

Financial Managers' Meeting

August 30, 2016

• **Safety Minute**

- **Strokes**
 - Know the warning signs!
 - From the American Heart Association (<http://goo.gl/WtTfJu>):

F.A.S.T is an easy way to remember the sudden signs of stroke. When you can spot the signs, you'll know that you need to call 9-1-1 for help right away. F.A.S.T. is:

Face Drooping – Does one side of the face droop or is it numb? Ask the person to smile. Is the person's smile uneven?

Arm Weakness – Is one arm weak or numb? Ask the person to raise both arms. Does one arm drift downward?

Speech Difficulty – Is speech slurred? Is the person unable to speak or hard to understand? Ask the person to repeat a simple sentence, like "The sky is blue." Is the sentence repeated correctly?

Time to call 9-1-1 – If someone shows any of these symptoms, even if the symptoms go away, call 9-1-1 and get the person to the hospital immediately. Check the time so you'll know when the first symptoms appeared.

since 1917
