Section 5. Facilities Snapshot	43
Section 6. Administrative Review & Process Improvement	47
Appendix	51

Executive Summary

Higher education institutions in the U.S. are facing increased scrutiny from the multiple constituencies they serve including federal and state policy makers, parents, students and the general public. Learning outcomes and college affordability are among the many issues being carefully reviewed. Attention to college affordability in particular has resulted in an uncertain budget environment for higher education institutions as pressure builds to moderate tuition increases, while also reducing reliance on state and federal funds. This reality has resulted in somewhat of a dilemma for administrators in higher education as utilities, health care, deferred maintenance and facility needs, and other administrative costs continue to increase. The message from Juneau and Washington D.C. is the same: "moderate your primary self-generating revenue (tuition) and anticipate less from state and federal coffers."

UAF is not exempt from the conditions that make up this operating environment. Understanding this fiscal climate, UAF must effectively manage its resources and demonstrate excellent stewardship of state and federal (external) as well as internal funds. Examples of this prudent fiscal management include, but are not limited to:

- 1) Streamlining existing processes in an effort to hold down costs,
- 2) Finding ways to generate additional revenue from non-general fund resources,
- 3) Pursuing new models for resource management including public-private partnerships (P3) to address housing, dining, and other student facility and service functions, and
- 4) Strategically reinvest internal resources to high priority programs that align with UAF's strategic plan, accreditation core themes, and the UA Strategic Direction Initiatives (SDI).

UAF addressed each of these areas in FY12 through:

- 1) The Process Improvement initiatives led by the Administrative Services division,
- 2) Exploration of new funding mechanisms and models, such as use of Debt Service to address facility needs, as well as new initiatives to expand commercialization of research efforts and intellectual property.
- 3) Initial investments made in a large-scale giving campaign in preparation for UAF's Centennial Anniversary celebrations that will take place from 2015-2017,
- 4) Productive partnerships that will bring new opportunities to UAF such as the Public/Private Partnership (P3) Wood Center Dining addition (Phase 1) schematic design approved by the Board of Regents for Student Life Revitalization, Sustainable Village partnerships with the Cold Climate Housing Research Center and UAF student designers/innovators for sustainable student housing, and new partnerships with the State for Unmanned Aerial Vehicle (UAV) research endeavors,
- 5) Incorporation of the UAF accreditation core themes into UAF's internal strategic reinvestment process to better ensure alignment of plans and missions, and
- 6) Regular ongoing academic planning and program review led by the Office of the Provost.

University of Alaska Fairbanks

The Governor's strategy over the past few fiscal years, which continues in FY14, has been to "hold-the-line" on budget requests from state agencies including the University. UAF ended the fiscal year with stability and will continue efforts to align public service, conduct outreach, increase development and pursue engagement efforts.

Total revenue increased in FY12 over FY11, primarily as a result of one-time funds from the American Reinvestment and Recovery Act (ARRA). UAF received approximately \$68 million in ARRA stimulus funds

in FY12 and \$33.5 million in FY11. In total, since 2010, UAF has received almost \$108 million in ARRA funds, with 85% of those funds supporting the School of Fisheries and Ocean Sciences with the construction of the arctic research vessel Sikuliaq. The 261-foot Arctic research vessel was christened and launched on October 13, 2012 and is expected to arrive in its homeport of Seward, Alaska by January 2014.

As ARRA stimulus funds are one-time federal funds, this source will likely not be an available source of funds in the future. For that reason, ARRA funds are excluded in many of the charts and graphs throughout the 2012 Fall Financial Review that aim to compare revenue trends across years.

Deferred Maintenance and Facility Needs

Several initiatives continued as a work-in-progress during FY12 including the construction of the new 100,000 square foot Life Sciences Building which is estimated to be completed by summer 2013 and the Utilities West Ridge Steam Capacity Expansion Project which will provide additional steam distribution capacity to the West Ridge.

UAF relies on tuition and indirect cost recovery from grants and contracts, primarily federal, to cover portions of its annual fixed increases. In recent years, UAF has had to rely on debt service and revenue bonds to fund deferred maintenance needs and facility upgrades. Use of debt service puts additional pressure on UAF resources, as historically investments of this nature were funded through direct State support. This approach is a fundamental shift in facility improvement and investment in order to manage required maintenance and infrastructural needs. The lack of comparable growth in revenue streams within the control of UAF makes managing these additional pressures difficult.

Projects addressed via this models include but are not limited to funding for Life Sciences (\$20.6 million of the \$108.6 million total project cost) and Deferred Maintenance (\$22.5 million), critical electrical maintenance, Cogeneration Heating Plant maintenance, Voice Over IP telecommunication upgrades, the West Ridge Research Revitalization project, campus wide energy solutions and roof replacement in critical areas. An additional \$23.25M for Deferred Maintenance is anticipated in FY13, however it should be noted that the total Deferred Maintenance backlog exceeds this request.

Revenue bond refinancing will also be used in the Spring of 2013 for additional deferred maintenance projects that contribute to an enriched student experience and life on campus. The UAF Public/Private Partnership (P3) for the Dining/Housing facility upgrades issued bonds to fund the student dining facility revitalization. The bond proceeds for the project were \$26.0M. UAF annual lease payments will be \$1.45M.

New construction items include the Engineering Building completion (partially funded in FY13) and receipt authority for the Sustainable Village Phase II. UAF will prepare for the Energy Technology Facility, a University Fire Department/CTC Fire Station Replacement and Training Center, the Kuskokwim Campus Consortium Learning Center, and the Public/Private Partnership Housing (and Dining) Fairbanks Student Life renovation in the FY15-FY16 request.

Federal Climate

The federal government continues to craft a plan to address financial pressures driven by national deficit levels. A reduction in expenditures is expected, which may impact agency funds that are a key component of the UAF fiscal makeup. While there is general support to invest in higher education at a federal level, UAF understands the expectation that the institution must maintain a strategic and relevant research agenda in order to remain competitive in this environment. Federal funding for higher education is expected to be more targeted and UAF will prepare for this shift as applicable.

Policy makers, both federal and state, face budget deficits. Institutions of higher education are under tremendous pressure from elected officials to reduce reliance on federal and state funds. Meanwhile, the cost of providing higher education continues to go up. The President of the United States, in his 2012 State of the Union address, had this to say about federal funding of higher education:

"...let me put colleges and universities on notice: if you can't stop tuition from going up, the funding you get from taxpayers will go down."

Absent action by the U.S. congress, there is a likelihood there will be some level of Federal Sequestration. This is likely to impact Federal agency funding for FY13 and beyond. However, the full impact of any sequestration cannot be reasonably determined at this time.

State Climate and Budget Requests

State support for higher education across the U.S. has been greatly impacted by the recession. According to the College Board Advocacy and Policy Center *Analysis Brief* - "*Trends in Higher Education Series*" published in July 2012, state support for the entire U.S. public higher education system has declined by an average of -3.8% since 2006-07. The state of Alaska has been more resilient to this economic impact and has been strategic about maintaining its reserves. The publication notes, since 2006-07, Alaska state appropriations have increased by 24.2%.

Alaska's primary source of general fund revenue is the natural resource wealth attributed to oil production on the North Slope. However, oil production is declining. In 2001, Trans Alaska Pipeline System (TAPS) oil throughput averaged just below 1 million barrels per day. In 2011, TAPS throughput averaged 603 thousand barrels per day. This trend is expected to continue in the near future.

Of equal importance, is the state's reliance on high oil prices to support current state spending levels. The breakeven price of oil to support current spending is roughly \$100/barrel. In FY10, the state budget required \$64/barrel to support state expenditures. The increase in the breakeven price of oil for the state budget to balance may be cause for concern without additional diversity in state revenues. If expenditure levels continue to rapidly increase, the break-even price may exceed the market price, leading Alaska into budget deficits.

State general fund support increased by 2.2% between FY11-12 and another 3.8% between FY12-13. Overall, earned revenue went up. UAF is poised for growth in a few identified strategic areas in FY13 and beyond.

UAF was funded via the State of Alaska in the following program areas in FY13 (\$ State Funds/\$ Receipt Authority, units in thousands unless noted otherwise):

- Honors Program: \$100K
- Advising Students for Performance Success: \$600K/\$273K
- Support for Increased Engineering Retention & Graduation: \$400K/\$400K
- Vet Med Program: \$200K/\$200K
- Early Childhood Program Support: \$144K
- Indigenous Students PhD & Alaska Native Knowledge Network: \$250K/\$46.6
- Resilience and Climate Adaptations Program (RAP) in Graduate Studies: \$300K/\$472.6K
- Sikuliaq On-Shore Support (receipt authority only): \$547.2
- FFA and 4-H: \$250K/\$750K
- Alaska Air National Guard Scholarship Program: \$80K

UAF was funded via the State of Alaska in the following capital and facility areas in FY13:

- UAF Engineering Facility (partial funding): \$46.3M
- Ocean Acidification Research: \$2.7M
- Unmanned Aerial Vehicle R&D: \$5M
- Georgeson Botanical Garden: \$100K
- Kuskokwim Campus R&R: \$450K

UA's FY14 budget request approved by the UA Board of Regents and submitted to the Governor includes the following programmatic requests for UAF:

- Mandatory Comprehensive Student Advising (CRCD): \$302.4/\$14.0
- UAF STEM Capacity in General Chemistry: \$200.0/\$53.0
- E-Learning (Instructional Design and Equipment): \$250.0/\$100.0
- Alaska Young Fisherman's Summit: \$43.9/\$5.0)
- Alaska Seafood Processors Leadership Institute (ASPLI): \$56.5/\$75.0
- UAF Nursing Program at Bristol Bay: \$55.0/\$55.0
- Alaska Veterinary Medicine 2+2 Program w/Colorado State: \$200.0/\$243.0
- UAF/UAA Joint Doctoral Program in Psychology: \$300.0
- Mineral Research and Development Initiative: \$100.0/\$90.0
- Workforce Development in Construction Trades and Tribal Management: \$140.0/\$90.0
- Response to Statewide Business Pressure for Accountants (Controllership): \$195.0/\$30.0
- Sustaining the UA Press: \$200.0
- Intellectual Property for Business Development: \$200.0/\$50.0
- Ship Time for Alaska Specific Research (Sikuliaq): \$500.0
- High Performance Computing: \$100.0/\$100.0

UA's FY14 Capital Budget request includes the following UAF-specific items:

- Annual requirement for maintenance (Est. 62% of \$37,500.0): \$23.131.0
- Cogeneration Heating Plant Replacement Design: \$22,000.0
- Engineering Building Completion: \$48,300.0/\$10,000.0
- Cold Climate Housing Research Center Sustainable Village Phase II: \$0.0/\$1,300.0

UAF FY14 Capital Research to Sustain Alaska's Economy:

- Partnership to Develop Statewide Energy Solutions: \$5,500.0/\$3,000.0 (phased)
- Improving Arctic Oil Spill Response through Dedicated Science and Technology Center: \$1,500.0/\$2,000.0
- Enhance Base Maps for Alaska: \$1,900.0
- Research Alaska's Chinook Salmon Production & Decline: \$3,100.0/\$6,200.0

Strategic Reinvestment

The challenging federal and state fiscal climates will make management of UAF's internal resources all the more important. UAF regularly reallocates internal resources to support priority areas. For FY13, UAF invested in the office of Undergraduate Research and Scholarly Activity, the Honors Program, the Center for Alaska Native Health Research, a UAF branding and marketing campaign, International student recruitment strategies, and research initiatives, among other investments. Factors that contribute to funding are the

requests' alignment with the UAF mission, strategic plan, and accreditation core themes. Additionally, funded efforts typically have alignment with performance outcomes such as increasing the number of UAF graduates, graduating students in high demand job areas that meet the needs of the Alaskan economy (Engineering, Fisheries, Mining, Teacher Education, Health/Biomedical, Workforce Development, and Research), contributions to competitive research, and other student attainment and achievement areas.

The UAF Office of Management and Budget (OMB) was also established in 2012. OMB focuses on budget analysis and planning, process improvement and efficiencies, and financial projections and forecasting. OMB will also play a significant supporting role in future strategic budgeting and reallocation processes at UAF.

FY13 Investment and FY14 Outlook: Planning for the Future (units in thousands)

There is clear alignment between UAF accreditation core themes, strategic planning goals and the UA Strategic Direction Initiative (SDI). The UA system SDIs also represent the broad themes UAF and UA will be used in budget and planning discussions with the State for FY14 requests.

UAF Accreditation Core Themes	UAF Strategic Plan	UA Strategic Direction Initiatives
Educate: Undergraduate and graduate	Educate students to be informed,	Student achievement and attainment
students and lifelong learners	responsible, active citizens by	
	incorporating real-world experiences	Research and development to help build
Research : To create and disseminate	and applications into the undergraduate	and sustain Alaska's economic growth
new knowledge, insight, technology, artistic and scholarly works	curriculum.	and productive partnerships
	Promote UAF as Alaska's premier	Productive partnerships with schools,
Prepare : Alaska's career, technical and	research enterprise in partnership with	public entities and private industry
professional workforce	state agencies, industry, and civic	
	organizations.	Accountability to the people of Alaska
Connect: Alaska Native, rural, and		
urban communicates by sharing	Enhance UAF's competitive advantage	
knowledge and ways of knowing	by attracting and keeping the best and	
	brightest students and faculty.	
Engage: Alaskans through outreach for		
continuing education and community	Expand graduate programs in targeted	
and economic development	areas of identified need and existing	
	strengths.	
	Improve assistance to students in	
	making transitions across all phases of	
	the education continuum.	
	Serve Alaska's diverse communities in	
	ways that are more responsive and	
	accessible and enhance the social,	
	economic, and environmental well-	
	being of individuals and communities.	
	Develop innovative approaches to	
	resource management that support the	
	University's mission and position UAF	
	to meet the challenges of the future.	

Student Achievement and Attainment

A common theme in UAF's student achievement package is to remove barriers for student success. In FY13, the State of Alaska put \$600.0 toward UAF "Advising Students for Performance Success" and \$400.0 toward

"Support for Increased Engineering Retention and Graduation" initiatives. Data has shown the six-year graduation rate for students with comprehensive advising support is nearly 19% higher than those without. Expanding the TRiO program last year with this funding (from 160 students to nearly 400) contributed to improvements in student retention and degree completion. In FY14, UAF requests to expand advising support to include community campuses, specifically Bristol Bay, Kuskokwim Campus, and CTC, and will target non-completing degree seeking students. UAF STEM capacity in General Chemistry is also a bottleneck, as this course is an entry-level requirement for future engineering and life sciences (high demand) graduates. UAF hopes to remove this bottleneck with funding for a Chemistry Learning Center, additional capacity for labs, and dedicated mentoring for students.

Additional investments in E-Learning are expected to increase both enrollment and degree completion. The ability to increase course offerings via online instruction will leverage technology in an effort to increase urban and rural student capacity.

Productive Partnerships with Alaska's Public and Private Industries

There are several key areas UAF will focus on in the FY14 budget request related to productive partnerships: Fisheries, Health/Biomedical, Mining, and Workforce Development. The University of Alaska Fisheries, Seafood and Maritime Initiative will engage with fisheries, seafood and maritime sectors and community partners. The goal of the initiative is to assess, develop and deliver programs, training and research that prepare Alaskans to meet current and emerging workforce, economic and scientific needs. Related to these efforts, UAF is exploring opportunities to partner with the Alaska Department of Fish and Game for fisheries research and development efforts.

Specific to Health/Biomedical, UAF received \$200.0 in FY13 for Veterinary Medicine, which was half of the requirement for full program expansion. In FY14, UAF will request the remaining \$200.0 investment to build this joint "2+2" accredited program with the College of Veterinary Medicine and Biomedical Sciences at Colorado State University. Additionally, UAF plans to expand the Nursing program at Bristol Bay in an effort to reduce the wait list for nursing students and increase clinical lab space. This will ensure a high quality learning environment and fill the increasing statewide demand for nurses in rural Alaska. Similarly, UAF and UAA will partner to expand the Joint Psychology PhD program, as well as undergraduate programs in Psychology, expanding the ability for graduates to become licensed for clinical practice in Community-Clinical Psychology.

Other investments in Mining and Workforce Development also serve to grow effective partnerships and meet Alaska's high demand job needs. The Mineral Resources Research Laboratory will offer vocational training relevant to the field and will expand the ability for UA to capitalize on private sector research for mining exploration developments. Additionally, the Interior Aleutians Campus is developing an alternative energy emphasis that includes Construction Trades Technology training and education in alternative energy technology. A focus on energy efficient building practices will also contribute to rural communities. Finally, the School of Management intends to grow its Accounting program by five courses, with an emphasis in chief accountants and controllers to meet Alaska's job demands for skilled accountants in small and medium sized organizations.

Fostering Knowledge of Alaska Issues, Culture and History

UA Press is the only book publisher operating in Alaska that focuses on scholarly and educational books and e-books. UA Press publishes an average of 20 books per year on topics ranging from politics, history, Alaska Native languages and cultures, to science and natural history. Sales exceed 30,000 books annually; however, UAF will request support for this strategic operation as current book revenues are not sufficient to maintain existing publication levels.

Research and Development to Help Sustain Alaska's Economic Growth

In FY13, UAF put forward requests for "Commercialization of University Intellectual Property for Business Development" and "High Performance Computing for Alaskan Research", with little success. These initiatives remain a priority in FY14, and have been reevaluated and improved to leverage partnerships across the State. As part of strategic planning efforts at UAF and the UA System, it is clear research partnerships and the ability to capitalize on research products and intellectual property may enable UAF to bring results to private business, fuel economic development, and create Alaskan jobs. UAF exceeds \$120 million in research annually. If research products can be licensed and sold to business entities; this investment would fund UA's commercialization efforts. This request may be packaged with a similar request from UAA, and remains a common goal for the UA System. Additionally, High Performance Computing (HPC) investments enable a wide variety of stakeholders to more easily engage in computational modeling, have access to large data sets, and allow for data visualization, education and outreach opportunities. UAF must sustain modern technology services via HPC in order to remain competitive and receive research awards.

In FY13, UAF included university generated funding for on-shore staff support for the Sikuliaq research ship, which becomes operational in 2013 for testing, and moves to scientific operations in 2013-2014. UAF's FY14 budget includes a state-funding request for Alaska issue-specific ship time. This provides UAF the ability to direct ship-time for Alaska based-research, student engagement, and community outreach.

Capital Research Priorities

In FY13, UAF garnered legislative support for research initiatives that contribute to Alaska's economy. UAF received \$2,700.0/\$750.0 for studying the "Impacts of Ocean Acidification" and \$5,000.0 was added by the Legislature for research and development of "Unmanned Aerial Vehicle Systems". In FY14, UAF takes a similar approach and plans to put forward four capital research projects of importance to the State.

UAF has significant capabilities to assist the State and Alaska communities in making informed decisions about in-state energy development. Funding for a UAF hosted integrated in-state energy policy center will allow UAF the ability to objectively and critically analyze energy alternatives. UAF will leverage the energy technology testing and development success of the Alaska Center for Energy and Power (ACEP) to advance research in target areas of energy analysis and fossil fuel research. Assessments for natural gas development, proposed coal-to-liquids and gas-to-liquids projects, hydropower, carbon sequestration and other strategies can be conducted to inform Alaska's leaders and help ensure Alaska's resources are developed in a prudent and economically beneficial manner. UAF is also uniquely situated to create a center focused on oil spill prevention and preparedness. This Arctic Oil Spill Response Science Technology Center will allow UAF to partner with State and Federal agencies, industry and other academic institutions to support wise decision-making regarding oil spill prevention and response.

Management of Alaska's salmon populations is of great importance to Alaska's subsistence, personal use, commercial and recreational fisheries in Alaska. Specifically, Alaska's Chinook salmon populations particularly in the Yukon-Kuskokwim river drainages are on the decline. To date, there is limited reliable data because Chinook salmon populations vary and are impacted by several factors. As a result, biologists and stakeholders seek to better understand the factors affecting the Chinook salmon returns to Alaskan waters. Improved data is needed in order to find solutions for the Alaskan industries and communities dependent on this food source.

Finally, Alaska's Statewide Digital Mapping Initiative (SDMI) is an interagency program that produces updated high-resolution imagery and elevation model data for the entire state. The base imagery and elevation mapping program is underway with a new high resolution satellite image of Alaska to be complete in 2014; however, increased capability to monitor and document land-surface conditions will improve the ability to detect and respond to the changing environment, assess resources, and plan new development. UAF will

submit a request to enhance Alaska's Base Maps in order to improve monitoring in regions of rapid change including areas changed by wildfires, along coast lines, near glaciers, and in zones of degrading permafrost.

Capital Facility Priorities

In FY13, UAF received \$46,300.0 for the first phase of the Engineering Facility, \$450.0 for Kuskokwim Campus Renewal and Renovation (R&R), and \$100.0 for survivability research in the Georgeson Botanical Gardens.

In FY14, the major priorities are deferred maintenance, planning for the Cogen Heating Plant replacement, and the next phase of the Engineering Facility. UAF is generally distributed a percentage of the UA System Deferred Maintenance funds based on a formula using the adjusted value of the facility multiplied by the weighted average age of the facility. As the UAF campus is approaching its centennial anniversary (2015-2017), the aging facility needs are generally the highest in the UA System.

New priorities include planning for the Cogen Heating Plant replacement. This significant project is expected to cost in upwards of \$175,000.0, and will be a part of the FY15-FY17 UAF Capital Budget Request as design and planning is completed.

New construction items include the Engineering Building completion and receipt authority for the Sustainable Village Phase II. As UAA also has an engineering building in progress, the engineering completion request is a joint request for UAF and UAA totaling over \$108,900.0 for the UA System.

UAF will additionally prepare for the Energy Technology Facility, a University Fire Department/CTC Fire Station Replacement and Training Center, the Kuskokwim Campus Consortium Learning Center, and a Public/Private Partnership Housing (and Dining) Fairbanks Student Life renovation in the FY15-FY16 request.

UAF Budget Basics – FY12 Sources, Uses, and Impact of Change (by percent) to UAF Funds

UAF receives funding from a variety of sources, including state general funds, tuition and fees, grants, contracts, partnerships and donations. UAF is committed to providing value to students and their families, alumni and friends, and the citizens of Alaska by using these resources efficiently and effectively. Approximately 57% of UAF's General Fund expenditures support academic activities: Research, Instruction, Academic Support, Scholarships, Student Services, and Library (based on FY12 NCHEMS). The remaining funds cover other essential costs including Financial Aid, Utilities and Physical Plant, and university operations such as safety services and administration.

Unrestricted Funds

General Funds come from:

- Tuition and fees
- State General Fund
- Indirect cost recovery from sponsored research

General Fund is used for:

- Instruction
- Services (e.g., police, fiscal operations, human resources)
 - Public service and administrative support

General Fund is not used for:

- Funded research
- Housing

Restricted Funds

Money comes from:

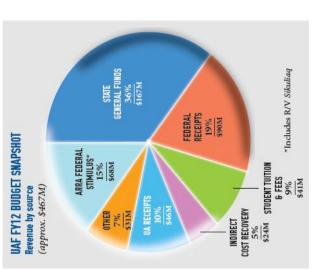

- Research grants, contracts, and partnerships
- Endowments
- Restricted gifts

As determined by providers, funds are used for:

- Research programs and academic centers
- Scholarships and fellowships
- Salaries, benefits, and research support for some faculty

Auxiliary Enterprise Funds

- Polar Express
- UAF Bookstore
- Dining Services & Housing
- Patty Ice Arena
- Parking Services
- Printing Services
- Wood Center

UAF FY12 Performance Target Recap and Strategies to Achieve Results in FY13-FY14

Performance Compact Summary provided by UAF Planning, Analysis & Institutional Research (PAIR)

This overview is an excerpt from the more comprehensive UAF Performance Report Compact Summary, which is submitted to the UA System Offices and the State of Alaska annually. Within the UAF campuses, unit compact plans are shared with the Office of the Provost. Academic performance results in these areas and regular feedback from the unit level administrators (Deans and Directors) drives projections related to the following outcomes:

- University Generated Revenue
- High-Demand Job Area (HDJA) Awards
- Grant-Funded Research Expenditures
- Undergraduate Retention Rates
 - Student Credit Hours (SCH)
- Citations of Research Publications
- Knowledge Transfer via Public Service

The following snapshots display actual campus achievement in FY08 through FY12 or CY08 through CY12 (where noted). Targets are noted for FY13 and FY14 performance.

UAF began a strategic effort in 2007 to increase student graduation rates:

- 1) instituted mandatory course placement for many 100-level courses (FY08)
- 2) instituted supplemental instruction and the very early warning system (FY08) 3) increased the baccalaureate admission standard (FY09)

FY08 FY09 FY10 FY11 FY12 FY13 FY14

- 4) established a dedicated financial aid advisor at the UAF Community and Technical College (FY09)
 - established a combined financial aid and academic advisor for each rural campus (FY10) 2
 - 6) established DegreeWorks as an advising aid (FY10)
 - 7) initiated elective first-year seminars (FY11)

effects. Measures taken in FY08 will affect six-year baccalaureate graduation rates beginning in FY13. rates than baccalaureate-seeking students. Freshman retention of associate-level students is lower as than baccalaureate rates, nonetheless it is clear that associate-level students have lower graduation each future year, but because the greatest loss of potential graduates is due to non-retention in the baccalaureate graduation rate of 40% by FY17. Associate-level graduation rates are more variable A major challenge in improving performance on this metric is the inherent lag between actions and FY16. The intensive advising initiative funded by the legislature for FY13 will have some effect on The APS and AlaskaAdvantage Scholarships initiated in FY12 will impact outcomes beginning in first two years, the maximum effect will not be achieved until FY19. UAF aims to reach a six-year well, and in fact that difference alone accounts for most of the difference in graduation rates.

Section 1. Revenue & Expenditure Trends

A. Five-year trend and one-year changes in revenue by source, fund, and Campus including significant trends, one-year changes, and projections.

See Appendix 1A1 – Revenue by Source MAU 08-12

See Appendix 1A2 – Revenue by Source Appropriation

See Appendix 1A3 – Revenue by Source Fund Type

See Appendix 1A4 – NGF Revenue by Source MAU 08-12

FEDERAL RECEIPTS (EXCL. ARRA STIMULUS FUNDS)

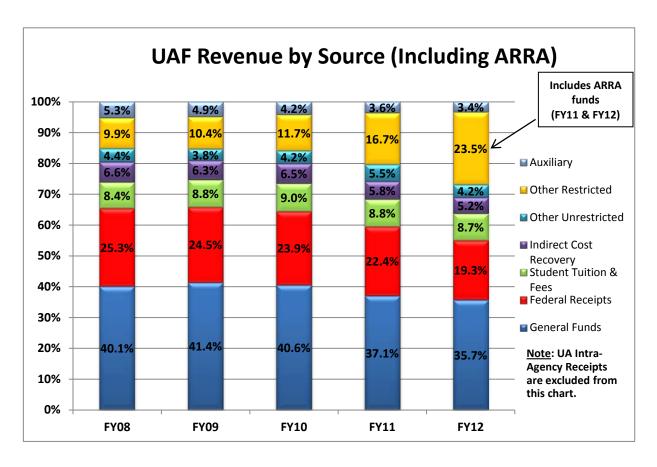

Federal receipts revenue decreased by \$6,615.7, or 6.8% overall from FY11 to FY12. The decline in federal revenue is primarily the result of the Department of Defense not renewing its contract with the Arctic Region Supercomputing Center for the center's service in 2011. The loss of \$7,073.0 in federal revenue has resulted in a much leaner version of ARSC, which went from approximately 45 regular employees funded federally, down to about a dozen employees on UAF unrestricted funds. Other units reporting reductions in federal receipts from FY11 include the College of Engineering & Mines (-\$1,192.8), the Geophysical Institute (-\$754.7) and the School of Natural Resources and Agricultural Science (-\$1,207.0), primarily due to the federal government's elimination of Agricultural Research Stations across the U.S. It's also important to note that CEM demonstrated a significant increase in federal receipts from FY08 thru FY11, prior to FY12's reduction

.

5-Year Trend (FY08-FY12)

Since FY08, federal revenue has been relatively flat (1.3%). This should be cause for concern as the federal government grapples with annual spending deficits and pressures to restrain and even cut federal spending continue to mount – both from policy makers and the general public. UAF is positioned well to continue its world-class research in areas such as climate change, energy technology, oil spill prevention & response, and unmanned aerial systems. However, it would be unwise to assume any growth in federal funding opportunities, rather flat to moderate decreases in federal funding should be assumed for the near to mid-term. It will be important for UAF to focus on market-driven research opportunities and other specific research niches in order to curb likely flat to declining federal funding.

It is uncertain what the effects will be if the federal government continues its plan to implement sequestration budget cuts beginning January 2013. The projected 7.8 percent across-the-board cuts would no doubt affect federal fund support for research and higher education. The actual likelihood of sequestration taking affect is not known at the time of this writing.

ARRA STIMULUS FUNDS

In response to the U.S. recession, Congress passed the American Recovery and Reinvestment Act of 2009 (ARRA). The primary objective of the Act was to save and create jobs by investing

in infrastructure and education. To this end, UAF received a total of \$191.1 million in stimulus funds and utilized \$6.3 million in FY10, \$33.5 million in FY11, and \$68.0 million in FY12. The majority of these funds were awarded to the UAF School of Fisheries and Ocean Sciences for the construction of the Research Vessel, the Sikuliaq. The 261-foot arctic research vessel was christened and launched on October 13, 2012 and is expected to arrive in its homeport of Seward, Alaska by January 2014.

ARRA stimulus funds are one-time federal funds and will likely not be an available source of federal funds in the future.

UNIVERSITY RECEIPTS

University receipts include both restricted and unrestricted revenues received from corporate sources, private donations, and local governments, as well as revenues received from publication sales, non-credit self-support programs, recreational facility use fees, and other miscellaneous sources.

Since FY08, restricted Corporate Grants and Contracts have almost tripled reaching \$4,575.1 in FY12, while restricted Oil Grants and Contracts almost quadrupled generating \$1,210.0 in FY12, respectively. Restricted University receipts make up the majority of University receipts with \$31,921.6. The primary restricted revenues include UA Foundation Grants and Contracts (\$6,522.2), Non-profit grants and contracts (\$4,388.1), Corporate Grants and Contracts (\$4,575.1), and Other University Grants and Contracts (\$4,681.8).

University receipts from unrestricted sources totaled \$12,146.8 in FY12, down significantly from FY11 (\$17,109.6). In FY10 unrestricted miscellaneous revenue was \$926.8, in FY11 revenue spiked to \$4,913.0, and in FY12 miscellaneous revenue normalized back down to \$946.5. The cause of the FY11 spike was due to a one-time risk liability refund transfer in FY11. The refund was a normalization action from previous year over-payments.

UAF's centennial celebration is fast approaching (2015-2017). A significant effort is underway in anticipation of UAF's centennial celebration to increase private and corporate philanthropic giving. As this capital campaign gets underway revenue from these sources and university receipts is expected to increase. The federal and state budget realities will also force UAF to pursue university-generated revenue opportunities.

STUDENT TUITION & FEES

Tuition Rate Change by Academic Yr.	05-06	06-07	07-08	08-09	09-10	10-11	11-12	12-13	13-14
Lower Division	10%	10%	7%	5%	5%	4%	5%	7%	2%
Upper Div. & Non-Resident Surcharge	10%	10%	7%	5%	5%	7%	10%	7%	2%
Graduate & Non-Resident Surcharge	10%	10%	7%	5%	5%	7%	10%	3%	2%

Student Tuition and Fee revenue for the UAF increased \$2,343.9, a 6.1% gain over FY11. Student fee revenue actually went down by \$170.4 and tuition revenue went up by \$2,514.3. Fee revenue includes fees levied for lab/materials, student government, transportation, athletics, student recreation center, heath center, and a 2% network fee. Fee revenue increased 42.7% between FY08 (\$5,019.0) and FY12 (\$7,164.0). The 5-year increase in fee revenue is mostly attributed to the establishment of the athletic fee in FY09 that generates approximately \$1 million in revenue annually. Lab/material fee revenue also increased \$887.9 during that time.

Tuition revenue is directly related to increases in enrollment (student credit hours) and the tuition rate which is approved by the University of Alaska Board of Regents. Tuition (net allowances and discounts) totaled \$33,508.4 in FY12, an 8.1% increase over FY11. Since FY08, tuition has gone up by 37.5%, which is more than any other major revenue source. Comparatively, state general fund support went up 18.1% and federal funds 1.3% over that same period of time.

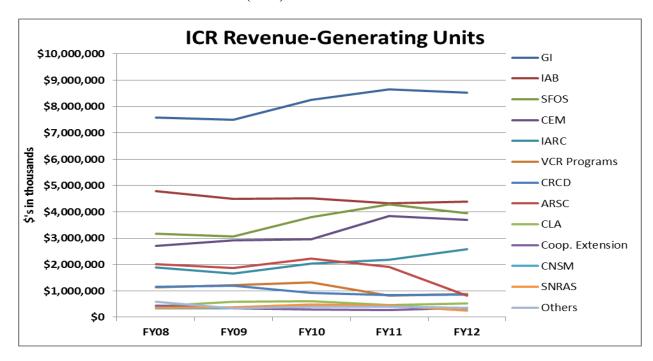

Annual tuition rate increases have been between 5% and 10% for the last decade. In FY12, tuition went up 5% for lower division course credits (100-200 level) and 10% for all other credits. Tuition increased 7% in FY13 for undergraduates (100-400 level) and 3% for graduates. The Board of Regents adopted a 2% across the board increase for FY14. Annual tuition rate increases are described at the beginning of this section.

UA INTRA-AGENCY TRANSFERS

UA Intra-Agency transfers include all internal charges for services provided by central service departments to other university departments. This includes services such as physical plant work orders, printing, and computer repairs, and certain administrative functions such as risk management and labor relations.

UA Intra Agency transfers have held relatively steady for the last five years, increasing by only 15.6% and one-year change from FY11 was only 2.1%. The largest increase in intra-agency transfers has come from unrestricted revenue from administrative charges applied to construction type projects used to cover departmental administrative costs – in FY08 these transfers totaled \$1,051.0 and in FY12 they totaled \$3,600.3, a 242.5% increase. There were no other increases or decreases in account transfers that were substantial over this period.

INDIRECT COST RECOVERY (ICR)

Indirect cost recovery revenues are generated primarily from federal research (restricted) grants and are used to offset administrative and support costs that cannot be efficiently tracked directly to grant programs. The top programmatic ICR revenue generators at UAF in FY12 were: the Geophysical Institute, Institute of Arctic Biology, School of Fisheries and Ocean Sciences, College of Engineering & Mines, and the International Arctic Research Center. Collectively, these units generated 84% of UAF's ICR in FY12. Additional ICR revenue was distributed to central support and Facilities Services.

Indirect Cost Recovery declined from \$28,838.6 in FY11 to \$27,538.0 in FY12 or -4.5%. The five-year trend since 2008 has been flat, increasing by only 3.5%. UAF must prepare for this trend to continue as the federal government continues to be pressured by taxpayers to slow the growth of government and in some cases cut expenditures. Unlike some federal programs, investments in research will likely continue. It will simply be a matter of at what level and in what areas of academic endeavor. Competition for federal research dollars will become more fierce between other research universities as the federal budget realities set in and the political dynamics unfold. UAF's challenge will be to focus on the strategic research investments that play to our strengths as an institution and are in alignment with our mission statement.

UAF's negotiated ICR rate, also known as the "facilities and administrative rate", on organized federal research grants is currently 49.5% of a given sponsored research grant. Indirect costs include services provided by the institution such as accounting and purchasing, utilities, space, and administrative costs. Many of these costs cannot be tied to a single, specific activity. The trend has been for there to be a growing list of expenditures for which the government prohibits or caps recovery of indirect costs.

A research-focused university makes research a top priority at the Chancellor's Cabinet level and within research units. One of the primary goals of the recently adopted 60/40 ICR distribution model adopted in July 2011 was that the new distribution methodology should encourage additional research activity. A second goal was for each unit generating ICR be allowed to make its own decisions on how best to utilize ICR funds. It will be important for the Vice Chancellor of Research to monitor the distribution and use of ICR funds in order to determine if these goals are being accomplished through the new methodology.

Facilities and Administrative costs are charged to account code 7811 – Indirect Costs. The table below indicates the total indirect costs charged by the top twelve generating units from FY08 through FY12. It's important to note that a portion of the ICR funds generated by UAF gets distributed to statewide (12% or \$3.3 million in FY12), so the actual ICR revenue received by UAF in FY12 is \$24.2 million.

Department – Indirect Costs Charged	FY08	FY09	FY10	FY11	FY12
Geophysical Institute	\$7,572,743	\$7,492,162	\$8,254,062	\$8,654,193	\$8,533,657

AUXILIARY RECEIPTS

Auxiliary funds are unrestricted current funds of enterprises which furnish services directly or indirectly to students, faculty or staff and which charge fees directly relating to, but not necessarily equal to, the costs of the services. Bookstores, parking services, housing and dining services are examples of auxiliary enterprises.

Revenues from auxiliary enterprises in FY12 (\$15,856.0) were up 1.1% over FY11 (\$15,691.9) revenues, but down 14.4% from FY08 (\$18,515.3). UAF outsourced the bookstore operations beginning in FY09 and by doing so, did not book the revenue and expenditures of bookstore operations beginning that same year, which is the primary reason for the 5-year drop in revenue. Housing revenue has increased by 13.6% since FY08, while Dining/Food Service revenue has increased 51%.

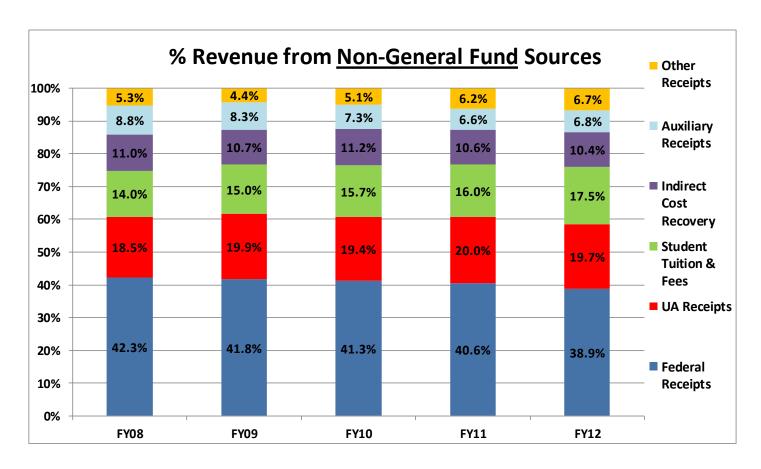

B. Five-year and one-year changes in general fund and non-general fund revenue by unit (School/College/Institute/Division) including significant trends, one-year changes and a brief explanation of the programmatic activity generating the trend/change.

See Appendix 1B1 – General Fund & Non General Fund Revenue by Unit 08-12

UAF REVENUE FROM NON-GENERAL FUND SOURCES (OVERVIEW) (Excluding ARRA and UA Intra-Agency Receipts)

UAF's total revenues rely more on state general fund appropriations than on any other source. However, since FY08, UAF has become more reliant on non-state revenue sources. It is becoming increasingly importation for universities in today's higher education environment to diversify its revenue base and not be overly reliant on one or two revenue streams, especially

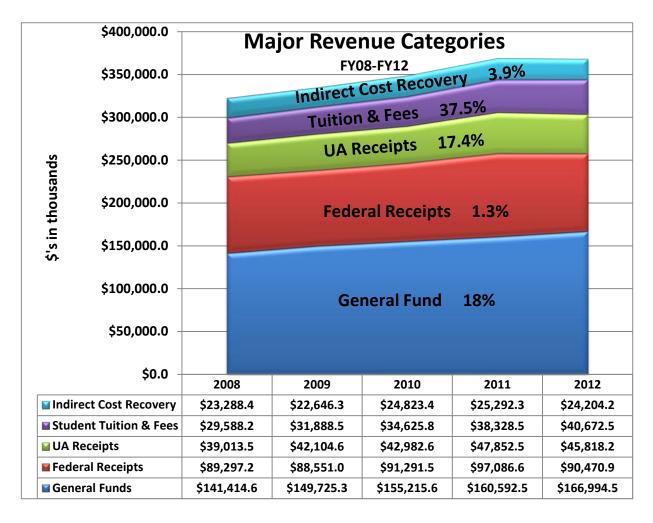

federal or state appropriations. It's for this reason that non-general fund revenue is closely monitored and reported on. 35.7% of UAF's total revenue (excluding UA Intra-Agency receipts) comes from general fund state appropriations; the rest comes from a mix of federal, UA receipts, tuition & fees, indirect cost recovery, auxiliary and other receipts. As a percentage of total revenue this is down from 40.1% in 2008. Revenue from non-general fund sources decreased in FY12 by 2.7%, due primarily to the reduction in federal funds for the Arctic Region Super Computing Center and a one-time FY11 risk-adjustment payment.

Revenue Source	FY08	FY09	FY10	FY11	FY12	1-year Change	5-year Change
Federal Receipts	\$89,297.2	\$88,551.0	\$91,291.5	\$97,086.6	\$90,470.9	-6.8%	1.3%
UA Receipts	\$39,013.5	\$42,104.6	\$42,982.6	\$47,852.5	\$45,818.2	-4.3%	17.4%
Student Tuition & Fees	\$29,588.2	\$31,888.5	\$34,625.8	\$38,328.5	\$40,672.5	6.1%	37.5%
Indirect Cost Recovery	\$23,288.4	\$22,646.3	\$24,823.4	\$25,292.3	\$24,204.2	-4.3%	3.9%
Auxiliary Receipts	\$18,515.3	\$17,544.6	\$16,066.5	\$15,691.9	\$15,856.0	1.0%	-14.4%
Other Receipts	\$11,273.4	\$9,313.9	\$11,366.4	\$14,714.6	\$15,582.5	5.9%	38.2%
Sub-Total	\$210,976.0	\$212,048.8	\$221,156.3	\$238,966.4	\$232,604.4	-2.7%	10.3%

MAJOR REVENUE CATEGORIES

The major revenue categories to UAF are 1) state general funds, 2) federal grants, 3) UA receipts, 4) tuition and fee revenue, and 5) indirect cost recovery. The chart describes the 5-year nominal percentage increases in each of the revenue categories and the section below provides further analysis on each revenue stream.

University leadership has direct and sometimes indirect influence over the level of funding received from each stream of revenue. However, the level of influence campus leadership has varies among each category. For example, the degree to which a university successfully generates additional federal research grants is highly dependent on several factors outside a university's sphere of influence including: the national political climate, congressional delegation seniority and influence, and the national and global economy. There are other ways a Chancellor can influence the likelihood of successfully obtaining federal research grants, for example, by providing the required level of institutional match investment to high priority federal research proposals.

C. Five-year trend and one-year changes in general fund/state appropriation authorized budget and actuals by allocation with explanation of the changes in actuals and the differences between authorized budget and actuals.

```
See Appendix 1C1 – Revenue by Allocation (Campus)
See Appendix 1C2 – Revenue by Allocation (Campus Detail)
```

GENERAL FUND BUDGETS BY ALLOCATION

The single appropriation structure under which the university had been organized for many years was replaced by the legislature with a multiple appropriation structure in FY09. The same structure was in place for FY12 and is expected to be in place for the foreseeable future. The university will continue to operate under the seven appropriation structure (UA Systemwide budget reductions/additions, Statewide programs and services, the Small Business Development Center, UA-Anchorage, UA-Southeast, UA-Fairbanks, and UA-Community Campuses). Within each appropriation, there are allocations. For UAF and the community campuses, there are ten allocations:

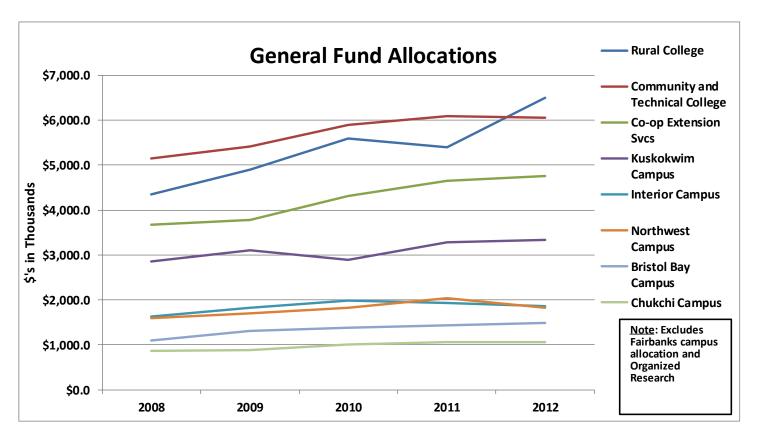

University of Alaska Fairbanks MAU (Appropriation)

- Fairbanks Campus (Allocation)
- Fairbanks Organized Research (Allocation)

UA Community Campuses (Appropriation)

- Cooperative Extension Service (Allocation)
- Bristol Bay Campus (Allocation)
- Chukchi Campus (Allocation)
- Interior-Aleutians Campus (Allocation)
- Kuskokwim Campus (Allocation)
- Northwest Campus (Allocation)
- College of Rural and Community Development (Allocation)
- UAF Community and Technical College (Allocation)

The legal affect of this structure is that transactions between appropriations are not allowed, unless a reimbursable services agreement (RSA) is approved or an exemption has been granted by the Alaska State Office of Management and Budget. Budget controls are established at the allocation level, but adjustments can be made between those allocations with the concurrence of the Office of the Governor through the revised program process.

State general fund support has increased just over 18% since FY08. The 1-year and 5-year changes in funding levels for each allocation are described in the table below.

Allocation	2008	2009	2010	2011	2012	1 Year Change	5 Year Change
Rural College	\$4,339.0	\$4,894.3	\$5,593.0	\$5,399.0	\$6,505.9	20.50%	49.94%
Community and Technical College	\$5,147.5	\$5,405.6	\$5,885.6	\$6,089.5	\$6,052.7	-0.61%	17.58%
Co-op Extension Svcs	\$3,679.8	\$3,778.5	\$4,308.4	\$4,644.2	\$4,756.8	2.42%	29.27%
Kuskokwim Campus	\$2,846.6	\$3,111.3	\$2,895.5	\$3,273.4	\$3,325.1	1.58%	16.81%
Interior Campus	\$1,620.0	\$1,826.2	\$1,977.8	\$1,926.4	\$1,850.9	-3.92%	14.25%
Northwest Campus	\$1,586.3	\$1,696.8	\$1,818.8	\$2,037.8	\$1,816.1	-10.88%	14.49%
Bristol Bay Campus	\$1,100.1	\$1,302.5	\$1,372.2	\$1,432.3	\$1,484.1	3.62%	34.91%
Chukchi Campus	\$856.8	\$882.8	\$1,004.9	\$1,050.1	\$1,067.0	1.61%	24.52%
Organized Research	\$19,701.5	\$20,772.1	\$22,580.1	\$22,722.3	\$23,578.4	3.77%	19.68%
Fairbanks Campus	\$100,537.1	\$106,055.2	\$107,779.4	\$112,017.6	\$116,557.7	4.05%	15.93%
Grand Total	\$141,414.6	\$149,725.3	\$155,215.6	\$160,592.5	\$166,994.5	3.99%	18.09%

The schedule reflects the general fund increments, including one-time funding for utility supplementals and high priority programs, provided by the Legislature over the past six years. The annual general fund increases have ranged between a high of 6.5% in FY09 and a low of 2.5% in FY12. The majority of incremental general funds received from the State are dedicated

to covering salary and benefits and other fixed cost increases. Funding amounts for high priority programs vary from year to year based on Legislative priorities.

It is important to note that the Legislature funds approximately half of our compensation and most new facility operating costs. The university is expected to cover the other half of compensation cost increases and other costs with university-generated revenues (tuition, indirect cost recovery, etc.). The Statewide Yellowbooks FY08 through FY12; FY13 Statewide Distribution Worksheet are sources for this information.

Notes:

- (1) General Funds include GF, GF-Match and TVEP; does **NOT** include one-time suplemental funding "trigger" for utilities.
- (2) Other Funding Changes includes items such as program transfers from other UA appropriations such as Alaska Air National Guard waivers, reversal of one-time initiatives and other adjustments.

D. Five-year trends and one-year changes in expenditures by NCHEMS and Fund Type for the MAU and campus level noting significant changes (see Appendices 1.D.1-1.D.3).

See Appendix 1D1 – Expenditures by NCHEMS 08-12
See Appendix 1D2 – Expenditures by Allocation and NCHEMS 08-12
See Appendix 1D3 – Expenditures by NCHEMS and Fund 08-12

The most significant change in expenditures by NCHEMS (National Center for Higher Education Management Systems) category is the uptick in expenditures captured in the Public Service category. The reason Public Service increased by 75% since last year (and 340% since FY08) is because ARRA stimulus fund expenditures are included in the data. This includes \$1,480.9 in FY10, \$27,097.0 in FY11, and \$61,569.3 in FY12. It is expected that expenditures by NCHEMS will normalize to pre-ARRA levels in FY13 and beyond. See appendix 1.D.1 for additional details on expenditures by NCHEMS.

E. Five-year trend and one-year changes in expenditures by major account code and fund for the MAU and campus level noting significant changes, noting MAU and campus authorized budget vs. year-end actuals by major account code and explain variances that exceed 3%.

See Appendix 1E1 – Expenditures by Account Code 08-12

See Appendix 1E2 – Expenditures by Allocation and Major Account Code 08-12

See Appendix 1E3 – Expenditures by Fund and Major Account Code 08-12

Section 2. Revenue Projections

A. Projections for University Receipts, State RSAs, Federal Receipts, Indirect Cost Recovery and Tuition for FY13 and FY14, in context of UAF FY12-FY17 targets and goals for University Generated Revenue, including areas of significant change.

FY13 AND FY14 REVENUE PROJECTIONS

		UAF - Rev	enue Summary	7

Other Funds Subtotal	\$126,354.7	\$134,972.8	6.8%	\$132,996.3	-1.5%	\$136,516.6	2.6%
Grand Total - Operating	\$378,123.5	\$428,516.6	13.3%	\$431,310.3	0.7%	\$442,662.3	2.6%

Consistent with previous discussions regarding the federal research funding climate, and future tuition rates and enrollment projections, UAF is projecting only slight increases (.7% and 2.6%) in total operating revenues for FY13 and FY14 respectively.

State General fund increases are anticipated to remain within the 2% and 3% range over the next two fiscal years.

Due to a reduction in student credit hours offsetting tuition rate increases, FY13 Tuition and Fee revenue is conservatively projected to be only .3% over FY12. The tuition and fee projections may trend upwards if we see a higher than anticipated enrollments for the Spring semester. A tuition rate increase of 2% is expected for FY14 and a modest enrollment increase for a net tuition increase of \$1.2 or 3% over FY13.

Federally funded research is expected to slightly decrease in FY13 as the final ARRA (stimulus) funded projects are completed. In FY14, federal research funding is projected to increase by 3% due to new collaborative research focused on energy, oil spill response, the UA Fisheries, Seafood, Maritime Initiative (FSMI) and research associated with the arctic region research vessel Sikuliaq. Additionally, UAF is monitoring Federal sequestration efforts (if applicable) as changes at the Federal level may impact research or agency related funds (awarded or new).

State funded research is expected to increase 3% as UAF focuses on research and development to build and sustain Alaska's economic growth. This increase does not include state funding research that is appropriated through the capital budget process.

UAF has put forth nearly \$12M in capital research requests in FY14 focused on Alaska-specific applied and commercialized research. If these requests for Alaska-specific research are successful, this may contribute to new or increased State partnerships with UAF that will in turn bolster the state economy and research base.

Section 3. Auxiliary and Recharge Schedule

A. Significant changes, areas of concerns, and trends of lowering fund balances.

AUXILIARIES

UAF's two largest auxiliaries, Residence Life and Dining Services, made significant investments in new facilities during FY12. Residence Life started with a \$1.0 million transfer to fund construction of the first phase of the Sustainable Village. An additional \$300K is anticipated in FY13 to complete full funding. Residence Life also contributed \$954K toward development costs associated with the P3 dining facility. Combined with a net operating result of nearly \$1.4 million, these transfers resulted in a \$590K reduction in the auxiliary's fund balance, which closed the year at \$2.6M. Dining Services also transferred funding to the P3 dining facility development costs, contributing nearly \$580K. Combined with a net operating result of \$504K, this transfer resulted in a decrease of \$76K to the auxiliary's fund balance, ending the year at a balance of \$315K.

Both Residence Life and Dining Services will continue to provide funding to cover development costs for the P3 dining facilities and will contribute an anticipated \$1.5M per year to cover the anticipated lease payments once the facility comes online in FY15.

	R	esidence Life	Dining Services	Total
FY12		-		
Beg Fund Balance	\$	3,199.7	\$ 390.6	\$ 3,590.3
Revenue		7,637.4	4,161.1	11,798.5
Expenditures		6,272.8	3,657.6	9,930.4
Net Operations	\$	1,364.6	\$ 503.5	\$ 1,868.1
Transfers		1,954.3	579.4	2,533.7
End Fund Balance	\$	2,610.0	\$ 314.7	\$ 2,924.7

Several of the auxiliary operations experienced significant fund balance declines during FY12. The Bookstore was one of these, suffering a \$107K decrease in fund balance due to a timing issue with an inventory write-off scheduled for FY11 that rolled over into FY12. This decrease landed the auxiliary's fund balance in deficit \$13K. Without the impact of the write-off the Bookstore would have netted about \$40K, and with the bookstore operation currently outsourced there should fewer timing issues, and the negative fund balance should be eliminated in FY13.

Parking Services started FY12 with a negative \$319K fund balance. For the fiscal year net operating expenditures exceeded revenues by \$188K, further depressing the fund balance to negative \$507K. Inflationary pressures on costs continue to push up expenditures for snow removal, electricity, and shuttle operations while revenue rates have remained fairly flat. The campus administration is reviewing these issues and others in order to place the auxiliary on a more sustainable course.

The CRCD Bookstore experienced an anomaly in FY12 with operating expenditures exceeding revenues by \$663K. This result wiped out a \$336K fund balance and ended the year with a negative \$327K fund balance. The CourseWorks bookstore inventory system and inventory accounting practices appear to be the basis for a very significant portion of the loss and are currently under review by the CRCD administration.

UA PRESS

The University of Alaska Press was established in 1967 and is a nonprofit scholarly publisher and distributor of books about Alaska and the circumpolar regions. Although physically located at the University of Alaska Fairbanks campus, the Press represents the entire University of Alaska—its three main universities (UAA, UAF, and UAS) as well as their satellite campuses—and by extension the entire state of Alaska. The UA Press is currently subsidized by a UA Statewide BP allocation as well as the UA Natural Resource funds and UAF central funds.

The UA Press is the only book publisher operating in Alaska that focuses on scholarly and educational books and e-books. Publications cover an expanding range of subject areas for readers of all ages, including politics and history, Alaska Native languages and cultures, and science and natural history. Currently, revenue earned from the sale of 30,000 books per year is not sufficient to maintain the present rate of publications (approximately 20 books per year).

For the past six years, UA Press has received an increment of \$200K per year from BP funds allocated by UA Statewide. The funds have been used largely to offset production costs of new books. Prior to funding from statewide, the Press published only a small number of books each year. While the quality of publications was generally high, the Press did not function as a modern publishing house with respect to budgeting, contracts, scheduling, tracking sales and royalties, and other best practices. In the past six years the Press has undergone dramatic changes, which have resulted in a substantial increase in recognition of the Press and our books, which in turn reflects positively on the University of Alaska

The ability to continue to produce outstanding books that preserve the history, cultures, science, and literature of Alaska and the north is dependent on funds to produce books. To better understand these costs a summary of production costs is listed below:

UA Press Book Production Costs (exclusive of staff salaries)

FY09	\$307,000 (incl. \$82K in subsidies & \$25K annual avg. cost of reprints)
FY10	\$202,000 (incl. \$25K annual avg. cost of reprints)
FY11	\$238,000 (incl. \$70,000 in subsidies & \$25K annual avg. cost of reprints)

Total Average Annual Costs for Book Production = \$250,000/Yr.

A minimal marketing budget for the Press (based on expenditures in FY11) includes approximately \$15K for catalogs and other print materials, \$20K for travel to shows and exhibits, and \$15K for print ads (average of \$750 per title) for a total of approximately \$50K.

The total for production and marketing based on the data above is about \$300K per year. The Press receives \$80K from the Natural Resources Fund (historically linked to sale of land willed to the Press) and \$200K per year from BP Funds. The UA Press is currently seeking a long term solution via State support and appropriate subsidies from UA and/or UAF.

UA PRESS	FY08	FY09	FY10	FY11	FY12
Beg Fund Balance	\$ (59.5)	\$ (82.6)	\$ 287.4	\$ 64.9	\$ 152.6
Revenue	\$ 365.7	\$ 422.8	\$ 395.5	\$ 392.6	\$ 367.6
Expenditures	\$ 569.0	\$ 710.4	\$ 790.6	\$ 1,095.9	\$ 664.0
Net Operations	\$ (203.3)	\$ (287.6)	\$ (395.1)	\$ (703.3)	\$ (296.4)
Transfers	\$ (180.3)	\$ (657.6)	\$ (172.7)	\$ (790.9)	\$ (227.5)
End Fund Balance	\$ (82.6)	\$ 287.4	\$ 64.9	\$ 152.6	\$ 83.7
Inventory	\$ (518.7)	\$ (587.0)	\$ (679.6)	\$ (268.5)	\$ (274.8)

RECHARGE CENTERS

There were 26 active recharge centers in FY12, of which 21 ended the year with positive fund balances versus five with negative fund balances. Overall the collective recharge centers increased total fund balances by \$896K, with the biggest mover being the Division of Design & Construction (DD&C), which went from a negative fund balance of \$230K to a closing fund balance of \$1.6M.

Other recharge centers with significant fund balances include the Vehicle & Equipment Pool with \$578K, Physical Plant Maintenance & Operations with \$683K, and Utilities with \$889K. Operations with significant negative fund balances include Printing Services and the Copy Pool, negative \$519K and negative \$88K, respectively.

The large increase in the fund balance for DD&C was driven by the surge in construction activity on the UAF Fairbanks campus. Major projects include construction of the Life Sciences facility and numerous deferred maintenance projects funded through both state capital funds and university revenue bonds. This trend is anticipated to continue for the next several years with additional deferred maintenance funding and construction of the new engineering facility. This is the first time in 7 years that DD&C has earned a positive fund balance.

The Printing Services and Copy Pool recharge operations are working to reduce expenditures and increase revenue opportunities. The combined operations essentially broke even in FY12, and a newly vacated position being left unfilled is expected to provide \$60K in savings for FY13.

	rinting ervices	Co	py Pool	Total
FY12				
Beg Fund Balance	\$ (528.6)	\$	(74.8)	\$ (603.4)
Revenue	\$ 771.9	\$	319.5	\$ 1,091.4
Expenditures	\$ 761.5	\$	332.2	\$ 1,093.7
Net Operations	\$ 10.4	\$	(12.7)	\$ (2.3)
Transfers	\$ 0.4			\$ 0.4
End Fund Balance	\$ (518.6)	\$	(87.5)	\$ (606.1)

The Polar Express "recharge" continues to require a subsidy and is being revamped with security access moving to Facilities and other parts of the operation relocated with the UAF Business Office.

FY12 was the first year for consolidated operations of the IAB Large Animal Research Station and Animal Quarters recharge centers with the Veterinary Services recharge centers. The new combined recharge center operates under the direction of the Center for Research Services and is expected to provide for the improved health and welfare of the animals while enhancing resource utilization and the quality of animal research.

B. Trend in housing capacity by building and occupancy

HOUSING

Single student housing started the 2012 fall semester at approximately 100% occupancy. As of October 2012, the occupancy had fallen to 95%, with most respondents indicating that they were leaving campus housing to live off-campus. Anecdotal evidence suggests that many of those leaving campus housing were returning to area homes and the total cost including the dining plans was a significant factor in this decision.

² Not all units may be available due to maintenance down time.

³ Beginning FY02, Harwood Hall (36 units) transferred to academic use.

⁴ Harwood returned to Res Life FY04

⁵ Garden Apt 2 bedroom redesignated from single family (capacity 12) to shared graduate (capacity 24) in 2007

⁶ All Occupancy Data from 2006-2012 is from Occupancy Reports run annually from October 29-November 15.

⁷ As of Fall 2012, the Office of Residence Life has changed the format of the spreadsheet that we use to ascertain Family Occupancy numbers. The Office of Residence Life no longer designates specific facilities to family or faculty, there is simply a total capacity of units available.

Section 4. Resource Reinvestment & Reallocation

A. Five-year trend and one-year changes of UFB by allocation and fund including units that contribute significantly to the UFB amount.

Grand Total	16,671,564	4,063,595	9,998,421	7,610,123	8,682,041

The distribution numbers represent the total UAF UFB received at the unit level throughout the year, regardless of the source. Any amounts in Central Support represent distributions from other units, or amounts that were centrally held for various purposes. Only unrestricted UFB (F1) is available for utilization by management.

Recharge Service Centers (F7) are expected to operate with a positive fund balance as well. The appropriate level of UFB is determined by the size and operating environment of the entity and the overall finances of UAF. Likewise, leasing operations (FL & FE) are expected to maintain a similar level of UFB for adequate reserves to replace equipment and the ability to handle future scheduled lease payments.

UAF "UFB Principles" exist as a set of guidelines for each unit. A target range between 2-4% based on unit specifics is generally recommended. UAF institutional targets are generally \$6-8M in total, with each unit feeding into this projection. The FY13 UFB, based on the September Management report, is currently lower than the expected range, which indicates a need to discuss projections with UAF units. This report will become more accurate as units clarify their tuition and other revenue projections in addition to expending their existing budgets as the year progresses.

Fund 1 unit balances are listed below, by Cabinet or Vice Chancellor level. Full unit details are included in the Appendix.

See Appendix 4A1 – UAF Fund 1 UFB by Unit (Detail) FY08-FY12 [Not Available Online]

	<u>Unreser</u>	ved Fund Baland	ce - F1

UAF Central Managed Projects	8,835,939	703,986	1,453,341	1,247,150	2,672,994
Grand Total	16,671,564	4,063,595	9,998,421	7,610,123	8,682,041

In FY13, a revision of current UAF UFB Principles will be explored. Units have expressed a desire to manage higher balances from fiscal year to fiscal year in order to maintain operations or plan for large projects. However, if units expect less of a UFB than in previous years, the need for this may be reduced.

B. FY12 and FY13 internal reinvestment items are as follows, including the FY13 reallocation memo for FY12 and FY13 items. Additionally, Provost Henrichs does an Academic Unit reallocation within all areas reporting to her office. The Provost's FY13 reallocation memo is also included.

See Appendix 4B1 – Chancellor's Cabinet FY12 PBB Allocation Decisions

See Appendix 4B2 – FY13 Strategic Reinvestment Allocations

See Appendix 4B3 – Provost Henrichs Reallocation and UFB Distribution

The University of Alaska Fairbanks demonstrated excellent fiscal stewardship for the fiscal year ending June 30, 2012. State general fund support increased by 2.2% between FY11-12 and another 3.8% between FY12-13. Overall, earned revenue went up. UAF is poised for growth in a few identified strategic areas in FY13 and beyond.

UAF was funded via the State of Alaska in the following program areas in FY13 (\$ State Funds/\$ Receipt Authority):

- Honors Program: \$100K
- Advising Students for Performance Success: \$600K/\$273K
- Support for Increased Engineering Retention & Graduation: \$400K/\$400K
- Vet Med Program: \$200K/\$200K
- Early Childhood Program Support: \$144K
- Indigenous Students PhD & Alaska Native Knowledge Network: \$250K/\$46.6
- Resilience and Climate Adaptations Program (RAP) in Graduate Studies: \$300K/\$472.6K
- Sikuliaq On-Shore Support (only receipt authority): \$547.2
- FFA and 4-H: \$250K/\$750K
- Alaska Air National Guard Scholarship Program: \$80K

UAF was funded via the State of Alaska in the following capital and facility areas in FY13:

- UAF Engineering Facility: \$46.3M
- Ocean Acidification Research: \$2.7M
- Unmanned Aerial Vehicle R&D: \$5M
- Georgeson Botanical Garden: \$100K
- Kuskokwim Campus R&R \$450K

UA's FY14 budget request approved by the UA Board of Regents and submitted to the Governor includes the following programmatic requests for UAF:

- Mandatory Comprehensive Student Advising (CRCD): \$302.4/\$14.0
- UAF STEM Capacity in General Chemistry: \$200.0/\$53.0
- E-Learning (Instructional Design and Equipment): \$250.0/\$100.0
- Alaska Young Fisherman's Summit: \$43.9/\$5.0
- Alaska Seafood Processors Leadership Institute (ASPLI): \$56.5/\$75.0
- UAF Nursing Program at Bristol Bay: \$55.0/\$55.0
- Alaska Veterinary Medicine 2+2 Program w/Colorado State: \$200.0/\$243.0
- UAF/UAA Joint Doctoral Program in Psychology: \$300.0
- Mineral Research and Development Initiative: \$100.0/\$90.0
- Workforce Development in Construction Trades and Tribal Management: \$140.0/\$90.0

- Response to Statewide Business Pressure for Accountants (Controllership): \$195.0/\$30.0
- Sustain the UA Press: \$200.0
- Intellectual Property for Business Development: \$200.0/\$50.0
- Ship Time for Alaska Specific Research (Sikuliaq): \$500.0
- High Performance Computing: \$100.0/\$100.0

C. Net amount of contingency/reallocation invested in UAF Fairbanks Campus and Community Campuses each year, FY08 to FY12

See Appendix 4C1 – UAF PBB & Strategic Reinvestment History

The challenging federal and state fiscal climates will make management of UAF's internal resources all the more important. UAF reallocated internal resources heavily into support for research initiatives for FY13. The most recent strategic reinvestment allocations include funding for undergraduate research, the Honors Program, the Center for Alaska Native Health and Research, English as a Second Language program, Transfer/International student recruitment, and Branding & Marketing. Numerous internal reallocation requests were considered. Factors that contribute to funding are the requests' alignment with UAF's strategic plan, accreditation core themes, and the UA Strategic Directions Initiative (SDI).

The UAF Office of Management and Budget (OMB) was also established in 2012. OMB will focus on budget analysis and planning, process improvement and efficiencies, and financial projections and forecasting. OMB will also play a significant supporting role in future strategic budgeting and reallocation processes.

D. Cost Savings & Efficiencies Report

See Appendix 4D1 – UAF FY12 Cost Savings & Efficiencies Report

This report is done annually and is submitted to UA Statewide Offices each fall (August/September 2012). This report is a compilation of unit level and campus-wide efforts to find opportunities for cost savings/containment. UAF has maintained conservation and sustainability initiatives as a high priority, and is investing in process improvement efficiencies in FY12. UAF is actively finding ways to promote use of more and better data in decision-making, encouraging transparency and accountability in regard to resource allocation, and is making strides to improve reporting at all levels.

There are several key areas in which UAF can categorize its cost savings and efficiency efforts in FY12:

- Financial and Human Resource Efficiencies
- Utilities, Energy or Resource Conservation
- Outsource, Change in Service Model or Process Improvement

Understanding the fiscal climate and thoughtfully considering future plans, UAF is also making efforts to find innovative ways to generate new revenues to support its programmatic needs and optimize future growth.

Section 5. Facilities Snapshot

A. Construction in progress (projects over \$250K)

See Appendix 5A1 – UAF Construction in Progress

As of November 2012, UAF construction in progress totaled \$328M in total project costs, with \$189M expended or encumbered. Several large projects account for nearly two-thirds of the total, with the Life Sciences Research and Teaching Facility leading the way at \$108.7M. This facility is 70% complete and expected to be open for occupancy in Fall 2013.

A second new construction project, the UAF Engineering Facility, is on the list at \$50.2M, though total project costs when all funding is in place will be \$108.5M. Construction is scheduled to start in Spring 2013 and be completed in Spring 2015.

The third project on the list is the continuing Critical Electrical Distribution Renewal project, with Phase 2 adding \$26.3M to bring the total project cost to \$52.6M. Many of the other listed projects are deferred maintenance efforts funded in part by the 2011 Series Q revenue bond issue. This bond issue provided partial funding for the Life Sciences facility and added \$22.5 million for deferred maintenance projects. This is in addition to UAF's share of the Governor's \$37.5M of annual deferred maintenance funding provided over the past several years.

Other significant projects include \$2.9M for renovations of the newly-acquired CTC Aviation Hangar at the Fairbanks International Airport, \$2.5M for schematic design and project development costs associated with UAF Dining and student housing facilities, and approximately \$1.2M for the recently completed Sustainable Village.

- B. Lease, Joint Use, Debt and Rental
 - Percentage of total UAF utilized space that is leased.
 - Actions planned for those leases that expire in the next 24 months.
 - Listing by building and UAF owned space leased to a third party.
 - *Percentage of total UAF owned space is leased to a third party.*
 - Actions planned for these leases that expire in the next 24 months and new efforts planned to lease out additional space.
 - List of on-UA owned and non-UA occupied facilities/space that are situated on UAF educational property.

See Appendix 5B1 – Lease, Joint Use, Debt, and Rental (2 pages)

UAF leased space accounts for 4.5% of the total MAU square footage, totaling 152 thousand of the MAU's 3.4 million square feet. Annual lease payments total over \$2.5M, with nearly \$1.8M expended for leases in the Fairbanks area.

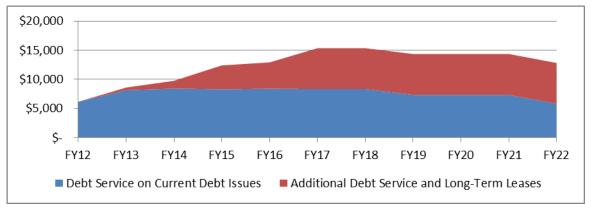

The largest single lease outside the Fairbanks area is the \$265K paid annually for the Cooperative Extension Service (CES) Kaloa Building in Anchorage. Significant leases within the Fairbanks area include \$352K for the CTC Hutchison Institute of Technology, \$286K for eLearning & Distance Education and the CRCD Bookstore operations, \$205K for the Scenarios Network for Alaska & Arctic Planning (SNAP) and the Office of Intellectual Property & Commercialization, \$181K for the Division of Design & Construction offices on University Avenue, and \$174K for the CTC Process Technology & Environmental Safety programs at the Fairbanks Pipeline Training Center.

The purchase of a hangar at the Fairbanks International Airport is allowing for the termination of leased space currently occupied by the CTC Automotive Technology program. That program will move into space in Hutchison Center that is being vacated by the CTC Aviation Maintenance programs when they move into the renovated hangar facility. The savings in lease expenditures, \$197K annually, will be applied to debt service associated with the hangar purchase and renovations.

UAF owned space leased to third parties totals \$1.7M in annual lease revenues. Most of these revenues are associated with the Syun-Ichi Akasofu Building, with the JAXA-JAMSTEC lease bringing in \$1.2M and the National Weather Service lease bringing in \$294K. The lease arrangement made it possible to fund the construction of the facility in 1998. The most significant lease arrangement after those is the State of Alaska's \$75K annual payment for parking spaces in the Barnette Parking Garage.

UAF does have special arrangements with other entities to share non-UA owned facilities located on UA property. These include the Cold Climate Housing Research Center and the State of Alaska Virology Lab.

C. Annual listing of all debt payments (by building/project/vehicles/equipment) and the term of the debt (FY13 to FY23). This includes new debt payments projected through FY23 based on UAF's master plan and projects in the six-year capital plan.

See Appendix 5C1 – UAF Debt Service Schedule

CURRENT DEBT

In FY12 the University issued Series R revenue bonds to refinance Series K, Series L, and Series M debt. Series K and L were primarily issued to fund construction of the West Ridge Research Building, while Series M funded projects at Hutchison Center and for the UAF Power Plant chiller. Average annual savings to UAF falls just shy of \$150K, with total savings through FY31 of \$2.5M. Total annual debt service for UAF increases to \$8.4M in FY14 and is expected to eventually fall to \$7.3M by FY23.

ANTICIPATED DEBT

The CTC Aviation Program hangar is currently financed through an internal financing agreement between UAF and Statewide, but is planned to be a part of the next revenue bond issue with a total project cost of \$2.5M. This next revenue bond issue will also include funding for the second phase of debt-financed deferred maintenance projects at UAF, with total project funding of \$11.5M

Other projects with anticipated debt financing include the Energy Technology Facility, with \$10.7M debt financed of total project costs of \$24.9M, and the Engineering Building, with \$10.0M debt financed of total project costs of \$118.9M.

LONG-TERM LEASES

UAF is continuing development on a new dining facility planned as an addition to the west side of Wood Center. This is UAF's first experience with the public-private partnership (P3) approach to project development and financing. UAF's financial commitment is limited to a 30 year lease agreement currently priced at \$1.45M annually.

The University is also continuing efforts to build the first new student housing on campus since the construction of the Student Apartment Complex in 1985. This is also anticipated to be a P3 development. For early planning purposes a placeholder amount of \$2.5M is estimated for annual lease payments. The actual amount will be dependent on details not yet determined, such as the number of beds, other facility and site issues, and any State or other funding.

D. FY14 Capital Snapshot

UA's FY14 Capital Budget request includes the following UAF-specific items:

- Annual requirement for Maintenance (Est. 62% of \$37,500.0): \$23,131.0
- Cogeneration Heating Plant Replacement Planning: \$22,000.0
- Engineering Building Completion: \$48,300.0/\$10,000.0
- Cold Climate Housing Research Center Sustainable Village Phase II: \$0.0/\$1,300.0

UAF FY14 Capital Research to Sustain Alaska's Economy (\$ State Funds/\$ Receipt Authority):

- Partnership to Develop Statewide Energy Solutions: \$5,500.0/\$3,000.0 (phased)
- Improving Arctic Oil Spill Response through Dedicated Science and Technology Center: \$1,500.0/\$2,000.0
- Enhance Base Maps for Alaska: \$1,900.0
- Research Alaska's Chinook Salmon Production & Decline: \$3.1M/\$6.2M

Section 6. Administrative Review & Process Improvement

A. UAF staffing changes from FY08 to FY12, including expected changes in FY13. This includes a discussion of administrative staff impact and models, noting best practices where applicable to major areas.

See Appendix 6A1 – UAF Authorized Positions FY08-FY13 [Not Available Online]

The UAF Office of Finance and Accounting has worked with each UAF department over the past several years to improve and formalize tracking of vacant faculty and staff positions in order to manage position vacancy. Vacancies are reviewed by management at various levels prior to initiating a recruitment to determine if resources should be reallocated. This is known as the Position Management process.

The intent of this process is to create a level of expectation and understanding within the UA System, as it relates to benefited positions, vacancy management, and the costs associated with staffing levels. This process allows for consistent standards in the budgeting, expenditure, recruitment, and reservation of positions across the system.

AUTHORIZED POSITIONS

UAF currently (FY13) has 2,639 authorized positions. All of these positions are recorded in Banner with a separate Position Control Number (PCN) and matching Authorization Number. Since the authorized position budgets, which are loaded as part of the Continuation Budget process on July 1st of every year, are the basis for UA's annual position increase requests from the State of Alaska, standardized and accurate management of these positions is crucial.

The goal is to neither understate nor overstate UA's personnel budget needs and how those needs change from year to year. In order to accurately convey this information, every benefited position with a total intended duration of more than twelve months is activated as an authorized position. Since most benefited positions have a duration of more than twelve months, authorized positions constitute the vast majority of benefited positions at UAF.

Overall, UAF authorized positions for FY13 are consistent with prior year position counts. In FY08, total authorized full-time and part-time position count was 2,608. In FY13, total authorized position count was 2,639 (an increase of 1.1%). UAF e-Learning and Distance Education was transferred out of the College of Rural and Community Development and brought under Fairbanks campus. The transfer resulted in a 30 position count reduction for CRCD and a 30 position gain for the Fairbanks campus. Other than the transfer of e-Learning, position counts were consistent across each unit and allocation between FY08 and FY13. UAF received 15 new positions associated with state funded programs in FY13.

As positions vacate, UAF continues to examine whether to re-fill or re-allocate resources to remain efficient. UAF Human Resources continues to identify and participate in process improvement efforts across Administrative Services. As process improvements are implemented, resources can be shifted to areas of greater need. UAF will be updating its analysis of administrative and support positions across the campus for FY12 in the Spring of 2013.

B. Major Process Improvement efforts and anticipated outcomes, including future areas of potential investment or improvement.

ORGANIZATIONAL CHANGES: ADMINISTRATIVE SERVICES AND RESEARCH UNITS

There was a demonstrated need for a review of the Administrative Services organizational structure in the Financial Services area in 2011. UAF's broad mission and new strategic direction called for a structure that allows for data driven allocation of resources that provides the greatest level of efficiency, effectiveness, transparency and accountability.

Effective spring 2012, the reporting lines to the Associate Vice Chancellor for Financial Services was reduced from six (6) to five (5). All organizational changes were FTE neutral.

Changes made to the new organizational structure were as follows:

- The Budget and Cost Records office was re-named the Office of Finance and Accounting (OFA) to better reflect activities taking place in this department.
- Accounts Payable functions were moved under OFA.
- The Travel Office was eliminated and responsibilities were transferred to an FTE currently in the OFA department. Existing efforts continue to be made to streamline and improve the travel activities at UAF.
- The Office of Management & Budget (OMB) was created to serve as a strategic resource for the VC for Administrative Services, the AVC for Financial Services and other directors and personnel. This office is responsible for UAF budget development, research and business analysis, reporting and data collection, and is home to institutional Process Improvement efforts.

To enable more efficient coordination of extensive climate studies, observations, and modeling analyses, UAF implemented an internal restructure of five research centers. The Scenarios Network for Alaska & Arctic Planning (SNAP), the Alaska Center for Climate Assessment & Policy (ACCAP), the Alaska Fire Science Consortium (AFSC), the Climate Science Center (CSC) and the Geographic Information Network of Alaska (GINA) were administratively shifted into the International Arctic Research Center (IARC).

Although no positions were eliminated in this reorganization, all units feel that internal efficiencies have been achieved due to implementation of structured operational procedures. In addition, other tangible benefits have been (and will be) realized by all units through sharing of expertise and facilities in research as well as in education and outreach. Common promotion of capabilities and research capacity will lead to more funding opportunities and increased diversity and stability for all entities.

PROCESS IMPROVEMENT EFFORTS

In FY12, UAF made significant progress in its review of highly-used workflow processes, in an effort to make efficiency improvements in several key areas.

UAF's administrative services process improvement initiative began as part of the Administrative and Support Review process that evolved from the 2010 Chancellor's Executive Leadership Workshop. One of the goals of the Administrative Support Review Committee was to identify common processes to streamline that would improve overall administrative effectiveness.

- UAF made efforts in FY12 to institutionalize campus-wide process improvement efforts by creating the UAF OMB. To date, two high-priority projects have moved forward, each with its own campus-wide project team. Six staff members have also gone through extensive training to become qualified process improvement facilitators and are guiding these two project teams, with more efforts on the horizon.
- Grant Award Set-Up and Employee (Pre) Recruitment are the two primary high-priority projects in motion. These projects have been phased to encourage realistic and achievable outcomes. An executive level steering committee has also been created, to assist in the event that policy, regulation and information system issues need to be addressed. Recommendations from these groups are expected by the end of the calendar year.
- Future projects for Process Improvement efforts include **Procurement and Travel** processing at UAF. These areas were identified as major areas of need by the Administrative and Support Review committee in 2011. Facilitators expect to form work teams invested in Procurement process improvement efforts in early 2013. Travel management is currently being addressed by Statewide work teams. UAF intends to assist where necessary to ensure significant improvements to the travel process (where there is UAF customer impact) are included

CLASSROOM UTILIZATION AND SPACE MANAGEMENT

Regarding future steps for greater efficiency management, UAF has regularly published classroom space utilization reports since FY03. The space utilization reports document hour-by-hour and day-by-day usage of centrally-assigned classroom space on the Fairbanks Campus in terms of both scheduling and occupancy. Work is underway to streamline and expand the utility of the space utilization reports. Data extraction methods have been streamlined in order to gain insight into which classrooms in terms of occupancy are most in demand and at which time of day.

The next step is to develop trend reporting by classroom size and time-of-day to give a sense of change in classroom utilization rates over time. Long-term project objectives include analysis the historic pairing of course sections with classroom sizes in an effort to seek out efficiencies in space assignment. UAF will also extend space utilization to other areas beyond the classroom, including administrative space.

Space at UAF is a commodity and has a value, although in most areas, there is no rent or cost associated (outside of Utilities costs). The value and cost of maintenance is especially apparent when facing increasing deferred maintenance needs. It is expected that UAF leadership will explore improved space management models that will sustain campus growth and better maintenance of existing space in the future.

ONLINE SOLUTIONS: FACILITIES SERVICES AND WEB-TIME ENTRY/GRANT EFFORT CERTIFICATION

UAF lead the UAF/UAA testing and implementation for AiM, the new work order system for Facilities Services, an upgrade from the Facility Focus system. This web-based system was designed to support supervisors and managers with better, more accurate information for scheduling work orders, planning tasks and compiling data on open projects, which should result in better service on the work orders submitted. This system also enables standard operating procedures and defined key performance indicators (KPIs) for management reporting and decision-making across the UA system.

Web Time Entry (WTE) and efforts for non-exempt staff have streamlined timesheet collection processes. Exempt staff transitions from paper/manual processes are expected by Spring of 2013. Semester-based effort certification for exempt staff, faculty, and researchers will result in savings and reduced administrative burden, when complete. Certifying effort fewer times per year will allow for more accurate reporting and fewer late adjustments.

Appendia

Notes: General funds receipts have gone down as a percentage of total revenue, (37.1% in 2008 to 33.3% in 2012) but only as a result of ARRA stimulus funding that has inflated UAF total funds for the past two years. After subtracting out stimulus funds, general funds as a percentage of UAF's total budget actually goes up from 37.1% in 2008, to 38.6% in 2012. The percentage of the total budget funded by state general fund appropriations will go up in FY13 because of the absence of stimulus funds and flat to moderate growth in other revenues including tuition revenue and indirect cost recovery.

General Fund Revenue by Source

1.A.2

							% Change in % Change in	% Change in
Revenue Source	Revenue Title	2008	2009	2010	2011	2012	FY11-12	FY08-12

Note: Tuition revenue increased twice as since 2008 as general fund revenue did. Over that period, tuition rates went up 7% in FY08, 5% in FY09, and FY10, 4% for lower-division courses and 10% for all other courses in FY12. In FY13 tuition went up 7% for undergraduates and 3% for graduates. FY14 tuition rates will go up 2% across the board. Because enrollment is expected to level out for the next few semesters and the tuition rate will only go up the Board of Regents required minimum of 2% in FY14, it is expected that tuition revenue will flatten out or increase moderately.

expenditures awarded to UAF and spent on the construction of the research vessel Sikuliaq were captured in the Public Service NCHEMS category and is hence the primary reason that category increased by 75% since FY11 and 340% since FY08. Sikuliaq expenditures included \$1,480.9 in FY10, <u>Note</u>: Unlike the annual statewide Yellowbook, these figures include both operating <u>and</u> capital-funded expenditures (FA, FR). Federal \$27,097.0 in FY11, and \$61,569.3 in FY12. Capital expenditures by NCHEMS category are illistrated in the table below.

Capital-Only	2008	5005	2010	2011	2012
Institional Support			\$7.5	\$6.3

RE

FY12 Performance Based Budgeting (PBB) Allocations

This memo confirms the cabinet's FY12 PBB allocation decisions.

The FY12 PBB reallocation funding totals \$1.8 million accumulated from each vice chancellor area. In addition to the FY12 PBB reallocation, remaining FY11 PBB balances used on a one-time basis in FY11 are included. The table below shows source of the FY12 PBB pool.

FY12 PBB Funding Source:

Vice Chancellor Area Pull Back:	GF Base	Reduction	% of GF Base
Chancellor	1,435.0	25.0	1.7%
OIT	3,629.0	25.0	0.7%
RCNE	19,821.0	200.0	1.0%
Provost	64,884.0	555.0	0.9%
Student	4,854.0	50.0	1.0%
Advancement	7,680.0	50.0	0.7%
Advancement (Lease)		30.0	
Admin & Facilities	14,838.0	200.0	1.3%
Admin & Facilities (Janitorial)		500.0	
Research	13,734.0	125.0	0.9%
	130,875.0	1,760.0	1.4%
Plus FY11 PBB Balance:		346.0	
	Total	\$2,106.0	

FY12 PBB funding will be distributed to the priority programs listed below. Some distributions are base allocations; others are one-time as shown in the list below. The cabinet distribution decision took the

Planning and Budget Committee recommendations into account; the distribution also addresses prior commitments, cabinet identified issues, and chancellor level priorities.

PBB Base Funding Allocations

\$ 81,000	Special Education (SOE) ¹
40,000	Veterinary Technician ¹
25,000	ARSA engineering ¹
100,000	INBRE Immunology Faculty Support ¹
500,000	High performance computing
40,000	Peace Corp Fellows
50,000	Veterinary Technician
50,000	IARC/North by 2020 support
50,000	IARC/CNSM Portion for IARC faculty T/TT
50,000	Honors
75,000	Indigenous PhD
30,000	OIT software costs
50,000	Development
200,000	Animal Care Reorganization

PBB One-Time Allocations

\$ 61,000	Raven Project
100,000	ARRA Grant Coordinator (OGCA)
150,000	INBRE Support
180,000	Intensive Advising (including Athletics advising) - Retention & Graduation
70,000	Transfer Student and International Student Recruiter
70,000	College of Liberal Arts ESL Program

PBB Allocations to CRCD

\$ 88,000	Early Childhood Program Support (FY12 one-time allocation)
2,900	Bristol Bay Campus student services position
13,700	Kuskokwim Campus student services position
25,000	Northwest Campus student services position
13,500	Chukchi Campus student services position
56,900	Community & Technical College additional advising

These allocations exceed the FY12 available funding by \$66,000, which will be covered on a one-time through FY12 central reserves. These allocations are restricted to the purpose for which they are designated. Unspent funds in these PBB distributions at FY12 year-end will revert into the central pool for future priorities. We will review actual spending in January 2012 and may re-allocate a portion of the projected unspent funds to other needs at that time.

Transfer of PBB funds to the receiving departments will be made as soon as the FY12 budget has been fully balanced and transfers are possible. We expect this to happen in September.

¹Assigned to prior year statewide-held PBB balance

FY13 Strategic Reinvestment Allocations

This memo provides a record of FY13 strategic investment decisions and updates the previous memo dated August 24, 2012 to include a base allocation of \$100K for CAHNR, which was previously overlooked. Additionally, this reduces the funding allocated for Equipment Match (Research) to \$100K with the same expectations on access. As detailed in the July 12, 2012 memo, the following mechanism was employed to build the pool of funds available for strategic reinvestment in FY13:

General strategic reinvestment pool:

MAU general reinvestment pool established through a withholding of 1% percent of all unrestricted revenue (unrestricted general fund, general fund match, tuition and ICR). This was accomplished through a differential withholding per unit (see below) and yielded approximately \$2.04M for reinvestment including \$365K for CRCD.

Gen	General Reinvestment Pool - All Unrestricted Revenues					
Unit	GF, Tuition, ICR	1%	Differential @ 1%			
Chancellor	1,446.5	14.5	28.9	2.0%		
OIT	4,769.7	47.7	66.8	1.4%		
RCNE	36,498.2	365.0	365.0	1.0%		
Provost	93,251.0	932.5	746.0	0.8%		
Student	12,013.2	120.1	156.2	1.3%		
Advancement	11,051.9	110.5	165.8	1.5%		
Admin & Facilities	18,810.2	188.1	301.0	1.6%		
Research	26,802.8	268.0	214.4	0.8%		
TOTAL (thousand's)	\$204,643.5	\$2,046.4	\$2,044.0			

Based on the table above, the amount available for reinvestment from the FY13 pool is \$1,679K for Fairbanks campus and \$365K for CRCD. Additionally, approximately \$600K was distributed on a one-time basis in FY12 to the Fairbanks campus and is available for base or one-time distributions in FY13. As such total funding available for Fairbanks campus reinvestment in FY13 is approximately \$2,279K.

Per the cabinet decisions, the FY13 general strategic reinvestment funds will be distributed for the priority programs listed below. Some distributions are base allocations; others are one-time as shown in the list below. The cabinet distribution decision took into consideration the recommendations of the Planning and Budget Committee, prior commitments, issues identified by the chancellor's cabinet and other chancellor level priorities.

Fairbanks Campus Investments - Base Funding Allocations

\$200,000	Undergrad Research & Scholarly Activities (URSA)
\$500,000	High Performance Computing
\$70,000	English as a Second Language (ESL) Program - CLA
\$40,000	Faculty Activity Reporting (Data180)
\$50,000	IARC North by 2020 (Nx2020)
\$50,000	IARC CNSM
\$50,000	Honors Program
\$130,000	Transfer/Int'l Student Recruitment
\$300,000	Branding/Marketing
\$22,000	NASA EPSCoR
\$150,000	Development - Alumni
\$135,000	Student Init. For Renewable Energy Now (Siren) Match
\$100,000	CAHNR
\$30,000	Western History Association Match (5 Yr)
\$1,827,000	

Fairbanks Campus Investments - One-time Funding Allocations

\$40,000	ARRA Coordinator	
\$150,000	INBRE	
\$190,000		

Issues to address after alternative mechanisms including the VCR FY12 UFB are exhausted:

\$65,000	Arctic Analysis & Security
\$50,000	Cooperative Institute for Alaska Research (CIFAR) Match
\$100,000	Equipment Match (Research)
\$215,000	

Chancellor Rogers
FY13 Strategic Reinvestment Allocations
Page Three

CRCD investments - Base Funding Allocations

\$32,700	Bristol Bay Campus - Development Office, Program Coordinator Positions
\$32,700	Chukchi Campus - Development Office, Program Coordinator Positions
	Interior Aleutians Campus - Development Officer, Program Coordinator
\$32,700	Positions
\$32,700	Kuskokwim Campus - Development Office, Program Coordinator Positions
\$32,700	Northwest Campus - Development Office and Program Coordinator Positions
\$32,700	RC - Development Office, Program Coordinator Positions
\$122,900	Community and Technical College Hangar Renovations (One-time), Utilities, etc.
\$45,900	E-Learning
\$365,000	Total

This leaves one major item, the projected Athletics shortfall for FY13, unresolved.

Please let me know if you have any questions or if I can be of further assistance.

To: Deans and Directors

From: Susan Henrichs Susan Fanchs

Subject: Reallocations and distribution of UFB

Date: October 17, 2012

This memo deals with four separate issues: the FY12 Uncommitted Fund Balance (UFB), the FY13 Strategic Reinvestment, the FY13 utility assessment, and the FY13 graduate student health insurance increase. Barring unforeseen events, this will be the only set of reallocations within my group of units for FY13. Several units that do not report to me are receiving this memo because of the graduate student health insurance cost increase. That is the only part of this memo that applies to those units.

The FY12 UFB for Provost's reporting units is shown in Table 1. Only a few of you ended the year with more UFB than allowed (either 2% or 4% depending on the proportion of restricted funding received by a particular unit). I am assessing 25% of the excess UFB from your units, but returning the rest to you. I haven't yet decided how the 25% assessment will be spent, but I will provide an accounting once that decision is made. The Provost's excess UFB (and more) is being allocated to the graduate student health insurance. Summer Sessions is not assessed for excess UFB because their operation spans fiscal years, i.e., tuition is collected in one FY and expended on instructor salaries in the next FY. Summer sessions distributes their "profits" to academic departments in the fall.

As I have discussed at meetings of the Provost's and Deans' Councils, the funds for the central Strategic Reallocation were taken from the budget of each Vice Chancellor at the beginning of the fiscal year, in my case leaving a deficit of about \$835,000. I am now moving to recover those funds from my reporting units. As has been the case for several years, Cooperative Extension Service will need to reallocate internally, because it is still part of the CRCD separate appropriation. However, I am reallocating 0.9% of FY12 unrestricted expenditures from the base general fund budget of each of the other units, as specified in Table 2. This mirrors the central assessment of my budget (0.8% of FY12 unrestricted expenditures) but is slightly greater for reasons explained in the next paragraph. The only exception to the 0.9% of unrestricted assessment rate is Summer Sessions. That is because Summer Sessions has only a \$100,000 allocation of GF and over \$2,000,000 in expenditures. Instead they were assessed at 1.6% of GF, which is the maximum percentage of GF taken from any of my other reporting units.

The reason that the assessment is 0.9% instead of 0.8% is that Chancellor Rogers, as in past years, instructed Vice Chancellors not to do only across-the-board reallocations, but rather to be somewhat strategic. For that reason I will use the \$70,000 above the amount needed for central reallocation to fund part of the "Increasing STEM capacity and student success in general chemistry" budget request submitted by CNSM this year. The request was the one that was rated the highest by the Planning and Budget Committee and as a consequence is in the Legislative request this year (provided that is approved by the Board of Regents). It will benefit students in any area where chemistry is required...most of the natural sciences, engineering, and health-related fields, for example. Should the Legislature provide funding for this, CNSM will be expected to return the \$70,000 for reallocation to another top Planning and Budget Committee priority.

There was an additional central assessment of my budget for utility costs, which was 0.1% of total FY12 expenditures of my reporting units, including restricted fund expenditures. The logic of including restricted fund expenditures is that the activities supported under grants and contracts occupy facilities as well as those supported by unrestricted funds. I recognize that there are some differences among units, e.g., some restricted funds are spent on field work and at remote facilities. Also, the F&A on restricted funds is supposed to cover facilities costs, but unfortunately it is insufficient. This year the assessment is small and there was little time to make refinements. If the utility assessment continues and grows, I will work out a more equitable approach in consultation with you.

The strategic reallocation and the utilities reallocation are added together and reported by unit in the "Total Unit Base to Reallocation" column of Table 2. That is the amount that Susan Phillips of the Central Administration Fiscal Office will be securing from each of my reporting units (except CES).

Finally, as discussed earlier this year, the graduate student health insurance had an unusually high cost increase this year. I agreed to cover 50% the cost of the increase for TAs and 33% of the cost for RAs out of Graduate School UFB, amounting to about \$107,000. The remainder needs to be paid by the schools and colleges that support TAs and by the units that have RAs. RA supporting units intend to secure one-third of the total cost increase (or one-half of their cost for RAs) from the grants or contracts that support most of these students, but I am leaving the individual units to manage that process. Grants have already paid the full cost of the fall insurance, so the cost-sharing might best occur when the spring/summer insurance is purchased. The cost for each unit is shown in the last table. Because of the way this is accounted, please await specific instructions from Susan Phillips about the health insurance cost increase.

FY12 Cost Savings/Containment Efforts, Efficiencies, Sustainability Initiatives, Process Improvement and Revenue Ideas

August 2012

UAF has made increasing efforts to find opportunities for cost savings/containment, has maintained conservation and sustainability initiatives as a high priority, and is investing in process improvement efficiencies in FY12.

Imbedded in many of UAF's business decisions on a regular basis, campus leadership has ramped-up discussions of this nature as part of strategic planning activities over the past year, and as UAF approaches its' centennial. UAF is actively finding ways to promote use of more and better data in decision-making, encouraging transparency and accountability in regard to resource allocation, and is making strides to improve reporting at all levels.

There are several key areas in which UAF can categorize its cost savings and efficiency efforts in FY12

- Financial and Human Resource Efficiencies
- Utilities, Energy or Resource Conservation
- Outsource, Change in Service Model or Process Improvement

Understanding the fiscal climate and thoughtfully considering future plans, UAF is also making efforts to find innovative ways to generate new revenues to support its programmatic needs and optimize future growth.

Financial and Human Resource Efficiencies

- Schools are also making choices to optimize faculty effort and have made several choices to hire
 faculty with higher instruction workloads in order to teach more classes, or hire Professionally
 Qualified term and adjunct faculty in certain program areas to increase offerings to students at a
 lower cost than exclusively using PhD tenure track faculty without adversely impacting
 accreditation requirements or quality standards.
 - o School of Management Faculty Position Management Savings: \$98,600
 - o School of Education: \$32,300
 - o School of Natural Resources & Agricultural Sciences (SNRAS): \$100,000
 - o College of Liberal Arts: \$27,000
 - Cooperative Extension Service: reduced 0.4 FTE by simplifying the administration of two popular nutrition education programs
- UAF has combined the former Geophysical Institute Office of Human Resources with the UAF
 Central Human Resources Office. The merged business units now operate in two locations under
 one management team. This has resulted in a West Ridge Human Resources Office which has
 the ability to service a larger customer base with cost savings (to date) equivalent to one FTE,
 approximately \$70,000.
- Use of technology to improve administrative efficiency and online instruction has benefitted several departments and schools over the course of FY12.
 - The School of Management has **increased the number of online course offerings** 57% since FY11, and 150% since FY07, which generated over \$230,000 in tuition for the school in FY12. Considering 41% of these students were off campus and would not have

Appendix 4D1 - FY12 Cost Savings & Efficiencies Report

- taken an in-class equivalent, this represents an increase of approximately \$36,000 since last academic year in off-campus revenues produced by use of online courses.
- The Office of Admissions and Registrar implemented use of electronic transcript delivery services (via Avow, Inc.) resulting in savings equivalent to 0.25 FTE, approximately \$13,000. This office also implemented an online application process for graduation and eliminated the paper course offering schedule and replaced it with a smaller registration guide which resulted in less handling of paper, reductions in FTE time, and other efficiencies.
- o Institute of Arctic Biology redesigned administrative services to utilize online forms for mail and procurement resulting in savings equivalent to 1 FTE.
- The Office of Information Technology negotiated an extended term contract for website content management (Roxen) resulting in a savings of \$46,000.
- o The Cooperative Extension Service (CES) utilized online registration for many workshops and conferences through the CES/SNRAS Business Office registration portal, which allows for secure use of credit card information. This simplifies registration at district offices and gives more options to registrants. CES has also put several publications online, eliminating paper printing, for added efficiencies.
- o The Rasumson Library saved approximately \$21,600 by canceling and consolidating various low-use journals, created a Google Site (using existing technology) to track electronic resource subscriptions instead of maintaining a third-party vendor, and utilized more competitive vendors for microfilm.
- o Facilities Services moved daily work order reporting from a paper to electronic process. This resulted in a reduction of printing costs and improved report distribution model, saving \$500 annually.
- O Use of OnBase document imaging software on campus continues to grow. To date, Student Services has reduced the time for student document processing in the Office of the Registrar and Admissions from four weeks to two. Use of document imaging is also increased for Financial Aid and Human Resources.
 - Document imaging allows better document tracking and processing and has eliminated the need to keep or transfer paper copies of student records and forms. This has resulted in better service for students as well as allowing employees to better focus on actual student issues. OnBase is used by the Office of Admissions, Registrar, Financial Aid and Human Resources at all three MAUs.
 - Document imaging has made it more efficient for Human Resource staff to review archived timesheets, tax forms, and other employee records.
 - Additional departments are migrating to document imaging with plans to include more. These are UA Risk Services, Offices of Grant & Contract Administration (at each MAU) and Financial Services.
- UAF Procurement & Contract Services joined the University Spend Collaborative (USC) of the Education Advisory Board, a group of high education institutions seeking to achieve a better understanding of our procurement practices and leverage that understanding both to save money and increase spending awareness in our units. Over the last four months the information from USC has been used to established informed negotiating positions for the purchase of scientific and technology products. It has also been used to educate departments regarding procurement expenditures during the spring budget preparation process.
 - O During the next year Procurement will use information gathered from USC to enter into negotiations with some larger commodity vendors in order to achieve savings by securing contracts with those vendors offering the best pricing and terms. The first major commodity group is scientific equipment and new contracts are expected to be in place by the end of 2012.

- Over the last year Procurement has established a number of indefinite delivery indefinite quantity (IDIQ) contracts for technology equipment. IDIQ contracts provide cost savings through the competitive solicitation process coupled with the ability for departments to make purchases quickly and easily. Information gathered from USC will identify areas where it would be appropriate to established additional IDIQ contracts in the future.
- O UAF Procurement has converted its formal solicitation process to completely online format, called E-solicitation. The E-solicitation process includes online repositories of prescribed forms, templates for layouts of common solicitation types, and a central online repository for bid/proposal submission. It has greatly eased administrative and work processes tasks necessary to format and issue a formal solicitation. In addition, E-solicitation has greatly reduced both issuing and submission times for formal solicitations, reducing shipping costs for the University and the public, and increasing the amount of time available for vendors to prepare their proposals.
 - In FY13, Procurement will move the management of the E-solicitation process to a company call AE Plans. AE Plans will post solicitations, amendments and other notices on web for vendor download. UAFs Division of Design and Construction currently uses AE Plans for constructions solicitations meaning that there will be a central location for all Bid and Proposal request from UAF in the near future.
- UAF has made significant strides to train employees in safety standards and has made the remediation of safety hazards a priority in FY12. UAF expects to evaluate the outcomes of this safety initiative in FY13 and hopes to see a **reduction in associated claims**.
- Finance and Accounting worked with units to improve financial management reporting and projections in order to understand and maximize UAF resources at all levels of the organization.
- The Office of the Vice Chancellor for Research discontinued publishing the Last Frontier science magazine resulting in a savings of \$50,000 annually.
- The Cooperative Extension Service has increased its use of UA Video Conferencing Services for program delivery and training, examples include:
 - The Delta agriculture agent teaches a pesticide applicators certification class in several communities. Last year the two day class located in Delta Junction was offered via video in Soldotna, Homer, Kodiak, Fairbanks and Anchorage. This optimized faculty time, and travel savings are estimated at \$4,000-\$5,000.
 - 4-H agents offered a "Cyber Summit" training conference for volunteers, saving an estimated \$10.000 in travel costs.
 - The food research technician coordinated a specialty food workshop offered via video conferencing to potential entrepreneurs in Anchorage, Delta Junction and Sitka, saving an estimated \$4,000 in travel costs.
- The UAF Office of Finance and Accounting has worked with each UAF department over the past year to improve and formalize tracking of vacant faculty and staff positions in order to manage position vacancy. Vacancies are reviewed by management at various levels prior to initiating a recruitment to determine if resources should be reallocated. Savings for reinvestment via improved Position Management include, but are not limited to:
 - Facilities Services: \$987,000Rasmuson Library: \$202,700
 - o Office of Information Technology: \$209,000
 - o Office of the Provost: \$50,000

- Office of the Vice Chancellor for Research: \$175,000
- Office of Admissions/Registrar: \$60,000
- o International Programs: \$150,000
- o Chukchi Campus: \$112,000
- o Northwest Campus: \$25,000
- Arctic Region Supercomputing Center: 3 FTE reduced to 1 FTE for administration
- Bristol Bay Campus: reduced 1 FTE and revised work schedules to maintain flexibility for student needs without incurred overtime wages

Utilities, Energy and Resource Conservation Efforts

Sustainability has been and continues to be a major initiative for UAF. Through the UAF Office of Sustainability, the Associated Students of UAF (ASUAF) student government organization and beyond, UAF has engaged in several actions in FY12 to reduce waste and recycle, design green spaces, purchase wisely and shop local foods, educate people with regard to sustainability, and conserve energy.

- UAF partnerships with student groups, the community, non-profit agencies, the private sector and
 the Cold Climate Housing Research Center have enabled UAF to bring sustainable housing to
 the UAF campus. This Sustainable Village housing project, a product of a student design
 completion, will be available for student living in the Fall 2012.
- The UAF Office of Sustainability, ASUAF, and Facilities Services managed recycling efforts on campus and within the community in FY12. Between January and July 2012, UAF transported 84,169 pounds of cardboard and paper, 57,860 pounds of glass, 7,140 pounds of plastic, and 3,120 pounds of aluminum to K&K Recycling, Inc.
- A computer shutdown software program (NightWatchman) funded by the Student Sustainability Fund and managed by the Office of Information Technology was installed in FY12. This program encompasses approximately 1600 Fairbanks Campus computers (66% of all UAF computers). Software shuts down these computers after a period of inactivity, scans for viruses, and wakes them up in prep for the next business day. The number of PCs under power management directly affects the overall reported electricity use and therefore cost and emissions. This saved an average of \$65 per computer in energy costs and also reduced the UAF carbon footprint. Between August 2011 and July 2012, over \$90,000 in energy savings and 545,000 pounds of Carbon emissions savings was produced. Estimating one tree sequesters 12g of Carbon Dioxide; this effort will dramatically assist UAF in becoming a more sustainable campus.
- Water bottle filling stations, set up in Summer 2011 in the Wood Center and Moore-Bartlett-Skarland student housing complex, monitor how much water is used and how many plastic water bottles are saved due to the refill of existing bottles. In FY12, over 10,000 plastic water bottles were saved.
- Repair of the Patty Center pool control system corrected maintenance problems, saving between one and two gallons of water per minute and stabilized the pool chemistry saving on purchased chemicals. Results will be seen in FY13, but UAF expects a total savings of 485,000 gallons of water this year.
- The Institute of Northern Engineering vacated the UAF facility located at 3330 Industrial Avenue in June 2012. An average of \$85K was spent annually to operate this facility. New costs associated with moving researchers to on-campus space are estimated at \$6,000 annually, resulting in improvements in research relationships to foster new collaboration and \$79,000

in savings. UAF plans to sell this facility in FY13, and reinvest the proceeds to help address engineering facility obligations.

- UA has been working to increase energy efficiency of buildings across the system. Over the last twelve months all three MAUs performed energy audits on many campuses across the state through a competitive RFP process. The audits constituted a thorough study of the existing lights, fans, motors, HVAC systems, building envelopes and cooling in the buildings selected for review. The result of each energy audit is a design and firm bid to implement a recommended list of Energy Efficiency Measures (EEMs) that address specific energy issues within the buildings. Should these measures be performed by the audit consultant, the consultant will guarantee the savings to the University. This project will take the recommendations from the audits and implement them.
 - o This project will implement the Energy Efficiency Measures (EEMs) identified in the Investment Grade Energy Audits performed by Siemens Building Technologies. Services to be performed include the installation, modification, and commissioning of new and existing energy systems, and verification and reporting of energy savings in ten buildings on the UAF main campus, and at community campuses. A project goal is to meet or exceed an aggregate 12 year payback for the combined EEMs.
- The Arctic Region Supercomputing Center retired over 50 computers from its "Midnight" system and replaced them with higher efficiency equipment. Utilizing roughly the same amount of power and cooling utilities, the Supercomputing Center is able to provide over eight times the computing capacity for UAF research and teaching.
- The Bristol Bay Campus has engaged in several conservation efforts including installation of computer power management software, motion sensing lighting or "delamping" in public use areas where possible, eliminating a vending machine, and installation of a solar photovoltaic (PV) system which converts direct light into electricity. They are also engaged with Facilities Services to discuss reduced boiler usage during summer months, are renovating campus facilities using energy efficient upgrades, and are hosting a campus-wide workshop on energy savings.
- The Northwest Campus Emily Ivanoff Brown Library Building received complete exterior enveloping and the administrative Nagozruk Building was converted from forced air furnace to baseboard boiler, resulting in an estimated utilities savings of \$5,000 annually. Additionally, the renovation project which will build a new wing to house a flight simulator is nearing completion. This allows Northwest Campus to discontinue paying rent to the Alaska Technical Center for the simulator, resulting in \$12,000 savings annually.
- Facilities Services, the Institute of Arctic Biology, and the Chukchi Campus have each made improvements in vehicle and fuel use.
 - o Facilities Services has down-sized its fleet of vehicles and replaced seven full size work vans with smaller more fuel efficient Transit Connect vans resulting in fuel savings in FY12 of \$4,800.
 - The Institute or Arctic Biology eliminated centrally paid use of campus vehicles and required all researchers rent vehicles through Facilities Services as part of research field work.
 - Chukchi Campus has also tracked a 25% decrease in fuel use via the purchase of a
 new hybrid vehicle and the sale of an older less efficient vehicle.
- Rural Student Services contributed to conservation efforts by **donating over 35 pounds of** subsistence meat/food to cultural student potlucks, in addition to funding student travel and

sundry items. In total over \$1,500 was donated by Rural Student Services staff for student outreach activities.

Outsource, Change in Service Models and Process Improvement

In FY12, UAF made significant progress in its review of highly-used workflow processes, in an effort to make efficiency improvements in several key areas.

- UAF's administrative services process improvement initiative began as part of the
 Administrative and Support Review process that evolved from the 2010 Chancellor's
 Executive Leadership Workshop. One of the goals of the Administrative Support Review
 Committee was to identify common processes to streamline that would improve overall
 administrative effectiveness.
 - O UAF made efforts in FY12 to institutionalize campus-wide process improvement efforts by creating the UAF Office of Management and Budget. To date, two high-priority projects have moved forward, each with its own campus-wide project team. Six staff members have also gone through extensive training to become qualified process improvement facilitators and are guiding these two project teams, with more efforts on the horizon.
 - O Grant Award Set-Up and Employee Recruitment are the two primary high-priority projects in motion. An executive level steering committee has also been created, to assist in the event that policy, regulation and information system issues need to be addressed. Recommendations from these groups are expected by the end of the calendar year.
- UAF lead the UAF/UAA testing and implementation for AiM, the new work order system for Facilities Services, an upgrade from the Facility Focus system. This web-based system was designed to support supervisors and managers with better, more accurate information for scheduling work orders, planning tasks and compiling data on open projects, which should result in better service on the work orders submitted. This system also enables standard operating procedures and defined key performance indicators (KPIs) for management reporting and decision-making across the UA system.
- UAF has regularly published classroom space utilization reports since FY03. The space utilization reports document hour-by-hour and day-by-day usage of centrally-assigned classroom space on the Fairbanks Campus in terms of both scheduling and occupancy. Work is underway to streamline and expand the utility of the space utilization reports. Data extraction methods have been streamlined in order to gain insight into which classrooms in terms of occupancy are most in demand and at which time of day.
 - O The next step is to develop trend reporting by classroom size and time-of-day to give a sense of change in classroom utilization rates over time. Long-term project objectives include analysis the historic pairing of course sections with classroom sizes in an effort to seek out efficiencies in classroom space assignment as increasing enrollment heightens the demand for specific classroom sizes, and the identification of classroom size need based on future enrollment trends.
- To enable more efficient coordination of extensive climate studies, observations, and modeling analyses, UAF implemented an internal restructure of five research centers. The Scenarios Network for Alaska & Arctic Planning (SNAP), the Alaska Center for Climate Assessment & Policy (ACCAP), the Alaska Fire Science Consortium (AFSC), the Climate Science Center (CSC) and the Geographic Information Network of Alaska (GINA) were administratively shifted into the International Arctic Research Center (IARC). Although no

positions were eliminated in this reorganization, all units feel that internal efficiencies have been achieved due to implementation of structured operational procedures. In addition, other tangible benefits have been (and will be) realized by all units through sharing of expertise and facilities in research as well as in education and outreach. Common promotion of capabilities and research capacity will lead to more funding opportunities and increased diversity and stability for all entities.

- Web Time Entry (WTE) and efforts for non-exempt staff have streamlined timesheet collection processes. Exempt staff transitions from paper/manual processes are expected by Spring of 2013. Quarterly effort certification for exempt staff will result in savings when complete.
- The Arctic Region Supercomputing Center collaborated with the Office of Information Technology to store information in a centrally supported database (rather than creating a new database) and for managing user accounts and passwords. This reduced ARSC staffing needs and is an example of cost avoidance to meet service needs.
- The College of Liberal Arts and the School of Management completed a program restructure to better serve military veteran students and military intended students via the transfer of the UAF Military Science minor degree program and the US Army ROTC program from the College of Liberal Arts to the School of Management. The military science minor (ROTC cadets), military studies minor-in-process (veterans), and US Army ROTC program fit well within the School of Management's Emergency Management and Homeland Security undergraduate and graduate programs. It is also well-aligned with the Northern Leadership Center. Moving the ROTC program fills a gap in emerging partnerships and is well supported.

Ideas for New Revenue and Efficiencies

- Activite UPay/UStore online payment technology in an effort to eliminate manual credit card
 payments, transmit credit card information, and facsimile. This online mechanism for payment is
 expected to improve business operations, to better institute PCI compliance and increase student
 and customer access to UA offerings.
- UAF is engaging in a branding "make-over" that will be used to promote campus activities and the Centennial Celebrations 2015-2017. External fundraising efforts will be in full-swing in conjunction with the updated campaign. Several schools/departments are working with the Development Office to find additional opportunities to expand gifts.
- UAF plans to begin utilizing software for electronic faculty workload reporting (Faculty 180) in FY13. This will facilitate preparation of accreditation reports and State performance reporting that requires information on faculty productivity and will be located within a single database for improved information management.
- UAF Intensive Advising Initiatives has among its goals increasing the proportion of students that complete classes successfully and achieve Satisfactory Academic Progress (SAP). UAF has adopted SAP as one of its performance indicators. Improving SAP will improve efficiency, as it should reduce the need for multiple sections of freshman-level courses (in particular) due to the reduction of students who may have to repeat courses, etc.
- UAF has made efforts to reduce off-campus leased space in order to optimize physical space on campus and alleviate lease payments externally. For example, IARC currently pays for

bond debt for UAF physical space that is not currently occupied. The SNAP program currently pays for lease space in the Denali Building. If SNAP were moved into the Akasofu Building (IARC), it may result in savings of \$150,000 annually in addition to process efficiencies.

- Increase partnerships with external agencies in order to share program costs. Partnerships with other organizations often allow for shared expenses in course delivery. For example, the Cooperative Extension Service partnered with the Southeast Alaska Regional Health Consortium twice last year, and split costs for food preservation programs delivered in Southeast.
- UAF created the **Department of Recreation**, **Adventure and Wellness**. This office is focused on offering new programs and recreational campus and facility space rental, which may result in new revenues.
- The Geophysical Institute (GI) received funds in FY12 to develop the Unmanned Aerial Systems Program. GI expects to capitalize on these funds to develop further programs and public/private partnerships. The Alaska Satellite Facility (ASF) is also looking for new ways to develop new revenue streams.
- Increase the tuition rate by 5% or greater, in line with UA trends or peer adjustments, to keep pace with rising costs to educate students. If an across-the board tuition increase is not permitted, an alternative would be to allow campuses to increase tuition for certain costly programs that are in high demand by students.
- Increase enrollment via outreach efforts in rural Alaska. The School of Education is working with the UAF Development Office to secure funds for rural practicum expenses, supervision costs, and scholarships for students completing year-long student teaching experiences. The Bristol Bay Campus also opened an outreach center in New Stuyahok which increases their outreach centers to three (King Salmon, Togiak). Bristol Bay has also established a career center to help students find employment which has resulted in the addition of several new courses and therefore increased student credit hour production.
- Increase the cost recovery of existing programs by examining the fee structure.

 Restructuring UAF general student fees or fees in lieu of tuition may be an opportunity to find efficiencies while optimizing this revenue stream. Programs may also benefit from an examination of student fees. For example, the Cooperative Extension Service handled the Master Gardener program differently and plans to increase fees for the 40-hour training by 2014 in order to better cover program costs. CES also plans to create an incentive for participants to complete the volunteer commitment. The training has also been standardized for more efficient program delivery.
