Destructive Analysis Request

Requesting Researcher: _____

Institution: _____

Address: _____

Phone: _____ Fax: _____ Email: _____

(use one sheet per specimen)

Accession Number: _____ Catalog Number: _____

Object Description: _____

Type of Analysis: (e.g., neutron activation, radiocarbon, ams, residue, etc): _____

Individual or Laboratory: _____

Address: _____

Rationale: In the space provided below or on an additional sheet, please explain what you hope to learn through this analysis. How does gaining this knowledge justify destruction of a museum specimen? Is this the most appropriate specimen for this analysis?

The Researcher agrees to furnish UAM with analysis results upon receipt from the laboratory. In so far as is practical, these results should be in both paper and electronic form to facilitate archiving in the collections database, and will serve as additional collections documentation. Unless the researcher agrees otherwise, UAM will not disseminate these results to the public or the scholarly community for a period of two (2) years from the time of receipt to allow the researcher time to publish. Any unused portion of the sample must be returned to UAM. Exception to this policy will be made at the discretion of the Curator of Archaeology in consultation with the Researcher.

Researcher signature: _____ Date: _____

Request Approved: _____ Denied: _____ Date: _____

Archaeology Curator signature: _____
