Degrees offered at SNRAS:

- Bachelor of Science in Natural Resources Management
- Forestry Option
- Plant, Animal, & Soil Sciences Option
- Resources Option
- Bachelor of Science in Geography (Environmental Sciences)
- Bachelor of Arts in Geography
- Master of Science in Natural Resources Management
- PhD (Interdisciplinary Studies)

Facilities at SNRAS:

- Agricultural & Forestry Experiment Station
- Fairbanks Experiment Farm
- Georgeson Botanical Garden
- Matanuska Experiment Farm
- Reindeer Research Program
- Bonanza Creek Experimental Forest
- Caribou/Poker Creeks Research Watershed
- Delta Junction Field Research Site
- Palmer Research and Extension Center
- Point MacKenzie Field Research Site

Geography

Kenneth A. Barrick
Associate Professor of Geography
PhD, Southern Illinois Univ. '83. Dr. Barrick's research centers on the nutrient ecology of plants growing in extreme environments, such as alpine treeline and windy coasts, and also works on estimating the nonmarket value of wilderness. He teaches wilderness concepts, physical geography, weather and climate, and quantitative methods. E-mail: fkbab@uaf.edu

Cary W. de Wit
Assistant Professor of Geography
PhD, Univ. of Kansas '97. Dr. de Wit specializes in human geography. Recent research interests include sense of place, perceptual geography, cultural geography, and American culture regions. He teaches regional geography courses on Alaska, North America, the circumpolar North, Europe, and Asia. E-mail: fccwd@uaf.edu

Faculty

School of Natural Resources and Agricultural Sciences

fostering creativity

Elena B. Sparrow
Research Associate Professor of Resources Management
PhD, Colorado State Univ. '73. Research interests include nutrient cycling, climate change effects, and science education. As Global Change Education Coordinator, she directs several science education programs. She teaches science research education. E-mail: ffcel@uaf.edu

Joshua A. Greenberg
Associate Professor of Resource Economics
PhD, Washington State Univ. '90. Research includes bioeconomic modeling, economic issues pertaining to the allocation of Alaska renewable natural resources, and the economics of Alaska’s reindeer industry. He teaches economics and sustainable resource concepts. E-mail: ffjag@uaf.edu

Carol E. Lewis
Dean, SNRAS, and Director, AFES
PhD, Georgetown Univ. '70; MBA, University of Alaska Fairbanks, '76. Dr. Lewis works with controlled environments, resource technologies and marketing, and the economic impacts of resource development in the state. E-mail: ffcl@uaf.edu

Susan Todd
Associate Professor of Regional & Land Use Planning
PhD, Univ. of Michigan '95. Research focuses on conflict resolution, mediation, public land use planning, and the use of web surveys and listservs to poll public opinion. Courses: natural resources conservation and policy, resource planning theory and practice, and readings in natural resources. E-mail: susan.todd@uaf.edu

Carol E. Lewis
Dean, SNRAS, and Director, AFES
PhD, Georgetown Univ. '70; MBA, University of Alaska Fairbanks, '76. Dr. Lewis works with controlled environments, resource technologies and marketing, and the economic impacts of resource development in the state. E-mail: ffcl@uaf.edu
Plant, Animal, and Soil Sciences

G. Allen Mitchell
Associate Dean, SNRAS, and Associate Director, AFES
Professor of Agronomy
PhD, Univ. of California, Riverside '77. Dr. Mitchell's research and extension background is in soil fertility, soil reclamation, and soil-plant-water relationships. E-mail: pfgam@uaa.alaska.edu

Stephen D. Sparrow, Jr.
Professor of Agronomy
PhD, Univ. of Minnesota '81. Research interests are nitrogen cycling in agricultural soils, long-term effects of tillage, and forage management. He teaches soil biology, soil management, and research methods. E-mail: stephen.sparrow@uaf.edu

Patricia S. Holloway
Associate Professor of Horticulture
PhD, Univ. of Minnesota '82. Research includes production methods for native horticultural crops. She teaches courses in plant propagation, greenhouse management, and senior thesis. Dr. Holloway founded and directs the Georgeson Botanical Garden. E-mail: ffph@uaf.edu

Milan Shipka
Associate Professor of Animal Science and Extension Livestock Specialist
PhD, Utah State Univ. '96. Dr. Shipka's research focuses on reproductive physiology and behavior of traditional and alternative ruminant species in the Alaska livestock industry. He teaches animal science. E-mail: ffmps@uaf.edu

Norman R. Harris
Assistant Professor of Range Management
PhD, Oregon State Univ. '91. A range ecologist at the Palmer Research and Extension Center, Dr. Harris examines animal models and animal distribution patterns. He also monitors and quantifies range vegetation using remote sensing. Other interests are stream morphology and the time-change analysis of landscapes. E-mail: pfrh@uaf.edu

Roseann Leiner
Assistant Professor of Horticulture and Horticulture Extension Specialist
PhD, Cornell Univ. '99. Dr. Leiner conducts applied research in support of the commercial vegetable crop and potato industry in Alaska. She teaches classes in plant science. E-mail: pfrml@uaa.alaska.edu

Mingchu Zhang
Assistant Professor of Agronomy
PhD, Univ. of Alberta '93. Research interests include the relationship of soil fertility to plant nutrition and soil environmental chemistry. Recent investigations include the effects of manure and compost on soil quality and crops; heavy metals from municipal composts; phosphorus runoff; and greenhouse gases emission.

Greg L. Finstad
Instructor and Program Manager
Reindeer Research Program
BS, Univ. of Alaska Fairbanks. '81. Greg Finstad's research interests include wildlife ecology, plant-animal interactions, climate-vegetation dynamics, stable isotope chemistry, and reindeer management. He teaches range management and reindeer husbandry. E-mail: ffgr@uaf.edu

Patricia J. Leiner
Forestry Specialist
Forest Science Specialist
PhD, Utah State Univ. '88. Research interests include use of GIS technology for resource inventory and climate change studies; integrating remote sensing and GIS for regional analysis, and support for spatial analysis using GIS. He teaches GIS and analysis, and ARC Macro language programming. E-mail: ffvdl1@uaf.edu

John A. Yarie
Professor of Silviculture
PhD, Univ. of British Columbia '78. Research background in forest nutrient cycling and plant-soil relationships; interests in applying site-specific knowledge to landscape-level problems using modeling and GIS. Courses: forest ecology, theoretical ecology and research methods. He directs the Forest Soils Laboratory. E-mail: ffry@uaf.edu

Scott Rupp
Assistant Professor of Forestry
PhD, Univ. of Alaska Fairbanks '98. Research interests: ecosystem and landscape ecology in subalpine and boreal forests emphasizing secondary succession, regeneration, and disturbance dynamics. He teaches natural resource inventory and measurements. E-mail: scott.rupp@uaf.edu

John D. Fox, Jr., Associate Professor of Land Resources Management
PhD, Univ. of Washington '76. Research includes hydrology, watershed modeling, and landscape-level management. He teaches courses in watershed management, forest management, resource measurements and inventory, simulation and modeling, environmental ethics, and biometeorology. E-mail: ffjdf@uaf.edu

John D. Sparrow, Jr.
Assistant Professor of Forest Soils
PhD, Duke Univ. '90. Research interests: ecosystem ecology, biogeochemistry, and element cycling in natural and disturbed ecosystems. Recent research focused on the role of soils in generating or consuming trace gases, especially methane, that control Earth's climate. He teaches forest soils and nutrient cycling. E-mail: ffjds@uaf.edu

David Valentine
Assistant Professor of Forest Soils
PhD, Univ. of Minnesota '76. Research interests include forest growth and yield, forest productivity, individual tree volume equations, permanent sample plots, silviculture, stocking effects on yield and wood quality, forest health and protection, and the characterization and management of ecosystems. Courses: silvics and dendrology, silviculture, forest health and protection, and ecosystem management. E-mail: ffgrc@uaf.edu

Forest Sciences

Glenn Juday
Associate Prof. of Forest Ecology
PhD, Oregon State Univ. '76. Dr. Juday investigates the relationship of tree growth to long-term climate change, community ecology, and the natural and management controls of biodiversity. He teaches conservation biology and wilderness management. E-mail: ffgr@uaf.edu

Edmond C. Packee
Professor of Forest Management
PhD, Univ. of Minnesota '76. Research interests include forest growth and yield, forest productivity, individual tree volume equations, permanent sample plots, silviculture, stocking effects on yield and wood quality, forest health and protection, and the characterization and management of ecosystems. Courses: silvics and dendrology, silviculture, forest health and protection, and ecosystem management. E-mail: ffgrc@uaf.edu

Research Prof. of Vegetation Ecology
Research Prof. of Vegetation Ecology

Mingchu Zhang
Assistant Professor of Agronomy
PhD, Univ. of Alberta '93. Research interests include the relationship of soil fertility to plant nutrition and soil environmental chemistry. Recent investigations include the effects of manure and compost on soil quality and crops; heavy metals from municipal composts; phosphorus runoff; and greenhouse gases emission.
