UAF Master Planning Committee

Meeting Notes
Thursday, May 3, 2018; 9am-11am
Chancellor’s Conference Room (SIH 330)

Meeting began at 9:03a

1. Welcome and introductions.

   - The MPC complimented the GBG society on their hard work in developing a well-designed plan. Parking and circulation remains a concern, particularly with accommodating special events. The MPC discussed several possible parking options for future exploration. The question was posed whether a visitor count exists for garden special events.
   - It was noted that the GBG has the opportunity to be one of the most attractive entries to the UAF campus.
   - It was noted that the GBG plan did not appear to have a formal parking area for bikes. We encourage that bike parking be added to the plan.
   - The MPC chair will arrange a meeting with various stakeholders such as the Agricultural and Forestry Experiment Station Director, the farm manager, SBG society, and UAF Summer Sessions to explore possible options for addressing the parking issue.
   - The MPC recommends that a circulation plan be completed for the GBG. We recognize that funds for such a study may not be available. However, plan development could be an engineering class project and this option should be pursued in the future.
   - The MPC passed a motion recommending the planned improvements for Drew Plaza be approved. The motion also encourages that formal bike parking be included as part of the improvements.

   - The Master Plan consultants will be in Fairbanks on June 13-15. They would like to hold a 2 hour workshop with the MPC. The workshop will include a space needs analysis

UAF MPC members will be polled to determine a time (update: the workshop will be held June 13th from 9:00-11:00a)
3. Subcommittee and additional reports
   
i. North Campus
   
   • Next week the North Campus will host elementary school children for outdoor event days.

   ii. Campus Landscape
   
   • Nothing new to report

   iii. Sustainability
   
   • The MPC will continue to seek a graduate student RISE Board to serve on the MPC next academic years. A possible candidate has been identified.

4. Facilities Services update
   
   • Summer 2018 construction map was reviewed. Individual projects were discussed.

6. Public comment. None.

7. Schedule. Next meeting scheduled for May 17\textsuperscript{th}. It will be a video conference call with the DLR Group master plan consultants.
