*For prices sold as #/lb (unit pricing) simply put a "u" after the price. Eg apples 1.99u

Community			Date	Name			
Utilities		1 gallon of #1 heating oil					
		1 gallon of unleaded gas					
		100 lbs of propane					
		2x4x8'					
* A,B,C,D Ranked importance of the price for a valid survey							
Please try to get all A & B prices, but even the “A” prices alone get 75% of the information content of the							
Units are needed ONLY if the price is NOT \$/lb.							
		Eg. “4.99 p 5” for a 5 pound bag of potatoes,					
		but if apples are \$1.99/lb, then “1.99” is adequate					
** Pound, (Z) ounce, Gallon, Quart, Dozen							
Note!	Price lowest \$/lb pkg, typical household size						
Some stores give “unit” pricing in a variety of units (either pounds and ounces, usually)							
Thank	Contact Bret Luick, 907.474.5170; bluick@alaska.edu; nutrition.on-rev.com
