Re: MPC Recommendation 2020-01, ACEP ETF exterior modifications.

The Master Planning Committee reviewed the request by ACEP Director Gwen Holdmann for modifications to the exterior of their Energy Technology Facility (ETF). ACEP will be installing and testing new equipment to be located outside and adjacent to the ETF. Furthermore, ACEP anticipates future expansion that will require additional conditioned space. Due to possible safety hazards and to assure the equipment is only accessed by authorized personnel, Director Holdmann requests the following:

- Enhance the pedestrian and bicycle pathway from Fairbanks Street Bridge to Tanana Loop.
- Incorporation in the path enhancement of new signage at obvious locations to warn pedestrians about risks, and also provide information about the work being conducted on-site.
- Installation of a security fence extending the length of the west and north side of the established operations site.

The MPC approves the above requests of ACEP as presented in the revised site plan (see attached site plan and ACEP request to MPC).
