RE: MPC Recommendation 2023-008 / Disc Golf Course Improvements

A proposal was brought to the North Campus Subcommittee by the Disc Golf Association to improve the current disc golf course on campus by installing turf landings. The new turf landings at each hole will improve safety, improve the player experience, and provide a quality course that will support statewide tournaments. The proposed improvements will be identical to the turf installed at Birch Hill and funded by the Disc Golf Association. Nanook Recreation and Facilities Services support the project and can provide labor and guidance as needed. Finally, the North Campus Groomer was consulted and the proposed improvements will not impact snow grooming or trail use.

MPC supports the North Campus Subcommittee endorsement, and recommends approval of the proposed improvements to the disc golf course on campus and the North Campus trails.

Motion made by Mark Oldmixon, seconded by Gary Newman.

Motion passed unanimously.
