

Install and Use the GlobalProtect VPN

1. Point your browser to <https://swf.vpn.alaska.edu>
2. Log in using your UA credentials:

The screenshot shows the Palo Alto Networks GlobalProtect Portal login interface. At the top left is the Palo Alto Networks logo. Below it, the text "GlobalProtect Portal" is displayed. There are two input fields: "Username" with the value "jmokinczyc" and "Password" with masked characters. A "LOG IN" button is located below the password field.

3. The GlobalProtect Portal appears; click on the appropriate Download for your operating system

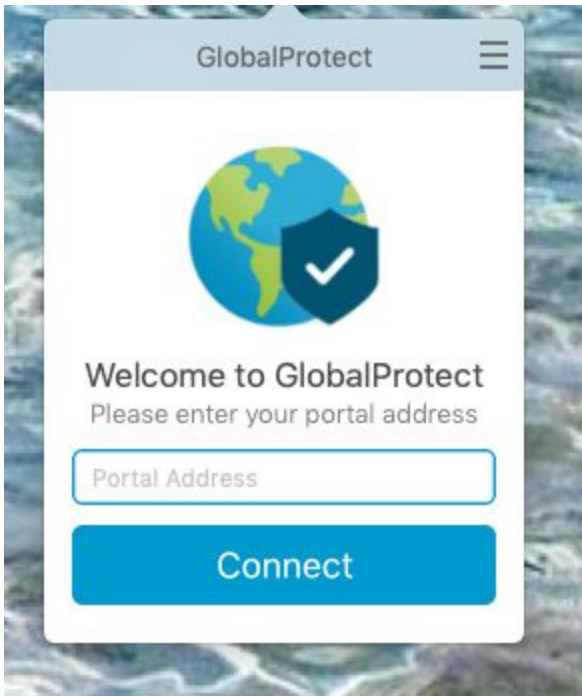

The screenshot shows the Palo Alto Networks GlobalProtect Portal download options page. At the top left is the Palo Alto Networks logo. Below it, the text "GlobalProtect Portal" is displayed. There are three download links: "Download Windows 32 bit GlobalProtect agent", "Download Windows 64 bit GlobalProtect agent", and "Download Mac 32/64 bit GlobalProtect agent". Below these links, there are three paragraphs of text providing instructions for each operating system.

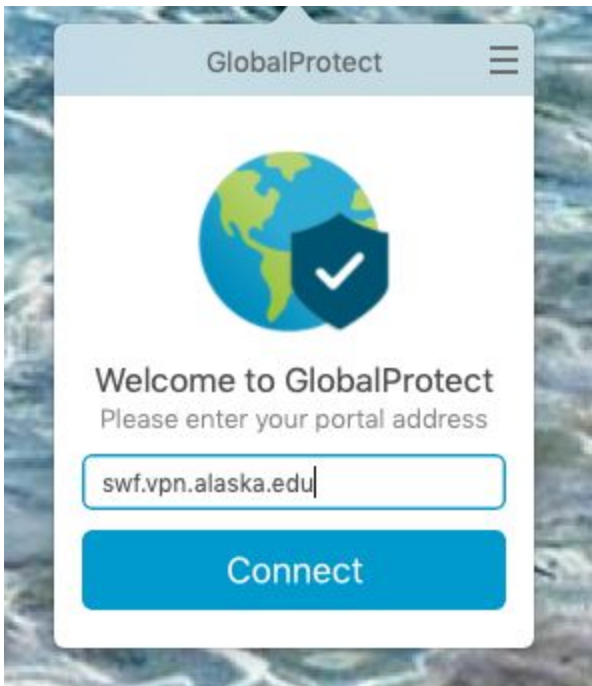

Download Windows 32 bit GlobalProtect agent
Download Windows 64 bit GlobalProtect agent
Download Mac 32/64 bit GlobalProtect agent

Windows 32 bit OS needs to download and install Windows 32 bit GlobalProtect agent.
Windows 64 bit OS needs to download and install Windows 64 bit GlobalProtect agent.
Mac OS needs to download and install Mac 32/64 bit GlobalProtect agent.

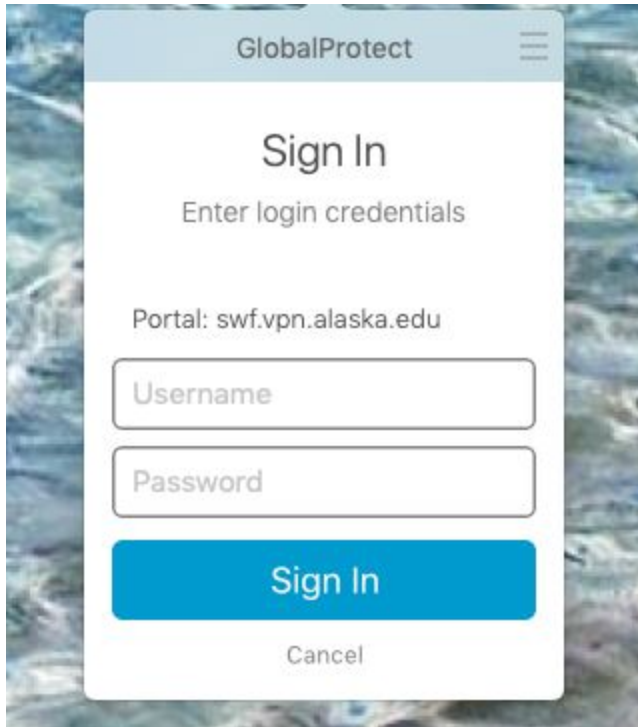

4. Install the application; a window appears.

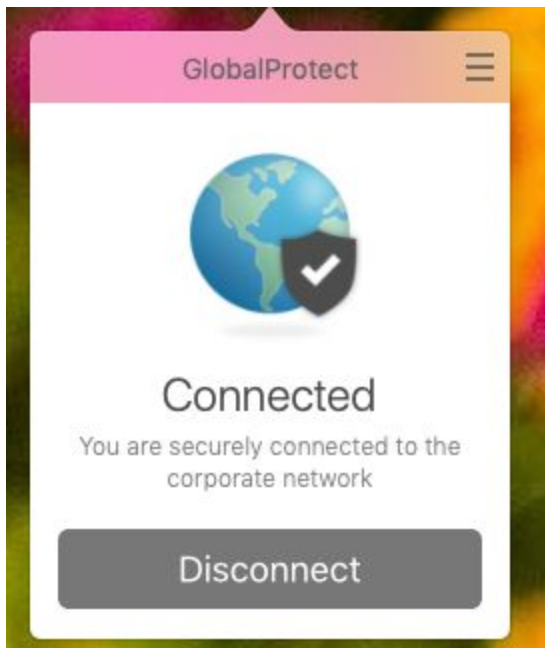

5. Enter **swf.vpn.alaska.edu** in the Portal Address window; click Connect

6. Enter your UA credentials

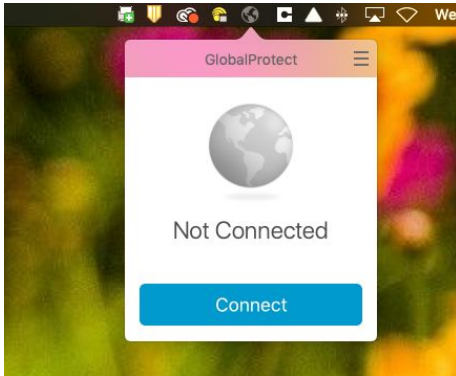

7. You are now connected! When you are connected to this VPN, you can use your computer to connect to assets you are authorized to reach on the UA network.

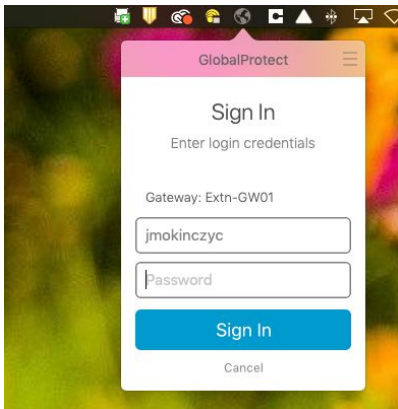

Click Disconnect when you are done using the UA network.

To Launch Future Sessions

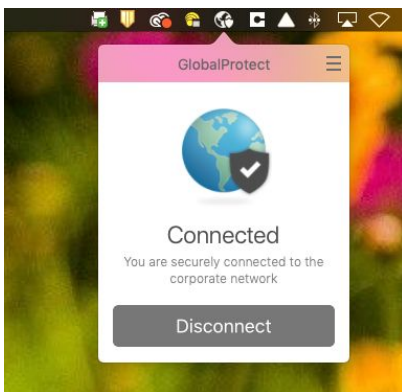

8. Launch the application from your menu bar (shown here on a Mac)

9. Use your UA credentials to sign in

10. Once you are connected, you can use your computer to connect to assets you are authorized to reach on the UA network

Click Disconnect when you are done using the UA network.
