

Tuesday Tips is a new outreach effort by OGCA. The idea behind *Tuesday Tips* is to convey tips, tricks and other helpful information around the area of research administration. Our goal is to post on (almost every) Tuesdays. If there is something you would like to see covered on *Tuesday Tips*, email: UAF-GCReATE@alaska.edu. For more Tips visit [OGCA website](#).

What is SciENCv?

SciENCv

The Office of Contracts and Grants Administration (OGCA) has pulled together and highlighted information about SciENCv in an effort to assist UAF's research community. If you have questions or need assistance, please contact [OGCA](#).

Full Instructions can be found at:

<https://www.ncbi.nlm.nih.gov/books/NBK154494/>

Science Experts Network Curriculum Vitae (SciENCv) is a new electronic system that helps researchers assemble the professional information needed for participation in federally funded research. SciENCv gathers and compiles information on expertise, employment, education and professional accomplishments. Researchers can use SciENCv to create and maintain biosketches that are submitted with grant applications and annual reports. SciENCv allows researchers to describe and highlight their scientific contributions in their own words.

What SciENCv does:

- Eliminates the need to repeatedly enter biosketch information

- Reduces the administrative burden associated with federal grant submission and reporting requirements
- Provides access to a researcher-claimed data repository with information on expertise, employment, education, and professional accomplishments
- Allows researchers to describe their scientific contributions in their own language

Who Developed SciENCv

The SciENCv utility is a cooperative project requested by the [Federal Demonstration Partnership](#) (FDP), which is an association of academic research institutions and federal agencies. In collaboration with the FDP, SciENCv is being built by the [National Center for Biotechnology Information](#) (NCBI) at the National Institutes of Health under the aegis of an [interagency workgroup](#) composed of members from the Department of Defense, the Department of Energy, the Environmental Protection Agency, the National Institutes of Health, the National Science Foundation (NSF), The Smithsonian, and the United States Department of Agriculture. The interagency workgroup operates under the National Science and Technology Council's (NSTC) [Research Business Models](#) and Science of Science Policy Committees.

Principles of SciENCv

- Any researcher may register
- Leverages data from existing systems
- Data are owned by the researcher
- Researcher controls what data are public
- Researcher edits and maintains information
- Researcher provides own data to describe research outcomes
- Researcher has ultimate control over data in biosketch
