Re: MPC Recommendation 2013-02 – Taku parking lot expansion

The MPC recommends approval of the proposed use of the University's waste coal ash as a monofil material to expand the Taku parking lot by the currently planned 3 cells. The project would approximately double the current size of the lot boundaries. The MPC recommends that a minimum 25 foot vegetative barrier be required along the byway side of the expanded lot. MPC further recommends consideration of additional access points to the expanded parking lot.

Motion made by Jonathan Shambare, seconded by Gary Newman.

Motion passes by vote 10-0.

Thank you.
