

"Alice like me is caught in an illusion

An illusion of safety, an illusion of security. Alice eats to get big, American food system.

Another fallacy of the health food pyramid. There's no way we need that much dairy. The 'Got milk?' campaign was a lie. Wonderland is a lie. Kids are vaping in middle school and they feel like the caterpillar. 14 year old girls are listening to Lana Del Ray and acting like the queen of hearts. If the Mad Hatter existed in real life he would be arrested outside a 7-eleven. America is an illusion. A looking glass. We see only what we want to."
