTS FOR A. M.Ed. DEGREE IN EDUCATION

1. A satisfactory score on a graduate entrance examination.
2. Completion of minimum of 30 credits of approved courses including methods of educational research and an independent project or thesis.
3. One year of satisfactory teaching experience or administrative experience or reasonable equivalency.
4. The equivalent of an undergraduate major in Education.
5. Passing a comprehensive examination.
6. Completion of the general graduate degree requirements listed on page 51. For course descriptions see page 120.

HEALTH, PHYSICAL EDUCATION AND RECREATION DEPARTMENT

FRANCIS F. PYNE—DEPARTMENT HEAD

The professional curriculum in physical education is designed to prepare qualified students to teach physical education, to coach athletic teams, and to direct recreational programs according to the needs of the State of Alaska. The curriculum provides for either a major or a minor in physical education to be coupled with the requirements of the Department of Education's teacher education program.
REQUIREMENTS FOR A B.ED. DEGREE WITH A PHYSICAL EDUCATION MAJOR

1. Complete the general requirements for a B.Ed. degree as follows:
   a. Military Science: 6 credits
   b. Physical Education:
      Women majoring in P.E. will complete P.E. 101 and P.E. 102.
      Men majoring in P.E. are exempt from required physical education (P.E. 105, 106, 205, 206).
   c. Humanities: 13 credits
      Art 261 or Music 123; English 101, 102; Philosophy 201; Speech 211.
   d. Social Sciences: 18 credits
      Anthropology 342; Economics 121; History 341; Psychology 101, 252; Sociology 101.
   e. Mathematics, Natural Science, Physical Science: 16 credits
      Biology 105; Chemistry 104; Mathematics 121.
   f. Education: 18 credits
      Education 313, 332, 406, 426, 452.

2. Complete the following required professional courses:
   P.E. 111—Principles of Physical Education 4 credits
   P.E. 142—Personal and Community Health 3
   P.E. 146—First Aid 2
   P.E. 220—Physical Education for the Elementary School 3
   P.E. 331—Sports Officiating 2
   P.E. 358—History of Physical Education 3
   P.E. 425—Organization and administration of Physical Education 3
   P.E. 440—Prevention and Care of Athletic Injuries 2
   P.E. 103—Fundamentals of Sports—Tennis and Badminton 1
   P.E. 211—Fundamentals of Sports—Volleyball and Soccer 1
   P.E. 212—Fundamentals of Sports—Recreational Activities 1
   P.E. 213—Fundamentals of Sports—Swimming 1
   P.E. 214—Fundamentals of Sports—Skiing 1
   P.E. 215—Fundamentals of Sports—Tumbling and Gymnastics 1
   P.E. 216—Fundamentals of Sports—Rhythms 1
   P.E. 301—Techniques in Physical Education—Basketball (Men) 2
   P.E. 303—Techniques in Physical Education—Track & Field 2
   P.E. 302—Techniques in Physical Education—Team Sports (Women) 2
   P.E. 400—Techniques in Physical Education—Aquatics & Rhythms 2
   P.E. 401—Techniques in Physical Education—Aquatics & Rhythms 2

3. Teaching minor (will depend upon minor chosen.)

4 Electives to total 130 credits.

Completion of the following courses is required for a MINOR in Physical Education.

   P.E. 111—Principles of Physical Education 4 credits
   P.E. 146—First Aid 2
   P.E. 220—Physical Education for the Elementary School 3
   P.E. 425—Organization and Administration of Physical Education 3
   P.E. 440—Prevention & Care of Athletic Injuries—Required for MEN only 2
   P.E. 103—Fundamentals of Sports—Tennis and Badminton 1
   P.E. 211—Fundamentals of Sports—Volleyball and Soccer 1
   P.E. 214—Fundamentals of Sports—Skiing 1
   P.E. 215—Fundamentals of Sports—Tumbling & Gymnastics 1
   P.E. 216—Fundamentals of Sports—Rhythms 1
   P.E. 301—Techniques in Physical Education—Basketball (Men) 2
   P.E. 302—Techniques in Physical Education—Track & Field 2
   P.E. 303—Techniques in Physical Education—Team Sports (Women) 2

HOME ECONOMICS DEPARTMENT

LUCILE TROST—DEPARTMENT HEAD

DEGREE—BACHELOR OF SCIENCE

MINIMUM REQUIREMENTS FOR DEGREE—130 CREDITS

This curriculum strives to provide for preparation in professional careers in Home Economics and to offer students a sound background in nutrition, textiles, child development, foods and clothing as well as experience in the liberal arts.

Science Requirement—A minimum of 12 credits in Natural or Physical Sciences is required.

All electives must be approved by the Head of the Department. Approximately sixty credit hours must be liberal, including natural and social sciences and the humanities.

TEACHING CERTIFICATES—Home Economics graduates may qualify for teaching Vocational Home Economics. They may obtain an Alaskan teaching certificate by completing Education 407, Methods of Teaching Home Economics, and meeting the other requirements of the State Department of Education.

A minor in Home Economics requires a minimum of 12 approved credits in Home Economics.

For course descriptions, see page 134.

**MILITARY SCIENCE DEPARTMENT**

**LIEUTENANT COLONEL JOHN B. DEMARCUS—DEPARTMENT HEAD**

The mission of the Reserve Officers Training Corps is to produce junior officers who by their education, training, and inherent qualities are suitable for continued development as officers in the United States Army; to give students such basic military training as will be of benefit to themselves and to the military service; and to assist in qualifying students for positions of leadership in industries and professional careers.

The program of instruction prescribed by the Department of the Army for Senior Division R.O.T.C. is divided into the Basic Course for freshmen and sophomores, and the Advanced Course for juniors and seniors.

**BASIC COURSE**—Required. All regularly enrolled, physically fit male students, without previous military training, who are citizens of the United States and are between the ages of 14 and 23 years, are required to satisfactorily complete the Basic Course R.O.T.C.

**ADVANCED COURSE**—Elective. Those students who successfully complete the Basic Course may apply for enrollment in the Advanced Course. Candidates must be physically qualified, recommended by the PMS and approved by the University President. Veterans may be allowed credit for prior active Federal Service in lieu of the Basic Course for the purpose of admission to the Advanced Course.

A contract, signed by the students who enroll in the Advanced R.O.T.C. courses, makes satisfactory completion of these courses a prerequisite for graduation.
FLIGHT TRAINING—Department of the Army sponsors an Army Flight Training program for senior R.O.T.C. cadets at the University of Alaska. This training program consists of 73 hours of instruction at a civilian flying school in the Fairbanks area. Successful completion of the course qualifies the student for a private pilot’s license. Prerequisites: Completion of the Junior year of R.O.T.C. and approval of the PMS and Academic Vice-President. Applicants must also pass the Army Flight Training physical examination and aptitude test.

Necessary texts, flying clothes, cost of lessons and transportation are furnished by the Department of the Army.

UNIFORMS AND EQUIPMENT—Members of the Basic and Advanced Course are furnished uniforms and texts by the United States Army.

Regulation gymnasium shoes, available through the University Book Store, are required to be worn during Leadership Laboratory (drill). These shoes must be purchased by the individual student.

ALLOWANCE—Advanced Course students receive a subsistence payment that amounts to approximately $1,000.00 for the two year period.

ACADEMIC MINOR—Eighteen credits in Military Science may be accepted by an academic advisor as fulfilling the graduation requirements for a minor.

AWARDS—Awards are made annually for outstanding achievement in R.O.T.C. band, drill team, rifle team, ski team; for best individual, squad, and platoon in drill; to the outstanding cadet in each class.

R.O.T.C. RIFLE TEAM—The R.O.T.C. rifle team competes in shoulder matches with both civilian and military teams in the state. Each year the team fires in Inter-collegiate Match in competition with west coast schools. Postal matches are fired against university and college teams throughout the United States. The finest target rifles, shooting coats and gloves, targets, and ammunition are available to all R.O.T.C. cadets at no cost. Varsity letters are awarded.

R.O.T.C. BAND AND DRILL TEAM—The R.O.T.C. band and drill team participate in the Annual Winter Carnival in Fairbanks, at formations of the R.O.T.C. Cadet Corps, and at functions on campus.

TRANSFER STUDENTS—Transfer students with less than sophomore standing are required to enroll in Military Science unless excused by the Professor of Military Science.

EXEMPTIONS FROM BASIC COURSE—Students who petition the Professor of Military Science for exemption from military training must enroll in the prescribed course and pursue the work of the course until they have been formally notified that they are exempt. Such petition must be filed with the Professor of Military Science not later than two weeks following date of registration.

DEFERMENT FROM DRAFT—Students, upon successful completion of the first semester Basic Course, and continued enrollment in R.O.T.C., may be deferred from induction under the provisions of the Universal Military Training and Service Act.

For course descriptions, see page 140.

PSYCHOLOGY AND SOCIOLOGY DEPARTMENT

FRANK Q. SESSIONS—DEPARTMENT HEAD

DEGREE—BACHELOR OF ARTS

MINIMUM REQUIREMENTS FOR DEGREE—130 CREDITS

Psychology seeks to guide the student in an understanding of himself and of others in the area of experience and reaction to the milieu.

The field of Psychology has relevance for students preparing for careers in law, medicine, social work, education, industrial relations, and government service.

Psychology majors are specifically prepared for graduate work in major universities throughout the United States.

Sociology is a field in social science concerned with the behavior of people in groups, particularly societies, culture, and institutional arrangements under which people live. It is concerned with contemporary civilization.
REQUIREMENTS FOR A B.A. DEGREE WITH A PSYCHOLOGY MAJOR

1. Complete general requirements for a B.A. degree as listed on page 50.

2. Complete 24 credits in psychology beyond Psy. 101, 102, including:
   Psy. 205—Statistics for Behavioral Sciences ........................................... 3 credits
   Psy. 213, 214—Experimental Psychology .................................................. 6 credits
   Psy. 304—Abnormal Psychology or
   Psy. 209—Social Psychology ..................................................................... 3 credits
   Psy. 491—Seminar in Human Behavior ....................................................... 2 credits

3. A minor in Psychology requires 12 approved credits in Psychology.

REQUIREMENTS FOR A B.A. DEGREE WITH A SOCIOLOGY MAJOR

1. Complete general requirements for a B.A. degree as listed on page

2. Complete 24 credits in Sociology beyond Sociology 101, 102, eighteen units of which
   must be upper division and must include:
   Soc. 434—Social Science Research Methods ........................................... 3 credits
   Soc. 491—Seminar in Human Behavior ....................................................... 2 credits

3. Complete nine units chosen from the following:
   Psy. 209—Social Psychology ..................................................................... 3 credits
   Soc. 304—Culture and Personality .............................................................. 3 credits
   Soc. 410—Social Theory ........................................................................... 3 credits
   Soc. 209—Urban Sociology ...................................................................... 3 credits
   Soc. 222—Family and Society .................................................................. 3 credits
   Soc. 205—Group Processes ....................................................................... 3 credits

4. Complete the following:
   Anth. 101—The Study of Man .................................................................. 3 credits

A minor in Sociology requires 12 elective credits in Sociology.

For course descriptions, see page 154.

An IBM 1620 Data Processing System forms the core of a campus-wide computer center.
Basketball is a major sport, along with swimming, skiing, hockey and riflery.
College of Biological Sciences and Renewable Resources

BRINA KESSEL—DEAN

Biology is an area of science in which many disciplines come to bear; in fact, biology is in large part the summation of these various disciplines. A thorough knowledge of biology, in both its pure and applied phases, is fundamental to the welfare of mankind. With these axioms in mind, the programs in the College of Biological Sciences and Renewable Resources are designed to give students an introduction to the humanities and social sciences, a background in mathematics and the physical sciences, a firm foundation in basic biological sciences, and advanced training in specialized fields. For more details, students should read descriptive materials in the departmental sections below—Biological Sciences Department, Land Resources and Agricultural Science Department, and Wildlife Management Department.

DEGREES—Bachelor of Arts in Biological Sciences, Botany, Zoology; Bachelor of Science in Biological Sciences, Botany, Fisheries Biology, Medical Technology, Wildlife Management, Zoology; Master of Science in Botany, Fisheries Biology, Wildlife Management, Zoology.

LAND RESOURCES AND AGRICULTURAL SCIENCE DEPARTMENT

ARTHUR S. BUSWELL—DEPARTMENT HEAD

The curriculum for the first two years is designed to provide the basic science foundation on which advanced courses are based. The curriculum is intended for students who expect to prepare for careers in wildland utilization (watershed management, forest resources, range management, recreation and conservation, etc.) and in agriculture.

Opportunities for summer employment are available through various State and Federal Agencies and through the University’s Agricultural Experiment Station.

CURRICULUM

FALL SEMESTER

FIRST YEAR 16 or 16½ CREDITS

Engl. 101—Comp. & Modes of Lit. 3
Biol. 105—Fund. of Biology 4
Mathematics 4
Chem. 101—General Chem. 4
P.E. or Mil. Sci. 1 or 1½

SECOND YEAR 17 or 17½ CREDITS

Phys. 103—Coll. Physics 4
Geol. 101—Gen. Geology 4
Econ. 121 3
Engl. 213—Adv. Comp. 3
Elective 2
P.E. or Mil. Sci. 1 or 1½

SPRING SEMESTER 16 or 16½ CREDITS

Engl. 102—Comp. & Modes of Lit. 3
Biol. 106—Fund. of Biology 4
Mathematics 4
Chem. 102—General Chem. 4
P.E. or Mil. Sci. 1 or 1½

SECOND YEAR 16 or 17½ CREDITS

Phys. 104—Coll. Physics 4
Approved Biology Elective 4 or 3
Engl. Elective 3
Soc. Sci. Elective 3
Elective 2
P.E. or Mil. Sci. 1 or 1½
BIOLOGICAL SCIENCES DEPARTMENT
BRINA KESSEL—DEPARTMENT HEAD
DEGREES—BACHELOR OF ARTS, BACHELOR OF SCIENCE, MASTER OF SCIENCE
MINIMUM REQUIREMENTS FOR DEGREE: B.A.—130 CREDITS
B.S.—130 CREDITS
M.S.—30 ADDITIONAL CREDITS

The curricula in the Biological Sciences Department are designed to give the student a broad education as well as a sound foundation in the basic principles of biology. Students pursuing either a B.A. or a B.S. degree may have majors in botany, zoology, or biological sciences. A major in medical technology is also available for B.S. degree candidates. The B.A. degree requirements include fewer credits in the major field, but give greater emphasis in the fields of social sciences and humanities and allow a greater breadth of subject matter in the curricula. The requirements for the B.S. degree include a foundation in the basic sciences as well as a stronger major within the Biological Sciences Department. Candidates for a B.S. degree may select either the general biology program (Program I), a more specialized option in Zoology, Vertebrate Zoology, or Botany (Program II), or a major in Medical Technology. Candidates who expect to teach in public secondary schools must be sure that Education requirements are met.

REQUIREMENTS FOR A B.A. DEGREE WITH A MAJOR IN BIOLOGICAL SCIENCES
1. Complete general requirements for a B.A. degree as listed on page 50.
2. Complete the following foundation courses:
   Biol. 105-106—Fund. of Biol. ........................................... 8 credits
   Mathematics, an approved year's sequence ........................................... 6
3. Complete the following required courses:
   Biol. 317-318—Comp. and Dev. Anatomy ........................................... 10
   Biol. 413—Cell Physiol., or Biol. 414—Comp. Physiol., or Biol. 416—
   Plant Physiol. ................................................................. 3-4
   Biol. 302—Genetics ................................................................. 3
   Biol. 303—Ecology, or one of the following:
   Biol. 234—Morph. and Anat. Vasc. Plants ........................................... 4
   Biol. 304—Ecology ................................................................. 3
   Biol. 331—Systematic Botany ...................................................... 4
   Biol. 416—Plant Physiology ...................................................... 3
4. Attend Biol. 491-492 (Seminar) during Junior and Senior years.
5. Complete requirements for an Education minor as required by the Department of Education.
   A minor in Biological Sciences requires 14 credits, consisting of Biol. 105-106, 302, and 303.

REQUIREMENTS FOR A B.A. DEGREE WITH A MAJOR IN BOTANY
1. Complete the general requirements for a B.A. degree as listed on page 50.
2. Complete the following foundation courses:
   Biol. 105-106—Fund. of Biol. ........................................... 8 credits
   Chem. 101-102—General Chemistry ........................................... 8
   Mathematics, an approved year's sequence ........................................... 6
3. Complete 22 credits in Biology, including:
   Biol. 234—Morph. and Anat. Vasc. Plants ........................................... 4
   Biol. 302—Genetics ................................................................. 3
   Biol. 303—Ecology ................................................................. 3
   Biol. 331—Systematic Botany ...................................................... 4
   Biol. 416—Plant Physiology ...................................................... 3
4. Attend Biol. 491-492 (Seminar) during Junior and Senior years.
   A minor in Botany requires Biol. 105-106 and 8 credits in Botany.

REQUIREMENTS FOR A B.A. DEGREE WITH A MAJOR IN ZOOLOGY
1. Complete the general requirements for a B.A. degree as listed on page 50.
2. Complete the following foundation courses:
   Biol. 105-106—Fund. of Biol. ........................................... 8 credits
   Chem. 101-102—General Chemistry ........................................... 8
   Mathematics, an approved year's sequence ........................................... 6
3. Complete 21 credits in Biology, including:
   Biol. 302—Genetics ................................................................. 3
   Biol. 317-318—Comp. and Dev. Anatomy ........................................... 10
   Biol. 413—Cell Physiol. ................................................................. 10
   or
   Biol. 305—Invert. Zool. ...................................................... 3-4
   Biol. 414—Comp. Physiol. ...................................................... 4
4. Attend Biol. 491-492 (Seminar) during Junior and Senior years.
   A minor in Zoology requires Biol. 105-106 and 8 credits in Zoology.
REQUIREMENTS AND CURRICULUM FOR A B.S. DEGREE WITH MAJORS IN BIOLOGICAL SCIENCES, BOTANY, OR ZOOLOGY

FALL SEMESTER

| CREDITS |
|-----------------|-----------------|
| FIRST YEAR     | SPRING SEMESTER |
| 16 or 16 1/2    | 16 or 16 1/2    |

REQUIREMENTS AND CURRICULUM FOR A B.S. DEGREE WITH A MAJOR IN MEDICAL TECHNOLOGY

To receive a Bachelor of Science Degree in Medical Technology, a student must have six semesters of collegiate training at an accredited college or university, three of which must be at the University of Alaska with a G.P.A. of at least 2.0, and he must fulfill all requirements of the University for the Bachelor of Science degree, plus the basic requirements as set forth by the Registry of Medical Technologists. The student then becomes a candidate to enter an affiliated school of medical technology, and if accepted, registers for Biol. 401 at the University of Alaska and spends a 12-month internship at the affiliated school. The University is affiliated with three ASCP-approved, non-denominational schools of medical technology—St. Luke’s Hospital School of Medical Technology, Spokane, Washington; Tacoma General Hospital School of Medical Technology, Tacoma, Washington; and The Swedish Hospital School of Medical Technology, Seattle, Washington. Upon the satisfactory completion of Biol. 401 and the other above-mentioned University requirements, the student is eligible to receive a Bachelor of Science degree from the University of Alaska. He also is eligible to take the registry examination as a Medical Technologist under standards set by the Board of Registry of the American Society of Clinical Pathologists. Upon registration, the graduate is privileged to add the initials M.T. (ASCP) after his name.

PREPARATORY CURRICULA—MEDICINE, DENTISTRY, NURSING,
VETERINARY MEDICINE

Students planning to become medical doctors, dentists, nurses, or veterinarians may enroll in the Biological Sciences Department. Most of the professional schools in these fields require one to three or four years of collegiate work before a student will be admitted. These years of preliminary academic work are offered by the Biological Sciences Department, where the student will follow a sequence of courses planned to meet the requirements of the particular professional field in which he is interested.

Most pre-medical students plan on four preliminary years. Usually these students follow a curriculum leading to a Bachelor of Arts degree with a major in Zoology and/or Chemistry or a curriculum leading to a Bachelor of Science degree with a major in Zoology or Chemistry, earning a bachelor's degree at the end of four years. Adjustments may be made to meet varying requirements. Pre-medical students who are accepted in medical school prior to finishing their bachelor's requirements and who have earned at least 100 hours of pre-professional work with a G.P.A. of 3.0 or better, may, upon the completion of certain course requirements, and upon the satisfactory completion of a year of medical school, petition to receive a bachelor's degree from the University of Alaska.

Pre-nursing students register as non-majors in the College of Biological Sciences and Renewable Resources. Course work is selected to meet the specific needs of individual students. In general, high school students interested in nursing should apply directly to an institution offering a full curriculum in nursing; those wishing to attend the University of Alaska should plan to transfer to an institution with a nursing program after one year.

STUDENTS FROM OTHER DEPARTMENTS

Students who wish a minor in the Department of Biological Sciences must have courses approved in advance by the Head of the Department of Biological Sciences. A minor will normally have requirements similar to those listed on page 50 for the B.A. degree.

Candidates for the Bachelor of Science degree in General Science wishing a major in Zoology, Botany or Biological Sciences must satisfy both the requirements of their major curriculum and those listed for B.A. degree majors on page 50.

REQUIREMENTS FOR A M.S. DEGREE WITH A BOTANY OR ZOOLOGY MAJOR

1. A minimum of 30 credits of approved courses, including Biol. 697-698, Thesis.
2. An examination attesting a reading knowledge of French, German, or Russian.
3. Completion of the general requirements for a graduate degree as listed on page 51.

For course descriptions, see page 111.

WILDLIFE MANAGEMENT DEPARTMENT
FREDERICK C. DEAN—DEPARTMENT HEAD

DEGREES—BACHELOR OF SCIENCE AND MASTER OF SCIENCE

MINIMUM REQUIREMENTS FOR DEGREE: B.S.—135 CREDITS
M.S.—30 ADDITIONAL CREDITS

Both the wildlife management and fisheries biology curricula in the undergraduate program in the Department of Wildlife Management are intended to provide a broad basic education and training. Holders of the bachelor's degree will be qualified to enter the management, law enforcement, and public information-education phases of wildlife work. Students contemplating careers in research, administration, advanced management work or teaching will find the bachelor's curricula solid foundations for graduate study. A program for teachers interested in conservation education is also available.

The geographic location of the University is particularly advantageous for the study of wildlife management. Spruce forest, aspen-birch forest, alpine tundra, bogs, and several types of aquatic habitats are within easy reach. Studies can be made in many other habitats ranging from the dense forests of Southeastern Alaska to the Arctic Coast.

Adequate study collections of plants and animals are available, and a 2,000-acre study area is near the campus. Undergraduates have ample opportunity for close association with the personnel of the Alaska Cooperative Wildlife Research Unit and the several local offices of the federal and state conservation agencies. These agencies usually hire a number of students for summer field work. Thus, an unusually good opportunity is available for students to gain experience and to make job connections.

Wildlife plays an extremely important part in the economy and recreation of Alaskans. Because of this, some courses in the department will be of interest to non-major students.
UNDERGRADUATE DEGREES—The Department of Wildlife Management offers a Bachelor of Science Degree with majors in Wildlife Management and Fisheries Biology.

GRADUATE DEGREES—The Department of Wildlife Management offers a Master of Science Degree in Wildlife Management and in Fisheries Biology.

**In Wildlife Management major, 15 credits of electives must be completed; 6 of these must be from the courses which will satisfy the University's social science requirement.

A proficiency equivalent to two college years of French, German, or Russian is required for graduation. Students with two to four years of one of these languages in high school may enter the third or fourth semester of the language or have the requirement waived, whichever is appropriate. Students entering this department are expected to have two high school years of one of these languages; students lacking this preparation must take 10 credits of first year language in college, thereby reducing their college electives.
All electives must be approved by the Head of the Department of Wildlife Management. A minimum of two months must be spent in the employ of an approved conservation agency before a student will be eligible for a bachelor's degree. Two typewritten copies of a report on the work done and the experience gained during this time must be approved by the Head of the Department. Demonstration of proficiency in swimming is required for graduation.

**REQUIREMENTS FOR A M.S. DEGREE WITH A MAJOR IN WILDLIFE MANAGEMENT OR FISHERIES BIOLOGY**

1. A minimum of 30 credits of approved courses, including Wildlife Management 697-698, Thesis, in the field of Fisheries Biology or Wildlife Management.

2. For Fisheries Biology, an examination attesting a reading knowledge of French, German, or Russian.

3. Complete general requirements for a graduate degree as listed on page 51.

   For course descriptions, see page 157.

**GRADUATE STUDY IN WILDLIFE MANAGEMENT**

The Department of Wildlife Management and the Alaska Cooperative Wildlife Research Unit cooperate in offering graduate work leading to the Master of Science degree. Thesis work can be done in either Fisheries or Wildlife Management. Persons desiring detailed information on the graduate program in Wildlife Management may obtain this from the Head, Department of Wildlife Management. The procedure to be followed in applying for admission to graduate study is outlined in the section on Admission to Graduate Study in this catalog.

The Alaska Cooperative Wildlife Research Unit offers a limited number of research assistantships; information on these and the Unit's program can be obtained from the Leader, Alaska Cooperative Wildlife Research Unit, University of Alaska, College, Alaska. Applications for these assistantships should be sent to the Unit Leader; such applications are supplementary to the application for admission for graduate study.

---

On the campus' west ridge the first two buildings of an 11-building complex for Arctic Research are completed.
Aquatic instruction, recreation and competitive events have a new, intercollegiate size swimming pool for a home.
College of Business, Economics and Government

The primary objective of the College is to provide courses of study which will prepare young men and women for careers of responsibility in private and public organizations and which will acquaint them with the kind of society in which they will live and work when they leave the University.

Specifically, the aims of the College are: (1) to educate students for positions in industry, government and other organizations which require analytical ability; (2) to provide those who wish to prepare themselves for positions of responsibility in industry and government with a basic understanding of the economic, political and social environment; (3) to offer courses in the fields of business, economics, history and political science which meet the needs of students who wish to major in any of these disciplines with the intention of preparing themselves for advanced study or entering the teaching profession; (4) to acquaint the students with the problems of economic, political and social development in Alaska and in the Northern region of which it is a part; and (5) to instruct students in social science research techniques.

DEGREES—The College offers the following degrees: Bachelor of Business Administration, Associate in Business Administration, and Bachelor of Arts.

GRADUATE STUDY
See page 51.

ACCOUNTING DEPARTMENT
HORACE W. DOMIGAN—DEPARTMENT HEAD
DEGREE—BACHELOR OF BUSINESS ADMINISTRATION WITH A MAJOR IN ACCOUNTING

MINIMUM REQUIREMENTS FOR DEGREE: 130 CREDITS

The Accounting Department offers an extensive program for those interested in the fields of general accounting, auditing, cost accounting and taxation. The objective of the program is to provide a strong business background through understanding of accounting and to train students for employment in accounting work.

GRADUATE STUDY
See page 51.

REQUIREMENTS FOR A B.B.A. DEGREE WITH A MAJOR IN ACCOUNTING
1. Complete requirements for a B.B.A. Degree listed on page 50.
2. Complete the following required courses:
   Acc. 315—Intermediate Accounting ................................................. 3 credits
   Acc. 316—Analysis of Financial Statements ..................................... 3
   Acc. 411—Federal and State Tax Accounting .................................... 3
   Acc. 416—Advanced Accounting .................................................... 3
   Acc. 417—Cost Accounting ............................................................ 3
   Acc. 418—Auditing .......................................................................... 3
   Approved upper division electives ................................................... 8-10
BUSINESS ADMINISTRATION DEPARTMENT

ROBERT C. HARING—DEPARTMENT HEAD

DEGREES—BACHELOR OF BUSINESS ADMINISTRATION WITH A MAJOR IN
ADMINISTRATION
BACHELOR OF BUSINESS ADMINISTRATION WITH A MAJOR IN
MARKETING
BACHELOR OF BUSINESS ADMINISTRATION WITH A MAJOR IN
FINANCE

MINIMUM REQUIREMENTS FOR DEGREE—130 CREDITS

The Business Administration Department offers professional training in the fields of administration, finance, and marketing to those individuals interested in entering industry or government upon graduation. The objective of the program is to prepare men and women to meet the complex problems of the political, economic, and social environment and to enable them to give efficient service to industry and government on the basis of their academic training.

GRADUATE STUDY

See Page 51.

REQUIREMENTS FOR A B.B.A. WITH A MAJOR IN ADMINISTRATION

1. Complete requirements for a B.B.A. Degree listed on page 50.
2. Complete the following required courses:
   B.A. 361—Industrial Relations .............................................. 3 credits
   B.A. 363—Production Management ........................................ 3
   B.A. 424—Managerial Economics ............................................. 3
   B.A. 480—Organization Theory .............................................. 3
   Approved Upper Division Electives ......................................14-16

REQUIREMENTS FOR A B.B.A. DEGREE WITH A MAJOR IN MARKETING

1. Complete requirements for a B.B.A. Degree listed on page 50.
2. Complete the following required courses:
   B.A. 343—Introduction to Marketing .................................. 3 credits
   B.A. 442—Marketing Institutions & Channels ......................... 3
   B.A. 443—Marketing Theory and Analysis of Market Change .......... 3
   B.A. 480—Organization Theory ............................................. 3
   Approved Upper Division Electives ......................................14-16

For course descriptions, see page 113.

REQUIREMENTS FOR A B.B.A. DEGREE WITH A MAJOR IN FINANCE

1. Complete requirements for a B.B.A. Degree listed on page 50.
2. Complete the following required courses:
   B.A. 323—Corporate Organization and Finance ......................... 3 credits
   B.A. 422—Corporate Financial Problems ..................................... 3
   B.A. 423—Investment Management ........................................ 3
   B.A. 359—Regulation of Industry .......................................... 3
   Approved Upper Division Electives ......................................14-16

For course descriptions, see page 113.

ECONOMICS DEPARTMENT

HOWARD A. CUTLER—ACTING DEPARTMENT HEAD

DEGREE—BACHELOR OF ARTS

MINIMUM REQUIREMENTS FOR DEGREE—130 CREDITS

Economics is the study of those social activities of man which are concerned with the production, distribution, and consumption of goods and services. In today's complex world, nearly all social phenomena and problems have economic aspects. Organized knowledge of the functioning of our economy and of its relations with other economic systems is therefore essential to an understanding of the world in which we live.

The Department considers its goal of teaching to be three-fold: (1) to provide students with basic tools of analysis and factual, statistical and descriptive materials which will assist them in discharging their duties as citizens, (2) to introduce students majoring in this department to the various fields of economics in order to prepare them for positions in business, government and graduate study, (3) to offer a course of study suitable for a minor in economics.
GRADUATE STUDY
See page 51.

REQUIREMENTS FOR A B.A. DEGREE WITH AN ECONOMICS MAJOR

1. Complete general requirements for a B.A. Degree listed on page 50.

2. Complete the following foundation courses:
   - Econ. 121-122—Principles of Economics ........................................ 6 credits
   - Hist. 131-132—History of the U.S. ............................................ 6
   - Math. 121, 122, 204 ................................................................. 11
   - P.S. 101-102—American Government ........................................... 6
   - Philosophy Electives ................................................................. 6
   - Behavioral Science: all in Psy. or in Soc. .................................. 6

3. Complete 27 credits of Economics as follows:
   - Econ. 321—Price and Allocation Theory ....................................... 3
   - Econ. 324—Income and Employment ............................................... 3
   - A student may take six credits for each of two of the following fields:
     - Econ. 337—Economic Development: Principles, Problems, and Policies
     - Econ. 432—Economic History of the U.S.
     - Econ. 435—Economics of Resources ........................................... 6
     - Monetary and Fiscal Economics
     - Econ. 350—Financial and Monetary Theory and Policy
     - Econ. 351—Public Finance and Taxation
     - B.A. 359—Regulation of Industry ............................................ 6
     - International Economics
     - Econ. 463—International Economics I ...................................... 6
     - Econ. 464—International Economics II .................................... 6

4. Approved Upper Division Economic Electives .................................. 9
   - A minor in Economics requires 15 credits of approved Economics electives.
   - For course descriptions, see page 119.

HISTORY DEPARTMENT
HERMAN E. SLOTNICK—DEPARTMENT HEAD
DEGREE—BACHELOR OF ARTS

MINIMUM REQUIREMENTS FOR DEGREE—130 CREDITS

The History Department seeks to make the student aware of the cultural heritage of mankind, the great problems that man has faced throughout history and how he has sought to solve them.

Through the study of history, a student may prepare himself for a career in teaching, in the public service, or for advanced work in history and the other social sciences.

GRADUATE STUDY
See page 51.

REQUIREMENTS FOR A B.A. DEGREE WITH A HISTORY MAJOR

1. Complete general requirements for a B.A. Degree listed on page 50.

2. Complete the following foundation courses:
   - Econ. 121—Principles of Economics ........................................... 3 credits
   - Hist. 117—Formation of European Civilization .............................. 3
   - Hist. 118—Development of Modern Europe ................................... 3
   - Hist. 131-132—History of the U.S. ........................................... 6
   - P.S. 101-102—American Government ........................................... 6

3. Complete 20 credits in History, including:
   - Hist. 475—Introduction to Historical Method ................................ 3
   - Approved Upper Division American History Electives ...................... 6
   - Approved Upper Division European History Electives ...................... 6

   - A minor in History requires 12 credits of History electives, 6 of which must be upper
     division.
   - For course descriptions, see page 132.
POLITICAL SCIENCE DEPARTMENT
DAVID E. CLARKE—DEPARTMENT HEAD

DEGREE—BACHELOR OF ARTS

MINIMUM REQUIREMENTS FOR DEGREE—130 CREDITS

The study of political science is the study of man's efforts to create social organizations and processes compatible with his environment. Political science is intimately related to all of the social science disciplines. It is the study of the dynamics of human behavior in the various cultural, national, and international spheres.

The student of political science may prepare for teaching or for advanced study in law and social science, or prepare himself for a career in public service.

GRADUATE STUDY

See page 51.

REQUIREMENTS FOR A B.A. DEGREE WITH A POLITICAL SCIENCE MAJOR

1. Complete the general requirements for a B.A. Degree listed on page 50.

OFFICE ADMINISTRATION DEPARTMENT

MELBA F. PELOSI—DEPARTMENT HEAD

DEGREES—BACHELOR OF ARTS WITH A MAJOR IN OFFICE ADMINISTRATION

MINIMUM REQUIREMENTS FOR DEGREE—130 CREDITS

ASSOCIATE IN BUSINESS ADMINISTRATION DEGREE WITH A MAJOR IN OFFICE ADMINISTRATION

MINIMUM REQUIREMENTS FOR ASSOCIATE DEGREE—60 CREDITS

The Department offers three courses of study in order to meet the different needs of those who plan to specialize in the field of office operations: (1) An extensive four-year program leading to the degree of Bachelor of Arts with a major in office administration. The objective of the curriculum is to provide the students with the knowledge, skills and abilities required of the efficient office administrator or executive secretary. (2) A four-year course leading to the degree of Bachelor of Arts with a major in Business Education. The objective of the curriculum is to prepare young men and women for the teaching of business subjects in the secondary schools. (3) An intensive two-year program in office administration leading to an Associate in Office Administration Degree.
REQUIREMENTS FOR A B.A. DEGREE WITH A MAJOR IN OFFICE ADMINISTRATION OR BUSINESS EDUCATION

1. Complete requirements for the B.A. Degree listed on page 50.

2. Complete the following required courses:
   - Acc. 215-216—Principles of Accounting 6 credits
   - O.A. 101-102—Shorthand (or approved electives) 6
   - O.A. 105—Intermediate Typewriting 2
   - O.A. 106—Advanced Typewriting 2
   - O.A. 201—Intermediate Stenography 3
   - O.A. 202—Advanced Stenography 3
   - O.A. 203—Office Machines 3
   - O.A. 231—Business Correspondence 3
   - O.A. 302—Secretarial Training 3

3. Social Science must include:
   - Econ. 121-122—Principles of Economics 6
   - B.A. 331—Business Law 3

4. Approved Upper Division Electives 8

5. The following courses are required for a minor in education:
   - Psy. 101—General Psychology 3
   - Psy. 292—Psychology of Adolescence 3
   - Ed. 213—Educational Psychology 3
   - Ed. 421—Secondary Education 3
   - Ed. 332—Tests and Measurements 3
   - Ed. 408—Methods of Teaching Business Education Subjects 3
   - Ed. 452—Directed Teaching 6

REQUIREMENTS FOR AN A.B.A. DEGREE WITH A MAJOR IN OFFICE ADMINISTRATION

1. Complete the following general requirements:
   - Acc. 215-216—Principles of Accounting 6
   - Econ. 121—Principles of Economics 3
   - Econ. 122 or P.S. 101 3
   - Eng. 101-102—Composition and Modes of Literature 6
   - Math. 110—Math of Finance 3
   - Sp. 211—Public Speaking 2
   - Soc. 101 or Psy. 101 3

2. Complete the following required courses in Office Administration:
   - O.A. 101-102—Shorthand (or approved electives) 6
   - O.A. 105—Intermediate Typewriting 2
   - O.A. 106—Advanced Typewriting 2
   - O.A. 201—Intermediate Stenography 3
   - O.A. 202—Advanced Stenography 3
   - O.A. 203—Office Machines 3
   - O.A. 208—Specialized Secretarial Skills 3
   - O.A. 231—Business Correspondence 3
   - Approved Electives 6
   - Total 60

Shh! Student announcer at work. University radio station KUAC-FM serves the community as well as being a laboratory for speech, radio and drama students.
One of the modern pieces of equipment in the library is this "microfilm reader."
College of
Earth Sciences
and Mineral Industry

EARL H. BEISTLINE—DEAN

The objectives of the College of Earth Sciences and Mineral Industry are: to prepare students for their place in the profession, community, state, nation and world; to carry on research and development work that will add to basic knowledge as well as assist in the discovery, recovery and utilization of mineral resources, and to provide more generalized instruction to students on campus and to interested persons in various communities in Alaska.

UNDERGRADUATE DEGREES—The College has programs that lead to Bachelor of Science Degrees in Geology, Geological Engineering, and Mining Engineering. A Bachelor of Arts Degree with a major in Geology may be earned.

GRADUATE DEGREES—Programs leading to a Master of Science Degree are offered in Geology, Mineral Industry Management, and Mineral Preparation Engineering.

The professional degree Mining Engineer (E.M.) may be earned by engineering graduates of the College.

The Department of Geology also offers a Ph.D. program.

MINERAL INDUSTRY RESEARCH LABORATORY—The 1963 Alaska State Legislature authorized the establishment of a mineral industry research program at the University of Alaska. The purpose of the Laboratory is to conduct appropriate applied and basic research in various areas of the mineral industry that will aid in the further utilization of Alaska's mineral resources. Research is conducted in facilities of the College and coordinated with graduate student academic programs.

EARTH SCIENCES AND MINERAL INDUSTRY AGENCY—Housed in the Brooks Memorial Mines Building with the College of Earth Sciences and Mineral Industry is the College Office of the Alaskan Geology Branch of the U. S. Geological Survey. This arrangement, leading to close association and cooperation and sharing of some facilities, tends to give harmony and efficiency to the work of all for the benefit of the mineral industries of Alaska.

GEOLOGY DEPARTMENT

ROBERT B. FORBES—DEPARTMENT HEAD

DEGREES—BACHELOR OF ARTS, BACHELOR OF SCIENCE, MASTER OF SCIENCE AND Ph.D.

MINIMUM REQUIREMENTS FOR DEGREES—

B.A. GEOLOGY MAJOR—130 CREDITS
B.S. GEOLOGY—130 CREDITS, PLUS 8 CREDIT SUMMER FIELD COURSE
M.S. GEOLOGY—30 ADDITIONAL CREDITS, INCLUDING THESIS
B.S. GEOLOGICAL ENGINEERING—135 CREDITS PLUS 8 CREDIT SUMMER FIELD COURSE
Ph.D. (OPEN)

The bachelor's degree curricula in geology provides broad training in the earth sciences and essential course work in mathematics and the physical sciences. The geological engineering curriculum is designed to prepare the student for professional work in the earth sciences, involving engineering problems. Graduate programs are tailored to the special research and study interests of the student.

Earth Sciences and Mineral Industry

THIRD YEAR 18 CREDITS
Econ. 121—Prin. of Economics 3
E. S. 331—Mech. of Materials 3
English elective 3
Geol. 213—Mineralogy 5
Chem. 331—Physical Chem. 4

SUMMER
Geol. 351—Field Geology, 8 credits, 8 weeks.

FOURTH YEAR 18 CREDITS
Geol. 401—Invertebrate Paleo. 4
Min. Pr. 313—Mineral Prep. 3
Geol. 415—Geol. and Engr. Prob. of Frozen Ground 3
Geol. 400—Earth Sci. Jour. Club 0
Geol. 321—Sedimentation 3
E. S. 341—Fluid Mechanics 4

Geol. 400—Earth Science Journal Club is required of all upper division Geological Engineering majors.

For course description, see page 129.

REQUIREMENTS FOR A B.A. DEGREE WITH A GEOLOGY MAJOR
1. Complete the general requirements for a B.A. Degree listed on page 50.
2. Complete required courses in Geology as planned in individual conference with the Head of the Geology Department.
   A minor in Geology requires 12-16 credits of approved Geology courses.

REQUIREMENTS FOR A M.S. DEGREE IN GEOLOGY
1. A minimum of 30 credits, including a maximum of 12 credits in Geol. 693-694, Special Topics, and Geol. 697-698, Thesis.
2. An examination to demonstrate ability to read geological literature in an approved foreign language.
3. Completion of the general requirements for a graduate degree listed on page 65.

REQUIREMENTS FOR A PH.D.
1. Program arranged by conference.
2. Completion of the general requirements for a Ph.D. listed on page 53.

MINERAL ENGINEERING DEPARTMENT
DONALD J. COOK—DEPARTMENT HEAD

DEGREES—BACHELOR OF SCIENCE, ENGINEER OF MINES, AND MASTER OF SCIENCE

MINIMUM REQUIREMENTS FOR DEGREE: B.S.—140 CREDITS

M.S.—30 ADDITIONAL CREDITS

In the Mining Engineering curriculum, particular emphasis is placed upon engineering as it applies to the development and exploitation of mineral resources and upon the economics of the business of mining. In addition, a student interested in Petroleum Engineering may complete the first two years of the Mining Engineering curriculum and then transfer to another university and complete the final two years of the curriculum without loss of time.

UNDERGRADUATE DEGREES—The Department of Mineral Engineering offers the Bachelor of Science Degree in Mining Engineering.

GRADUATE DEGREES—The graduate program allows for the awarding of Master of Science Degrees in Mineral Industry Management and Mineral Preparation Engineering. The curriculums consist of core courses in Engineering Management with electives in the field of Mineral Industries and advanced courses in Mineral Preparation, respectively. University policy pertaining to graduate study leading to a Master's Degree applies.

The graduate program also provides for the awarding of a professional degree, Mining Engineer (E.M.). This degree may be conferred upon engineering graduates who present satisfactory evidence of continuous engagement in responsible engineering work for not less than five years and a satisfactory thesis.

PETROLEUM ENGINEERING—Because of recent developments in the petroleum industry in Alaska, the Board of Regents has approved the initiation of a two-year basic program in Petroleum Engineering at the University of Alaska. Students enrolling in Petroleum Engineering will normally complete the first two years of basic engineering study listed in the mining engineering curriculum. This course of study may be altered to allow for specific requirements of individuals. Upon satisfactory completion of the two-year curriculum, students may transfer to one of a number of universities having petroleum engineering programs and complete their course of study without loss of time or course credit.

Completion of the general requirements for a graduate degree as listed on page 51.

*Electives will be in the field of chemistry, physics and mathematics and will be chosen to broaden the candidate's fundamental knowledge, depending upon his specific background and interest.
College of Mathematics, Physical Sciences and Engineering

CHARLES SARGENT—DEAN

Physical Science is based upon mathematical fundamentals. Engineering is founded upon mathematical and physical principles. The integration of the departments of this College provides the common ground for training in science and technology.

The primary mission of the College is to provide education to the baccalaureate level in its departments and to supplement the primary purpose with research and graduate training where necessary.

UNDERGRADUATE DEGREES—The College grants the following undergraduate degrees: Bachelor of Arts, Bachelor of Science, and Bachelor of Engineering (Chemical, Civil, Electrical, Mechanical).

GRADUATE DEGREES—The college offers the following graduate degrees: Master of Arts, Master of Science, and Doctor of Philosophy.

DEPARTMENTS—Departments in the College include: Chemistry and Chemical Engineering, Civil Engineering, Electrical Engineering, Engineering Management, Mathematics, Mechanical Engineering, and Physics.

ENGINEERING SCIENCE COURSES—The designation Engineering Science is given to courses which are common to all fields of Engineering. Each engineering curriculum specifies which of these courses are required and the semester in which it is advisable to take them.

FIRST-YEAR ENGINEERING STUDENTS—All first-year students intending to study engineering will be registered in Engineering Science. Before a student may be registered in a particular specialty of engineering, he must have an accumulated average of 2.00 and have completed all courses listed in the curriculum for the common first year of Engineering Science.

CHEMISTRY DEPARTMENT

GEORGE DAHLGREN—DEPARTMENT HEAD

DEGREES—BACHELOR OF ARTS, BACHELOR OF SCIENCE, MASTER OF ARTS, MASTER OF SCIENCE

MINIMUM REQUIREMENTS FOR DEGREE: B.A., B.S.—130 CREDITS

M.A., M.S.—30 ADDITIONAL CREDITS

Graduates in chemistry qualify in many fields: as teachers of chemistry, as supervisors in industry, as technical sales personnel; as research chemists in federal, state, municipal, academic or industrial laboratories; in premedicine or as laboratory technicians. The rapid introduction of chemical techniques in all branches of commerce and industry and the creation of the many synthetic products has caused phenomenal growth in the profession since World War I. Specific mention may be made of the manufacture of plastics, glass, pigments, starch, explosives, dyes, gases, petroleum products, fine and heavy chemicals, perfumes, drugs, vitamins, hormones, solvents, specialized fuels including nuclear fuels, and the various metals and alloys.
The curriculum in chemistry offers an opportunity for broad scientific study. All students specializing in chemistry will meet basic requirements in general inorganic, analytical, organic, and physical chemistry, as well as mathematics and physics. These may be supplemented by courses in biology, education, engineering, geophysics, geology, metallurgy and advanced courses in biology, chemistry, mathematics and physics, according to the interest of the individual student.

The general offerings of the Chemistry Department are arranged to allow students in less specialized programs to meet requirements for the requisite majors and minors. Such service courses and programs are an outstanding feature in the department.

The field of chemistry is highly developed. Graduate study is a necessity for the better opportunities in this field. A prospective chemist should elect additional courses in mathematics and physics. Sufficient study in two foreign languages, preferably German and French, to gain a reading knowledge is recommended.

**REQUIREMENTS FOR A B.A. DEGREE WITH A MAJOR IN CHEMISTRY**

1. Complete the general requirements for a B.A. Degree listed on page 50.
2. Complete the following foundation courses:
   - Chem. 101 and 102—General Chemistry 8 credits
   - or
   - Math. 106 and 200
   - or
   - Phys. 103 and 104—College Physics 9 credits
   - or
   - Phys. 211-212—Engineering Physics 8 credits
3. Complete 20 additional credits in Chemistry, including:
   - Chem. 212—Introductory Quantitative Chemistry 4 credits
   - Chem. 223—Introductory Organic Chemistry
   - or
   - Chem. 321—Organic Chemistry 4 credits

A minor in Chemistry requires Chem. 101-2 or Chem. 201-2; Chem. 212, Chem. 223 or 321.

A minor in Chemistry requires Chem. 101-2 or Chem. 201-2; Chem. 212, Chem. 223 or 321.

Chem. 201-202 may be taken instead of Chem. 101-102.

All electives must have the approval of the Head of the Department.

Students seeking a pre-professional chemistry major must complete one year of organic chemistry, one year of general chemistry and one year of advanced chemistry.

E.S. 111-112 may be taken instead of Biol. 105-106.

Students who did not offer two years of a foreign language for admissions, must take one year of a foreign language, preferably German.
Mathematics, Physical Sciences and Engineering 95

**REQUIREMENTS FOR A M.A. OR M.S. DEGREE IN CHEMISTRY**

1. A minimum of 30 credits of approved courses, including Chemistry 697, Thesis.
2. Completion of the general graduate degree requirements listed on page 51.

Graduate students seeking a Master's Degree with a major in chemistry must develop a program in one of the four general divisions of chemistry: analytical, inorganic, organic or physical. A student entering without preparation to take these courses may require additional time to earn his degree.

For course descriptions, see page 115.

**CHEMICAL ENGINEERING DEPARTMENT**

**GEORGE DAHLGREN—DEPARTMENT HEAD**

**DEGREES—BACHELOR OF SCIENCE (ENGINEERING SCIENCE) AND BACHELOR OF ENGINEERING (CHEMICAL)**

**MINIMUM REQUIREMENTS FOR DEGREE: B.S.—130 CREDITS**

**B.E.—162 CREDITS**

Chemical Engineering is concerned with the development and application of manufacturing processes in which physical or chemical changes of materials are involved. The chemical engineer is primarily concerned with the development, design, and operation of equipment and processes for bringing about those desired changes on an industrial scale and at a profit. Chemical engineers find opportunities with manufacturers of all the numerous chemical products of commerce such as the heavy and fine chemicals, pulp and paper, plastics, drugs, dyes, soap, and mineral products; with the atomic energy, missile and satellite programs; with petroleum refineries; with the mineral industry; with the food industries and with many other industries. These opportunities may involve research, design, control, operation and technical sales.

The curriculum provides a good foundation in basic chemical engineering and chemistry with a broad knowledge of general engineering. It provides an adequate foundation for graduate work or for entering specialized fields.

CIVIL ENGINEERING DEPARTMENT

E. F. RICE—DEPARTMENT HEAD

BACHELOR OF SCIENCE (ENGINEERING SCIENCE)
MASTER OF CIVIL ENGINEERING AND MASTER OF SCIENCE

MINIMUM REQUIREMENTS FOR DEGREES: B.S.—130 CREDITS
M.S.—30 ADDITIONAL CREDITS
M.C.E.—162 CREDITS

Engineering embraces the wide range of cultural and professional subjects having to do with the planning, design, and construction of works necessary for civilization. Civil Engineering in particular deals with environmental control; bridges, buildings, dams, and harbor facilities; water resource development, and waste disposal; water power, irrigation works, and drainage; air, water, highway and railway transportation; construction and management; topographic surveying and geodesy; city management and developmental planning.

Candidates for the Bachelor of Science degree will pass a comprehensive examination in their general field.

Students will enter the fifth year in one of two programs: those whose goal is broad professional practice will ordinarily choose the curriculum leading to the degree Master of Civil Engineering; those whose interests or background favor a highly specialized program, with emphasis on research and/or advanced specialized study, will ordinarily select the degree Master of Science in Civil Engineering.

The first four years are common to each of these programs.

**REQUIREMENTS FOR A M.C.E. DEGREE**  
Each fifth-year student under this program shall be guided by a personal advisor and shall accumulate 32 semester hours of approved courses.

**REQUIREMENTS FOR THE M.S. DEGREE IN CIVIL ENGINEERING**  
A student selecting this program or the program for Master of Science (Engineering Management) will meet the general requirements for the Master's degree (page 51) plus the following:  
32 semester hours of credit approved by his graduate committee, of which 6 to 12 semester hours will be C.E. 697, 698, Thesis.

**ELECTRICAL ENGINEERING DEPARTMENT**  
JOHN G. TRYON—DEPARTMENT HEAD

**DEGREES—BACHELOR OF SCIENCE (ENGINEERING SCIENCE) AND MASTER OF ELECTRICAL ENGINEERING**

**MINIMUM REQUIREMENTS FOR DEGREES: B.S.—130 CREDITS**

Electrical Engineering treats of the useful applications of electricity and magnetism. Electrical engineers develop, design, and operate equipment for generating and utilizing power, for communication, for automatic control, and for information processing.  
The program emphasizes the study of electronic devices and circuits, with particular reference to communication. Due attention is given to power, control, and information processing. A student who completes the M.E.E. is ready to work in industry or continue with graduate study.

In recognition of readiness for professional responsibility the Master of Engineering is accredited by the Engineers' Council for Professional Development.

The curriculum of the Bachelor of Science (Engineering Science) is preparation for graduate study. It is not a complete program for professional responsibilities and the B.S. (E.S.) is not accredited by the E.C.P.D.

** REQUIREMENTS FOR THE MASTER OF ELECTRICAL ENGINEERING**

Each student will be guided by a committee, and should expect to:
1. Have met all requirements for the B.S. in Engineering Science with major in electrical engineering.
2. Meet all university requirements for the masters.
3. Take a total of 32 credits including EE 453-4, Circuit Theory, EE 471 Control, EE 462 Communication Systems, and ES 450 Engineering Management.
4. Do a project.

**ENGINEERING MANAGEMENT**

JOHN HILPERT—DEPARTMENT HEAD

**DEGREE—MASTER OF SCIENCE**

**MINIMUM REQUIREMENTS FOR DEGREE—30 CREDITS** (beyond a Bachelor's degree in one of the recognized branches of Engineering).

The Engineering Management curriculum is designed for graduate engineers who will hold executive or managerial positions in engineering, construction, or industrial organizations. It includes financial, legal, human relations, economic, and technical subjects which are useful to solve problems of management.

The curriculum will include graduate level core courses, business law, and additional course work either directed toward special problems such as Arctic Engineering, or work in one of the more general fields of engineering through projects or research in the application of engineering management principles.

Other courses may be substituted for Business Law if a student shows evidence of satisfactory completion of subject matter of B.A. 331 and 332 at the B grade level.

For course descriptions, see page 125.

Electives must have the approval of the department.

**GENERAL SCIENCE CURRICULUM**

WILLIAM S. WILSON—DEPARTMENT HEAD

**DEGREES—BACHELOR OF SCIENCE AND MASTER OF SCIENCE**

**MINIMUM REQUIREMENTS FOR DEGREES: B.S.—130 CREDITS**

M.S.—30 ADDITIONAL CREDITS

Man's insatiable curiosity and his desire to understand the world about him has led him to the study of natural science and to the scientific method. Progress in this study has been fruitful and is so rapid now that the new discoveries in science are affecting our everyday lives, and most certainly will continue to do so in our lifetime. Consequently, every educated citizen needs a knowledge and appreciation of the philosophy and structure of science. It is generally agreed that the best method for achieving this is by direct study of a natural science, and all the curricula at the University of Alaska reflect this fact in their requirements.

Traditionally, the role of mathematics has been to simplify, interpret, and extend the boundaries of science. The fact that mathematics still includes, as well as transcends, this function makes it a necessary study.

The major in General Science has been designed, as its name indicates, to provide an opportunity to become familiar with a considerable number of natural sciences and thus provide a firm background for specialization in any one of them as well as in certain technical professions. The fields lying on the border between the older sciences provide excellent opportunity for research. An acquaintance with the fundamentals of all of the natural sciences is of value in teaching science in high school and college and also in preparing for specialization in certain of the social sciences.
Mathematics, Physical Sciences and Engineering 99

REQUIREMENTS AND CURRICULUM FOR A B.S. DEGREE WITH A MAJOR IN GENERAL SCIENCE

FALL SEMESTER

FIRST YEAR 16 or 16½ CREDITS

Engl. 101—Comp. & Modes of Lit. ................. 3
Biol. 105—Fund. of Biology ....................... 4
Math. 106—Algebra & Trig. ....................... 5
Chem. 101—General Chem. ....................... 3
or
Phys. 103—Coll. Physics ......................... 4
P.E. or Mil. Sci. ................................ 1 or 1½

SECOND YEAR 17 to 18½ CREDITS

Econ. 121—Prin. of Economics .................... 3
Phys. 103—Coll. Physics ......................... 4
Chem. 101—General Chem. ....................... 4
Geol. 101—Gen. Geology ......................... 4
For. Lang. or Dept. Elec. ......................... 6 or 5
P.E. or Mil. Sci. ................................ 1 or 1½

SPRING SEMESTER 16 or 16½ CREDITS

Engl. 102—Comp. & Modes of Lit. ................. 3
Biol. 106—Fund. of Biology ....................... 4
Math. 200—Calculus ................................ 4
Chem. 102—General Chem. ....................... 3
or
Phys. 104—Coll. Physics ......................... 4
P.E. or Mil. Sci. ................................ 1 or 1½

THIRD AND FOURTH YEARS

By the beginning of his junior year each student in General Science must decide upon his major field, and, with the assistance of the person in charge of administering the curriculum in General Science, make out a program for his third and fourth years of study.

Directions for making out the program:

1. Include the following courses:
   Dept. Elec. or For. Lang. ......................... 5
   Eng. 213—Adv. Exposition or selected literature 5
   Social Science Elective .......................... 3
   Eng. 314—Scholarly and Tech. .................. 3
   Writing or selected literature .................. 3

2. The major field must comprise a minimum of 20 credits above the foundation courses included in this curriculum. The courses scheduled must be approved in writing by the head of the major department. A major may be elected in Anthropology, Biological Science (Zoology or Botany), Chemistry, Geology, Geophysics, Mathematics, or Physics.

3. The electives must include either two minors of at least 12 credits each above the foundation courses included in this curriculum, or a second major. Minors may be selected in any of the major departments listed or in the fields of Economics, Education (minimum 16 credits), English, French, German, Russian, History, or Political Science.

4. All prerequisites of courses elected must be met, preferably by inclusion in the major.

5. One year of German, French, or Russian is required in the General Science curriculum. If the foreign language is postponed to the third year, the program described under Third and Fourth Year must be made out at the beginning of the Second Year.

6. Advanced Exposition is required unless written work in all courses indicates a good writing technique.

7. Courses selected to complete the requirement in the social sciences must be chosen from the following: Anth. 212, 321, 324, 325, 331, 342, 423; Soc. 101, 102; any History; any Political Science.

REQUIREMENTS FOR A M.S. DEGREE IN GENERAL SCIENCE

1. A minimum of 30 credits of approved courses.

2. Completion of the General graduate degree requirements listed on page 51.

The Department of Mathematics, Physics, Chemistry, Biology, and Geology offer work toward the degree of Master of Science with a major in General Science. This degree may be described as a "breadth" rather than "depth" degree, and a candidate is ordinarily pursuing a course of study in which one of these departments is cooperating with at least one other department within the university. A prospective candidate must meet the general requirements for admission and for the awarding of the degree. At least 21 credits must be earned in science and mathematics. At least 12 credits must be earned in the department giving the degree. A thesis (maximum of three credits) or project (no credit) must be completed in the major department. It is not intended that the individual courses merely satisfy the credit requirements, but each course should contribute to the specific aim of the candidate, and the thesis or project should reflect this aim.
MATHMATICS DEPARTMENT

RUSSELL E. CARR—DEPARTMENT HEAD

DEGREES—BACHELOR OF ARTS, BACHELOR OF SCIENCE, AND MASTER OF SCIENCE

MINIMUM REQUIREMENTS FOR DEGREES: B.A.—130 CREDITS

B.S.—130 CREDITS

M.S.—30 ADDITIONAL CREDITS

The Department of Mathematics offers service courses to all the colleges of the University. In addition, the Department offers courses for students who major in mathematics. The number of positions available for trained mathematicians grows annually, and currently exceeds the supply.

A digital computer, installed in October, 1961, has improved the department’s capacity to train mathematicians, scientists, and engineers.

In addition to meeting all the general requirements for the specific degree, certain mathematics courses are required of all mathematics majors. All electives must be approved by the Mathematics Department. Students preparing to teach mathematics in secondary schools must take the education courses necessary to obtain an Alaska Teaching Certificate.

REQUIREMENTS FOR THE BACHELOR’S DEGREE WITH A MAJOR IN MATHEMATICS

Complete the following courses beyond Math. 202:

- Math. 302—Differential Equations ___________________________ 3 credits
- Math. 303—Introduction to Modern Algebra ______________________ 3
- Math. 314—Linear Algebra _________________________________ 3
- Math. 371—Probability _________________________________ 3
- Math. 401—Advanced Calculus __________________________ 3
- Math. 402—Advanced Calculus __________________________ 3
- Math. 417—Differential Geometry _______________________ 3

The B.A. degree requires completion of the above major requirements as well as the general requirements for the B.A. degree is listed on page 50.

A minor in Mathematics requires completion of Math. 200, Math. 201, Math. 202, and six additional credits in Mathematics at the 300 level or above.

REQUIREMENTS FOR A M.S. DEGREE IN MATHEMATICS

1. A minimum of 30 credits of approved courses.
2. Satisfactory result of the final examination, including either the defense of a thesis if the candidate has elected to write one or a demonstration by other means by the candidate of proficiency at the graduate level in mathematics.
3. Completion of the general requirements for a graduate degree listed on page 51.

For course descriptions see page 137.
MECHANICAL ENGINEERING DEPARTMENT

E. F. RICE—DEPARTMENT HEAD

DEGREES—BACHELOR OF SCIENCE (ENGINEERING SCIENCE)
MASTER OF MECHANICAL ENGINEERING

MINIMUM REQUIREMENTS FOR DEGREES: B.S.—130 CREDITS
M.M.E.—162 CREDITS

Mechanical Engineering embraces professional disciplines concerned with the application of scientific principles to the design of mechanical equipment for the benefit of mankind. Emphasis is placed on the phases of Mechanical Engineering of special importance to Alaska; power, transportation, and environmental control.

Candidates for the Bachelor of Science degree will pass a comprehensive examination in their general field.

Students will enter the fifth year in one of two programs; those whose goal is broad professional practice will ordinarily choose the curriculum leading to the degree Master of Mechanical Engineering; those whose interests or background favor a highly specialized program with emphasis on research and/or advanced specialized study, will ordinarily select the degree Master of Science in Mechanical Engineering.

The first four years are common to each of these programs.

REQUIREMENTS FOR THE DEGREE OF MECHANICAL ENGINEERING

Each fifth year student under this program will be guided by a personal advisor and shall accumulate 32 semester hours of approved courses. M.E. students may alternatively enroll in Engineering Management under the requirements of that program.
PHYSICS DEPARTMENT
MANFRED H. REES—DEPARTMENT HEAD

DEGREES—BACHELOR OF ART, BACHELOR OF SCIENCE, MASTER OF SCIENCE, AND
DOCTOR OF PHILOSOPHY

MINIMUM REQUIREMENTS FOR DEGREES: B.A.—130 CREDITS
B.S.—130 CREDITS
M.S.—30 ADDITIONAL CREDITS
Ph.D.—NO FIXED CREDITS

The science of physics is concerned with the nature of matter and energy and
encompasses all phenomena in the physical world from elementary particles to the
structure and origin of the universe. Physics provides, together with mathematics and
chemistry, the foundation for work in all fields of physical science and engineering, and
contributes to other fields such as biology, geology and marine science.

UNDERGRADUATE PROGRAM—The undergraduate curriculum aims at a good foundation in
general physics with emphasis on the experimental aspects. It provides opportunities for
careers in education and industry, and opens the door to advanced work in physics and
related sciences.

GRADUATE PROGRAM—The graduate work is intimately connected with the research activities
of the Geophysical Institute which offer ample thesis material in the fields of the atmospheric
and space sciences and in solid earth physics. The research program of the Geophysical Institu
currently emphasizes investigations of auroral and ionospheric physics, geomagnetism and
earth currents, radio wave propagation and scattering, solar radio astronomy and solara-
terrestrial relations, polar meteorology and glaciology, seismology and solid earth ph ocs.
A graduate student may designate his major field as physics or geophysics. He will
pursue his studies under the supervision of an Advisory Committee consisting of his major
professor (chairman), two approved faculty members, and the department head (ex officio).
The Committee advises on the course of study to be followed and determines the background
courses (mathematics, physics, astronomy, chemistry, geophysics) necessary to support the
major field.

The graduate course offerings include the basic material generally required for
research and teaching in physics or related fields, and specialized courses in the research
areas mentioned above.

REQUIREMENTS FOR A B.A. DEGREE WITH A MAJOR IN PHYSICS
1. Complete the general requirements for a B.A. Degree listed on page 50.
2. Complete the following foundation courses:
   Phys. 103-104—College Physics 8 credits
3. Complete a minor in Mathematics, which includes Math. 200, 201, 202, and 6 credits at
   the 300 level or above.
4. Complete 20 credits of approved courses in Physics.
   A minor in Physics requires 12-16 credits; or Physics 103, 104, 301 and 302.

ELECTRONICS TECHNOLOGY PROGRAM
FOYLE L. GENTRY—DEPARTMENT HEAD

DEGREE—ASSOCIATE IN ELECTRONICS TECHNOLOGY

MINIMUM REQUIREMENTS FOR DEGREE: A.E.T.—65 CREDITS

The program in electronics technology prepares people to maintain, install, and operate complex electronic equipment, such as broadcast transmitters, airways beacons, carrier telephone systems, radars. The program is not introductory electrical engineering, which emphasizes design; it is electronics technology, which emphasizes maintenance.

Enrollment is limited. Write to the Department Head for information on admission to this program.

REQUIREMENTS AND CURRICULUM FOR AN ASSOCIATE DEGREE IN ELECTRONIC TECHNOLOGY

FALL SEMESTER
FIRST YEAR 16 CREDITS
E.T. 51—DC Circuits ................................ 4
E.T. 52—AC Circuits ................................ 4
E.T. 55—Electronics Practice I ..................... 3
E.T. 59—Math. for Electronics ...................... 5

SECOND YEAR 17 CREDITS
E.T. 71—Electronic Circuits II .................... 5
E.T. 72—Electronic Circuits III .................... 4
E.T. 75—Microwave Electronics .................... 4
E.T. 77—System Maintenance ....................... 4

SPRING SEMESTER 17 CREDITS
E.T. 61—Tubes & Semiconductors ................ 4
E.T. 62—Electronic Circuits I ..................... 3
E.T. 63—Electronic Systems I ...................... 4
E.T. 66—Electronics Practice II ................... 3
Engl. 68—Elementary Exposition ................... 3

16 CREDITS
E.T. 83—Test Instruments ........................ 3
E.T. 84—Electronic Systems II .................... 5
B.A. 66—B.A. for Technicians ..................... 4
P.S. 68—Soc. Sci. for Tech. ...................... 4
Course Descriptions

Courses offered by the University are listed alphabetically by department.

COURSE NUMBERS—The first numeral of a course numbered in the hundreds indicates the year in which the course is normally offered in its own department. Odd numbers are assigned to courses given in the fall semester and even numbers to courses given in the spring semester. For example, English 101 is given for first-year students in the first or fall semester. English 342 is given for third-year students in the second or spring semester.

"1-49—Non-credit courses.

"50-99—Courses designed for associate degree or a technical certificate credit; they are not applicable to the baccalaureate requirements.

"300-499—Upper division courses. Freshmen and sophomores must petition the Academic Council for permission to take these groupings unless such courses are required in the first two years of their curriculum as printed in this catalog. When marked with an asterisk (*21, *402) such courses may be applied as graduate credit—after approval by the head of the department offering the course and by the student's advisory committee.

"600-699—Graduate courses to which a few well qualified undergraduates may be admitted with the permission of the head of the department in which the course is offered. "491-492 and 691-692 indicate Seminars, 493-494 and 693-694 indicate Special Topics, and 697-698 indicate Thesis or Dissertation in those departments where listed.”

COURSE CREDITS—One credit (or one hour) represents satisfactory completion of one hour of work a week for one semester. This requirement may be met by attendance at one lecture, or by three fifty-minute periods of laboratory work a week, or the equivalent.

Following the title of each course, the figures in parenthesis indicate the number of lecture and laboratory hours the class meets, the first figure indicating lecture hours; the second, laboratory. For example (2+3) indicates that a class has 2 hours of lecture and 3 of laboratory work.

The number of credits listed is for each semester. Thus “Three Credits—Fall Semester” means three credits may be earned and the course is given in the fall or first semester.

COURSE CLASSIFICATIONS—Subjects and courses are classified as follows:

ACCOUNTING

Acc. 215 Accounting Principles (0+6) 3 Credits Fall
216

Accounting as a factor in business management and control.

Fall semester: Accounting principles as they apply to the organization and conduct of business.

Spring semester: Application of accounting principles and practices to business situations; preparation of financial statements.

Prerequisite: Acc. 215—Sophomore standing or permission of the instructor. Acc. 215—Acc. 215 or equivalent.

Acc. 315 Intermediate Accounting (0+6) 3 Credits Fall

Advanced principles and techniques. Relation of accounting to business management and control; accounting practices and procedures designed to reflect the financial position of a business and the results of its operation. Prerequisite Acc. 216 or equivalent.

</tbody>
</table>
Acc. 627 Professional Accounting (0+6) 1, 2, or 3 Credits  Fall
A study of accounting in specific areas of professional practice. Separate consideration and coverage is given to budgeting, controllership and public accounting. Prerequisite: Senior or graduate standing and 15 hours of accounting. Offered as demand warrants.

Acc. 628 Governmental and Institutional Accounting Credits Arr. Spring
Procedures and systems employed by states, municipalities and other governmental units. Offered as demand warrants. Prerequisite: Senior or graduate standing and 15 hours of accounting.

Acc. 629 Accounting Theory (3+0) 2 Credits  Fall
Emphasis on current proposals and developments, to meet the needs of those preparing to take the C.P.A. examination or who expect to teach accounting. Offered as demand warrants. Prerequisite: Senior or graduate standing or permission of instructor.

Acc. 629 Accounting Seminar (3+0) 2 Credits  Fall
2 Credits  Spring
Discussion of areas such as new developments and proposals, problems in public practice, inter-professional relationships and similar topics. Offered as demand warrants. Prerequisite: Graduate standing or permission of instructor.

Acc. 631 Internship Credits Arr.  Fall
Credits Arr.  Spring
For students with employment experience beyond the clerical level. Independent research and reading is required which will supplement knowledge and experience gained from the employment internship. Credit is not given for material used in Acc. 613. The work in this course may partially fulfill requirements for Acc. 697-698. Prerequisite: Graduate standing, advance approval of the instructor and written permission of the employer that the private accounting material may be used for class purposes.

Acc. 693 Special Topics 694
Credits Arr.  Fall
Credits Arr.  Spring
Prerequisite: Graduate standing and permission of the instructor.

Acc. 697 Thesis 698
Credits Arr.  Fall
Credits Arr.  Spring

AGRICULTURAL SCIENCE

Ag. 301 Agricultural Prices (3+0) 3 Credits  Fall
Analysis and interpretation of factors affecting agricultural prices; study of price movements; price policy. Prerequisites: Econ. 121, 122. Offered as demand warrants.

Ag. 310 Animal Husbandry (2+3) 3 Credits  Spring
Origin, history and economic significance of major breeds of dairy and beef cattle, swine, sheep and poultry. Introduction to management, with special reference to Alaska. Offered as demand warrants.

Ag. 382 Horticulture (2+3) 3 Credits  Spring
Survey; principles of propagation, culture and use; soil, light and water requirements; planting and harvesting; insect, weed and disease control. Prerequisite: Biol. 105, 106. Offered as demand warrants.

Ag. 404 Agricultural Marketing (3+0) 3 Credits  Spring
Principles and practices of agricultural marketing; prices and costs; case studies. Prerequisite: Econ. 121. Offered as demand warrants.

Ag. 491 Seminar (Arrange) 492
Credits Arr.  Fall
Credits Arr.  Spring
Unique problems in agricultural development of Alaska, the role of agriculture in Alaska’s economy, and recent research advances in the State. Subject matter fields: Economics, agronomy, animal industry, soils, horticulture and agricultural engineering. Offered as demand warrants.

Ag. 493 Special Topics (Arrange) 494
Credits Arr.  Fall
Credits Arr.  Spring
Various subjects studied principally through directed reading and supervised projects. Offered as demand warrants.

<td>Continuation of Anthropology 411, including a practical study of methods of field and laboratory research with emphasis on Eskimo prehistory. Prerequisites: Anth. 312 and 411.</td>
</tr>
</tbody>
</table>
**Course Descriptions**

**Anth. 423 Social Anthropology (3+0)**
Basic course stressing social structure, acculturation, religion, and folklore of Arctic America. Prerequisite: Anth. survey course on 300 level and Junior standing or permission.

**Anth. 430 Anthropological Field Methods (1+3)**
Laboratory and demonstration to prepare the student for field work and inform him of recently developed techniques of collecting field data. Concentration on one of following: Archaeology, ethnography, physical anthropology. Prerequisite: Junior standing and permission of instructor. As demand warrants.

**Anth. 491 Seminar in American Archaeology (2+0)**
Archaeological problems in America and prescribed research utilizing current literature. Prerequisite: Anth. 312.

**Anth. 492 Seminar in American Ethnology (2+0)**
Anthropological literature and research in selected problems. Prerequisite: Anth. 335, 423, or permission.

**Anth. 493 Special Topics**
Various subjects studied in special fields in anthropology. Prerequisite: Senior standing or permission.

**Anth. 497 Thesis or Project**
Advanced students who have shown special aptitude for individual study or research may elect thesis or project work, on approval of the Head of the Department.

**Anth. 691 Seminar**
Topics include physical and social anthropology, comparative archaeology, ethnological theory. Admission by arrangement.

**Anth. 693 Special Topics**
Various subjects studied, principally by directed study, discussion and research. Admission by arrangement.

## ART

**Art 105 Freehand Drawing (0+4)**
Pictorial design, life drawing, landscape drawing, using varied techniques and media.

**Art 161 Design and Color Theory (1+3)**
Creative designing and rendering. Emphasis on mass-space relationships and composition, value transitions and hues, colorwheel, color and intensity movements.

**Art 205 Life Drawing and Composition**
Problems in drawing from life, exploring possibilities in pictorial design and composition, still life, anatomy and perspective. Prerequisite: Art 106 or permission.

**Art 207 Beginning Printmaking (0+4)**
Various intaglio and relief printing media, engraving, etching, woodcut and other graphic media. Prerequisite: Art 106 or permission.

**Art 209 Beginning Metalsmithing (0+4)**
Material processes and techniques for silver jewelry and silversmithing. Prerequisite: Art 161 or permission.

**Art 211 Beginning Sculpture (0+6)**
Original, creative studies in clay, wood and stone sculpture. Emphasis on mastery of techniques and material processes.

**Art 213 Beginning Oil Painting (0+6)**
Basic investigation of materials and their use in expressing the students' ideas. Prerequisite: Art 106 and 162 or permission.

</tbody>
</table>
Biol. 331 Systematic Botany (2+0) 4 Credits Fall
Identification, nomenclature, and classification of vascular plants emphasizing taxonomic principles, mechanism of variation, classical and newer methods of taxonomic research and characteristics of major plant families. Several all day field trips. Prerequisite: Biol. 105, 106.

Biol. 401 Medical Technology 30 Credits Fall
Twelve-month medical technology internship at an affiliated hospital school, including work in clinical chemistry, hematology, microbiology, serology, parasitology, and histologic technique. Prerequisite: Senior standing in medical technology curriculum with the prior two semesters having been in residence at the University of Alaska; acceptance by an affiliated school of medical technology.

*Biol. 413 Cell Physiology (2+3) 3 Credits Fall
Physical and chemical properties of protoplasm; morphology and function of the cell in relation to the life of the organism. Major topics: Passive and active transport, photosynthesis, respiration, enzymes, metabolism. Prerequisites: Chem. 101, 102, and Biol. 105, 106; Chem. 321 or 323 recommended.

*Biol. 414 Comparative Physiology (3+3) 4 Credits Spring
Water, ion, and nitrogen balance; temperature regulation; and circulatory, muscle, hormone, and nervous systems in the various animal phyla. Prerequisite: Chem. 101, 102, and Biol. 105, 106; Chem. 223 or 321 and Biol. 413 recommended.

*Biol. 416 Plant Physiology (2+3) 3 Credits Spring
Metabolic processes in higher plants. Prerequisite: Chem. 101, 102; Biol. 105; Biol. 413 recommended. Offered alternate years; next offered 1967-68.

Biol. 491 Seminar (Arrange) Credits Arr. Fall
Biol. 492 Credits Arr. Spring
Topics in Biological Sciences

Biol. 493 Special Topics (Arrange) Credits Arr. Fall
Biol. 494 Credits Arr. Spring
Special fields in Biological Sciences. Prerequisite: Senior standing or permission. Offered as demand warrants.

Biol. 495 Research Credits Arr. Fall
Biol. 496 Credits Arr. Spring
Guided investigation, either laboratory or field, for qualified Seniors. Admission by arrangement.

Biol. 616 Principles and Methods of Taxonomy (2+3) 3 Credits Spring
Modern taxonomic ideas and their application to zoological and botanical problems. Offered alternate years; next offered 1966-67.

Biol. 618 Biogeography (2+0) 2 Credits Spring
Spatial and temporal geography of plant and animal groups; emphasis on environmental and historical features and controlling present patterns of distribution. Offered alternate years; next offered 1967-68.

Biol. 627 Physiological Ecology (2+3) 3 Credits Fall
Interaction between organisms and their environment with emphasis on the function of the organism as affected by physical stimuli such as light, heat, water, ions, and biotic stimuli such as competition. Each environmental factor is considered at the molecular, cellular, organismic, population, and community levels. Offered alternate years; next offered 1966-67.

Biol. 637 Modern Evolutionary Theory (2+0) 2 Credits Fall
Contemporary ideas and problems of the mechanics of evolution. Offered alternate years; next offered 1967-68.

Biol. 691 Seminar Credits Arr. Fall
Biol. 692 Credits Arr. Spring
Topics in Biological Sciences. Offered as demand warrants.

Biol. 693 Special Topics Credits Arr. Fall
Biol. 694 Credits Arr. Spring
Various subjects, including advanced studies in ecology, evolution, taxonomy, biogeography, physiology, animal behavior, etc. Admission by arrangement.
Course Descriptions

Biol. 695 Research Credits Arr. Fall
696 Credits Arr. Spring
Investigation, either field or laboratory, of a problem of lesser scope than the thesis, or supplementary to the thesis. *Admission by arrangement.*

Biol. 697 Thesis Credits Arr. Fall
698 Credits Arr. Spring
*Admission by arrangement.*

**BUSINESS ADMINISTRATION**

**B.A. 323 Corporate Organization and Finance** 3 Credits Fall
Principles in organizing and capitalizing a modern American business. Legal formation of corporations, factors determining capital requirements; various methods used in providing corporate capital.

**B.A. 331 Business Law (3+0)**
332
3 Credits Fall
3 Credits Spring
Survey of the legal aspects of business problems; basic principles, institutions, and administration of law.
*Fall semester:* Contracts, agency, employment, negotiable instruments, personal property sales.
*Spring semester:* Insurance, suretyship, partnerships, corporations, real property, trusts and wills, bankruptcy, torts and business crimes. *Prerequisite:* Third-year standing.

**B.A. 343 Marketing (3+0)**
3 Credits Fall
Fundamental problems; simulation exercises; interrelations of marketing with other business activities; conceptual and quantitative sciences in marketing. *Prerequisite:* Econ. 121-122.

**B.A. 359 Regulation of Industry (3+0)**
3 Credits Fall or Spring
Effects of government regulation, economic policy and executive policy on private and public enterprise.

**B.A. 361 Industrial Relations (3+0)**
3 Credits Fall
Personnel practice in industry; analysis of labor-management problems; methods and administration of recruiting, selecting, training and compensating employees; labor laws and their applications.

**B.A. 363 Production Management (3+0)**
3 Credits Fall or Spring
Practices and principles of scientific management of all business enterprises; principles of organization and techniques of management relating to planning organization, policies, controls, and methods improvement. *Prerequisite:* Econ. 121, or permission.

**B.A. 422 Corporate Financial Problems (3+0)**
3 Credits Spring
Financial problems frequently confronting the modern U.S. Corporation and proposed solutions. Topics include earnings retention and dividend policy, expansion and combination, refinancing and recapitalization, and treatment for financial failure.

**B.A. 423 Investment Management (3+0)**
3 Credits Fall or Spring
Management securities, portfolios of individuals and institutions; basic security analysis; investment policies of banks, insurance companies, investment companies, and fiduciaries.

**B.A. 424 Managerial Economics (3+0)**
3 Credits Spring
The use of economic analysis in the operation of businesses and industries; application of the approach of economics to executive decisions with emphasis on concepts that can be measured and applied to problems of management. *Prerequisite:* Econ. 321.

**B.A. 442 Marketing Institutions and Channels (3+0)**
3 Credits Spring
Analysis of industry and firm operations as marketing institutions; evolution of distribution channels; and contemporary marketing problems.

**B.A. 443 Marketing Theory and Analysis of Market Change (3+0)**
3 Credits Fall or Spring
Economic, sociological, psychological and anthropological factors influencing behavior of consumer and business units; long-run and short-run behavior change. The construction and use of mathematical models in marketing; application of digital computers in marketing systems analysis and control. *Prerequisite:* Math. 121, 122, 204, B.A. 343, and completion of behavioral science requirements.
B.A. 462 Administrative Policy (3+0) 3 Credits Spring
Organization role in a dynamic society; decision problems in varying social, economic and political environments.

B.A. 480 Organization Theory (3+0) 3 Credits Fall or Spring
Literature or organizational theory; emphasis on theoretical concepts, social science research techniques and organizational behavior. Prerequisite: Upper Division standing, completion of behavioral science requirements, or permission of instructor.

B.A. 493 Special Topics 494
Arr. Fall
Arr. Spring

B.A. 693 Special Topics 694
Arr. Fall
Arr. Spring

B.A. 648 Mathematical Method and Computers Workshop (3+0) 3 Credits Fall or Spring
Selected topics in the use of mathematical models, econometric techniques and computers in marketing; individual research projects. Prerequisite: permission of instructor.

B.A. 691 Seminar on Market Analysis (3+0) 3 Credits Fall or Spring
Analysis of factors affecting consumer trial and adoption of product innovation. Emphasis on current behavioral science research. Prerequisite: permission of instructor.

B.A. 697 Thesis 698
Credits Arr. Fall
Credits Arr. Spring

CHEMICAL ENGINEERING

*CHE. 433 Applied Chemical Kinetics (3+0) 3 Credits Fall
Kinetics of various reactions. Prediction of course of reactions. Prerequisite: Chem. 332 or 332, Ch.E. 477, 479 and 486.

CH.E. 477 Unit Operations (3+0) 3 Credits Fall
Fundamental unit operations; principles of fluid film theory, flow of fluids, flow meters, heat transmission, evaporation, crushing, grinding size separation, filtration, crystallization, vaporization, diffusion, adsorption, extraction, distillation, humidity, air conditioning, drying. Prerequisite: Chem. 202, Math. 202, Phys. 212, and E.S. 346 or Chem. 331.

CH.E. 479 Unit Operation Laboratory (0+3) 1 Credit Fall
Experiments on unit operations. Concurrent: Ch.E. 477.

CH.E. 486 Chemical Engineering Thermodynamics (3+0) 3 Credits Spring
Application of thermodynamics and principles of physical chemistry to physical and chemical equilibria encountered in Chemical Engineering processes. Prerequisite: Chem. 332, Math. 310, E.S. 346 or Chem. 331, and Ch.E. 477 recommended.

CH.E. 491 Seminar (1+0) 1 Credit Spring
Current Topics in Chemical Engineering

*Ch.E. 487 Advanced Unit Operations (3+0) 3 Credits Fall
Advanced treatment of flow of fluids, flow of heat, crystallization, diffusion, distillation, adsorption, fuels and combustion. Prerequisite: Ch.E. 477.

*CHE. 490 Unit Operations Laboratory (0+6) 2 Credits Spring
Experiments on unit operations. Prerequisites: Ch.E. 486, Ch.E. 587, Ch.E. and 588 concurrent.

*CHE. 492 Special Topics 494
Credits Arranged Fall
Credits Arranged Spring

Subjects include chemical engineering thermodynamics, unit processes in organic synthesis, industrial chemistry, inorganic chemical technology, nuclear chemical catalysis. Prerequisite: Appropriate for subject given.
CHEMISTRY

Chem. 101  General Chemistry (3+3)  4 Credits  Fall
Chem. 102  General Chemistry & Introductory Qual. Analysis (3+3)  4 Credits  Spring

General chemistry and introductory qualitative analysis. Fall semester: General principles, chemistry of the non-metals. Spring Semester: Chemistry of the metals, and qualitative analysis.

Chem. 103  Introductory Chemico-Physical Science (3+0) or (3+3)  3 or 4 Credits  Fall
Chem. 104  3 or 4 Credits  Spring

Descriptive course in Chemico-Physical Science. Either semester may be taken separately. One 3-hr. laboratory period may be elected but must be concurrent with lecture program.

Chem. 201  General and Quantitative Chemistry (3+3)  4 Credits  Fall
Chem. 202  4 Credits  Spring
Fall Semester: Classical principles of chemistry, atomic structures and the periodic table, molecular structure, the states of matter. For students in engineering. Prerequisite: Math. 102, E.S. 112, high school chemistry or Chem. 104 or Chem. 101 recommended.

Chem. 207  Problems in Chemistry (Arrange)  1 or 2 Credits  Fall
Chem. 208  1 or 2 Credits  Spring
Supplementary work, problems or topics in chemistry, designed for those especially interested in chemistry. Prerequisite or concurrent: Chem. 101 or 201.

Chem. 212  Introductory Quantitative Analysis (2+6)  4 Credits  Spring
General principles of chemical analysis; introduction to volumetric and gravimetric methods. Theory, problems and laboratory. Prerequisite: Chem. 102 or 202, Math. 102 or 104.

Chem. 217  Elementary Qualitative Analysis (2+6)  4 Credits  Fall
Qualitative Analysis including rarer elements. The theoretical basis of equilibria and its applications, etc., lectures, laboratories, problems. Prerequisite: Chem. 102 or Chem. 201, Math. 101 or 103 or equivalent.

*Chem. 223  Introductory Organic Chemistry (3+3)  4 Credits  Fall
For students in curricula requiring a one-semester terminal course in Organic Chemistry. Prerequisite: Chem. 102 or Chem. 202.

Chem. 224  Introductory Biochemistry (2+3)  3 Credits  Spring
For students in curricula requiring a one-semester terminal course in Biochemistry. Prerequisite: Chem. 223 or Chem. 321.

*Chem. 321  Organic Chemistry (3+3)  4 Credits  Fall
Chem. 322  4 Credits  Spring
Organic chemistry; preparation and properties of simple aliphatic and aromatic compounds. For Chemistry, Chemical Engineering, Premedical, Biochemistry, Science, etc. Prerequisite: Chem. 102 or 202 for Chem. 321; Chem. 321 for Chem. 322.

*Chem. 331  Physical Chemistry (3+3)  4 or 5 Credits  Fall
Chem. 332  4 or 5 Credits  Spring
Fall Semester: Three states of matter, principles of heat and thermodynamics and applications; solutions, colloids.
Spring Semester: Thermochemistry, second and third laws of thermodynamics, equilibria, chemical kinetics, electrical phenomena, atomic structure, molecular structure, photochemistry. Prerequisite: For Chem. 331, Chem. 202 or 212, Math. 102, Phys. 104 or 212. For Chem. 332, Chem. 331.

*Chem. 401  Inorganic Chemistry (3+0) or (3+3)  3 or 4 Credits  Fall
Chem. 402  3 or 4 Credits  Spring
Systematic presentation of inorganic chemistry emphasizing properties of various families of the periodic system. Prerequisite: Chem. 102 or Chem. 202 with grade of C or better. Offered as demand warrants

*Chem. 416  Chemical Analysis (1+6)  3 Credits  Spring
Analysis of mixtures illustrating principles of chemical separations, potentiometric and conductometric titrations; colorimetric methods; chromatographic methods; organic reagents for metals and their use in trace analysis. Prerequisite: Chem. 212, or 202 with permission.

</table>
Chem. 647  The Nature of the Chemical Bond (3+0)  Fall
Electronic structure of molecules and its correlation with the chemical and physical properties of substances, non-mathematical.

Chem. 648  Quantum Mechanics with Chemical Applications (3+0)  Spring
Quantitative introduction to quantum mechanics. Theoretical and experimental aspects of the electronic wave functions of molecules.

Chem. 651  Selected Topics in Biochemistry (2+0)  Fall
2 Credits
Chem. 652  Selected Topics in Biochemistry (2+0)  Spring
2 Credits
Topic areas: vitamins and hormones, carbohydrates, physical biochemistry, nucleic acids, lipids, enzymes, protein chemistry; intermediary metabolism, oxidate enzyme systems, pathways of metabolism, biochemistry of the cell nucleus, etc. Prerequisite: One year of biochemistry or one year of organic chemistry or permission.

Chem. 691  Seminar (1+0)  Fall
1 Credit
Chem. 692  Seminar (1+0)  Spring
1 Credit
Reviews of current research.

Chem. 693  Special Topics (694)  Fall

CIVIL ENGINEERING

C.E. 116  Mapping (2+3)  Spring
3 Credits
Maps and scales, projections, U.S. Public Land System, aerial photos with special applications to forestry and wildlife management, plane tables, compasses, stadia, levels, transits, traverses. Intended primarily for students in Wildlife Management. Prerequisite: Junior standing or permission of instructor. Offered in alternate years, 1967, 1969, 1971.

C.E. 334  Properties of Materials (1+4)  Spring
3 Credits
Properties, manufacture and testing of engineering materials. Design of concrete mixes. Prerequisite: E.S. 331.

C.E. 344  Hydrology (2+0)  Spring
2 Credits

C.E. 402  Transportation Engineering (2+0)  Spring
2 Credits
Administration, economics, location, design, construction and maintenance of highways, railways, airports and other transportation facilities. Prerequisite: C.E. 344.

C.E. 412  Elements of Photogrammetry (2+3)  Spring
3 Credits
Elementary study of aerial and terrestrial photographs as applied to surveying and mapping. Prerequisite: E.S. 207.

C.E. 415  Surveying (1+6)  Fall
3 Credits
Traverses, curves, field astronomy, state coordinate systems, adjustments. Prerequisite: E.S. 207.

C.E. 422  Foundation Engineering (2+0)  Spring
2 Credits
Principles of foundation action. Spread footings, mats, pile foundations, retaining walls and bulkheads, bridge piers, cofferdams and abutments. Prerequisite: C.E. 435.

<th>Credits</th>
<th>Term</th>
<th>Prerequisites</th>
</tr>
</thead>
<tbody>
<tr>
<td>Econ. 121</td>
<td>Principles of Economics I (3+0)</td>
<td>3</td>
<td>Fall</td>
<td>Introduction to economics; analysis and theory of national income; money and banking; public finance and taxation; economic systems.</td>
</tr>
<tr>
<td>Econ. 122</td>
<td>Principles of Economics II (3+0)</td>
<td>3</td>
<td>Spring</td>
<td>Theory of prices and markets; income distribution; contemporary problems of labor, agriculture, public utilities, international economic relations.</td>
</tr>
<tr>
<td>Econ. 321</td>
<td>Price and Allocation Theory (3+0)</td>
<td>3</td>
<td>Fall</td>
<td>Analysis of demand and supply under various market forms; cost and theory of production; factor pricing and theory of distribution; survey of welfare economics. Prerequisite: Econ. 121, Econ. 122.</td>
</tr>
<tr>
<td>Econ. 324</td>
<td>Income and Employment (3+0)</td>
<td>3</td>
<td>Spring</td>
<td>Concepts of income; underconsumption and underinvestment theories; theory of economic maturity; implications of full employment and full investment. Prerequisite: Econ. 121, Econ. 122, Econ. 350 or Econ. 429.</td>
</tr>
<tr>
<td>Econ. 337</td>
<td>Economic Development (3+0)</td>
<td>3</td>
<td>Fall or Spring</td>
<td>Theories of growth and development; problems of economic development illustrated with case studies; analysis of major policy issues. Prerequisite: Econ. 121, Econ. 122 and three additional hours of economics or other social sciences. Offered as demand warrants.</td>
</tr>
<tr>
<td>Econ. 350</td>
<td>Financial and Monetary Theory and Policy (3+0)</td>
<td>3</td>
<td>Spring</td>
<td>Sources and uses of money and credit in modern society; regulation of money and credit and their impact on the economic welfare of the United States.</td>
</tr>
<tr>
<td>Econ. 351</td>
<td>Public Finance and Taxation (3+0)</td>
<td>3</td>
<td>Fall or Spring</td>
<td>Government taxation, borrowing and spending; economic effects of taxation; influence of fiscal policy on economic activity. Prerequisite: Econ. 121, Econ. 122. Offered in alternate years; next offered 1967-8.</td>
</tr>
<tr>
<td>Econ. 425</td>
<td>History of Economic Thought (3+0)</td>
<td>3</td>
<td>Fall or Spring</td>
<td>Economic thought from the physiocrats to the present, classical and neoclassical theory, exponents and critics; contemporary development in economic theory. Prerequisite: Econ. 121, Econ. 122 and three credits of upper division courses in economic or other social sciences. Offered as demand warrants.</td>
</tr>
<tr>
<td>Econ. 429</td>
<td>Business Fluctuations (3+0)</td>
<td>3</td>
<td>Fall</td>
<td>Analysis of fluctuations in economic activity; theories of business fluctuation; methods of control and forecasting. Prerequisite: Econ. 121, Econ. 122.</td>
</tr>
<tr>
<td>Econ. 432</td>
<td>Economic History of the United States (3+0)</td>
<td>3</td>
<td>Spring</td>
<td>Economic developments in American history with emphasis on impact of industrialization since 1840. Prerequisite: Econ. 121, Econ. 122, History 122.</td>
</tr>
<tr>
<td>Econ. 435</td>
<td>Economics of Resources (3+0)</td>
<td>3</td>
<td>Fall</td>
<td>Concepts of resources; interaction among resources, industrialization and economic development; theories and problems of conservation; emphasis on Alaska. Prerequisite: Econ. 121, Econ. 122 or permission.</td>
</tr>
<tr>
<td>Econ. 463</td>
<td>International Economics I (3+0)</td>
<td>3</td>
<td>Fall</td>
<td>Theories of international trade; international payments and the balance of payments; public and private control of trade international economic cooperation. Prerequisite: Econ. 121, Econ. 122.</td>
</tr>
<tr>
<td>Econ. 464</td>
<td>International Economics II (3+0)</td>
<td>3</td>
<td>Spring</td>
<td>Analysis of international disequilibrium; capital flow and foreign investment; international liquidity creation and mutual assistance plans; problems and international aspects of policies of underdeveloped areas. Prerequisite: Econ. 463.</td>

EDUCATION

*Ed. 301 Social Studies for Elementary Teachers (3+0)  3 Credits  Fall
Methods and materials adaptable to modern curriculum in elementary social studies.  Prerequisite: Ed. 313 and prerequisites therefor.

*Ed. 302 Language Arts for Elementary Teachers (3+0)  3 Credits  Spring
Definition; role of language in children's learning; specific language skills to be taught in grades 1 through 8; methods and materials for effective teaching; organization for instruction; all aspects of the language arts, except reading.  Prerequisite: Ed. 313 and prerequisites therefor.

*Ed. 304 Literature for Children (3+0)  3 Credits  Spring
Criteria for evaluating children's books and application of criteria to books selected by student; history of children's literature; study of outstanding authors, illustrators and content of specific categories of literature; book selection aids and effective use of literature to promote learning.  Prerequisite: Psy. 305 or permission of instructor.

*Ed. 306 Teaching of Science in Elementary Schools (3+0)  3 Credits  Fall
Modern concepts, methods and materials of teaching science.  Prerequisite: Ed. 313 and prerequisites therefor.

*Ed. 307 Teaching of Arithmetic (2+0)  2 Credits  Spring
Present day concepts, methods and materials.  Prerequisite: Math. 115 or Math. 121, Math. 205, and Ed. 313 and prerequisites therefor.  In-service teachers may substitute Math. 345 for the math. prerequisites.

*Ed. 311 Audio-Visual Methods and Materials (3+2)  3 Credits  Spring
Selection and use of audio-visual materials in teaching and learning at all levels of education.  Prerequisite: Ed. 313 and prerequisites therefor.

Ed. 313 Educational Psychology (3-4)  3 Credits  Fall & Spring
Application of principles of psychology to classroom teaching and learning.  Prerequisite: Psy. 101 and Psy. 205 or Psy. 252.

*Ed. 323 Small Schools (2+0)  2 Credits  As demand warrants
Basic for students planning to teach in small schools; special problems in organization and methods; small schools in Alaska serve as the focal point for discussion and instruction.  Prerequisite: Ed. 313 and prerequisites therefor.

*Ed. 332 Tests and Measurements (3+0)  3 Credits  Fall & Spring
Theory and practice of educational evaluation; emphasis on testing aspects most applicable for classroom teachers; construction of teacher-made tests; interpretation of teacher-made and standardized instruments emphasized.  Not open to students having credit in Psy. 321.  Prerequisite: Ed. 313 and prerequisites therefor.

*Ed. 345 Sociology of Education (3+0)  3 Credits  Fall
Impact of culture on schools.  Examination of contemporary social trends and relationships among church, school, government, and family.  Prerequisite: Soc. 101.

*Ed. 348 History of Education in the United States (3+0)  3 Credits  Spring
Development of American Education as a facet of social and intellectual history.  Prerequisite: Hist. 131 and 132.

Ed. 402 Methods of Teaching (3+0)  3 Credits  Fall & Spring
Principles and methods of teaching management, routine, daily programs, etc.  Prerequisite: 100 collegiate credits; Ed. 332 and prerequisites therefor.

Ed. 406 Methods of Teaching Physical Education (3+0)  3 Credits  As demand warrants
Selection of materials and presentation methods for secondary school physical education.  Prerequisite: 100 collegiate credits; Ed. 332 and prerequisites therefor.
Course Descriptions

Ed. 407 Methods of Teaching Home Economics (3+0)  3 Credits
Problems and methods in selecting and organizing materials for instruction; comparison and evaluation of methods, laboratory techniques, supplies, equipment; economy of time and materials. Admission by arrangement. Prerequisite: 100 collegiate credits, Ed. 332 and prerequisites thereto.

Ed. 408 Methods of Teaching Business Education (3+0)  3 Credits
Organization and content of high school business education courses; equipping a business education department, including selection, care and maintenance; methods in teaching bookkeeping, typewriting, shorthand and transcription. Admission by arrangement. Prerequisite: 100 collegiate credits, Ed. 332 and prerequisites thereto.

*Ed. 409 The Teaching of Reading (3+0)  3 Credits  Fall
Importance and nature of reading. Specific steps involved in the teaching of reading, word analysis, comprehension, interpretation, reading rate; new developments in reading instruction emphasizing appropriate materials. Prerequisite: Ed. 313 and prerequisites thereto.

*Ed. 421 Secondary Education (3+0)  3 Credits  Fall
Development of a working concept of secondary education in the U.S., its history, objectives, curriculum, organization, practices and consideration of current issues. Prerequisite: Ed. 313 and prerequisites thereto.

*Ed. 422 Philosophy of Education (3+0)  3 Credits  Fall
Basic philosophic concepts and their historical development; philosophy applied to education and related issues and problems; examinations of contributions of outstanding educators. Prerequisite: Phil. 101.

*Ed. 426 Principles and Practices of Guidance (3+0)  3 Credits  Fall
Introduction to the philosophies, organization, patterns and tools and techniques that aid teachers and guidance personnel in preparing students for responsible decision making in modern society. Prerequisite: Ed. 332 and prerequisites thereto.

*Ed. 428 Occupational Information (3+0)  3 Credits  As Demand Warrants
Principles and practices of vocational guidance; emphasis on sources of vocational information, its evaluation and use in educational and counseling situations. Prerequisite: Ed. 426 and prerequisites thereto.

Ed. 446 Public School Organization, Control, and Support (3+0)  3 Credits  As Demand Warrants
Fundamentals of public school organization, control and support. Relation of Federal, State, and local agencies. Problems incident to public school organization, control, and support in Alaska. Prerequisite: Senior standing in education. Not open to students who took Ed. 442/542 before it was abolished.

Ed. 452 Student Teaching (0+18)  6 Credits  Fall & Spring
Supervised teaching in elementary or secondary schools of Fairbanks or in a school approved by the Department of Education. The Department may limit registration, determine assignments, prescribe the number of teaching hours required and cancel the registration of students doing unsatisfactory work. Prerequisite: See page for requirements for admission to student teaching. May be taken concurrently with Ed. 402.

Ed. 461 Research  Credits Arr.
As demand warrants

On approval of the Head of the Education Department, fourth year students who show outstanding ability for individual study in education may undertake research during their final year.

Ed. 491 Seminar  Credits Arr.
492  Credits Arr.
As demand warrants
As demand warrants

Current topics in Education. Admission by permission of Head of the Department.

Ed. 493 Special Topics  Credits Arr.
494  Credits Arr.
Fall  Spring

Various subjects; principally directed study, discussion and research.
Ed. 604 Diagnosis and Correction of Reading Deficiencies (3+0) 3 Credits
Nature of the reading process; emphasis on psychology involved in teaching reading difficulties; testing programs to ascertain specific disabilities in readiness, vocabulary, word-attack, comprehension, speed and accuracy; specific suggestions for their correction; newer approaches to teaching reading. Prerequisite: Ed. 409 plus experience in the teaching of reading.

Ed. 620 Curriculum Development (3+0) 3 Credits
As demand warrants
Basic definition of curriculum. Present need for curriculum improvement. Criteria for selection of broad goals. Types of curriculum framework examined. Consideration of the organization of specific learning experiences as part of the curriculum structure. Prerequisite: Ed. 313 and graduate standing in education.

Ed. 623 Principles of Individual Counseling (3+0) 3 Credits
As demand warrants
Counseling techniques and procedures in education, social work, and on a limited basis, clinical psychology; their applications by the classroom teacher and guidance specialist in assisting students with adjustment problems within a normal range. Prerequisite: Ed. 426, Psy. 304 or 406 and permission of instructor.

Ed. 624 Group Counseling (3+0) 3 Credits
As demand warrants
Kinds and types of groups with emphasis on methods, problems and needed skills in working with groups in a counseling situation. Prerequisite: Ed. 426 and 623.

Ed. 627 Education Research (2+0) 2 Credits
Fall
Techniques on education research; selection topics and problems, data gathering, interpretation and preparation of reports.

Ed. 629 Individual Tests of Intelligence (2+0) 2 Credits
As demand warrants
Individual intelligence tests with emphasis on the revised Stanford-Binet Intelligence Scale and the Wechsler Intelligence Scales. Prerequisite: Ed. 332 and permission of instructor.

Ed. 630 Laboratory in Individual Tests of Intelligence (0+6) 2 Credits
As demand warrants
Provides laboratory experience in administration of the Revised Stanford-Binet Intelligence Scale or the Wechsler Intelligence Scales. Prerequisite: Ed. 629 and permission of instructor.

Ed. 631 Advanced Educational Psychology: Developmental (3+0) 3 Credits
As demand warrants
Stresses understanding of human emotional, mental, physical, and social development. Emphasis on individual differences. Assumes one previous course in human development, educational psychology, and teaching experience. Prerequisite: Graduate standing.

Ed. 633 Organization, Administration and Supervision of Guidance (2+0) 2 Credits
As demand warrants
For administrators, guidance personnel and others interested in developing or evaluating a guidance program; selection procedures and supervision of guidance personnel are considered. Prerequisite: Ed. 426.

Ed. 634 Counseling Practicum (1+4) 3 Credits
Arr.
Provides supervised field experience, including preparatory activities in an educational setting. Prerequisite: Approval of Head of Education Department; Ed. 426, Ed. 623, Psy. 304 or 406, Psy. 321.

Ed. 636 Advanced Public School Administration: Cases and Concepts (2+0) 2 Credits
As demand warrants
Case study approach to public school administration; identification and analysis of basic issues and problems; identification of pertinent data and possible solutions. Prerequisite: First course in public school administration.

Ed. 637 Public School Administration (3+0) 3 Credits
As demand warrants
Responsibility pertaining to the organization of a school and the direction of personnel. Functions of instructional leadership. Public school administration as a career. Problems incident to public school administration in Alaska. Prerequisite: Ed. 446 and graduate standing in Education.
Course Descriptions  123

Ed. 638  Supervision and Improvement of Instruction (3+0)  3 Credits
Development, purpose, organization of supervisory programs; special attention to current
in-service education programs.

Ed. 639  Public School Finance (3+0)  3 Credits
Contemporary basis for raising and distributing Federal, State and Local education funds;
problems of school financing in Alaska. Open only to advanced students in education.

Ed. 641  School Law (2+0)  2 Credits
Rights and responsibilities of teachers and pupils; rulings of the Attorney General; decisions
of the courts, regulations of the State Board of Education. Prerequisite: Graduate standing
in education.

Ed. 691  Education Seminar  Credits Arr.
692  As demand warrants

Current topics in education. Maximum credit allowed toward advanced degrees: 4 credits.
Admission by arrangement.

Ed. 693  Special Topics  Credits Arr.  Fall
694  Credits Arr.  Spring
Various subjects, principally by directed study, discussion and research. Admission by
arrangement. Prerequisite: Ed. 627 when taken as independent project in lieu of thesis.

Ed. 695  Research Education  Credits Arr.  Fall
696  Credits Arr.  Spring
Independent project in lieu of theses. Admission by arrangement. Prerequisite: Ed. 627.

Ed. 697  Thesis  Credits Arr.  Fall
698  Credits Arr.  Spring
Offered as demand warrants. Prerequisite: Ed. 627.

ELECTRICAL ENGINEERING

E.E. 102  Electrical Engineering Shop Practice (0+6)  2 Credits  Spring
Essentials of metal-working, use of hand and machine tools; chassis construction; wiring
and soldering; construction of electronic equipment. Enrollment limited. Prerequisite:
Registration in electrical engineering or consent of the instructor.

E.E. 203  Electrical Engineering Fundamentals (3+3)  4 Credits  Fall
204  4 Credits  Spring
Analysis of Alternating-current circuits using complex notation and phasor diagrams;
resonance; transformers; Fourier analysis; the complex frequency plane; three-phase circuits.
Prerequisite: Math. 200.

E.E. 313  Elements of Electrical Engineering (2+3)  3 Credits  Fall
314  3 Credits  Spring
Primarily for students of Civil, Mining, Mechanical and Chemical Engineering. Circuits,
machines, electronics, instrumentation. Prerequisite: Phys. 212.

E.E. 333  Electronics (3+3)  4 Credits  Fall
334  4 Credits  Spring
Characterization of electronic devices including semiconductors and vacuum tubes. Theory
and design of basic circuits including amplifiers, oscillators, rectifiers and detectors. Prereq-
quisite: E.E. 204. Offered in alternate years; next offered 1967-68.

E.E. 403  Machines and Power (3+3)  4 Credits  Fall
404  4 Credits  Spring
Electrical machines, with introduction to power systems: D.C. and A.C. machines, in-
cluding motors, generators, transformers, alternators, and selvys; laboratory study of
typical machine characteristics. Prerequisite: E.E. 204. Offered in alternate years; next
offered 1966-67.
E.E. 432 Fields, Lines, and Antennas (3+3) 4 Credits Spring
Use of Maxwell's equations in the analysis of waveguides, cavity resonators, and transmission lines; retarded potentials; antennas for radio and microwave frequencies. Prerequisite: Math. 302, Phys. 331. Offered in alternate years; next offered 1966-67.

E.E. 435 Advances in Electronics (3+3) 4 Credits Fall
Additional topics in electronics to extend and broaden the student's background; new developments. Prerequisite: E.E. 334. Offered in alternate years; next offered 1966-67.

E.E. 442 Digital Computers (4+0) 4 Credits Fall
Design and functioning of digital computers; system organization, programming, computer arithmetic, combinational and sequential circuits, methods of control, electronic circuitry. Prerequisite: Upper-division standing in electrical engineering, mathematics, or physics, or consent of instructor. Offered in alternate years; next offered 1967-68.

E.E. 453 Circuit Theory (4+0) 4 Credits Fall
454
Transient analysis, Fourier Analysis, network theorems, transmission lines, filters; circuit analysis by the Laplace Transform; theory of servomechanisms. Prerequisite: E.E. 204, credit or registration in Math. 302. Offered in alternate years; next offered 1967-68.

E.E. 462 Communication Systems (3+3) 4 Credits Spring
Theory and practice of communications systems; essentials of information theory; operation and maintenance of typical equipment. Prerequisite: Credit or registration in E.E. 334 and E.E. 432.

E.E. 471 Control (3+3) 4 Credits Fall

E.E. 484 Design of Electrical Systems (1+6) 3 Credits Spring
The design process; class will design a simple system with attention to capability, reliability, cost. Prerequisite: Upper-division standing. Offered in alternate years; next offered 1967-68.

E.E. 491 Seminar (1+0) 1 Credit Fall
492 1 Credit Spring
Current topics. Students will have an opportunity to present papers. Prerequisite: Senior standing in electrical engineering.

E.E. 493 Special Topics 494
Various subjects studied. Credits Arranged Fall Credits Arranged Spring

E.E. 693 Special Topics 694
Credits Arranged Fall Credits Arranged Spring

ELECTRONICS TECHNOLOGY

The first course in electricity for electronics technicians. Basic physics, electrical terms and units, meters and their use, resistance, Ohm's law, simple circuits, magnetic fundamentals, batteries, Kirchoff's laws, DC circuit analysis, inductance, capacitance, principles of alternating current, vectors, phase relationships, inductive and capacitive reactance and impedance, AC circuit analysis, series and parallel resonant circuits, transformers, Thevenin's equivalent circuit.

E.T. 51 DC Circuits (5+12) 4 Credits Fall
E.T. 52 DC Circuits (5+12) 4 Credits Fall

E.T. 55 Electronics Practice I (0+12) 3 Credits Fall
Electronic drawings, soldering, electrical connections, use of hand tools, preparation for license examinations, layout and assembly of audio-frequency equipment, operation of transmitters and receivers, troubleshooting, practical aspects of electronics.

E.T. 59 Mathematics for Electronics (5+3) 5 Credits Fall
Review of arithmetic. Selected topics in algebra, trigonometry, slide-rule, computation, graphs, analytical geometry, waveform analysis, decibel calculations. Applications to electronics. Prerequisite: High school mathematics.
Course Descriptions

E.T. 61 Tubes and Semiconductors  4 Credits  Spring
62 Electronic Circuits I (8+15)  3 Credits  Spring
63 Electronic Systems I  4 Credits  Spring
Vacuum tubes, semiconductors, transistors. Fundamentals, construction, characteristics, parameters, specifications. Power supplies, basic amplifiers, loudspeakers, microphones and pickups, basic oscillators. The radio transmitter; transmission, reception and detection of radio waves; antennas and transmission lines; the radio receiver; special receiver circuits; frequency-modulated transmitters and receivers; transistor applications; single-sideband communications. Prerequisites: E.T. 51, 52, 59.

E.T. 66 Electronics Practice II (0+12)  3 Credits  Spring
Layout and assembly of radio-frequency equipment, practical aspects of electronics, alignment and repair procedures, practical experience in electronics, use of test equipment, preparation for license examinations. Prerequisite: E.T. 55.

E.T. 71 Electronic Circuits II  5 Credits  Summer
72 Electronic Circuits III (10+18)  4 Credits  Summer
75 Microwave Electronics  4 Credits  Summer
Non-sinusoidal waveshapes, multivibrators, blocking and shock-excited oscillators, waveshaping, circuits, limiters, clamps, counters, sweep-generator circuits, special power supplies, systems, transistor applications, television transmitters and receivers. Microwaves; microwave oscillators, transmitters, duplexers, antennas, amplifiers, mixers, receivers; multiplexing. Prerequisites: E.T. 61, 62, 63.

E.T. 77 System Maintenance (0+12)  4 Credits  Summer
Principles and practice of system maintenance. Experience with a system, such as a transmitter or carrier communications system, including work with system drawings, the logbook, routine maintenance, and repair of troubles. Prerequisite: Registration or credit in E.T. 71, 72, 75.

E.T. 83 Test Instruments (3+3)  3 Credits  Fall
Use, theory, and limitations of electronic test instruments including multimeter, vacuum-tube voltmeter, oscilloscope, bridges, swept-frequency RF generator, digital voltmeter, counter. Procedures for VSWR, noise figure, gain, band width. Prerequisite: E.T. 72, 75.

E.T. 84 Electronic Systems II (5+3)  5 Credits  Fall
Organization, functioning and maintenance of large electronic systems such as radars and computers. Prerequisite: E.T. 72, 75.

ENGINEERING MANAGEMENT

E.M. 401 Construction Cost Estimating and Bid Preparation (3+0)  3 Credits  Fall
Compilation and analysis of the many items that influence and contribute to the cost of projects to be constructed. Preparation of cost proposals and study of bidding procedures. May be offered for graduate credit.

E.M. 604 Arctic Engineering (3+0)  3 Credits  Spring
Application of engineering, scientific and mathematic fundamentals to problems of advancing civilization in Arctic regions. Logistics for Arctic operations, foundations on ice and frozen ground, thermal aspects of structures and materials, Arctic transport and communication, heating and ventilating Arctic installations. Specialty will be guest lecturers.

E.M. 605 Advanced Engineering Economy (3+0)  3 Credits  Fall
The science of fiscal decision making. Graduate level studies in problems of replacement, economic selections, income tax accounting, engineering evaluation and introduction to the problems of depreciation.

E.M. 611 Engineering Management (3+0)  3 Credits  Fall
Review of accounting principles; industrial accounting including cost accounting; business organization; business finance; emphasis on use of data in management rather than its generation.

E.M. 612 Engineering Management (3+0)  3 Credits  Spring
Development of ability to seek out needed information, analyze it, and make recommendations over a wide range of managerial problems involving fiscal matters; cases involving capital acquisitions, profit maximization, methods improvement, pricing, modification of controls, and other management problems. Prerequisite: E.M. 611 and E.M. 605.
E.M. 613 Engineering Management (3+0) 3 Credits  Spring
Human element in management; labor relations, human relations, personnel administration, industrial psychology, employee relations, and labor economics from the viewpoint of needs of a manager.

ENGINEERING SCIENCES

E.S. 101 Graphics (0+6) 2 Credits  Fall
102 2 Credits  Spring
*Fall Semester: Orthographic projection, pictorial drawing, sketching, lettering, geometric construction. Charts, graphs and diagrams.
*Spring Semester: Descriptive geometry; graphic solution of 3 dimensional problems.

E.S. 111 Engineering Science (2+3) 3 Credits  Fall
112 3 Credits  Spring
Engineering problem solving with emphasis on the statics, kinematics and dynamics of engineering systems. Conservation laws, fluid mechanics and heat. *Prerequisite: Credit or registration in Math. 106 (fall) and Math. 200 (spring).

E.S. 207 Measurements (2+3) 4 Credits  Fall
Theory of measurement, precision, dispersion, distribution of error; with practice problems taken from various fields of engineering. *Prerequisite: E.S. 112.

E.S. 208 Mechanics (3+3) 4 Credits  Spring
Statics, kinematics, dynamics. Both classical and vector methods are used. Graphical solutions, work and energy, impulse and momentum, virtual work. *Prerequisites: E.S. 122 and Math 200.

E.S. 331 Mechanics of Materials (2+3) 3 Credits  Fall
Stress-strain relationships, shear and moment diagrams, design of beams, columns, rivet, bolt, and weld connections, indeterminate beams. *Prerequisites: E.S. 208, Math. 201.

E.S. 341 Fluid Mechanics (3+3) 4 Credits  Fall
Statics and dynamics of fluids. Basic equations of hydrodynamics, dimensional analysis, simple hydraulic machinery. *Prerequisite: E.S. 208, Math. 201.

E.S. 346 Basic Thermodynamics (3+0) 3 Credits  Spring
Systems, properties, processes and cycles, Fundamental principles of thermodynamics (first and second laws), elementary applications. *Prerequisite: Math. 202, Phys. 212.

E.S. 450 Engineering Management and Operations (3+0) 3 Credits  Spring
Fundamentals of Engineering Economy; contracts, specifications, legal and ethical principles, management. *Prerequisite: Senior standing or permission.

E.S. 491 Engineering Seminar  Credit Arr.  Fall or Spr.
492 Credit Arr.  Fall or Spr.

Oral and written exposition on current engineering topics.

ENGLISH

Engl. 1 Elementary English (3+0) 0 Credits  Fall-Spring
For students inadequately prepared for Englist 101. Intensive practice in written and oral comprehension. Frequent writing assignments.

Engl. 3 Laboratory in Usage (1+2.4) 0 Credits  Fall-Spring

Engl. 68 Elementary Exposition 3 Credits  Fall or Spring
Training in oral and written communication.

Engl. 101 Composition and Modes of Literature (3+0) 3 Credits  Fall or Spring
102 3 Credits  Fall or Spring
Intensive instruction in orderly thought, clear expression, and analysis of creative literature.

Engl. 201 Masterpieces of World Literature (3+0) 3 Credits  Spring
202 3 Credits  Fall
Masterworks of literature, studied to acquire a broad background and develop standards of literary judgment. *Prerequisite: 101 and 102.
Course Descriptions

**Engr. 213 Advanced Exposition (1+2)**
3 Credits  Fall-Spring
Clarity and vigor in written communication of facts and ideas. Principles of style and methods of exposition. Students write for individual weekly conferences. **Prerequisite:** Engr. 102.

**Engr. 239 Forms and Techniques of Poetry (3+0)**
3 Credits  Fall
Devices, esthetic and criticism of verse composition. **Prerequisite:** Engr. 101 and 102.

**Engr. 240 Form and Technique of Fiction (3+0)**
3 Credits  Spring
Devices, esthetic and criticism of prose composition. **Prerequisite:** Engr. 101 and 102. EXCEPT WHERE OTHERWISE INDICATED, PREREQUISITES FOR 300 AND 400 LEVEL COURSES ARE ENGLISH 201 OR 202, AND ENGLISH 239 OR 240 OR INSTRUCTOR’S PERMISSION.

**Engl. 314 Research Writing (3+0)**
3 Credits  Spring
Organizing reports, documenting research, language and style in scholarly articles. Papers in students’ fields prepared for conference and class. **Prerequisite:** Engr. 213 or by arrangement.

**Engr. 321 The Renaissance (3+0)**
3 Credits  Fall

**Engr. 322 Neoclassical Age (3+0)**
3 Credits  Spring

**Engr. 323 Romantic Period (3+0)**
3 Credits  Fall
Poetry and prose from the late 1700’s to 1830. Next offered 1967-68.

**Engr. 324 Victorian Period (3+0)**
3 Credits  Spring
Poetry and non-fictional prose, 1830-1902. Next offered 1967-68.

**Engr. 328 19th Century American Prose (3+0)**
3 Credits  Fall

**Engr. 336 20th Century American Prose (3+0)**
1-3 Credits  Fall-Spring
The major fiction of Lewis, Fitzgerald, Hemingway, Faulkner, and Steinbeck.

**Engr. 337 20th Century American Poetry (3+0)**
3 Credits  Fall

**Engr. 341 20th Century British Literature (3+0)**
3 Credits  Fall
Major achievements of modern British poetry and prose. Next offered 1967-68.

**Engr. 342 20th Century Drama (3+0)**
3 Credits  Spring
From Chekhov to Ionesco, the major dramatists and their achievements. Next offered 1967-68.

**Engr. 352 The British Novel to 1900 (3+0)**
3 Credits  Spring
Origin and development of the novel with concentration on Richardson, Fielding, Austen, E. Bronte, Dickens, Conrad and Hardy. Next offered 1967-68.

**Engr. 413 Old and Middle English Literature (3+0)**
3 Credits  Spring
Old English literature in translation; representative Middle English texts exclusive of Chaucer. Next offered 1966-67.

**Engl. 421 Chaucer**
3 Credits  Fall
Chaucer’s poetry, with emphasis on The Canterbury Tales.

**Engr. 423 Elizabethan Drama (3+0)**
3 Credits  Fall
Major plays of Elizabethan dramatists and the early plays of Shakespeare.

**Engr. 424 Shakespeare (3+0)**
3 Credits  Spring
Major works, emphasis on the later plays and review of Shakespearian criticism.

**Engr. 431 Creative Writers Workshop (3+0)**
1-3 Credits  Fall
Writing fiction and poetry. Critique of student productions.

**Engr. 441 Greek and Roman Literature (3+0)**
3 Credits  Fall
Greek and Roman literature in English translation. Next offered 1967-68.

|             | A non-laboratory introduction to physical and     |         |            |
|             | historical geology; the earth, its origin,        |         |            |
|             | processes that affect it, sequence of events in    |         |            |
|             | its evolution and succession of life on it;       |         |            |
|             | appreciation of the modern landscape. Not         |         |            |
|             | acceptable toward a degree in geology or         |         |            |
|             | fulfilling a laboratory science requirement.     |         |            |
Geol. 213 Mineralogy (3-6) 5 Credits Fall
Introduction to mineral chemistry, atomic structure, elementary crystallography, and descriptive and determinative mineralogy. Includes introduction to instrumental determinative techniques (x-ray, spectroscopy), simple qualitative chemical tests, and the theory and use of the petrographic microscope. May be taken for 4 credits by arrangement. Prerequisites: Math. 106, 206. Chem. 101, 102.

Geol. 214 Petrology (3-6) 5 Credits Spring
Mineralogy and chemical composition, genesis and identification of igneous, metamorphic and sedimentary rocks. Laboratory work is based on study of paired hand specimens and thin section. Prerequisite: Geol. 213.

Geol. 304 Geomorphology (2+3) 3 Credits Spring
Study of land forms and processes which create and modify them. Laboratory and field study of physiographic features. (Field trips.) Prerequisite: Geol. 102.

Geol. 314 Structural Geology (2+3) 3 Credits Spring
Origin and interpretation of primary and secondary geologic structures. Graphical solution of structural problems. (Field trips.) Prerequisites: Geol. 101, recommended, Geol. 102, E. S. 112, Phys. 103, or by arrangement.

Geol. 321 Principles of Sedimentation (2+3) 3 Credits Spring
Sources of materials, sedimentary and diagenetic processes, classification. Prerequisites: Geol. 213.

Geol. 351 Field Geology 8 Credits Summer
Practical experience in the procedures employed in collecting and presenting the basic data obtained from the field. Includes field mapping on topographic maps, aerial photographs, plane table maps, and presentation of results in a professional report and finished geologic map. Prerequisite: Junior status in geology. Students pay own transportation, subsistence, and course tuition fee. Entrance by pre-registration only.

*Geol. 400 Earth Sciences Journal Club (1+0) No Credits Fall & Spring
Attendance required by upper division geology majors and graduate students.

Geol. 401 Invertebrate Paleontology (3+3) 4 Credits Fall
Paleontological theory and practice. Systematic study of fossil invertebrates. Prerequisite: Geol. 101, recommended Biol. 305 (Invertebrate Zool.).

*Geol. 402 Principles of Stratigraphy (2+3) 3 Credits Fall or Spring
The history of the development of stratigraphy, its principles and application. Prerequisites: Geol. 101, recommended Geol. 321, 401.

*Geol. 406 Ore Deposits (3+0) 3 Credits Fall
Form, structure, mineralogy, petrology, and mode of origin of ore deposits. (Field trips.) Prerequisites: Geol. 214, 314.

*Geol. 408 Map Interpretation (1+9) 4 Credits Fall or Spring
Topographic maps in interpretation of geologic structures, analysis of local and regional geomorphic development. Prerequisite: Geol. 304.

*Geol. 410 Micropaleontology (2+3) 3 Credits Fall or Spring
Microfossils and their use in stratigraphic correlation. Prerequisite: Geol. 102. Offered as demand warrants.

*Geol. 412 Geology of Alaska (2+3) 3 Credits Fall or Spring
Study and interpretation of the geology of Alaska. (Field trips.) Prerequisites: Geol. 102, 314, 304. Offered as demand warrants.

*Geol. 413 Vertebrate Paleontology (2+3) 3 Credits Fall
Systematic study of the fossil vertebrates, with emphasis on evolution, morphology and ecology. (Field trips.) Prerequisite: Geol. 102.

*Geol. 415 Geology and Engineering (3+0)
Problems of Frozen Ground 3 Credits Fall
Geological and engineering importance of seasonally and perennially frozen ground (permafrost). Properties, distribution, origin of ice in the ground and its application to engineering and land utilization problems in the northern States, Canada, and Alaska. (Field trips.) Prerequisites: Geol. 101, Phys. 111.

Geol. 416 Introduction to Geochemistry (2+3) 3 Credits Spring
Introduction to chemistry of the earth. Prerequisites: Chem. 101, 102.
**Course Descriptions 131**

**Geol. 421**  
Principles of Seismology (3+0)  
3 Credits  
Fall  
Historical introduction, observational seismology, seismometry, simple elastic wave propagation. *Admission by arrangement.*

**Geol. 491**  
Seminar in Geology  
Credits Arr.  
Fall

**Geol. 492**  
Seminar in Geology  
Credits Arr.  
Spring

Various subjects studied. *Admission by arrangement.*

**Geol. 493**  
Special Topics—Problems in Various Fields of Geology  
Credits Arr.  
Fall

**Geol. 494**  
Special Topics—Problems in Various Fields of Geology  
Credits Arr.  
Spring

Geologic problems of the student's choice approved by instructor. Transportation expenses met by student. No more than 3 credits allowed per semester. *Admission by arrangement.*

**Geol. 605**  
Glacial Geology I (2+3)  
3 Credits  
Fall

Phase relations between solid liquid and vapor states, supercooling, nucleation and freezing of water in all environments: lakes, rivers, oceans, atmosphere, soil, rock, and plant and animal tissue. Diagenetic processes in snow cover, densification of snow to glacier ice. Laboratory and field work. *Admission by arrangement.*

**Geol. 606**  
Glacial Geology II (2+3)  
3 Credits  
Spring

Physical properties of ice from various environments including seasonal and perennially frozen ground. Glaciers, distribution, classification, heat and temperature relations and glacier flow. Glaciation—alpine and continental. Laboratory and field work. *Admission by arrangement.*

**Geol. 608**  
Seminar in Pleistocene Environment (1+0)  
1 Credit  
Spring

Discussion of glaciations, land bridges, Mackenzie Corridor problem, permafrost in relation to biogeography including coming of man. Faculty panel of geologists, glaciologists, anthropologists, biologists, and botanists. *Prerequisite: Geol. 304, 605, 606, or by arrangement. One seminar. Offered as demand warrants.*

**Geol. 611**  
Stratigraphic Paleontology (2+3)  
(Paleozoic)  
3 Credits  
Fall

North American index fossils and stratigraphy of North America and Europe. *Prerequisite: Geol. 401, 402. Offered in alternate years; next offered 1967-68.*

**Geol. 612**  
Stratigraphic Paleontology (2+3)  
(Mesozoic and Cenozoic)  
3 Credits  
Spring

North American index fossils and stratigraphy of North America and Europe. *Prerequisites: Geol. 401, 402. Offered in alternate years; next offered 1967-68.*

**Geol. 622**  
Advanced Metamorphic Petrology (2+6)  
4 Credits  
Spring

*Prerequisite: Geol. 214, 321. Offered in alternate years; next offered 1967-68.*

**Geol. 624**  
Advanced Igneous Petrology (2+6)  
4 Credits  
Spring

*Prerequisite: Geol. 214, 321. Offered in alternate years; next offered 1966-67.*

**Geol. 627**  
Advanced Structural Geology I (3+0)  
3 Credits  
Spring

Large scale structural features, time and place in orogenesis, theories of orogenesis. *Prerequisite: Geol. 314. Offered in alternate years; next offered in 1966-67.*

**Geol. 628**  
Advanced Structural Geology II (3+0)  
3 Credits  
Spring

Structural petrology, mechanisms of folding, theoretical basis for mechanical behavior of rocks. *Prerequisite: Geol. 214, 314. Offered in alternate years; next offered in 1967-68.*

**Geol. 693**  
Special Topics  
Credits Arr.  
Fall

Research in various fields.

**Geol. 697**  
Thesis or Dissertation  
Credits Arr.  
Fall

**Geol. 698**  
Credits Arr.  
Spring

By arrangement. Transportation expenses met by the student.
GERMAN

Ger. 101 Elementary German (5+0)  5 Credits  Fall
102                           5 Credits  Spring
Designed to teach students to hear, speak, read and write German. Oral practice emphasized.

Ger. 150 Scientific German (3+0)  3 Credits  Spring
Rapid acquisition of a reading knowledge of scientific German. Offered as demand warrants.

Ger. 201 Intermediate German (3+0)  3 Credits  Fall
202                           3 Credits  Spring
Continuation of German 102. Increasing emphasis on reading ability and cultural material. Conducted in German. Prerequisite: German 102 or 2 years of high school German.

*Ger. 321 Studies in German Literature (3+0)  3 Credits  Fall
322                           3 Credits  Spring
Choice of authors, genres, or periods of German literature for intensive study. Prerequisite: German 202 or equivalent. Students may repeat course for credit when topic varies.

*Ger. 493 Special Topics  Credits Arr.  Fall
494                           Credits Arr.  Spring
Various subjects in German. Designed for advanced students. Admission by arrangement. Offered as demand warrants.

HISTORY

Hist. 117 Formation of European Civilization (3+0)  3 Credits  Fall
Political, economic and social history of Europe from the late Roman Empire to the Reformation.

Hist. 118 Development of Modern Europe (3+0)  3 Credits  Spring
Political, social, economic and cultural history of Europe from 1500 to the present. Evolution of nationalism, democracy; their interrelationship with the Industrial Revolution.

Hist. 131 History of the U. S. (3+0)  3 Credits  Fall
132                           3 Credits  Spring
Fall semester: The discovery of America to 1865; colonial period, Revolution, formation of the Constitution, western expansion, Civil War. Spring Semester: From the Reconstruction to the present.

Hist. 221 English History (3+0)  3 Credits  Fall
222                           3 Credits  Spring
Fall semester: Pre-Roman Britain to the end of the Puritan Revolution, emphasizing constitutional developments. Spring semester: From the Restoration of 1660 to the present, emphasizing social and economic developments. Offered in alternate years; next offered in 1966-67.

Hist. 223 Ancient History (3+0)  3 Credits  Fall or Spring
Political, social, economic and cultural development of the ancient Near East, Greece and Rome.

Hist. 254 History of Canada (3+0)  3 Credits  Fall or Spring
The French foundation to the establishment of dominion status, relations with the U.S. and British Commonwealth of nations. Offered as demand warrants.

Hist. 261 Russian History (3+0)  3 Credits  Fall

Hist. 262 Russian History (3+0)  3 Credits  Spring
The Romanoffs and the Development of the Russian Empire; the Petrine Reforms; the Great Reform of the 19th Century; revolutionary movements; Strains and stresses in Tsarist Russia. Offered in alternate years. Next offered 1967-68.
*Hist. 302 The Old Regime, the Enlightenment (3+0) and the French Revolution
The political, social and economic structure of the Old Regime; intellectual developments in the 18th century; the Revolution and the Napoleonic period; influence of France upon European development in the 18th century. Prerequisite: Hist. 118.

*Hist. 305 Europe: 1815 to 1870 (3+0) 3 Credits Fall or Spring
Political, economic, social, and intellectual history. Development of Industrial Revolution, romantic movement and unification of Germany and Italy. Prerequisite: Hist. 118. Offered in alternate years; next offered 1967-68.

*Hist. 306 Europe: 1870 to 1914 (3+0) 3 Credits Fall or Spring
Continuation of Hist. 305. The rise of socialism, imperialism, outbreak of World War I. Prerequisite: Hist. 118.

*Hist. 315 Contemporary Europe (3+0) 3 Credits Fall or Spring
Europe from 1914 to the present. Prerequisite: Hist. 117, Hist. 118 or by arrangement. Offered in alternate years; next offered 1966-67.

Hist. 341 History of Alaska (3+0) 3 Credits Fall
The Russian background; acquisition, settlement, and development of Alaska as an American territory and the 49th state. Prerequisite: Junior standing.

*Hist. 344 The Soviet Union (3+0) 3 Credits Fall or Spring
Origin and development of the Soviet Union from the Revolution of 1917 to the present day; stages of economic development; Soviet government and the Communist Party. Prerequisite: Hist. 118 or Hist. 261 or by permission. Offered in alternate years; next offered 1967-68.

*Hist. 363 The Far East in Modern Times (3+0) 3 Credits Fall or Spring
Nations of eastern Asia; their relations with the West since the early nineteenth century. Prerequisite: Admission by arrangement. Offered in alternate years; next offered 1967-68.

*Hist. 416 The Renaissance (3+0) 3 Credits Fall or Spring
Political, social, economic, and cultural developments in the Age of the Renaissance. Prerequisite: Hist. 117, Hist. 118. Offered in alternate years; next offered 1966-67.

*Hist. 430 American Colonial History (3+0) 3 Credits Fall or Spring
Early America; European settlement; economic and social development of the American community; establishment of political independence. Prerequisite: Hist. 131, Hist. 132. Offered in alternate years; next offered 1967-68.

*Hist. 433 Civil War and Reconstruction (3+0) 3 Credits Fall or Spring
Political, economic, social, and diplomatic history from 1860-77; disruption and reestablishment of the Union. Prerequisite: Hist. 131, Hist. 132. Offered in alternate years; next offered 1966-67.

*Hist. 440 The Westward Movement (3+0) 3 Credits Fall or Spring
Westward migration; establishment of new states and political institutions. Influences of the West. Prerequisite: Hist. 131, Hist. 132. Offered in alternate years; next offered 1967-68.

*Hist. 450 Twentieth Century America (3+0) 3 Credits Fall or Spring
United States from the Progressive Movement to the present day, with emphasis on domestic developments. Prerequisite: Hist. 131, Hist. 132. Offered in alternate years; next offered 1966-67.

*Hist. 451 Twentieth Century American Diplomacy (3+0) 3 Credits Fall or Spring
Foreign relations from the United States' rise to world power through the Eisenhower administration. Prerequisite: Hist. 131, Hist. 132. Offered in alternate years; next offered 1967-68.

*Hist. 461 American Intellectual and Cultural History (3+0)
Lectures, readings, discussion. Examination of the development of American thought, including the transfer and modification of European ideas and the influence of American conditions on popular attitudes and culture. The semester division comes at approximately 1865. Prerequisite: Hist. 131, Hist. 132. Offered in alternate years; next offered 1966-67.

*Hist. 475 Introduction to Historical Method (3+0) 3 Credits Fall or Spring
Methods of historical research. Preparation and criticism of student research papers on selected topics. Admission by arrangement.
HOME ECONOMICS

H.E. 102 Meal Management (2+3) 3 Credits Fall or Spring
Planning, buying, preparing and serving meals. Emphasis on management, cost, nutrition.

H.E. 113 Clothing Construction and Selection (1+6) 3 Credits Fall or Spring
Fundamental sewing processes in garment construction, using modern techniques. Clothing selection and wardrobe study and the psychological and social significance.

H.E. 121 Related Art (1+3) 2 Credits Fall
Practice in creative design to understand, appreciate and apply art principles in everyday life. Home furnishing is included in the second semester.

H.E. 211 Textiles (2+3) 3 Credits Fall
Identification, structure, selection, use, care of fabrics.

H.E. 236 Marriage and Family Life (3+3) 3 Credits Fall or Spring
Preparation for marriage and family life; personality development, dating, courtship, engagement, morality, reproduction, conflicts, money matters, crises, divorce, religion, parenthood and other topics.

H.E. 241 Home Management Residence 3 Credits Fall or Spring
Complete responsibility for a home with an opportunity to be creative and to experiment. Credit depends on the time of residence in the University Home Management house. Admission by arrangement.

H.E. 242 Household Equipment (2+3) 3 Credits Fall or Spring
Selection, operation, care and efficient arrangement of household equipment for family use. Offered as demand warrants.

H.E. 302 Advanced Foods (2+3) 3 Credits Fall or Spring
Food selection and preparation based on composition, nutrition and basic scientific principles and comparison of methods. Food preservation. Prerequisite: 3 hours of Biol. and 3 hours of Chem.

*H.E. 304 Nutrition (3+0) 3 Credits Fall or Spring
Nutritional value of foods. Planning and evaluation of diets. Practical application to daily living.

H.E. 305 Child Development 5 Credits Fall & Spring
Theory and laboratory of human mental, emotional, social, and physical development. Not open to students having credit in human development, child psychology or development, or adolescent psychology or development. Prerequisite: Psy. 101, 45 collegiate credits, and permission of instructor.

H.E. 311 Costume Study: History and Design (2+3) 3 Credits Spring
Historic costume; suitability of color, fabric and design; creative problems in costume design. Prerequisite: H.E. 122 or by arrangement. Offered as demand warrants.

H.E. 312 Advanced Clothing (1+6) 3 Credits Spring
Advanced clothing problems in selection, fitting, construction, fabrics, and design; modern construction techniques. Prerequisite: H.E. 113 or by arrangement.
H.E. 401 Consumer Buying (3+0) 3 Credits  Fall or Spring Problems of consumers in buying goods and services to satisfy wants and needs. Offered as demand warrants.

H.E. 402 Nursery School Laboratory (0+9) 3 Credits  Fall or Spring Observation, experience, participation in the guidance of young children. Prerequisite: H.E. or Psy. 251 and permission of instructor.

H.E. 404 Quantity Cookery (1+6) 3 Credits  Fall or Spring Cooking for large groups; institutional management. Prerequisite: H.E. 302. Offered as demand warrants.

H.E. 405 Camp Cookery (0+3) 1 Credit  Fall or Spring For men only. Preparation of nutritious meals from foods available in camps. Offered as demand warrants.

H.E. 406 Cafeteria Management (1+6) 3 Credits  Fall or Spring Buying and management for institutional feeding. Prerequisite: H.E. 404. Offered as demand warrants.

*H.E. 412 Clothing Problems (0+6) 2 Credits  Fall or Spring Advanced work in clothing selection and construction. I Freedom in the selection and execution of problems. Prerequisite: H.E. 312. Offered as demand warrants.

*H.E. 413 Pattern Drafting and Draping (1+6) 3 Credits  Fall or Spring Drafting of flat patterns; draping of fabrics for construction of student-designed garments. Prerequisite: H.E. 312. Offered as demand warrants.

H.E. 422 Weaving (0+3) 1 Credit  Fall

424 1 Credit  Spring

Hand weaving of textiles, including rugs. Several looms used. Laboratory time averages three hours per week. Offered as demand warrants.

H.E. 441 Family Health (1+3) 2 Credits  Fall Family and community health; home nursing, first aid. Offered in alternate years; next offered 1965-66.

*H.E. 445 Home Management (3+0) 3 Credits  Fall or Spring Time, energy, finance, housing, and other management problems in relation to family living. Prerequisite: H.E. 241 and Junior standing. Offered in alternate years.

*H.E. 446 House Planning and Furnishing (1+6) 3 Credits  Spring Planning, building, furnishing, decorating a home. Field trips to homes. Offered as demand warrants.

*H.E. 491 Seminar (1+0) Credits Arr.  Fall

492 Credits Arr.  Spring

Selected topics in Home Economies.

*H.E. 493 Special Topics (1+0) Credits Arr.  Fall

494 Credits Arr.  Spring

Various subjects studied, principally through directed reading and discussions. Admission by arrangement.

**HUMANITIES**

Humanities 211 Humanities (4+0) 3 Credits  Fall

212 3 Credits  Spring

Integrated introduction to the fundamental principles of literature, music, arts, and philosophy. Prerequisites: English 101-102, History 117-118 recommended. Sophomore standing.

**JOURNALISM**

Jour. 201 Introduction to Journalism (2+3) 3 Credits  Fall

Structure of news stories, various news leads and feature stories; gathering and evaluating information for simple news stories; writing stories. Prerequisite: English 102 or by arrangement.
Jour. 202  Advanced News Writing (2+3) 3 Credits  Spring
Study and writing of involved news stories; emphasis on the feature. Prerequisite: Jour. 201.

Jour. 203  Photography (1+3) 2 Credits  Fall or Spring
Picture-taking techniques and darkroom procedures; emphasis on the camera in the modern press. Admission by arrangement.

Jour. 204  Journalism Laboratory (0+3, 6 or 9) 1, 2, or 3 Credits  Fall or Spring
Credits arranged for students holding editorial or other positions on university publications or obtaining other similarly supervised experience in journalism practices. Prerequisite: Engl. 102 or permission. By arrangement.

*Jour. 311  Magazine Article Writing (3+0) 3 Credits  Fall or Spring
Study and practice in writing articles for publication in national media. Students repeating the course limited to a total of six credits. Admission by arrangement.

Jour. 312  Editing (3+0) 3 Credits  Spring
Editorial writing, editing copy, writing headlines; newspaper layout; general study of mechanical, circulation, editorial, and advertising departments. Prerequisite: Jour. 202.

Jour. 493  Special Topics
Credits Arr.  Fall
Credits Arr.  Spring
Various subjects in journalism. Offered as demand warrants. Admission by arrangement.

LAND RESOURCES

Land Res. 101  Conservation of Natural Resources (2+0) 2 Credits  Fall
Conservation of renewable and non-renewable natural resources, emphasizing the United States situation.

Land Res. 311  Soils (2+3) 3 Credits  Spring
Origin and development, weathering, classification, terminology; physical and chemical properties, biology, aeration and moisture; reaction and liming; manures and fertilizers; management; problems in Alaska. Prerequisite: Chem. 101. Offered alternate years; Next offered 1966-67.

Land Res. 491  Seminar
Credits Arr.  Fall
492
Credits Arr.  Spring
Topics in land resources. Offered as demand warrants.

Land Res. 493  Special Topics
Credits Arr.  Fall
494
Credits Arr.  Spring

Land Res. 691  Seminar
Credits Arr.  Fall
692
Credits Arr.  Spring
Topics in land resources. Offered as demand warrants.

Land Res. 693  Special Topics
Credits Arr.  Fall
693
Credits Arr.  Spring

Land Res. 697  Thesis
Credits Arr.  Fall
698
Credits Arr.  Spring
Admission by arrangement.

LINGUISTICS

*Ling. 281, 381  Structural Linguistics and (3+0) 3 Credits  Fall
Linguistics Analysis (3 Credits  Spring
Introduction to the structure of language and practice in analysis; sound structure (phonetics and phonology); grammatical structure (morphology and syntax). Work with Alaskan Native languages. Offered as demand warrants.

*Ling. 283, 385  Alaskan Eskimo (3+0) 3 Credits  Fall
286, 386  3 Credits  Spring
Analysis of the living language with native speaker in the classroom. Learning to read and write the language. Admission by arrangement. Offered as demand warrants.

*Ling. 388  Alaskan Athapaskan (3+0) 3 Credits  Spring
Athapaskan languages in general and Alaskan dialects in particular; dialect geography; comparative phonology; Eyak, Tlingit, Haida. Admission by arrangement. Offered as demand warrants.
Course Descriptions 137

*LING. 485 Eskimo Workshop
486
Credits Arr. Fall
Credits Arr. Spring
Advanced work in Eskimo, including creative writing, transcription of texts, study of comparative Eskimo dialectology; Aleut: preparation of materials for radio broadcasts and publication. Prerequisite: Ling. 286 or 385, or speaking knowledge of Eskimo and permission of instructor. Offered as demand warrants.

*LING. 493 Special Topics
494
Credits Arr. Fall
Credits Arr. Spring
Various languages and subjects in linguistics. Admission by arrangement. Offered as demand warrants.

MATHEMATICS

No student will be permitted to enroll in a course having prerequisites if a grade lower than C is received in the prerequisite course.

Math. A Review of Algebra (5+0) 0 Credits Fall or Summer
Required of those insufficiently prepared to take Math. 122 or 106. May be used to remove high school deficiency. Five classes 1 hr.

Math. 106 College Algebra and Trigonometry (5+0) 5 Credits Fall or Spring
Review of high school algebra, determinants, matrices, topics in the theory of equations, systems of equations, inequalities, curve sketching, probability, and applications; plane trigonometry with emphasis on the analytical and periodic properties of trigonometric functions.

†Math. 107 College Algebra (3+0) 3 Credits Fall or Spring
Review of high school algebra, determinants, matrices, topics in the theory of equations, systems of equations, inequalities, curve sketching, probability, and applications.

Math. 108 Trigonometry (2+0) 2 Credits Fall or Spring
Plane trigonometry with emphasis on the analytical and periodic properties of trigonometric functions. Prerequisite: Math. A or equivalent.

†Math. 109 Analytic Geometry (3+0) 3 Credits Fall or Spring
Rectangular co-ordinate system, the straight line, conic sections, transcendental curves, polar co-ordinates, parametric equations, and solid analytic geometry. Prerequisite: High School trigonometry or Math 108.

Math. 110 Mathematics of Finance (3+0) 3 Credits Spring
Simple and compound interest, discount, annuities, amortization, sinking funds, depreciation and capitalization. Prerequisite: Math. A or by arrangement.

†Math. 111 Beginning Calculus (3+0) 3 Credits Fall or Spring
Sequences, limits, differentiation and applications, integration and applications, differentiation of algebraic and transcendental functions. Prerequisite: Math. 109.

Math. 121 Introduction to Modern Algebra and Analysis 4 Credits Fall
4 Credits Spring
First Semester: Sets, relations, functions, algebraic systems, groups, rings, fields, vectors spaces, matrices, and linear transformations.
Second Semester: Trigonometry limits, continuity, differentiation, integration, differential equations, difference equations. This sequence is not open for credit to Math majors. The student may enroll in Math 200 upon completion of this sequence.

Math. 200 Calculus (4+0) 4 Credits Fall or Spring
201 4 Credits Fall or Spring
202 4 Credits Fall or Spring
Techniques and application of differential and integral calculus, vector analysis, partial derivatives, multiple integrals and infinite series. Prerequisite: Math. 106 or 122. Admission to Math. 201 is also possible on completion of Math. 111.

</table>

Descriptive statistics, frequency distributions, mean, median, mode, standard deviation; elementary probability; inferential statistics; estimation of population parameters, tests of hypotheses including non-parametric methods, correlation, linear regression, and analysis of variance. Prerequisite: Math. 106 or Math. 121.

Background for better understanding and appreciation of fundamental principles, underlying mathematics taught in elementary schools. Prerequisite: Math. 121.

A critical examination of the familiar real and complex number system from a postulational point of view, followed by generalizations to groups, rings, and fields. Prerequisite: Math. 202 or Math. 204 or permission of instructor.

Organization, function, and applications of digital computers, with special reference to IBM 1620. Programming languages, including machine language, SPS, FORTRAN, and Algol. Directed primarily to needs of scientific and statistical calculation. Emphasis on individual use of the IBM 1620. Prerequisite: Math. 202 or Math. 204 or permission of instructor.

Numerical analysis and computer programming designed for engineering students. FORTRAN language for IBM 1620; numerical approximations, solution of differential equations, non-linear equations, iterative and direct methods for simultaneous linear equations. Individual use of computer parallels lecture topics. Prerequisite: Math. 302.

Partial differentiation, vectors, Stieltjes integral, multiple integrals, line and surface integrals, series, convergence of improper integrals, Fourier series. Prerequisite: Math. 202 and consent of instructor.

Distributions of random variables and functions of random variables, interval estimation, point estimation, sufficient statistics, order statistics, tests of hypotheses including criteria for goodness of test. Prerequisite: Math. 372. Offered as demand warrants.

Methods of analyzing data; constructing and analyzing designs for experimental investigations; completely randomized, randomized block, and Latin-square designs, split-plot design, incomplete block design, simple and partially confounded factorial designs, lattice and cubic lattice designs, treatment of missing data, comparison of designs. Prerequisite: Math. 202. Offered as demand warrants.

Mathematical approach to Game Theory and Linear Programming with application to economics and operations research. Prerequisite: Math. 314.

Differential geometry of curves and spaces in Euclidean three-space and extensions to Riemannian n-space.
Course Descriptions

Math. 421 Vector and Tensor Analysis (3+0) 3 Credits
Fundamental operations on vectors and tensors, consideration of gradient, divergence, and curl; applications in physics and mechanics. Offered as demand warrants.

Math. 471 Stochastic Processes (3+0) 3 Credits Fall
Elements of stochastic processes and their applications, the Wiener process and the Poisson process, stationary and evolutionary processes, harmonic analysis, random walks, Markov Chains, and elementary queuing theory. Prerequisite: Math. 372. Offered as demand warrants.

Math. 491 Seminar 492
Credits Arr. Fall
Credits Arr. Spring
Topics are selected according to needs and interests of the students to introduce them to independent study and research.

Math. 493 Special Topics (2+0) 494
Credits Arranged Fall
Credits Arr. Spring
Primarily for mathematics majors. Various topics studied.

Math. 601 Complex Function Theory (3+0) 602
3 Credits Fall
3 Credits Spring
Analytic functions, singularities, analytic continuation, integration, Riemann surfaces, the logarithmic function, conformal representation. Prerequisite: Math. 402 or by arrangement. Offered as demand warrants.

Math. 605 Real Function Theory (3+0) 606
3 Credits Fall
3 Credits Spring
Real number system, sequences, topological spaces, measure theory. Lebesgue integral. Prerequisite: Math. 402, or by arrangement. Offered as demand warrants.

Math. 608 Partial Differential Equations (3+0) 610
First and second order differential equations, boundary value problems, existence and uniqueness theorems, Green’s functions, principal equations of mathematical physics. Prerequisite: Math. 402, or by arrangement. Offered as demand warrants.

Math. 609 Modern Algebra (3+0) 610
3 Credits Fall
3 Credits Spring
Groups, rings, fields, matrices, lattices, vector spaces, representation. Prerequisite: Math. 303. Offered as demand warrants.

Math. 611 Mathematics of Physics & Engineering (3+0) 612
3 Credits Fall
3 Credits Spring
Infinite series, functions of several variables, algebra and geometry of vectors, matrices, vector field theory, partial differential equations, complex variables. Prerequisite: Math. 302. Offered as demand warrants.

Math. 693 Special Topics 694
Various subjects studied.

Math. 697 Thesis 698
Credits Arr. Fall
Credits Arr. Spring
†Not offered on College campus.

MECHANICAL ENGINEERING

M.E. 302 Kinematics of Machines (2+3) 3 Credits Spring
Velocity and acceleration analyses of mechanisms and machines; principles of transforming and transmitting motion, including linkages, cams, gears, belts, chains, and trains of mechanism; dimensional synthesis. Prerequisite: Math. 202, E.S. 208.

M.E. 321 Industrial Processes (3+0) 3 Credits Fall
Methods and equipment used in working, welding, casting, cutting, machining and fabrication of materials.

M.E. 401 Machine Design (2+6) 3 Credits Fall
Design of machine elements, including allowances, tolerances, keys, shafts, couplings, springs, clutches, belts, brakes, flywheels, power screws, gears, bearings, lubrication and stress analysis of components. Prerequisite: E.S. 331, M.E. 302.
M.E. 412 Space Conditioning (2+3) 3 Credits  Spring
Principles of heating, ventilating, air conditioning and refrigeration with practical applications. Prerequisite: E.S. 341, E.S. 346, M.E. 441.

M.E. 413 Mechanical Engineering Thermodynamics (3+0) 3 Credits  Fall
Continuation of E.S. 346, including vapor power cycles (Rankine, regenerative); flow through nozzles and diffusers; gas power cycles; gas mixtures and psychrometrics; vapor compression refrigeration cycles. Prerequisite: E.S. 346, E.S. 341.

M.E. 418 Power Analysis (3+3) 4 Credits  Spring
Fundamentals of power generation including piping, pumps, fuels and combustion, steam generators, condensers, deaerators, evaporators, feedwater treatment and heating, regeneration, fuel handling, heat balance, equipment, economics and plant layout. Prerequisite: M.E. 413.

M.E. 430 Instruments and Controls (2+3) 3 Credits  Fall or Spring
Automatic control and instrumentation of equipment including mechanical, hydraulic, pneumatic, electric and electronic systems. As demand warrants. Prerequisite: Senior standing.

M.E. 441 Introductory Heat Transfer (3+0) 3 Credits  Fall
Theory of heat and mass transfer, including transient, two dimensional heat flow and changes of state. Prerequisite: E.S. 346.

METALLURGY

Mat. 304 Introduction to Metallurgy (3+0) 3 Credits  Spring
Definitions and principles of basic science and engineering principles as applied to process and adaptive metallurgy. Prerequisites: Math. 102, Chem. 202 or 211, Phys. 212.

Mat. 312 Fire Assaying (0+6) 2 Credits  Spring
Sampling and preparation of ores, mill products, and smelter products for assay. Assaying gold, silver, and copper. Prerequisite: Mat. 301; concurrent Chem. 212. Offered as demand warrants.

Mat. 332 Physical Metallurgy and Metallography (3+3) 4 Credits  Spring
Properties of metals and alloys, metal crystals, chemical and metallic bonds, equilibrium diagrams, defect in metals, heat treatment, pyrometry, foundry, forging, welding, principles, and applications of electron microscope, x-ray. Electron and x-ray diffraction. Equipment used in metallurgy. Prerequisite: Mat. 304. Offered as demand warrants.

Mat. 493 Special Topics  Credits Arr.  Fall
Mat. 494 Special Topics  Credits Arr.  Spring
Various subjects studied, principally through directed reading and discussions. Admission by arrangement.

Mat. 693 Special Topics  Credits Arr.  Fall
Mat. 694 Special Topics  Credits Arr.  Spring
Various subjects studied. Admission by arrangement.

MILITARY SCIENCE

Mil. 101 First-Year Military Science (2+1) 1 ½ Credits  Fall
1 ½ Credits  Spring
First-year basic: Organization of the Army; individual weapons and marksmanship; U.S. Army and National Security; school of the soldier and exercise of command.

Mil. 201 Second-Year Military Science (2+1) 1 ½ Credits  Fall
1 ½ Credits  Spring
Second-year basic: American military history; map and aerial photography reading; introduction to operations and basic tactics; school of the soldier and exercise of command.

Mil. 301 Third-Year Military Science (3+1) 3 Credits  Fall
3 Credits  Spring
First-year advanced: Leadership; military teaching; branches of the Army; small unit tactics; communications; school of the soldier and exercise of command.

Mil. 401 Fourth-Year Military Science (3+1) 3 Credits  Fall
3 Credits  Spring
Second-year advanced: Operations; logistics; Army administration; military law; the role of the U.S. in world affairs; service orientation; school of the soldier and exercise of command.
MINERAL PREPARATION ENGINEERING

M.Pr. 313 Introduction to Mineral Preparation (2-3) 3 Credits Fall
Elementary theory and principles of unit processes of liberation, concentration and solid-liquid separation as applied to mineral beneficiation. Prerequisites: Junior standing or by permission.

M.Pr. 314 Unit Preparation Processes (1-6) 3 Credits Spring
Principles and practices involved in liberation and concentration by gravity, electromagnetic and electrostatic methods. Analysis of costs and economics of mill operation. Flowcharts for different ores developed in the laboratory on a pilot plant scale. Prerequisite: M.Pr. 313.

M.Pr. 418 Emission and X-ray Spectroscopy (2-3) 3 Credits Spring
Theory and application of the emission spectrophotograph and the X-ray spectrometer as analytical tools in the fields of science and engineering. Prerequisite: Permission of instructor.

M.Pr. 433 Coal Preparation (2-3) 3 Credits Fall
Unit operations, flowsheets, washability characteristics and control by sink-float methods for coal preparation plants. Market requirements and economics of preparation. Prerequisite: M.Pr. 313.

M.Pr. 493 Special Topics Credits Arr. Fall
Various subjects studied through directed reading, discussions and laboratory work. Admission by arrangement.

M.Pr. 601 Froth Flotation (2-3) 3 Credits Fall
Theory and application of bulk and differential froth flotation to metallic minerals, nonmetallic minerals and coal. Admission by arrangement.

M.Pr. 606 Plant Design (1-6) 3 Credits Spring
Selection, design and layout of equipment for erection and operation of mineral and coal beneficiation plants for specific custom and milling problems. Admission by arrangement.

M.Pr. 692 Special Topics Credits Arr. Fall
Various subjects studied. Admission by arrangement.

M.Pr. 695 Mineral Preparation Research (1-6) 3 Credits Fall
696 3 Credits Spring
Familiarizes students with the concept of basic research and its needs in the field of mineral beneficiation, including such research subjects as magnetic susceptibility, dielectric constants and electrical conductivity of minerals; chemical theory and mechanism of bubble contact in flotation; the effect of ultrasonic vibration in unit processes. Admission by arrangement.

M.Pr. 697 Thesis 3 Credits Fall
698 3 Credits Spring
Application of fundamentals to the actual beneficiation problems of Alaskan ores; to produce increased effectiveness in ability to organize, interpret, and present the results of research clearly, precisely and with meaning in acceptable thesis form.

MINING ENGINEERING

Min. 102 Mining Engineering Systems A, B, C (4-0) 4 Credits Spring
Can be taken for any combination of parts A, B, C.

Min. 102A—Introduction to mineral industries and elementary principles of exploration. Four, one hour classes per week for 4 weeks. 1 Credit.

Min. 102B—Utilization and application of mining explosives. Four, one hour classes for 4 weeks. 1 Credit.

Min. 102C—Fundamentals of Mining systems for bedded, massive, vein and surface deposits. Four, one hour classes per week for 8 weeks. 2 Credits.

Min. 302 Mine Surveying (2-3) 3 Credits Spring
Surveying principles for surface and underground control of mining properties. Field and office procedures for preparation of maps and engineering data. Prerequisite: E.S. 112.
Min. 303 Mining Plant Engineering (3+3) 4 Credits Fall
Principles of mine ventilation, haulage, pumping and energy transmission systems. Prerequisites: Min. 102, Phys. 212 and E.S. 341 (concurrent).

Min. 306 Rock Mechanics (2+3) 3 Credits Spring
Analysis of stress and strain. Physical properties of rock and fundamentals of rock behavior. Rock stresses in mining with design and layout of underground workings. Prerequisite: E.S. 331.

Min. 331 Mining Law (2+0) 2 Credits Fall
History of the development of mining law; the essentials of mining laws of the United States and Alaska. Discussions and interpretation of important court decisions in mining litigation. Offered as demand warrants.

Min. 400 Practical Engineering Report 1 Credit Spring
Twelve weeks practical work in some industry or project related to the student's option, or equivalent. Performed during one or more of the summer vacations prior to the fourth year. Offered as demand warrants.

Min. 405 Geophysical and Geochemical Exploration (2+3) 3 Credits Spring

Min. 408 Mineral Valuation and Economics (3+3) 4 Credits Spring
Theory of sampling techniques, deposit and reserve calculations, and analysis of mineral economic problems. Prerequisite: Min. 102 or permission.

Min. 430 Seminar and Senior Field Trip 1 Credit Fall or Spring
Mining field trip. Mines and districts, selected for exemplifying and providing instruction in geological principles, mining methods, metallurgical practices, and industrial economics. Seminar discussions cover operations and industries visited. Fee: Field trip expenses to be paid by student. Offered as demand warrants.

Min. 493 Special Topics 494 Special Topics Credits Arr. Fall Credits Arr. Spring
Various subjects studied, principally through directed reading and discussions. Admission by arrangement.

Min. 496 Mining or Mineral Research (1+6) 3 Credits Spring
Selected mining, mineral preparation or mineral economic research problems. Prerequisite: Senior standing or permission.

Min. 621 Advanced Mineral Economics (3+0) 3 Credits Fall

Min. 691 Seminar 692 Reading and report required. Admission by arrangement.
Credit Arr. Fall Credits Arr. Spring

Min. 693 Special Topics 694 Various subjects studied. Admission by arrangement.
Credit Arr. Fall Credit Arr. Spring

Min. 697 Thesis 698

Note: Admission to ensemble courses above the 100 level is by permission of the instructor. Ensemble courses may be repeated for credit; a maximum of 12 such credits may be counted towards graduation.

| Music 131, 251 Class Lessons (0-3)  | 1       | Spring   |
|                                      | 1       | Fall     |
| Class instruction in piano, voice, or orchestral instrument. Fees for Class Lessons: |

**Lesson Fee** $15.00
**Practice Room Rental Fee** 7.50

Above fees waived for students enrolled in 7 or more credit hours and majoring or minoring in Music or Music Education.

| Music 161, 261, 361, 461 Private Lessons (1-0) | 1       | Fall     |
|                                             | 1       | Spring   |
| Private instruction in piano, voice, or orchestral instrument. Prerequisite: Admission by examination. Fees for Private Lessons: |

**Lesson Fee** $45.00
**Practice Room Rental Fee** 7.50

Above fees waived for students enrolled in 7 or more credit hours and majoring or minoring in Music or Music Education.

| Music 123 Introduction to Music (2-3)      | 3       | Fall     |
|                                           | 3       | Spring   |

Cultivation of the understanding and intelligent enjoyment of music through a study of its elements, forms, and historical styles. Open to all students, including music majors, but not a part of the music major curriculum. May be repeated for maximum of 6 hours credit.

| Music 131 Basic Theory (2-3)               | 3       | Fall     |
|                                           | 3       | Spring   |

Rhythmic, melodic, and harmonic dictation; keyboard harmony, including resolution of figured bass; sight-singing and ear training; stylistic analysis of works of eighteenth and nineteenth century composers. Semesters must be taken in sequence.

| Music 231 Advanced Theory (2-3)            | 3       | Fall     |
|                                           | 3       | Spring   |

Continuation of Music 131-2, which is prerequisite. Development of greater keyboard facility and more advanced harmonic vocabulary; analysis of works by some twentieth century composers. Semesters must be taken in sequence.

| Music 321 History of Music (3-0)           | 3       | Fall     |
|                                           | 3       | Spring   |

**Fall Semester:** Music before 1750. **Spring Semester:** Music since 1750. Prerequisite: Music 231 or permission of instructor.

| Music 331 Form and Analysis (1-3)          | 2       | Fall     |
|                                           | 2       | Spring   |

**Fall Semester:** Dance forms of the seventeenth and eighteenth centuries. Development of the various sonata forms. **Spring Semester:** Detailed analysis of sonatas by Haydn, Mozart, and Beethoven. Prerequisite: Music 232 or consent of the instructor. Semesters must be taken in sequence.
Music 491 Senior Seminar (2+0) 2 Credits Fall
492
Variety of subject matter depending on the interests and needs of students.
Music 493 Special Topics 2 Credits Spring
494 Credits Arr. Fall
Credits Arr. Spring
Various subjects. Admission by arrangement.
Music 243 Education, Music for the Classroom Teacher (2+3) 3 Credits Fall
3 Credits Spring
Introduction to music through experiences related to the teaching of music in the elementary school classroom.
Music 315 Instrumental Methods and Techniques (1+3) 2 Credits Fall
316 2 Credits Spring
Playing and teaching of band instruments. Fall Semester: Brass instruments. Spring Semester:
Woodwinds. Prerequisite: Music 232 or permission of instructor.
Music 343 Education, Music in the Elementary School (3+0) 3 Credits Fall
Principles, procedures, and materials for teaching music to children at the elementary level.
Prerequisite: Music 232, 243, or permission of instructor.
Music 344 Education, Music in the Secondary School (3+0) 3 Credits Spring
Methods and problems of teaching music in junior and senior high schools with emphasis on the general music program. Prerequisite: Music 232 or consent of the instructor.
Music 415 Instrumental Methods and Techniques (1+3) 2 Credits Fall
416 2 Credits Spring
Playing and teaching of string instruments. Fall Semester: Violin and Viola. Spring Semester:
Cello and Bass. Prerequisite: Music 232 or permission of instructor.

OFFICE ADMINISTRATION

O.A. 101 Shorthand (2+2) 3 Credits Fall
102 3 Credits Spring
Beginning Gregg Shorthand for secretarial students. Theory and reading practice first semester; dictation and transcription practice second semester.

O.A. 103 Elementary Typewriting (2+2) 2 Credits Fall or Spring
Basic typewriting skills, techniques of copy work and introduction to letter writing and simple tabulations. For students who have had no previous typewriting.

O.A. 105 Intermediate Typewriting (2+2) 2 Credits Fall or Spring
Speed development and application of typewriting skill to special letter problems, tabulations and office problems. Prerequisite: One year of high school typewriting or O.A. 103.

O.A. 106 Advanced Typewriting (2+2) 2 Credits Fall or Spring
Letter writing with special problems, reports, business forms, statistical tabulations and legal documents; emphasis is on speed and office standards. Prerequisite: O.A. 105 or equivalent and speed of 40 words per minute.

O.A. 201 Intermediate Stenography (2+2) 3 Credits Fall
202 Advanced Stenography 3 Credits Spring
High speed shorthand dictation and transcription. Prerequisite: O.A. 102 and O.A. 106 or equivalent.

O.A. 203 Office Machines (1+2) 3 Credits Fall
Basic operation of calculating, adding, duplicating, and dictation machines. Prerequisite: O.A. 105 or equivalent.

O.A. 208 Specialized Secretarial Skills (3+0) 3 Credits Fall or Spring
Principles, practices, and rules of filing. Training and practice in the operation of transcribing machines, responsibilities and duties of the secretary; business ethics and the preparation of office manuals.

O.A. 231 Business Correspondence (3+0) 3 Credits Fall
Fundamentals of business writing; emphasis on clarity, accuracy, and effectiveness in the writing of business letters and reports. Prerequisite: Engl. 102, O.A. 105 or equivalent.

O.A. 302 Secretarial Training (3+0) 3 Credits Spring
Business office systems, procedures, organization; professional secretarial standards and practices; C.P.S. program and requirements.
Course Descriptions

O.A. 351 Readings in Office Administration (1+0) 1 Credit  Fall or Spring
Readings in current problems, practices, procedures, methods. Not more than 2 credits to be earned by any student.

O.A. 360 C.P.S. Coaching (3+0) 3 Credits  Fall or Spring
Review of current professional literature, a study of material covered in recent C.P.S. examinations, and solving of problems under examination conditions. Guidelines of the course are the requirements for the C.P.S. examination. Prerequisite: Senior standing or approval of instructor.

PHILOSOPHY

Phil. 201 Introduction to Philosophy (3+0) 3 Credits  Fall
Terms, concepts and problems as reflected in writings of great philosophers. Prerequisite: Engl. 102, Sophomore standing. Three classes 1 hour.

Phil. 204 Introduction to Logic (3+0) 3 Credits  Spring
Principles of deductive and inductive logic, application of these laws in science and other fields; brief introduction to symbolic logic and its applications. Prerequisite: Sophomore standing. Three classes, 1 hour.

Phil. 321 Aesthetics (3+0) 3 Credits  Fall
The nature of aesthetic experience in poetry, music, painting, sculpture and architecture; studies in relation to artistic production and the role of art in society. Offered in alternate years; next offered 1967-68.

Phil. 332 Ethics (3+0) 3 Credits  Spring
Examination of ethical theories and basic issues of moral thought. Offered in alternate years; next offered 1967-68.

Phil. 341 Epistemology (3+0) 3 Credits  Fall
The nature of knowledge, truth and certainty. Offered in alternate years, next offered 1966-67. Prerequisite: Phil. 201.

Phil. 342 Metaphysics (3+0) 3 Credits  Spring
The nature of reality comprising both ontology and cosmology. Offered in alternate years, next offered 1966-67. Prerequisite: Phil. 201.

Phil. 351 History of Philosophy (3+0) 3 Credits  Fall
Ancient and Medieval periods. Prerequisite: 6 credits in Philosophy or Social Science.

Phil. 352 History of Philosophy (3+0) 3 Credits  Spring
Renaissance, Modern, and Recent periods. Prerequisite: 6 credits in Philosophy or Social Science.

Phil. 471 Contemporary Philosophical Problems (3+0) 3 Credits  Fall
Ideological issues facing the modern world. Prerequisite: 9 credits in Philosophy or permission of instructor.

Phil. 481 Philosophy of Science (3+0) 3 Credits  Fall
Comparison and discussion of various contemporary methodological positions. Prerequisite: Junior standing.

Phil. 482 Comparative Religion (3+0) 3 Credits  Spring
Seven world faiths represent answers to questions of man’s duty, his destiny, and his nature. Prerequisite: Permission of instructor.

Phil. 484 Philosophy of History (3+0) 3 Credits  Spring
Critical examination of the nature of history and historical inquiry. Prerequisite: 9 credits in Philosophy or Social Science.

Phil. 492 Special Topics 494  Credits Arr.  Fall
Various subjects. Credits arranged.

PHYSICAL EDUCATION

P.E. 101 Freshman Physical Education (Women) (0+3) 1 Credit  Fall
102  1 Credit  Spring
Required for women; a variety of activities to improve the physical condition, coordination and physical skills of the individual; regulation gym suits are required.
P.E. 103 Fundamentals of Sports—(0+2)
Tennis and Badminton
Skills, rules, strategies, terminology of tennis and badminton.

P.E. 105 Freshman Physical Education (Men) (0+3)
1 Credit Fall
1 Credit Spring
106
Required for men, except R.O.T.C. Cadets, ex-servicemen and physical education majors; selected activities for the acquisition of physical skills, leisure-time activities and physical vigor. Regulation gym suits are required.

P.E. 107 Beginning Swimming (0+3)
1 Credit Fall or Spring
Front and back float, front and back strokes and other basic strokes; non-swimmers only are eligible; may substitute for P.E. 201 or 202 (Women); P.E. 105 (Men); may not be taken concurrently with P.E. 101, 102, 201, 202 (Women), or P.E. 105, 106, 205, 206 (Men).

P.E. 108 Handball (0+3)
1 Credit Spring
Fundamentals, rules and strategy of handball.

P.E. 109 Beginning Skiing (0+3)
1 Credit Spring
Fundamentals of skiing on slopes.

P.E. 111 Principles of Physical Education (4+0)
4 Credits Fall
Basic principles and philosophy of physical education; its relation to general education; biological, sociological, and psychological bases.

P.E. 113 Ice Skating (0+3)
1 Credit Fall
Fundamentals and techniques. Outdoor and indoor activities conducted until ice is available.

P.E. 142 Personal and Community Health (3+0)
3 Credits Spring
Development of positive health attitudes; principles and practices of personal and community health.

P.E. 146 First Aid (2+0)
2 Credits Fall or Spring
Knowledge and skills necessary to provide efficient aid and treatment in emergencies.

P.E. 201 Sophomore Physical Education (Women) (0+3)
1 Credit Fall
1 Credit Spring
202
Continuation of P.E. 101-102.

P.E. 205 Sophomore Physical Education (Men) (0+3)
1 Credit Fall
1 Credit Spring
206
Continuation of P.E. 105-106.

P.E. 207 Intermediate Swimming (0+3)
1 Credit Fall or Spring
Advanced instruction in basic strokes, stressing skill in performance and endurance; instruction in water safety and accident prevention. Prerequisite: P.E. 107 or ability to swim one hundred yards with good form.

P.E. 209 Advanced Skiing (0+3)
1 Credit Fall
Learning skills of advanced slope and cross-country skiing.

P.E. 211 Fundamentals of Sports—(0+2)
1 Credit Fall
Volleyball and Soccer
Skills, rules, strategies, terminology of Volleyball and Soccer.

P.E. 212 Fundamentals of Sports—(0+2)
1 Credit Spring
Recreational Activities
Skills, rules, strategies, terminology of such activities as archery, bowling, table tennis and shuffleboard.

P.E. 213 Fundamentals of Sports—Swimming (0+2)
1 Credit Fall
Skills, techniques, terminology of basic strokes; instruction in water safety and accident prevention; a preparatory course for P.E. 401.

P.E. 214 Fundamentals of Sports—Skiing (0+2)
1 Credit Spring
Skills, techniques, terminology of alpine type and cross-country skiing. Methods of instruction.

P.E. 215 Fundamentals of Sports—(0+2)
1 Credit Fall
Tumbling and Gymnastics
Skills, techniques, terminology of tumbling and gymnastics.
Course Descriptions 147

P.E. 216 Fundamentals of Sports—Rhythms (0+2) 1 Credit Spring
Skills, terminology and basic patterns of movement.

P.E. 220 Physical Education for the Elementary School (2+3) 3 Credits Spring
Philosophy, source materials, games, rhythms, group activities and program planning; participation required to gain skills and techniques of teaching activities for elementary grade children.

P.E. 301 Techniques in Physical Education (2+1) 2 Credits Fall
Basketball (Men)
Methods of coaching and training basketball teams; strategy, methods, and psychology of offense and defense.

P.E. 302 Techniques in Physical Education (2+1) 2 Credits Spring
Track and Field
Methods and strategy of coaching track and field; form, technique and training for events; organization and conduct of meets; construction, assembly and use of equipment.

P.E. 303 Techniques in Physical Education (2+1) 2 Credits Fall
Team Sports (Women)
Methods and practice, analysis of skills and progressions for selected team sports for women.

P.E. 317 Senior Life Saving (0+3) 1 Credit Fall
Instruction in basic skills and techniques of life saving; personal safety skills, non-swimming assists, swimming assists, approaches and carries, body recovery, releases, equipment rescue, lifts, carries, and let-downs, and resuscitation. Prerequisite: P.E. 207 or demonstrated swimming skill and water agility.

P.E. 331 Sports Officializing (1+3) 2 Credits Fall
Ethics of sports officializing; mastery, interpretation and application of sports rules; laboratory consists of game officializing in the intramural program.

P.E. 358 History of Physical Education (3+0) 3 Credits Spring
The position of physical education in successive societies since primitive man, with emphasis on its relation to general education.

P.E. 400 Techniques in Physical Education (2+1) 2 Credits Spring
Tumbling and Gymnastics
Methods and practice in teaching tumbling and gymnastics. Prerequisite: P.E. 215.

P.E. 401 Techniques in Physical Education (2+1) 2 Credits Fall
Aquatics and Rhythms
Methods and materials, techniques and practice in teaching aquatics and rhythms. Prerequisite: P.E. 213 and P.E. 216.

P.E. 425 Organization and Administration of Physical Education (3+0) 3 Credits Fall
Philosophy, methodology and problems of planning, organizing and directing the total physical education program at the secondary school level.

P.E. 440 Prevention and Care of Athletic Injuries (2+1) 2 Credits Spring
Athletic injuries; practical and theoretical aspects of taping, bandaging and massage; physical therapeutic procedures.

P.E. 493 Special Topics 4 Credit Arr. Fall
494
Individual study of chosen topic in health, physical education or recreation. Approved by the department and directed by a selected staff member.

PHYSICS

Phys. 103 College Physics (4+3) 4 Credits Fall
104
Unified classical and modern physics for majors in the arts, biological sciences and education. Prerequisite: High school algebra and geometry.
Phys. 111 General Physics (2+3)  
112  
Mechanics, conservation laws, statics, oscillations, gravitation, fluids, sound and heat. Identical with E.S. 111-112. Prerequisite: Credit or registration in Math. 101 (Fall) and Math 102 (Spring).

Phys. 211 General Physics (3+3)  
212  
Thermodynamics and kinetic theory, electricity and magnetism, electromagnetic oscillations, waves and propagation, optics, quantum physics. Prerequisite: Math. 102, Phys. 112 or E.S. 112, credits or registration in Math. 201 (Fall), Math 202 (Spring).

Phys. 275 Astronomy (3+0)  
276  
Science elective for the general student. Fall: Stellar astronomy. Nature of radiation, physical properties and distribution of stars, galactic structure and cosmology. Spring: The solar system, laws of motion, the earth, the moon, planets, comets and meteors, cosmogony. Evening demonstrations both semesters. Prerequisite: Sophomore standing. Phys. 275 not required for 276.

Phys. 280 Shop Technique (0+3)  
1 Credit Fall or Spring  
Elements of machine tool operation, welding, soldering, glass blowing, high vacuum technique. Rudiments of apparatus construction. Shop project. Enrollment limited. Prerequisite: Permission of instructor.

Phys. 281 Astronomy Laboratory (0+3)  
282  

Phys. 301 Applied Physics (2+3)  
302  
Applied physics for majors in the arts, biological sciences, and education. Electronics, atomic structure and spectra, nuclear structure and reactions, radioactivity, tracer techniques, nuclear power. Prerequisite: Phys. 104, Math. 102.

Phys. 311 Classical Physics (4+0)  
312  
Selected topics from mechanics, thermodynamics, kinetic gas theory, statistical mechanics, acoustics, geometric and physical optics. Prerequisite: Phys. 212, Math. 202, or permission of instructor.

Phys. 331 Electricity and Magnetism (3+0)  
332  

Phys. 361 General Geophysics (3+0)  
362  
Introduction to basic geophysics including terrestrial electricity and magnetism, meteorology and seismology, geodesy and volcanology, glaciology, oceanography and techronophysics. Prerequisites: Junior standing. Phys. 104 or 212, Math. 102, Chem. 102, one semester of Geology. Offered as demand warrants.

Phys. 381 Physics Laboratory  
382  
Laboratory experiments illustrating and supplementing Phys. 311-312, and Phys. 331-332. Enrollment limited. Prerequisite: Permission of Instructor.

*Phys. 411 Modern Physics (3+0)  
412  
Relativity, elementary particles, atomic structure, x-rays, solid state physics, nuclear structure and reactions. Engineering majors take the 3 credit lecture course only, physics majors are required to take a supplementary 1 credit reading course. Prerequisite: Physic 212, 332, Math. 302.

*Phys. 445 Solid State Physics (3+0)  
*Phys. 455 Atomic and Nuclear Physics (3+0)  3 Credits  Fall
Radioactivity, counters, nuclear reactions, neutron physics, nuclear fission, cosmic rays. 

Phys. 460 Geophysical Prospecting (2+3)  3 Credits  Fall or Spring
Basic methods in geophysical exploration and measurements, gravimetric, seismic, electrical 
magnetic and radiometric. Prerequisite: Phys. 212, Geol. 101, 102, and Math. 101. Offered as 
demand warrants.

*Phys. 465 Meteorology (3+0)  3 Credits  Fall or Spring
Instruments and observations. Introduction to mechanics and thermodynamics of the 
atmosphere. Weather analysis and forecasting. Prerequisite: Phys. 104 or 212, Math. 102. 
Offered as demand warrants.

*Phys. 470 Astronautics (3+0)  3 Credits  Fall or Spring
Principles of astronomy, foundations of mechanics, and dynamics of space flight. 

*Phys. 475 Astrophysics (3+)  3 Credits  Fall or Spring
Introduction to stellar spectroscopy, atomic theory and astrophysics, stellar luminosities, 
luminosities, atmospheres and interior, energy production and evolution of the stars. Admis-
sion by arrangement. Offered as demand warrants.

*Phys. 481 Advanced Physics Laboratory 482  Credits Arr.  Fall
Laboratory experiments illustrating and supplementing Phys. 411, 412, 445, 455, 475. Enrollment 
limited. Prerequisite: Permission of instructor.

Phys. 485 Experimental Physics 486  Credits Arr.  Fall
Senior projects in experimental physics. Enrollment limited. Prerequisite: Senior standing 
and permission of instructor.

*Phys. 491 Physics Seminar 492  Credits Arr.  Fall
Seminar courses in various topics selected according to needs and interests of students. 
Primarily for physics majors. Prerequisite: Permission of Instructor.

*Phys. 493 Special Topics 494  Credits Arr.  Fall
Various subjects. Admission by arrangement.

Phys. 611 Theoretical Physics (3+0) 612  3 Credits  Fall
Fundamentals of mathematical physics with emphasis on problem solving; analytical 
mechanics, power series; vibrating systems; Fourier analysis; hydrodynamics, vector analysis; 
electromagnetism, complex analysis; wave optics, wave mechanics, matrices, perturbation 
theory; atomic structure, statistical physics, asymptotic expansions. Admission by arrange-
ment.

Phys. 621 Classical Mechanics (3+0)  3 Credits  Fall or Spring
Lagrange's equations, two-body problem, rigid body motion, special relativity, canonical 
equations, transformations theory and Hamilton-Jacobi method. Admission by arrangement.

Phys. 622 Statistical Mechanics (3+0)  3 Credits  Fall
Classical and quantum statistics of independent particles, ensemble theory, applications. 
Admission by arrangement.

Phys. 625 Hydrodynamics (3+0)  3 Credits  Fall or Spring
Equations of motion, irrotational motion of perfect fluid, motion of solids through fluids. 
Vortex motion, waves, viscosity, turbulent flow. Compressible fluids. Admission by arrange-
ment. Offered as demand warrants.

Phys. 626 Magnetohydrodynamics (3+0)  3 Credits  Fall or Spring
Fundamental equations of magnetohydrodynamics, magnetohydrodynamic waves. Invariants 
of the motion of a charged particle in a magnetic field. Dynamics of a plasma, plasma 
waves. Admission by arrangement. Offered as demand warrants.

Phys. 631 Electromagnetic Theory (3+0) 632  3 Credits  Fall
Electrostatics, magnetostatics, Maxwell's equations, potentials, Lorentz equations, field 
ergy, gauge conditions, retarded potentials, waves, radiation, tensor formulations, non-
Maxwellian electrodynamics. Admission by arrangement.
Phys. 641 Radio Waves (3+0) 3 Credits  Spring
The ionosphere, Maxwell's equations and constitutive relations, propagation, magneto-ionic
theory, ray theory and wave solutions. Admission by arrangement. Offered as demand
warrants.

Phys. 642 Radio Physics (3+0) 3 Credits  Spring
Selected topics from ionospheric absorption, diffraction and scattering of radio waves.
Admission by arrangement. Offered as demand warrants.

Phys. 651 Quantum Mechanics (3+0) 3 Credits  Spring
Schrödinger's equation, operator formalism, correspondence principle, central force problems,
matrix representations, perturbation theory, quantum-statistical mechanics. Admission by
arrangement.

Phys. 652 Applied Quantum Mechanics (3+0) 3 Credits  Fall or Spring
Applications of quantum mechanics to collision problems, radiation and spectroscopy. Pre-
requisite: Phys. 651 or consent of instructor. Offered as demand warrants.

Phys. 655 Nuclear Physics (3+0) 3 Credits  Fall or Spring
Properties of nuclei, interaction of radiation with matter, alpha emission, gamma decay,
nuclear forces, mesons, neutrons, cosmic rays. Admission by arrangement. Offered as demand
warrants.

Phys. 660 Theoretical Geophysics (3+0) 3 Credits  Fall or Spring
Selected topics in theoretical geophysics, mainly in solid earth physics, seismology, and
geomagnetism. Admission by arrangement. Offered as demand warrants.

Phys. 661 Physics and Chemistry of the Upper Atmosphere (2+0) 2 Credits  Spring
Aerotastics, Composition. Kinetic theory. Properties, viscosity, thermal conductivity and
negative ions. Recombination, attachment and detachment. Ozone, hydroxyl, and hydrogen.
The airglow. Admission by arrangement. Offered as demand warrants.

Phys. 662 Ionospheric Phenomena (2+0) 2 Credits  Spring
Layer formation. Ionization by particles. Eclipse effects. Electrical conductivity. Atmospheric
tides and oscillations. The geomagnetic field and its daily variations, solar and lunar. The
atmosphere as a dynamo and motor. Admissions by arrangement. Offered as demand
warrants.

Phys. 663 The Geomagnetic Field (2+0) 2 Credits  Spring
The main field at the earth's surface. Spherical harmonic analysis; the field within the
earth; the field outside the earth; the secular magnetic variation; paleomagnetism; the
dynamo theory of the field and its secular variation; distortion of the outer field by
electric currents associated with magnetic disturbance. Admission by arrangement. Offered
as demand warrants.

Phys. 664 Geomagnetic Disturbance and the Aurora (2+0) 2 Credits  Spring
The morphology, statistics, solar and ionospheric associations of magnetic disturbance;
indices of disturbance; auroral phenomena; theories of magnetic disturbance and the
aurora. Admission by arrangement. Offered as demand warrants.

Phys. 665 Dynamic Meteorology (3+0) 3 Credits  Fall or Spring
Atmospheric statics, thermodynamics, radiation and dynamics; general circulation; perturbation theory. Admission by arrangement. Offered as demand warrants.

Phys. 670 Solar Physics (3+0) 3 Credits  Fall or Spring
Structure of the solar interior and atmosphere theory of radiation, radio emission, solar-
terrestrial relations. Admission by arrangement. Offered as demand warrants.

Phys. 671 Space Physics (2+0) 2 Credits  Fall or Spring
Radiation belts, motions and magnetic fields of trapped particles, geomagnetic storm effects
and primary auroral particles. Admission by arrangement. Offered as demand warrants.

Phys. 675 Radio Astronomy (3+0) 3 Credits  Fall or Spring
Survey of instruments and techniques, radio wave generation and propagation in ionized
media, solar radio waves, cosmic radio waves, effects of the troposphere and ionosphere on
extra-terrestrial radio waves, radar astronomy. Admission by arrangement. Offered as
demand warrants.

Phys. 681 General Laboratory  Credits Arr.  Fall
682
Basic laboratory experiments in physics for graduate students. Admission by arrangement.
Course Descriptions

Phys. 683 Experimental Electronics
Credits Arr. Fall
684 Credits Arr. Spring
Advanced work in experimental electronics, in particular low noise receivers; design, construction and stabilization of parametric and tunnel diode devices. Admission by arrangement. Offered as demand warrants.

Phys. 685 Experimental Physics
Credits Arr. Fall
686 Credits Arr. Spring
Advanced work in experimental physics. Admission by arrangement. Offered as demand warrants.

Phys. 690 Colloquium
0 Credit Fall or Spring

Phys. 691 Seminar
Credits Arr. Fall
692 Credits Arr. Spring
Various topics. Admission by arrangement.

Phys. 693 Special Topics
Credits Arr. Fall
694 Credits Arr. Spring
Various subjects. Admission by arrangement.

Phys. 697 Thesis
Credits Arr. Fall
698 Credits Arr. Spring

Phys. 700 Review of Physics
Credits Arr. Fall or Spr.
A reading course in theoretical physics to review and unify from an advanced standpoint the material of the basic physics courses. Primarily for advanced students. Admission by arrangement. Offered as demand warrants.

Phys. 710 Mathematical Physics (3+0)
3 Credits Fall or Spring
Linear spaces, operator theory, generalized functions, variational methods in theoretical physics. Prerequisite: MATH 612 or permission of instructor. Offered as demand warrants.

Phys. 720 Relativity (3+0)
3 Credits Fall or Spring
Origins, special theory, mechanics and electrodynamics, tensors, gravitational field equations and their solutions; particles in general relativity, cosmology; extensions to unified field theories. Admission by arrangement. Offered as demand warrants.

Phys. 770 Theoretical Astrophysics (3+0)
3 Credits Fall or Spring
Radiative transfer and stellar hydrodynamics; theory of continuous and line spectrum from stellar atmospheres; solar photosphere, chromosphere and corona. Admission by arrangement. Offered as demand warrants.

Phys. 791 Seminar
Credits Arr. Fall
792 Credits Arr. Spring
Various subjects. Admission by arrangement.

Phys. 797 Dissertation
Credits Arr. Fall
798 Credits Arr. Spring

POLITICAL SCIENCE

P.S. 101 American Government (3+0).
3 Credits Fall
U.S. Constitution and its philosophy; evolution of the branches of government; political process in American government; and contemporary political issues.

P.S. 102 Introduction to Political Science (3+0)
3 Credits Spring
The political process and its examination. Goals, methods, and levels of government.

P.S. 201 Comparative Politics: The Political Process (3+0)
3 Credits Fall
Different constitutional molds in which the political process operates; the effect on political processes of modern techniques; and emerging political forms.

P.S. 202 Comparative Politics: Case Studies (3+0)
3 Credits Spring
Case studies from selected nations grouped into four classes: Western Democracies, Russian Communism, Chinese Communism, and "emerging" nations.

P.S. 211 State and Local Government (3+0)
3 Credits Fall or Spring
Organization and politics of State and local government in the United States; the Alaskan Constitution; and problems of statehood in Alaska. Prerequisite: P.S. 101.
P.S. 301 Public Administration (3+0) 3 Credits  Fall or Spring
Techniques and problems of administering public policy. The changing role of the Executive
Branch in the political process. Prerequisite: P.S. 101.

P.S. 321 International Affairs (3+0) 3 Credits  Fall
Development of internationalism in relation to nationalism and imperialism; attempts at

P.S. 322 International Law and Organization (3+0) 3 Credits  Spring
Development, structure, policies and problems of public international law and organizations.
Accomplishments and limitations of universal and regional organizations and law.

P.S. 401 Political Behavior (3+0) 3 Credits  Fall
402 3 Credits  Spring
Behavior of political organizations, parties, groups, politicians and individual citizens.
Prerequisite: P.S. 101 and 102.

P.S. 411 Political Theory (3+0) 3 Credits  Fall
412 3 Credits  Spring
Ancient, classical, medieval and modern political concepts, and their effects on political
behavior.

P.S. 415 Recent Political Thought (3+0) 3 Credits  Fall or Spring
A discussion of the contributions of modern thinkers to political theory.

P.S. 434 American Constitution (3+0) 3 Credits  Fall or Spring
Role of the judiciary in the American political system viewed both historically and
through analysis of leading cases. Prerequisite: P.S. 101.

P.S. 485 Seminar in Contemporary International Relations (3+0) 3 Credits  Fall or Spring
Theory of international conflict. Prerequisites for international political cooperation. The
effect on international affairs of advances in military science. Prerequisite: P.S. 321.

P.S. 491 Seminar Credits Arr.  Fall
492 Credits Arr.  Spring
P.S. 493 Special Topics Credits Arr.  Fall
494 Credits Arr.  Spring

PSYCHOLOGY

Psy. 101 Introduction to Psychology (3+0) 3 Credits  Fall or Spring
Fundamentals of general psychology and human behavior.

Psy. 102 Introduction to Psychology (3+0) 3 Credits  Spring
The principal areas of general psychology. A continuation of Psy. 101. Prerequisite: Psy. 101.

Psy. 205 Statistics for Behavioral Sciences (3+0) 3 Credits  Fall or Spring
Introduction to the purposes and procedures of statistics; calculating methods for the
description of groups (data reduction) and for simple inferences about groups and dif-
fferences between group means. Requires high school algebra.

Psy. 209 Social Psychology (3+0) 3 Credits  Fall
Social influences on human behavior. Prerequisite: 6 hours in Psy. and/or Soc.

Psy. 213 Experimental Psychology (2+3) 3 Credits  Fall
Supervised experiments in sensory psychology and animal and human learning. Data
collection and analysis; report writing. Prerequisite: Psy. 101 and 102, and Psy. 205.

Psy. 214 Experimental Psychology (2+3) 3 Credits  Spring
Continuation of Psy. 213. Experimental design and experiments in interpersonal relations
and psychodynamics. Prerequisite: Psy. 213.

Psy. 252 Psychology of Adolescence (2+3) 3 Credits  Spring
Mental, emotional, social, and physical development patterns during the adolescent years.
Laboratory arranged for observations of adolescents in a variety of settings including public
schools. Not open to students having credit in human development or child psychology or
development. Prerequisite: Psy. 101, 45 collegiate credits, and permission of instructor.

Psy. 303 Industrial Psychology (3+0) 3 Credits  Fall
Job and worker analysis, selection, training, fatigue, worker adjustment, morale, labor-
management relations. Prerequisite: Psy. 101 and 102 or permission.
Psy. 304 Abnormal Psychology (3+0) 3 Credits Spring
Abnormalities of human behavior. Prerequisite: Psy. 101 and 102.

Psy. 305 Child Development (2+9) 5 Credits Fall & Spring
Theory and laboratory of human mental, emotional, social, and physical development. Not open to students having credit in human development, child psychology or development, or adolescent psychology or development. Prerequisite: Psy. 101, 45 collegiate credits, and permission of instructor.

*Psy. 312 Comparative and Physiological Psychology (3+0) 3 Credits Spring
Neural and hormonal basis of behavior; evolution of sensory, motor, and cerebral systems; inter-species comparisons; current research methods in these areas. Prerequisite: Psy. 101 and 102, and Biol. 105 and 106.

Psy. 321 Psychological Testing (3+0) 3 Credits Spring
Standardized psychological tests in various applied areas—administration, scoring, and interpretation of established tests. Prerequisite: Psy. 101 and 102.

Psy. 392 Perception in Human Behavior (3+0) 3 Credits Spring
Physiological, developmental, and social effects on interpretation of sensory processes. Prerequisite: Psy. 101 and 102.

Psy. 406 Theories of Personality (3+0) 3 Credits Spring
Current psychological theories, with a critical examination of the different approaches used in theory construction. Admission by arrangement.

Psy. 421 Psychology of Learning (3+0) 3 Credits Fall
Theories of human and animal learning. Prerequisite: Psy. 101 and 102.

Psy. 434 Social Science Research Methods (3+0) 3 Credits Spring
Techniques of social research—sampling, questionnaire construction, interviewing and data analysis in surveys; field and laboratory experiments; attitude scaling. Prerequisite: Psy. 101 and 102, or Soc. 101 and 102. (Also offered as Soc. 434.)

Psy. 491 Seminar in Human Behavior (2+0) 2 Credits Fall
Integrated behavioral approach emphasizing the major sociological and psychological theories with special attention to current literature. Prerequisite: Major in sociology or psychology, or permission of instructor. (Also offered as Soc. 491.)

*Psy. 493 Special Topics Credits Arr. Fall
Various subjects. Admission by arrangement.

RUSSIAN

Russ. 101 Elementary Russian (5+0) 5 Credits Fall
102 5 Credits Spring
Designed to teach students to hear, speak, read and write Russian. Oral practice is emphasized.

Russ. 150 Scientific Russian (3+0) 3 Credits Spring
Rapid acquisition of a reading knowledge of scientific Russian. Offered as demand warrants.

Russ. 201 Intermediate Russian (3+0) 3 Credits Fall
202 3 Credits Spring
A continuation of Russian 102. Increasing emphasis on reading ability and cultural material. Conducted in Russian. Prerequisite: Russian 102 or 2 years of high school Russian.

Russ. 321 Studies in Russian Literature (3+0) 3 Credits Fall
322 3 Credits Spring
Choice of authors, genres, or periods of Russian literature for intensive study. Prerequisite: Russian 202 or equivalent. Students may repeat course for credit when topic varies.

Russ. 493 Special Topics Credits Arr. Fall
494 Credits Arr. Spring
Various subjects in Russian, for advanced students. Admission by arrangement. Offered as demand warrants.
SOCILOGY

Soc. 101 Introduction to Sociology (3+0) 
3 Credits Fall or Spring

Soc. 102 
3 Credits Fall or Spring

Man's relationship to the society in which he lives.

Soc. 106 Social Welfare (3+0) 
3 Credits Spring

Functions and development of modern social welfare and the distinctive features of the profession.

Soc. 201 Social Problems (3+0) 
3 Credits Fall

Problems of contemporary society; analysis of factors giving rise to them. Prerequisite: Soc. 101 and 102.

Soc. 205 Group Processes in Modern Society (3+0) 
3 Credits Fall

Formation, structure and functioning of groups; group processes and group products; implications of various research techniques. Prerequisites: Soc. 101 and 102.

Soc. 207 Population (3+0) 
3 Credits Fall

Analysis of world populations; growth and decline patterns, migratory trends and ecology; worldwide implications to current population growth; critical review of major theoretical contributions with introduction to demographic methods. Prerequisite: Soc. 101 and 102.

Soc. 209 Urban Sociology (3+0) 
3 Credits Fall

Growth and development of urban communities with reference to migration patterns, differentiation of functions, ecological patterns of land use, social control in secondary group associations of metropolitan magnitude. Prerequisite: Soc. 101 and 102.

Soc. 232 Family and Society (3+0) 
3 Credits Spring

The family as a social institution; its dynamics in the socialization process; social change and social values. Prerequisite: Soc. 101 and 102.

*Soc. 302 Minority and Ethnic Groups (3+0) 
3 Credits Spring

Social stratification; the status of the chief minorities in the continental United States; development and effects of selective immigration, assimilationism, racism. Prerequisite: Soc. 101 and 102.

Soc. 304 Culture and Personality (3+0) 
3 Credits Spring

Theories of relation of variation in personality to culture and group life in primitive and modern societies; influence of the social role on behavior. Prerequisite: Soc. 101 and 102.

Soc. 306 Community and Ecology (3+0) 
3 Credits Spring

Modern, industrial, centralized society and institutional structure of community life—political, economic, religious—with reference to internal structure and external sources of control and domination. Prerequisite: Soc. 101 and 102.

Soc. 308 Field Practice Community Service Laboratory 
Credits Arr. Fall or Spr.

Individual programs of self-help projects dealing with community needs and resources; theoretical analysis of experienced situations; learning through laboratory method. Prerequisite: Soc. 101, 102, 106, 205, and by arrangement.

Soc. 321 Introduction to Social Work (3+0) 
3 Credits Fall

Scope and methods of social work with its specialized treatment and process areas. Prerequisite: Soc. 101 and Psy. 101.

Soc. 322 Introduction to Social Work (3+0) 
3 Credits Spring

Historical and philosophical development of social work as an institution and profession in the United States and abroad. Prerequisite: Soc. 101 and Psy. 101.

Soc. 345 Sociology of Education (3+0) 
3 Credits Fall

See description of Ed. 345, Social Foundations of Education.

Soc. 401 Sociology of Deviant Behavior (3+0) 
3 Credits Fall

Crime and criminality in American culture. Prerequisite: Soc. 101 and 102.

*Soc. 404 Sociology of Adolescence (3+0) 
3 Credits Spring

Motivations, attitudes, beliefs, behavior of this age group, including delinquent or norm-violating behavior. Prerequisite: Soc. 101 and 102. Offered in alternate years.

Soc. 405 Social Change (3+0) 
3 Credits Fall

Social change in long-time perspective, with emphasis on social movements. Prerequisite: Soc. 101 and 102.
Sec. 410 Sociology Theory (3+0) 3 Credits  Spring
Major sociological theories and theorists of Western civilization; review of important contributions and approaches of various "national schools" with emphasis on current American and European trends.

Sec. 434 Social Science Research Methods (3+0) 3 Credits  Spring
See description under Psy. 434, Social Science Research Methods.

Sec. 491 Seminar in Human Behavior (2+0) 2 Credits  Fall
See description under Psy. 491, Seminar in Human Behavior.

*Sec. 493 Special Topics 494 Credits Arr.  Fall  Spring
Various subjects. Admission by arrangement.

SPANISH
Span. 101 Elementary Spanish (5+0) 5 Credits  Fall
102 5 Credits  Spring
Designed to teach students to hear, speak, read and write Spanish; oral practice emphasized.

Span. 201 Intermediate Spanish (3+0) 3 Credits  Fall
202 3 Credits  Spring
Continuation of Spanish 102. Increasing emphasis on reading ability and cultural material; conducted in Spanish. Prerequisites: Spanish 102 or 2 years of high school Spanish.

Span. 221 Studies in Spanish Literature (3+0) 3 Credits  Fall
222 3 Credits  Spring
Choice of authors, genres, or periods of Spanish and Spanish American literature for intensive study. Prerequisite: Spanish 202 or equivalent. Offered at demand warrants. Students may repeat course for credit when topic varies.

Span. 493 Special Topics 494 Credits Arr.  Fall  Spring
Various subjects for advanced students. Admission by arrangement. Offered at demand warrants.

SPEECH
Sp. 211 Public Speaking I (1+2) 2 Credits  Fall or Spring
Basic oral composition and criticism. Theory and practice of exposition and persuasion. Prerequisite: Engl. 101 or Fall. 201 or by arrangement.

Sp. 212 Public Speaking II (2+0) 2 Credits  Fall or Spring
Theory and practice of rhetoric and public address. Basic works from Plato to Quintillian. Practice in advanced forms of exposition and persuasion.

Sp. 215 Debate Practicum (0+2) 1 Credit  Fall or Spring
Training in practical debate situations. Participation in Debating Society required. May be repeated for a maximum of six credits. Students wishing to take this course and Sp. 314, Argumentation and Debate, may enroll in the latter with the consent of the Instructor and may not receive more than 8 units of credit for any combination of the two courses.

Sp. 221 Introduction to the Theater (3+0) 3 Credits  Fall or Spring
History of theater with emphasis on dramatic form, architecture and standards of criticism.

Sp. 223 Acting I (1+4) 3 Credits  Fall or Spring
Principles of acting developed through pantomime, improvisation and sense-memory; participation as an actor or technician in one Drama Workshop production required. May be repeated for a maximum of six credits.* Prerequisite: Sp. 221 or by arrangement.

Sp. 231 Introduction to Broadcasting (3+0) 3 Credits  Fall or Spring
A survey of radio and television, with emphasis on the history, financing, regulation, and operation of the broadcasting industry.

*Pending A/C Approval
Sp. 237   Announcing (1+2)  2 Credits  Fall or Spring
Microphone techniques, role of the announcer in broadcasting. Fundamentals of announcing; their practical application. Prerequisite: Sp. 211 or by arrangement.

Sp. 239   Radio Operations (0+3)  1 Credit  Fall & Spring
Training in practical radio operations. Participation on KUAC staff required. May be repeated for a maximum of four credits.

Sp. 313   Argumentation and Debate (1+2)  2 Credits  Fall
Theory of argumentation and debate applied to contemporary issues. Practice in briefing and presenting arguments, testing evidence and detecting fallacies.

Sp. 314   Discussion (1+2)  2 Credits  Spring
Nature and operation of discussion groups; use of evidence, reasoning, reflective thinking, group psychology, participant and leader behavior.

Sp. 315   Phonetics (2+0)  2 Credits  Fall or Spring
Use of the International Phonetic Alphabet; assimilation and dialectical problems; use in acting, teaching, speech improvement. Prerequisite: Sp. 211 or by arrangement. Offered as demand warrants.

Sp. 316   Voice and Diction (1+2)  2 Credits  Fall
Development of fluency and clearness in the voice; study and practice to improve speech and eliminate faults of articulation and pronunciation; phrasing, inflection and emphasis, including individual analysis and tape recordings. Prerequisite: Sp. 211 or by arrangement.

Sp. 317   Oral Interpretation (2+2)  3 Credits  Fall or Spring
Interpretative reading based on textual analysis of literary forms and careful study of principles of effective reading. Prerequisite: Sp. 211 or by arrangement.

Sp. 322   Acting II (1+4)  3 Credits  Fall or Spring
Building a character; role study and performance of small scenes. Participation as an actor or technician in one Drama Workshop production required. Prerequisite: Sp. 221, 223, or by arrangement.

Sp. 325   Theater Production (1+4)  3 Credits  Fall or Spring
Direction of short plays for Drama Lab. productions. Principles of makeup, lighting and production. Prerequisite: Sp. 221, 223, or by arrangement.

Sp. 327   Makeup for Theater (1+2)  2 Credits  Fall or Spring
Theatrical makeup, designed for actors, teachers, directors and other theater workers; makeup materials and use; straight and character makeup; illusory and plastic relief; national types; influence of lighting. (Students will spend approximately $20.00 for materials.) Offered as demand warrants.

Sp. 333   Writing for Radio and Television (3+0)  3 Credits  Fall or Spring
Preparation of announcements, interviews, music continuity, special events programs, documentaries, commentaries, news, and other basic radio and television continuity.

Sp. 334   Radio-Television Advertising (2+3)  3 Credits  Fall or Spring
Academic approach to economics and standards of radio and television advertising. Special emphasis on ethical considerations involved in the preparation and presentation of commercial broadcast copy. Prerequisite: Sp. 333 or by permission.

Sp. 335   Broadcast Production (2+3)  3 Credits  Fall or Spring
Use of studio equipment; radio-tv production techniques; radio-tv station organization; tape editing; sound effects; television directing.

*Sp. 341   Fundamentals of Speech Correction (2+0)  2 Credits  Fall
Understanding and aiding speech development in normal and speech defective children and adults; for parents, teachers and others concerned with speech problems. Prerequisite: Sp. 211 or by arrangement.

*Sp. 343   Clinical Methods in Speech Correction (2+2)  3 Credits  Spring
Administration of clinical tests of speech and application of principles of speech correction; supervised clinical practice. Prerequisite: Sp. 211, 315, 341, or by arrangement.

Sp. 425   Directing (3+0)  3 Credits  Spring
Directorial analysis of a major dramatic work for public presentation. Limited to senior majors with 3.00 G.P.A. in Speech.
Sp. 433  Radio-Television News (2+4)  3 Credits  Fall or Spring
Responsible news writing, editing, processing and delivery for the broadcast media. Special emphasis on ethical considerations in broadcast journalism. Prerequisite: Sp. 333 and Jour. 201 or by permission.

Sp. 493  Special Topics  Credit Arr.  Fall

494  Credit Arr.  Spring
Various subjects. Admission by arrangement. Offered as demand warrants.

*pending Academic Council approval for graduate credit

WILDLIFE MANAGEMENT

*W.M. 304  Wildlife Management Principles (2+3)  3 Credits  Fall
Economic, social, biological and other values of wildlife; basic principles of wildlife management and its integration with other land use practices; important wildlife resources of Alaska. Prerequisite: Land Res. 101, Biol. 303.

*W.M. 325  Scientific Sampling (2+3)  3 Credits  Fall
Sampling methods, including simple random, stratified and systematic; estimation procedures, including ratio and regression methods; special area and point sampling procedures; optimum allocation; special features of biological sampling. Prerequisite: Math. 122 or 201, and Math. 204 or permission.

*W.M. 410  Wildlife Techniques (2+3)  3 Credits  Spring
Field, laboratory and office techniques of collecting, analyzing, interpreting and presenting data and specimens. Prerequisite: W.M. 304 or permission.

W.M. 417  Wildlife Management--Forest and Tundra (2+0)  2 Credits  Fall or Spring
Forest and tundra wildlife, with emphasis on game and fur species; correlation of wildlife management with forest and tundra land use practices. Admission by arrangement. Offered as demand warrants.

W.M. 419  Wildlife Management--Wetlands (2+0)  2 Credits  Fall or Spring
Wetland wildlife with emphasis on game and fur species of fresh-water areas; correlation of wildlife management with wetland land use practices. Admission by arrangement. Offered as demand warrants.

W.M. 421  Hydrobiology (2+3)  3 Credits  Fall
Survey of chemical, physical and biological aspects of fresh water and the ocean, providing a background for consideration of aquatic populations. Admission by arrangement.

*W.M. 424  Ecology of Fishes (2+3)  3 Credits  Spring
Ecology of fishes and current applications in sport and commercial fisheries. Prerequisite: Biol. 326, W.M. 304, 421. Admission by arrangement.

*W.M. 426  The Analysis of Linearized Models (2+3)  3 Credits  Spring
Analysis by methods of least squares of general linearized models, including those appropriate to various designs, including completely random, randomized complete block, incomplete block and latin square, and those for the analysis of variance and analysis of covariance. Matrix algebra appropriate to least squares. Prerequisites: Math. 201 or 122, and 204.

W.M. 491  Seminar (2+0)  1 Credit  Spring
W.M. 492  1 Credit  Fall
Various topics in wildlife management. Prerequisite: Senior standing in wildlife or by arrangement. Offered as demand warrants.

W.M. 493  Special Topics (Arrange)  Credit Arr.  Fall
494  Credit Arr.  Spring
Various subjects studied principally through directed reading and discussions. Admission by arrangement.

W.M. 611  Wildlife Field Trip  Credit Arr.  Fall
612  Credit Arr.  Spring
Trips to wildlife areas to acquaint students with principal animals of the State and problems involved in their management. Admission by arrangement. Offered as demand warrants.
W.M. 621  Vertebrate Population Analysis (1+3)  2 Credits  Fall
Dynamics of vertebrate populations, with particular emphasis on the collection and interpretation of vital statistics of wild populations. Admission by arrangement. Offered as demand warrants.

W.M. 622  Environmental Analysis (2+3)  3 Credits  Spring
Recognition, description and evaluation of factors in terrestrial environments. Admission by arrangement. Offered as demand warrants.

W.M. 624  Problems in Fisheries Management (2+0)  2 Credits  Spring
Selected readings and discussions relating to major fisheries of the world, their problems, and the methods of attack on these problems. Admission by arrangement. Offered as demand warrants.

W.M. 691  Seminar (2+0)  1 Credit  Fall
692  1 Credit  Spring
Various topics in wildlife management; required of all graduate students. (Biol. 691, 692 may be substituted by permission of the major professor.) Offered as demand warrants.

W.M. 693  Special Topics  Credits Arr.  Fall
694  Credits Arr.  Spring
Various subjects studied principally through directed reading and discussions. Admission by arrangement.

W.M. 695  Research  Credits Arr.  Fall
696  Credits Arr.  Spring
Investigative work, either field or laboratory, on a problem of lesser scope than the thesis, or supplementary to the thesis. Admission by arrangement.

W.M. 697  Thesis  Credits Arr.  Fall
698  Credits Arr.  Spring
Admission by arrangement.
Registers

THE BOARD OF REGENTS

The Regents of the University of Alaska are appointed by the Governor and are confirmed by the Legislature.

ELMER E. RASMUSON, Anchorage, President, 1950-1969
WILLIAM A. O'NEILL, Anchorage, Vice President, 1948-1973
DOROTHY A. WREDE, Fairbanks, Secretary, 1963-1971
JOHN J. CONWAY, Sitka, 1959-1967
RUTH S. McLEAN, Nome, 1964-1967
ROBERT E. McFARLAND, Anchorage, 1963, 1971
ARTHUR J. SCHAIBLE, Fairbanks, 1961-1969
WILLIAM M. WHITEHEAD, Juneau, 1965-1973
WILLIAM R. WOOD, President of the University, Ex-Officio Member
CATHERINE L. BYRNE, Treasurer, non-member official

ADMINISTRATIVE COUNCIL

WILLIAM R. WOOD, Ph.D., LL.D., President
HOWARD A. CUTLER, Ph.D., Academic Vice President
KENNETH M. RAE, Ph.D., Vice President for Research and Advanced Study
HAOLED A. BYRD, B.B.A., Comptroller of the University
LEWIS E. HAINES, Ph.D., Director, Student Affairs
SYLVIA CIERNICK, Ph.D., Director, University Relations
BEN J. ATKINSON, B.S., Director, Physical Plant and Campus Planning

EMERITI AND HONORARY STAFF

ERNEST N. PATTY, President, Emeritus

LYDIA FOHN-HANSEN, Associate Director of Cooperative Extension, Emeritus
Iowa State College '19, B.S.; '22, M.S.; University of Alaska '59, D.Hum. (1925-1936, 1940-1959)

TERRIS MOORE, Honorary Professor of the University

WILLIAM K. KELLER, Professor of Education, Emeritus

DOROTHY H. NOVATNEY, Professor of English, Emeritus

LOLA CREMEANS TILLY, Professor of Home Economics, Emeritus

ACADEMIC FACULTY AND PROFESSIONAL STAFF 1965-1966

SYUN-ICHI AKASOFO, Professor of Geophysics
University of Tohoku '53, B.S.; '57, M.S.; University of Alaska '61, Ph.D.

PAUL R. ALBEE, Assistant Design Engineer
College of Idaho '61, B.S.; University of Alaska '64, M.S.

GEORGE ALLEN, Instructor of English (Ketchikan)
University of Alaska '64, B.A.; '64, M.A.

LEE D. ALLEN, Instructor, Alaska Agricultural Experiment Station
University of Idaho '57, B.S.
MICHAEL ALMASI, Associate Design Engineer, Geophysical Institute
University of Budapest '35, M.S. in Electrical Engineering

DARLENE APPEL, Instructor of Office Administration (Anchorage)
Mankato State College '56, B.S.

KOBAD A. ARJANI, Assistant Professor of Accounting
University of Bombay '51, B.Com.; University of Denver '57, M.B.A.

SARKIS ATAMIAN, Assistant Professor of Sociology
University of Rhode Island '50, B.S.; Brown University '54, M.A.

BEN J. ATKINSON, Director, Physical Plant and Campus Planning
University of Alaska '47, B.S. in C.E.

JOSEPH AURBACH, Assistant Professor of English
Louisiana State University '59, B.A.; '59, M.A.

ELLEN AYOTTE, Instructor, Cooperative Extension Service, District Home Demonstration Agent, Fairbanks
Stout State College '58, B.S.

EUNICE BAILEY, Instructor in Office Administration (Ketchikan)
Oregon State College '25, B.S.

HANS-GEORG BANDI, Associate in Archaeology
University of Freiburg '45, Ph.D.

MYRTLE BANG, District Home Demonstration Agent, Palmer, and Assistant Professor, Cooperative Extension Service
University of Minnesota '31, B.S.; University of Wisconsin '58, M.S.

ROBERT J. BARSDATE, Assistant Professor of Marine Science
Allegheny College '59, B.S.; University of Pittsburgh '63, Ph.D.

HOWARD F. BATES, Associate Professor of Geophysics
Oregon State University '50, B.S.; '56, M.S.; University of Alaska '61, Ph.D.

JIMMY BEDFORD, Associate Professor of Journalism
University of Missouri '50, A.B.; '51, B.J.; '52, M.A.

CLARENCE GEORGE BEERS, University Buyer

CHARLES E. BEHlke, Director, Institute of Water Resources Research and Professor of Engineering
Washington State University '48, B.S.; '50, M.S.; Stanford University '57, Ph.D.

EARL H. BEISTLINE, Dean, College of Earth Sciences and Mineral Industry, and Professor of Mining Engineering (P.E.)
University of Alaska '39, B.Min.Engnr.; '47, E.M.

ALBERT E. BELON, Associate Professor of Physics
University of Alaska '52, B.S.; U.C.L.A. '54, M.A.

ALTER BENESCH, Assistant Professor of History
University of Denver '55, B.A. History and Botany; University of Montana '56, M.A. Speech; Leopold Franzens Universität Innsbruck '63, Ph.D. in Eastern European History

CARL S. BENSON, Associate Professor of Geophysics
University of Minnesota '50, B.A.; '56, M.S.; California Institute of Technology '60, Ph.D.

EDUARD BERG, Associate Professor of Geophysics
University of Sarbrucken '53, Diplom Physiker; '55 Ph.D.

FRANK THOMAS BERKEY, Senior Research Assistant in Geophysics
Linfield College '62, B.A.; University of Alaska '64, M.S.

BONNIE BETTINE, Executive Officer, Alaska Agricultural Experiment Station

CHRISTIANE BILLAUD, Distinguished Associate in Music
JEAN-PAUL BILLAUD,  Assistant Professor of Music
Ecole Normale de Musique de Paris '55, Diplome Superieur de Virtuose; '56, Licent de Concert

NORMAN J. BIRKHOHLZ,  Assistant Professor of Chemistry and Chemical Engineering
Montana State College '54, B.S.; '57, M.S.; '59, Ph.D.

J. ROGER BLAKE,  Senior Research Assistant in Geophysics
University of Melbourne '57, B.Sc.

MARGARET BLOM,  Assistant Professor (Research), Analytical Chemistry, Alaska Agricultural Experiment Station
University of Western Ontario '32, B.S.

RUTH W. C. BLUMBERG,  Instructor and Assistant Reader Services Librarian
Belleville Township Junior College '56, A.A.; Southern Illinois University '58, B.S.; '62, M.S.; George Peabody College for Teachers '65, M.L.S.

CLARENCE IVAN BRANTON,  Professor (Research), Agricultural Engineering, Alaska Agricultural Experiment Station
Oregon State College '33, B.S.

MAX BREWER,  Director, Arctic Research Laboratory and Ice Physicist
Washington University '50, B.S.; University of Alaska '65, D.Sc. (Hon.)

CLAYTON E. BROCKEL,  Resident Director Kenai Community College
Montana State University '55, B.A.; Colorado State College '60, M.A.Ed.

JAMES A. BROSCAT,  Resident Director, Sitka Community College
Valley City State College '58, B.S.; University of North Dakota '63, M.Ed.

GREETA K. BROWN,  Assistant Professor of Music
Fort Wright College '49, B.M.; University of Idaho '53, M.M.

ARTHUR L. BRUNDAGE,  Associate Professor (Research), Dairy Husbandry, Alaska Agricultural Experiment Station
Cornell University '50, B.S.; University of Minnesota '52, M.S.; '55, Ph.D.

ALBERT C. BURKHALTER,  Senior Research Assistant, Institute of Marine Science
California State Polytechnic College '60, B.S.

DAVID COLIN BURRELL,  Assistant Professor of Marine Science
Nottingham University '61, B.Sc.; '64, Ph.D.

RONALD KENT BURTON,  Assistant in News Service and Publications
Palomar College '60, A.A.

SHERIL D. BURTON,  Assistant Professor, Institute of Marine Science
Brigham Young University '59, B.S.; '61, M.S.; Oregon State University '64, Ph.D.

WAYNE E. BURTON,  Assistant Professor (Research), Alaska Agricultural Experiment Station
University of Wyoming '58, B.S.; Texas A. & M. '60, M.S.

ARTHUR S. BUSWELL,  Dean, Division of Statewide Services and Director, Cooperative Extension Service and Head, Department of Agriculture and Professor of Agriculture
University of Maine '49, B.S.; '50, M.S.; University of Wisconsin '59, Ph.D.

DON K. BUTTON,  Assistant Professor, Institute of Marine Science
Wisconsin State College '55, B.S.; University of Wisconsin '61, M.S.; '64, Ph.D.

HAROLD A. BYRD,  Comptroller
University of Washington '31, B.B.A.

LELAND PAUL CADE,  District Agricultural Agent, Palmer, and Assistant Professor, Cooperative Extension Service
Montana State College '50, B.S.; Wisconsin State University '61, M.S.

AXEL R. CARLSON,  Farm and Home Structures Specialist and Assistant Professor, Cooperative Extension Service
Michigan State University '53, B.S.

ROBERT F. CARLSON,  Assistant Professor of Civil Engineering
University of Wisconsin '61, B.S.; '63, M.S.
RUSSELL E. CARR, Head, Department of Mathematics and Professor of Mathematics
Simpson College '40, B.A.; Iowa State University '42, M.S.; '46, Ph.D.

SUSAN CARTER, University Nurse
Earlham College '32, A.B.; Western Reserve University School of Nursing '35, R.N.; '40, Certificate in Public Health Nursing

WILLIAM R. CASHEN, Professor of Mathematics and Marshall of the University
University of Alaska '37, B.S.; University of Washington '48, M.A.

LLOYD CAVAOS, Farm Manager, Alaska Agricultural Experiment Station
New Mexico State University '51, B.S.

GENIE CHANCE, Senior Research Assistant in Geology (Anchorage)
North Texas State University '46, B.A.

SYDNEY CHAPMAN, F.R.S., Advisory Scientific Director, Geophysical Institute, and Professor of Geophysics
Manchester University '07, B.Sc.; '08, M.Sc.; '12, D.Sc.

DAVID L. CHAUVIN, Head of Technical Services and Associate Electronic Engineer, Geophysical Institute
University of Washington '50, B.S.E.E.

JEAN CHORBAJIAN, Lecturer in Mathematics
Iowa State University '55, B.S.; '58, M.S.

TORCOM CHORBAJIAN, Associate Professor of Mathematics
East Tennessee State College '53, B.S.; State University of Iowa '58, Ph.D.

Sylvia Ciernick, Director of University Relations and Professor of Communications
Michigan State University '48, B.A.; Wayne State University '56, M.A.; Michigan State University '62, Ph.D.

Vena A. Clark, Associate Professor of Home Economics
Cowler College '25, A.B.; Iowa State University '33, M.S.

David E. Clarke, Associate Professor of Political Science
Cambridge University '52, B.A.; '57, M.A.; Stanford University '64, Ph.D.

Joan B. Clutts, Assistant Professor of Education
Colorado College '51, B.A.; University of Missouri '58, M.Ed.

Max Wayne Cole, Agent, Agriculture and Community Development and Instructor in Extension
Utah State University '63, B.S.

Douglas B. Colp, Instructing Mining Engineer
University of Alaska '40, B.S.

Alex Duff Combs, Assistant Professor of Art (Anchorage)
Temple University '49, B.F.A.; '52, M.F.A.

Donald J. Cook, Associate Professor of Mineral Beneficiation and Head, Department of Mineral Engineering (P.E.)
University of Alaska '47, B.S.; '52, B.M.E.; Pennsylvania State University '58, M.S.; '60, Ph.D.

R. Gordon Cook, Assistant Professor of Mechanical Engineering
Massachusetts Institute of Technology '62, S.B.; '62, S.M.; '63, M.E.; '64, Ph.D.

George R. Cresswell, Senior Research Assistant in Geophysics
University of Western Australia '59, B.Sc.

Daniel C. Crevensten, Executive Officer, Geophysical Institute

Fredric James Crowell, Instructor in Physical Education
University of Idaho '64, B.S.; '65, M.Ed.

Howard A. Cutler, Academic Vice President; Acting Head, Department of Economics; and Professor of Economics
State University of Iowa '40, B.A.; '41, M.A.; Columbia University '52, Ph.D.
GEORGE DAHLGREN, JR., Associate Professor of Chemistry and Head, Department of Chemistry and Chemical Engineering
Illinois Wesleyan University '51, B.S.; University of Wyoming '56, M.S.; '58, Ph.D.

CHARLES W. DAVIS, Associate Professor of Music and Head, Department of Music
State University of Iowa '37, B.A.; '48, M.A.

T. NEIL DAVIS, Assistant Director of Geophysical Institute and Professor of Geophysics
University of Alaska '55, B.S.; California Institute of Technology '57, M.S.; University of Alaska '61, Ph.D.

FREDERICK C. DEAN, Associate Professor of Wildlife Management and Head, Department of Wildlife Management; Assistant Leader, Cooperative Wildlife Research Unit
University of Maine '50, B.S.; '52, M.S.; State University of New York, College of Forestry '57, Ph.D.

CURTIS H. DEARBORN, Associate Professor (Research), Horticulture, Alaska Agricultural Experiment Station
University of New Hampshire '35, B.S.; Cornell University '39, Ph.D.

RUBIN DECKER, Associate Professor of Music
Transylvania College '38, B.A.; Yale School of Music '50, B.M.; '51, M.M.

CHARLES DEEHR, Assistant Geophysicist
Reed College '58, B.S.; University of Alaska '61, M.S.

ROBERT K. DELLENBACH, Head, Student Activities Program
University of Utah, '62, B.A.; Brigham Young University '64, M.B.A.

JOHN B. DeMARCU, Professor of Military Science and Head, Department of Military Science
Lieutenant Colonel, U.S. Army

EARL W. DETRICK, Instructor in Physical Education and Aquatics Supervisor
Graceland College '63, B.A.; Bemidji State College '64, M.S.

RONALD N. DEWITT, Assistant Professor of Geophysics
Michigan College of Mining and Technology '58, B.S.; University of Alaska '61, M.S.; '65, Ph.D.

EMMA R. DIETER, Senior Research Assistant of Marine Science at Douglas Marine Station
DePaul University '59, B.S.

DONALD H. DINKEI, Assistant Professor (Research), Horticulture, Alaska Agricultural Experiment Station
University of Minnesota '54, B.S.; '60, Ph.D.

JOHN O. DISTAD, Assistant Professor of Mathematics
Montana State College '53, B.S.; '55, M.S.

HORACE W. DOMIGAN, Professor of Accounting and Head, Department of Accounting
Ohio Wesleyan University '27, B.A.; DePaul University '44, LL.B.; Northwestern University '47, M.B.A.; C.P.A.

JOHN P. DOYLE, Instructor, Fisheries Extension
University of Washington '59, B.S.

MARIE C. DOYLE, Assistant Professor of Psychology
University of Utah '50, B.A.; '61, Ph.D.

RICHARD C. DUGDALE, Professor of Marine Science
University of Wisconsin '50, B.S.; '51, M.S.; '55 Ph.D.

VERA A. DUGDALE, Assistant Professor of Marine Science
University of Wisconsin '55, B.A.; '62, M.S.; University of Alaska '65, Ph.D.

IRIS JUNE DUNCAN, Assistant Professor of English
Southwestern State College '55, B.A.; University of Oklahoma '62, M.A.; '65, Ph.D.

SHERRY LYNN DUNLAP, Instructor and Assistant Catalog Librarian
Bowling Green University '58, B.A.; University of Illinois '59, M.S. in L.S.
CAROL ECHOLS, Senior Research Assistant in Geophysics
Cornell College '54, B.S.; University of Alaska '63, M.S.

F. ARNOL ECHOLS, Executive Officer, Office of Vice President for Research and
Advanced Study
Linfield College '57, B.S.

ENOLA ECK, Assistant Professor of Physical Education
Valley City State Teachers College '60, B.S.

JOHN DONALD ECKERSON, Assistant Professor of Physical Education
University of Washington '53, B.S.; '52, M.A.

FRANCIS R. EELS, Research Associate Professor of Economics
St. Andrews University '52, M.A.

DALE EDWIN ELLIS, Instructor of History and Political (Ketchikan Community College)
Pomona College '63, B.A.; University of North Carolina '65, M.A.

CHRISTIAN T. ELVEY, University Research Professor and Special Assistant to the
President
University of Kansas '21, A.B.; '23, M.A.; University of Chicago '30, Ph.D.

ROBERT JARED EPSTEIN, Instructor in Speech
University of California '62, B.A.; Syracuse University '64, M.A.

OLIVER P. EVERETTE, Lecturer in English
Concordia College '33, B.A.; University of Washington '51, M.A.

EDWIN N. FISHER, Assistant Professor of Mechanical Engineering
University of Nebraska '59, B.S.M.E.

BENSON T. FOGLE, Assistant Geophysicist
University of South Carolina '56, B.S.; '58, M.S.

ROBERT B. FORBES, Associate Professor of Geology and Head, Department of Geology
University of Washington '50, B.S.; '59, Ph.D.

DANNY P. FRASER, Assistant Professor of Military Science
Major, U.S. Army, Texas Western College '51, B.A.

MERVIN LEE FREEMAN, Assistant Professor of Extension
University of Minnesota '59, B.S.; '65, M.S.

EDGAR J. FREMOUW, Senior Research Assistant in Geophysics
Stanford University '57, B.S.; University of Alaska '63, M.S.

RICHARD H. GAINES, Assistant Professor of English (Anchorage)
Texas Christian University '26, B.A.; University of Southern California '62, M.A.

ISABELLE VAN TASSEL GALBRAITH, Assistant Professor and Head, Library Catalog
Department
Geneseo State Teachers College '45, B.S.; Syracuse University '60, M.L.S.

WILLIAM A. GALSTER, Assistant Zoophysiologist
University of Wisconsin '58, B.S.; '61, M.S.

ALICE GATZKIEWICZ, Chief Accountant

EDWARD J. GAUSS, Assistant Geophysicist and Assistant Professor of Electrical Engi-
neering
California Institute of Technology '54, B.S.; University of Colorado '56, M.A.;
University of California at Los Angeles '60, M.S.

STEPHEN P. GELLER, Research Programmer and Instructor in Computer Science
Bates College '62, B.S.; University of Alaska '64, M.A.

CHARLES T. GENAUX, Assistant Professor of Zoophysiology and Chemistry
Iowa State College '50, B.S.; University of Rochester '53, M.S.

FOYE L. GENTRY, Instructing Technician in Electronic Technology and Supervisor of
Electronics Technology Program
ALFRED H. GEORGE, Assistant Comptroller for Research
Oregon State University '50, B.S.

JOHN JAMES GOERING, Assistant Professor of Marine Science
Bethel College '56, B.S.; University of Wisconsin '60, M.S.; '62, Ph.D.

BOB F. GORDON, Assistant Professor of Military Science
Captain, U.S. Army

BRUCE R. GORDON, Professor of French and Spanish, and Head, Department of
Linguistics and Foreign Languages
Brown University 37, A.B.; New York State College for Teachers '42, M.A.;
Syracuse University '50, Ph.D.

DONALD D. GORDON, Assistant Supervisor Engineer, Mintrack Station

ARNOLD A. GRIESE, Associate Professor of Education
Georgetown University '48, B.S.; University of Miami '57, M.Ed.; University of
Arizona '60, Ph.D.

JAMES GROSS, Senior Research Assistant in Marine Science
Pennsylvania State College '33, B.S.

RUSSELL D. GUTHRIE, Assistant Professor of Zoology and Paleontology
University of Illinois '58, B.S.; '59, M.S.; University of Chicago '63, Ph.D.

JAMES M. HADRA, Assistant Professor of French and Spanish
University of Texas '55, B.A.; Army Language School '59; Fordham University
'65, M.A.

DONN K. HAGLUND, Visiting Associate Professor of Geography
Drake University '48, B.A.; University of Pennsylvania '50, M.A.; '58, Ph.D.

LEWIS E. HAINES, Director, Student Affairs (Dean of Students) and Associate Professor
Middlebury College '43, B.A.; Columbia Teachers College '50, M.A.; Washington
State University '60, Ph.D.

THOMAS J. HALLINAN, Assistant Electronic Engineer, Geophysical Institute
Cornell University '64, B.S.E.E.

LEW E. HANKS, Civil Defense Specialist and Assistant Professor, Cooperative Extension
Service
University of Idaho '50, B.S.

GERALD S. HANNA, Assistant Professor of Education
Long Beach State College '55, B.A.; '59, M.A.; University of Southern California
'65, Ed.D.

SAMUEL J. HARBO, JR., Assistant Professor
University of Nebraska '51, B.S.; University of Alaska '58, M.S.

ROBERT C. HARING, Associate Professor of Business Administration and Head, Depart-
ment of Business Administration
Indiana University '54, B.A.; '58, M.B.A.; '62 Ph.D.

JAMES C. HARMON, Instructor of Military Science
Sergeant First Class, U.S. Army

VERNON L. HARM, Assistant Professor of Botany and Curator of Herbarium
Bethel College '55, B.S.; Kansas State Teachers College '59, M.S.; University of
Kansas '63, Ph.D.

MARGARET P. HARRIS, Assistant Professor and Head, Library Documents Department
William and Mary College '38, B.A.; University of Wisconsin '39, B.L.S.

BETTIE S. HARROP, Head, Alumni Services and Graduate Placement
University of Alaska '35, B.S.

RICHARD R. HEACOCK, Assistant Geophysicist
Oregon State University '44, B.S.; University of Wisconsin '46, M.Ph.

THOMAS J. HEAD, Professor of Mathematics
University of Oklahoma '54, B.S.; '55, M.A.; University of Kansas '62, Ph.D.
PAUL E. HEILMAN, Assistant Professor of Forestry
Oregon State University '57, B.S.; University of Washington '61, Ph.D.

LAWRENCE HEINER, Instructor in Mineral Beneficiation
University of Alaska '61, B.S.

LILIAN LUCY HEMPEL, Assistant Professor of Home Economics
Iowa State College '52, M.S.; Queen Elizabeth College, University of London '56, Postgraduate Diploma in Dietetics

VICTOR HESSLER, Professor of Geophysics (P.E.)
Oregon State College '26, B.S.; Iowa State College '27, M.S.; '34, Ph.D.

JOHN M. HILPERT, Professor of Engineering Management and Head, Department of Engineering Management
Oregon State College '38, B.S.; George Washington University '47, M.A.; University of Iowa '56, Ph.D.

KENNETH HENRY HOBSON, Lecturer in Graphics

ALVAH LEON HOLLAND, Head, Student Services
Centenary College '59, B.S.

WOLF HOLLERBACH, Assistant Professor of French and German
University of Bonn '58, State Diploma; Université de Rennes '61, Doctorat d'Université

VERNON N. HOLT, Instructor of Military Science
Staff Sergeant, U.S. Army

DONALD W. HOOD, Director and Professor of Marine Science
Pennsylvania State University '40, B.S.; Oklahoma State University '42, M.S.; Texas A & M University '50, Ph.D.

JERRY HOOK, Senior Research Assistant in Geophysics
University of Alaska '58, B.S.; '63, M.S.

EVERAD F. HORTON, Instructor of Military Science
Master Sergeant, U.S. Army

CHARLES HOSKIN, Assistant Professor of Geology
Heidelberg College '55, B.S.; Duke University '57, A.M.; University of Texas '62, Ph.D.

LEO CLARON HOSKINS, Assistant Professor of Chemistry
Utah State University '62, B.S.; Massachusetts Institute of Technology '65, Ph.D.

BETTY HOUSE, Counselor for Women and Instructor in Education
University of Texas '51, B.A.; East Texas State University '63, M.S.

DOUGLAS W. HUBER, Assistant Professor of Mineral Engineering
University of Alaska '54, B.S.; '54, B.Min.Engr.

ICHIROU INUKAI, Instructor in Economics
Waseda University '56, B.A.; '58, M.A.

LAURENCE IRVING, Professor of Zoophysiology and Director, Institute of Arctic Biology
Bowdoin College '16, A.B.; '59 (Hon.) D.Sc.; Harvard University '17, A.M.; Stanford University '24, Ph.D.; University of Oslo '56 (Hon.), M.D.

ELAINE JACOBSON, Assistant Professor of Chemistry
University of Alaska '57, B.S.; '62, M.S.

ROLAND A. JALBERT, Assistant Professor of Physics
Massachusetts Institute of Technology '39, B.S.; M.S.

RAMASASTRY JAYARAM, Assistant Professor of Geophysics
Mysore '60, B.Sc.; '61, M.Sc.; Northwestern University '65, Ph.D.

GENE WILLIAM JOHNSON, Student Counselor (Anchorage)
Montana State College '60, B.S.; Rutgers '64, Ed.M.
RUTH ELAINE JOHNSON, Librarian (Anchorage)  
Mather College of Western Reserve University '58, A.B.; Western Reserve University '59, M.S.

VINCENT JOHNSON, Distinguished Lecturer in Accounting  
Certified Public Accountant

LAURA E. JONES, Director of Admissions and Registrar  
University of Denver '41, B.A.

ARVO KALLIO, Assistant Professor (Research), Horticulture, Alaska Agricultural Experiment Station  
University of Minnesota '42, B.S.; '47, M.S.; '59, Ph.D.

MARGARET E. KALLIO, Instructor in Women's Physical Education  
Bowling Green State University '60, B.S.

DONALD L. KAUFMANN, Assistant Professor of English  
University of Pittsburgh '55, A.B.; '57, M.Litt.; University of Iowa '56, Ph.D.

CHARLES J. KEIM, Dean, College of Arts and Letters and Professor of Journalism and English  
University of Washington '48, B.A.; '50, M.A.

LEONARD E. KESL, Assistant Professor of Art  
Illinois Wesleyan University '53, M.F.A.; Michigan State University '57, M.A.

BRINA KESSEL, Dean, College of Biological Sciences and Renewable Resources, and Head, Department of Biological Sciences, and Professor of Zoology  
Cornell University '47, B.S.; University of Wisconsin '49, M.S.; Cornell University '51, Ph.D.

ROBERT W. KING, Assistant Professor of English  
State University of Iowa '59, B.A.; Colorado State University '61, M.A.; State University of Iowa '65, Ph.D.

LESLIE J. KLEBESADEL, Assistant Professor (Research), Agronomy, Alaska Agricultural Experiment Station  
University of Wisconsin '54, B.S.; '55, M.S.; '58, Ph.D.

DAVID R. KLEIN, Leader, Cooperative Wildlife Research Unit and Associate Professor of Wildlife Management  
University of Connecticut '51, B.S.; University of Alaska '53, M.S.; University of British Columbia '53, Ph.D.

KENNETH R. KLOPF, Senior Research Assistant in Geophysics  
Texas Western College '57, B.Sc.

DAVID R. KNAPP, Registrar and Director of Students (Anchorage)  
University of Nebraska '52, B.S.; '55, M.Ed.

GEORGE R. KNIGHT, Assistant Director, Physical Plant and Campus Planning (P.E.)  
University of Alaska '55, B.S.; Harvard University '56, S.M.; '61, M.E.

LEONARD I. KNOWLES, Assistant Professor of Marine Science and Officer in Charge of Douglas Marine Station  
University of Arkansas '57, B.A.; '59 M.S.

FRED KOSCHMANN, Resident Director, Juneau-Douglas Community College  
Oklahoma City University '36, B.F.A.; Eastern Washington State College '38, B.A.;  
Dubuque Presbyterian Seminary '47, B.D.; Seattle Pacific College '62, M.Ed.

JANE LOWELL KRAUSS, Lecturer in Psychology  
Western Reserve University '57, A.B.; '60, M.S.

MICHAEL E. KRAUSS, Associate Professor of Linguistics  
University of Chicago '53, B.A.; Western Reserve University '54, B.A.; Columbia University '55, M.A.; Certificat d'Etudes Superieures, Universite de Paris '56;  
Harvard University '59, Ph.D.; Bacalaureatus Philologiae Islandicae, Haskoni Islands '60.

RUDOLPH W. KREICI, Associate Professor of Philosophy and Head, Department of Philosophy  
University of Innsbruck '59, Ph.D.
SUSUMO KUBOTA, Assistant Geophysicist
Hokkaido University '60, B.S.; '62, M.S.

GRANT C. LA POINT, Assistant Design Engineer, Geophysical Institute
Merrimack College '62, A.S.E.E.

BRIAN T. LARMAN, Assistant Supervisory Engineer, Geophysical Institute
University of Alaska '60, B.S.E.E.

WINSTON M. LAUGHLIN, Professor (Research), Soil Science, Alaska Agricultural Experiment Station
University of Minnesota '41, B.S.; Michigan State College '47, M.S.; '49, Ph.D.

BYUNG DON LEE, Assistant Professor in Marine Science
Pusan Fisheries College '48, B.S.; University of Texas '60, M.A.

ROGER WOLCOTT LEWIS, Assistant Professor of Zoophysiology
Pomona College '48, B.A.; University of Southern California '61, M.S.; University of California '65, Ph.D.

EDWARD W. LIEBENTHAL, District Agricultural Agent, Homer, and Assistant Professor, Cooperative Extension Service
University of Wisconsin '48, B.S.

GEORGE F. LINDholm, Assistant Engineer, Geophysical Institute
University of California at Los Angeles '40, A.B.

CHARLES E. LOGSDON, Professor (Research), Plant Pathology, Alaska Agricultural Experiment Station
University of Kansas City '42, B.A.; University of Minnesota '54, Ph.D.

LEO M. LOLL, JR., Associate Professor of Business Administration and Editor, Alaska Review of Business and Economic Conditions
University of Colorado '47, B.S.; Ohio State University '49, M.B.A.

PETER M. LONGLEY, Assistant Professor of Mathematics and Philosophy
Union College '57, B.S.; University of Utah '59, M.S.

FRED MACHE TANZ, Distinguished Associate in Art
Ohio State University '30, B.A.; '35, M.A.

JANE J. MAC ISAAC, Senior Research Assistant in Marine Science
Oberlin College '62, A.B.

DIANNE D. MAHAFFEY, Instructor of Office Administration
Colorado State College '59, B.A.

JAMES R. MAHAFFEY, Assistant Professor of Physical Education
Western State College of Colorado '57, B.A.; '62, M.A.

JOHN H. MANNING, Associate Professor of Engineering Management (Anchorage)
Northeastern University '39, B.S.; University of Alaska '62, M.S.

LEO MARK ANTHONY, Associate Professor of Mining Extension
University of Alaska '52, B.S.

CHARLES F. MARSH, Assistant Professor (Research), Economics, Alaska Agricultural Experiment Station
Kansas State College '49, B.S.; '55, M.S.

EMILE MARTEL, Assistant Professor of Spanish and French
University of Ottawa '60, B.A.; Université Laval '62, Licence es Lettres; Universidad de Coimbra '63, Diploma Complementar de Portugues; Universidad de Salamanca '64, Doctor en Filosofía y Letras

CECIL W. MARTIN, Associate Professor of Education
Illinois College '25, B.A.; University of Illinois '31, M.S.; Teachers College, Columbia University '42, Ed.D.

KENNETH K. MARTIN, Assistant Professor of Education and Head, Counseling and Testing Services
North Texas State University '52, B.A.; '53, M.Ed.; University of Denver '63, Ph.D.
PAUL F. MARTIN, Assistant Professor (Research), Soil Science, Alaska Agricultural Experiment Station
Clark University '39, A.B.; '41, M.A.

MICHAEL R. C. MASSIE, Assistant Research Professor of Forestry
Michigan Technological University '60, B.S.; University of New Hampshire '62, M.S.; Michigan State University '65, Ph.D.

KEITH B. MATHER, Director of Geophysical Institute and Professor of Physics
Adelaide University '42, B.Sc.; '44, M.Sc.

JAMES W. MATTHEWS, Assistant Director and Assistant Professor, Cooperative Extension Service
North Dakota State University '52, B.S.; University of Wisconsin '61, M.S.

PAUL H. McCARTHY, JR., Instructor and Archivist
St. John Fisher College '62, B.A.; Syracuse University '64, M.L.S.

FRANCIS L. McCONKEY, Assistant Professor of Education and Head, Audio-Visual Communications
Elizabethtown College '54, B.S.; University of Alaska '58, M.Ed.

BEATRICE G. McDONALD, Associate Professor of Business Administration—Secretarial Science (Anchorage)
Salem State Teachers College '33, B.S.Ed.; Boston University '54, M.Ed.

JULIE McGUIRE, Assistant Professor of Political Science
Scripps College '59, B.A.

HILLIS S. McKENZIE, Associate Professor of Economics
College of Wooster '50, B.A.; University of St. Andrews '59, Ph.D.

GEORGE Mc MILLAN, Acting Resident Director (Ketchikan Community College)
University of North Dakota '28, B.S.; University of Washington '53, M.Ed.

JOSEPH W. MEEKER, Assistant Professor of English and Head, Department of English
Occidental College '54, B.A.; '61, M.A.; '63, Ph.D.

WILLIAM W. MENDENHALL, JR., Associate Professor of Civil Engineering (P.E.)
Cornell University '49, B.C.E.; '60, M.S.

CHING-I MENG, Senior Research Assistant in Geophysics
Tunghai University '61, B.S.; University of Alaska '65, M.S.

ROBERT P. MERRITT, Associate Professor of Electrical Engineering
Oregon State College '49, B.S.

MARVIN A. MESSER, Executive Officer, Institute of Arctic Biology

NEAL E. MICHAELSON, Assistant Professor (Research), Soil Science, Alaska Agricultural Experiment Station
University of Minnesota '48, B.S.; University of Nebraska '50, M.S.

ALLAN H. MICK, Director, Alaska Agricultural Experiment Station
Michigan State University '35, B.S.; '47, Ph.D.

DUANE J. MIKOW, Assistant Professor of Music
Western State College of Colorado '51, B.A.; University of Colorado '57, M.Mus.Ed.

JOHN M. MILLER, Station Manager, NASA Minitrack Facility
University of Alaska '60, B.S.

L. KEITH MILLER, Assistant Professor of Zoophysicsiology
University of Nevada '55, B.S.; '57, M.S.

ORLANDO W. MILLER, Assistant Professor of History
Muehlenberg College '47, B.A.; Columbia University '48, M.A.

WILLIAM W. MITCHELL, Assistant Professor (Research), Taxonomy and Ecology, Alaska Agricultural Experiment Station
Montana State University '58, B.S.; Iowa State University '62, Ph.D.

HERBERT MORRIS MORGAN, Assistant Professor of Anthropology and Geography
Louisiana State University '58, B.A.; '60, M.A.
PETER REED MORRISON, Professor of Zoophysiology
Swarthmore College '40, A.B.; Harvard University '47, Ph.D.

JAMES E. MORROW, Professor of Fisheries Biology and Curator of Fishes
Middlebury College '40, A.B.; '42, M.S.; Yale University '44, M.S.; '49, Ph.D.

BRUCE R. MORTON, Computer Programmer
University of Texas '55, B.A.

ROBERT D. MURAWSKI, Assistant Instructing Technician
University of Alaska '64, Electronic Technology Program

WALLACE B. MURRAY, Associate Professor of Physics
University of Denver '50, B.S.; '55, M.S.

GLADYS MUSGROVE, District Home Demonstration Agent, Nome, and Assistant Professor, Cooperative Extension Service
Washington State College '49, B.A.; Colorado State University '58, M.A.

CLAUS-MICHAEL NASKE, Instructor in History and Political Science (Juneau-Douglas)
University of Alaska '61, A.B.; University of Michigan '64, M.A.

K. V. NATARAJAN, Assistant Professor of Marine Science
Banaras University '55, M.S.; University of Alaska '65, Ph.D.

BONITA NEILAND, Associate Professor of Botany
University of Oregon '49, B.S.; Oregon State College '51, M.A.; University of Wisconsin '54, Ph.D.

BOZENA NEMCOVA, Instructor in Sociology
University of Kansas '50, M.A.; Stanford University '52, M.A.

WILLIAM NICHIPARENKO, Assistant Design Engineer
Princeton University '63, B.S.E.

CHARLES M. NORTHROP, Assistant Professor of Speech and Radio
University of Florida '60, A.A.; '62, B.S.; '63, M.A.

JAMES C. OEHRING, Business Manager, Geophysical Institute

TAKESHI OHITAKE, Associate Professor of Geophysics
Tohoku University '52, B.Sc.; '61, D.Sc.

ALVIN S. OKESON, Resident Director, Palmer Community College
Concordia College '56, B.A.; St. Cloud State College '64, M.S.

B. G. OLSON, Head, News Service and Publications
University of Wichita '51, B.A.

SAMUEL DEAN OLSON, Assistant Professor of Journalism
Gonzaga University '60, B.A.; University of Washington '62, M.A.

MICHEL G. OSSUEA, Professor of Mathematics
University of Pittsburgh '50, B.S.; '57, M.LITT.; '61, Ph.D.

WARREN WILLIAM OTTEMILLER, Assistant Professor of Art and Design
Rochester Institute of Technology '61, A.A.S.; '62, B.F.A.; '63, M.F.A.

VONDOLEE PAGE, Lecturer in Education (Sustina-Matunuska)
University of New Mexico '39, B.A.; '49, M.A.

CHARLES PARR, Instructor of German and Russian
University of Alaska '63, B.A.; U.S. Army Institute of Advanced Russian Studies; University of Alaska '65, M.A.

R. PARTHASARATHY, Associate Professor of Physics
Annamalai University '50, B.Sc. (Hons.); '52, M.A.

EMIL M. PEEL, Assistant Field Engineer, Geophysical Institute
University of Alaska '61, B.S.

MELBA F. PELOSI, Associate Professor and Head, Department of Office Administration
North Texas State Teachers College '46, B.S.; '52, M.B.E.
HAROLD R. PEYTON, Engineering Consultant for Arctic Environmental Engineering Laboratory
Oregon State College '49, B.S.; '57, M.S.

LEONARD J. PEYTON, Assistant Biologist, Laboratory of Zoophysiology, and Assistant to the Director of the Institute of Arctic Biology
Utah State University '51, B.S.

BETTY ANNE PHILIP, Assistant Professor of Arctic Biology
Agnes Scott College '52, B.A.; Yale University '54, M.S.; '60, Ph.D.

KENELM W. PHILIP, Assistant Professor of Physics
Yale University '53, B.S.; '58, M.S.; '63, Ph.D.

RAYMOND G. PIERCE, Editor and Instructor, Cooperative Extension Service
Michigan State University '58, B.S.

HAROLD PILKINGTON, Assistant Professor of Geology
University of Colorado '52, B.A.; '54, M.S.; University of Arizona '62, Ph.D.

FRANK W. PINKERTON, Assistant Professor of Music (Anchorage)
University of Rochester '53, B.M.M.E.; University of New Mexico '61, M.M.E.

CARL H. POHLA, Resident Counselor and University of Alaska Representative, (Anchorage)
Michigan State University '65, B.S.

RICHARD G. POSSENTI, Lecturer in Psychology and Sociology
St. Joseph's College '51, B.S.; University of Alabama '55, M.A.

FRANCIS F. PYNE, Head, Department of Health, Physical Education and Recreation and Associate Professor
University of Toronto '48, B.P.H.E.; University of Minnesota '52, M.A.; '56, Ph.D.

JAY A. RABINOWITZ, Distinguished Lecturer in Political Science
Syracuse University '49, B.A.; Harvard Law School '52, LL.B.

KENNETH M. RAE, Vice President for Research and Advanced Study; Professor of Marine Science
University College, London '35, B.Sc.; '58, Ph.D.

DONAL M. RAGIN, Associate Professor of Geology
Occidental College '51, B.A.; University of Southern California '54, M.S.; University of Washington '61, Ph.D.

DHARMBIR RAI, Associate Professor of Geophysics
Banaras Hindu University '50, B.Sc.; '52, M.Sc.; Cornell University '64, Ph.D.

GERTRUDE GRETHER RASCHE, Professor of English
University of Wisconsin '29, B.A.; Yale University '31, M.A.; Cornell '39, Ph.D.

CHARLES K. RAY, Dean, College of Behavioral Sciences and Education and Professor of Education
University of Colorado '51, B.A.; Columbia University '55, M.A.; '59, Ed.D.

DIPAK KUMAR RAY, Senior Research Assistant in Geophysics
Calcutta University '52, B.S.; '54, M.S.

MANFRED H. REES, Associate Professor of Physics
West Virginia University '48, B.S.; University of Colorado '56, M.S.; '58, Ph.D.

GERALD REICHENEDER, Assistant Design Engineer in Geophysics
University of Waterloo, Ontario, '64, B.A.Sc.

ROGER RENNE, Assistant Professor of Mathematics
Reed College '61, B.A.; University of California '62, M.A.

LOUIS L. RENNER, Assistant Professor of German
Gonzaga University '50, A.B.; '51, M.A.; University of Munich '65, Ph.D.

E. F. RICE, Professor of Civil Engineering (P.E.) and Head, Department of Civil Engineering and Mechanical Engineering
University of Idaho '48, B.S.; Oregon State College '49, M.S.; '55, Ph.D.
LEROY E. RICH, Manager, University Bookstore
Colorado State University '54, B.A.

JOHN C. ROCHE, Associate Professor of Business Administration
Birmingham University '25, B. Com.; '27, M. Com.

GEORGE W. ROGERS, Research Professor of Economics
University of California at Berkeley '42, B.A.; '43, M.A.; Harvard University '50, Ph.D.

ROBERT B. ROGERS, Lecturer in Mathematics
University of Alaska '63, B.S.; '65, M.S.

GERALD ROMICK, Assistant Professor of Geophysics
University of Alaska '52, B.S.; University of California at Los Angeles '54, M.S.;
University of Alaska '64, Ph.D.

RAYMOND B. ROOF, Associate Design Engineer, Geophysical Institute
University of Michigan '25, B.S.; '40, M.S.

WILLIAM H. ROSE, Assistant Professor of Sociology
University of Utah '58, B.A.; '63, M.A.

DONALD H. ROSENBERG, Senior Research Assistant in Marine Science
Oregon State University '60, B.S.; '63, M.S.

PAUL P. ROWE, Assistant Professor of Mathematics and Supervisor of University Computer Center
Brigham Young University '50, B.S.; Washington State University '53, M.S.; '60 Ph.D.

CHARLES L. ROWE, Assistant Professor of Geology
Tulane University '58, B.S.; '59, M.S.; University of Oklahoma '62, Ph.D.

LUDWIG J. ROWINSKI, Assistant Professor of Museum Science and Director of University Museum
Cornell University '51, B.S.; University of Alaska '58, M.S.

H. THEODORE RYBERG, Director of Libraries
Gettysburg College '55, A.B.; Western Reserve University '57, M.S.L.S.

LEE H. SALISBURY, Associate Professor of Speech and Drama and Head, Department of Speech, Radio, and Drama
New York University '49, B.S.; Columbia University '50, M.A.

HULDAH B. SAMUELSON, District Home Demonstration Agent (Anchorage), and Assistant Professor, Cooperative Extension Service
University of Nebraska '34, B.A.; '37, B.S.

HARLEM D. SANDBERG, State 4-H and Youth Program Leader and Assistant Professor of Extension
University of Minnesota '55, B.S.; Michigan State University '64, M.A.

CHARLES SARGENT, Dean, College of Mathematics, Physical Sciences and Engineering; and Professor of Civil Engineering (P.E.)
University of Idaho '48, B.S. (C.E.); '52, C.E.; Stanford University '58, M.S.

A. DALE SAUNDERS, Assistant Professor (Research), Economics, Alaska Agricultural Experiment Station
Purdue University '48, B.S.; Montana State College '50, M.S.

JOHN F. SCHINDLER, Assistant Director and Assistant Biologist, Arctic Research Laboratory
Michigan State University '53, B.S.; '54, M.S.

PETER SCHWERTFEGER, Assistant Professor of Geophysics (Visiting)
University of Melbourne '56, B.Sc.; '59, M.Sc.; McGill University '61, Ph.D.

RONALD WILLIAM SENUNGETUK, Assistant Professor of Design, Extension Center in Arts and Crafts
Rochester Institute of Technology '58, A.A.S.; '60, B.F.A.

FRANK Q. SESSIONS, Associate Professor of Psychology and Head, Department of Psychology and Sociology
Idaho State University '52, B.S.; University of Idaho '54, M.S.; '63, Ph.D.
VIRGIL SEVERNS, District Agricultural Agent, Remote Areas, and Assistant Professor, Cooperative Extension Service
Kansas State University '51, B.S.; '56, M.S.

GHANSHYAM DATT SHARMA, Assistant Professor of Marine Science
Benaras Hindu University '52, B.S.; Swiss Federal Institute of Technology '58, Diploma of Engineering Geology; University of Michigan '61, Ph.D.

JOHN ROGER SHERIDAN, Assistant Professor of Physics
Reed College '55, B.A.; University of Washington '64, Ph.D.

EUGENE SHORT, Resident Director, Anchorage Community College and Associate Professor of Education
College of the Pacific '41, A.B.; Stanford University '58, M.A.

JAMES L. SIMPSON, Resident Director, Ketchikan Community College and Assistant Professor of Education
Lewis and Clark College '50, B.S.; '54, M.Ed.

EDMUND G. SKELLINGS, Associate Professor of English
University of Massachusetts '57, B.A.; State University of Iowa '62, Ph.D.

HERMAN E. SLOTNICK, Professor of History and Head, Department of History and Political Science
University of Idaho '39, B.A.; University of Washington '58, Ph.D.

MARY SLOTNICK, Lecturer in English
University of Washington '45, B.A.; University of Alaska '59, M.A.

NORMAN S. SMITH, Assistant Professor of Mining Engineering
Colorado School of Mines '58, E.M.; '66, M.S.

ROBERT L. SMITH, Head, Department of Evening Classes and Correspondence Study and Associate Professor of Political Science
College of St. Joseph '54, B.A.; University of Oklahoma '55, M.A.; American University '64, Ph.D.

SHEILA M. SMITH, Supervisor of Nursery School
University of Connecticut '61, B.S.

THOMAS NORRIS SMITH, Assistant Professor of English
University of Connecticut '59, B.A.; University of Illinois '60, M.A.

WILLIAM H. SMITH, Assistant Professor and Head, Library Acquisitions Department
Iowa State College '58, B.S.; Simmons College '60, M.S.L.S.

ANDREW GEORGE SOLL, Marine Superintendent and Executive Officer
University of Connecticut, B.S.E.

BRAHMA NAND SRIVASTAVA, Assistant Professor of Physics
St. Andrew's University '54, B.S.; University of Allahabad '56, M.Sc.; '62, Ph.D.

GLENN STANLEY, Assistant Geophysicist
Oregon State College '50, B.S.; '55, M.S.

NANCY E. STEFFEN, Assistant Reader Services Librarian and Instructor
Mt. Angel College '64, B.A.; University of Washington '65, M. Libr.

RUSSELL STRANDTMANN, Research Programmer and Instructor in Mathematics
Texas Technological College '59, B.S.; University of Alaska '62, M.S.

VICTOR STRASH, Assistant Professor of History and Languages (Anchorage)
University of Moscow '15, B.A.; University of Washington '31, M.A.

DANIEL SULLIVAN, Assistant Professor of Mathematics (Anchorage)
University of Maine '51, B.A.; '59, M.A.

ROBERT A. SULLIVAN, Lecturer in Mathematics
St. Bonaventure University '52, B.S.; '61, M.S.

TROY SULLIVAN, Assistant Professor of Education (Anchorage)
North Texas State Teachers College '48, B.S.; '50, M.S.; '65, Ed.D.
AGNES SUNNELL, State Home Economics Leader and Associate Professor, Cooperative Extension Service
University of Washington '30, B.S.; Washington State University '44, M.S.

L. GERALD SWARTZ, Associate Professor of Zoology
University of Illinois '33, B.S.; '54, M.S.; '58, Ph.D.

WILLIAM J. SWEETMAN, Professor (Research), Alaska Agricultural Experiment Station
Michigan State University '22, B.S.; '24, M.S.

WILLIAM A. SWICK, JR., Coordinator and Teacher, Civil Defense Education Program
Allegheny College '45, B.A.; Syracuse University '55, M.S.Ed.

DANIEL W. SWIFT, Associate Professor of Geophysics
Haverford College '57, B.A.; Massachusetts Institute of Technology '59, M.S.

ROSCOE L. TAYLOR, Associate Professor (Research), Agronomy, Alaska Agricultural Experiment Station
South Dakota State College '48, B.S.; Iowa State College '50, M.S.

JOHN J. TEAL, JR., Research Professor of Animal Husbandry and Human Ecology
Harvard University '44, B.S.; Yale University '46, M.A.

JOHN A. TEAS, Assistant Supervisory Engineer, Geophysical Institute
Texas Technology College '61, B.S.E.E.

RUSSELL B. THOMAS, Carnegie Visiting Professor of Humanities
Eureka College '21, A.B.; University of Chicago '27, A.M.; '42, Ph.D.

ELDON THOMPSON, Assistant Design Engineer, Geophysical Institute
University of Alaska '64, B.S.E.E.

YOSHIKI TOTA, Professor of Zoophysics (Visiting)
Kyoto University '41, B.S.; '55, D.M.S.

CHARLOTTE TOMPKINS, District Home Demonstration Agent (Juneau) and Assistant Professor, Cooperative Extension Service
Oklahoma A. and M. '34, B.S.; Colorado State University '48, M.S.

LESTER J. TORGERSON, Assistant Comptroller for Management
University of Idaho '47, B.S.

GARY D. TRAYLOR, Assistant Professor of English (Anchorage)
University of Wichita B.A.; M.A.

ANN TREMARELLO, Assistant Registrar and Assistant Director of Admissions
University of Alaska '57, B.B.A.

LUCILE L. TROST, Associate Professor of Home Economics and Head, Department of Home Economics
Brigham Young University '40, B.S.; Utah State University '56, M.S.; Texas Woman's University '59, Ph.D.

JOHN G. TRYON, Professor of Electrical Engineering and Head, Department of Electrical Engineering
University of Minnesota '41, B. of Physics; Cornell University '52, Ph.D.

ARLON TUSSING, Assistant Professor of Economics
University of Chicago '50, A.B.; Oregon State College '52, B.S.; University of Washington '65, Ph.D.

HELMUT G. VAN FLEIN, Associate Professor of Art and Head, Art Department
Schwebisch Hall Teachers College '44, B.Ed.; Paedagogisches Institut Esslingen '48, M.Ed.; Art Academy Stuttgart '51, M.F.A.; University of Colorado '58, M.F.A.

ELVERA K. VOTH, Assistant Professor of Music (Anchorage)
Bethel College '46, B.A.; Northwestern University '48, M.Mus.Ed.

RICHARD H. WASHBURN, Associate Professor (Research), Entomology, Alaska Agricultural Experiment Station
Michigan State University '41, B.S.; Cornell University '48, Ph.D.

HENRY WATERFIELD, Instructor of Mining Extension
University of Alaska '61, B.S.
ALBERT F. WEBER, Instructing Technician in Electronic Technology

FLORENCE R. WEBER, Distinguished Lecturer in Geology
University of Chicago '43, B.S.; '48, M.S.

JUDITH WEEDEN, Lecturer in Zoology
University of Toronto '55, B.A.; '57, M.A.

MINNIE E. WELLS, Professor of English
University of Missouri '25, B.S.; New York University '38, Ph.D.

EUGENE M. WESCOTT, Assistant Professor of Geophysics
University of California at Los Angeles '55, B.A.; University of Alaska '60, M.S.; '64, Ph.D.

GEORGE C. WEST, Associate Professor of Zoophysics
Middlebury College '53, A.B.; University of Illinois '56, M.S.; '58, Ph.D.

EDWIN O. WIIG, Alfred P. Sloan Visiting Professor of Chemistry
Rensselaer Polytech Institute '21, B.S.; University of Wisconsin '25, M.S.; '27, Ph.D.

CHARLES R. WILSON, Assistant Professor of Physics
Case Institute of Technology '51, B.S.; University of New Mexico '56, M.S.;
University of Alaska '63, Ph.D.

WILLIAM H. WILSON, Assistant Professor of History
University of Missouri '47, B.J.; '58, M.A.; '62, Ph.D.

WILLIAM S. WILSON, Professor of Chemistry and Chemical Engineering and Head,
Department of General Science
Brown University '31, Sc.B.; '34, Sc.M.; Yale University '56, Ph.D.

ARTHUR C. WILTON, Assistant Professor (Research), Agronomy, Alaska Agricultural
Experiment Station
University of British Columbia '49, B.S.; University of Saskatchewan '54, M.S.

CAROL J. WINEY, 4-H Assistant, Cooperative Extension Service (Anchorage)
Iowa State University '57, B.S.

WENDELL W. WOLFE, Head, Department of Summer Sessions, Conferences and Short
Courses
North Texas University '48, B.S.; Texas College of Arts and Industries '52, M.S.;
University of Texas '65, Ph.D.

YAM SUEN WONG, Senior Research Assistant in Geophysics
Memphis State University '63, B.S.; University of Alaska '65, M.S.

WILLIAM R. WOOD, President of the University and Professor of English
Illinois College '27, B.A.; '60, LL.D.; University of Iowa '36, M.A.; '39, Ph.D.

JOEL MICHAEL YATES, Lecturer in English
University of Kansas City '61, B.A.; '62, M.A.

SEKIKO YOSHIIDA, Associate Professor of Geophysics
Jiyuu Gakuen College '44, B.S.; Tokyo University '60, D.Sc.

MERLE J. YOUNG, Supervisor, World Data Center and Data Processing

CHESTER E. YOUNGBLOOD, Assistant Professor of Education and Head, Department of
Education
North Texas State University '49, B.A.; '51, M.Ed.; '61, Ed.D.

KENNETH L. ZONGE, Assistant Professor of Electrical Engineering
University of Alaska '62, B.S.E.E.; University of Arizona '64, M.S.
