# Add Shared Drive for
Mac OS X

Last Revised: 03/16/20

Connect Mac OS X to Shared Drive on a domain computer

How to connect your MAC OS X system to a Shared Drive

From your Mac Desktop proceed to the **'Go'** option and select **'Connect to Server'**

Connect to requested shared drive by typing your **'Server Address'**

smb://ServerName/**[Shared Drive Path]**

Optional: Select the [+] to add requested shared drive as a favorite server connection
