Shared Drive Windows 10

Last Revised: 3/16/20

Add a Network Shared Drive in Windows 10

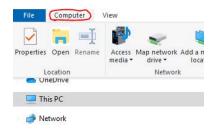

Open the File Explorer icon from the Taskbar

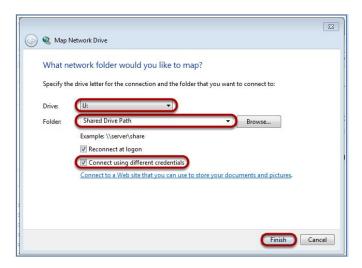

On the left side Select 'This PC'

This PC

Network

Select 'Computer, then, Map network drive'

Select an available letter in the 'Drive:'

Type the shared drive path in the 'Folder:'

Type in your 'UA Username and password'

Click 'Remember my credentials'

Your mapped 'Shared Drive' should now appear automatically upon login

Check 'Connect using different credentials'

Select 'Finish'
