
Physics 165x

Introduction to Astronomy 4 Credits

Dr. Martin Truffer

Breaking news in Astronomy: The James Webb Space Telescope (JWST) launched on December 25, 2021, after more than 20 years planning and development. It arrived at its operational location (Earth's L2 Lagrangian point) in January 2022. After months of deployment, alignment, and commissioning, the first science images were released to the public in July of 2022. This is one of those first images, showing the edge of a young nearby star-forming region – NGC 3324 in the Carina Nebula, roughly 7,600 light-years away. This image was taken using invisible near infra-red light, so colors shown here have been assigned artificially.

Credit: <https://stsci-opo.org/STSci-01GA6KNV1S3TP2JBPCDT8G826T.png>

Description

This will be a standard 100-level undergraduate introduction to astronomy for non-science majors. It covers the science of astronomy and its societal consequences, with an emphasis on the interrelationships between astronomy and other sciences. As listed in the UAF Catalog, the topics to be covered are:

- Astronomical concepts and tools
- Earth-based and satellite observation of light
- The solar system
- Stellar astronomy
- Galaxies & Cosmology

There is an associated lab component, in which we will undertake some practical hands-on investigation of the tools and techniques used by astronomers to observe and understand the universe around us. When the weather permits, we may offer additional evening opportunities to use telescopes on the roof of the Reichardt building to observe some interesting sky objects. This part is offered solely for your interest and enjoyment, so participation in these possible sky observing sessions is voluntary.

Bachelor's degrees at UAF incorporate a common set of learning experiences known as the General Education Requirements (GER). Requirements to meet the GER in Natural Sciences are summarized [here](#). PHYS165X can be used by students to meet the University of Alaska's General Education Requirement (GER) in Natural Sciences, subject to the following stipulations:¹

- Students must earn a C- grade or higher in each course used to meet a baccalaureate GER.
- Natural science and mathematics credits used to satisfy general education requirements can also be used to satisfy major requirements.

GER courses are required to address some or all of the following specific requirements:

- Build knowledge of human institutions, sociocultural processes, and the physical and natural world through the study of the natural and social sciences, technologies, mathematics, humanities, histories, languages and the arts.
- Develop intellectual and practical skills across the curriculum, including inquiry and analysis, critical and creative thinking, problem-solving, written and oral communication, information literacy, technological competence, and collaborative learning.
- Acquire tools for effective civic engagement in local through global contexts, including ethical reasoning, intercultural competence, and knowledge of Alaska and Alaska issues.
- Integrate and apply learning, including synthesis and advanced accomplishment across general and specialized studies, adapting them to new settings, questions and responsibilities, and forming a foundation for lifelong learning.

In order to meet these requirements, this course will include substantial emphasis on major concepts in natural science, including:

- Consideration of the scientific method, as it applies to astronomy
- An experimental/laboratory component
- Consideration of the societal relevance of astronomy, and how it interacts with public policy

Major concepts and the scientific method will be discussed in lectures during the first few weeks, and you will apply these ideas in practice during the labs. The societal importance of astronomy will also be discussed in lectures, and a number of homework questions ask you to discuss issues of societal relevance. This course is not designated as Alaska Native Themed.

¹ See <https://catalog.uaf.edu/bachelors/general-education-requirements/#generaleducationrequirements>

GER Natural Science courses are required to undergo regular Student Learning Outcomes Assessments. One of the consequences of this is that the University may request additional feedback from you regarding your assessment of the conduct and value of this course.

The course will be closely linked to the assigned textbook (*Universe*, 9th, 10th, or 11th editions) although at times we may cover the topics in a slightly different order.

Course goals and student learning outcomes

Upon completion of this course students will:

- Understand the tools and techniques of scientific study, and how these have been used to establish our current knowledge of the universe.
- Be familiar with the hierarchy of objects that make up the universe, how they are distributed through space, and how Earth is placed in this universe.
- Understand the basic nature of these objects – how they formed, how they behave, and what their ultimate fates are likely to be.
- Be familiar in particular with the solar-system objects that are our near neighbors in space and may one day provide additional options for human habitation and resource extraction.
- Appreciate the societal relevance of astronomy and its connection to other fields of science.

My goal as an instructor is to provide every student with maximum possible opportunity for success. This means that I try to be as flexible as possible with the course requirements, to avoid creating needless hurdles. Nevertheless, some penalties for missed or late work are necessary; my policies in this regard are outlined below.

Instructor information

Instructor: Dr. Martin Truffer
Email (preferred): mtruffer2@alaska.edu
Office locations: Reichardt room 116 and Elvey Rm 401D
Office Phone: 907-474-5359
Office hours: 9:30-11:00 Tuesday & Thursday, or immediately after class on Tuesdays.

Teaching Assistant: Stone Gardner: Email: TBD
Office hours: TBD
Lab Manager: Joe Storm: Email: jhstorm@alaska.edu
Office: REIC room 114.
Phone: 907-474-7857

Office Managers: Liya Billa: Email: lkbilla@alaska.edu
Office: Reichardt room 102
Phone: 907-474-7339

I will be out of town for some lectures (for example, week of Sep 11). Those lectures will be pre-recorded and made available through Canvas. Regular lab sessions will continue.

Target schedule

<i>Week</i>	<i>Dates</i>	<i>Topics (from the textbook Universe)</i>	<i>Labs</i>
1	Aug 28 - Sep 01	Class introduction, Chapter 1	None
2	Sep 04 - Sep 10	Chapters 2-3	Math Review
3	Sep 11 - Sep 15	Chapters 4-5, Quiz 1	1
4	Sep 18 - Sep 22	Chapters 6-7	2
5	Sep 25 - Sep 29	Chapters 8-9, Quiz 2	3
6	Oct 02 - Oct 06	Chapters 10-11	4
7	Oct 09 - Oct 13	Chapters 12-13, Quiz 3	5
8	Oct 16 - Oct 20	Chapters 14-15	6
9	Oct 23 - Oct 27	Chapters 16-17, Quiz 4	7
10	Oct 30 - Nov 03	Chapters 18-19	8
11	Nov 06 - Nov 10	Chapters 20-21, Quiz 5	9
12	Nov 13 - Nov 17	Chapters 22-23	10
13	Nov 20 - Nov 24	Thanksgiving week, Chapter 26	No lab
14	Nov 27 - Dec 01	Chapter 24, 25, Quiz 6	11
15	Dec 04 - Dec 08	Chapters 27-28	Make-up
16	Dec 11 - Dec 15	Finals week	No lab
17	Dec 18 - Dec 22	Grades posted by Dec 20	

Note that this is a rather ambitious schedule, requiring us to cover roughly one chapter from *Universe* per lecture. It is unlikely that we will make it all the way to the end of the book as shown here, but I at least want to complete up to Chapter 24.

Course components and instructional methods

Instructional materials

Material for this course will be prepared electronically and will be available *over the web via the "Canvas"*² system at <https://canvas.alaska.edu>. Material to be posted this way includes:

- Course syllabus (this document)
- Lecture notes (see comments below)
- Homework problem sets
- Lab notes
- Supplementary handouts
- Online student grades

Lectures

Lectures will be held face-to-face, on Tuesdays and Thursdays from 11:30 am – 1:00 pm in Reichardt room 203.

I will be presenting lectures using a combination of computer slides and additional notes, diagrams etc. drawn by hand on a whiteboard. I will post printable versions of the electronic lecture notes online ahead of time. You should read the lecture notes and the relevant chapter from *Universe* beforehand. Many students may find it helpful to annotate these notes with your own supplemental notes during the lecture.

Labs

Each student is expected to complete one lab session per week. Labs will be taught in Rm 252 in the Reichardt building.

No regular lab sessions are scheduled during the first week of class, or during the week of Thanksgiving. Labs in the final week of semester will consist of telescope observing sessions and/or recitations in preparation for the final exam.

There will be a total of 11 labs. Lab write-ups should be completed during the lab, and turned in to the TA at the end of the session. Your worst lab score will be discarded; the remaining 10 scores for your lab participation and write up will contribute to your final grade. Complete lab policies are outlined in more detail in a separate document that will be available from the PHYS165 Canvas site.

Laboratory sessions are a vital part of this course, and should not be missed. To pass this course, ***there is an absolute requirement that you must attend and write up at least 7 of the labs.*** Any student failing to reach this number will automatically fail.

Homework

Homework will be assigned each week during the Thursday lecture, and will be due by 5:00 pm on Thursday of the following week. ***All homework will be assigned, submitted, and graded using Canvas.*** This means your completed work must be either scanned or photographed, and uploaded to Canvas. Here is a link to a short video explaining the homework submission process:

- <https://www.youtube.com/watch?v=zMSIErvJEoA>

The reason the homework deadlines are on Thursday is to allow you to speak to your lab instructor during the Tuesday lab session if you need help with the homework problems. Further, since you will already be on campus to do the lab, this is also an opportunity to use the campus network for your homework submission if you have limited or no internet access from your home.

² All students should have access to Canvas. Please let me know if you have difficulties with this.

Please realize that even if you submit a correct solution to a problem, your grader may not recognize it as correct if it's poorly presented. To maximize your chance of scoring well, your homework should:

- Be neatly laid out
- Be largely free from crossing-out and over-writing
- Include some verbal description explaining the approach and reasoning that you used to solve the problem
- Use grammatically correct English and write sufficiently well that the grader can understand what you're trying to say

If necessary, I may decide to delay the homework deadline dates, to ensure that we have covered the relevant material in class before tackling it as homework.

Exams and Quizzes

There will be six 20-minute quizzes during the semester and one two-hour final exam. The preliminary dates for these are

- Quizzes: Sep 14, Sep 28, Oct 12, Oct 26, Nov 9, and Nov 30.
- Final: 1:00 - 3:00 p.m., Tuesday, Dec 12, 2023

Quizzes will be held in-person, at the end of every second Thursday's lecture, during the last 20 minutes of our regularly scheduled class time. Only your best 5 quiz scores will contribute to your final grade. Your lowest quiz score will be discarded and will make no contribution. If necessary, I may decide to delay the dates when we do quizzes, to ensure that we have covered the relevant material in class before tackling it in a quiz. Quizzes and the final exam make a large contribution to your final grade. I try to make these as easy as possible, and past experience has been that most students perform well on these tests.

Course policies

Grading

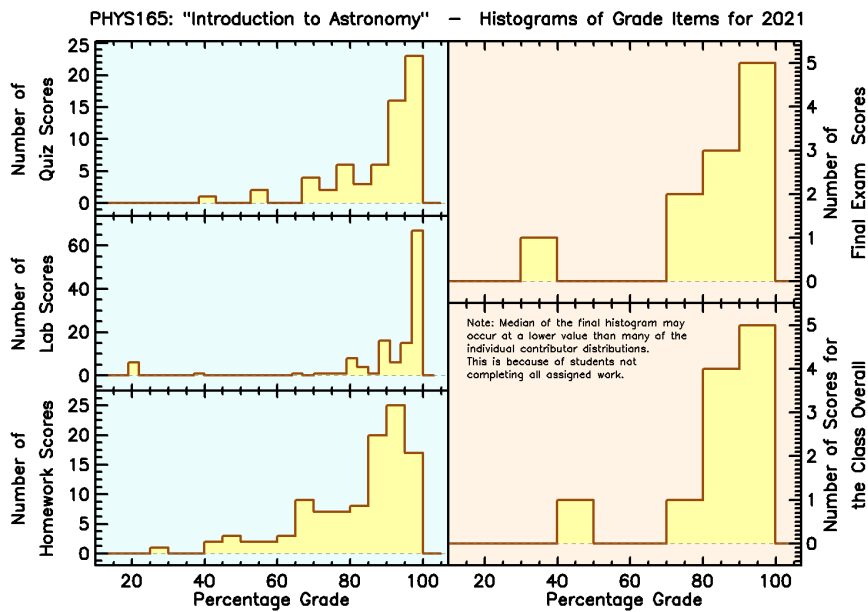

The course grade will consist of the following components

- Homework: 24% (2% each for 12 assignments)
- Best 10 out of 11 labs: 30% (3% each for 10 labs)
- Best 5 out of 6 quizzes: 25% (5% each for 5 quizzes)
- One two-hour final exam: 21% (Makes up 100%)

I will post all grades online, using Canvas. All registered students have access to this system for checking their grades. Please do *check that we have posted all your grades correctly*, and let me know if you think there is an error. Also, please retain all work that we return after grading, in case an error does appear. Returned graded work is proof of your scores. Please be aware that although Canvas provides a running estimate of your overall score for the class, that estimate is not 100% accurate. This is because it does not total your grade in quite the same way as I describe above. Nevertheless, it is a useful guide.

Final grades will be returned as letter grades with plus/minus modifiers. These will be derived from your overall percentage grade. The approximate conversions for each letter grade will be as follows. A: $\geq 90\%$; B: 75% to 90%; C: 60% to 75%; D: 50% to 60%; F: $< 50\%$. Plus/minus modifiers will subdivide each main grade into three equally spaced sublevels.

For those who are interested in actual data on how difficult this class might be, the figure below shows histograms of overall scores for the various course components for the (unusually small) class of 2021.

(These results are very typical of all of the ten years that this course has been taught previously.) As you can see, submitted work usually scores highly. **By far the strongest risk factor for a low grade in this class is due to failure to complete and submit assigned work.**

Attendance

UAF policy³ states that “you are expected to adhere to the class attendance policies set by your instructors.” In normal times, I expect at least 90% attendance from all students. In cases of low attendance, I will follow-up with relevant students to see if any accommodations could help. Students not turning in work and with very low attendance may be subject to an instructor-initiated withdrawal (depending on extenuating circumstances). Regular attendance and participation will also be used to round up a grade that may be borderline below one of the grade limits.

Class participation

There is no requirement for you to participate actively in class by asking questions or joining discussions, and there is no grade component based on this. Nevertheless, I encourage discussion questions at any time during the lectures. Because we have a large amount of material to cover, I may defer answering lengthy or numerous questions until after class.

Consequences of Low Grades

It is important to understand the implications of receiving a letter grade of “C” or below for this course. In order to count as a GER requirement, students must receive a grade of C- or higher.

This course follows the University of Alaska Fairbanks Incomplete Grade Policy: “The letter “I” (Incomplete) is a temporary grade used to indicate that the student has satisfactorily completed (C or better) the majority of work in a course but for personal reasons beyond the student’s control, such as sickness, has not been able to complete the course during the regular semester. Negligence or indifference are not acceptable reasons for an “I” grade.”

Needless to say, a grade of “F” represents a failure. Zero grade points will be awarded, and the course must be re-taken to receive credit.

³See <http://catalog.uaf.edu/academics-regulations/attendance/>

Missed or late work

A make-up quiz will be offered if a student misses a quiz due to illness, clash with another UAF commitment, or a genuine emergency. Determination of whether circumstances justify this make-up will be at the discretion of the instructor. If you are too ill to attend a class or a quiz, contact the instructor **before** the beginning of class, if at all possible. Email is preferred. An unexcused absence will lead to 0 points earned on that quiz.

The Physics Department typically offers opportunities for students to perform in-person make-ups for missed labs(s) during Thanksgiving week. Students will normally be allowed to make up at least one missed lab this way. Making up more than one missed lab will be at the discretion of the lab teaching assistant – whether this is possible will depend on availability of lab equipment and TA time, both of which are in turn dependent on the level of demand for make-ups.

Problem sets will generally not be accepted after the due date, without evidence of illness or genuine emergency. Students having documented clashes with other UAF commitments may pre-arrange alternate homework submission deadlines with me. All decisions regarding late homework or alternate deadlines will be at the discretion of the instructor.

Student conduct and academic honesty

It is the responsibility of each student to be informed about the policies for student conduct and safety at the University of Alaska. You are encouraged to read these policies at <https://uaf.edu/csrr/student-conduct/> and links therein. It should go without saying that students are expected to do their own original work for all assignments. Copying from other students or indeed from any source that is not your own work constitutes plagiarism. Failure to comply with UAF policies may be considered academic misconduct and may result in a failing grade (either for individual portions of work, or for the entire course, depending on severity.) Serious cases will be referred to university authorities for possible further disciplinary action.

Student responsibilities

It is the responsibility of all students to be aware of the various requirements of the class. This includes knowing what work is required, when the deadlines are, and how this work should be turned in. These requirements are clearly outlined in the syllabus, and multiple reminders will be given in class. Lack of awareness of a requirement will not be regarded as an acceptable rationale for failing to meet it.

The department takes great care to ensure that all submitted work is graded fairly and that the resulting scores are correctly credited to the students who submitted the work. Nevertheless, scores occasionally do get entered incorrectly or missed altogether. **It is the responsibility of students to check their scores in Canvas frequently**, and to notify the instructor and/or TA immediately if any discrepancy is noted. As discussed earlier, students are also responsible for keeping all graded work returned to them, as evidence of the grade received, should any disparity arise later.

Course requirements and materials

Prerequisites

Prerequisites are listed below, taken directly from the UAF catalog. Alternatively, regardless of the stated prerequisites, students may enroll in this class if given permission by the instructor.

Prerequisites listed in the catalog: (Undergraduate - UAF level ENGL F111X Minimum Grade of C- or Undergraduate - UAF level WRTG F111X Minimum Grade of C- or Undergraduate - UAA level WRTG A111 Minimum Grade of C or Undergraduate - UAS level WRTG S111 Minimum Grade of C- or Undergraduate - UAF level WRTG F1X Minimum Grade of C- or Undergraduate - UAF level ENGL F1X Minimum Grade of C- or Undergraduate - UAF level CORE F1 Minimum Grade of T T or Undergraduate - UAF level CORE F1AA Minimum Grade of T T or Undergraduate - UAF level CORE F1AS Minimum Grade of T T or Undergraduate - UAF level DEVE F070 Minimum Grade of C- or Undergraduate - UAF level DEVE F109 Minimum Grade of C- or Undergraduate - UAF level WRTG F110 Minimum Grade of C- or Undergraduate - UAA level WRTG A110 Minimum Grade of C or Undergraduate - UAS level WRTG S110 Minimum Grade of C- or Undergraduate - UAF level DEVS F104 Minimum Grade of C- or Enhanced ACT Sum EAEN + EARE 36 or SAT Sum SATW + SATC 0860 or EVIDENCE-BASED READ/WRIT SCORE 480 or Accuplacer-Sum AASS + AARC 170 or Accuplacer NG AAWR + AARE 530 or ASSET Sum AWSK + ARDG 082 or UAF Writing Sample w ASSET 19 or COMPASS Sum COWR + CORG 146) and (ALEKS Overall Test 1 030 or ALEKS Overall Test 2 030 or ALEKS Overall Test 3 030 or ALEKS Overall Test 4 030 or ALEKS Overall Test 5 030 or Undergraduate - UAF level DEVM F105 Minimum Grade of C- or Undergraduate - UAF level MATH F105 Minimum Grade of C- or Undergraduate - UAF level MATH F107X Minimum Grade of C- or Undergraduate - UAF level MATH F114X Minimum Grade of C- or Undergraduate - UAF level MATH F151X Minimum Grade of C- or Undergraduate - UAF level MATH F161X Minimum Grade of C- or Undergraduate - UAF level MATH F122X Minimum Grade of C- or Undergraduate - UAF level MATH F262X Minimum Grade of C- or Undergraduate - UAF level MATH F222X Minimum Grade of C- or Undergraduate - UAF level MATH F272X Minimum Grade of C- or Undergraduate - UAF level MATH F232X Minimum Grade of C- or Undergraduate - UAF level MATH F200X Minimum Grade of C- or Undergraduate - UAF level MATH F251X Minimum Grade of C- or Undergraduate - UAF level MATH F201X Minimum Grade of C- or Undergraduate - UAF level MATH F252X Minimum Grade of C- or Undergraduate - UAF level MATH F202X Minimum Grade of C- or Undergraduate - UAF level MATH F253X Minimum Grade of C-)

Textbooks

Required:

- *Universe*, 9th, 10th, or 11th Editions, by Freedman, Geller, & Kaufmann (W.H. Freeman & Co.)

Recommended additional reading: There are numerous excellent 100-level astronomy books available now. Any of the recent ones would likely be helpful for this course.

Note that online notes will be provided. However, these will make frequent reference to the more extensive treatment of topics that appears in the book.

Calculators

You will need access to a calculator to complete some of the homework problems. Calculators will also be permitted during quizzes and the final exam, although I rarely pose problems on these tests that require one. You will not need anything elaborate; an easy-to-use scientific calculator is all that you will need. Remember that it is much more important to present the correct reasoning for solving a problem than it is to arrive at the correct numerical value. Please, explain your reasoning when presenting solutions to homework and exam problems. I will award partial points for correct reasoning, if presented, even if the final answer is incorrect or incomplete.

Support Services

Homework help

I have set the weekly homework deadline to be on Thursday evening. This was chosen so that you can (and should) speak to your lab TA during your lab class if you need additional homework help. The TA will have seen my solution to each problem, so they know what I am expecting. They can help you understand what is being asked, how to tackle the problem, and how to present your solution.

Complaints and concerns

You are always welcome to discuss your concerns with me. However, if you have a concern that you feel cannot be resolved by discussion with me, you may wish to contact the Academic Advising Center on the 5th floor of the Gruening building, open Monday to Friday, 8 am to 5 pm and contactable via phone at 907-474-6396. The advising center can help with all student matters, from study tips to help with understanding the University's formal mechanisms for academic appeals. (See also <http://www.uaf.edu/advising/>)

Student Health and Counseling Center

The University provides health and counseling services through its Student Health and Counseling Center, which is located at 612 N. Chandalar Drive, on the 2nd floor of the Whitaker Building (the same building as Fire and Police, across from the bus turn around.) Their web site is at <http://www.uaf.edu/chc/>. The center will see students on an appointment basis. The number to call for an appointment is 907-474-7043. It is best to do so at 8:00 AM in the morning, because they are scheduled daily on a first come first serve basis.

Disabilities and/or Special Needs

Every qualified student is welcome in my classroom. As needed, I am happy to work with you, disability services, veterans' services, rural student services, etc. to find reasonable accommodations. Disability services are provided free of charge, and are available to any student who qualifies as a person with a disability. Student seeking special accommodations for a disability must first discuss their needs with Disability Services. Call 474-5655 to schedule an appointment.

UAF Disability Services is located in the Whitaker Building, room 208. Extensive support is available, as described at <http://www.uaf.edu/disability/>

Effective communication: Students who have difficulties with oral presentations and/or writing are strongly encouraged to get help from the UAF Department of Communication's Speaking Center (907-474-5470, speak@uaf.edu) and the UAF English's Department's Writing Center (907-474-5314, Gruening 8th floor), and/or CTC's Learning Center (604 Barnette Street, 907-455- 2860).

Sexual Harassment and Discrimination

Students at this university are protected against sexual harassment and discrimination (Title IX), and minors have additional protections. Please be aware that if I notice or am informed of certain types of misconduct, then **I am required to report it** to the appropriate authorities. For more information on your rights as a student and the resources available to you to resolve problems, please go the following site: www.uaf.edu/handbook/.

UA is an AA/EO employer and educational institution and prohibits illegal discrimination against any individual: <https://alaska.edu/nondiscrimination/>.

Emergency Notification Plan

Students will receive emergency notifications via phone or email. Please check your UAOnline account to confirm your emergency notification settings. For more information, please refer to the Student Handbook. In cases where you do not have access to your devices, as your instructor, I will take responsibility to relay any emergency notifications.

Extended Absence Policy

The University of Alaska Fairbanks recognizes that students may need to miss more classes than allowed by a particular instructor as specified in course policies. Extended absences are defined as missed classes or course work by students beyond what is permissible by the instructor's written course policies. Students may need to miss class and/or course work for a variety of reasons, including, but not limited to:

- Bereavement
- Personal illness or injury
- Serious illness of a friend, family member or loved one
- Military obligations
- Jury service

Other emergency or obligatory situations For more information, go to the Students Hand book or the Center for Students Rights and Responsibilities.

Additional Support Services

- Speaking Center: 907-474-5470, speak@uaf.edu, Gruening 507.
- Writing Center: 907-474-5314, uaf-writing-center@alaska.edu, Gruening 8th floor.
- UAF Math Services: uafmathstatlab@gmail.com, Chapman 305 (for math fee paying students only)
- Developmental Math Lab: Gruening 406
- The Debbie Moses Learning Center at CTC: 907-455-2860, 604 Barnette St., Room 120.
- For more information and resources, please see the Academic Advising Resource List: https://www.uaf.edu/advising/lr/SKM_364e19011717281.pdf.

Syllabus Addendum

UAF requires all syllabi to include the following addendum. It specifies UAF's official position with regard to a number of important issues. Should there be any inconsistencies between this addendum and the course-specific syllabus presented above, the policies described in the addendum are the ones that will apply.

COVID-19 statement: Students should keep up-to-date on the university's policies, practices, and mandates related to COVID-19 by regularly checking this website:

<https://sites.google.com/alaska.edu/coronavirus/uaf?authuser=0>

Further, students are expected to adhere to the university's policies, practices, and mandates and are subject to disciplinary actions if they do not comply.

Student protections statement: UAF embraces and grows a culture of respect, diversity, inclusion, and caring. Students at this university are protected against sexual harassment and discrimination (Title IX). Faculty members are designated as responsible employees which means they are required to report sexual misconduct. Graduate teaching assistants do not share the same reporting obligations. For more information on your rights as a student and the resources available to you to resolve problems, please go to the following site:

<https://catalog.uaf.edu/academics-regulations/students-rights-responsibilities/>.

Disability services statement: I will work with the Office of Disability Services to provide reasonable accommodation to students with disabilities.

ASUAF advocacy statement: The Associated Students of the University of Alaska Fairbanks, the student government of UAF, offers advocacy services to students who feel they are facing issues with staff, faculty, and/or other students specifically if these issues are hindering the ability of the student to succeed in their academics or go about their lives at the university. Students who wish to utilize these services can contact the Student Advocacy Director by visiting the ASUAF office or emailing asuaf.office@alaska.edu.

Student Academic Support:

- Speaking Center (907-474-5470, uaf-speakingcenter@alaska.edu, Gruening 507)
- Writing Center (907-474-5314, uaf-writing-center@alaska.edu, Gruening 8th floor)
- UAF Math Services, uaf-traccloud@alaska.edu, Chapman Building (for math fee paying students only)
- Developmental Math Lab, Gruening 406
- The Debbie Moses Learning Center at CTC (907-455-2860, 604 Barnette St, Room 120, <https://www.ctc.uaf.edu/student-services/student-success-center/>)
- For more information and resources, please see the Academic Advising Resource List (https://www.uaf.edu/advising/lr/SKM_364e19011717281.pdf)

Student Resources:

- Disability Services (907-474-5655, uaf-disability-services@alaska.edu, Whitaker 208)
- Student Health & Counseling [**6 free counseling sessions**] (907-474-7043, <https://www.uaf.edu/chc/appointments.php>, Gruening 215)
- Center for Student Rights and Responsibilities (907-474-7317, uaf-studentrights@alaska.edu, Eielson 110)
- Associated Students of the University of Alaska Fairbanks (ASUAF) or ASUAF Student Government (907-474-7355, asuaf.office@alaska.edu, Wood Center 119)

Nondiscrimination statement: The University of Alaska is an affirmative action/equal opportunity employer and educational institution. The University of Alaska does not discriminate on the basis of race, religion, color, national origin, citizenship, age, sex, physical or mental disability, status as a protected veteran, marital status, changes in marital status, pregnancy, childbirth or related medical conditions, parenthood, sexual orientation, gender identity, political affiliation or belief, genetic information, or other legally protected status. The

University's commitment to nondiscrimination, including against sex discrimination, applies to students, employees, and applicants for admission and employment. Contact information, applicable laws, and complaint procedures are included on UA's statement of nondiscrimination available at www.alaska.edu/nondiscrimination. For more information, contact:

UAF Department of Equity and Compliance
1692 Tok Lane, 3rd floor, Constitution Hall, Fairbanks, AK 99775
907-474-7300
uaf-deo@alaska.edu

Additional syllabi statement for courses including off-campus programs and research activities:

University Sponsored Off-Campus Programs and Research Activities

We want you to know that:

1. UA is an AA/EO employer and educational institution and prohibits illegal discrimination against any individual: www.alaska.edu/nondiscrimination.
2. Incidents can be reported to your university's Equity and Compliance office (listed below) or online reporting portal. University of Alaska takes immediate, effective, and appropriate action to respond to reported acts of discrimination and harassment.
3. There are supportive measures available to individuals that may have experienced discrimination.
4. University of Alaska's Board of Regents' Policy & University Regulations (UA BoR P&R) 01.02.020 Nondiscrimination and 01.04 Sex and Gender-Based Discrimination Under Title IX, go to: <http://alaska.edu/bor/policy-regulations/>.
5. UA BoR P&R apply at all university owned or operated sites, university sanctioned events, clinical sites and during all academic or research related travel that are university sponsored.

For further information on your rights and resources [click here](#).
