COURSE DESCRIPTION:

An integrative survey of Ancient Israel’s geographic and ecological features with respect to how they influenced—and were impacted by—human efforts and energies. In what manners and for what reasons did the peoples of the Bible settle, build, irrigate, farm, hunt, fish, trade, and make war as they did? This course will examine textual sources as well as archaeological materials on behalf of reconstructing and comprehending such cultural ecosystems.

GENERAL DESCRIPTION OF GOALS:

The instructor’s goals for this course are, simply, to foster the student learning outcomes/objectives—namely:

STUDENT LEARNING OUTCOMES / OBJECTIVES:

The diligent student will achieve a solid foundational knowledge and appreciation of how the physical environment played a critical role in influencing the structure and functioning of ancient Levantine societies. The student will learn about how the ancient inhabitants worked to control their surroundings in order to maximize efficiency, improve survival, and increase prosperity. This awareness will permit the student to engage the biblical texts (and related material artifacts) in a richly contextualized and substantive manner.

INSTRUCTIONAL METHODS:

This course will be conducted in a lecture format, featuring presentations and questions by the instructor designed to engage the students in discussions about the materials and topics at hand. Visual media will be incorporated (chiefly PowerPoint, photographs, maps) to provide a more vivid context for reflection and conversation.
