D.	TIMELINE Estimate the semester of completion for the following benchmarks. No years. Time required depends on factors such as student's other obligation of the project. In general, research involving human subjects takes lost acceptable degree program in less than three years. Therefore, the time are only goals and do not prevent you from completing them earlier of	ations, level of prior preparation, and complexity nger. It is virtually impossible to complete an neline should be three years at a minimum. These
	1. Completion of coursework listed in study plan (this depends on how many courses you list and how many courses per semester you want to take)	
	2. Comprehensive examinations (written and oral) and	

how many courses you list and how many courses per semester you want to take)	
2. Comprehensive examinations (written and oral) and Advancement to Candidacy (can follow soon after #1 but you may want to allow time to prepare).	
3. Completion of first draft of Ph.D. dissertation (allow ample time for research, especially if human subjects are involved)	
4. Ph.D. dissertation defense (allow time for committee to read and review and you to revise)	
5. Submission of dissertation in final form with signatures of committee (further revisions are almost always required after defense; may require a month or less unless there are serious deficiencies).	
6. Graduation (end of semester when #5 occurs, provided there is sufficient time for final approvals; see academic calendar)	

E. SIGNATURE of Committee Chair

I have reviewed the applicant's Statement of Academic Goals, Research Prospectus and Proposed Graduate Stud
Plan and agree to serve as the major advisor to this applicant if admitted.
