UAF Facilities Services

Job Hazard Analysis Manual

Published by the Facilities Services Occupational Safety Office
CERTIFICATION OF HAZARD ASSESSMENTS

This manual contains hazard assessments for routine tasks and the use of general and specific tools and equipment for all employees of the University of Alaska Fairbanks, Facilities Services. The hazard assessments contained in this manual were initially performed by the FS Safety Officer in May 2004 and have been amended as required due to changes in equipment and methods of performing maintenance tasks throughout the UAF campus and all remote sites and campus’.
## Task Hazard Cause Prevention

### General Use

</table>

### PPE REQUIRED:

- Safety Shoes/Boots
- Safety glasses/goggles
- Face Shield (optional)
- Disposable Respirators (optional)
- Hearing Protection

### Equipment Procedures/Requirements:

1. Operate equipment in strict accordance with manufacturer’s instructions and in accordance with OSHA 29 CFR 1910.212 and 1910.213.
2. A mechanical or electrical power control shall be provided to make it possible for the operator to cut off power without leaving his position at the point of operation.
3. All belts, pulleys, gears, shafts shall be guarded in accordance with specific requirements of OSHA 29 CFR 1910.219.
4. Machines designed for a fixed location shall be securely anchored to prevent walking or moving.
5. One or more methods of machine guarding shall be provided to protect the operator and other employees in the area from hazards such as those created by point of operation, ingoing nip points, rotating parts, flying chips and sparks.
6. All portions of the blade shall be enclosed or guarded, except for the working portion of the blade between the bottom of the guide and the table.
7. Report any observed defect or safety hazard to your supervisor immediately.
8. Where any object handled would possibly cause injury to feet if dropped, safety shoes will be worn.
9. Where any object handled could possibly cause cuts, punctures or abrasions to hands, appropriate gloves will be worn. (Exception: where rotating machinery presents a greater hazard of entangling gloves, they are optional at the supervisor’s discretion).
10. Keep hands, hair and loose clothing clear of all moving parts.

</tr>
</tbody>
</table>

**PPE REQUIRED:**

- Goggles/Safety Glasses with side shield
- Hearing Protection
- Gloves

**EQUIPMENT PROCEDURES/REQUIREMENTS:**

1. Operate equipment in strict accordance with Manufacturer’s instructions.
2. Only authorized users can operate equipment.
3. Hearing Protection must be worn upon entering compressor area.
4. Report any observed defect or safety hazard to your supervisor immediately.
5. Never use compressed air to clean your body or clothes.
6. If using compressed air to blow debris, use only approved nozzle (30 psi maximum cutoff) and effective chip guarding/PPE will be used.
7. Where any object handled would possibly cause injury to feet if dropped, safety shoes will be worn.
8. Where any object handled could possibly cause cuts, punctures or abrasions to hands, appropriate gloves will be worn. (Exception: where rotating machinery presents a greater hazard of entangling gloves, they are optional at the supervisor’s discretion).
9. Keep hands, hair and loose clothing clear of all moving parts.
### Air Compressor, Portable, Electric

#### TASK | HAZARD | CAUSE | PREVENTION
--- | --- | --- | ---
Routine Maintenance/Repair | Electric Shock | Improper operation and maintenance | Unplug electrical cord and retain control of plug during repair/maintenance
Routine Operation | Noise | Equipment operation | Use hearing protection
 | Trauma | Improper use, uncontrolled release of compressed air | Use appropriate nozzle for specific work activity, situational awareness
 | Eye Injury | Projectiles, flying debris | Goggles or safety glasses with side shields

**PPE REQUIRED:**

- Goggles or Safety glasses with side shield
- Hearing Protection

**EQUIPMENT PROCEDURES/REQUIREMENTS:**

1. Operate equipment in strict accordance with Manufacturer’s instructions.
2. Only authorized users can operate equipment.
3. Hearing Protection must be worn when using compressor.
4. When used for cleaning purposes, air pressure must be adjusted to less than 30 psi, and effective chip guarding and PPE must be used.
5. Report any observed defect or safety hazard to your supervisor immediately.
6. Never use compressed air to clean your body or clothing.
7. Where any object handled would possibly cause injury to feet if dropped, safety shoes will be worn.
8. Where any object handled could possibly cause cuts, punctures or abrasions to hands, appropriate gloves will be worn. (Exception: where rotating machinery presents a greater hazard of entangling gloves, they are optional at the supervisor’s discretion).
9. Keep hands, hair and loose clothing clear of all moving parts.

### PPE REQUIRED:

- Eye Safety Shield/Helmet with Filter Lens
- Protective Clothing*
  *Full sleeves, no front pockets, no cuffs, shirt left outside of trousers, made of clean fire-resistant materials
- Fire Resistant Gauntlet Gloves
- Safety Shoes/Boots
- Disposable respirator (optional)
- Goggles/Safety Glasses

### EQUIPMENT PROCEDURES/REQUIREMENTS:

1. Before cutting or welding is permitted the area shall be inspected by an individual responsible for authorizing cutting and welding operations.
2. Operate equipment in strict accordance with Manufacturer’s instructions.
3. Employee’s assigned to operate equipment will be familiar with the OSHA requirements outlined in 29 CFR 1910.252 and 1910.254.
4. Only authorized users may operate equipment.
5. Connections and machine grounding shall be checked prior to use.
6. Report any observed defect or safety hazard to your supervisor immediately.
7. Where any object handled would possibly cause injury to feet if dropped, safety shoes will be worn.
8. Where any object handled could possibly cause cuts, punctures or abrasions to hands, appropriate gloves will be worn. (Exception: where rotating machinery presents a greater hazard of entangling gloves, they are optional at the supervisor’s discretion).
9. Keep hands, hair and loose clothing clear of all moving parts.

PPE REQUIRED:

Helmet
Safety glasses, goggles or helmet face shield
Gloves
Hearing Protection
Safety Shoes/boots
Protective clothing (optional)

EQUIPMENT PROCEDURES/REQUIREMENTS:

1. Operate equipment in strict accordance with Manufacturer’s instructions.
2. Only authorized users can operate or perform routine maintenance and repairs on equipment.
3. All controls shall be in neutral position with the motor stopped and brakes set, unless work being performed requires otherwise.
4. Whenever equipment is parked, the parking brake shall be set.
5. All authorized personnel shall have received training in the safe operation of equipment.
6. Report any observed defect or safety hazard to your supervisor immediately.

ADDITIONAL PRECAUTIONS FOR FUEL POWERED ENGINES:

- Always operate in an open well-ventilated area or vent the engine exhaust directly outdoors.
- Never fuel the engine while running or in the presence of an open flame.
- Wipe spilled fuel immediately and wait for fumes to disperse before starting the engine.
- Never remove the radiator pressure cap from liquid cooled engines while they are hot to prevent scalding.
- Stop the engine before performing any maintenance or troubleshooting. The ignition system should be disabled to prevent accidental start of the engine.
- Keep all guards and shields in place.
- Keep hands, hair and clothing away from moving parts.

</tbody>
</table>

#### PPE REQUIRED:

- Protective Clothing (optional)
- Goggles/Safety Glasses w/side shield
- Face Shield
- Safety Shoes/Boots
- Disposable Respirators (optional)
- Gloves

#### EQUIPMENT PROCEDURES/REQUIREMENTS:

1. Operate equipment in strict accordance with Manufacturer’s instructions and in accordance with OSHA 29 CFR 1910.215.
2. Only authorized users can operate equipment.
3. Properly adjust guards in accordance with OSHA 1910.215 (adjust work rest to within 1/8” of the wheel; adjust tongue guard to within ¼” of the wheel; adjust tongue guard such that angular exposure has not exceeded 90° and exposure begins at a point not more than 65° above the horizontal plane of the wheel spindle).
4. Abrasive wheels shall be used only machines provided with safety guards as defined in 29 CFR 1910.215.
5. Immediately before mounting, wheels shall be inspected and sounded by the user (Ring Test) to make sure they have not been damaged in transit, storage or otherwise, in accordance with OSHA 29 CFR 1910.215. Ring Test procedures are attached.
6. Report any observed defect or safety hazard to your supervisor immediately.
7. Where any object handled would possibly cause injury to feet if dropped, safety shoes will be worn.
8. Where any object handled could possibly cause cuts, punctures or abrasions to hands, appropriate gloves will be worn. (Exception: where rotating machinery presents a greater hazard of entangling gloves, they are optional at the supervisor’s discretion).
9. Keep hands, hair and loose clothing clear of all moving parts.
Ring Test

To sound wheels using the Ring Test, tap the wheels gently using with a light nonmetallic implement, such as the handle of a screwdriver for a light wheel, or a wooden mallet for heavier wheels. The wheels should be tapped about 45 degrees each side of the vertical centerline and about 1 or 2 inches from the periphery. Then rotate the wheel 45 degrees and repeat the test (see figures below). An undamaged wheel will give you a clear metallic tone. A cracked wheel will have a dead sound and not a clear ring. If the wheels sound cracked (dead) when tapped, they shall not be used. Ensure you document the ring test and its results for future reference.

Safety Glasses/Goggles/Face Shield  
Hearing Protection  
Protective Clothing (long pants, gloves, close fitting clothing)  
Safety Shoes

**EQUIPMENT PROCEDURES/REQUIREMENTS:**

1. Operate equipment in strict accordance with Manufacturer’s instructions.  
2. Only authorized users can operate equipment.  
3. Report any observed defect or safety hazard to your supervisor immediately.  
4. Where any object handled would possibly cause injury to feet if dropped, safety shoes will be worn.  
5. Where any object handled could possibly cause cuts, punctures or abrasions to hands, appropriate gloves will be worn. (Exception: where rotating machinery presents a greater hazard of entangling gloves, they are optional at the supervisor’s discretion).  
6. Keep hands, hair and loose clothing clear of all moving parts and air intakes.  
7. Stop the unit immediately if it suddenly begins to vibrate or shake.  
8. Always turn off the engine before setting the unit down.  
9. Never insert any foreign object into the air intake or outlet openings.  
10. Operate the blower only when there is adequate clearance from people, buildings, vehicles or other obstructions.

**ADDITIONAL PRECAUTIONS FOR FUEL POWERED ENGINES:**

1. Always operate in an open, well-ventilated area.  
2. Never fuel the engine while running, hot, or in the presence of an open flame.  
3. Wipe up spilled fuel immediately and wait for fumes to disperse before starting the engine.  
4. Ensure gas/oil mixture is in correct proportions.  
5. Never remove the radiator pressure cap from liquid cooled engines while they are hot to prevent scalding.  
6. Stop the engine before performing any maintenance or troubleshooting. The ignition system should be disabled to prevent accidental start of the engine.  
7. Keep all guards and shields in place.  
8. Keep hands, hair and clothing away from moving parts and air intakes.

**PPE REQUIRED:**

- Safety Glasses
- Face Shield
- Protective Clothing (optional)
- Hearing Protection

**EQUIPMENT PROCEDURES/REQUIREMENTS:**

1. Operate equipment in strict accordance with Manufacturer’s instructions.
2. Only authorized users can operate equipment.
3. Report any observed defect or safety hazard to your supervisor immediately.
4. Maintain tractor and equipment in safe operating condition, including original safety-related features and any retrofits designed and recommended by the equipment manufacturer.
5. Only operate tractor with ROPS (roll over protection structure) in place.
6. Where any object handled would possibly cause injury to feet if dropped, safety shoes will be worn.
7. Where any object handled could possibly cause cuts, punctures or abrasions to hands, appropriate gloves will be worn. (Exception: where rotating machinery presents a greater hazard of entangling gloves, they are optional at the supervisor’s discretion).
8. Keep hands, hair and loose clothing clear of all moving parts.

**ADDITIONAL PRECAUTIONS FOR FUEL POWERED ENGINES:**

1. Always operate in an open well-ventilated area or vent the engine exhaust directly outdoors.
2. Never fuel the engine while running or in the presence of an open flame.
3. Wipe spilled fuel immediately and wait for fumes to disperse before starting the engine.
4. Never remove the radiator pressure cap from liquid cooled engines while they are hot to prevent scalding.
5. Stop the engine before performing any maintenance or troubleshooting. The ignition system should be disabled to prevent accidental start of the engine.
6. Keep all guards and shields in place.
7. Keep hands, hair and clothing away from moving parts.
8. Inspect areas in which mobile equipment is to be operated prior to performing the work to identify and control actual and potential hazards.
9. Ensure that other workers maintain a safe distance from area while mower equipment is in operation.
10. Always use seat belts provided with tractor.

### PPE REQUIRED:

- Goggles
- Gloves
- Safety Shoes
- Protective Clothing (long pants)
- Respirator or dust mask (as needed)

### EQUIPMENT PROCEDURES/REQUIREMENTS:

1. For chemical contact, see JHA for chemicals.
2. Ensure buffer cord is not damaged and has an intact plug ground pin.
4. Use caution on wet surfaces.
5. Do not let go of buffer until it comes to a complete stop to avoid injury.
6. Do not use a device to hold the safety lever in the on position (stops when you let go).
7. Use 2 people to lift the buffer.
8. Wear long pants to avoid chemicals splashing on bare legs.
9. Take occasional breaks to avoid repetitive motion injury from vibration.
10. Operate equipment in strict accordance with Manufacturer’s instructions.
11. Only authorized users can operate equipment.
12. Report any observed defect or safety hazard to your supervisor immediately.
13. Where any object handled would possibly cause injury to feet if dropped, safety shoes will be worn.
14. Where any object handled could possibly cause cuts, punctures or abrasions to hands, appropriate gloves will be worn. (Exception: where rotating machinery presents a greater hazard of entangling gloves, they are optional at the supervisor’s discretion).
15. Keep hands, hair and loose clothing clear of all moving parts.

- Goggles/Safety Glasses w/side shield
- Face Shield/screen
- Hearing Protection
- Gloves (leather)
- Disposable respirator (optional)
- Safety Shoes/boots (cut resistant)
- Hardhat

EQUIPMENT PROCEDURES/REQUIREMENTS:
1. Operate equipment in strict accordance with Manufacturer’s instructions and in accordance with OSHA 29 CFR 1910.212 and 1910.213.
2. Only authorized users can operate equipment.
3. One or more methods of machine guarding shall be provided to protect the operator and others in the area from hazards such as those created by point of operation, ingoing nip points, rotating parts, flying chips and sparks.
4. Report any observed defect or safety hazard to your supervisor immediately.
5. Keep all guards and shields in place.
6. Keep hands, hair and clothing away from moving parts.
7. User must have had OSHA approved training prior to operating any chain saw.

ADDITIONAL PRECAUTIONS FOR FUEL POWERED ENGINES:
1. Always operate in an open well-ventilated area or vent the engine exhaust directly outdoors.
2. Never fuel the engine while running or in the presence of an open flame.
3. Wipe spilled fuel immediately and wait for fumes to disperse before starting the engine.
4. Never remove the radiator pressure cap from liquid cooled engines while they are hot to prevent scalding.
5. Stop the engine before performing any maintenance or troubleshooting.
6. The ignition system should be disabled to prevent accidental start of the engine.

**PPE REQUIRED:**

- Goggles
- Gloves
- Protective Clothing (apron)
- Respirator (as needed)
- Face shield (if necessary)

**EQUIPMENT PROCEDURES/REQUIREMENTS:**

1. Read and understand Material Safety Data Sheet on chemical(s) being handled.
2. Know where the nearest emergency eye wash/shower is located and the path is clear.
3. Contact EH&S Industrial Hygienist for proper respirator and filter required for chemical.
4. For caustics/acids/reactive chemicals, use face shield in addition to goggles.
5. Mark all secondary chemical vessels with contents in permanent marker when filled.
6. Use a funnel for pouring into a vessel with a small diameter opening to prevent spill/splash.
7. Do not allow chemicals to enter a drain unless approved by HAZMAT.
8. Do not allow chemicals to enter the environment (ground, watershed, etc).
9. Do not mix incompatible chemicals as injury, illness or death may result.
10. Transfer chemicals only in a well ventilated area.
11. Never leave containers open unless pouring or receiving chemicals during transfer.
12. Wash hands thoroughly after handling chemicals and before smoking, eating or drinking.
13. Report any observed defect or safety hazard to your supervisor immediately.
14. Where any object handled would possibly cause injury to feet if dropped, safety shoes will be worn.
15. Where any object handled could possibly cause cuts, punctures or abrasions to hands, appropriate gloves will be worn. (Exception: where rotating machinery presents a greater hazard of entangling gloves, they are optional at the supervisor’s discretion).
Hazard Analysis                                                      Cleaning (Body Fluid Clean-Up)

**PPE REQUIRED:**

- Goggles
- Face shield
- Safety Shoes/boots (if necessary)
- Gloves (chemical/biological resistant)
- Protective Clothing (Apron)
- Respirator or dust mask (as needed)

**EQUIPMENT PROCEDURES/REQUIREMENTS:**

1. Use Blood Borne Pathogen (BBP) procedures to clean up body fluids.
2. Contact HAZMAT and/or Industrial Hygienist if you have any questions on clean-up or disposal.
3. If in doubt about substance, use BBP procedures.
4. Wash hands thoroughly after task and before eating, drinking or smoking.
5. Operate equipment in strict accordance with Manufacturer’s instructions.
6. Only authorized and trained employees may handle BBP materials.
7. Report any observed defect or safety hazard to your supervisor immediately.
8. Where any object handled would possibly cause injury to feet if dropped, safety shoes will be worn.
9. Where any object handled could possibly cause cuts, punctures or abrasions to hands, appropriate gloves will be worn. (Exception: where rotating machinery presents a greater hazard of entangling gloves, they are optional at the supervisor’s discretion).
10. Keep hands, hair and loose clothing clear of all moving parts.

### PPE REQUIRED:

- **Protective Clothing**: Safety Shoes/Boots
- **Safety Glasses**: Hard Hat
- **Gloves**: Hearing Protection

### EQUIPMENT PROCEDURES/REQUIREMENTS:

1. Operate equipment in strict accordance with Manufacturer’s instructions.
2. All controls shall be in a neutral position with the motors stopped and brakes set, unless work being performed requires otherwise.
3. Whenever equipment is parked, the parking brake shall be set.
4. All authorized personnel shall have training in the safe operation of equipment.
5. Only authorized users can operate or perform routine maintenance and repairs on equipment.
6. Report any observed defect or safety hazard to your supervisor immediately.
7. Where any object handled would possibly cause injury to feet if dropped, safety shoes will be worn. (Exception: where rotating machinery presents a greater hazard of entangling gloves, they are optional at the supervisor’s discretion).
8. Where any object handled could possibly cause cuts, punctures or abrasions to hands, appropriate gloves will be worn.
9. Keep hands, hair and loose clothing clear of all moving parts.

### ADDITIONAL PRECAUTIONS FOR FUEL POWERED ENGINES:

1. Always operate in an open well-ventilated area or vent the engine exhaust directly outdoors.
2. Never fuel the engine while running or in the presence of an open flame.
3. Wipe spilled fuel immediately and wait for fumes to disperse before starting the engine.
4. Never remove the radiator pressure cap from liquid cooled engines while they are hot to prevent scalding.
5. Stop the engine before performing any maintenance or troubleshooting. The ignition system should be disabled to prevent accidental start of the engine.
6. Keep all guards and shields in place.
7. Keep hands, hair and clothing away from moving parts.

<td>Overloading jack beyond rated capacity, using jack for support rather than just lifting</td>
<td>Follow manufacturer’s instructions. Ensure that rated load is legibly and permanently marked in a prominent location on jack, and rated capacity is not exceeded. Immediately support load once it is lifted.</td>
</tr>
</tbody>
</table>

**PPE REQUIRED:**

Safety Shoes/Boots

**EQUIPMENT PROCEDURES/REQUIREMENTS:**

1. Operate equipment in strict accordance with Manufacturer’s instructions.
2. Only authorized users can operate equipment.
3. **DO NOT** use jacks for supporting loads (vehicles). Jack is designed for lifting only. Immediately after jacking, support load (vehicle) with car/truck stands.
4. **DO NOT** overload jack beyond its rated capacity.
5. In the absence of a firm foundation, the base of the jack shall be blocked. If there is the possibility of slippage of the cap, a block shall be placed between the cap and the load.
6. The operator shall watch the stop indicator, which shall be kept clean, to determine the limit of travel. The indicated limit shall not be overrun.
7. After the load has been raised, it must be blocked, cribbed, or otherwise secured at once.
8. Hydraulic jacks exposed to freezing temperatures shall be supplied with an adequate antifreeze liquid.
9. Jacks shall be properly lubricated at regular intervals.
10. Jacks shall be thoroughly inspected depending on service conditions, but less than:
    - every 6 months for jacks used constantly or intermittently at one locality;
    - when sent out and returned for jacks taken out of the shop for special work; and,
    - immediately before and after use for jacks subjected to an abnormal load or shock.
11. Repair or replacement parts shall be examined for possible defects.
12. Jacks that are out of order shall be tagged accordingly, and shall not be used until repairs are made.
13. Report any observed defect or safety hazard to your supervisor immediately.
14. Where any object handled would possibly cause injury to feet if dropped, safety shoes will be worn.
15. Where any object handled could possibly cause cuts, punctures or abrasions to hands, appropriate gloves will be worn. (Exception: where rotating machinery presents a greater hazard of entangling gloves, they are optional at the supervisor’s discretion).
16. Keep hands, hair and loose clothing clear of all moving parts.

PPE REQUIRED:

Safety goggles
Safety Shoes/boots
Hearing Protection
Gloves

EQUIPMENT PROCEDURES/REQUIREMENTS:

1. Use spotters when visibility is restricted.
2. Use caution when mounting/exiting forklift to avoid falls and actuating controls.
3. Do not overload rated capacities and operating limits of forklift.
4. Ensure load is stable and secure prior to lifting/movement.
5. Operate equipment in strict accordance with Manufacturer’s instructions.
6. Only authorized users can operate equipment.
7. Report any observed defect or safety hazard to your supervisor immediately.
8. Where any object handled would possibly cause injury to feet if dropped, safety shoes will be worn.
9. Where any object handled could possibly cause cuts, punctures or abrasions to hands, appropriate gloves will be worn. (Exception: where rotating machinery presents a greater hazard of entangling gloves, they are optional at the supervisor’s discretion).
10. Keep hands, hair and loose clothing clear of all moving parts.

ADDITIONAL PRECAUTIONS FOR FUEL POWERED ENGINES:

1. Always operate in an open well-ventilated area or vent the engine exhaust directly outdoors.
2. Never fuel the engine while running or in the presence of an open flame.
3. Wipe up spilled fuel immediately and wait for fumes to disperse before starting the engine.
4. Never remove the radiator pressure cap from liquid cooled engines while they are hot to prevent scalding.
5. Stop the engine before performing any maintenance or troubleshooting. The ignition system should be disabled to prevent accidental start of the engine.
6. Keep all guards and shields in place.

Safety Shoes/Boots

EQUIPMENT PROCEDURES/REQUIREMENTS:

1. Operate equipment in strict accordance with Manufacturer’s instructions and in accordance with OSHA 29 CFR 1910.243(d).
2. Only authorized users can operate equipment.
3. Follow manufacturer’s operating instructions.
4. Before using, the operator must inspect the tool to make sure that it is clean, that all moving parts operate freely, and that the barrel is free from obstructions.
5. Never assume tool is empty.
6. Never point tool at anyone.
7. Never carry tool with your finger on or depressing the trigger.
8. Never operate a tool that is malfunctioning. If tool develops a defect during use, immediately cease to use it until it has been properly repaired.
9. Do not load tool unless being prepared for immediate use.
10. No not leave loaded tool unattended.
11. Never leave tool in a place where it would be available to unauthorized users.
12. Never disable or remove the work-contacting element.
13. Do not load fasteners with trigger.
14. Never attempt to clear jams before removing the fuel cylinder.
15. Keep the tool clean.
16. Keep your hands away from the area being fastened.
17. Fasteners shall not be driven into very hard or brittle materials.
18. Driving into materials easily penetrated shall be avoided unless materials are backed by a substance that would prevent the fastener from passing completely through and creating a flying missile hazard.
19. Never puncture, incinerate, crush or refill fuel cells. Do not store fuel cells above 120°F.
20. Always remove fuel, battery cell, & fasteners before storage.
21. Report any observed defect or safety hazard to your supervisor immediately.
22. Where any object handled would possibly cause injury to feet if dropped, safety shoes will be worn.
23. Where any object handled could possibly cause cuts, punctures or abrasions to hands, appropriate gloves will be worn. (Exception: where rotating machinery presents a greater hazard of entangling gloves, they are optional at the supervisor’s discretion).
24. Keep hands, hair and loose clothing clear of all moving parts.

**EQUIPMENT PROCEDURES/REQUIREMENTS:**

1. Operate equipment in strict accordance with Manufacturer’s instructions.
2. Only authorized users can operate equipment.
3. A tool retainer shall be installed on each piece of utilization equipment, which, without such retainer, may eject tool.
4. Hose and hose connections used for conducting compressed air to utilization equipment must be designed for the pressure and service to which they are subjected.
5. Hearing protection must be worn upon when operating pneumatic tools.
6. Report any observed defect or safety hazard to your supervisor immediately.
7. Where any object handled would possibly cause injury to feet if dropped, safety shoes will be worn.
8. Where any object handled could possibly cause cuts, punctures or abrasions to hands, appropriate gloves will be worn. At a minimum, use of anti-vibration gloves will be worn for use of impact tools. (Exception: where rotating machinery presents a greater hazard of entangling gloves, they are optional at the supervisor’s discretion).
9. Keep hands, hair and loose clothing clear of all moving parts.

<td>Foot Injury</td>
<td>Dropped object on foot</td>
<td>Wear safety shoes/boots</td>
</tr>
</tbody>
</table>

PPE REQUIRED:

Safety Shoes/boots
Gloves
Back brace/belt (optional)

EQUIPMENT PROCEDURES/REQUIREMENTS:

1. Use two people to move/lift heavy/awkward objects
2. Take occasional breaks to avoid repetitive motion injury.
3. Use proper lifting techniques.
4. Use mechanical means to lift/transport objects if available.
5. Operate equipment in strict accordance with Manufacturer’s instructions.
6. Only authorized users can operate equipment.
7. Report any observed defect or safety hazard to your supervisor immediately.
8. Where any object handled would possibly cause injury to feet if dropped, safety shoes will be worn.
9. Where any object handled could possibly cause cuts, punctures or abrasions to hands, appropriate gloves will be worn. (Exception: where rotating machinery presents a greater hazard of entangling gloves, they are optional at the supervisor’s discretion).
10. Keep hands, hair and loose clothing clear of all moving parts.

</tbody>
</table>

### PPE Required:

- Safety Shoes/boots
- Fall Protection (restraint)
- Gloves

### Equipment Procedures/Requirements:

1. Inspect fall protection/restraint equipment for proper operation and fit prior to use.
2. Don fall protection/restraint equipment PRIOR to entering danger area or removing edge protection.
3. Only 1 person allowed in danger area at a time.
4. Ensure personnel below hazard area are clear of any falling object hazard.
5. Maintain visual contact with lift truck operator at all times when moving cargo.
6. Operate equipment in strict accordance with Manufacturer’s instructions.
7. Only authorized users can operate equipment.
8. Report any observed defect or safety hazard to your supervisor immediately.
9. Where any object handled would possibly cause injury to feet if dropped, safety shoes will be worn.
10. Where any object handled could possibly cause cuts, punctures or abrasions to hands, appropriate gloves will be worn. (Exception: where rotating machinery presents a greater hazard of entangling gloves, they are optional at the supervisor’s discretion).
11. Keep hands, hair and loose clothing clear of all moving parts.

### PPE REQUIRED:

- Safety Shoes/Boots
- Goggles/Safety Glasses w/side shield
- Face Shield (as necessary)
- Disposable Respirators

### EQUIPMENT PROCEDURES/REQUIREMENTS:

1. Operate equipment in strict accordance with Manufacturer’s instructions and in accordance with OSHA 29 CFR 1910.212 and 1910.213.
2. Only authorized users can operate equipment.
3. A mechanical or electrical power control shall provided to make it possible for the operator to cut off power without leaving his position at the point of operation.
4. All belts, pulleys, gears, shafts shall be guarded in accordance with the specific requirements of OSHA 29 CFR 1910.219.
5. Machines designed for a fixed location shall be securely anchored to prevent walking or moving.
6. One or more methods of machine guarding shall be provided to protect the operator and other employees in the area from hazards such as those created by point of operation, ingoing nip points, rotating parts, flying chips and sparks.
7. All portions of the saw blade shall be enclosed or guarded, except for the working portion of the blade.
8. Report any observed defect or safety hazard to your supervisor immediately.
9. Where any object handled would possibly cause injury to feet if dropped, safety shoes will be worn.
10. Where any object handled could possibly cause cuts, punctures or abrasions to hands, appropriate gloves will be worn. (Exception: where rotating machinery presents a greater hazard of entangling gloves, they are optional at the supervisor’s discretion).
11. Keep hands, hair and loose clothing clear of all moving parts.

</table>

### PPE REQUIRED:

- Safety Glasses w/side shields or Goggles
- Safety Shoes/boots
- Hearing Protection
- Gloves, Anti-Vibration
- Protective Clothing (long pants)
- Respirator or dust mask (as needed)
- Back brace/belt (optional)

### EQUIPMENT PROCEDURES/REQUIREMENTS:

1. Use two people to move/lift compactor.
2. Take occasional breaks to avoid repetitive motion injury from vibration.
3. Operate equipment in strict accordance with Manufacturer’s instructions.
4. Only authorized users can operate equipment.
5. Report any observed defect or safety hazard to your supervisor immediately.
6. Where any object handled would possibly cause injury to feet if dropped, safety shoes will be worn.
7. Where any object handled could possibly cause cuts, punctures or abrasions to hands, appropriate gloves will be worn. At a minimum, anti-vibration gloves will be worn for use of impact tools. (Exception: where rotating machinery presents a greater hazard of entangling gloves, they are optional at the supervisor’s discretion).
8. Keep hands, hair and loose clothing clear of all moving parts.

### ADDITIONAL PRECAUTIONS FOR FUEL POWERED ENGINES:

1. Always operate in an open well-ventilated area or vent the engine exhaust directly outdoors.
2. Never fuel the engine while running or in the presence of an open flame.
3. Wipe up spilled fuel immediately and wait for fumes to disperse before starting the engine.
4. Never remove the radiator pressure cap from liquid cooled engines while they are hot to prevent scalding.
5. Stop the engine before performing any maintenance or troubleshooting. The ignition system should be disabled to prevent accidental start of the engine.
6. Keep all guards and shields in place.

<td>Hand Injury</td>
<td>Point of Operation</td>
<td>Situational awareness</td>
</tr>
</tbody>
</table>

PPE REQUIRED:

Safety Glasses with side shields
Hearing Protection
Safety Shoes/ Boots

EQUIPMENT PROCEDURES/REQUIREMENTS:

1. Operate equipment in strict accordance with Manufacturer’s instructions.
2. Only authorized users can operate equipment.
3. A tool retainer shall be installed in each piece of utilization equipment, which, without such retainer, may eject tool.
4. Hose and hose connections used for conducting compressed air to utilization equipment must be designed for the pressure and service to which they are subjected.
5. Hearing Protection must be worn upon when operating pneumatic tools.
6. Always wear eye protection.
7. Do not hold the trigger down unless you are purposefully firing the tool.
8. Never point the tool at anyone.
9. Never assume the tool is empty.
10. Disconnect the air hose before clearing a jam or making adjustments.
11. Do not fire the tool unless the nose is firmly pressed against a work piece.
12. Use only compressed air to power the tool, not bottled gas.
13. Do not exceed the manufacturer’s specified air pressure for the tool, and never exceed 120 psi.
14. Keep your free hand out of the way of the tool.
15. Do not operate tools around flammables.
16. Nail top to bottom when nailing wall sheathing in a vertical position.
17. Nail from eaves to the ridge when nailing roof sheathing so that you do not back off the edge of the roof.
18. Move forward not backwards when nailing in horizontal areas.
19. Secure the hose when working on scaffolding to prevent the weight of the hose from dragging the tool off the scaffold if you set the tool down.
20. Keep people out of the range of fire. Exercise extreme caution when using tool around other worker.
21. Report any observed defect or safety hazard to your supervisor immediately.
22. Where any object handled would possibly cause injury to feet if dropped, safety shoes will be worn.
23. Where any object handled could possibly cause cuts, punctures or abrasions to hands, appropriate gloves will be worn. (Exception: where rotating machinery presents a greater hazard of entangling gloves, they are optional at the supervisor’s discretion).
24. Keep hands, hair and loose clothing clear of all moving parts.

7. Keep hands, hair and clothing away from moving parts.

### Additional Precautions for Fuel Powered Engines:

1. Always operate in an open well-ventilated area or vent the engine exhaust directly outdoors.
2. Never fuel the engine while running or in the presence of open flame.
3. Wipe up spilled fuel immediately and wait for fumes to disperse before starting the engine.
4. Never remove the radiator pressure cap from liquid cooled engines while they are hot to prevent scalding.
5. Stop the engine before performing any maintenance or troubleshooting. The ignition system should be disabled to prevent accidental start of the engine.
6. Keep all guards and shields in place.
7. Keep hands, hair and clothing away from moving parts.
### Pressurized Cooling System Tester

**PPE REQUIRED:**

- Apron
- Gloves
- Goggles
- Face Shield

**EQUIPMENT PROCEDURES/REQUIREMENTS:**

1. Operate equipment in strict accordance with Manufacturer’s instructions.
2. Only authorized users can operate equipment.
3. Report any observed defect or safety hazard to your supervisor immediately.
4. Where any object handled would possibly cause injury to feet if dropped, safety shoes will be worn.
5. Where any object handled could possibly cause cuts, punctures or abrasions to hands, appropriate gloves will be worn. (Exception: where rotating machinery presents a greater hazard of entangling gloves, they are optional at the supervisor’s discretion).
6. Keep hands, hair and loose clothing clear of all moving parts.

### PPE REQUIRED:
- Safety Shield/Helmet with Filter Lens
- Fire resistant gauntlet gloves
- Safety shoes/boots
- Respirator
- Safety glasses w/side shields or Goggles
- Protective Clothing *
  - Full sleeves, no front pockets, no cuffs, Shirt left outside of trousers, made of clean fire-resistant materials

### EQUIPMENT PROCEDURES/REQUIREMENTS:
1. Before cutting or welding is permitted the area shall be inspected by an individual responsible for authorizing cutting and welding operations;
2. Operate equipment in strict accordance with Manufacturer’s instructions.
3. Employee’s assigned to operate equipment will be familiar with OSHA requirements outlined in 29 CFR 1910.252 and 1910.254.
4. Only authorized users can operate equipment.
5. Connections and machine grounding shall be checked prior to use.
6. Report any observed defect or safety hazard to your supervisor immediately.
7. Where any object handled would possibly cause injury to feet if dropped, safety shoes will be worn.
8. Where any object handled could possibly cause cuts, punctures or abrasions to hands, appropriate gloves will be worn. (Exception: where rotating machinery presents a greater hazard of entangling gloves, they are optional at the supervisor’s discretion).
9. Keep hands, hair and loose clothing clear of all moving parts.

### ADDITIONAL PRECAUTIONS FOR FUEL POWERED ENGINES:
1. Always operate in an open well-ventilated area or vent the engine exhaust directly outdoors.
2. Never fuel the engine while running or in the presence of open flame.
3. Wipe up spilled fuel immediately and wait for fumes to disperse before starting the engine.
4. Never remove the radiator pressure cap from liquid cooled engines while they are hot to prevent scalding.
5. Stop the engine before performing any maintenance or troubleshooting. The ignition system should be disabled to prevent accidental start of the engine.
6. Keep all guards and shields in place.
7. Keep hands, hair and clothing away from moving parts.

PPE REQUIRED:

Leather Gloves  
Safety Shoes/Boots

EQUIPMENT PROCEDURES/REQUIREMENTS:

1. Set up mechanical ventilation when used in an enclosed area. When used outdoors, situate portable generator so that exhaust is directed away from the work area.
2. Operate equipment in strict accordance with Manufacturer’s instructions.
3. Only authorized users can operate equipment.
4. Connections and machine grounding shall be checked prior to use.
5. Report any observed defect or safety hazard to your supervisor immediately.
6. Where any object handled would possibly cause injury to feet if dropped, safety shoes will be worn.
7. Where any object handled could possibly cause cuts, punctures or abrasions to hands, appropriate gloves will be worn. (Exception: where rotating machinery presents a greater hazard of entangling gloves, they are optional at the supervisor’s discretion).
8. Keep hands, hair and loose clothing clear of all moving parts.

ADDITIONAL PRECAUTIONS FOR FUEL POWERED ENGINES:

1. Always operate in an open well-ventilated area or vent the engine exhaust directly outdoors.
2. Never fuel the engine while running or in the presence of open flame.
3. Wipe up spilled fuel immediately and wait for fumes to disperse before starting the engine.
4. Never remove the radiator pressure cap from liquid cooled engines while they are hot to prevent scalding.
5. Stop the engine before performing any maintenance or troubleshooting. The ignition system should be disabled to prevent accidental start of the engine.
6. Keep all guards and shields in place.
7. Keep hands, hair and clothing away from moving parts.

**PPE REQUIRED:**

Safety Glasses w/side shields (only when frostbite hazard does not present a greater hazard)
Protective Clothing
Hearing Protection
Safety shoes/boots
Gloves

**EQUIPMENT PROCEDURES/REQUIREMENTS:**

1. Use 2 people to lift snow blower.
2. Take occasional breaks to avoid injury from cold, vibration and repetitive motion.
3. Be aware of discharge direction and distance to avoid injury and damage to property.
4. Wear proper clothing in layers and vent clothing to avoid overheating or cold injury.
5. Do not touch bare metal with bare skin to avoid contact frostbite.
6. Use caution on icy/slippery surfaces, stairs and ramps.
7. Operate equipment in strict accordance with Manufacturer’s instructions.
8. Only authorized users can operate equipment.
9. Report any observed defect or safety hazard to your supervisor immediately.
10. Always stop engine and disconnect spark plug wire before performing maintenance of any kind or placing hands into auger or chute assemblies.
11. Where any object handled would possibly cause injury to feet if dropped, safety shoes will be worn.
12. Where any object handled could possibly cause cuts, punctures or abrasions to hands, appropriate gloves will be worn. (Exception: where rotating machinery presents a greater hazard of entangling gloves, they are optional at the supervisor’s discretion).
13. Keep hands, hair and loose clothing clear of all moving parts.

**ADDITIONAL PRECAUTIONS FOR FUEL POWERED ENGINES:**

1. Always operate in an open well- ventilated area or vent the engine exhaust directly outdoors.
2. Never fuel the engine while running or in the presence of open flame.
3. Wipe up spilled fuel immediately and wait for fumes to disperse before starting the engine.
4. Never remove the radiator pressure cap from liquid cooled engines while they are hot to prevent scalding.
5. Stop the engine before performing any maintenance or troubleshooting. The ignition system should be disabled to prevent accidental start of the engine.
6. Keep all guards and shields in place.
7. Keep hands, hair and clothing away from moving parts.

PPE REQUIRED:

Safety Shoes/boots (when chipping snow/ice with shovel or chipper)
Gloves
Protective Clothing (cold weather)

EQUIPMENT PROCEDURES/REQUIREMENTS:

1. Take occasional breaks to avoid repetitive motion injury.
2. Ensure snow load on shovel is not too heavy or back injury may result.
3. Be aware of frostbite and cold contact hazards to avoid injury.
4. Use proper lifting techniques, avoid twisting and over extending when lifting load.
5. Ensure firm footing during operations.
6. Avoid overheating, dress in layers and properly vent clothing.
7. Use caution on stairs, ramps and icy surfaces.
8. Stretch prior to physical activity to warm up muscles.
9. Report any observed defect or safety hazard to your supervisor immediately.
10. Where any object handled would possibly cause injury to feet if dropped, safety shoes will be worn.
11. Where any object handled could possibly cause cuts, punctures or abrasions to hands, appropriate gloves will be worn. (Exception: where rotating machinery presents a greater hazard of entangling gloves, they are optional at the supervisor’s discretion).

### PPE REQUIRED:

- Protective Clothing
- Safety Shoes/ Boots
- Safety Glasses
- Hard Hat (if necessary)
- Gloves
- Hearing Protection

### EQUIPMENT PROCEDURES/REQUIREMENTS:

1. Operate equipment in strict accordance with Manufacturer’s instructions.
2. Only authorized users can operate equipment.
3. Rollover protective structures must be in accordance with 29 CFR 1926.1001.
4. Attached equipment shall be either fully lowered or blocked when being repaired or when not in use.
5. All controls shall be in a neutral position with the motors stopped and brakes set, unless work being performed requires otherwise.
6. Whenever equipment is parked, the parking brake shall be set.
7. All cab glass shall be safety glass that introduces no visible distortion affecting the safe operation of equipment.
8. All authorized personnel shall have received training in the safe operation of equipment.
9. Report any observed defect or safety hazard to your supervisor immediately.
10. Where any object handled would possibly cause injury to feet if dropped, safety shoes will be worn.
11. Where any object handled could possibly cause cuts, punctures or abrasions to hands, appropriate gloves will be worn. (Exception: where rotating machinery presents a greater hazard of entangling gloves, they are optional at the supervisor’s discretion).
12. Keep hands, hair and loose clothing clear of all moving parts.

### ADDITIONAL PRECAUTIONS FOR FUEL POWERED ENGINES:

1. Always operate in an open, well-ventilated area or vent the engine exhaust directly outdoors.
2. Never fuel the engine while running or in the presence of an open flame.
3. Wipe up spilled fuel immediately and wait for fumes to disperse before starting the engine.
4. Never remove the radiator pressure cap from liquid cooled engines while they are hot to prevent scalding.
5. Stop the engine before performing any maintenance or troubleshooting. The ignition system should be disabled to prevent accidental start of the engine.
6. Keep all guards and shields in place.
7. Keep hands, hair and clothing away from moving parts.

**PPE REQUIRED:**

- Safety Glasses w/side shields or Goggles
- Safety Shoes/boots
- Gloves
- Protective Clothing (long sleeves/pants)
- Face Shield (if needed)

**EQUIPMENT PROCEDURES/REQUIREMENTS:**

1. Identify proper valve and ensure pipe contents and connected systems will not be damaged by activating valve.
2. Remain in contact with other workers to ensure they are prepared when the valve is actuated.
3. **DO NOT** operate valve that has a lock-out/tag-out device installed unless it is yours.
4. If valve is stuck or hard to actuate, obtain assistance.
5. Use proper body mechanics to avoid muscle strains.
6. Verify valve is not leaking after actuating it.
7. Operate all equipment in strict accordance with Manufacturer’s instructions.
8. Only authorized users can operate equipment.
9. Report any observed defect or safety hazard to your supervisor immediately.
10. Where any object handled would possibly cause injury to feet if dropped, safety shoes will be worn.
11. Where any object handled could possibly cause cuts, punctures or abrasions to hands, appropriate gloves will be worn. (Exception: where rotating machinery presents a greater hazard of entangling gloves, they are optional at the supervisor’s discretion).
12. Keep hands, hair and loose clothing clear of all moving parts.

Goggles

**EQUIPMENT PROCEDURES/REQUIREMENTS:**

1. DO NOT USE this lift, or any portion thereof, unless it is firmly seated on its fully engaged safety devices. Always stand clear of lift and associated equipment whenever safety latches are released. Any unusual noise, hydraulic oil leakage or signs of excess wear must be fully examined and the cause determined and corrected before use of the equipment may continue. It is the users responsibility to ensure that the lift and associated equipment is maintained and used in a safe manner and that untrained or unauthorized persons are NOT allowed near the lift.
2. Report any observed defect or safety hazard to your supervisor immediately.
3. Inspect lift prior to use. Never operate if it malfunctions or has broken or damaged parts.
4. Operating controls are designed to close when released. Do NOT block open or override.
5. Never overload your lift. Manufacturer’s rated capacity is shown on nameplate affixed to lift.
6. Positioning of vehicle and operation of lift should only be done by trained and authorized personnel.
7. Never raise vehicle with anyone inside of it. By-standers should not be in lift area during operation.
8. Always keep lift area free of obstructions, grease, oil, trash and other debris.
9. Before driving vehicle over lift, position arms and supports to provide unobstructed clearance. Do not hit or run over lift arms, adapters or axle supports.
10. Load vehicle on lift carefully. Position lift supports to contact vehicle at manufacturers recommended lifting points. Raise lift until supports contact vehicle. Check supports for secure contact with vehicle. Raise lift to desired working height. CAUTION: If you are working on vehicle, lift will be raised high enough for locking device to be engaged.
11. Note that with some vehicles, the removal or installation of components may cause a critical shift in the center of gravity and results in raised vehicle instability. Refer to the vehicle manufacturer service manual for recommended procedures when components are removed.
12. Before lowering lift, be sure tool trays, stands, etc are removed from under vehicle. Release locking devices before attempting to lower lift.
13. Before removing vehicle from lift area, position lift arms and supports to provide for an unobstructed exit. (see item #10).
14. Where any object handled would possibly cause injury to feet if dropped, safety shoes will be worn.
15. Where any object handled could possibly cause cuts, punctures or abrasions to hands, appropriate gloves will be worn. (Exception: where rotating machinery presents a greater hazard of entangling gloves, they are optional at the supervisor’s discretion).
16. Keep hands, hair and loose clothing clear of all moving parts.
