A. CHANGE IN DEGREE REQUIREMENTS: (Brief statement of program/degree changes and objectives)

1. Change name of PhD in Wildlife Management to PhD in Wildlife Biology and Conservation to be consistent with names for BS and MS degree programs.
2. Delete concentration in Wildlife Biology under PhD in Biological Sciences.

B. CURRENT REQUIREMENTS AS IT APPEARS IN THE CATALOG:

Descriptions below are from 2009/2010 catalog because the PhD in Wildlife Biology and Conservation was not listed in the 2010/2011 catalog.

Wildlife Biology and Conservation

College of Natural Science and Mathematics
Department of Biology and Wildlife
907-474-7671
www.bw.uaf.edu

B.S., M.S., Ph.D. Degrees

Minimum Requirements for Degrees: M.S.:30 credits; Ph.D.: 18 thesis credits

The geographic location of the university is particularly advantageous for the study of wildlife biology. Spruce forest, aspen-birch forest, alpine tundra, bogs and several types of aquatic habitats are within easy reach. Studies can be made in many other habitats ranging from the dense forests of southeastern Alaska to arctic tundra.

Adequate study collections of plants and animals are available, and a 2,000-acre study area is near the campus. Wildlife biology students have ample opportunity for close association with the personnel of the Alaska Cooperative Fish and Wildlife Research Unit, Institute of Arctic Biology and several local offices of federal and state conservation agencies. These agencies often provide support for graduate student projects, and program faculty usually hire a number of students for summer field work. Exceptional opportunities are available for students to gain experience and make job connections.
The Department of Biology and Wildlife, the Institute of Arctic Biology, and the Alaska Cooperative Fish and Wildlife Research Unit cooperate in offering graduate work leading to the M.S. and Ph.D. degrees. Detailed information on the graduate program in wildlife biology and management is available from the chair of the wildlife program.

The Alaska Cooperative Fish and Wildlife Research Unit and Institute of Arctic Biology offer a limited number of research assistantships. Teaching assistantships are available in the Department of Biology and Wildlife.

Graduate Program — M.S. Degree

1. Complete the following admission requirement:
   1. Submit scores from both the GRE general test (required) and the GRE subject test in biology (highly recommended).
   2. If English is not your native language, submit scores from both the Test of Spoken English (TSE) and the Test of Written English (TWE), as well as TOEFL scores. Requests, including justification, for exceptions to this requirement should be made to the chair of the department.

2. Complete the general university requirements.

3. Complete the M.S. — with Thesis degree requirements.*

4. As part of the M.S. degree requirements, complete and pass the departmental written and oral master's comprehensive examination.

5. Minimum credits required—30 credits

Graduate Program — Ph.D. Degree

1. Complete the admission process including the following:
   1. Submit scores from both the GRE General Test (required) and the GRE Subject Test in Biology (required for applicants holding only a bachelor's degree; highly recommended for applicants who have already earned a master's degree).
   2. If English is not your native language, submit scores from both the Test of Spoken English (TSE) and the Test of Written English (TWE), as well as TOEFL scores. Requests, including justification, for exceptions to this requirement should be made to the chair of the department.

2. Complete the general university requirements.

3. Complete the Ph.D. degree requirements.

4. As part of the Ph.D. degree requirement, complete the following:
   1. If entering with only a bachelor's degree, complete and pass the departmental written and oral Ph.D. qualifying examination.
   2. Complete and pass a written and oral comprehensive examination by the graduate advisory committee.
3. In this program or in previous post-baccalaureate programs, complete course work at least equivalent to that required for the M.S. degree.

5. Minimum credits required—18 credits

* Students working in subject areas involving significant non-English literature will be expected to read the appropriate foreign language.

See also Biological Sciences for M.S. and Ph.D. program.

**Biological Sciences**

Note: To reduce confusion, I did not include the current catalog description for the graduate program in Biological Sciences because this will be greatly modified in the 2011/2012 catalog following changes that were submitted in 2010.

---

C. PROPOSED REQUIREMENTS AS IT WILL APPEAR IN THE CATALOG WITH THESE CHANGES:

(Underline new wording; strike-through old wording and use complete catalog format)

**Wildlife Biology and Conservation**

College of Natural Science and Mathematics
Department of Biology and Wildlife
907-474-7671
www.bw.uaf.edu

B.S., M.S., Ph.D. Degrees

Minimum Requirements for Degrees: M.S.: 30 credits; Ph.D.: 18 thesis credits

The geographic location of the university is particularly advantageous for the study of wildlife biology with a rich and diverse suite of wildlife populations and habitats ranging from Spruce forest, aspen-birch forest, alpine tundra, bogs and several types of aquatic habitats are within easy reach. Studies can be made in many other habitats from the dense forests of southeastern Alaska, through the extensive boreal forest and wetlands of the interior, to coastal plains and arctic tundra.

Adequate study collections of plants and animals are available, and a 2,000-acre study area is near the campus. Wildlife biology students examine applied questions and frequently collaborate with local management and conservation agencies. These collaborations are often facilitated by the Alaska Cooperative Fish and Wildlife Research Unit and the Institute of Arctic Biology and several local offices of federal and state conservation agencies. Exceptional opportunities are available for students to gain experience and make job connections.

The Department of Biology and Wildlife, the Institute of Arctic Biology, and the Alaska Cooperative Fish and Wildlife Research Unit cooperate in offering graduate work leading to the M.S. and Ph.D. degrees. The Alaska Cooperative Fish and Wildlife Research Unit and Institute of Arctic Biology offer a limited number of research assistantships. Teaching assistantships are available in the Department of Biology and Wildlife. Detailed information
on the graduate program in wildlife biology and management is available from the chair of the Wildlife Biology and Conservation program.

The Alaska Cooperative Fish and Wildlife Research Unit and Institute of Arctic Biology offer a limited number of research assistantships. Teaching assistantships are available in the Department of Biology and Wildlife.

Graduate Program — M.S. Degree

1. Complete the following admission requirement:
   
   1. Submit scores from both the GRE general test (required) and the GRE subject test in biology (highly recommended).
   
   2. If English is not your native language, submit scores from both the Test of Spoken English (TSE) and the Test of Written English (TWE), as well as TOEFL scores. Requests, including justification, for exceptions to this requirement should be made to the chair of the department.

2. Complete the general university requirements.

3. Complete the M.S. — with Thesis degree requirements.*

4. As part of the M.S. degree requirements, complete and pass the departmental written and oral master's comprehensive examination.

5. Minimum credits required—30 credits

Graduate Program — Ph.D. Degree

6. Complete the admission process including the following:

   1. Submit scores from both the GRE General Test (required) and the GRE Subject Test in Biology (required for applicants holding only a bachelor's degree; highly recommended for applicants who have already earned a master's degree).

   2. If English is not your native language, submit scores from both the Test of Spoken English (TSE) and the Test of Written English (TWE), as well as TOEFL scores. Requests, including justification, for exceptions to this requirement should be made to the chair of the department.

7. Complete the general university requirements.

8. Complete the Ph.D. degree requirements.

9. As part of the Ph.D. degree requirement, complete the following:

   1. If entering with only a bachelor's degree, complete and pass the departmental written and oral Ph.D. M.S. qualifying examination.

   2. Complete and pass a written and oral comprehensive examination by the graduate advisory committee.

   3. In this program or in previous post-baccalaureate programs, complete course work at least equivalent to that required for the M.S. degree.
10. Minimum credits required—18 credits

* Students working in subject areas involving significant non-English literature will be expected to read the appropriate foreign language.

See also Biological Sciences for Ph.D. program.
See also Biology for M.S., M.A.T. program.

**Biological Sciences**

The only additional change that is proposed based on this submission is the removal of the concentration in Wildlife Biology under the PhD in Biological Sciences.

**D. ESTIMATED IMPACT**

*WHAT IMPACT, IF ANY, WILL THIS HAVE ON BUDGET, FACILITIES/SPACE, FACULTY, ETC.*

None.

**E. IMPACTS ON PROGRAMS/DEPTS:**

*What programs/departments will be affected by this proposed action? Include information on the Programs/Departments contacted (e.g., email, memo)*

This change will clarify the distinction between graduate degrees in the department of Biology and Wildlife by highlighting the differences between the Biological Sciences program and Wildlife Biology and Conservation program. Specifically, this change emphasizes that Wildlife Biology and Conservation degree has a requirement for application to management or conservation and that career development, through collaboration with potential employers, is often a component of the graduate program.

**F. IF MAJOR CHANGE - ASSESSMENT OF THE PROGRAM:**

*Description of the student learning outcomes assessment process.)*

**JUSTIFICATION FOR ACTION REQUESTED**

The purpose of the department and campus-wide curriculum committees is to scrutinize program/degree change applications to make sure that the quality of UAF education is not lowered as a result of the proposed change. Please address this in your response. This section needs to be self-explanatory. If you drop a course, is it because the material is covered elsewhere? Use as much space as needed to fully justify the proposed change and explain what has been done to ensure that the quality of the program is not compromised as a result.
In 1964 the PhD in Wildlife Management was established at the UAF. The PhD in Biological Sciences was created in 1988. In 1992, Dr. Jim Sedinger who was on the Wildlife Biology faculty at the time, submitted program change paperwork (see attached) to change the name of the PhD in Wildlife Management to Wildlife Biology. Then department head Oswood and dean Reichardt, did not change the name of the Wildlife Management PhD, but they did create a concentration in Wildlife Biology under the PhD in Biological Sciences in an attempt to clarify the distinction in these degree programs. Of importance, through 2 independent searches we found no evidence that the Wildlife Management PhD was deleted. In fact, the most recent PhD in Wildlife Management was awarded in 1997 (my diploma).

In 2010, Dr. Perry Barboza submitted paperwork to change the name of the BS, MS, and PhD degree in Wildlife Biology to Wildlife Biology and Conservation under the assumption that a PhD in Wildlife Biology was in existence. This change occurred for the BS and MS degrees, but was denied for the PhD degree in Wildlife Biology. This ruling came as a surprise to most of us because we were not aware of the 1992 paperwork referenced above. We now understand that there has never been a PhD in Wildlife Biology only a concentration, but again the PhD in Wildlife Management was never deleted. Therefore, we are now requesting a correction, i.e., a name change for the Wildlife Management PhD (not Wildlife Biology PhD) and reactivation of this degree program, which is one of the oldest and still most viable programs on campus. In 2011, the PhD with a concentration in Wildlife Biology had the most graduates (6) of any PhD program on campus. Some of these degrees were awarded as Wildlife Biology and others as Wildlife Biology and Conservation so clearly we still need to clarify the PhD programs in the Department of Biology and Wildlife. Other concentrations (i.e., Biology, Botany, and Zoology) have also been deleted from the Biological Sciences PhD to again clarify the degree programs in the Biology and Wildlife Department. With these changes we will have 2 PhD degrees in the department, one for each program in that department.

MAJOR/MINOR PROGRAM/DEGREE REQUIREMENT CHANGE

Department: Biology and Wildlife
Prepared by: Jim Sedinger
College/School: CNS
Phone: 474-6598

Name of Program: Wildlife Management – M.S./Ph.D. Degree

Degree Level (i.e., Certificate, A.A., A.A.S., B.A., B.S., M.S., Ph.D.)

A CHANGE IN DEGREE REQUIREMENTS: (Brief statement of program/degree changes and objectives)

Change name of wildlife degree from Wildlife Management to Wildlife Biology. Some editorial changes in text are also being made.

CURRENT REQUIREMENTS (AS IT PRESENTLY APPEARS IN THE CATALOG)
(suggestion: paste copy from catalog)

PROPOSED REQUIREMENTS (AS IT WILL APPEAR WITH THESE CHANGES)
(underline changes and use catalog format)

Wildlife Management

The geographic location of the university is particularly advantageous for the study of wildlife management. Spruce forest, aspen-birch forest, alpine tundra, bogs and several types of aquatic habitats are closely situated to the Fairbanks campus. Studies can be made in many other habitats ranging from the dense forest of Southeastern Alaska to the arctic coast.

Study collections of plants and animals are available. There is also a 2,000-acre study area near the campus. Graduate students have ample opportunity for close association with the personnel of the Alaska Cooperative Fishery and Wildlife Research Unit and local offices of federal and state conservation agencies. These agencies often provide support for graduate student projects. Thus, an unusually good opportunity is available for students to gain experience and to make job connections.

The Department of Biology and Wildlife and the Alaska Cooperative Wildlife Research Unit cooperate in offering graduate work leading to the Master of Science and Doctor of Philosophy degrees. Persons desiring detailed information on the graduate program in wildlife biology and management may obtain this from the chair, Wildlife Program. The procedure to be followed in applying for admission to graduate study is outlined in the section on Graduate Admissions.

The Alaska Cooperative Wildlife Research Unit offers a limited number of research assistantships; information on these and the unit's program can be obtained from the leader, Alaska Cooperative Fishery and Wildlife Research Unit at the University of Alaska Fairbanks. Assistantship applications should be sent to the unit leader; such applications are supplementary to the application for admission to graduate study.

Wildlife Management – M.S. Degree

Degree Requirements:

1. Complete the general university requirements and master's degree requirements.
2. Complete a minimum of 30 credits of approved courses, including thesis, in the field of wildlife management. At least 24 credits, including thesis and/or research, must be at the 600 level.
3. Students working in subject areas involving significant non-English literature will be expected to read the appropriate foreign language.

Wildlife Management – Ph.D. Degree

The doctoral degree is awarded for proven ability and scholarly accomplishment. Candidate programs are planned with their doctoral advisory committees. A candidate for the Ph.D. degree in the Wildlife Management program will be expected to have course work at least equivalent to that required for the M.S. degree. See the UAF degree requirements, page 26.

See next page for changes.
B. JUSTIFICATION FOR CHANGE:

The name Wildlife Biology better reflects the research and instructional components of the degree program.

C. OTHER CHANGES, IF ANY, AND JUSTIFICATION:

Chair, College/School Curriculum Council for  Biology
Date 2/20/92

Dean, College/School of  Natural Science
Date 4/4/92

ALL SIGNATURES MUST BE OBTAINED PRIOR TO SUBMISSION TO GOVERNANCE OFFICE.

Chair, Senate Curricular Affairs Committee
Date 12-3-92

5/92
MEMORANDUM

To: Curricular Affairs Committee
   Faculty Senate

From: Paul Reichardt, Dean
       College of Natural Sciences

Date: November 6, 1992

Subject: Biology Graduate Degrees and the Graduate Catalog

Ever since the Department of Biology and Wildlife changed the name of its Ph.D. degree in 1989 confusion has reigned in program listings. The Graduate Catalog is no exception. The following change on page 89 would bring the catalog statement into agreement with the real situation:

REPLACE “Degrees: MS, MAT, and PhD in the Biological Sciences; MS and PhD in Wildlife Management”

WITH “Degrees: MS in Biology, Botany, Wildlife Biology, and Zoology; MAT in Biology; PhD in Biological Sciences with emphases in Biology, Botany, Wildlife Biology, and Zoology”

The list of degrees on page 16 of the Graduate Catalog also needs modification to accurately reflect the degrees which are actually given.

Mark Oswood, Head of Biology/Wildlife, and I agree that these changes are needed and that the new wording suggested here reflects what’s really approved and going on. I have not sent all this through the CNS Curriculum Council because the suggested changes are only those needed to correct the present version of the Graduate Catalog and do not represent any change in practice.

www.uaf.edu/chem/

M.S., Ph.D. Degrees
Minimum Requirements for Degrees: M.S.: 30 credits; Ph.D.: 18 thesis credits

Biochemistry and molecular biology is an interdepartmental program administered by the Department of Chemistry and Biochemistry with research support through the Institute of Arctic Biology. A broad range of biomedical research experiences are available including molecular and cellular neuroscience, proteomics, protein structure-function and molecular toxicology. The arctic environment provides additional research opportunities in environmental biochemistry, adaptations and molecular genetics.

UAF faculty and affiliate faculty at collaborating institutions provide a rich academic environment encompassing both research and comprehensive course offerings. Students with career interests in biotechnology, pharmaceutical sciences, environmental health, genetics and biomedicine are encouraged to apply. Students are normally accepted with financial support (fellowships, research assistantships and/or teaching assistantships) along with tuition waivers.

Graduate Program — M.S. Degree
1. Complete the general university requirements (page 198).
2. Complete the master's degree requirements (page 202).
3. Complete the following three core courses:
   CHEM F654—Protein Structure and Function ......................3
   CHEM F657—Molecular Foundations of Gene Expression ........3
   CHEM F674—Membrane Biochemistry and Biophysics ..........3
5. Minimum credits required ..........................................30

Graduate Program — M.S. Degree with Neuroscience Option
1. Complete the general university requirements (page 198).
2. Complete the master's degree requirements (page 202).
3. Complete the following three core courses:
   CHEM F654—Protein Structure and Function ......................3
   CHEM F657—Molecular Foundations of Gene Expression ........3
   CHEM F674—Membrane Biochemistry and Biophysics ..........3
4. Complete the following neuroscience course:
   BIOL F617—Neurobiology ...........................................3
5. Complete a neuroscience research thesis.
6. Minimum credits required ..........................................30

Graduate Program — Ph.D. Degree
1. Complete the general university requirements (page 198).
2. Complete the Ph.D. degree requirements (page 203).
3. Complete the following three core courses:
   CHEM F654—Protein Structure and Function ......................3
   CHEM F657—Molecular Foundations of Gene Expression ........3
   CHEM F674—Membrane Biochemistry and Biophysics ..........3
4. Complete three electives.
7. Minimum credits required (including core courses) ..........38

BIOLOGICAL SCIENCES
College of Natural Science and Mathematics
Department of Biology and Wildlife
907-474-7671
www.bbw.uaf.edu

M.S., M.A.T., Ph.D. Degrees
Minimum Requirements for Degrees: M.S.: 30 credits; M.A.T.: 36 credits; Ph.D.: 18 thesis credits

UAF biological sciences graduate students have extraordinary opportunities to conduct independent biological research in controlled experiment or field settings, taking advantage of arctic, alpine and boreal environments near campus or at remote locations. The department has close connections with the National Science Foundation taiga Long Term Ecological Research (LTER) site, located about 20 miles from campus. Our students also have access to the tundra LTER site at Toolik Lake, where the UAF Institute of Arctic Biology runs a field station. Facilities available to graduate students on the Fairbanks campus include small mammal colonies, the Large Animal Research Station, both electron and light microscope laboratories, an imaging laboratory and a greenhouse facility. Students and faculty work on systematic collections in the UA Museum of the North using a variety of approaches from traditional morphology to molecular biology.

The program has strong research emphases in arctic plant, physiological, and animal coevolution, insect ecology (terrestrial and aquatic), bird and mammal physiological ecology, vertebrate population dynamics, biology of seabirds, molecular evolution and systematics, pollution ecology, wetland ecology, population genetics, unglaciated biology and wildlife management.

Advanced degree recipients gain significant teaching experience conducting labs, and a few take primary responsibility for instruction in a course at the undergraduate level. Our graduates have pursued careers in education at the university, community college and secondary levels. Many find professional positions with state and federal resource agencies, with whom the department faculty maintain close contact.

The Department of Biology and Wildlife has approximately 100 graduate students. The atmosphere is informal and students and faculty interact frequently, not only in small-enrollment classes, but also on field trips and in community and social settings.

Research assistantships are available on a competitive basis. Teaching assistantships in department courses provide excellent experience. Competitive fellowships are available through the UAF Graduate School. Applicants interested in graduate assistantships should contact the department for assistantship application forms.
Graduate Program — M.S. Degree

1. Complete the admission process including the following:
   a. Submit scores from both the GRE General Test (required) and the GRE Subject Test in Biology (highly recommended).
   b. If English is not your native language, submit scores from both the Test of Spoken English (TSE) and the Test of Written English (TWE), as well as TOEFL scores. Requests, including justification, for exceptions to this requirement should be made to the chair of the department.

2. Complete the general university requirements (page 198).

3. Complete the M.S. — with Thesis degree requirements (page 203).

4. As part of the M.S. degree requirements, complete and pass the departmental written and oral master's comprehensive examination.

5. Minimum credits required ........................................... 30

Graduate Program — M.A.T. Degree

1. Complete the admission process including the following:
   a. Submit scores from both the GRE General Test (required) and the GRE Subject Test in Biology (highly recommended).
   b. If English is not your native language, submit scores from both the Test of Spoken English (TSE) and the Test of Written English (TWE), as well as TOEFL scores. Requests, including justification, for exceptions to this requirement should be made to the chair of the department.

2. Complete the general university requirements (page 198).

3. Complete the M.A.T. degree requirements (page 204).

4. Minimum credits required ........................................... 36
   Note: Persons interested in this degree program should contact the department chair.

Graduate Program — Ph.D. Degree

Concentration: Wildlife Biology and Conservation

1. Complete the admission process including the following:
   a. Submit scores from both the GRE General Test (required) and the GRE Subject Test in Biology (required for applicants holding only a bachelor's degree; highly recommended for applicants who have already earned a master's degree).
   b. If English is not your native language, submit scores from both the Test of Spoken English (TSE) and the Test of Written English (TWE), as well as TOEFL scores. Requests, including justification, for exceptions to this requirement should be made to the chair of the department.

2. Complete the general university requirements (page 198).

3. Complete the Ph.D. degree requirements (page 203).

4. As part of the Ph.D. degree requirement, complete the following:
   a. If entering with only a bachelor's degree, complete and pass the departmental written and oral Ph.D. qualifying examination.
   b. Complete and pass a written and oral comprehensive examination by the graduate advisory committee.
   c. In this program or in previous post-baccalaureate programs, complete course work at least equivalent to that required for the M.S. degree.

5. Minimum credits required ........................................... 18
   See Wildlife Biology and Conservation.

BUSINESS ADMINISTRATION

School of Management
907-474-4622
www.uaf.edu/som/programs/ba/

M.B.A. Degree

Minimum Requirements for Degree: 30 credits

The School of Management offers professional education applicable to the fields of management, finance, human resource management, international business, marketing and travel industry management to individuals interested in entering industry or government.

The program prepares graduates to meet the complex problems of the technical, economic and social environment and to enable them to provide imaginative and responsible leadership to industry and government.

The UAF program recognizes that competence in the practice of management necessitates education with both breadth and depth. The graduate program is accredited by the Association to Advance Collegiate Schools of Business.

Graduate Program — M.B.A. Degree

Concentrations: Capital Markets, General Management

1. Complete the admission process including the following:
   a. Applications will be reviewed on a continuous basis
   b. UAF B.B.A. students may be admitted to the M.B.A. program prior to graduating if they meet one of the following:
      i. Have at least a 'B' in BA F325, BA F343, BA F360, BA F390 and ECON F227
      ii. have senior standing and an overall GPA of 3.25 or have at least a 'B' in BA F325, BA F343, BA F360, BA F390 and ECON F227
      iii. have senior standing, an overall GPA of 3.0 and a minimum GMAT score of 500 (an average GRE score of 500 will also be accepted)
   c. Non-UAF applicants with a bachelor's degree with a business major from an AACSB-accredited institution and a 3.25 GPA will be admitted without taking the GMAT or GRE. Other applicants must submit results from the GMAT or GRE.
   d. Students with a graduate degree from an accredited institution will be admitted without taking the GMAT or GRE.

2. Complete the general university requirements (page 198).

3. Complete the master's degree requirements (page 202).

4. If a student earns grades of two Cs, one D, or one F in courses that are part of his/her M.B.A. program, the student will no longer be in good standing in the M.B.A. program even if his/her cumulative GPA remains at or above 3.0. M.B.A. Students who are not in good standing will be subject to review and may be dismissed by the M.B.A. committee. Students may not use more than two F600-level courses with C grades on their Advancement to Candidacy application. An A or B grade must be earned in F400-level courses.

5. Complete the following foundation courses if previous college work is not in business:
   ACCT F602 — Accounting for Managers .................................. 3
   BA 652 — Fundamentals of Business .................................... 3
   ECON 621 — Fundamentals of Economics ................................. 3
   ECON 628 — Analytical Methods for Economics and Business .............. 3

6. Complete the following advanced M.B.A. core courses after all foundation course requirements (part 5) are completed:
   BA F617 — Organizational Theory for Managers ........................ 3
   BA F643 — Marketing Management ...................................... 3
WILDLIFE BIOLOGY AND CONSERVATION

College of Natural Science and Mathematics
Department of Biology and Wildlife

M.S. Degree
Minimum Requirements for Degree: 30 credits

The geographic location of the university is particularly advantageous for the study of wildlife biology. Spruce forest, aspen-birch forest, alpine tundra, bogs and several types of aquatic habitats are within easy reach. Studies can be made in many other habitats ranging from the dense forests of southeastern Alaska to arctic tundra.

Adequate study collections of plants and animals are available, and a 2,000-acre study area is near the campus. Wildlife biology students have ample opportunity for close association with the personnel of the Alaska Cooperative Fish and Wildlife Research Unit, Institute of Arctic Biology and several local offices of federal and state conservation agencies. These agencies often provide support for graduate student projects, and program faculty usually hire a number of students for summer fieldwork. Exceptional opportunities are available for students to gain experience and make job connections.

The Department of Biology and Wildlife, the Institute of Arctic Biology, and the Alaska Cooperative Fish and Wildlife Research Unit cooperate in offering graduate work leading to the M.S. degree. Detailed information on the graduate program in wildlife biology and management is available from the chair of the wildlife program.

The Alaska Cooperative Fish and Wildlife Research Unit and Institute of Arctic Biology offer a limited number of research assistantships. Teaching assistantships are available in the Department of Biology and Wildlife.

Graduate Program — M.S. Degree

1. Complete the following admission requirement:
   a. Submit scores from both the GRE general test (required) and the GRE subject test in biology.
   b. If English is not your native language, submit scores from both the Test of Spoken English (TSE) and the Test of Written English (TWE), as well as TOEFL scores. Requests, including justification, for exceptions to this requirement should be made to the chair of the department.

2. Complete the general university requirements (page 198).

3. Complete the master's degree requirements (page 202).

4. Complete the following statistics (core) courses:
   - STAT F651—Statistical Theory I ...
   - STAT F652—Statistical Theory II ...
   - STAT F653—Statistical Theory III—Linear Models ...
   - STAT F654—Statistical Consulting Seminar ...
   - STAT F690—Project ...

5. Complete two of the following courses:
   - STAT F461—Applied Multivariate Statistics ...
   - STAT F602—Experimental Design ...
   - STAT F605—Spatial Statistics ...
   - STAT F621—Distribution Free Statistics ...
   - STAT F631—Categorical Data Analysis ...
   - STAT F641—Bayesian Statistics ...
   - STAT F661—Sampling Theory ...
   - STAT F611—Time Series ...

6. Complete at least 6 credits of approved courses from an application area or courses with substantial statistical and/or mathematical content.

7. Minimum credits required ...
   - Students working in subject areas involving significant non-English literature will be expected to read the appropriate foreign language.

Note: Each student must take and pass a two-part comprehensive exam. The first part, written by the statistics faculty, is a written exam (not a take-home exam) covering the material in the core statistics courses. The second part is an oral exam covering follow-up questions from the written exam as well as any material from courses the student has taken along with their project.

Minimum credits required ...

www.uaf.edu/chem/

M.S., Ph.D. Degrees
Minimum Requirements for Degrees: M.S.: 30 credits; Ph.D.: 18 thesis credits

Biochemistry and molecular biology is an interdepartmental program administered by the Department of Chemistry and Biochemistry with research support through the Institute of Arctic Biology. A broad range of biomedical research experiences are available including molecular and cellular neuroscience, proteomics, protein structure-function and molecular toxicology. The Arctic environment provides additional research opportunities in environmental biochemistry, adaptations and molecular genetics.

UAF faculty and affiliate faculty at collaborating institutions provide a rich academic environment encompassing both research and comprehensive course offerings. Students with career interests in biotechnology, pharmaceutical sciences, environmental health, genetics and biomedicine are encouraged to apply. Students are normally accepted with financial support (fellowships, research assistantships and/or teaching assistantships) along with tuition waivers.

Graduate Program — M.S. Degree
1. Complete the general university requirements (page 201).
2. Complete the master's degree requirements (page 205).
3. Complete the following three core courses:
   CHEM F654—Protein Structure and Function ............3
   CHEM F657—Molecular Foundations of Gene Expression ....3
   CHEM F674—Membrane Biochemistry and Biophysics ..........3
5. Minimum credits required ........................................30

Graduate Program — M.S. Degree with Neuroscience Option
1. Complete the general university requirements (page 201).
2. Complete the master's degree requirements (page 205).
3. Complete the following three core courses:
   CHEM F654—Protein Structure and Function ............3
   CHEM F657—Molecular Foundations of Gene Expression ....3
   CHEM F674—Membrane Biochemistry and Biophysics ..........3
4. Complete the following neuroscience course:
   BIOL F617—Neurobiology ..........3
5. Complete a neuroscience research thesis
6. Minimum credits required ........................................30

Graduate Program — Ph.D. Degree
1. Complete the general university requirements (page 201).
2. Complete the Ph.D. degree requirements (page 206).
3. Complete the following three core courses:
   CHEM F654—Protein Structure and Function ............3
   CHEM F657—Molecular Foundations of Gene Expression ....3
   CHEM F674—Membrane Biochemistry and Biophysics ..........3
4. Complete three electives

Graduate Program — Ph.D. Degree with Neuroscience Option
1. Complete the general university requirements (page 201).
2. Complete the Ph.D. degree requirements (page 206).
3. Complete the following three core courses:
   CHEM F654—Protein Structure and Function ............3
   CHEM F657—Molecular Foundations of Gene Expression ....3
   CHEM F674—Membrane Biochemistry and Biophysics ..........3
4. Complete three electives with two of the electives in neurosciences.
7. Minimum credits required (including core courses) ..............38

BIOLOGICAL SCIENCES

College of Natural Science and Mathematics
Department of Biology and Wildlife
907-474-7671
www.bw.uaf.edu

Ph.D. Degree
Minimum Requirements for Degree: 18 thesis credits

The biological sciences program provides a broad education as well as a sound foundation in the basic principles of biology. Candidates who expect to teach in public secondary schools must be sure that education requirements are met.

Graduate Program — Ph.D. Degree

Concentrations: Biology, Botany, Wildlife Biology and Conservation, Zoology

1. Complete the admission process including the following:
a. Submit scores from both the GRE General Test (required) and the GRE Subject Test in Biology (required for applicants holding only a bachelor's degree; highly recommended for applicants who have already earned a master's degree).
b. If English is not your native language, submit scores from both the Test of Spoken English (TSE) and the Test of Written English (TWE), as well as TOEFL scores. Requests, including justification, for exceptions to this requirement should be made to the chair of the department.

2. Complete the general university requirements (page 201).
3. Complete the Ph.D. degree requirements (page 206).
4. As part of the Ph.D. degree requirement, complete the following:
a. If entering with only a bachelor's degree, complete and pass the departmental written and oral Ph.D. qualifying examination.
   b. Complete and pass a written and oral comprehensive examination by the graduate advisory committee.
   c. In this program or in previous post-baccalaureate programs, complete course work at least equivalent to that required for the M.S. degree.
5. Minimum credits required ........................................18

GRADUATE DEGREES
BIOLOGY
College of Natural Science and Mathematics
Department of Biology and Wildlife
907-474-7671
www.bw.uaa.edu

M.S., M.A.T. Degrees
Minimum Requirements for Degrees: M.S.: 30 credits; M.A.T.: 36 credits

UAF biology graduate students have extraordinary opportunities to conduct independent biological research in controlled-experiment or field settings, taking advantage of arctic, alpine and boreal environments near campus or at remote locations.

The department has close connections with the National Science Foundation taiga Long Term Ecological Research (LTER) site, located about 20 miles from campus. Our students also have access to the tundra LTER site at Toolik Lake, where the UAF Institute of Arctic Biology runs a field station.

Facilities available to graduate students on the Fairbanks campus include small mammal colonies, the Large Animal Research Station, both electron and light microscope laboratories, an imaging laboratory and a greenhouse facility. Students and faculty work on systematic collections in the UA Museum of the North using a variety of approaches from traditional morphology to molecular biology.

The program has strong research emphases in arctic plant ecology, plant-animal coevolution, insect ecology (terrestrial and aquatic), bird and mammal physiological ecology, vertebrate population dynamics, biology of seabirds, molecular evolution and systematics, pollution ecology, wetland ecology, population genetics, ungulate biology and wildlife management.

Advanced degree recipients gain significant teaching experience through conducting labs, and a few take primary responsibility for instruction in a course at the undergraduate level. Our graduates have pursued careers in education at the university, community college and secondary levels. Many find professional positions with state and federal resource agencies, with whom the department faculty maintain close contact.

The Department of Biology and Wildlife has approximately 100 graduate students. The atmosphere is informal and students and faculty interact frequently, not only in small-enrollment classes, but also on field trips and in community and social settings.

Research assistantships are available on a competitive basis. Teaching assistantships in department courses provide excellent experience. Competitive fellowships are available through the UAF Graduate School. Applicants interested in graduate assistantships should contact the department for assistance with application forms.

Graduate Program — M.S. Degree

1. Complete the admission process including the following:
   a. Submit scores from both the GRE General Test (required) and the GRE Subject Test in Biology (highly recommended).
   b. If English is not your native language, submit scores from both the Test of Spoken English (TSE) and the Test of Written English (TWE), as well as TOEFL scores. Requests, including justification, for exceptions to this requirement should be made to the chair of the department.

2. Complete the general university requirements (page 201).

3. Complete the M.S. — with Thesis degree requirements (page 206).

4. As part of the M.S. degree requirements, complete and pass the departmental written and oral master's comprehensive examination.

5. Minimum credits required .............................................. 30

BUSINESS ADMINISTRATION
School of Management
907-474-4622
www.uaa.edu/som/programs/ba/

M.B.A. Degree
Minimum Requirements for Degree: 30 credits

The School of Management offers professional education applicable to the fields of management, finance, human resource management, international business, marketing and travel industry management to individuals interested in entering industry or government.

The program prepares graduates to meet the complex problems of the technical, economic and social environment and to enable them to provide imaginative and responsible leadership to industry and government.

The UAF program recognizes that competence in the practice of management necessitates education with both breadth and depth. The graduate program is accredited by the Association to Advance Collegiate Schools of Business.

Graduate Program — M.B.A. Degree

Concentrations: Capital Markets, General Management

1. Complete the admission process including the following:
   a. Applications will be reviewed on a continuous basis
   b. UAF B.B.A. students may be admitted to the M.B.A. program prior to graduating if they meet one of the following:
      i. Have at least a 'B' in BA F325, BA F343, BA F360, BA F390 and ECON F227
      ii. have senior standing and an overall GPA of 3.25 or have at least a 'B' in BA F325, BA F343, BA F360, BA F390 and ECON F227
      iii. have senior standing, an overall GPA of 3.0 and a minimum GMAT score of 500 (an average GRE score of 500 will also be accepted)
   c. Non-UAF applicants with a bachelor's degree with a business major from an AACSB-accredited institution and a 3.25 GPA will be admitted without taking the GMAT or GRE. Other applicants must submit results from the GMAT or GRE.
   d. Students with a graduate degree from an accredited institution will be admitted without taking the GMAT or GRE.

2. Complete the general university requirements (page 201).

3. Complete the master's degree requirements (page 205).

4. If a student earns grades of two Cs, one D, or one F in courses that are part of his/her M.B.A. program, the student will no
WILDLIFE BIOLOGY AND CONSERVATION

College of Natural Science and Mathematics
Department of Biology and Wildlife

M.S. Degree

Minimum Requirements for Degree: 30 credits

The geographic location of the university is particularly advantageous for the study of wildlife biology. Spruce forest, aspen-birch forest, alpine tundra, bogs and several types of aquatic habitats are within easy reach. Studies can be made in many other habitats ranging from the dense forests of southeastern Alaska to arctic tundra.

Adequate study collections of plants and animals are available, and a 2,000-acre study area is near the campus. Wildlife biology students have ample opportunity for close association with the personnel of the Alaska Cooperative Fish and Wildlife Research Unit, Institute of Arctic Biology and several local offices of federal and state conservation agencies. These agencies often provide support for graduate student projects, and program faculty usually hire a number of students for summer field work. Exceptional opportunities are available for students to gain experience and make job connections.

The Department of Biology and Wildlife, the Institute of Arctic Biology, and the Alaska Cooperative Fish and Wildlife Research Unit cooperate in offering graduate work leading to the M.S. degree. Detailed information on the graduate program in wildlife biology and management is available from the chair of the wildlife program.

The Alaska Cooperative Fish and Wildlife Research Unit and Institute of Arctic Biology offer a limited number of research assistantships. Teaching assistantships are available in the Department of Biology and Wildlife.

Graduate Program — M.S. Degree

1. Complete the following admission requirement:
   a. Submit scores from both the GRE general test (required) and the GRE subject test in biology (highly recommended).
   b. If English is not your native language, submit scores from both the Test of Spoken English (TSE) and the Test of Written English (TWE), as well as TOEFL scores. Requests, including justification, for exceptions to this requirement should be made to the chair of the department.

2. Complete the general university requirements (page 201).
3. Complete the M.S. — with Thesis degree requirements (page 207).
4. As part of the M.S. degree requirements, complete and pass the departmental written and oral master's comprehensive examination.

5. Minimum credits required ........................................30

**A. CHANGE IN DEGREE REQUIREMENTS:** (Brief statement of program/degree changes and objectives)

Remove all concentrations within the Ph.D. program, with the exception of Wildlife Biology and Conservation.

**B. CURRENT REQUIREMENTS AS IT APPEARS IN THE CATALOG:**

We are not changing any of the requirements for the degree.

**RECEIVED**

SEP 2 0 2010

Dean's Office
College of Natural Science & Mathematics

**C. PROPOSED REQUIREMENTS AS IT WILL APPEAR IN THE CATALOG WITH THESE CHANGES:**

(Underline new wording strike-through-old-wording and use complete catalog format)

Graduate Program - Ph.D. Degree
Optional Concentration: Biology, Botany, Wildlife Biology and Conservation, Zoology

**D. ESTIMATED IMPACT**

WHAT IMPACT, IF ANY, WILL THIS HAVE ON BUDGET, FACILITIES/SPACE, FACULTY, ETC.

This concentration change will not have any impact on the budget, facilities/spaces, or faculty.
### E. IMPACTS ON PROGRAMS/DEPTS:

What programs/departments will be affected by this proposed action? Include information on the programs/departments contacted (e.g., email, memo).

This proposed concentration change will not have an effect on any other department.

### F. IF MAJOR CHANGE - ASSESSMENT OF THE PROGRAM:

Description of the student learning outcomes assessment process.

### JUSTIFICATION FOR ACTION REQUESTED

The purpose of the department and campus-wide curriculum committees is to scrutinize program/degree change applications to make sure that the quality of UAE education is not lowered as a result of the proposed change. Please address this in your response. This section needs to be self-explanatory. If you drop a course, is it because the material is covered elsewhere? Use as much space as needed to fully justify the proposed change and explain what has been done to ensure that the quality of the program is not compromised as a result.

The concentrations currently listed do not have any requirements associated with them, and consequently are not distinct from each other. Students (and most faculty) are not even aware of them until they fill out the graduation paperwork. The only exception is the Wildlife Biology and Conservation concentration, for which there are some differences (e.g., all paperwork goes through the Wildlife Program Chair). We do not have distinct "Zoology" or "Botany" programs, and a concentration called "Biology" within "Biological Sciences" is nonsensical.

</table>

A. CHANGE IN DEGREE REQUIREMENTS: (Brief statement of program/degree changes and objectives)

Change the name of the degree from M.S., M.A.T. Biology to M.S., M.A.T. Biological Sciences in order to have a consistent name of all degrees within the Biology and Wildlife Department.

B. CURRENT REQUIREMENTS AS IT APPEARS IN THE CATALOG:

We are not changing any of the requirements for the degree.

C. PROPOSED REQUIREMENTS AS IT WILL APPEAR IN THE CATALOG WITH THESE CHANGES: (Underline new wording strike-through-old-wording and use complete catalog format)

RECEIVED
SEP 27 2010
Dean's Office
College of Natural Science & Mathematics

D. ESTIMATED IMPACT

WHAT IMPACT, IF ANY, WILL THIS HAVE ON BUDGET, FACILITIES/SPACE, FACULTY, ETC.

This name change will not have any impact on the budget, facilities/space, or faculty.
E. IMPACT ON PROGRAMS/DEPTS:

What programs/departments will be affected by this proposed action? Include information on the programs/departments contacted (e.g., email, memo)

This proposed name change will not have an effect on any other department.

F. IF MAJOR CHANGE: ASSESSMENT OF THE PROGRAM:

Description of the student learning outcomes assessment process.

JUSTIFICATION FOR ACTION REQUESTED:

The purpose of the department and campus-wide curriculum committees is to scrutinize program/degree change applications to make sure that the quality of UAF education is not lowered as a result of the proposed change. Please address this in your response. This section needs to be self-explanatory. If you drop a course, is it because the material is covered elsewhere? Use as much space as needed to fully justify the proposed change and explain what has been done to ensure that the quality of the program is not compromised as a result.

The Dept of Biology and Wildlife currently offers BA, BS and PhD programs in “Biological Sciences”, but MS and MAT programs in “Biology”. There is no reason for the distinction and it is confusing to students who look in the catalog, for example, and have to remember that these degrees are not grouped together because of the different names. This change will put all programs under one name.

APPROVALS:

Signature, Chair, Program/Department of: Biology and Wildlife
Date: Sept 7, 2010

Signature, Chair, College/School Curriculum Council for CNSM
Date: 9/24/2010

Signature, Dean, College/School of: CNSM
Date: 9/27/10
