Re: MPC Recommendation 2020-02, Virology Lab connex.

The Master Planning Committee reviewed the request by the State of Alaska Virology lab on the UAF campus to locate a connex unit in lot 9H (see figure below) for a temporary period to have quick access to overstock medical testing supplies and staff PPE. As stated in the request, "The State Virology lab is processing a lot of COVID-19 tests, including all the UAF drive-up testing." As indicated, they are in desperate need to have extra storage with quick access to the facility, now that they are running 24/7 at this point. The request is for up to 2 years (September 30, 2022) depending on COVID-19 developments. The MPC supports the request for the placement of the connex.
