Master Planning Committee Meeting

October 14, 1999

Notes

Members Present:

Brian Barnes, Chris Bennett, Terrence Cole, John Craven, Jake Poole, Mike Supkis, Ryan Tilbury, Deb Wells, Bob Wheeler

Absent:

Rick Caulfield, Dan Flodin, Carter Howald, Kathleen Schedler, Susan Todd, and Joe Trubacz

Guests:

None

Handouts at the meeting:

- Conceptual drawings for the Alumni Drive area: time/temperature sign; open areas

Chair's Report

The chancellor has not yet appointed a new undergraduate member.

The chancellor has approved the MPC recommendation on the Trails Committee's vehicle barrier activities for this fall.

Vehicle Barrier Plan for North Campus

Progress report - Susan Todd

Not present. No report.

Recommendation on Non-assigned Areas

The issue of copying machines in hallways remains complicated as multiple departments can be sharing a single copier. Kathleen Schedler and Edie Curry (UAF Fire Marshal) are attending a meeting this week and will be able to further enlighten us at our next meeting about some of the code issues associated with copiers in corridors. Remember that there is an aesthetics issue as well. Additional issues include the "who" as in who within UAF administration would be responsible for seeing to it that UAF policies are followed regarding copiers, vending machines, and telephones in non-assigned areas. It is not MPC's responsibility. Members support re-creation of building user's committees and building captains to work with the UAF official in charge to make any such policies work constructively. It is appropriate to require these things during building renovations, but it is not so easy with existing buildings already fully committed. However, a review of current and planned placement by an outside person could make a positive contribution by giving a more detached perspective. This could help solve difficulties for the easier cases and help the administration as it finds money to solve the more difficult problems. Placement of the twenty-some new copiers heading our way should be an issue. One addition to item 4 in the existing draft is to be inserted. The chair will draft an additional recommendation based on today's conversation and send it to members for comments in advance of the next meeting.

Pending Visits by Outside Consultants

Purpose of the two visits is to help establish a plan through which the MPC can proceed with the business of creating a new UAF Campus Master Plan; planning for planning. A key item is the determination of what data needs to be collected before hiring of a consultant. There are no known schedule obstacles for the visit by Earle Whittington formally from Emory University and now at Georgia Tech. on December 8-9, 1999. We will move forward with this visit. The visit by Jack Wolliver planned for November 10-11 awaits resolution of a schedule conflict within the chancellor's office. (Note. We are still expecting the Museum designs to reappear in November.)

Entrance at Alumni Drive: Future Evolution

Jake Poole reviewed plans for placement of the time/temperature sign at the entrance in the spring. A draft recommendation will be prepared by Jake Poole concerning the next steps in development of the open and forested areas at the northwest corner of the intersection, extending from the stairs up the cliff to the vehicle pullout and then farther north along the bike path. The concept is for a park-like setting. Note that the vehicle pullout is a direct result of MPC's recommendation last year.

Issues Brought up for Future Meeting

Siting of a new fire station. This needs to be coordinated with Carter's agenda item on the siting of new buildings on campus. The vehicular traffic committee will also be interested in this issue.

Status of planned Taku entrance closure. This is recommended in the '91 Master Plan, but requires further discussion. Another issue for the vehicular traffic committee.

Skateboards, bikes, roller-blades, etc. in the central campus area. This should be coordinated with the MPC plan to discuss pedestrian and bike movements on campus.

Next Regular Meeting.

Thursday, October 28, 9 - 11 AM, Kayak Room, Rasmuson Library
